PREFACE.

Noah Webster's Work.

It is something over one hundred years since Noah Webster began work on an "American Dictionary of the English Language," having in mind the wants of his countrymen in the United States; the population being sparse and for the most part with very meager opportunities for school education.

The then recent Revolutionary War, — the destruction of property, the deaths by disease, and the other fortunes of war that had come to the native population, — had left a condition of poverty such as produces disaster to schools and the means of education. The situation impressed a citizen of a patriotic and thoughtful turn of mind as one in which facilities for self-education were more important than any other provision which could be made for the welfare of the people. It is not strange that a young man of Webster's character, having become a teacher, should think of a spelling book as the first of all necessaries for a population that must be self-taught for the most part, or else remain illiterate. Noah Webster's spelling book, published in 1783, combined what would now be found in a primer, a first reader, and a spelling book. Eight or ten thousand words became familiar to the eye, and the bright youth or earnest-minded illiterate of middle age could acquire the art of reading with little help from others beyond that needed in learning the letters of the alphabet. His spelling book became the schoolbook most used in America in the early decades of the nineteenth century, and its annual sale approximated a million of copies by 1850, and in the early seventies had increased to a million and a quarter.

A score or more of years after the speller was published, Webster took up the making of another book, intended for the aid of the self-taught man from his childhood to the end of his life: this was the dictionary. It was to be published in America and was to be adapted to the wants of a colonial people that had become independent of the mother nation and had partially formed a colloquial and literary vocabulary of its own, separating the migrating people from the parent stock. What greater help to the self-instruction of a people than a dictionary that should be a key to the wisdom of the English-speaking race as found in its books of science, literature, and history, and should include, too, the new word growth of the new land? This more than anything else in the range of devices and instrumentalities for culture should supplement the school and the elementary spelling book, and should make the population eye-minded, so to speak, as well as ear-minded, — make the common language of the people visible to the eye as well as audible to the ear, — but with this important variation: of the two kinds of language the printed language gives much more ability for self-help than the oral language. The oral language rarely uses much of the literary vocabulary or of the scientific vocabulary. The oral vocabulary does not train one to accurate thought, while the reader of books and periodicals is in a position to gain every day some increment of scholarship and wisdom, some scrap of scientific observation, knowledge of some event in world history that throws light on human nature or adds to his own sum total of learning.

The First Quarto Edition.

Aided by the profits from the sale of his spelling book, Noah Webster was able to devote his time to the preparation of such a dictionary, — first at home and later in Paris and London. In 1828 he brought out a first edition in two quarto volumes, twenty-five hundred copies being offered for sale in the United States and an English edition of three thousand in London at the same time. The vocabulary contained 70,000 words, — 12,000 more than the American edition of Todd's Johnson, — and this number was increased by several thousands in Webster's second edition in 1840. From the beginning Webster made a great impression with his definitions, which were praised as giving "a clear, full, and accurate exhibition of all the various shades of meaning." The scope of the vocabulary was increased in the second and later editions so as to contain a larger number not only of the words that had become classic in English literature, but also of the technical terms used in the sciences, history, politics, geography, travel, etc. After the death of Noah Webster, a new edition of the Dictionary appeared in 1847 under the editorship of his son-in-law Professor Chauncey A. Goodrich, the original two volumes being brought into one. A pictorial supplement was added in 1859.

The "Unabridged."

A general revision, which became popularly known as the "Unabridged," was published in 1864. Of this edition Dr. Noah Porter, later President of Yale College, was editor in chief; among a number of eminent contributors, Professor William D. Whitney, the philologist, and Dr. Daniel C. Gilman, later President of Johns Hopkins University, were conspicuous. The etymologies were modernized by Dr. C. A. F. Mahn of Berlin; the vocabulary was increased to an aggregate of 114,000 words. A supplement of new matter was added in 1879.

The International.

In 1890 appeared another complete and more radical revision of the entire volume. Its new title, "Webster's International Dictionary," marked the fact that the work of Webster and his successors had won wide recognition in Great Britain and its colonies, that it had been enriched by the scholarship of various peoples, and had become a standard authority throughout the English-speaking world. This edition, like its predecessor, was under the general supervision of President Noah Porter, with Loomis J. Campbell, LL.D., as the head of the office staff. Associated with him were many assistant editors, including Mr. F. Sturges Allen, the General Editor of the present work, and many eminent specialists. This was the most extensive and exhaustive revision that the dictionary had received. The vocabulary was extended to about 175,000 words. In 1900, this was enlarged by a supplement of new words.

The New International.

To the two great revisions of Noah Webster's work, the "Unabridged" and the "International," the present volume adds a third as the "New International." The book has been entirely remade: the previous material has been sifted and rearranged; a radical change in the construction of the page has been introduced; the definitions have been treated with nicer discrimination and a more historic method; and in every department there has been an enlargement of the vocabulary and an enrichment with new information. Its salient features in comparison with its predecessor are: A more full and scholarly treatment of the whole field of the English language; a great addition of words and definitions; a greatly increased amount of encyclopedic information; a more exhaustive and discriminating treatment of synonyms; a greater comprehensiveness in the illustrations; and an arrangement of material that makes the dictionary much easier of consultation. In short, the New International is essentially a new book.

Convenience of Consultation.

In the present edition the words brought together in the supplement of 1900 have been distributed in their alphabetical places, and a similar distribution has been made of much of the material printed in previous editions as an appendix. One will not have to seek in separate vocabularies at the end of the volume for the Names Noted in Fiction, Scripture Proper Names, English Christian Names, Classical and Foreign Quotations, Proverbs, etc., or for other lists of the kind, with the important exception of the Biographical and Geographical name lists, which cannot, by reason of the necessity for frequent changes, be included in the body of the work. Further to facilitate consultation, phrases have been inserted in a more convenient alphabetic order; greater attention than ever before has been paid to linking entries together by cross references; and various important typographical changes have been made.

Counting together the main words, with their inflections and derivatives in so far as they involve peculiarities of meaning, and the combinations or compound words and phrases, the present vocabulary has more than double the number of entries included, in the next previous edition, that of 1900. According to an accurate count, the number of words printed in bold-faced type, together with the inflected forms that appear in small capitals, totals more than four hundred thousand.

Increase of Vocabulary.

The attempt to utilize all space to the utmost, which must be made in every one-volume dictionary, has in this revision resulted in the introduction of three features that distinctively characterize the work. First, and most important, the page has been divided into two parts: an upper section containing the main words of the language, and a lower section, in a somewhat smaller type and narrow columns, containing various minor words, foreign words and phrases, abbreviations, etc. The use of this somewhat smaller type and narrow column has saved a very large amount of space, and has thus made possible the insertion of a larger vocabulary, of fuller definitions, and of more encyclopedic matter than have hitherto been found in a one-volume dictionary. Thus, many of the entries in the lower section of the page, as, for example, mere variants, if put in the main vocabulary would occupy only half a line, and their inclusion in the narrow column saves not only the space due to the difference in size of the type, but also the half line that would be left unoccupied if the terms were treated in the larger type above. Furthermore, by putting the less common and less looked-for terms by themselves, not only is the main vocabulary relieved of a multitude of confusing entries and thus made more easy of consultation; but even these minor entries are made more accessible by compact arrangement in narrow columns.

Division of Page.

The second of these space-saving features is the giving of a systematic definition to certain general words. In these definitions not only is the general word itself defined, but also the related words of the class or the minor terms depending upon the principal word. This has been done only when such a treatment makes much clearer the meaning and relations of the individual words or saves a good deal of space without involving offsetting disadvantages; and in every case such a definition has been supplemented by careful references from the individual terms to the central term. In the same way much space has been saved by giving information in the tabulated form, as is done under *army organization*, *era*, *coin*, *star*, *oil*, etc., where an amount of information is given that would have been precluded by lack of space if the terms had been treated separately. A great deal of matter is given that may be best described as encyclopedic, since it belongs to a province which the encyclopedia has hitherto made its own. See for example such words as *arch*, *bridge*, *knife*, *boiler*, *bucket*, *knot*, in the field of material construction; *constellation*, *bird*, *bone*, *phosphorus*, in the natural sciences; *partnership*, *corporation*, *annuity*, in legal and business terms; *Bible*, *Apocrypha*, in sacred literature; *Aphrodite*, *Athena*, in mythology. Under each of these titles, taken simply as illustrations from a great number, a mass of facts is given lucidly and comprehensively, bringing out clearly the mutual relations of the terms defined.

Systematic Definitions.

The third device for saving space is the defining of many purely formal derivatives by references to their prefixes or suffixes. From a primary word or stem, derivatives can be formed, almost at will, by the addition of suffixes like *-hood*, *-ship*, *-ness*, *-ish*, or of such prefixes as *non-*, *anti-*, *contra-*, *infra-*, *super-*, *sub-*, *over-*, *un-*. Any word formed by means of such a general suffix or prefix, although occurring in literature in only one or two of the senses of the main word as modified by the suffix or prefix, might legitimately be used in nearly any other sense appropriate to that of the root word. Great care has been taken to show clearly the meaning of each prefix and suffix in the various combinations in which it may occur, and derivatives have been referred to the proper prefix or suffix, thus leading to an amount of information as to the actual or potential meanings of the derivative that could not possibly be given if each one received independent treatment. By this device the utility of the book has been distinctly increased, and the consulter has also been put in the way of acquiring a knowledge of the force of the formative parts of the English language that might otherwise be overlooked or neglected.

Formal Derivatives.

The use of the daily and weekly newspaper makes constant demand for what is called above the encyclopedic feature of a one-volume dictionary that is used in every business house, family, or school. The use of the English language by a people with colonies and business houses all over the world, a people that furnishes more travelers than all other nations combined, has in some sense made it necessary for the English dictionary to contain a world vocabulary of international affairs, — of politics and commerce; of geography and history; of literature, foreign and provincial. The schools of its people are obliged to require in their course of study what is sometimes contemptuously called a mere smattering of technical and scientific vocabularies, even in the primary grades of instruction. Although a mere smattering in its beginnings at the elementary schools, yet it serves a very useful purpose by helping the individual to read with some understanding the information found in the newspaper, which is expressed in a motley combination of colloquial, literary, technical, and scientific words. One half of the newspapers in the world are published in the English language. The newspapers of the world in 1890 were reported at 47,000 separate publications, and in 1904 these had risen to 60,000. It is more important to note the size of the circulation. There were 6,653,000 copies of daily newspapers published each day; of weekly newspapers, 23,000,000 a week; of the monthlies the average edition was 9,000,000 a month. In 1904, separate publications of newspapers were 23,000 in the United States and Canada, and in Great Britain, 9,500, making 32,500 in English in these three countries.

School and Newspaper.

This is one of the great functions of the dictionary, that it furnishes a key to the daily newspaper. The newspaper has in some sort a vocabulary of its own; it has in some sense a world vocabulary of travel and business, of international affairs and village gossip, politics and commerce, a vocabulary involving a schoolboy knowledge of the technical terms of geography, history, and literature, besides an equipment of dialect, technical, foreign, and scientific words. The poorest school has given the pupils some insight into methods of reënforcing a very slender outfit of knowledge by the use of textbooks; the good school has taught the dictionary habit, and the dictionary is the key to daily self-instruction by the newspaper and cheap book. In the editing of the New International, as of the earlier Webster dictionaries, there has been constant regard for the wants of the school child and the newspaper reader, as well as for those of the erudite scholar.

The Oxford English Dictionary, the most eminent example of a history of the words of a nation's literature, has described the criterion adopted for the selection of words for entry, promising about 450,000 words and phrases in its ten volumes. These are divided into two groups containing, on the one hand, those that are used chiefly in literature, and, on the other, those chiefly in colloquial usage, a large portion of the vocabulary belonging under both heads. Again, the vocabulary of standard English is in a state of flux, continually acquiring new words or new senses of old words from outlying sources, and at the same time rejecting words once in good standing. The new words are chiefly: (1) foreign words, many of which are adopted into our language without change; (2) dialectal words or such as are used in one or more provinces or localities; (3) slang words, coming up with intense technical meaning from the colloquial portion of the language and acquiring, for the time, more or less vogue because they single out and emphasize some particular event or situation; (4) the technical words used in the arts and trades and special vocations and found for the most part in colloquial speech, or in a literature of prose fiction; (5) the scientific terms necessary for perfectly accurate and concise description.

Ebb and Flow of Language.

The historical dictionary has to set up for itself some standard by which it prevents its vocabulary from going to excess in any one of these five directions. But the single-volume dictionary for the home and school and shop must have a larger element of the ephemeral or of the prevailing fashion of speech than the historical dictionary, and must omit many vocables that are becoming obsolete. It must have a rather larger proportion of dialect words, scientific words, and technical words; it cannot go to the extent of the historic dictionary in its proportion of obsolete variants. But the revival of the study of the English literature of the earlier centuries gives to many students occasion for a

far wider vocabulary in this direction than was required even by accomplished scholars a generation ago. The one-volume dictionary is expected to meet this need by including in its vocabulary archaic and obsolete words from the writers who laid the foundations of English as it is. For this need the New International has made large provision.

The World Relationship.

The Anglo-Saxon race has continued to become more and more a cluster of nations that is active on the borderland of the civilized world. With the industrial results of science and the application of the powers of nature to the subjugation of the elemental forces, the race has been joined gradually by the other races one after the other, until at present the home-staying nations have learned or are learning the lesson and are joining the people who are to take possession of the earth in the interest of the highest civilization. Not a savage people but shall be put to school to learn the two lessons of civilization, — first, how to conquer nature by means of machinery; secondly, how to unite one's own locality with all the rest of humanity, not only by commercial exchange of goods and by productive industry, but especially by intercommunication of experience and ideas. In this intercommunication the English language is to play a leading part: and in giving wide recognition to the usages of the borderlands, Webster's New International Dictionary freshly justifies its name and emphasizes its character.

Aims and Results.

To set out fully the aims and results of the revision is impossible, but a few of the more general and important ones should not be passed unmentioned. The first aim has always been *accuracy*, and it is not out of place to say here that upon the necessity for this no one has been more insistent than the publishers themselves. Such an aim is necessarily impossible of complete attainment, but neither effort nor expense has been spared to that end. In all matters the attitude of the revision has been that it is the function of a dictionary to state the meanings in which words are in fact used, not to give expression to the editors' opinions as to what their meanings should be. Next to accuracy, *thoroughness* and *adequacy* of treatment have been aimed at. The purpose of each statement has been to give just that information concerning the term in question which it was considered would answer the consulter's question or meet his need. As a final aim, the plan of the revision has been to give *symmetry* and *unity* to the work as a whole. With this end in view the editorial corps was organized to include technical editors in the office force, so that the first draft of most of the definitions in all departments might be prepared in the office (being subsequently revised by the heads of departments), thus securing unity of plan both in the selection of terms and in the fullness of definitions. For the same purpose the work of typesetting was deferred until most of the copy was in an advanced state of preparation. It is believed that, as the result of these methods, the New International will be found to be more evenly balanced, more uniform, and better coördinated in the treatment of different departments and in the interrelation of its parts, than any other similar work yet published.

The results of the revision depend upon two things, — first, upon the quality of the work itself; second, mainly upon the changes that have taken place during the last quarter of a century in the language and in our knowledge or interest concerning it. The quality of the work will be proved by the test of use.

The changes in the language itself are both of growth and decay. Most of the growth is, of course, in the technical terminology, as in anthropology, archæology, plant physiology, morphology, foreign commerce, etc., in all of which there has been a marked addition to the words of current usage. But this increase has not by any means been confined to the technical terminology. The literary, vernacular, dialect, and slang vocabularies have also had their growth. The decay of the language has been equally wide; for example, many technical terms of classification in botany and zoölogy are becoming obsolete in the process of reclassification; the terms of descriptive anatomy coined by individual authors have partly been received, and partly dropped out of use after a temporary vogue.

The changes in public interest in classes of words or in words or language as a whole take place imperceptibly, but after a period of time are manifest in new or enlarged courses of study in our schools, new subjects of discussion or increased attention to old subjects in our newspapers, books on new subjects or new books on old subjects, etc. One of the most remarkable evidences of a present enlarged and intensified interest in the English language as a whole is the Oxford English Dictionary. The publication of this work has not only stimulated public interest in the history of English words, but has caused the public to expect larger things of other dictionaries. The New International owes, as all similar works must owe, an inestimable debt to this work, especially for its store of dated citations that furnish the basis for independent analysis of the development and meanings of English words. Indebtedness must be acknowledged as well for definitions which, here and there, are quoted with credit expressly given to that great work.

It is believed that the New International will be found to have reasonably met the conditions of change in the vocabulary and structure of our language and in public interest.

Special consideration, in this connection, should be given to the treatment of a few subjects more intimately concerned with the English language in its written form (as spelling), in its spoken form (as pronunciation), in its nicer usage (as synonyms), in its early forms and uses (as early English), in its historic origin (as etymology), and in its representation in the dictionary (as the vocabulary). These are separately treated below.

Spelling.

The principle of the New International, as of its predecessors, has been that it is the function of the dictionary, in spelling as in other particulars, to record usage rather than to create it. At present a difficulty exists for lexicographers in the fact that advocacy of proposed changes is very active. A radical and rapidly progressive change is being urged by an organized propaganda, but the popular response, as measured by actual practice, is as yet slight. The custom among American publishers of following the so-called English spelling in books intended both for the English and American market tends to favor the more conservative English practice. Yet from various causes, — the pressure toward simplicity and brevity of form, and the scholarly preference for more rational and scientific orthography, — various changes in spelling do become established. The intelligent lover of the English language recognizes the disadvantage, and even the impossibility, of a stereotyped conservatism, and, also, the opposite peril of a chaotic mixture of old and new forms, with a serious divergence between the two great English-speaking peoples. Under these conditions, the lexicographer's task is simple in principle but difficult in execution. He should ascertain and record as nearly as possible the current prevailing usage in the spelling of various classes of words, and the most evident tendencies in changes that may be taking place. In the case of indeterminate or shifting usage, his sympathy with the principles of simplicity and consistency may legitimately be shown. The policy of this book has been to recognize the advantages of a simpler spelling of many English words; to give the simpler form of spelling the preference, so far as justified by facts, as in cases where two forms are in about equally current usage; and to indicate changes proposed; but not yet generally accepted.

The Websterian traditions of preferring the termination *-er* to *-re* (as in *center* and *meter*), the undoubled consonant where an unaccented final syllable takes on a suffix (as in *travel*, *traveled*, *traveler*, *imperiling*, etc.), the retention of the final double consonant of the primitive in the derivatives *willful*, *skillful*, etc., — these traditions have been preserved, since these forms, proposed by Webster because of their analogies with other words in the language, are sanctioned by a very wide usage. In all of these cases, however, the alternative spelling is recorded by the side of the preferred form, if this alternative is also in general use. The policy of the book in this respect is well shown in such entries as *center, centre, wagon, waggon, sergeant, serjeant*, etc. In all cases where two forms of spelling are recorded that one is placed first which is regarded by the editors as the preferred form. In many cases, however, the second form is so widely used as to be practically on an equality with the one given.

Spelling Reform.

This same principle, of recording usage as it exists, has governed the action with reference to the spellings recommended in the "Spelling Reform" movement. The forms that have been proposed by the "Simplified Spelling Board" have not been entered as such, since not only is it impossible to tell, as yet, what the result of

this movement will be, but also the changes proposed by this Board are being added to so rapidly as not to admit of their being here recorded. Their work, however, has in general been based upon the recommendations of the Philological Society of England and of the American Philological Association, and the list of spellings proposed by these bodies some years ago (numbering upward of 3,000 words, and given in a separate table in the old International Dictionary) is incorporated in the vocabulary of the New International. Some of these forms, as *program, catechize, criticize*, have been generally adopted, and now take the place of precedence. Others, as past participles in *t*, may be the revival of obsolete, archaic, or poetic forms, and the facts in the case are, therefore, indicated by labeling them "Obsolete or Ref. Sp.," "Archaic or Ref. Sp.," or the like. Still other forms are marked merely "Ref. Sp." (or "R. Sp.") to indicate that they are merely the "reformed spellings" proposed for use by the philological societies.

Words containing either of the diphthongs æ and œ and derived from the Latin or Greek have usually been inserted with the diphthongal spelling as the preferred form, but with an alternative spelling given in which *e* replaces the æ or œ, as in *anœmia, anemia, archæology, archeology*, etc. In many common words, as *hemorrhage, diarrhea*, and *medieval*, the simpler spelling has come into general use and has been given the preference, but careful investigation has shown that the tendency is to prefer the æ or œ form in words in classical philology or archæology and in the more formal and technical terms in anatomy, medicine, biology, etc. The spelling of various miscellaneous words, as *asbestos, biretta, bolection, cotillion, gruesome*, etc., has been changed from that of the old book because usage now seems to favor the form now given the preference. In words from languages having no alphabet or using alphabets other than the Roman, the principle, now generally accepted, has been followed of giving a phonetic spelling in which the vowels have in general the same sounds as in Italian and the consonants their usual English values. In many instances, however, forms at variance with this system have become established and have, therefore, been preferred in the vocabulary.

Pronunciation. The indication of the pronunciation of the words in its vocabulary is an important feature of a modern English dictionary and has been a striking characteristic of all the Webster dictionaries. Many difficulties attend the preparation of this part of the work. Choice must be made of a standard from among the several varieties of cultivated pronunciation prevailing in different parts of the English-speaking world, as well as from the several styles of speaking employed even by the same speaker, it may be, upon different occasions. The actual current best usage of the locality or localities determined upon must be ascertained, and a method of indicating the pronunciations devised. For the present edition this difficult task has been intrusted to Mr. Paul W. Carhart. To a study of phonetics, begun in connection with work in teaching the deaf by the oral method, was added the experience acquired as editor of the pronunciations in the Supplement of Webster's International Dictionary of 1890 and of those in the Biographical Dictionary and Gazetteer of 1902, and this was further supplemented by extended study in England and Germany. In England most of the time was spent in special study with Dr. Henry Sweet at Oxford and in the private investigation of the differences between the standard usage of Southern England and of America. Later, in Germany, much time was spent in study under the advice of Dr. Wilhelm Viëtor.

In treating the pronunciation not only have the added words been marked with the greatest care, but every word contained in the old International has been scrupulously compared with the most recent data. Painstaking effort has been made to ascertain the best present usage, American and British. To this end recourse has been had to all recent dictionaries of standing and to numerous shorter lists of words prepared by orthoëpists and phoneticians. Furthermore, many inquiries have been addressed to leading scholars and, in the case of technical words, to specialists.

The Websterian system of phonetic symbols for indicating pronunciation has been retained with few alterations, since it was deemed unwise to change a system that has become well known to the majority of readers, — not only from its use in the series of Webster's Dictionaries, but also from its general use in text-books and in many leading works of reference, — for any of the other systems that have been devised from time to time. All of these systems, as that of the American Philological Association (1877) and the revision of this proposed in 1904, the system of L'association phonétique internationale (now widely used among teachers of modern languages, especially in England and Europe), the system used in the Oxford English Dictionary, Dr. Sweet's Romic systems, and others, differ widely from one another and have met with more or less favor from philologists and phoneticians; but none of them has gained general acceptance among the people.

Although the Websterian system has thus been retained as a whole, a few changes have been made. Thus ă, ĕ, ŏ, ŭ, are used to indicate the obscured sounds of ă, ĕ, ŏ, ŭ, in unaccented syllables, making it possible to show both the most formal pronunciation of words in which these sounds occur, and also the usual obscuration of more colloquial speech. Another important change in accord with modern phonetic views is the use of but one consonant in the respelling to represent a doubled consonant of the ordinary spelling when only one of these is actually heard in the pronunciation; as in "button" (respelled "bŭt″n"), "dollar" (dŏl′ĕr"), etc. For a full treatment of the entire subject, see the "Guide to Pronunciation."

Synonyms. The Synonymies, which constitute a new work rather than a revision, have been treated by John L. Lowes, Ph. D. (now Professor of English at Washington University, Missouri), under the advisory supervision of Professor George Lyman Kittredge, of Harvard University. The synonymies given in the book of 1890 were those written by Professor Chauncey A. Goodrich and incorporated in the edition of 1864; yet it was felt that at this point large improvement was possible, and the work has been thoroughly done from the foundation. The extent of the revision that the synonymies have undergone is best indicated by the fact that the number of articles has been increased from 600 to 1,448; of separate words treated from 1,687 to 4,810; and of illustrative citations, from less than 400 to about 6,000. With a few minor exceptions, the original articles have been wholly rewritten. The field covered has been limited to nontechnical words, and for the answers to all questions of technical usage the consulter has been referred to the definitions. The distinctions indicated are based upon actual usage, and the synonymies attempt, within the limits imposed by the necessity for extreme compactness of treatment, to supply full and authoritative illustrations from standard English writers. These citations have been selected in order to exemplify, as far as possible, in the case of each word, the particular shade of meaning under discussion. So far as space has allowed, it has been the aim of the editors to give for each word a sufficient number of concrete examples to make possible, in some degree, an independent survey of the facts.

The six thousand citations that actually appear have been selected from a collection of several times this number, all of which have been taken into account in framing the distinctions. The older synonymies drew their illustrations chiefly from the more formal writers of the eighteenth century. In the present treatment, the earlier classics — so far as they are in accord with present usage — have not been neglected, and in particular the Bible, Shakespeare, Milton, Pope, and Swift, and, of a later date, Goldsmith and Burke, have been laid under contribution. But to a larger degree, it is believed, than ever before in a similar work the illustrations have been drawn from writers — essayists, novelists, poets — who embody the best modern usage. And among these special weight has been given to those authors who combine with correctness idiomatic freedom of style. The best colloquial usage has never been lost sight of, and in exhibiting this the great letter writers (notably Cowper, Gray, Lamb, FitzGerald, Stevenson, and Lowell) have been found especially valuable.

It frequently happens that a word which is used in several senses has a number of more or less independent groups of synonyms. Thus, *contract* (v. t.), in the sense of "draw together," has among its synonyms *shorten, abridge, epitomize, narrow, reduce*. In the sense of "bring on," it is synonymous with *incur, assume, acquire*. All eight words are synonymous with *contract*, but the words in the one group are not necessarily synonymous with those in the other. Such groups are set off, in the lists of synonyms, by semicolons, and the comma is used to separate words within the same group.

Certain classes of words that twenty years ago were of little interest have now become the subject of study among scholars and of considerable general interest. For example, in the old International Dictionary quite a radical departure was made by including the obsolete vocabulary of Chaucer. The active interest of scholars in the study of early English literature had then only begun. Since that time this interest has widened and deepened, and in the present work the inclusion of obsolete words and senses has been extended to meet the needs of this interest, the work of doing this having been intrusted to Percy Waldron Long, Ph. D., formerly a lecturer on English in Bryn Mawr College. This has resulted in a feature practically new to one-volume dictionaries. For the study of early English there are now, in many colleges, special courses in metrical romance, the early Scottish poets, Langland and Gower, particular periods of Middle English, the medieval drama, etc.; and to-day it may be said that no man has a thorough literary education who has not familiarized himself with one or more of these fields of literary study. In 1890, the study of Chaucer had become common in our colleges; now it has established itself in our high schools. Some of the publications of the works of early English authors have good glossaries; most of them have very imperfect ones or are published without glossaries. No one scholar in English literature can hope to be able to read all of these early English works, or to understand all the words in any group of them, without consulting other works or other scholars. Besides this, such words constantly appear in our writers of archaic stories, in the works of poets, and many still survive in the dialects of Great Britain and the United States. The New International is the first and only single-volume dictionary to afford a general working vocabulary in this important field of study and research.

Early English and Dialect Words.

Dialect terms (which have likewise been mostly treated by Dr. Long) represent another feature of relatively modern interest, and, in a degree, an interest analogous in its origin to that in early English. In 1890, when the International was published, there was in existence no large body of dialect literature which was generally in the hands of English readers. Since then there has been a large development of dialect stories; the "kailyard poets," Kipling, the newspaper and short-story writers, and many others, have brought into the general literature of the language innumerable dialect terms. The interest in this subject is also reflected in the attention now given to it by the American Dialect Society, and especially by the monumental work of the English Dialect Society, which has taken the form of a quarto dictionary aggregating in all 4,684 pages. Still another phase of this interest is shown in the collection and enumeration of such words, often with extended comment upon them, in our zoölogical and botanical works.

The etymologies of the present edition have been revised by Professor E. S. Sheldon of Harvard University and Professor Leo Wiener, also of Harvard. The marks of Professor Sheldon's thorough scholarship and good judgment, which were noted in the International Dictionary of 1890 and its Supplement in 1900, here appear with the same distinctness. The principle of historical arrangement followed in the earlier editions has been adhered to in the present revision of the etymologies, but it has been more strictly carried out than was then done. A few words of explanation will make details in the application of the general principle clear and will prevent any misunderstanding which might occasionally result from the necessarily condensed form in which the etymologies are presented.

Etymology.

For words descended from Anglo-Saxon the Middle English form comes first, including such Middle English dialect forms as are of value for the history of the word, or sometimes that of a related English word or words to which reference is made. (But the Middle English form is sometimes omitted when obvious or when, the English word being of little importance, the etymology is reduced to the briefest possible form.) This is followed by the earlier or Anglo-Saxon word, usually given in the West Saxon form. If the word is a native one and not taken into Anglo-Saxon from some other language, the really recorded history stops here, and no attempt is made to give either supposed roots or even conjectural forms of stems showing derivational processes. But the lack of recorded history is largely supplied by adding cognates, or closely allied derivatives from the same ultimate source, in the various Indo-European languages, and by the addition of cross references to allied words in English, which often have a remarkable history. Instances may be seen under common words of native origin, as the numerals *one*, *two*, *three*, etc., familiar words like *father*, *mother*, *brother*, *daughter*, and many others. The final and fullest etymological statement for all words, whether from Anglo-Saxon or not, is regularly given under the most familiar word, which is usually, but not always, a native word; *paternal*, for instance, sends to *father* for the final etymology.

If the word, though found in Anglo-Saxon, is not native, then its immediate source if known is added; and when the word has been traced as far as possible (for example, to Latin), cognates and cross references are added, as above, if there is occasion. For words from Old Scandinavian (Old Danish) the source is given as Scandinavian, and the (old) Icelandic form as the best representative of the early Scandinavian dialect concerned is given, with the addition usually of the Danish and Swedish forms, and if the word is sufficiently important more is added, as before (cf. *law*).

Of words of foreign origin which did not pass through Anglo-Saxon, the most important to mention here are those which can be traced back to Latin. In many cases a French form, especially often an Old French form, is the intermediary, and it is not infrequently impossible to be quite certain whether the immediate source was French (Old French) or Latin. This difficulty is often met by giving the Latin word as the source and adding at the end of the etymology the French form with the abbreviation "cf." preceded by a colon. This indicates that the French word may really have been the immediate source or that the French word and the Latin word may both have been concerned in the introduction of the English one. In some cases the French word is not directly from Latin, but came into French through Provençal or Italian or Spanish; or, again, the French word may be of Germanic (Teutonic) origin. This must of course be recognized in giving the history of the word. In all these cases there was often occasion for such cross references as are mentioned above. It should be added that the historical plan here outlined is one which in a large number of cases cannot be followed completely, as the history of many words is not fully ascertained.

To give only old forms, as Old High German or Old French, when the word still exists, perhaps in a more or less altered form, in modern German or modern French, would often result in concealing an interesting fact from users of the Dictionary, who may be well acquainted with the modern language but cannot be expected to have a knowledge of its medieval forms. Accordingly, except for some less important words, the modern form, if it exists, has been added for these commonly known languages immediately after or immediately before the old form. Also, when the Old French word is the same as the modern French one and it is clear that the English word is really from the old language, the word is called simply "F.," the abbreviation "OF. & F." being used when necessary for clearness.

In general a comma [,] before the abbreviation for a language signifies derivation of what precedes from what follows, the arrangement being based on the history of the words. It is believed that any misunderstanding has been sufficiently guarded against; but it is well to say that this general rule does not necessarily apply to words which are compared as possibly or certainly related to the word under discussion, the comparison being indicated by the abbreviation "cf."

The abbreviation "OE." for Old English has been given up altogether as too ambiguous, the term Old English being used by many scholars to signify what is also called, as in this book, Anglo-Saxon. Instead of "OE." is now used "ME." (Middle English). The abbreviations "OLG." and "OD." (Old Low German and Old Dutch) apply to the period preceding that covered by dictionaries of Low German and Dutch of modern times. They mean essentially the same as Middle Low German and Middle Dutch used by many. It is believed that the terms chosen will be more intelligible to most users of the Dictionary.

In the spelling or transliteration of foreign words in the etymologies, but few changes have been made from the edition of 1890. The system followed is essentially that of Skeat (as set forth in the "Brief Notes" prefixed to his larger Etymological Dictionary). The only important variations are those which

follow. In Sanskrit words, *c* is used instead of *ch;* *ch* instead of *chh;* and *r*, *ṭ*, *ḍ*, *ṭh*, *ḍh*, *n*, instead of ri, t, d, *th*, d*h*, n. Instead of *m̃*, the sign *ṃ* has probably been used once or twice. In Gothic words, *q* is used instead of *kw;* *þ* instead of *th;* and the short *ai* and *au* are written *aí*, *aú*. In Arabic words, the fourteenth letter of the alphabet is rendered by *ç* instead of *s*. The Russian letters represented in Skeat's list by *ui*, *ie*, *iu*, *ia*, *e* (the sign of palatalization) are written *y*, *ye*, *yu*, *ya*, ' (apostrophe); the silent letter expressed in Skeat's list by an apostrophe is omitted. No attempt has been made to discriminate systematically the Anglo-Saxon, or Old English, letters *ð* and *þ* (see *edh*, and *thorn*, *n.*, 4, in the Vocabulary). Long vowels are marked throughout with the macron (as *ā*, *ē*, etc.) in the languages where it is usual to mark long vowels as such.

General charge of the revision of the etymologies was given to Professor Sheldon. He soon found, however, that he needed assistance in making the vast amount of research required for the new words and for many old ones, and to this end the collaboration of Professor Wiener was secured. His field of work eventually covered all new terms not strictly literary, comprising scientific terms in zoölogy, botany, etc., and popular and foreign designations of plants, animals, manufactures, inventions, etc., together with similar terms in the latter half of the International of 1890 that had been treated inadequately or not at all. His method was to pursue all words to their original sources, with a thoroughness which, especially in the case of scientific terms, makes this feature of the revision a notable one. Professor Wiener's plan has been to keep in view the general history of each science; to locate a given word as to the time and the particular work where it first appeared; and to scrutinize the evidence as to its derivation. When the explanation given by the proposer of the word has been found, it sometimes appears that he has made a new use of an older word, which can be traced; sometimes the proposer has given no etymology, but a knowledge of his usual methods gives the clew. Thus, instead of a modern Latin designation from a native name in some unfamiliar language, a form might be taken from Greek which resembled the other name or was even identical with it, as was done by Linnæus in continuing to use *Thea* but explaining it as from Greek. As further illustrations may be instanced *diabase*, *melam*, and *melamine*. Some words generally supposed to be of native American origin there appeared to be reason to believe were borrowed by aboriginal American languages from Europeans; *canoe*, *maguey*, *peccary*, *pulque*, are perhaps the most noteworthy cases of the sort. So too words which are, or are commonly thought to be, from various African sources are here, it is believed, for the first time definitely localized or better explained (see *tsetse*, *widow bird*, *zebra*). In the case of inventions a similar process has involved much scrutiny of Patent Office records, scientific magazines, etc. To Professor Wiener have also been referred a large number of the etymologies of dialect and obsolete words in the last fourth of the Dictionary, especially from old texts, as well as from Nares, Halliwell, Davies, etc. His original research has extended into the Slavic and various Oriental languages, and has gathered much new material from Polynesian, Australian, African, and North and South American sources. Of the slips given out for etymological treatment, about one third have been dealt with by him.

Space forbids the enumeration of the many works of etymological research which the editors have consulted, but it must be said that the Oxford English Dictionary has been constantly at hand, and its abundant dated citations have been used, together with similar material drawn from various sources, in a fresh examination of the etymologies. Much time was necessarily devoted to looking up words in their context in the works from which single words or passages were taken, and in comparing with the originals in the case of translations. It was intended to admit in the etymologies no positive statement depending on an unverified quotation or on an unverified word form in any language. Whenever the etymology here given is entirely due to the Oxford Dictionary credit is expressly given. In many cases, however, a disagreement of more or less consequence has prevented acknowledgment under the word itself, and in such cases the reviser's judgment was very likely more than once in fault. Study of the available evidence has often led to somewhat different results from those given in that work. Among the words in common use, to mention no others, which furnish examples of this are *excise*, *fay* (a fairy), the name of the letter *h*, *jewel*, *lettuce*, *palmistry*, *parable*, *pilgrim*, *point-blank*, *quash* (to crush), *render*, *reprieve*, *resort;* here, too, may be mentioned the suggestion on the phrase *mad as a hatter* (see the note under *hatter*); and among words not yet reached by the Oxford Dictionary attention may be called to *purse*, *subdue*, *surprise*, *surrender*, *taunt*, v., *tender*, v. & n., *upher*, *varnish*, *very*.

Vocabulary.

The general one-volume dictionary appeals to a public universal in its interests, and the vocabulary of such a book must therefore be equally universal in its scope. The selection of the terms for such a vocabulary is one of the most difficult and laborious tasks involved in lexicography. The number available is always far in excess of, and for a one-volume dictionary many times, the number possible to be given. The reviser in making his selection is guided, broadly speaking, by utility; that is, he aims to include the terms most likely to be looked for by the consulter of the dictionary. This general basis of inclusion or exclusion as applied to different branches of the vocabulary calls for the consideration of different facts. The terms in the vocabulary of the general dictionary are broadly divisible, as already noted, into literary, colloquial, technical, dialectal, scientific, and foreign. In the New International *literary terms* have been included except where there existed some evident reason for omission. The most important reason for omission is the fact of being obsolete. Modern literary terms that are normal in their formation and not evidently nonce words have been presumed to be worth inclusion; obsolete terms have in general been included when they occur in the works of the more important authors (especially those studied in the schools, colleges, and universities) or when they have a special value in some particular branch of learning. Nonce words have, as a rule, been included when found in the more important authors such as Shakespeare, Milton's poetical works, Tennyson, etc.

Next to literary words, *colloquial words* have been most freely admitted. These consist of words used in ordinary conversation, and in many instances ultimately become a part of the literary language. They have, therefore, been included in the Dictionary with some degree of liberality.

Foreign terms have been admitted only upon evidence of their having more than occasional use in literature or upon evidence of their being in common colloquial use.

Dialectal terms are included chiefly because they are found in current literature or because of some fact (such as etymological interest, very common usage in speech, local usage for the names of animals, plants, customs, etc.) giving them some uncommon interest.

Slang terms have been in general omitted, except where they either have had considerable literary usage or have acquired some special interest of meaning, origin, etc., that is likely to make them a subject of inquiry.

Scientific and technical terms have, in general, been included when they have become more or less frequent in general literature or in scientific literature of popular or semipopular interest, when they have some special human interest (economic, commercial, hygienic, or the like), or when they are of considerable importance in the general literature of the subject to which they belong.

These are but a few broad rules involved in the principles of selection that have been kept before the revisers throughout their work. In their application thousands of words have necessarily been omitted, some of which will doubtless be missed by an occasional consulter; but, as a whole, the vocabulary of the New International is a more complete reflection of the multiform human ideas embodied in words than has ever before been included in a dictionary.

Illustrations.

The total number of illustrations is upwards of 6,000. Of these, nearly one half are new. While many illustrations have been retained from the old International, each of these has been carefully verified. Those retained are, for the most part, illustrations of animals, plants, and of other subjects which from their nature are not subject to change. The purpose has been in every instance to furnish illustrations that will tell a story or explain some feature more clearly or more concisely than could be done by words. Special attention has been given to illustrations of machinery, scientific instruments, and the like, in recognition of the great advance that has been made in these subjects. Most of the work in the preparation of the illustrations has been in the hands of Mr. A. D. Sheffield,

and the book owes much to his nice artistic sense. The thanks of the publishers and editors are due to many for assistance in preparing the illustrations, for criticism of drawings, etc. Especial acknowledgment should be made to Dr. N. L. Britton and Hon. Addison Brown for permission to use the "Illustrated Flora of the Northern States and Canada" in preparing the drawings for the illustrations (often reduced in size) given under the entries *Adiantum, alder, barberry, Bidens, blackberry, buttercup, Carex, catnip, dog rose, Dryopteris, Dutchman's-breeches, elm, Equisetum, erose, flax, greenbrier, hawthorn, hazel, Hepatica, Isoetes, Jeffersonia, Lobelia, lupine, mallow, millet, mountain laurel, Paulownia, Pentstemon, Physalis, pickerel weed, Pipsissewa, plantain, Sagittaria, sea oat, sheep laurel, silver maple, Spiræa, sugar maple, thyme, umbel, Utricularia,* and *willow.*

Alphabetical Order of Phrases.

In the general plan of the book the aim has been to put each title into its strictly alphabetical place in the vocabulary. Phrases other than two-noun phrases have been entered under the first main word — usually an adjective, or a verb. The two-noun phrases (many of which, as *Aaron's rod, abbey laird, acacia plum,* are often hyphened), are placed in alphabetic order in the vocabulary, as if they were single words. Each phrase, therefore, will be found in its alphabetical place, and with the definition accompanying it, except when a cross reference is given to some systematic definition under which the phrase is defined. To the rule of strict alphabetization, the only exception of note is the case of the comparatively few phrases in which the first main word is a verb that is variable, as: "to bear or carry away the bell," in which the entry is made under the noun, in this instance *bell.*

The Editorial Force, including Special Editors.

The office editorial staff has been so organized as to include men specially trained in the leading branches both of literature and of science. Though most of the definitions in the special departments were originally framed in the office, all definitions in each department have been revised by the head of the department either in copy or proof. Those editors of departments who were not members of the office staff have been, with a very few exceptions (such as Professor Logeman of South Africa), in close working connection with the office.

The subjects which have been systematically referred to specialists for revision, with the names of the specialists, are as follows:

Agriculture. Alfred Charles True, Ph. D., Director of Office of Experiment Stations, United States Department of Agriculture.

Anthropology, including, besides *Ethnology* proper, names of *Languages* and *Tables of Languages, Archæology,* etc. Hartley Burr Alexander, Ph. D., now Professor of Philosophy in the University of Nebraska.

Architecture, Arts, Fine Arts, Heraldry. Mr. Russell Sturgis, editor of the "Dictionary of Architecture." After the death of Mr. Sturgis, in 1909, the work on the last few letters of the alphabet was done by his sons D. N. B. Sturgis and Edward B. Sturgis, who had been his assistants throughout the whole of the work.

Astronomy. David Todd, Ph. D., Professor of Astronomy and Navigation, and Director of the Observatory, Amherst College. During Professor Todd's absence, Professor John Edwin Ostrander, A. M., Professor of Mathematics and Civil Engineering, Massachusetts Agricultural College.

Bacteriology. Lewis Ralph Jones, Ph. D., Professor of Botany, University of Vermont.

Biology. See *Bacteriology, Botany, Zoölogy.*

Botany, Horticulture, and *Forestry.* Charles Louis Pollard, now Curator-in-chief of the Staten Island Association of Arts and Sciences. See *Zoölogy.*

Chemistry. Austin M. Patterson, Ph. D., Editor of "Chemical Abstracts" of the American Chemical Society.

Civil Engineering. See *Mechanics.*

Ecclesiastical terms. Samuel Macauley Jackson, D. D., editor of "The New Schaff-Herzog Encyclopedia of Religious Knowledge."

Economics. Arthur Twining Hadley, President of Yale University.

Electricity. Frederick Bedell, Ph. D., Professor of Applied Electricity, Cornell University. Professor Bedell also supplied the material for the *Table of Units.*

Ethnology. See *Anthropology.*

Etymology. E. S. Sheldon, Professor of Romance Philology, and Leo Wiener, Assistant Professor of Slavic Languages and Literature, both of Harvard University.

Fine Arts. See *Architecture.*

Foreign phrases. Frederic Wilkinson Kilbourne, Ph. D.

Forestry. See *Botany.*

Geology. Rollin D. Salisbury, LL. D., Professor of Geographic Geology, Chicago University.

Golf. Walter J. Travis.

Grammar and Prosody. Alfred Dwight Sheffield, A. M.

Heraldry. See *Architecture.*

Horticulture. See *Botany.*

Japanese words. K. Asakawa, Ph. D., Instructor in History of Japanese Civilization, Yale University.

Law. F. Sturges Allen, LL. B., the general editor.

Mathematics. William Benjamin Smith, LL. D., Professor of Philosophy, Tulane University, New Orleans (formerly Professor of Mathematics, Tulane University). Professor George Daniel Olds, of Amherst College, prepared the definitions of terms in the letters "A" and "B." For a few letters towards the end of the alphabet Professor Albert Bledsoe Dinwiddie, Ph. D., of Tulane University, read the proof during Professor Smith's absence from the country.

Mechanical and Civil Engineering, Mechanic Arts and Trades. Henry Farrington, M. Sc., B. Eng.

Medicine. Alfred O. Lee, M. D., Berlin University, now Instructor in Modern Languages, University of Michigan.

Mendelian Law and allied terms. William Bateson, M. A., F. R. S., Professor of Biology, Cambridge, England.

Metallurgy and Mining. Rossiter Worthington Raymond, Ph. D., Secretary of the American Institute of Mining Engineers.

Metaphysics. See *Philosophy.*

Meteorology. Cleveland Abbe, LL. D., editor of the "Monthly Weather Review."

Military terms. Colonel Charles H. Clark, Lt.-Col. Ormond M. Lissak (formerly Professor of Ordnance and Science of Gunnery, West Point Military Academy), and Major Edward P. O'Hern, Professor of Ordnance and of the Science of Gunnery, West Point Military Academy. Most of the definitions were tentatively prepared by Mr. Griffith.

Mineralogy. Edward Salisbury Dana, Ph. D., Professor of Physics, and Curator of the Mineralogical Collection, Yale University.

Music. Edward Dickinson, A. M., Professor of the History and Criticism of Music, Oberlin College, Oberlin, Ohio. The definitions were tentatively prepared by Mr. Sheffield.

Mythology. See *Anthropology,* above.

Nautical and Naval terms. Lieutenant Commanders T. P. Magruder, R. C. Moody, L. M. Nulton, and Edwin T. Pollock, all of the Naval Academy at Annapolis, Maryland, succeeding each other as editors in the order named. The definitions were tentatively prepared by Mr. Griffith.

Obsolete and Dialect Words. Percy Waldron Long, Ph. D.

Petrography. Louis Valentine Pirsson, A. M., Professor of Physical Geology, Yale University.

Philippine terms. Everett E. Thompson, A. M., for three and a half years a Civil Service Examiner in Manila.

Philology. Edward S. Sheldon, Professor of Romance Philology, Harvard University.

Philosophy. William Torrey Harris, LL. D., Editor in Chief. The terms in the Philosophical branches of learning — including Metaphysics, Logic, Psychology, Ethics, and Æsthetics — were originally defined or edited by Hartley B. Alexander, Ph. D., now Professor of Philosophy in the University of Nebraska. Such of the definitions as were essentially modified by the Editor in Chief are signed by his name in the Dictionary.

Phonetics. Paul Worthington Carhart.

Physics. Edward Leamington Nichols, LL. D., Professor of Physics, Cornell University.

Proper Names in Fiction, History, etc. Frederick Wilkinson Kilbourne, Ph. D.

Roman Catholic Theology and History. Rev. William Turner, S. T. D., D. D., Professor of the History of Philosophy, Catholic University of America, Washington, D. C.; author of "History of Philosophy."

Semitics. Morris Jastrow, Jr., Ph. D., Professor of Semitic Languages, University of Pennsylvania.

South African terms. W. S. Logeman, Professor of Modern Languages in South African College, Cape Town, South Africa.

Synonyms. John L. Lowes, Ph. D., Professor of English, Washington University, St. Louis, Mo., under the advisory supervision of George Lyman Kittredge, LL. D., Litt. D., Professor of English, Harvard University. Professor Kittredge has also given many valuable criticisms and suggestions respecting other parts of the work.

Veterinary terms. John Robbins Mohler, V. M. D., Chief of the Division of Pathology, United States Department of Agriculture.

Zoölogy. Willard Gibbs Van Name, Ph. D. Dr. Van Name's department has included the various branches of *Biology*, with the exception of Botany. He has also edited the terms in *Comparative and Human Anatomy*, *Embryology*, *Histology*, *Paleontology* (of animals), *Zoögeography*, and many minor subjects. In preparing the definitions of many general terms in biology involving ideas common to both Botany and Zoölogy, Mr. Pollard has collaborated with Dr. Van Name. For the latter half of the book he was assisted on the terms relating to birds, mammals, and zoögeography by Mr. Wilfred H. Osgood, now Assistant Curator of Mammalogy and Ornithology in the Field Museum of Natural History, Chicago, Ill.; and on the general zoölogical and biological terms by Professor W. P. Hay, the head of the Biological Department of the Public Schools of the City of Washington, D. C.

There have also been connected with the work in a less formal way C. O. Sylvester Mawson, M. A., for many years a resident of India, who has furnished much information regarding East Indian words, and F. N. Robinson, Ph. D., Professor of English at Harvard University, who has answered a large number of questions respecting Gaelic words.

For the work of general revision, the office force has been made up as follows:

F. Sturges Allen, General Editor.

Revising Editors:

Hartley Burr Alexander, Ph. D., now Professor of Philosophy, University of Nebraska.
Edward Lathrop Engle, one of the editors of the New International Encyclopædia.
Harold Russell Griffith.
Lucius Hudson Holt, Ph. D., formerly Instructor in English, Yale University.
John R. Howard.
Frederick Wilkinson Kilbourne, Ph. D.
Percy Waldron Long, Ph. D., formerly Lecturer on English, Bryn Mawr College.
Alfred Dwight Sheffield, A. M., formerly Professor of English, University School, Cleveland, Ohio.
F. Horace Teall (as proof reader and editor).
Everett E. Thompson, A. M.
K. N. Washburn Jr.

Among other workers in the office have been Frank D. Stickney (formerly proof reader at the Riverside Press), Miss Annie L. Bailey, Miss Clara S. Hawes, Mrs. Horace E. Morrow.

Mention should also be made of the proof readers at the Riverside Press, and especially of Mr. George T. Elliot, the head reader on the work, not only for their technical skill but also for many valuable suggestions of a general character.

It is not practicable to give to the members of the staff the individual recognition they have merited for their loyalty and efficiency. But mention should be made of the especial service of Mr. Allen, the general editor. Equipped by a university and legal training, by experience on the editorial staff of the International, as head of the office staff that prepared its Supplement, and as editor of Webster's Collegiate Dictionary, — he has brought to the making of the New International a mastery of the principles and details of lexicography, a trained instinct serviceable alike in dealing with definitions and with men, an unstinted industry, and an entire devotion.

The editorial force has been fortunate in having as its business head Mr. A. G. Baker, who, besides exercising a general business supervision of the office, has acted as the representative of the publishers in the decision of matters involving questions of policy. He has also given the whole book as it progressed an understanding and critical examination that has contributed largely to its symmetry, accuracy, and effectiveness. For this he was eminently fitted by his experience in connection with the making of the revision of 1890 and the supplement of 1900, as well as by his broad intellectual interests, which have given him an unusual grasp of the conditions and needs of such work from the editorial standpoint and a sympathy with the ideals of the revisers.

Other Assistants. In addition to the office staff and special editors already mentioned, the book owes much to many correspondents scattered throughout the English-speaking world, who have from time to time sent to the publishers criticisms of the old International or suggestions of new words and meanings. Of especial importance have been the contributions of Professor J. M. Hart of Cornell University, who placed at the disposal of the editors a large accumulation of notes and of citations, chiefly from the earlier English authors. Much material also has been received from J. H. Maiden, Government Botanist of New South Wales, Australia; Dr. R. K. Buehrle, Superintendent of Schools, Lancaster, Pa.; F. F. Crevecoeur, Onaga, Kansas; C. W. Ernst, Boston, Mass.; C. W. Lewis, Brockton, Mass., and many others. Thousands of persons, also, have answered questions sent to them by the editors respecting particular subjects with which they were especially familiar. For all of this information, which has materially enriched the book and enhanced its accuracy, the grateful thanks of its makers are given.

W. T. H.

The publication of the returns of the last decennial censuses taken by the leading nations of the world has made available a great amount of statistical material that is now incorporated in the "Pronouncing Gazetteer." In addition to this, numerous changes and additions of a minor nature have been made throughout the book.

LIST OF AUTHORS QUOTED

AS AUTHORITY FOR, OR IN ILLUSTRATION OF, THE FORMS AND USES OF WORDS GIVEN IN THIS DICTIONARY.

☞ The books of the Bible, periodicals, and some works of anonymous or doubtful authorship, are cited by name only.

Quoted in Dict. as	Names in full.	Dates.
Abp. Abbot . .	Abbot, Abp. George (English divine)	1562–1633
Abbott	Abbott, Benj. Vaughan. [*Law Dict.*]	1830–1890

Lauder Brunton	Brunton, Thomas Lauder (Scot. physician)	1844–

Semitics. Morris Jastrow, Jr., Ph. D., Professor of Semitic Languages, University of Pennsylvania.

South African terms. W. S. Logeman, Professor of Modern Languages in South African College, Cape Town, South Africa.

Synonyms. John L. Lowes, Ph. D., Professor of English, Washington University, St. Louis, Mo., under the advisory supervision of George Lyman Kittredge, LL. D., Litt. D., Professor of English, Harvard University. Professor Kittredge has also given many valuable criticisms and suggestions respecting other parts of the work.

Veterinary terms. John Robbins Mohler, V. M. D., Chief of the Division of Pathology, United States Department of Agriculture.

Zoölogy. Willard Gibbs Van Name, Ph. D. Dr. Van Name's department has included the various branches of *Biology*, with the exception of Botany. He has also edited the terms in *Comparative and Human Anatomy, Embryology, Histology, Paleontology* (of animals), *Zoögeography*, and many minor subjects. In preparing the definitions of many general terms in biology involving ideas common to both Botany and Zoölogy, Mr. Pollard has collaborated with Dr. Van Name. For the latter half of the book he was assisted on the terms relating to birds, mammals, and zoögeography by Mr. Wilfred H. Osgood, now Assistant Curator of Mammalogy and Ornithology in the Field Museum of Natural History, Chicago, Ill.; and on the general zoölogical and biological terms by Professor W. P. Hay, the head of the Biological Department of the Public Schools of the City of Washington, D. C.

There have also been connected with the work in a less formal way C. O. Sylvester Mawson, M. A., for many years a resident of India, who has furnished much information regarding East Indian words, and F. N. Robinson, Ph. D., Professor of English at Harvard University, who has answered a large number of questions respecting Gaelic words.

For the work of general revision, the office force has been made up as follows:

F. Sturges Allen, General Editor.

Revising Editors:

Hartley Burr Alexander, Ph. D., now Professor of Philosophy, University of Nebraska.
Edward Lathrop Engle, one of the editors of the New International Encyclopædia.
Harold Russell Griffith.
Lucius Hudson Holt, Ph. D., formerly Instructor in English, Yale University.
John R. Howard.
Frederick Wilkinson Kilbourne, Ph. D.
Percy Waldron Long, Ph. D., formerly Lecturer on English, Bryn Mawr College.
Alfred Dwight Sheffield, A. M., formerly Professor of English, University School, Cleveland, Ohio.
F. Horace Teall (as proof reader and editor).
Everett E. Thompson, A. M.
K. N. Washburn Jr.

Among other workers in the office have been Frank D. Stickney (formerly proof reader at the Riverside Press), Miss Annie L. Bailey, Miss Clara S. Hawes, Mrs. Horace E. Morrow.

Mention should also be made of the proof readers at the Riverside Press, and especially of Mr. George T. Elliot, the head reader on the work, not only for their technical skill but also for many valuable suggestions of a general character.

It is not practicable to give to the members of the staff the individual recognition they have merited for their loyalty and efficiency. But mention should be made of the especial service of Mr. Allen, the general editor. Equipped by a university and legal training, by experience on the editorial staff of the International, as head of the office staff that prepared its Supplement, and as editor of Webster's Collegiate Dictionary, — he has brought to the making of the New International a mastery of the principles and details of lexicography, a trained instinct serviceable alike in dealing with definitions and with men, an unstinted industry, and an entire devotion.

The editorial force has been fortunate in having as its business head Mr. A. G. Baker, who, besides exercising a general business supervision of the office, has acted as the representative of the publishers in the decision of matters involving questions of policy. He has also given the whole book as it progressed an understanding and critical examination that has contributed largely to its symmetry, accuracy, and effectiveness. For this he was eminently fitted by his experience in connection with the making of the revision of 1890 and the supplement of 1900, as well as by his broad intellectual interests, which have given him an unusual grasp of the conditions and needs of such work from the editorial standpoint and a sympathy with the ideals of the revisers.

Other Assistants. In addition to the office staff and special editors already mentioned, the book owes much to many correspondents scattered throughout the English-speaking world, who have from time to time sent to the publishers criticisms of the old International or suggestions of new words and meanings. Of especial importance have been the contributions of Professor J. M. Hart of Cornell University, who placed at the disposal of the editors a large accumulation of notes and of citations, chiefly from the earlier English authors. Much material also has been received from J. H. Maiden, Government Botanist of New South Wales, Australia; Dr. R. K. Buehrle, Superintendent of Schools, Lancaster, Pa.; F. F. Crevecoeur, Onaga, Kansas; C. W. Ernst, Boston, Mass.; C. W. Lewis, Brockton, Mass., and many others. Thousands of persons, also, have answered questions sent to them by the editors respecting particular subjects with which they were especially familiar. For all of this information, which has materially enriched the book and enhanced its accuracy, the grateful thanks of its makers are given.

W. T. H.

The publication of the returns of the last decennial censuses taken by the leading nations of the world has made available a great amount of statistical material that is now incorporated in the "Pronouncing Gazetteer." In addition to this, numerous changes and additions of a minor nature have been made throughout the book.

LIST OF AUTHORS QUOTED

AS AUTHORITY FOR, OR IN ILLUSTRATION OF, THE FORMS AND USES OF WORDS GIVEN IN THIS DICTIONARY.

☞ The books of the Bible, periodicals, and some works of anonymous or doubtful authorship, are cited by name only.

Quoted in Dict. as	Names in full.	Dates.

A BRIEF HISTORY OF THE ENGLISH LANGUAGE.

By JAMES HADLEY, LL. D.,

PROFESSOR OF THE GREEK LANGUAGE AND LITERATURE IN YALE COLLEGE.

Revised by GEORGE LYMAN KITTREDGE, LL. D., Litt. D.,

PROFESSOR OF ENGLISH IN HARVARD UNIVERSITY.

LANGUAGES AKIN TO THE ENGLISH.

§ 1. Anglo-Saxon, Teutonic, Indo-European. The English language is the descendant and representative of the Anglo-Saxon. It has lost very much of the inflection, and very many of the words, which belonged to the old language; and, on the other hand, it has borrowed words very largely, to the extent even of half its vocabulary, from other languages, especially the French and the Latin. Yet all the inflections that remain in it, and most of its formative endings, the pronouns and particles, and, in general, the words which are in most frequent and familiar use, have come to it from the Anglo-Saxon. With all its assimilation of foreign elements, it is still a Teutonic language, like the German, Dutch, Swedish, Danish, and others. These, again, make one subfamily in that great family of languages which, as it extends from India westward, and covers nearly the entire area of Europe, is called *Indo-European*. Among all families of kindred tongues, the Indo-European is preëminent, both for the perfection of its organic structure, and for the value of its literary monuments. The parent of the whole family, the Indo-European language, has left no such monument of itself; but its forms and roots may be made out, to a great extent, by a scientific comparison of the languages which are descended from it. It is impossible, however, to speak of this language as an historical unit, for our means of investigation do not allow us to get farther back than an indeterminate period in which it seems to have consisted of a group of closely related dialects. These may, for convenience, be collectively designated as the original Indo-European language, — that is, as the parent speech from which all the languages of the Indo-European family are descended. The main branches of the family are the following: —

§ 2. I. The Indic. The *Sanskrit* of the four Vedas, the sacred books of the Brahman religion, is more ancient than the common or classical Sanskrit. Even the latter had ceased to be the language of common life as early as the third century before Christ. It was succeeded by the *Prakrit* dialects, one of which, the *Pali*, is the sacred language of the Buddhists in Ceylon, Burma, and Siam. These, in their turn, were succeeded by the modern idioms of Northern and Central Hindustan, — the *Bengali*, *Marathi*, *Gujarati*, and others. The *Hindustani* (or *Urdu*), based on *Hindi*, was formed in the camps and courts of the Mohammedan conquerors of India, and is largely intermixed with Persian and Arabic. The widely scattered *Gypsies* speak, with great diversity of dialect, a language which is probably of Indic stock.

§ 3. II. The Iranian. To this branch belong: 1. The *Avestan* (less properly called *Zend*), which is preserved in the Avesta, or sacred writings of the Parsis. 2. The *Old Persian*, which is seen in the cuneiform (or arrow-headed) inscriptions of Darius and Xerxes. The modern Persian has lost nearly all the ancient inflection, and with the Mohammedan religion has adopted a multitude of words from the Arabic. Other languages belonging to this branch are those of the *Kurds*, the *Afghans*, and the *Ossetes* (in the Caucasus). The *Armenian* (ancient and modern), formerly thought to be Iranian, is now regarded as belonging to an independent subfamily of the Indo-European stock. The Indic and the Iranian are often classed together as forming the *Indo-Iranian*, or *Aryan* subfamily.

§ 4. III. The Slavic or Slavonic. The earliest monument is the incomplete version of the Bible, made in the ninth century, by the Greek missionaries Cyril and Methodius, into the *Old Slavonic* (often called *Church Slavic* or *Slavonic*, or *Old Bulgarian*). The widely diffused Slavic branch may be classified under two principal heads: 1. The *East and South Slavic*, including the *Russian*, the *Ruthenian* (in Galicia), the *Bulgarian*, and the three *Illyrian* idioms, *Servian*, *Croatian*, and *Slovenian*. 2. The *West Slavic*, including the *Polish*, the *Czech* or *Bohemian* (with the *Moravian* and *Slovak* dialects), the *Lusatian* or *Wendish*, and the extinct *Polabian*. This classification, however, is not altogether satisfactory.

§ 5. IV. The Baltic. The most important language of this branch is the *Lithuanian*, which has no monuments older than the sixteenth century, but which has preserved in a surprising degree the ancient inflection and structure. To the same stock belong the *Lettish* of Kurland and Livonia, which is much less ancient in its form, and the *Old Prussian*, which was once spoken on the coast of the Baltic east of the Vistula, but became extinct in the seventeenth century. The connection between this and the preceding branch is such that they are often classed together as the *Balto-Slavic* subfamily.

§ 6. V. The Hellenic or Greek. Of the numerous dialects of Greek, the first to receive literary culture was the *Old Ionic*, or *Epic;* followed by the *Æolic*, the *Doric*, the *New Ionic*, and finally the *Attic*, which became at length, though with some change of form, the common language of literature and society. It is represented now by the *Romaic*, or *Modern Greek*. The Albanian, spoken in a large part of modern Greece, is a descendant of the ancient *Illyrian*. It is not a near relative of the Greek, but forms a distinct subfamily of the Indo-European stock. The Albanian has borrowed largely from other languages, and its structure has been profoundly influenced by the Latin.

§ 7. VI. The Italic. This was formerly joined with the preceding, as the Greco-Italic, or Classical, subfamily, but this classification is unsound. The Italic branch is, in some respects, not so nearly related to the Greek as to the Celtic. The most important member of the Italic branch is the *Latin*. Closely akin to this were the other Italic languages — the *Oscan*, *Umbrian*, etc. — in Central Italy. The modern descendants of the Latin are called the *Romance* languages. They include the *Italian*, the *Spanish*, the *Portuguese*, the *Catalan* (eastern coast of Spain, Balearic Islands, etc., and the former county of Roussillon in Southern France), the *Provençal* (of Southern France, used as a literary language in the Middle Ages and to some extent at the present day), and the *French* (originally the popular dialect of Northern France). All these contain a small proportion of Teutonic words, brought in by the barbarian conquerors of the Western Roman Empire. But another Romance language — the *Roumanian* or *Wallachian*, spoken in a territory corresponding roughly to the ancient province of Dacia — is largely intermixed with borrowed words, taken chiefly from the neighboring Slavonic tribes. The term *Rhæto-Romanic* language is applied collectively to several dialects spoken in Tirol, the Grisons (in Switzerland), and Friuli (in the northeast of Italy).

§ 8. VII. The Celtic. This subfamily is divided into two branches, *Continental* and *Insular*. The Continental branch includes the *Gaulish*, or ancient languages of Gaul, of which scanty remnants are found in proper names and inscriptions. The Insular Celtic is divided by strongly marked differences into two portions: 1. The *Gadhelic* (*Goidelic*) or *Gaelic*, including the *Irish* (or native language of Ireland), the *Erse* (or Gaelic of the Scottish Highlands), and the *Manx* (the corrupt idiom of the Isle of Man). The last two are little more than dialects of the Irish. 2. The *Brythonic*, including the *Welsh* (the native language of Wales), the *Cornish* (which was spoken in Cornwall, but went out of use in the eighteenth century), and the *Armorican*, or *Bas-Breton* (still spoken in the French province of Brittany, the ancient Armorica). The oldest specimens of the Gaelic (except for a few inscriptions of doubtful date) belong to the seventh century; for the Brythonic, the oldest which are at all copious are three or four centuries later. The Bas-Breton is closely akin to the Welsh, being the language spoken by the descendants of those insular Britons who sought refuge on the Continent at the time of the Anglo-Saxon invasion.

§ 9. VIII. The Teutonic or Germanic. Here again the earliest monument is a version of the Bible, made by Ulfilas, an Arian bishop of the fourth century, into his native *Gothic* (or *Mæso-Gothic*), the language spoken at that time by the Goths on the Lower Danube. This work is preserved only in fragments, but these are of considerable extent, and are of inestimable value to the philologist. The Teutonic languages are distinguished as —

§ 10. 1. **The Gothic** (or **Mæso-Gothic**), almost the only monument of which is the Bible translation of Ulfilas. Some remarkable agreements between Gothic and Scandinavian have caused many scholars to include these two languages in a single class, the *East Germanic;* but this classification is now generally abandoned, and the Gothic alone is regarded as East Germanic.

§ 11. 2. **The Norse or Scandinavian.** The *Old Norse* is also called *Old Icelandic*, as much of its abundant literature (Eddas, Sagas, etc.) was composed in Iceland. The oldest manuscripts in which it is preserved are of the twelfth century; but many of its productions are of earlier origin, going back even to the heathen times of Scandinavia. The modern *Icelandic* has adhered with remarkable fidelity to the forms of the ancient language. But the modern idioms of the Scandinavian mainland, the *Swedish*, the *Danish*, and the *Norwegian*, have undergone extensive changes, and have, like the English, become much simplified in their structure.

§ 12. 3. **The West Germanic,** conveniently divided into *High Germanic* and *Low Germanic*.

I. The *High Germanic* is the language of Upper or Southern Germany. The *Old High German* is seen in Otfrid's Krist, Notker's translation of the Psalms, and other monuments, most of them in verse, from the eighth century to the end of the eleventh. The *Middle High German*, from the twelfth to the fifteenth century, has a rich poetical literature, including the Nibelungen Nôt with its attendant epics, and the lyric poetry of the Minnesinger. The *New High German* is the language of Luther's Bible version and of all German literature since the Reformation.

II. The *Low Germanic*, spoken in Northern Germany and the Netherlands. Here belong: (*a*) The *Friesic* or *Frisian*, which was once spoken along the whole northern coast of Germany, from the Elbe westward. Its early monuments consist almost wholly of laws, beginning with the fourteenth century. For a long time it has existed only as a popular idiom, and is now confined to a few small and scattered localities. (*b*) The *Anglo-Saxon* (sometimes called simply *Saxon*, and often known as *Old English*), which in the fifth and sixth centuries was transplanted from Northern Germany to Britain, and has had its subsequent development and history in that island. (*c*) The *Old Saxon*, which was spoken in Northern Germany between the Rhine and the Elbe, south of the narrow sea-coast region, which was occupied by the Friesic. It is known almost solely from the Hêliand (*i. e.*, Savior), a metrical narration of the gospel history, preserved in manuscripts of the ninth and tenth centuries. (*d*) The *Old Low Frankish*, the language of the Netherlands in the same period, which was closely allied to the *Old Saxon*. Its modern representatives are (1) the *Dutch*, or *Netherlandish*, spoken in Holland, and used as a literary language since the last part of the thirteenth century; and (2) the *Flemish*, spoken in Flanders, and often erroneously regarded as a dialect of the Dutch. (*e*) The *Low German*, strictly so called (or *Plattdeutsch*), the idiom of the common people in Northern Germany, is the lineal descendant of the Old Saxon. In the fourteenth and fifteenth centuries, it was used as a literary language; but political circumstances, giving ascendency to the High German, have reduced it to the inferior position of a popular dialect.

LANGUAGES NOT KINDRED TO THE ENGLISH.

§ 13. Ural-Altaic, Dravidian, Semitic, Iberian. The Indo-European family has no isolated domain, but comes in contact with various other families of languages. It is bounded along its northern frontier by the *Ural-Altaic* family (called also the *Turanian*), which includes the numerous and widely different languages of the *Manchus*, the *Mongols*, the *Turks* (in Asia and Europe), the *Magyars* (in Hungary), the *Finns*, and a multitude of other tribes. To the southeast it touches on the so-called *Dravidian* family, consisting of the *Tamil*, the *Telugu*, and their sister idioms in Ceylon and Southern India. In Southwestern Asia it is in contact with a more remarkable family, — the *Semitic*, — including the *Hebrew*, *Syriac*, *Arabic*, and *Ethiopic*, with their ancient and important literatures. Even in Southwestern Europe, it is doubtful whether the ancient Etruscan belonged to our family. It is perfectly clear that the ancient *Iberian* did not belong to it. This was once the prevailing language of the Spanish peninsula, and still lives, on the two sides of the Pyrenees, in the strange language called *Basque* (*Biscayan*, or *Euskara*). Whether the Indo-European has a primitive connection with any of the adjacent families, is a question which has not been, and perhaps never will be, decided by philological evidence. At all events, it is certain that between Welsh and Sanskrit, distant as they are in space and time, there is an infinitely closer connection than between the neighboring pairs of Russian and Finnish, German and Hungarian, or Greek and Hebrew. It is true that some languages of our family have borrowed particular words from languages of

other families. The English, for example, has taken from the Hebrew such words as *shekel*, *cherub*, *seraph*, *jubilee*, *pharisee*, *cabala*, etc.; and from some of them has formed derivatives, such as *seraphic*, *jubilant*, *pharisaical*, *pharisaism*, *cabalist*, *cabalistical*, etc. But this borrowing can only occur where there are historical conditions that favor it: even then it has its limits and its distinctive marks, and must not be confounded with a radical affinity between two languages. All etymologizing which assumes or implies such an affinity between English and Hebrew, English and Finnish, or the like, is, in the present state of philology, unscientific and illusory.

GENERAL FEATURES OF THE TEUTONIC LANGUAGES, PARTICULARLY THE ANGLO-SAXON.

§ 14. Progression of Mutes. In examining the sounds of the Teutonic languages we find that the primitive Indo-European mutes have undergone a remarkable series of changes. The voiceless mutes (*tenues*) of the parent tongue, *p*, *t*, *k* (preserved as such in Greek and Latin), appear in Gothic as *f*, *þ* (*th*), *h*; the primitive voiced mutes (*mediae*) *b*, *d*, *g*, as *p*, *t*, *k*; and the primitive voiced aspirates, *bh*, *dh*, *gh* (in Greek *φ*, *θ*, *χ*), as *f*, *d*, *g*. This process, known as the Progression of Mutes, is often stated thus: the primitive voiceless mutes pass in Gothic into the corresponding aspirates, the primitive voiced mutes into the corresponding voiceless mutes, and the primitive voiced aspirates into the corresponding voiced mutes. But this form of statement, though convenient as an aid to memory, is open to grave objections from a scientific point of view: for example, the letters *b*, *d*, *g*, in Gothic, do not always stand for the sounds of the voiced mutes, but in certain positions represent spirants, and Gothic *f*, *þ*, *h*, are spirants, not aspirates. In the Progression of Mutes the other Teutonic languages agree in general with the Gothic; but the Old High German has gone one step farther, changing the Gothic *b*, *d*, *g*, into *p*, *t*, *k*; the Gothic *p*, *t*, *k*, into *f*, *z* (for *th*), *ch*; and the Gothic *þ* into *d*. The change from *b*, *g*, to *p*, *k*, however, is unknown to the New High German. In Old High German it was confined to certain dialects, and it had begun to lose ground before the beginning of the Middle High German period. To the rules thus roughly given, there are numerous apparent exceptions (thus after *s*, the primitive voiceless mutes remain unchanged), but all of these can be shown to depend on special laws. The following examples will serve as illustrations of the Progression of Mutes: —

Greek.	Latin.	Gothic.	Eng.	O. H. Ger.	N. H. Ger.
πούς (for *ποδ-ς*)	*pes* (for *ped-s*)	*fōtus*	*foot*	*fuoz*	*fuss*
τρεῖς	*tres*	*þreis*	*three*	*drī*	*drei*
καρδία	*cor*(*d*)	*hairtō*	*heart*	*herza*	*herz*
κάνναβις	*cannabis* (borrowed from Greek)		*hemp*	*hanaf*	*hanf*
δύο	*duo*	*twai*	*two*	*zwō*	*zwei*
γένος	*genus*	*kuni*	*kin*	*chunni*	(*kin-d*)
φρατήρ	*frater*	*brōþar*	*brother*	*pruodar*	*bruder*
θύρα	*fores*	*daúr*	*door*	*tor*	*thor*
χήν	*anser* (for *hanser*)		*goose*		*gans*
στῆ-ναι	*sta-re*	*sta-ndan*	*sta-nd*	*sta-ndan*	*steh-en*

§ 15. Variation of Vowels. It is a thing of familiar occurrence in all the Teutonic languages, that the same root appears with a variety of vowel sounds, as in *sing*, *sang*, *sung*, *song*; *bind*, *bound*, *band*, *bond*. Similar variations of vowel sound are met with in other languages. What is peculiar to the Teutonic is the frequency and regularity with which they are used as a means for the inflection and formation of words. They appear thus most frequently and regularly in the earliest Teutonic idioms; many words which had them in the Anglo-Saxon have lost them in the English. Different from these variations of vowel is that attenuation, or change from a more open vowel sound to a closer, which we see in *man*, *men*, *foot*, *feet*, *mouse*, *mice*. This change, which is unknown to the Gothic, has arisen from the influence of a close vowel (*i*) belonging to an inflectional ending, which was lost at a very early time.

§ 16. Numbers. The Indo-European inflection distinguished three numbers, *singular*, *plural*, and *dual*. In the Teutonic languages, the dual form of the noun has wholly disappeared: that of the verb appears only in the Gothic, and there only in the first and second persons. The pronouns of the same persons show a dual form, not only in the Gothic, but also in the Anglo-Saxon: thus AS. *wit*, we two, *unc*, us two, *git*, ye two, *inc*, you two, but in the plural *wé*, *ús*, *gé* (ye), *éow* (you), as in English.

§ 17. Genders. The Indo-European system of gender seems to have commenced with some differences of inflection between the names of personal and those of impersonal objects. Among the first, certain forms of inflection were afterward appropriated to the names of female persons. The result was a threefold system of gender, corresponding to the real distinctions of sex. But its character was modified, almost from the outset, in three different ways: first, many objects which are without sex were thought of as having in their attributes an analogy to male or female persons, and accordingly received masculine or feminine inflection; second, many objects were regarded as masculine or feminine because their names corresponded in stem-ending to names of male or female beings; and third, in some cases, objects which have sex were thought of without special reference to sex, and accordingly received neuter inflection. Thus, the system of grammatical gender assumed to a great extent a fictitious, and even an arbitrary, character. This system had become fully developed before the separation of the Indo-European family; and it is found, essentially unchanged, not only in the Gothic and the Anglo-Saxon, but even in the modern German. In the English, on the contrary, it has almost entirely disappeared: the same forms of the article, the adjective, and even of the pronoun, are used for all kinds of objects. The only distinction is in the personal pronoun of the third person, where in the singular we use special forms (*he*, *she*; *his*, *her*; *him*, *her*) in reference to male and female objects. But in the Anglo-Saxon, *hé* is used in referring to *sé móna*, the moon, *sé stán*, the stone, as well as *sé cyning*, the king; *héo* (she), in referring to *séo sunne*, the sun, *séo spræc*, the speech, as well as *séo sweostor*, the sister; *hit* (it), in referring to *þæt héafod*, the head, but also to *þæt bearn*, the child, and even *þæt wíf*, the woman, wife.

§ 18. Cases. The Indo-European had eight cases; the *nominative*, for the subject of a sentence; the *accusative*, for the direct object; the *dative*, for the indirect object (*to* or *for* which something is done); the *genitive*, or *of*-case; the *ablative*, or *from*-case; the *instrumental*, or *with*-case (denoting either association or instrument); the *locative*, or *in*-case; and, finally, the *vocative*, or interjectional case, which does not enter into the construction of the sentence. Of these, the ablative and locative are lost in the Teutonic languages. The vocative, which is not wanting in the Gothic, is unknown to the Anglo-Saxon. The instrumental, which has nearly disappeared in the Gothic, is seen in the inflection of Anglo-Saxon adjectives and demonstratives. The remaining four cases, the nominative, accusative, dative, and genitive, are common to all the older Teutonic languages, and are still distinguished in the modern German. Modern English distinguishes nominative and accusative in the personal pronouns only; in substantives, it has the genitive (though in the plural commonly without a distinct form), but confines it almost wholly to the possessive relation.

§ 19. Declensions. The Anglo-Saxon, like the other Teutonic languages, has two main schemes of noun inflection, which may be termed the *Vowel Declension* and the *N Declension*: they are often called *strong* and *weak* declensions. The few Anglo-Saxon substantives which do not agree with either of these schemes may be treated as anomalous. But different from both is the *Pronominal Declension*, seen in the demonstrative and most other pronouns. One of the most remarkable peculiarities of the Teutonic is the fact that every adjective is inflected in two ways: it follows the pronominal declension when its substantive is *indefinite*; but if the substantive is *definite*, as when it is connected with the definite article, or with a demonstrative or possessive pronoun, the adjective follows the N declension. Thus the Anglo-Saxon has *wís cyning*, a wise king, genitive *wises cyninges*, dative *wísum cyninge*; *gód nama*, a good name, genitive *gódes naman*, dative *gódum naman*; but *sé wisa cyning*, the wise king, genitive *þæs wisan cyninges*, dative *þám wisan cyninge*; *sé góda nama*, the good name, genitive *þæs gódan naman*, dative *þám gódan naman*. This distinction of the definite and indefinite adjective is preserved in modern German, but is wholly lost in modern English. In substantives, the English still shows a trace of the N declension, in a few plurals, like *oxen*, *children*, *brethren*, *kine*; though in all of these, except *oxen*, the *n* has been misapplied to words that do not have it in the Anglo-Saxon. The familiar archaic form *eyne* (eyes) shows a genuine Anglo-Saxon plural in *n* (*éagan*).

§ 20. Voices. The Teutonic verb, when compared with the Indo-European, shows extensive losses. It has but one voice, the *active*. In the Gothic, indeed, we still find the ancient middle, used in a passive sense; it is confined, however, to the present tense, and shows by other signs that it was beginning to disappear from the language. The Anglo-Saxon has preserved a single relic of the old medio-passive, — the form *hátte* (Goth. *haitada*, is called, M. Eng. *hight*). In the preterit tense of the Gothic, and in both tenses of the other old Germanic idioms, the place of a passive verb was supplied by using the passive participle, sometimes with the verb which means *to be* (Goth. *wisan*, AS. *wesan*, or *béon*, etc.), and sometimes with the verb which means *to become* (Goth. *waírþan*, AS. *weorðan*, Eng. *worth* in *woe worth the day*). In all the modern Germanic idioms, except the English, only the latter verb (Ger. *werden*, Dutch *worden*, etc.) is used to make up the passive. The English alone has fixed upon the verb *to be* for this purpose. The Danish and Swedish have a passive made by adding *s* to the forms of the active. But for this *s* the Old Norse has *sk*, which is plainly the reflexive pronoun *sik* (self, selves) shortened and added to the active verb.

§ 21. Moods and Tenses. The Teutonic verb has three finite moods, the *indicative*, the *subjunctive* (Sanskrit and Greek *optative*), and the *imperative*: the second of these has, to a great extent, disappeared in modern English. It has also an infinitive, and a participle present and past, which are essentially verbal nouns. Of the primitive moods, it wants only the one which is represented by the Greek *subjunctive*. Of tenses, it has lost the primitive *imperfect*, *future*, and *aorist*, retaining only the *present* and the *perfect* (*preterit*). The *reduplication* of the perfect (seen in Greek λέ-λυ-κα, Latin *tu-tud-i*) is preserved by the Gothic in a number of verbs, as *haíhald*, held; in the other idioms we find little more than traces of its former existence.

§ 22. Persons and Numbers. There is good reason to believe that most of the personal endings were in their origin pronouns, appended to the verb, and denoting its subject. The Gothic, in general, distinguishes the three persons of the singular and those of the plural by as many different endings. The Anglo-Saxon confounds the three persons in the plural of the indicative, and in both numbers of the subjunctive; but still distinguishes between the singular and the plural. Even this last distinction is, to a great extent, lost in modern English.

§ 23. Verbs of Primary and Secondary Inflection. The Teutonic verbs divide themselves into two well-marked classes, which may be called verbs of *primary*, and verbs of *secondary*, inflection: they are often called verbs of *strong* and of *weak* inflection. To the first class belong words like *fall*, *fell*; *know*, *knew*; *swear*, *swore*; *drive*, *drove*; *choose*, *chose*; *lie*, *lay*; *come*, *came*; *sing*, *sang*, etc. In these, the past tense adds nothing, except personal endings, after the root or stem of the verb. They are further characterized by that variation of the radical vowel (*internal inflection*), which has been already noticed as a striking peculiarity of the Teutonic. To the second class belong words like *kill*, *killed*; *lie*, *lied*; *lay*, *laid*; *lead*, *led*; *leave*, *left*; *have*, *had*; *make*, *made*; etc. In these, the preterit adds *d* or *t* to the root or stem. Only a few of them have also a change of radical vowel, as *sell*, *sold*; *bring*, *brought*, etc. In most forms of the Gothic preterit, this *d* is doubled, as in *lag-i-dēdum*, we laid, *lag-i-dēduþ*, ye laid, etc. In Gothic, this class embraces the derivative verbs, while nearly all primitive verbs have the inflection of the first class. But the tendency in all Teutonic languages has been to increase the second class at the expense of the first. Many Anglo-Saxon verbs of the first class belong in Middle English to the second: thus, AS. *murnan*, to mourn, pret. *mearn*, but ME. *morned*; *bacan*, to bake, pret. *bóc*, ME. *baked* and *bok*; *léosan*, to lose, pret. *léas*, ME. *lees* and *loste*. And many verbs which in Middle English retained inflections of the first class belong in modern English to the second. thus, ME. *sew* (pret. of *sow*), now *sowed*; ME. *glod* (pret. of *glide*), now *glided*; ME. *gnow* (pret. of *gnaw*), now *gnawed*. Sometimes the change has been in the opposite direction: thus, Eng. *wore* (pret. of *wear*), AS. *weredе* (ME. *weredе*, *wered*) The result of these changes is that, in modern English, the verbs of the first class, when compared with those of the second, have the appearance of anomalous and capricious exceptions to a general law of inflection.

THE ANGLO-SAXON AS A LITERARY LANGUAGE.

§ 24. Name. The emigrants from Germany, who invaded Britain in the fifth and sixth centuries, and after long struggles conquered most of the island, appear to have come in great part from the districts now called Schleswig and Holstein, on the eastern shores of the North Sea. The Angles, who seem to have been the most numerous portion, established themselves in the east and north of Britain, but left the Scottish Highlands to their Gaelic population. The Saxons occupied the south and west, but left Wales and Cornwall to their Cymric population. A third fraction, of far inferior numbers, the Jutes, took possession of Kent in the southeast of England. There is every reason to believe that there were differences of dialect among these settlers; and, particularly, that the idiom of the Angles varied in some degree from that of the Saxons; but it cannot well be doubted that they all spoke substantially the same language. This common language bears a close resemblance to the Friesic and to the Old Saxon, holding in some respects an intermediate position between them. Some scholars regard the Anglo-Saxon and the Friesic as forming a special group, the *Anglo-Frisian*. In the oldest monuments of the Anglo-Saxon (which, however, are about three hundred years later than the Anglo-Saxon conquest) four dialects are distinguishable: the two Anglian dialects (the *Northumbrian*, and the *Mercian* or *Midland*), the *Kentish*, and the *Saxon*. Of these the Saxon has left a considerable literature (chiefly in the West Saxon dialect), but the other three have come down to us in scanty remnants. The first of the four to receive literary cultivation was the Northumbrian, which developed a considerable literature; but with the transference of power from the north to the south, the Saxon (especially the West Saxon, or language of Wessex) became the literary dialect, so that the old Northumbrian poems, with a few slight exceptions, have reached us only in a more or less consistent Saxon dress. The term *English* (*Englisc*, belonging to the Angles) was, however, retained by the Saxons as a designation for their own language as well as that of their more northern countrymen. The term *Anglo-Saxon*, originally political in its application (and meaning perhaps not *Angle and Saxon*, but *English-Saxon*) was first applied to the language by modern scholars. Though strongly objected to in some quarters, this term is too convenient to be lightly rejected in favor of the ambiguous name *Old English*.

In this sketch Anglo-Saxon words will be given in their West Saxon form unless the contrary is mentioned.

§ 25. **Alliterative Verse.** There was no written Anglo-Saxon literature until after the conversion of the people to Christianity. The earliest productions were poetical, and, like all Anglo-Saxon poetry, indeed like all early Teutonic poetry, they are alliterative. The verses are not confined to a uniform number of syllables, nor do they have final rhyme. But in each line several prominent words, two, three, or four, either all begin with the same consonant, or all begin with vowels, which are not required to be the same. In the most common arrangement, there are three alliterative words in the line, two in the first half-verse, and one in the second. A word which has an unaccented prefix is treated as if the prefix were no part of it. Every line falls into two half-verses, each of which has two full accents. The measure admits of great variety, but recent investigations indicate that it is controlled by definite laws and largely dependent on quantity. To illustrate the description, we subjoin the so-called Hymn of Cædmon as given in a West-Saxon form in the translation of Bede formerly ascribed to King Alfred. We divide each line into its two half-verses, and mark the initial letter of the alliterative words. In the annexed translation, other objects are sacrificed in order to represent the alliteration.

Nú wé sceolon *h*erian	Now must we *g*lorify
*h*eofon-ríces weard,	the *g*uardian of heaven's kingdom,
*m*etodes *m*ihte	the *m*aker's *m*ight
ond his *m*ód-geþonc,	and his *m*ind's thought,
*w*eorc *w*uldor-fæder;	the *w*ork of the *w*orshiped father;
swá hé *w*undra gehwæs,	when he of his *w*onders, each one,
*é*ce dryhten,	the *e*ver living lord,
*o*rd onstealde.	ordered the *o*rigin.
Hé *ǽ*rest gesceop	He *e*rst created
*eo*rðan bearnum	for *e*arth's children
*h*eofon to *h*rófe,	*h*eaven as a *h*igh roof,
*h*álig scippend:	the *h*oly creator:
þá *m*iddangeard	then this *m*id-world
*m*oncynnes weard,	did *m*an's great *g*uardian,
*é*ce dryhten,	the *e*ver living lord,
æfter téode,	*a*fterward prepare,
*f*irum *f*oldan,	for *m*en a *m*ansion,
*fr*éa ælmihtig.	the *m*aster almighty.

§ 26. **Works of Poetry and Prose.** Among the longer Anglo-Saxon poems, the most remarkable is the epic called Béowulf, from the name of its Scandinavian hero. It is preserved in a manuscript of the tenth century, but is certainly much more ancient in origin. In substance, it must have come down from heathen times, though the form in which we have it shows the work of Christian hands. In the same manuscript is preserved a fragment of 350 lines belonging to an epic poem on the history of Judith. This is one of the best of the Anglo-Saxon poems. Its date is uncertain (perhaps the ninth century). We have also a long series of Scripture narratives (Genesis, Exodus, Daniel) in Anglo-Saxon verse: these, too, are found in a manuscript of the tenth century. They have been generally regarded as productions of Cædmon, a Northumbrian monk who died about the year 680. This theory, however, is now universally abandoned. In their present shape the poems are later than the time of Cædmon, and certainly not all the work of one author. Much of the Genesis is very closely translated from an Old Saxon original, of which a portion is preserved in the Vatican Library. A manuscript of the eleventh century contains the last two thirds of a metrical version of the Psalms, which is considerably older than the manuscript. To Cynewulf, regarded by most scholars as a Northumbrian poet of the eighth century, are ascribed with certainty three long poems, Christ (at least in part), Juliana (a life of the saint of that name), and Elene (an account of the discovery of the cross), and one shorter poem, the Fates of the Apostles. Among other poems which have been ascribed to the same author, in most cases without any probability, may be mentioned Lives of St. Andrew and St. Guthlac, the Phœnix, the Dream of the Rood, and a very curious collection of metrical Riddles. Also of uncertain authorship are several interesting short poems, the Wanderer, the Seafarer, the Battle of Maldon, Athelstan's Victory at Brunanburh, and the very peculiar and artificial Rhyming Song. The famous Exeter Manuscript of the early eleventh century contains some of the poems ascribed to Cynewulf and several known not to be his. In prose, besides versions of different parts of the Bible, the most important works are the translations made from the Latin by King Alfred in the ninth century (including Gregory's Pastoral Care, the History of Orosius, and Boethius on the Consolations of Philosophy); a translation, formerly ascribed to King Alfred, of Bede's Ecclesiastical History; the Homilies of Ælfric, who was Abbot of Egnesham (Ensham) in the earlier part of the eleventh century; the Homilies of Wulfstan, who was Archbishop of York from 1002 to 1023; and the Saxon Chronicle, in which the principal events of Anglo-Saxon times are recorded in the form of dry and meager annals, by several successive writers, the last of whom wrote about a century after the Norman conquest.

INFLUENCE OF OTHER LANGUAGES ON THE ANGLO-SAXON.

§ 27. **The Celtic.** The Saxons and Angles, when they entered Britain, were brought into contact with a Celtic-speaking population. It is true that the Latin had been spoken by the dominant people in England during more than three centuries of Roman occupation. But it seems not to have established itself, as it did in Gaul and Spain, so as to supplant the native language of the country. It had rather the position which was afterward held on the same ground by its own child, the French, for more than two centuries after the Norman conquest. It was spoken by the ruling caste, while the mass of the people adhered to their own mother tongue, though they naturally received into it, as time passed on, a considerable number of words learned from their rulers. In Wales, which has retained the same population from Roman times, the vernacular idiom is not of Latin origin, nor is it very largely intermixed with Latin: it is true and genuine Celtic. The probability is, that the great body of those whose possessions passed into Anglo-Saxon hands spoke substantially the same language. This being so, it would not have seemed strange if the idiom of the conquered people had acted on that of the conquerors, so as to introduce a large Celtic element into Anglo-Saxon and English. But the fact is quite the contrary. The Celtic words in English are altogether few in number: most of them — as *bard*, *druid*, *crowd* (a fiddle), etc. — belong to objects which are specially Celtic; and a large part — including nearly all those of Gaelic origin, as *brogue*, *clan*, *glen*, *whisky*, etc. — are of comparatively recent introduction. It should seem that in the slow and gradual progress of the Saxon conquests, the native British fell back from point to point before the invaders; or, if a part remained in their old homes, they were too few to maintain their old language, and had to exchange it for the Saxon; while the independent Britons and the Saxons, engaged in constant hostilities, were cut off from that free and peaceful intercourse which might have left a marked impress on the languages of both. There have been, indeed, etymologists who regarded a large number of English words as borrowed from the primitive British. But in many of the cases brought forward, there is no real connection between the words compared. Thus AS. *cúð*, known (seen in Eng. *un-couth*), has nothing to do with Welsh *gwydd*, knowledge; *gwydd* stands, by Welsh phonetic change, for earlier *wid* which corresponds to Lat. *vid-eo*, Eng. *wit* (as verb, to know); while *cuð* is identical with Ger. *kund*, and comes from the root seen in our *ken* and *know*. In many other cases, there is a real connection, but no borrowing, the words having come down both in the Teutonic and the Celtic from the common Indo-European stock. Often, when borrowing has occurred, it has clearly been in the opposite direction, by the Celtic from the English, or from the French or the Latin. Thus the English *solder* and *locker* do not come from the Welsh *sawduriaw* and *llogell*, but have other satisfactory etymologies; while *sawduriaw* is plainly taken from the English, and *llogell* (i. e., *locel*) is simply the Latin *loculus*. There remain, however, a small number of words — such as *bannock*, *brock*, *down*, *dun* (color), — in which an early borrowing from the Celtic is either certain or probable.

§ 28. **The Latin.** A few Latin and Latinized Greek words, having made their way into the Teutonic languages at an early period, must have existed in the speech of the Anglo-Saxons before their invasion of Britain. Among these were the words for *church*, *pound*, *mint*, *street*, and *mile*. Others were doubtless learned from the partly Romanized Britons, and some scholars ascribe to their influence a considerable number of the foreign words that appear in the Anglo-Saxon vocabulary. The introduction of Christianity among the Anglo-Saxons, at the opening of the seventh century, also brought in a good many Latin terms; for the cultivation of learning and letters belonged almost exclusively to ecclesiastics, with whom Latin was the professional language. To this later influence we owe such words as *alb*, *stole*, *clerk*, *creed*, *martyr*, and *verse*, with a few names of plants (for example, *rose* and *lily*). The following table illustrates the changes to which Latin words were subjected in passing into Anglo-Saxon: —

Lat. *diabolus*	AS. *déofol*	Eng. *devil*
presbyter	*préost*	*priest*
episcopus	*biscop*	*bishop*
monasterium	*mynster*	*minster*
clericus	*cleric*, *clerc*	*clerk*
prædicare	*predician*	(*preach*)
Gr. κυριακή or κυριακόν	*cyrice*	(*church*, (*kirk*, Scotch)
ἐλεημοσύνη	*ælmesse*	*alms*
Lat. *pondo*	*pund*	*pound*
moneta	*mynet* (money)	*mint*
strata [*via*], paved road	*stræt*	*street*
mille [*passus*], 1000 paces	*míl*	*mile*

It is worthy of notice, that, while *minster* and *mint* have come to us through the Anglo-Saxon, we have the same Latin words by more recent importation in *monastery* and *money*, which come through the French *monastère* and *monnaie*. The number of Latin words that made their way into the language before the end of the Anglo-Saxon period is between two and three hundred, but many of these had no popular currency.

§ 29. **The Scandinavian.** In the year 827, Egbert, king of the West Saxons, became the acknowledged lord of all the separate fractions into which Anglo-Saxon England had before been divided. But the united kingdom was destined to suffer severely from a cause which had begun its work with the opening of that century. Piratical rovers from the regions about the Baltic were at this period the scourge and terror of Europe. These Scandinavians — or Danes, as the Saxons named them all, whether coming from Denmark or not — infested the whole eastern coast of England, not only making occasional descents, but conquering large districts, and forming permanent settlements. Alfred the Great, though he succeeded in checking their progress and in forcing them to acknowledge his authority, allowed them to remain under their own laws in a part of England known to historians as Danelagh or Dane-law (AS. *Dena lagu*, law of the Danes). Under his weak successors, the Danes resumed their conquering progress, and at last became masters of the whole country. The Danish kings, Sweyn, Canute, and Hardicanute, held the English throne from 1013 to 1042. Yet the Danes do not appear to have settled in large numbers, except in the eastern part of the island. A trace of their existence here is still seen in Ashby, Rugby, Whitby, and many other names of places with the same ending; for *-by* is the Icelandic *býr*, Swedish *by*, Danish *by*, a town, village. There is no evidence that the Danes of England sought to perpetuate or to extend the use of their own language. Even under Danish kings, the Anglo-Saxon continued to be used in public acts and laws. The truth appears to be, that in England, as well as in Normandy, the Scandinavian settlers did not long retain their mother tongue, but gave it up for the more cultivated idiom of the people among whom they settled. At the same time, they did not fail to communicate some of their own words to the new speech of their adoption. The extent of the influence thus exerted by the Danes upon our language, it is very difficult to determine. English words which are found in the Scandinavian idioms, and are not found in the earlier Anglo-Saxon or other Low Germanic idioms, we may naturally suspect to have come in by this channel. But the inquiry is subject to great uncertainties. The existing monuments of the early Anglo-Saxon are evidently far from showing its complete stock of words; and the other old monuments of Low Germanic idioms are by no means copious enough to supply the deficiency. It is certain, however, that the Danish influence has been greatly overrated by those who have ascribed to it any considerable fraction of the English vocabulary. To this influence we may trace the verb *call* (Icelandic *kalla*), which seems not to occur in Anglo-Saxon till 993 (*ceallian*) and for which the earlier documents use *clypian*. So perhaps the adjective *same*; for though the Anglo-Saxon has the word as an adverb, it always uses *ylc* for the adjective (compare Scotch *of that ilk*, i. e., of the same, of a place bearing the same name as a person). Many other words (as *screech*, *bow* of a ship), though doubtless introduced at a very early time, are not found in our monuments till after the Norman conquest, that is, till after the close of the Anglo-Saxon period.

§ 30. **The Norman French.** The Normans (or North-men) were a body of Scandinavian adventurers, who, while their countrymen, the Danes, were making conquests in England, succeeded in establishing themselves on the opposite coast of France. In 912, King Charles the Simple ceded to Duke Rollo and his Norman followers the province which took from them its name of Normandy. Here they soon ceased to speak their own language, adopting that which was spoken by the native population. If in this they took the same course with their Danish kinsmen in England, the change was a much greater one in the case of the Normans; for the Scandinavian differed far less from the Anglo-Saxon, another member of the same Teutonic family, than from the French, which was a daughter of the Latin. The dialect which thus grew up in Normandy differed in many particulars from the other dialects of the French language, and is commonly known as Norman French. The influence of the Norman French began to be felt in England, even before the Norman conquest of the country. It seems to have been much used at the court of Edward the Confessor, who followed the Danish dynasty, and reigned from 1042 to 1065. This prince, though of Saxon birth, had spent his youth in Normandy. When he became king of England, he surrounded himself with Normans, exciting thus the jealousy of his native subjects, who in 1052 constrained him to banish the obnoxious foreigners. After his death, Duke William of Normandy laid claim to the English crown; and the hard-fought battle of Hastings, in 1066, in which Harold, the Saxon king, was slain, and his army totally defeated, established the claim of the Conqueror. This event, which

has affected the whole subsequent history of England, has had a most important influence on its language. It was not, indeed, the intention of William to suppress the language of his new subjects. He is said to have made an attempt, though an unsuccessful one, to acquire it himself. But the political and social conditions which followed the conquest were extremely unfavorable to the language of the conquered people. Their obstinate resistance and repeated insurrections led the Conqueror to treat them with the utmost severity. They were shut out from offices of state; they were removed from ecclesiastical positions; they were deprived of lands, and reduced to poverty and wretchedness. The court, the nobility, the landed gentry, the clergy, the army, were all Norman. The Anglo-Saxon language was practically banished from these circles, and the French took its place. The instruction of the schools was given in French. There was nothing to stimulate, there was everything to discourage, the cultivation of the native language. It must not be supposed, however, that the great body of French words which appear in English were borrowed from the Norman dialect; most of them are from Central French as explained in § 35.

TRANSITION FROM ANGLO-SAXON TO MODERN ENGLISH.

§ 31. Periods. For some five centuries after the Norman conquest, the language of England was in a constant and rapid process of change. During the first of these centuries, we may believe that it had not yet departed very widely from the earlier type. The last monument of the old language is the concluding part of the Saxon Chronicle, in which the history is brought down to the death of King Stephen in 1154. We cannot, however, suppose that the writer of that part has used the idiom which was spoken by the people in his own time, and the end of the Anglo-Saxon period may be conveniently fixed as 1100. The change by which, in grammatical endings, the older vowels *a*, *o*, *u*, have passed into *e*, is found in High German from the beginning of the twelfth century: it began even earlier in our language.

From 1100 to 1500 the language is known as Middle English. Three periods may be conveniently distinguished: —

1. Middle English of the First Period (1100–1250), often called Early Middle English and formerly known as Semi-Saxon.

2. Middle English of the Second Period (1250–1400).

3. Middle English of the Third Period (1400–1500), often called Late Middle English.

In the First Period (1100–1250), the old inflection is in great part retained, though, as we have just seen, the vowels *a*, *o*, *u* pass into *e* in the inflectional endings, and there is much confusion and corruption. In the Second Period (1250–1400), a large part of the old inflection had disappeared, and French words enter the language in considerable numbers. In the Third Period (1400–1500), the old inflection is brought down almost to that minimum which remains in the language to-day, and the borrowing of French words continues.

It must be remembered, however, that the process of change was gradual and incessant: the language did not remain fixed for a time, and then on a sudden leap to a new position. The changes also went on more rapidly in some of the English dialects than in others. In general, the Southern dialect was most conservative, the Northern (which had been particularly subjected to Scandinavian influence, and which had suffered much inflectional decay and confusion before the end of the Anglo-Saxon period) was least so. The Midlands occupied linguistically, as well as territorially, an intermediate position. Thus the periods here distinguished are in some degree arbitrary, at least as regards their boundaries; and writers may be found of the same period who are separated from each other by marked differences of language.

§ 32. Changes. It is implied in the foregoing statements that the changes in our language, consequent on the Norman occupation of England, were mainly of two kinds. (1) the loss of the Anglo-Saxon inflection; and (2) the introduction of new words from the French. The latter change did not go on to any great extent until more than two centuries after the conquest; yet no one can doubt that it was caused by that event. But in regard to the earlier change, — the loss of the ancient inflection, — it is maintained by some writers that this was in no degree occasioned by the coming of the Normans. A similar change in the modern languages of Latin origin is often explained from the difficulty which the barbarian conquerors of the Roman empire must have found in mastering the complex system of Latin inflection. The explanation, whether satisfactory or not for the Romance languages, cannot be applied to ours; for the change in question had nearly run its course before any large part of the Normans had begun to speak English. It is true also that changes of the same nature have been made, and not very far from the same time, in the other Germanic idioms: in each of them, the one vowel *e* has taken the place of other vowels in grammatical endings, and in each a part of the endings have been confounded with one another, or have disappeared altogether. What is peculiar to the English is the rapidity of this movement and the extent to which it was carried. No written language of Germanic stock, no unwritten dialect of any province or people, shows, even at the present day, a loss of inflection equal to what appears in the English of five hundred years ago. This striking peculiarity in the effect compels us to seek for a peculiar cause; and no cause can be found so likely to produce it, as the long subjection of the English-speaking people to a people of different race and language. The tendencies and influences which would in any case have given a new form to the English, as they have to its sister idioms, derived additional force and greater quickness of operation from the depressed circumstances of the English people. The language shared in the suffering and degradation which fell on those who spoke it. Regarded with indifference or contempt by the higher classes, shut out from the schools, from cultivated society, and, with few exceptions, from works of literature, it was left without standards of correctness; it was deprived of those conservative influences which might otherwise have retarded the progress of change and disintegration.

§ 33. Middle English of the First Period, or Early Middle English (1100–1250). The Anglo-Saxon inflection is still in a great measure retained, but with *e* instead of other vowels in the endings, and with much confusion and irregularity of use. If we disregard the late portion of the Anglo-Saxon Chronicle (see § 31), this period is represented chiefly by four works: 1. The Brut of Layamon (Lazamon), a long narrative poem, which recites the early fabulous history of Britain. It is a free translation, or, more truly, a working over, of the Brut, composed in Norman French by Wace, and finished in 1155. Layamon was a priest, who lived at Ernley, in North Worcestershire, near the close of the twelfth century. His work consists of 32,000 short lines, partly alliterative, like the Anglo-Saxon verse, partly rhymed, like the French original, both kinds being very loosely constructed and irregularly mixed together. A second manuscript of the poem affords an instructive example of the way in which older writings were wont to be modernized in successive transcriptions; it is, perhaps, half a century later than the first, and shows a text which is much altered, and decidedly more modern. 2. The Ormulum, as it is called by its author, an Augustinian canon, from his own name, Ormin, or Orm. The poem — or what remains of it — contains nearly 20,000 short lines, and consists of thirty-two parts, founded on successive gospel selections in the daily church service, the narrative being first set forth in a loose paraphrase, and then followed by homiletic comments. The verses are arranged in couplets, with a line of eight syllables followed by one of seven: they are constructed with much regularity of accent, though without either alliteration or rhyme. The language of the poem is more like modern English than that of the contemporary Layamon, but this comes from its being written in a different dialect. Its appearance is rendered uncouth by a peculiarity of spelling, which is not without interest and value to the philologist, it carries out consistently the tendency of English orthography to double the consonant which follows a short vowel; thus, *and*, *this*, *after*, *under*, are spelt, *annd*, *thiss*, *afterr*, *unnderr*. 3. The Ancren Riwle, or rule of female anchorites, a prose work by an unknown author, containing a code of monastic regulations for a household of religious ladies. Owing, perhaps, to the nature of its subject, it shows a considerable number of words borrowed from the French and Latin, while in the works before named such words are altogether rare. 4. A metrical paraphrase of the books of Genesis and Exodus. It must not be forgotten that during this period each of the Anglo-Saxon dialects was continuing its own course of development or decay. The confusion and distress reigning in the North of England were such that we have no important memorials in the Northern Dialect during the Early Middle English period. The Southern Dialect, however, has come down to us in an almost unbroken series of works, including the Ancren Riwle and various homilies and lives of saints; while the Midland Dialect (the descendant of the ancient Mercian) is represented by the latest portion of the Chronicle (1132–1254), by the Ormulum (about 1200), and by Genesis and Exodus (about 1240). The great work of Layamon was written near the border line between the Southern and the West Midland and may be reckoned as Southern.

§ 34. Middle English of the Second Period (1250–1400). Here the Anglo-Saxon inflection is to a great extent discarded, but, until towards the end of the period, only a moderate proportion of words is yet adopted from the French. The principal monuments before 1350 are: 1. A proclamation of King Henry III., issued in 1258, a short but highly important document. 2. A series of metrical romances, — Kyng Alisaunder, the Geste of King Horn, Havelok the Dane, and others, which belong to the latter part of the thirteenth and the beginning of the fourteenth century. They are composed in rhymed verses, and are most of them founded on French originals. The pretty poem of the Owl and the Nightingale belongs to the first half of the thirteenth century. 3. The long rhymed chronicle known as Robert of Gloucester's, written about 1300, and the still longer one by Robert Manning, or Robert of Brunne, who wrote some years later. Both these writers traverse the whole field of English history, mythical and veritable, from Brut and his Trojans down to Henry III. and Edward I. There is also a collection of lives and legends of the saints, which is ascribed (but on insufficient evidence) to Robert of Gloucester. 4. The Cursor Mundi, a rhymed series of Bible stories, legends, etc., covering the seven ages of the world, and containing about twenty-five thousand lines with some five thousand more by way of appendices. 5. The Ayenbite of Inwit (the *Again-bite* [i. e., *Remorse*] *of Conscience*), a translation by Dan Michel of Kent, preserved in an autograph manuscript of 1340.

Throughout this period English was in a state of great dialectical confusion. The Englishman of Northumberland spoke a language almost or quite unintelligible to the Englishman of Sussex or Wessex, and the Midland dialects formed a sort of mean between the two extremes. Of the works enumerated, the Proclamation is in the London dialect, which at this time exhibits a mixture of Midland and Southern forms; the Owl and the Nightingale and the Chronicle of Robert of Gloucester are South English; the Chronicle of Robert of Brunne is Midland; and the Cursor Mundi is written in the Northern dialect, which again makes its appearance as a literary language. The Ayenbite is a pure specimen of the dialect of Kent. The language of the metrical romances in the form in which we have them, shows, in many cases, a mixture of dialectic forms, due in part to the scribes.

In the second half of the fourteenth century the literary activity in the vernacular was very remarkable. It will be enough to name here a few of the most important works and authors. In the poems of Laurence Minot, written about 1350, we find for the first time a large proportion of French words. These were followed (between 1360 and 1370) by the popular poem entitled The Vision of William concerning Piers the Plowman, a satirical allegory ascribed, on insufficient evidence, to William Langland. It is written in alliterative verse of very regular construction. The same species of verse is found in some poems of a similar character which followed the Vision; but it was not used by Chaucer and Gower in the same age, nor has it been used by any poet of importance since the end of that century. The great name of early English literature is Geoffrey Chaucer, who died in 1400; and the Canterbury Tales is the most perfect, as it is probably the latest, of his productions. The charge often brought against him of having corrupted the simplicity of the native popular English by large importation of French words only shows a want of acquaintance with the literature of that time. His contemporary, John Gower, whose chief English work is the Confessio Amantis, though far inferior in genius to Chaucer, was for a long time held in equal estimation. Among the prose writings of this period were the Wycliffite Versions of the Bible. The Old Testament is supposed to have been translated by Hereford, the New Testament by Wycliffe himself, the whole being finished about 1380. To Purvey is ascribed a revision of the whole work, made some eight or ten years later, with many alterations and corrections. The Travels of Sir John Mandeville, formerly supposed to have been written in English about 1356, is now known to be merely a translation made from the French about the beginning of the fifteenth century.

§ 35. Introduction of French Words. In a vocabulary of the words used by English writers during the last half of the thirteenth century, only about twelve per cent of the whole number are foreign to the Anglo-Saxon. If we take the words of any writer as they stand in his pages, the proportion will be much smaller. For Robert of Gloucester, it does not exceed four or five per cent. But from the middle of the fourteenth century, English literature presents in this respect a different appearance. A multitude of Romance words is everywhere seen, mixed with those of Teutonic origin. Even works which, like Piers Plowman, were intended for the people, abound in words taken from the French. Most of the French words taken into our language after 1250 were adopted, not from the Norman dialect, but from Central French, which had attained an importance among the French dialects which led to its recognition as the literary standard, — a position which it still occupies. The difference between the English of 1300 and that of 1350 marks this as the time when the higher classes in England became generally acquainted with the English language. Up to this time the inhabitants of the country had been divided into two bodies, having each a language of its own. The nobility and gentry of Norman origin continued to speak French, and only in occasional instances acquired the English, which they looked on with some contempt, as rude in itself and spoken by an inferior race. They had a copious literature, consisting chiefly of poetry and romance, composed in French, but much of it written on English soil. On the other hand, the mass of the people spoke only English. Of course there must have been many individuals who knew both languages, and could act as necessary mediators between the great parties that knew but one. These, however, formed only a small fraction of the whole people. In those times, a work composed in English could not admit French words to any great extent; for such a work would not be read by the higher classes, and to the lower classes French was generally unintelligible. But the events of the thirteenth century had been gradually filling up the chasm which before separated the two races. When the French possessions of the English crown were wrested from the feeble hands of John, the political ties were severed which had long connected the Normans of England with their brethren across the Channel. Henceforth England, not France, was their country; the English people, not the French, were their countrymen. They fought with Saxon fellow-soldiers

against French enemies; they struggled against royal prerogative with sympathy and aid from their Saxon fellow-subjects. At the same time, social barriers were giving way. Marriage ties were connecting the two races. Saxons were acquiring wealth, passing into the ranks of the aristocracy, or rising to high positions in the church. The feeling of a common nationality was coming to prevail over the alienating memories of race and conquest. Under such influences, it was natural that the French-speaking aristocracy should begin to learn English. They did this as a matter of convenience, to carry on the necessary intercourse of business and society, without designing to give up the French, which in many instances continued to be spoken in their families for two or three generations longer. The change, we may presume, commenced with that lower, but more numerous, part of the Norman aristocracy who resided constantly on their estates, surrounded by a Saxon population. Once fairly initiated, the movement must have gone forward with rapidity. The court was the last place to be reached by its influence. It is believed that none of the three Edwards was accustomed to speak English. It is stated that during the first half of the fourteenth century, French was still used in the schools as the language of instruction and the medium for learning Latin, but that during the last half of the same century the English gradually took its place. By a statute of 1362 it was enacted that "all pleas which shall be pleaded in any court whatsoever, shall be pleaded, shewed, defended, answered, debated, and judged in the English tongue," not, as heretofore, in French. Now, English, as spoken by the higher classes who learned it, would naturally be intermixed with French expressions. It would have been otherwise if they had regarded the English as a superior language, as having a finer nature or a higher cultivation than their own. But they doubtless felt that by an intermixture of French they were enriching and ennobling an unrefined and meager idiom. Whenever the French word which rose to their mind bore a shade of meaning for which they found no equivalent in English, they did not content themselves with a loose expression, nor did they endeavor to form by English analogy one that should be exact: they employed the French word itself. They did this even when the English offered an equivalent expression, if the French word was particularly recommended by interesting or agreeable associations. For words of a technical character they would scarcely think of seeking equivalents in English. The body of the English people were now for the first time brought into oral communication with their rulers. Hearing the French words with the Saxon, they were able to understand their meaning. Hearing them from the lips of their superiors they naturally imitated and adopted them. Thus the new importations, bearing the stamp of elegance and fashion, passed from the circles of polite society into the language of the vulgar. They found free entrance into works of literature, not only because they supplied real deficiencies in the English vocabulary, but also because they were especially familiar and acceptable to those classes whom the author would most wish to interest and please.

§ 36. Rise of Literary or Standard English. From the Norman conquest to 1350 there had been, as we have seen, no one dialect which was regarded as the English literary language, as Tuscan is regarded as Italian, Castilian as Spanish. In the latter half of the fourteenth century, however, the Midland dialect shows signs of getting the start of the other two. As the language of London, and as a dialect intelligible to both Northern and Southern Englishmen, it had obviously great advantages, and was rapidly becoming in some measure the common speech, when the works of Chaucer — who was born in London and whose language was recognized by contemporaries and followers as a model of purity and elegance — stamped it at once and for all time as literary English. Thus the common English of to-day is the direct descendant, not of King Alfred's West Saxon, but of the old Mercian dialect, and the modern dialects of Somerset and other South English shires are the only living representatives of the West Saxon.

§ 37. Middle English of the Third Period, or Late Middle English (1400–1500). This period is marked by the gradual prevalence of literary or standard English over the dialectic chaos which characterizes the three preceding centuries. In the North of England, however, the descendant of the Northumbrian still maintained itself as an important spoken idiom, and in Scotland this dialect continued to receive that cultivation which, beginning in the fourteenth century, justifies us in calling Scottish a distinct language. In the course of this period the old inflections underwent some further simplification. Unaccented final *e*, which, whether inflectional or not, had ceased to be pronounced in the North in the preceding period, was similarly lost in the South and in the literary language by 1450. This loss of final *e* considerably modified the general character of our speech. Among other effects, it vastly increased the number of monosyllables. Thus *I singe* became *I sing*, *grenè* became *green*, *the goodè man* became *the good man*, and so on.

Among the poets of the first half of the fifteenth century may be mentioned Chaucer's uninspired pupils Thomas Occleve (or Hoccleve) and John Lydgate, both of whom began their literary career in their master's lifetime. Lydgate, the more famous of the two, was a copious writer and fluent versifier, but had no genius and little talent. Poetry was at a low ebb throughout the century; but prose was more successfully cultivated. The Morte d'Arthur, by Sir Thomas Malory, a prose compendium of the romances concerning King Arthur and his Knights of the Round Table, which was finished in 1469 or 1470, is still a favorite book. It was published by Caxton in 1485. The introduction of printing by Caxton about 1477 was an event of great moment in the history of the literary language. Caxton's History of Troy (Bruges, 1474) is thought to have been the first book printed in English; his Dictes and Sayings of the Philosophers, 1477, was, so far as we know, the first actually printed in England.

§ 38. Commencement of the Modern Period. With the beginning of the sixteenth century, the English language enters on a new stage of its history. Until we reach 1550, however, we still feel as if we were, in a sense, in the Middle English Period. The poets Stephen Hawes and Alexander Barclay were born in the preceding century. Hawes, who is the author of a tiresome allegory called The Pastime of Pleasure, was an imitator of Lydgate. Barclay translated Sebastian Brandt's famous satire, the *Narrenschiff* (or Ship of Fools), and is celebrated as the first writer of English eclogues. His contemporary, the rude but vigorous Skelton, had more poetic talent. The poems of Wyatt and Surrey, though written before 1550, belong in style and spirit rather to the Elizabethan age. Prose was cultivated with considerable success during this half-century. The translation of Froissart's Chronicle, by Lord Berners, which appeared in 1523–25, was not unworthy of the rich and glowing original. We may mention also, as excellent specimens of the language of that time, the writings of Sir Thomas More, and the New Testament translation of William Tyndale, which was printed in 1526.

In spite of the temptation to attach the first half of the sixteenth century to the period preceding, it is better to regard it, from the linguistic point of view, as forming a part of the Modern English Period. True, the language did not cease to change in 1500. It can never cease to change until it ceases to be a living language. But its changes since that time have not had the rapid progress and the radical character which belonged to those of the preceding centuries. Many words which were in use three hundred years ago have since become obsolete. A much larger number have been added to the language, including not only technical and scientific terms by the thousand, but a multitude of words which belong to the common stock of literature and society. Words which have been retained have often lost their old meanings and taken on new ones. In the combination and construction of words, in phrase and idiom, the changes have been yet more numerous, and the general color and flavor of English style are quite different now from what they were in the last half of the sixteenth century. But these differences are mainly lexical and rhetorical, rather than grammatical. As to inflection, the little which remained at that time has come down to us with hardly any change. Yet the ending *th* in the third person singular of verbs (as *cometh*, *doeth* or *doth*) has all but disappeared from the common language, and remains chiefly as an archaism of the solemn or religious style, being kept in memory by the usage of the English Bible. The subjunctive, as distinct from the indicative in the third person singular (as *if he come*, *if he do it*, *if it be so*), is also growing obsolete. Still, we never feel that the language of Shakespeare and Bacon is widely different from our own. Even Spenser, notwithstanding the archaisms with which he loved to garnish his style, appears to us much less strange and remote than Lord Berners and Sir Thomas More. The great writers of the Elizabethan age have done much to perpetuate and keep alive the form of English which is seen in their works. The Authorized Version of the Bible has exerted a conservative influence of the same kind, and one even more powerful. It must be observed, however, that this version as printed now has not in all respects its original appearance: the spelling has been modernized, and a number of obsolete forms have given place to those in present use. Thus, *mote* is changed to *more*, *sith* to *since*, *fet* to *fetched*, *oweth* to *owneth*, *unpossible* to *impossible*, etc. The new revision of the English Bible has removed still more of these archaisms, but has left a great many intact. If works printed in Shakespeare's day appear strange, at first view, to the modern reader, it is chiefly owing to changes since made in the spelling, which did not become fixed until a century later. Unfortunately, these changes are far from having made the orthography of the language simple and consistent. The defects of English spelling have to a great extent arisen from the mixture of different elements in the language. Neither the Anglo-Saxon orthography nor the Old French was distinguished for its regularity. But when the two were thrown together, the result was a mass of confusion and anomaly hardly to be paralleled, except, perhaps, in the spelling of the native Irish. The present system retains much of this chaotic character. It is, perhaps, too firmly fixed for extensive changes, such as could alone effect a material improvement. But it is not creditable to the English name, nor accordant with the practical spirit of the English people. With a multitude of signs for the same sound, and a multitude of sounds for the same sign, it poorly fulfills the original and proper office of orthography, to indicate pronunciation; nor does it better fulfill the improper office, which some would assert for it, of a guide to etymology. It imposes a needless burden on the native learner. To a foreigner it seriously aggravates the difficulty of acquiring the language, and thus restricts the influence of English literature on the mind of the world.

§ 39. Introduction of Latin and Greek Words. We have already seen that a number of words passed from the Latin into the Anglo-Saxon. The same process has gone on in the subsequent stages of the language. In the third Middle English period, it received a new impulse. The admission of foreign words in great numbers from the French, a daughter of the Latin, made it natural and easy to admit them also from the mother language. In many instances it is difficult to determine whether a word of Latin origin has come to us through the French, or has been taken directly from the Latin. But while the importation of French words ceased, after a time, to be an active and prominent agency in the growth of the language, it has been otherwise with the tendency to borrow from the Latin. This became even stronger with the increasing attention to classical studies. The fondness for Latin phraseology is noticed with censure by Thomas Wilson in his System of Rhetoric and of Logic, published in 1553: "The unlearned or foolish fantastical, that smells but of learning (such fellows as have been learned men in their days), will so Latin their tongues, that the simple cannot but wonder at their talk, and think surely they speak by some revelation." In like manner, an author of the next century, Sir Thomas Browne, whose own style is in a large measure Latin, remarks, "If elegancy still proceedeth, and English pens maintain that stream we have of late observed to flow from many, we shall within a few years be fain to learn Latin to understand English, and a work will prove of equal facility in either." The practice of adding to the English vocabulary words adopted from the Latin and the Greek is still carried on with activity, and there is little prospect of its ceasing. It is almost necessary as a means of denoting those new objects, ideas and relations which are continually appearing and demanding expression. The resources of the English for the formation of new words from elements already existing in it are so limited that aid from other languages is indispensable. The new terms which are required by the progress of science are almost wholly drawn from these sources, especially from the inexhaustible storehouse of Greek expression.

THE ENGLISH A COMPOSITE LANGUAGE.

§ 40. Proportion of the Elements. There is no language, probably, in which all the words are formed by its own processes from roots that originally belonged to it. What is peculiar to the English is not that it has words borrowed from other languages, but that it has so many of them; that a large part of its vocabulary is of foreign origin. In this respect it may be compared to the modern Persian and the Roumanian. The French words which have been ingrafted on the native English stock are, with few exceptions, derived from the Latin; and when added to the almost equal number which have come directly from that language, they make, perhaps, four fifths of all our borrowed words. Much smaller, though still considerable, especially in scientific use, is the number of words taken from the Greek. The remainder of our foreign words can hardly exceed a twentieth part of the whole vocabulary, and are drawn from a great variety of sources — Celtic, Danish, Dutch, Hebrew, Arabic, Turkish, etc. If all the words in a large English dictionary were classed according to their origin, it would appear that the foreign or non-Saxon words make a decided majority of the whole number. It must be remarked, however, that in such a dictionary there are many words which, though perhaps put forward by distinguished writers, have never established themselves in general use; and also many words which belong, indeed, to the established phraseology of particular sciences and arts, but are unknown to the great majority even of educated people. In both classes the number of foreign words is disproportionately large. Hence, if we take all the distinct words used by particular writers, we shall find a different ratio between the Saxon and foreign elements. Of those used by Shakespeare, it is said that sixty per cent are of Saxon origin; and the ratio is about the same for the common version of the Bible. But in most literary works of the last two centuries, the foreign element is certainly larger: in general, doubtless, it would be found, if reckoned in this way, to equal or exceed the Saxon. But if, instead of counting only distinct words as they would be given in a vocabulary, we count all the words of a writer as they stand on his pages, we shall obtain very different ratios. The Saxon words will now be found in a large majority, varying from sixty to more than ninety per cent of the whole number. The style of Johnson abounds in words of Latin origin; but in the Preface to his Dictionary there are seventy-two per cent of Saxon words. In Milton's poetical works about two thirds of the vocabulary are foreign; but in the sixth book of Paradise Lost, four fifths of all the words are Saxon. The explanation of these appearances lies in two facts: 1. The words which belong more to the grammar than to the lexicon — which express not so much conceptions of the mind as the relations between its conceptions — are almost wholly Saxon. To this class belong articles, pronouns, adverbs from pronominal roots, nearly all prepositions and conjunctions (only *save*, *during*, *concerning*, *because*, and a few more, are French; *except* is Latin). These are words which occur in every sentence. In a language, like ours, of scanty inflection, it is hardly possible to form two consecutive sentences without them. The substantial elements of the proposition, nouns, adjectives, verbs, may all be obtained

from abroad; but the connecting links, which must unite them in the framework of sentences, can be found only at home. 2. If we turn to these substantial elements, and fix upon the objects, qualities, states, and actions which most frequently present themselves to the mind, and thus call for the most frequent expression, it will be found that a large majority of them are denoted by words of Saxon origin. We refer to objects, such as *man, horse, bird, body, flesh, blood, head, hand, heart, soul, mind, heaven, wind, rain, day, summer, water, stone, gold, field, tree, apple*, etc.; to qualities, such as *good, evil, long, short, cold, hot, hard, soft, white, black*, etc.; to actions, such as to *lie, sit, stand, walk, run, do, say, have, break, think, feel, love, hate, find*, etc. There are borrowed words of similar meaning, as *beast, eagle, vein, face, spirit, air, hour, autumn, river, gem, fruit, flower*, etc.; *large, false, tender, pure, purple*, etc.; to *move, enter, touch, please, enjoy*, etc.; but they are altogether fewer, and generally of less frequent occurrence. The words for numbers lower than a *million* are all Saxon; among the ordinals only *second* has come in from the French.

§ 41. **Fusion of the Elements.** The foreign words that have come into our language do not stand by themselves as a distinct and independent class: they are Anglicized, subjected to English laws and analogies, and thus assimilated to the older denizens of the language. This has taken place chiefly in three ways: 1. They are in most cases accented according to English analogy. This assumption of a new accent has been a gradual process. In early English poetry we find *cuntré* (country), *coloúr, comaúndïèment, méssangère, bénysoùn* (benison), *castéll* (castle), etc., accented on the last syllable. The usage of Chaucer is quite variable. Thus we find both *hónour* and *honoúr, penaúncè* and *pénaunce, vanquésshen* and *vánquesshe, manéré* and *máner, viágé* and *viage*, and so in many other words. In the next century there was a greater prevalence of the English accent. And the latter had established itself in Shakespeare's time nearly as at the present day, though there was still a rather large class of dissyllabic adjectives (such as *complete, profound, divine*, and the like) that show variation in this respect. Even now, there are variations. Thus a number of words which as verbs retain the French accent, when used as nouns exchange it for an English one: thus *áccent* and *to accént, cóncert* and *to concért, insult* and *to insúlt*, etc. 2. The borrowed words are inflected according to English analogy. It is true that *radius, nucleus, momentum, criterion, phenomenon*, and some other words retain their Latin and Greek plurals, *radii, nuclei, momenta, criteria, phenomena*, etc. But these are rare exceptions. In general, the few inflections left in English are applied as readily to a French or Latin word as to a Saxon one. As the Saxon verb *love* makes *lovest, loves, loved, lovedst, loving*, so the French verb *move* makes *movest, moves, moved, movedst, moving*. 3. The borrowed words are often made to receive prefixes which come from the Saxon, as in *be-siege, un-pretending, mis-conceive, under-value, over-turn, after-piece, out-line*, etc.; or formative suffixes which come from the Saxon, as in *large-ness, duke-dom, false-hood, apprentice-ship, use-less, grate-ful, quarrel-some, fool-ish*, etc. It affords a still more striking evidence of the fusion which has taken place among the elements of our language, that the process here described is in many cases reversed; that particular endings which were found in the foreign words have become so familiar to the English ear and mind as to be disjoined from their connections, and applied with more or less frequency to words of native stock. Thus, we find Saxon words with Latin or French prefixes, as in *en-dear, dis-belief, re-light, inter-mingle, trans-ship*, etc.; and Saxon words with Latin or French formative suffixes, as in *forbear-ance, bond-age, atone-ment, thievery, stream-let, eat-able, murder-ous*, etc.

§ 42. **Different Character of the Elements.** It must be admitted that the fusion of which we have spoken is not a complete one. The borrowed words, taken as a class, have a peculiar character, which separates them, even to the feeling of uneducated persons, from those of native stock. There are, indeed, particular cases in which the ordinary relation does not hold; there are some in which it is actually inverted, as in *sign* and *token, color* and *hue, power* and *might*. Here the familiar *sign, color, power*, are from the French, and the more poetical *token, hue, might*, are from the Saxon. But in general the Saxon words are simple, homely, and substantial, fitted for everyday events and natural feelings; while the French and Latin words are elegant, dignified, and artificial, fitted for the pomp of rhetoric, the subtility of disputation, or the courtly reserve of diplomacy. The difference arises partly from the fact already noticed, that the most familiar objects, qualities, and actions have generally retained their primitive Saxon designations. The foreign words bear an impress derived from the courtiers and scholars who introduced them. To a great extent they stand for conceptions which belong especially to disciplined thought and cultivated feeling. But the difference, no doubt, depends also on the impression which the two classes of words make upon the ear. The Saxon are shorter, in great part monosyllabic, and often full of consonants; while the French and Latin words are longer, smoother, and have greater breadth of vowel sounds. It cannot well be denied that this marked diversity of character between native and foreign words gives to our language a somewhat heterogeneous and incongruous aspect. Yet it furnishes means for great variety in the expression of the same thoughts, and serves to distinguish and individualize the styles of different authors. Among writers who in this respect occupy an extreme position, may be named, on the one side, Bunyan, De Foe, Franklin, and Cobbett; on the other, Hooker, Milton, Johnson, and Chalmers.

§ 43. It has been observed that in the liturgy of the Church of England there is a marked tendency to couple French and Saxon expressions of the same, or nearly the same, meaning: thus, "to *acknowledge* and *confess*," "by his infinite *goodness* and *mercy*;" "when we *assemble* and *meet together*." A similar tendency has been pointed out elsewhere, as in the writings of Hooker.

§ 44. It was natural that when a multitude of foreign words were brought into our language, many should coincide in meaning with words that already belonged to it. In some cases, as in *will* and *testament, yearly* and *annual, begin* and *commence*, etc., the two words have continued to be used with scarcely any difference of meaning. But the tendency has been to turn the new material to good account by giving to the words of each pair senses more or less clearly distinguished from each other. In *body* and *corpse, love* and *amour, work* and *travel, sheep* and *mutton*, etc., the distinction is a broad one: in *bloom* and *flower, luck* and *fortune, mild* and *gentle, win* and *gain*, etc., it is slighter and more subtile. The discriminations thus established have added much to the resources of the language, giving it a peculiar richness and delicacy of expression.

THE ENGLISH POOR IN FORMATION AND INFLECTION.

§ 45. **Power of Self-development lost.** The English has lost a large part of the formative endings which belonged to the Anglo-Saxon. Many which still appear in English are confined to the particular words that now have them, and can no longer be used in the formation of new words. Only a very few (as *-er, -ing, -ness*, for substantives; *-y, -ish*, for adjectives; *-en* for verbs, *-ly* for adverbs) continue to be used with much freedom for this purpose. So, too, many prepositions and particles which were once freely employed as prefixes in the formation of compound verbs, are no longer used in this way. From the simple verb to *stand* the English makes *understand* and *withstand;* the Anglo-Saxon had *ætstandan, bestandan, bigstandan, forstandan, forestandan, gestandan, óðstandan, understandan, wiðstandan, ymbstandan*. This deficiency in English is made up in a measure by the use of separate particles, as, to *stand up*, to *stand off*, to *stand by*, to *stand to*, etc. Still the formative system of the language has become greatly restricted. It no longer possesses the unlimited power of development from its own resources, which we see in the Anglo-Saxon and in the modern German. If a new word is wanted, instead of producing it from elements already existing in English, we must often go to the Latin or the Greek, and find or fashion there something that will answer the purpose. By this process our language is placed in a dependent position, being reduced to supply its needs by constant borrowing. But it is a more serious disadvantage that in order to express our ideas we are obliged to translate them into dead languages. The expressiveness of the new term, that which fits it for its purpose, is hidden from those who are unacquainted with the classic tongues; that is, in many cases, from the great body of those who are to use it. To them it is a group of arbitrary syllables, and nothing more. The term thus loses its suggestiveness, and the language suffers greatly in its power of quickening and aiding thought.

§ 46. **Freedom of Position restricted.** It is one disadvantage arising from the loss of inflection that our language is much restricted in the position and arrangement of words. The result is unfortunate, not only as it tends to monotonous uniformity of expression, but still more as it takes away the best means of representing emphasis, or the superior importance of a particular word in the sentence. The simple Latin sentence, "*dux regem decepit*," may be arranged in six different orders without doing violence to Latin idiom, the choice of one order rather than another, if partly regulated by euphony or by love of variety, is also much influenced by the relative importance of the terms. But the corresponding English sentence has its fixed, invariable order, "the general deceived the king:" transposition would give it a wholly different meaning. It is true that we are able by a change from active to passive, as well as by other devices, to secure variety of expression, and to satisfy the demands of emphasis: thus, "the king was deceived by the general;" "it was the general who deceived the king;" "it was the king who was deceived by the general;" "a deception was practiced by the general on the king," etc. Still, with all such helps, we are often obliged to indicate by the clumsy device of Italic letters what a more highly inflected language could have shown in the position of the words. It should be said, however, in justice to the English, that it uses nearly all the freedom of arrangement, that, scantily inflected as it is, would be consistent with perspicuity. It is therefore superior in actual variety of arrangement to the French, and perhaps not inferior to the more highly inflected German, which in the ordinary prose style has limited its natural freedom by inconvenient and cumbrous restrictions.

§ 47. **Monosyllabism and Want of Euphony.** The loss of inflection, and the disappearance of unaccented final *e* as a syllable, have reduced a multitude of English words to the form of monosyllables. It is not uncommon to find whole sentences which contain no word of greater length. This peculiarity helps us to understand, better than most other nations are able to do, that primitive monosyllabic condition which must have preceded all inflected language — a condition which has remained unchanged to this day in languages like the Chinese, where every syllable is a separate word, with its own accent and its own distinctly apprehended meaning. If this monosyllabic character gives a certain plain directness and pithy force to English expression, it can hardly be doubted that it is a disadvantage to euphony and rhythm. Pope complains that "ten slow words oft creep in one dull line." And no one can read Chaucer's poetry, pronouncing the unaccented *e* as the verse requires, and as it was actually pronounced in the poet's time, without feeling a certain regret that a hurried and slurring pronunciation of our fathers should have destroyed this pleasing feature of the old language. The suppression of this *e* has also been unfavorable to euphony by producing, in a multitude of cases, the harshest combinations of consonants; as in *hosts, breadths, texts, shifts, thirsts, bulg(e)d, starch(e)d, task(e)d*. In these words, which cannot be properly pronounced without a strong effort of will and of vocal organs, the earlier dissyllabic forms, *host-es, breadth-es, starch-ed, task-ed*, etc., presented little or no difficulty of utterance. In most of these cases, as in many others, the harshness has been aggravated by that extended use of the final *s*, which has given a peculiar sibilating character to the pronunciation of our language. In Anglo-Saxon, only a part of the nouns took *s* in the plural, and those only in two out of the four cases: in English, the *s* has been applied to nearly all plural nouns, and for all cases of the plural. In Anglo-Saxon, the verb in the third person singular of the present has *th* (ð or þ) (though the Northumbrian dialect has often *-es*): in the English of our day, this *th* is still occasionally employed as an archaic form, but in all ordinary use *s* has taken its place.

DIALECTS.

§ 48. The English language is not spoken with uniformity by all who use it. Nearly every county in Britain has its local dialect, its peculiar words and forms, which are used by the common people of the lower classes. This diversity is, in part, of long standing; in some points, it goes back even to Anglo-Saxon times. This great variety of local idioms may be classified, according to Mr. Ellis, in six divisions: Southern, Western, Eastern, Midland, Northern, and Lowland (Scotch), each of which falls apart into several subdivisions or districts. For most of the dialects, glossaries have been published, often with specimen-compositions of greater or less extent; but only the Scotch (the lineal descendant of the Old Northumbrian) can be said to have a literature. Scottish literature, which is almost wholly poetical, begins in the fourteenth century, with John Barbour, a contemporary of Chaucer. His long historical poem, entitled The Bruce, was followed in the early part of the next century by the Originale Chronykil of Andrew of Wynton, and in its latter part by the Wallace ascribed (without much probability) to Henry the Minstrel, often called Blind Harry. But the King's Quair, by the unfortunate James I. of Scotland, is not written in the Scottish dialect. In the sixteenth century we find, first, Gawin Douglas, the translator of the Æneid and author of the Palace of Honour, and then two poets of higher genius, William Dunbar and Sir David Lyndsay. In more recent times, the most eminent writers of this dialect are Allan Ramsay, the author of the Gentle Shepherd, and, greatest of all, Robert Burns.

§ 49. In every dialect, apparently, there are preserved a certain number of old words and forms, which have passed out of use or have suffered alteration in the common language; but it is equally true that every dialect has lost or altered some which remain unchanged in the common language. Thus, if the Scotch *kye* for *cows, brak* for *broke*, etc., are closer to the Anglo-Saxon than are the corresponding English words, the contrary is true of *gie* for *give, fa'* for *fall, houd* for *hold, winna* for *will not*, etc. It is believed that, on the whole, the common English stands nearer than any of the dialects to the early form of the language.

§ 50. The English, as spoken by the common people of Ireland, has a multitude of peculiarities, both of sound and of idiom, many of them borrowed from the Gaelic, which was once the language of the whole island.

§ 51. In America, settlers from different parts of the mother country were brought together in the same colonies, so that no dialect of England or Scotland has been preserved in its distinctness on the new continent. At the same time, the migratory habits of the people have had the effect of securing a general uniformity of language in all parts of the country. With the exception of the negro dialect in the Southern States, it can hardly be said that there are strongly marked local dialects in America. The forms of speech which are noticed as Americanisms, are not, in general, confined to a particular State or district. Under this name are included expressions which are widely different

in their character. Some are confined to uncultivated people; others to those who are not merely uncultivated, but vulgar; while a large part are constantly, and indeed necessarily, used by persons of the highest education. They also differ widely in their origin. Some are derived from the native Indian languages, as *wiguam*, *squaw*, *homny*, etc.; some from the French, as *levee*, *crevasse*, *coulee*, etc; some from the Spanish, as *rancho*, *canyon*, *stampede*, etc.; yet more from the Dutch, as *patroon*, *boss* (master-workman), *stoop* (porch), etc. Most of the foregoing words relate to things that are specially American: to express other objects or relations of this kind, new formations have been made from English words, as *congressional*, *federalist*, *mileage*, *nullification*, etc.; or English words have been used in new meanings, as *eagle* (coin), *corduroy* (road), to *locate* land, etc. There are other cases of new formation, which have no such reason, as *outsider*, to *eventuate*, etc.; or of new senses for old words, as to *fix* (put in order), *creek* (small river), etc. Some words which once belonged to the common language, but have become obsolete in England, are still heard in America, as *fall* (autumn), *gully* (channel worn by water), *peek* (peep), *rare* (underdone), etc. A larger number of so-called Americanisms have come from the English dialects, as *bail* (handle of pail), *spry* (nimble), to *lam* (beat), to *slump* (break through snow or bog), etc. And beside these, there are words and uses of words which are mere vulgarisms, the language of cant or slang, as to *absquatulate* (abscond), *spurge* (pompous display), to *jork over* or *shell out* money, etc. A number of words will always be wanted to express what is peculiar to America in nature, society, and institutions. But apart from these, it is not probable that Americanisms will ever be multiplied to any great extent. For, besides the active and increasing intercourse with the other side of the Atlantic, the almost universal habit of reading, which finds exercise both in English and American authors, will have a powerful tendency to keep the language, even of the poorer classes, in substantial agreement with the common language of literature.

ANGLO-SAXON INFLECTION.

The following brief sketch of Anglo-Saxon inflection follows mainly the *Angelsachsische Grammatik* of Eduard Sievers, 3d edition, Halle, 1898, of which there is an English translation by A. S. Cook, Boston, 1903. The outlines of early English inflection are founded on Eduard Fiedler's *Wissenschaftliche Grammatik der englischen Sprache*, Leipzig, 1861, and the *Historische Grammatik der englischen Sprache* of C. Friedrich Koch, with much help from Prof. F. J. Child's *Observations on the Language of Chaucer* (in Memoirs of the American Academy, New Series, Vol. VIII.). See also K. D. Bülbring's *Altenglisches Elementarbuch*, Heidelberg, 1902, and M. Kaluza's *Historische Grammatik der englischen Sprache*, Berlin, 1906-07.

§ **52.** The Anglo-Saxon had seven long vowels, *á*, *é*, *í*, *ó*, *ú*, *ǽ*, *ý*. The first five appear to have been sounded as in Eng. *par*, *prey*, *caprice*, *prone*, *prune*: *ǽ* was probably sounded much like English *ai* in *fair*. The sound of *ý* apparently, like that of French *u* and German *ü*, was intermediate between *ú* and *í*. To these correspond seven short vowels, *a*, *e*, *i*, *o*, *u*, *æ* (like Eng. *a* in *hat*), *y*, which were less prolonged in utterance. The short *i* and *y* are often confounded in writing, as *hyrde* or *hirde* (*hierde*), shepherd, *cining* (but more correctly *cyning*), king.

§ **53.** The Anglo-Saxon had four diphthongs, *ea*, *eo*, *io*, *ie*, which in some cases stood for original short vowels, and were then short in quantity, in other cases were genuine (long) diphthongs (written *éa*, *éo*, *io*, *ie*). Whether long or short the first element of the double sound received the stress of voice. Short *ea* and *eo* (or *io*) commonly stand for original *a* and *e* (or *i*) respectively; long *éa*, *éo*, for primitive Teutonic *au*, *eu*, *iu*. Short *ie* (later written *i*, *y*) is commonly a modification of *ea* or *eo*; long *ie* (later *í*, *ý*), a modification of *éa*, *éo*.

§ **54.** The Anglo-Saxon had two characters for the interdental spirant (*th*), *ð* and *þ*. These signs were used without distinction of sound. The old theory that *þ* represented the whispered sound heard in Eng. *thin*, *breath*, *ð* the vocal (voiced) sound heard in *this*, *breathe*, is not borne out by the MSS. Both sounds were doubtless known to the Anglo-Saxon, but there was no attempt to distinguish them in writing. In normalized texts many modern editors print *þ* at the beginning of a word, elsewhere *ð*; but there is no uniformity of practice in this respect.

§ **55.** The Anglo-Saxon never uses *y* as a consonant; but *g* was sometimes used to express that sound, as in *geoc*, yoke, *git*, you two. The letter *h* before a consonant, or at the end of a word, must have had a stronger sound than in English (cf. the sounds of *ch* in German *ach* and *ich*). The letter *f* served to indicate two sounds. that of Eng. *f* in *father* (so at the beginning or the end of a word), and that of English *v* in *have* (so between two vowels, as in *lífes*, genitive of *líf*, life).

§ **56.** It is a general rule that a consonant is not doubled either at the end of a word or before or after another consonant, as *swam* (for *swamm*), he swam, *swimð* (for *swimmð*), he swims, *sende* (for *sendde*), he sent, *éhte* (for *éhhte*), he persecuted.

SUBSTANTIVES.

VOWEL DECLENSION.

§ **57. Masculines.** Paradigms: *fisc* (stem *fisco-* or *fisca-*), fish; *hierde* (stem *-djo-* or *-dja-*), shepherd.

	Sing.	Plur.	Sing.	Plur.
Nom.	*fisc*	*fiscas*	*hierde*	*hierdas*
Gen.	*fisces*	*fisca*	*hierdes*	*hierda*
Dat.	*fisce*	*fiscum*	*hierde*	*hierdum*
Acc.	*fisc*	*fiscas*	*hierde*	*hierdas*

§ **58. Feminines.** Paradigms: *giefu* (stem *-ā-*, *-ō-*), gift; *dǽd* (stem *dǣdi-*), deed.

	Sing.	Plur.	Sing.	Plur.
Nom.	*giefu*, *-o*	*giefa*, *-e*	*dǽd*	*dǽde*, *-a*
Gen.	*giefe*	*giefa* (*-ena*)	*dǽde*	*dǽda*
Dat.	*giefe*	*giefum*	*dǽde*	*dǽdum*
Acc.	*giefe*	*giefa*, *-e*	*dǽd* (later *-e*)	*dǽde*, *-a*

§ **59. Neuters.** Paradigms: *scip* (stem *scipo-* or *-a-*), ship; *rice* (stem *rīcjo-* or *-ja-*), kingdom.

	Sing.	Plur.	Sing.	Plur.
Nom.	*scip*	*scipu*, *-o*	*rice*	*ricu*
Gen.	*scipes*	*scipa*	*rices*	*rica*
Dat.	*scipe*	*scipum*	*rice*	*ricum*
Acc.	*scip*	*scipu*, *-o*	*rice*	*ricu*

§ **60.** Words of more than one syllable which end in *-el*, *-en*, *-er*, *-or*, are often syncopated before a case-ending, as *ealdor*, masc, elder, gen. *ealdres*; *túcen*, neut., token, plur. *túcnu*: so, also, some others, as *máðum*, masc., treasure, gen. *máðmes*.

§ **61.** Masculines and neuters of one syllable which have the vowel æ, take *a* instead of æ in the plural, as *dæg*, masc., day, plur. *dagas*; *fæt*, neut., vessel, plur. *fatu*.

§ **62.** Masculines and neuters sometimes have *-ena* or *-ana*, instead of *-a*, in the gen. plur. A few masculines — as *léode*, people, *Dene*, Danes — have *-e* in the nom. acc. plur. *Sunu*, son, nom. acc. sing., makes *suna* in the gen. dat. sing. and nom. gen. acc. plur., *sunum* in the dat. plur. *Wudu*, masc., wood, is declined in the same way, but also later with gen. sing. *wudes*, nom. acc. plur. *wudas* (so also *sunas*). The dat. sing. in *-a* is seen also in masc. *winter*, winter, *sumer*, summer, *feld*, field, *ford*, ford, *weald*, wood, and fem. *hand*, hand, *duru*, door. The last two words have *-a* in the gen. sing. *Feld*, etc., have later gen. sing. in *-es*, nom. acc. plur. in *-as*.

§ **63.** Neuters of one syllable which have a long vowel or end in two consonants, drop *-u* in the nom. acc. plur., as *léaf*, leaf and leaves, *word*, word and words. Neuters of more than one syllable have sometimes *-u*, sometimes no ending.

N DECLENSION.

§ **64.** Paradigms: masc. *oxa* (stem *oxan-*), ox; fem. *tunge* (stem *tungan-*, originally *-ōn-*), tongue, neut. *éage* (stem *éagan-*), eye.

		Masc.	Fem.	Neut.
Sing.	Nom.	*oxa*	*tunge*	*éage*
	Gen.	*oxan*	*tungan*	*éagan*
	Dat.	*oxan*	*tungan*	*éagan*
	Acc.	*oxan*	*tungan*	*éage*
Plur.	Nom.	*oxan*	*tungan*	*éagan*
	Gen.	*oxena*	*tungena*	*éagena*
	Dat.	*oxum*	*tungum*	*éagum*
	Acc.	*oxan*	*tungan*	*éagan*

§ **65.** Of consonant stems ending in other letters than *n*, the language has only traces. Thus substantives in *-nd* from present participles are declined in the sing. like *fisc*. The nom. and acc. plur. are either like the nom. sing. or add *-e*, but in some words the ending *-as* occurs: thus, *helmberend*, helm-bearer and helm-bearers; *hettend*, *-e*, haters, *wealdendas*, rulers. In dissyllables the gen plur. always ends in *-ra*: thus *wígendra*, from *wígend*, warrior. *Fréond*, friend, and *féond*, foe, make dat. sing. *friend*, *fiend*, or *fréonde*, *féonde*; plur. nom. acc. *friend*, *fiend*, or *fréond*, *féond*, in poetry often *fréondas*, *féondas*.

The masculines *fót*, foot, *tóð*, tooth, *man* (gen. *mannes*), man, and the feminines (nom. and acc.) *bóc*, book, *bróc*, breeches, *gós*, goose, *cú*, cow, *lús*, louse, *mús*, mouse, *burg*, *burh* (gen. *burge*, also *byrg*, *byrig*), town, fort, *turf*, turf, make in the dat sing. and nom. acc. plur. *fét*, *téð*, *men*, *béc*, *bréc*, *gés*, *cý*, *lýs*, *mýs*, *byrig*, *tyf*; *fót* has instrumental sing. *fóte* or *fét*.

§ **66.** *Fæder*, father, is indeclinable in the sing. (gen. sing. also *fæd(e)res*); in the plur. it is declined like *fisc*. *Bróðor*, brother, nom. gen. acc. sing., makes dat. *bréðer*; plur. nom. acc. *bróðor* or *bróðru*, dat. *bróðrum* Similarly are declined *módor*, mother (nom. acc. plur. *módra*, *módru*), *dohtor*, daughter (dat. sing. *dehter*), *sweostor*, sister (sing. indeclinable; plur. nom. acc. *sweostor*).

§ **67.** The fem. *niht*, night, and *mægð* or *mægeð*, maid, make the acc. sing. and nom. acc. plur. like the nom. sing. The neuters *ég*, egg, *cealf*, calf, and *lamb* (*lomb*), lamb, make in the nom. acc. plur. *égru*, *cealfru*, *lambru* (*lombru*), retaining an old *r*. *Cild*, child, which is usually declined like *word*, has also sometimes nom. acc. plur. *cildru*, gen. *cildra*. Feminine abstracts in *o* or *u* — as *ieldu*, old age — are indeclinable in the sing. The fem. *sǽ*, sea, has some masculine forms: it is declined, nom. dat. acc. sing. *sǽ*, gen. *sǽ* or *sǽs*, nom. acc. plur. *sǽs* or *sǽ*, gen. *sǽwa*, dat. *sǽm*. The fem. *éa*, water, is usually indeclinable in the sing. (but sometimes has gen. dat. *ie*); in the plur. it has generally nom. gen. acc. *éa*, dat. *éam*. The fem. *ǽ*, law, is invariable in the whole sing. and the nom. acc. plur. (gen. dat. sing. *ǽwe* sometimes occurs).

ADJECTIVES.

§ **68. Indefinite Declension.** Paradigm: *blind*, blind.

	Sing.			Plur.
	Masc.	Fem.	Neut.	
Nom.	*blind*	*blind*	*blind*	*blinde* (neut. *blind*)
Gen.	*blindes*	*blindre*	*blindes*	*blindra*
Dat.	*blindum*	*blindre*	*blindum*	*blindum*
Acc.	*blindne*	*blinde*	*blind*	*blinde* (neut. *blind*)
Inst.	*blinde*	——	*blinde*	——

§ **69.** The instrumental case is not distinguished from the dative, except in the sing. masc. and neut. In the plural, the three genders are alike, except that the neuter of monosyllabic adjectives short in quantity and (though not uniformly) of adjectives of more than one syllable has *-u* or *-o*, instead of *-e*, in the nom. and acc.: thus, masc. fem. pl. *tile*, neut. *tilu*, from *til*, good. Another ending for the nom. acc. plur. fem. of all adjectives is *-a*. Adjectives of one syllable, unless they have a long vowel or end in two consonants, add *-u* in the nom. sing. fem.; as, *smalu*, from *smæl*, small: so, also, many adjectives of more than one syllable.

§ **70.** The following peculiarities extend also to the definite declension. Adjectives of one syllable, which end in a single consonant preceded by æ, take *a*, instead of æ, when a vowel follows in the inflection; as, *smæl*, small, *smælne*, *smælra*, but *smalu*, *smales*, *smalum*, etc., and def. *smala*, *smalan*, etc. Adjectives of more than one syllable which end in *-el*, *-en*, *-er*, *-ig*, are often syncopated when a vowel follows in the inflection; as, *fæger*, fair, *fægerne*, *fægerra*, but *fægru*, *fægres*, *fægrum*, def. *fægra*, *fægran*. Adjectives of more than one syllable which end in *-e* lose this *-e* before all endings; as, *bliðe*, blithe, *bliðe-es*, *bliðre*, *bliðum*, *bliðne*, def. *bliða*, *bliðan*. This last remark applies to all present participles.

§ **71.** Adverbs are formed from adjectives by adding *-e*; as, *swíðe*, strongly, very, from *swíð*, strong, *hraðe*, soon, from *hræð*, quick. Adverbs in *-lice* (Eng. *-ly*) were first made by adding *-e* to compound adjectives in *-lic*; as, *héalice*, highly, from *héalic*, a

compound of *héah*, high, and *-lic* (cf. *gelíc*), like: but the adverb is often found where there is no adjective in *-lic*, as *sóðlice*, truly, from *sóð*, sooth, true.

§ 72. **Definite Declension.** When the substantive to which the adjective belongs is definite, — as when it is connected with the definite article, or with a demonstrative or possessive pronoun, or with a genitive case, and when it stands in the vocative, — the adjective is inflected according to the N declension, as follows —

	Sing.			Plur.
	Masc.	Fem.	Neut.	
Nom.	*blinda*	*blinde*	*blinde*	*blindan*
Gen.	*blindan*	*blindan*	*blindan*	*blindra* (*-ena*)
Dat.	*blindan*	*blindan*	*blindan*	*blindum*
Acc.	*blindan*	*blindan*	*blinde*	*blindan*

§ 73. **Comparative and Superlative.** The comparative takes *r*, and follows the definite declension; as, *léofra*, dearer, from *léof*, dear. The superlative takes *-ost* (or *-est*), and is declined both definitely and indefinitely. as, *léofost* (or *léofest*), dearest. Some adjectives suffer a change of vowel, in which case the superlative cannot have *-ost: lang*, long, *strang*, strong, take *e:* as, *lengra, strengest: eald*, old, *geong*, young, *feor* (adv.), far, take *ie;* as, *ieldra, fierrest: héah*, high, *néah* (adv.), nigh, make *hierra, hiehst* (*héahst, héhst*), *néarra, níehst* (*nýhst*). Several superlatives, most of them from adverbs, take *-mest;* as, *formest* or *fyrmest*, foremost; *æftermest*, aftermost; *lætemest*, last; *siðemest*, latest; *niðemest*, lowermost; *ufemest* (*ufemest*), uppermost; *útemest* (*útemest*), outmost; *innemest*, inmost; *midmest*, midmost; *hindemest*, hindmost: these are really superlatives from forms in *-ma* with the definite declension, as, *forma, hindema*, in which *-ma* is a superlative ending. Yet more irregular are —

Pos.	Compar.	Superl.	
gód	*betera, bettra*	*betst, betest, betost*	good
yfel	*wiersa*	*wierrest, wierst*	evil
lýtel	*læssa*	*læst*	little
mycel	*mára*	*mæst*	much

§ 74. Comparative and superlative adverbs are regularly formed from adjectives by the endings *-or* and *-ost;* as, *hraðor, hraðost*, from *hræð*, quick.

PRONOUNS.

§ 75. The **Personal Pronouns** are declined as follows: —

	First Person.			Second Person.		
	Sing.	Dual.	Plur.	Sing.	Dual.	Plur.
Nom.	*ic*	*wit*	*wé*	*þú*	*git*	*gé*
Gen.	*mín*	*uncer*	*úre, úser*	*þín*	*incer*	*éower*
Dat.	*mé*	*unc*	*ús*	*þé*	*inc*	*éow*
Acc.	*mé, mec*	*unc*	*ús*	*þé, þec*	*inc*	*éow*

	Third Person Sing.			Third Person Plur.
	Masc.	Fem.	Neut.	
Nom.	*hé*	*héo, hie, hí*	*hit*	*híe, hí, héo*
Gen.	*his*	*hire*	*his*	*hiera, hira*
Dat.	*him*	*hire*	*him*	*him*
Acc.	*hine*	*hie, hí, héo*	*hit*	*híe, hí, héo*

Other forms are *uncit* (= *unc*), *incit* (= *inc*), in the acc. dual; *úsic* (= *ús*), *éowic* (= *éow*), in the acc. plur.; *here* in the gen. dat. sing. fem.; *hig* (= *hí*) in the nom. sing. fem.; *heom* (= *him*) in the dat. plur.; *heora* (= *hira*) in the gen. plur.

§ 76. The **Possessive Pronouns** of the first and second persons are made by giving to the genitives of the personal pronouns the inflection of the indefinite adjective; as, nom. *mín, mín, mín*, my, mine, gen. *mines, minre, mines*, dat. *minum, minre, minum*, etc. *Úser*, before all endings but *-ne*, becomes *úss* by assimilation of *r:* thus, gen. *ússes, ússe, ússes* (for *ús(e)res*, etc.). The possessive of the third person is simply the uninflected genitive of the personal pronoun, *his, hire, his*, plur. *hira*. But *sín* is sometimes used in the reflexive sense, *his own, her own, its own, their own*.

§ 77. The **Demonstrative Pronouns** are declined as follows: —

1. *Sé, séo, þæt*, used also as a definite article, and as a relative pronoun.

	Sing.			Plur.
	Masc.	Fem.	Neut.	
Nom.	*sé*	*séo*	*þæt*	*þá*
Gen.	*þæs*	*þære*	*þæs*	*þára* (*þéra*)
Dat.	*þém, þám*	*þære*	*þém, þám*	*þém, þám*
Acc.	*þone*	*þá*	*þæt*	*þá*
Inst.	——	——	*þý*	——

2. *þés, þeós, þis.*

	Sing.			Plur.
	Masc.	Fem.	Neut.	
Nom.	*þés*	*þéos*	*þis*	*þás*
Gen.	*þises*	*þisse*	*þises*	*þissa*
Dat.	*þisum*	*þisse*	*þisum*	*þisum*
Acc.	*þisne*	*þás*	*þis*	*þás*
Ins.	——	——	*þýs, þis*	——

Varying forms are *þissere* or *þisre* (= *þisse*), and *þissera* or *þisra* (= *þissa*).

§ 78. Other demonstratives are *swylc, swelc*, or *swylc*, such, *þyslic, þillic*, and *puslic* (*þullic*) such, *ilca*, the same, with definite declension; *sé selfa* or *sylfa*, the same, with definite declension, *self, sylf*, with indefinite declension, is emphatic; as, *ic self* (but also *ic selfa*), I myself, *mé sylfum*, to me myself.

§ 79. The **Interrogative Pronouns** are *hwá*, masc. and fem., who? *hwæt*, neut., what? — *hwæðer*, which of two? — *hwilc* or *hwylc*, of what sort? The last two are regularly declined as indefinite adjectives. The first is declined as follows: —

	Masc. and Fem.	Neut.
Nom.	*hwá*	*hwæt*
Gen.	*hwæs*	*hwæs*
Dat.	*hwém, hwám*	*hwém, hwám*
Acc.	*hwone*	*hwæt*
Inst.	——	*hwý, hwí*

§ 80. The interrogatives are changed to indefinites by various additions: *séghwá, ségwæt, gehwá, gehwæt*, each one, any one, everything; *swá hwá swá, swá hwæt swá*, whosoever, whatsoever; *hwæt-hwugu*, or *hwæt-hwegu*, somewhat, a little; *séghwæðer* or *ségðer, gehwæðer*, whichever, each, of two; *áhwæðer, áwðer, áðer*, either of two; *náhwæðer, náwðer, náðer*, neither; *séghwelc* (*-hwilc*), *gehwelc* (*-hwilc*), whichever, etc. Other indefinites are *ælc*, each, *eall*, all, *sum*, some, *óðer*, other, *manig*, many, *ænig*, any, *án*, one, a, *nán*, none, *nænig*, not any, *wuht* (*wiht*), thing, *áwuht, áwiht, áht*, aught, *náwuht, náwiht, náwht, náht*, naught, etc.

§ 81. As a **Relative Pronoun**, the Anglo-Saxon either uses the demonstrative *sé, séo, þæt*, or employs the indeclinable *þe* (*þé*), and sometimes adds the latter to the former, as, *sé þe, séo þe*, etc.

VERBS.

§ 82. **Verbs of Primary Inflection** (*Strong Verbs*). These form the present without any addition, except the personal endings, after the root or stem. Those which have the vowels *é* or *éo* in the preterit, show traces of a primitive reduplication, and may be divided into several classes according to the vowels — *a, á* (not followed by *w*), *á* (followed by *w*), *æ, ea, éa, ó* (*é*) — which they have in other parts of the verb. In the examples we give (1) the infinitive; (2) the singular of the preterit; (3) the plural of the preterit; and (4) the past participle.

	Inf.	Pret. Sing.	Pret. Plur.	Past Part.	
I.	*blandan*	*bléndd*	*blándon*	*blanden*	blend
II.	*lácan*	*léc*	*lécon*	*lácen*	play
III.	*blówan*	*bléow*	*bléowon*	*blówen*	blow
IV.	*létan*	*lét*	*léton*	*læten*	let
V.	*healdan*	*héold*	*héoldon*	*healden*	hold
VI.	*héawan*	*héow*	*héowon*	*héawen*	hew
VII.	*rówan*	*réow*	*réowon*	*rówen*	row
	wépan	*wéop*	*wéopon*	*wépen*	weep

Those which do not have *é* or *éo* in the preterit are divided into six classes according to the series of vowels found in the principal parts (inf., pret. sing., pret. pl., past part.): (I.) *í, á, i, i*, including all verbs that have *i* in the inf.; (II.) *éo* (*ú*), *éa, u, o*, distinguished by the *éo* (or *ú*) of the inf.; (III.) *i* (*e, eo*), *a* (*ea*), *u, u* (*o*), — falling into three subclasses according as the vowel of the inf. is followed, 1. by a nasal and a consonant, 2. by *l* and a consonant, 3. by *r* or *h* and a consonant; (IV.) *e, æ, é, o*, including such verbs as have in the inf. *e* followed by a single liquid; (V.) *e, æ, é, e*, including such as have in the inf. *e* followed by a single consonant, not a nasal or a liquid; (VI.) *a, ó, ó, a*, verbs that have *a* in the inf.

	Inf.	Pret. Sing.	Pret. Plur.	Past Part.	
I.	*scínan*	*scán*	*scinon*	*scinen*	shine
	drífan	*dráf*	*drifon*	*drifen*	drive
II.	*bréowan*	*bréaw*	*bruwon*	*browen*	brew
	súcan	*séac*	*sucon*	*socen*	suck
III.	(1) *findan*	*fand*	*fundon*	*funden*	find
	(2) *delfan*	*dealf*	*dulfon*	*dolfen*	delve
	(3) *weorpan*	*wearp*	*wurpon*	*worpen*	throw
IV.	*beran*	*bær*	*bǽron*	*boren*	bear
	stelan	*stæl*	*stǽlon*	*stolen*	steal
V.	*cnedan*	*cnæd*	*cnǽdon*	*cneden*	knead
	metan	*mæt*	*mǽton*	*meten*	measure
VI.	*galan*	*gól*	*gólon*	*galen*	sing

Niman, to take, *nóm* (*nam*), *nómon* (*námon*), *numen*, and *cuman*, to come, *c(w)óm, c(w)ómon, cumen* or *cymen*, show special irregularities, but may be referred to Class IV.

§ 83. In verbs of primary inflection, the vowel which appears in the infinitive belongs also to the present indicative and subjunctive, the imperative, and the present participle. The vowel which appears in the plural of the preterit indicative belongs also to the second person singular, and to the whole preterit subjunctive. But in the second and third person singular of the present indicative, *a* is changed to *e;* *á* to *é;* *e* to *i* (*ie*); *ó* to *é;* *éo, éa*, to *ie* (*i*, later *ý*); *ú* to *ý;* *ea, eo*, to *ie* (*i*, later *y*). It will be enough to give a single paradigm: —

helpan (3d class), to help

	Pres.		Pret.	
	Ind.	Subj.	Ind.	Subj.
Sing. 1.	*helpe*	*helpe*	*healp*	*hulpe*
2.	*hilp(e)st*	*helpe*	*hulpe*	*hulpe*
3.	*hilp(e)ð*	*helpe*	*healp*	*hulpe*
Plur. 1, 2, 3.	*helpað*	*helpen*	*hulpon*	*hulpen*

	Imp.	Inf.	Part.
Sing. 2.	*help*	*helpan*	Pres. *helpende*
Plur. 3.	*helpað*	*helpanne*	Past *holpen*

§ 84. The form *helpanne* is a dative of the infinitive, and is used with the preposition *tó*. A form in *-an* sometimes occurs as an imperative (or hortative) of the first person plural (as *helpan*), but this is often replaced by the subjunctive (*helpen*)

§ 85. When the 1st or 2d plur. of the pres. ind. or subj. is followed immediately by the subject pronoun (*wé, gé, wit, git*), the regular form in *-að* is often replaced by a form in *-e*; as, *helpe wé, helpe gé*, etc., for *helpað wé*, etc. So, in the imperative, *helpe wé*, let us help, *helpe gé*, help ye. A similar change sometimes appears in the perf.; as, *hulpe gé*, for *hulpon gé*.

§ 86. In the pres. ind., 2d and 3d sing., the vowel *e* is generally omitted from the ending; as, *hilpst, hilpð*. This often causes phonetic changes; as, *cwist, cwið*, for *cwið-st, cwið-ð*, from *cweðan*, to say; *hlest, hlet*, for *hled-st, hled-ð*, from *hladan*, to load; *blét*, for *blét-ð*, from *blótan*, to sacrifice; *ciest, ciest*, for *cies-st, cies-ð*, from *céosan*, to choose.

§ 87. The letter *g* at the end of a root generally becomes *h*, unless it is followed by a vowel; as, *stíhð, stáh*, from *stígan*, to mount. In the dissyllabic forms of the preterit and in the past participle, a final *h* of the root passes into *g*, a final *ð* into *d*, and in some verbs a final *s* into *r;* as, *slagen, cweden, coren*, past participles of *sléan* (for *slahan*), to strike, *cweðan*, to say, *céosan*, to choose. Final *h* of the root is often syncopated in the present and infinitive; as *sléan, séon*, for *sla(h)an*, to strike, *se(h)an*, to see. From *séon*, to see, come pres. *séo, siehst, sieh ð*, plur. *séoð*, pret. *seah, sáwe, seah*, plur. *sáwon*, past part. *sewen* or *sawen*.

§ 88. **Verbs of Secondary Inflection.** (*Weak Verbs.*) These form the preterit by adding *-de* to the root of the verb. They are divided into two classes, according as *-de* alone, or *-ode*, is added to the root. The past participle is formed by adding *-d* and *-od* in the two classes, often with *ge-* prefixed; as, *gelegd*, laid, *geárod*, honored, from *lecgan, árian: ge-* is also used, but not so frequently, in the past participle of primary verbs.

§ 89. In the first of these two classes, *-de* after *c*, *t*, *h*, *s*, becomes *-te*, and *c* is then generally changed to *h*. Several verbs show a different vowel (*ea* or *o*) in the preterit from that of the present (*e*, *é*). Paradigm: —

sécan, to seek

	Pres.		Pret.	
	Ind.	Subj.	Ind.	Subj.
Sing. 1.	*séce*	*séce*	*sóhte*	*sóhte*
2.	*sécest*	*séce*	*sóhtest*	*sóhte*
3.	*séceð*	*séce*	*sóhte*	*sóhte*
Plur. 1, 2, 3.	*sécað*	*sécen*	*sóhton*	*sóhten*

Imp.	Inf.	Part.
Sing. 2. *séc*	*sécan*	Pres. *sécende*
Plur. 2. *sécað*	*sécanne*	Past *ge-sóht*

§ 90. In the pres. ind., 2d and 3d sing., *e* is often omitted from the ending, with phonetic changes, as in verbs of primary inflection. The verb *ner-ian*, to preserve, has *ner-e-st*, *ner-e-ð*: it takes *e* also in the sing. of the imper., *ner-e*, in the whole pret. (as *ner-e-de*), and in the past part. has *ner-e-d*, but in all other forms has *i* before *a* or *e* (as, *neriað*, *neriен*, etc.) like verbs of the following second class. And the same is true of a few other verbs in which the stem is a short syllable; as, *derian*, to harm, *herian*, to praise. Verbs containing a short vowel followed by a double consonant (like *fremman*, to further) have a simple consonant in the present indicative second and third singular (*fremme*, *fremest*, *fremeð*), in the preterit indicative and subjunctive (*fremede*, etc.), in the past participle (*fremed*), and in the imperative singular (which ends in *-e*, —*freme*).

Instead of *sécað* before a subject pronoun, we have also *séce*.

§ 91. For the second class, we give as paradigm: —

lufian, to love

	Pres.		Pret.	
	Ind.	Subj.	Ind.	Subj.
Sing. 1.	*lufie*	*lufie*	*lufode*	*lufode*
2.	*lufast*	*lufie*	*lufodest*	*lufode*
3.	*lufað*	*lufie*	*lufode*	*lufode*
Plur. 1, 2, 3.	*lufiað*	*lufien*	*lufodon*	*lufoden*

Imp.	Inf.	Part.
Sing. 2. *lufa*	*lufian*	Pres. *lufiende*
Plur. 2. *lufiað*	*lufianne*	Past *lufod*

Instead of *lufiað* before a subject pronoun, we have also *lufie*.

§ 92. In these verbs, *-ie* is often written as *-ige*, and *-ia-* as *-iga-* or *-igea-*, where *g* has the sound of a consonant *y*; thus, *lufige*, *lufigeað*. Before *d* of the pret., *a* sometimes occurs in the sing., and *e* in the plur., instead of the regular *o*.

§ 93. The verb *libban* or *lifgan*, to live, is thus inflected: inf. *libban*, part. *libbende*; pres. 1. *libbe*, 2. *liofast*, 3. *liofað*, pl. *libbað*; imp. *leofa*, pl. *libbað*; pret. *lifde* (late *liofode*); past. part. *gelifd* (*liofod*). The verb *habban*, to have, is still more irregular: it makes pres. ind. 1. *hæbbe*, 2. *hafast*, *hæfst*, 3. *hafað*, *hæfð*, pl. *habbað*; imp. *hafa*, pl. *habbað*; pret. *hæfde*; past part. *gehæfd*.

§ 94. **Anomalous Verbs.** **A.** There are twelve preteritive verbs, in which an old perfect of primary formation came to be used in the sense of a present, after which a new preterit was added with secondary formation. These are *witan*, to know; *ágan*, to own; *dugan*, to avail; *unnan*, to grant; *cunnan*, to know; *þurfan*, to need, *durran* (inf. not found), to dare; *sculan*, *sceolan*, shall, should; *gemunan*, to remember; *magan* (inf. late and rare), may, might; *ge-nugan* (inf. not found), to suffice; *mótan* (inf. not found), to be allowed. We give, in five columns, the pres. ind. 1, 3 sing., the 2 sing., the plur., the pres. subj. sing., and the pret. ind. 1, 3 sing.; the I., II., etc., refer to the corresponding classes of non-reduplicating strong verbs: —

	Present			Preterit	
	Ind. Sing. 1, 3.	Sing. 2.	Plur.	Subj. Sing.	Ind. Sing. 1, 3.
I. (a)	*wát*	*wást*	*witon*	*wite*	*wisse*, *wiste*
(b)	*ág*, *áh*	*áhst*	*ágon*	*ége*	*áhte*
II. (c)	*déag*, *déah*	——	*dugon*	*duge*	*dohte*
III. (d)	*an*, *on*	(North. *giunne*)	*unnon*	*unne*	*úðe*
(e)	*can*, *con*	*canst*, *const*	*cunnon*	*cunne*	*cúðe*
(f)	*þearf*	*þearft*	*burfon*	*þurfe*	*porfte*
(g)	*dear* (North. *darr*)	*dearst*	*durron*	*durre*	*dorste*, (Mercian *durste*)
IV. (h)	*sceal*	*scealt*	*sculon*, *sceolon*	*scyle*, *scule*	*sc(e)olde*
(i)	*man*, *mon*	*manst*, *monst*	*munon*	*mune*	*munde*
V. (j)	*mæg*	*meaht*, *miht*	*magon*	*mége*	*mealte*, *mihte*
(k)	*ge-neah*	——	*-nugon*	*-nuge*	*be-nohte*
VI. (l)	*mót*	*móst*	*móton*	*móte*	*móste*

Somewhat similar to these is (**m**) the verb *willan*, to will, which makes pres. ind. 1. *wille*, 2. *wilt*, 3. *wile*, *wille*, pl. *willað*; pret. *wolde*. So, too, *nyllan* (= *ne willan*), to be unwilling, pres. *nylle*, *nylt*, *nyle* (*nylle*), *nyllað*; or *nelle*, etc.; pret. *nolde*.

§ 95. **B.** (a) *Wesan*, to be, is this conjugated: —

	Pres.		Pret.	
	Ind.	Subj.	Ind.	Subj.
Sing. 1.	*eom*	*síe*	*wæs*	*wére*
2.	*eart*	*síe*	*wére*	*wére*
3.	*is*	*síe*	*wæs*	*wére*
Plur. 1, 2, 3.	*sint*, or *sindon*	*síen*	*wæron*	*wæren*

Imp.	Inf.	Part.
Sing. 2. *wes*	*wesan*	Pres. *wesende*
Plur. 2. *wesað*	*wesanne*	Past *gewesen*

For *síe*, in the subj., are also used *sí*, *sig*, *séo*, and *sý*; for *síen*, *sín* and *sýn*.

In the pres. ind. 3. pl. the Northumbrian dialect has also *aron* (Mercian *earun*).

There is also a defective *béon*, to be, the present of which is generally used in a future sense.

	Pres.				
	Ind.	Subj.	Imp.	Inf.	Part.
Sing. 1.	*béo*, *béom*	*béo*	——	*béon*	*béonde*
2.	*bist*	*béo*	*béo*		
3.	*bið*	*béo*	——		
Plur. 1, 2, 3.	*béoð*	*béon*	*béoð*		

(b) *Gán*, to go, is defective, found in pres. 1. *gá*, 2. *gæst*, *gæð*, pl. *gáð*; subj. *gá*, *gán*; imp. *gá*, pl. *gáð*; past part. *gegán*. From the same root come pres. *gange*; pret *géong* and *gengde*. The defective pret. *éode*, went, is used in prose instead of *géong*, etc.

(c) *Dón*, to do, makes pres. 1. *dó*, 2. *dést*, 3. *deð*, pl. *dóð*; subj. *dó*, pl. *dón*; pret. *dyde*; imp. *dó*, pl. *dóð*; part. pres. *dónde*, past *gedón*.

§ 96. **C.** Several verbs which have the primary inflection in the preterit and the past participle appear in their other forms as verbs of secondary inflection. Thus, *biddan*, *bæd*, *bædon*, *beden*, ask, bid; *sittan*, *sæt*, *sæton*, *seten*, sit; *licgan*, *læg*, *légon*, *legen*, lie; *picgan*, *þeah* or *páh* or *þigede*, *þégon*, *þegen* (?), touch, taste; *hebban*, *hóf*, *hófon*, *hafen* or *hæfen*, heave, lift; *swerian*, *swór*, *swóron*, *sworen*, swear.

From the contracted forms *fón*, to take, *hón*, to hang (Goth. *fāhan*, *hāhan*), come pres. 1. *fó*, *hó*; 2. *féhst*; *héhst*; 3. *féhð*, *héhð*; pl. *fóð*, *hóð*; the pret. is *féng*, *héng*.

The verb *bringan*, to bring, has in the pret. *bróhte*, *bróhton*, in the past part. *gebróht* and (poetical) *brungen*; *standan*, to stand, drops *n* in the pret. *stód*, *stódon*, *standen*, *bregdan*, to braid, *brægd*, *brugdon*, *brogden*, often drops the *g*, and lengthens the preceding vowel, *brédan*, *bræd*, *brúdon*, *bróden*; [*þíhan*], to thrive, *páh*, *þigon*, *þigen*, of the 1st class, has passed into the form of the 2d, *þéon*, *þéah*, *þugon*, *þogen*; and the same is true of [*síhan*], *séon*, to strain, [*tíhan*], *téon*, to convict, [*wrihan*], *wréon*, to cover.

§ 97. **D.** The following verbs of secondary inflection are irregular: *þencan*, to think, pret. *þóhte*; *þyncan*, to seem, pret. *þúhte*; *wyrcan*, to work, pret. *worhte*; *bycgan*, to buy, pret. *bohte*; *gierwan*, to prepare, *sierwan*, to equip, pret. *gierede*, *sierede*, but past part. *gegyrwed*, *gesyrwed*, as well as *gegiered*, *gesiered*. *Búan*, to inhabit, has past part. *gebún*, but uses as pret. the form *búde* (from *búian*, *búwian*).

§ 98. **Missing Forms.** The Anglo-Saxon has no future tense, but uses the present tense both as a present and as a future. The verbs *wille* and *sceal* are sometimes used, as in English, to express futurity, but generally not without the idea of volition or of necessity, which properly belongs to those verbs.

The perfect definite and the pluperfect are supplied, as in English, by using forms of *habban*, to have, with the past participle of the verb; but the preterit often corresponds in sense to the perfect definite and the pluperfect.

The passive is supplied by using the auxiliary verbs *wesan*, to be, or *weorðan*, to become, with the past participle. Thus, *eom* and *weorðe* are used for the present passive; *wæs* and *wearð* for the preterit; *béo* or *sceal béon* for the future; *eom* — *worden* for the perfect definite, and *wæs* — *worden* for the pluperfect.

PREPOSITIONS AND CONJUNCTIONS.

§ 99. Prepositions are used with the accusative, dative, and genitive: we give the simple prepositions, and some of the more important compound ones.

With the accusative: *geond*, beyond, throughout, through; *þurh*, through, by; *ymb* (*ymbe*), round, about; *abútan*, about; *ymbútan*, round about.

With the dative: *æfter*, after; *ér*, ere; *æt*, at; *be*, *bi*, by, concerning; *fram*, from; *néah*, near; *of*, of, from; *tó*, to; *intó*, into; *tóweard*, toward (also gen.); *bæften* (*bæften*), behind; *beheonan*, on this side of; *betweox* (*betwix*), betwixt; *betwéonum* (*betwynan*), between; *bufan*, above; *bútan* (*búton*), outside, without, except; *wiðútan*, without; *wiðinnan*, within.

With the genitive: *andlang* (*ondlong*), along.

With the accusative and dative: *ofer*, over; *on*, *an*, on, in, to; *in*, in, into; *óð*, unto; *under*, under; *beforan*, before; *gemang*, among; *ongéan* (*ongén*), against, toward, over against; *tó-géanes*, toward, against; *innan*, within; *uppon* (*uppan*), upon. These generally take the accusative when motion *to* a place, the dative when rest *in* a place, is either expressed or implied. *Mid*, with, takes the accusative, the dative, and also the instrumental, which generally coincides in form with the dative. *For* takes the dative or instrumental in the sense of *for*, the accusative in the sense of *instead of*. Some of the prepositions mentioned above as taking the dative are occasionally found with the accusative.

With the accusative, dative, and genitive: *wið*, with. Some other prepositions occasionally take the genitive.

§ 100. The most important conjunctions, etc., are *ac*, but; *and*, and; *búton* (*bútan*), unless; *éac*, also; *elles*, else; *gé*, and; *géa*, *gise*, yea, yes; *gif*, if; *húru*, at least, yet; *hwæt*, lo, truly; *hwæðer*, whether; *ne*, not; *ná*, *nó*, *nese*, not, nay, no; *nú*, now; *oððe*, or; *swá*, so, as; *swilce*, as if; *þæt*, that; *þéah*, though; *þonne*, then, than; *uton* (with infin.), let us; — *for þám þe*, because; *for þý*, therefore; *mid þý*, since, seeing; *tó þám þæt*, in order that; *þý lés þe*, lest; — *gé . . . gé*, both . . . and; *ségðer gé . . . gé*, both . . . and; *hwæðer þé . . . þé*, whether . . . or; *náðer ne . . . ne*, neither . . . nor; *oððe . . . oððe*, either . . . or; *sam . . . sam*, whether . . . or; *swá . . . swá*, so as, as.

MIDDLE ENGLISH INFLECTION.

FIRST PERIOD.

§ 101. For the sake of convenience, **A.** will be used for the earlier text of Layamon, **B.** for the later, and **O.** for the Ormulum. It is proposed to represent chiefly the inflection of **A.** in its characteristic features, adding also the principal variations of **B.** and **O.**

§ 102. In **A** the two Anglo-Saxon characters for *th* (*ð* and *þ*) are retained; we represent them by *th*. **B.** and **O.** have only *þ*. Besides the ordinary Roman *g*, the Middle English of this period uses the Anglo-Saxon *g* (*ȝ*). The former sign presents no difficulty, being for the most part equivalent to our hard *g* (in *go*). *ȝ*, however, is used in various ways. When initial, it is equivalent to our consonant *y* (in *young*); when not initial, it is often equivalent to *y* (sometimes even vocalic) but often represents a guttural sound, probably that of *g* in *sagen* (as pronounced in North Germany). The use of the character is different in different MSS. In **O.** *ȝ* seems to be usually a consonant *y*, while *ȝh* is used to express the guttural sound just indicated; but *ȝ* is also used instead of *i* in diphthongs. Instead of *ȝ*, a *w* is often used in **B.** and sometimes in **A.** Thus, **B.** has *Lawemon* for *Layamon*. In this period, as in modern English, the Anglo-Saxon *hw* is written *wh* (yet in **B.** simply *w*). It must be remembered in regard to the Ormulum, that by a uniform peculiarity of orthography, a consonant is doubled where the vowel before it in the same word is short.

§ 103. If we compare the inflection of Middle English of the First Period with the

Anglo-Saxon, we find, as the most striking difference, that the vowels *a*, *o*, *u*, in the old grammatical endings, are all changed to *e*. Thus, the AS. *fiscas*, fishes, (dat) *fiscum*, to fishes, *cearu*, care, *oxan*, oxen, *lufodon*, they loved, become *fisces*, *fiscen*, *care*, *oxen*, *lufeden*. In **A.** the vowel *a* is occasionally found in grammatical endings, but irregularly and capriciously used. Next to this substitution of *e* for *a*, *o*, *u*, the most important differences are caused by the frequent loss of the final *n*: thus, *mid greatere heorte* (AS. *mid gréatre heortan*), with great heart. The commencement of this change is seen in **A.**, where the final *n* is occasionally dropped from many forms, yet not wholly discarded from any; and, as a natural consequence, it is sometimes added to forms that have no right to it, thus, in the dat. sing. of the vowel declension, *than kingen* (AS. *pám cyninge*), to the king, in feminines of the vowel declension through most of the cases, as, *lazen* (AS. *lagu*, *lage*, *laga*), law, laws, in the nom. sing. of adjectives in *e*, as, *he wes blithen* (AS. *hé wæs bliðe*), he was blithe; and in the singular of verbs after *e*, as, *ic habben* (AS. *ic hæbbe*), I have, *he senden* (AS. *hé sende*), he sent. In **B.** and **O.**, where the omission of a final *n* is more fixed and regular, that letter is hardly ever misapplied in this way.

SUBSTANTIVES.

§ **104.** It is sometimes the case, even in **A.**, that the accusative, both singular and plural, is used in place of the dative; as, *than king* (for *than kinge*), to the king, *of kinges* (for *of kingen*), of kings. In **B.** this is much more frequent; for the plural, at least, it is the prevailing usage. In **O.** it is the general rule: though the *-e* of the dat. sing. after a preposition is sometimes retained where the verse favors it (as *to kinge*), yet it is oftener omitted; and the inflection, sing. nom. dat. acc. *king*, *name*, gen. *kingess*, *namess*, pl. nom. gen. dat. acc. *kingess*, *namess*, is the usual one for substantives of all classes and genders. The gen. pl. in *-es*, as *kinges*, occurs also in **A.** and **B.**

§ **105. Vowel Declension.** The normal forms for the **Masculine** are: —

	king, king		*mete*, meat	
	Sing.	Plur.	Sing.	Plur.
Nom.	*king*	*kinges*	*mete*	*metes*
Gen.	*kinges*	*kinge*	*metes*	*mete*
Dat.	*kinge*	*kingen*	*mete*	*meten*
Acc.	*king*	*kinges*	*mete*	*metes*

But in the gen. pl., the more common ending is *-ene* (or *-en*); as, *kingene* (or *kingen*), for *kinge*. (Compare late AS. *dagena*, for *daga*, of days.) For dat. pl. *kingen*, occurs also, in **B.**, *kinge*, with omitted *-n*; and in **A.**, for dat. sing. *kinge*, occurs also *kingen*, with *-n* irregularly added. A few words show in the nom. acc. pl. the ending *-en* (or *-e*) irregularly brought in from the N declension.

For the use of the acc. in place of the dat. which is common in **B.** and **O.**, and for the gen. pl. in *-ess* which is common in **O.**, see § 104.

§ **106.** *Sune*, son, has in **A.** gen. sing. *sune*, and *sunen* (*sonen*) is found in the nom. acc. plur.; *wude* (**B.** *wode*), wood, has nom. acc. plur. *wudes* or *wude*; but otherwise they are regular. *Man* (or *mon*), gen. *mannes*, makes *men* in the nom. acc. (and sometimes the dat.) pl., but not in the dat. sing.; the gen. pl. is *monne* (**A. B.**), *monnene* (**A.**), and *mannen(e)* (**B.**). **O.** makes sing. nom. dat. acc. *mann*, gen. *manness*, pl. nom. dat. acc. *menn*, gen. *menness*.

§ **107.** The **Neuters**, as in AS., are declined like the masculines, except in the nom. acc. pl.: here they are either without ending; as, *wif*, wife, wives; *lond*, land, lands; or they take *-en* (rarely *-e*), as in the N declension; as, *wifen*, *londe*. But sometimes the ending *-es* of the masc. is applied to the neut.; as, *wifes*, *londes*. In **B.** this is more common, and in **O.** it is the general rule; yet even **O.** makes *shep*, sheep, in the pl. as in the sing., while from *deor*, animal, it makes pl. *deor*, *der*, and *deoress*. From *child* come nom. acc. pl. *children* (also *childre* in **A.**, *childres* in **B.**), gen. *childrene*, dat. *children*. **O.** makes *childre* as pl. of *child*, and *lambre* of *lamb*.

§ **108.** For **Feminines** the normal forms would be: —

	laze, law		*dede*, deed	
	Sing.	Plur.	Sing.	Plur.
Nom.	*laze*	*laze*	*dede*	*dede*
Gen.	*laze*	*lazen(e)*	*dede*	*dede*
Dat.	*laze*	*lazen*	*dede*	*deden*
Acc.	*laze*	*laze*	*dede*	*dede*

For *n* added in **A.** after final *e*, see § 103. Where the nom. sing. ended originally in a consonant, *e* is generally added to it; as, *dede*, for AS. *dǽd*, and the suffixes *-inge*, *-nesse*, for AS. *-ing*, *-nes*. The nom. acc. pl. have also the masc. ending *-es*: this is rare in **A.**, but common in **B**, and nearly universal in **O.**: thus **B.** *lawes*, *dedes*, **O.** *laghess*, *dedess* (rarely *dede*). *Boc*, book, makes *boc* in dat. acc. sing., and nom. acc. pl.; but *bæc* also occurs in nom. acc. pl.: **B.** has *boke* in dat. sing., and *bokes* in nom. acc. pl. *Burh*, town, castle, makes gen. dat. acc. sing. *burh* or *burze* (*burhze*), nom. dat. acc. pl. *burzes* (*burhzes*) or *burzen* (*burhzen*), gen. *burze*: but in **B.** the gen. dat. sing. is *borewe*, and the whole plural *borewes*. *Weorld*, world, sometimes makes the gen. in *-es*.

§ **109. N Declension.** The normal forms would be: —

	Masc. *stede*, steed		Fem. *heorte*, heart	
	Sing.	Plur.	Sing.	Plur.
Nom.	*stede*	*steden*	*heorte*	*heorten*
Gen.	*steden*	*steden*	*heorten*	*heorten*
Dat.	*steden*	*steden*	*heorten*	*heorten*
Acc.	*steden*	*steden*	*heorten*	*heorten*

§ **110.** But this declension is much disfigured by the omission of the final *n*, which is frequent in **A.**, and nearly universal in **B.** For *-n* sometimes added in **A.** to the nom. sing., see § 103. In **B.** the gen. sing. is sometimes, and the nom. acc. pl. are commonly, made in *-es*, the masculine ending of the vowel declension; as, *stedes*, *heortes*, *drakes* (dragon's or dragons); but *-e* is also found in the plur., as *teone*, sorrows. The gen. pl. has, besides *-en*, sometimes *-ene*, sometimes *-enen*: thus, *gumene*, or *gomenen* (**A.**); *-ene* is regular in **B.** In **O.** the peculiarity of this declension is wholly lost, as we see in *name*, gen. *namess*, dat. acc. *name*, pl. *namess* in all cases. Yet from the neut. *eȝhe*, eye, gen. *eȝhess*, **O.** makes the irreg. pl. *ehne*. In Layamon the word occurs generally in the plur. (*eȝen*, *eȝene(n)*), but a dat. sing. *eȝen* (*eȝe* **B.**) is also found.

§ **111.** *Feond* and *freond* make in nom. acc. pl. *feond*, *freond*, or *feondes*, *freondes*, or *feonde(n)*, *freonde(n)*.

§ **112.** *Fader*, *moder*, *brother*, *suster*, *dohter*, have the same form through the sing., and in the gen. pl.; but the dat. sing. sometimes takes *-e*, and the gen. pl. sometimes *-ne* or *-en*. The other plural cases have *-en* (*-es* in **B.**, *-ess* in **O**). But for *broth(e)ren*, we find also *breth(e)ren*; and in **O.** *brethre* is the only plural form of *brotherr*. The *e* in *brother*, *suster*, *dohter*, is often lost before a case ending.

§ **113.** The fem. nom. acc. *niht*, night, has *nihtes* in the gen. sing., *nihte* in the dat.: the pl. is regular in **A.**, but in **B.** is sometimes indeclinable, *niht* or *nitht*. The fem. *æ*, running water, and *sæ* (**B.** *sée*), sea, are indeclinable in the singular.

§ **114.** In proper names of men, the genitive *Caper his*, for *Caperes*, is sometimes found in **A.**, oftener in **B**: that *his* here is no real pronoun, is evident from the want of any genitive feminine similarly formed with *hire*.

ADJECTIVES.

§ **115.** For the **Indefinite Declension** the normal forms would be: —

	Sing.			Plur.
	Masc.	Fem.	Neut.	
Nom.	*god*	*god*	*god*	*gode*
Gen.	*godes*	*god(e)re*	*godes*	*god(e)re*
Dat.	*goden*	*god(e)re*	*goden*	*goden*
Acc.	*godne*	*gode*	*god*	*gode*

§ **116.** For the **Definite Declension** they would be: —

	Sing.			Plur.
	Masc.	Fem.	Neut.	
Nom.	*gode*	*gode*	*gode*	*goden*
Gen.	*goden*	*goden*	*goden*	*goden(e)*
Dat.	*goden*	*goden*	*goden*	*goden*
Acc.	*goden*	*goden*	*gode*	*goden*

§ **117.** For *-n* sometimes added in **A.** to forms with final *e*, see § 103. On the other hand, *-n* is often omitted in **A.** from forms with final *en*, as *gode* for *goden*; and this is uniformly the case in **B.** The endings *-es* and *-re* in the gen. sing. and pl. are little used in **B.**, the forms *gode* and *god* being used instead. By these changes, the difference between the definite and indefinite declensions became much less distinct; and it is not therefore surprising that, even in **A.**, the one is sometimes used instead of the other: with the definite article, the definite forms are almost always used; but with other adjective pronouns and with the possessive genitive the indefinite forms are not uncommon.

§ **118.** In **O.** the indefinite adjective has only the forms *god* for the sing., and *gode* for the pl.; the definite only the form *gode* (and very rarely a form in *-en*). Adjectives in *-e*, as *clene*, clean, are therefore without inflection. But the gen. pl. *allre*, of all, is still found with the superlative; as, *allre firrst*, first of all.

§ **119.** The comparative ends in *-re*, and has only definite inflection. The superlative ends in *-est*, and is inflected both ways; but the indefinite superlative is undeclined in the sing., and takes only *-e* (in **A.** also *-en*) in the pl.

§ **120.** Adverbs are formed from adjectives as in Anglo-Saxon: thus, *swithe*, strongly, very, from *swith*; *hæhliche* (**O.** *hehlike*), highly; *rather*, sooner.

PRONOUNS.

§ **121.** The personal pronouns of the first and second persons are declined in sing., dual, and pl. as in Anglo-Saxon. The genitives are nearly confined to the possessive use. The dual forms, though found in **O.**, are unused in **B.** We have in **B.** *ȝou*, *ou*, and in **O.** *ȝuw*, for *eow*, *eou*; in **O.** *ȝunnc* for *inc*.

§ **122.** The pronoun of the third person is thus declined: —

	Sing.			Plur.
	Masc.	Fem.	Neut.	
Nom.	*he*	*heo* (*ȝeo*, *ȝe*)	*hit*	*heo*, *hi* (*hii*)
Gen.	*his*	*hire*	*his*	*heore* (*hire*)
Dat.	*hem*	*hire*	*him*	*heom* (*ham*, *ȝam*)
Acc.	*hine*	*heo* (*hire*)	*hit*	*heom* (*ham*, *ȝam*)

The forms in ( ) are found in **B.**, but not in **A.** **B.** also often uses *him* for *hine*. The nom. pl. is almost always *heo* in **A**, *hii* or *hi* in **B**. Rare forms for the nom. acc. pl. are *theo* in **A.**, *thaie* in **B.** **O.** has in the nom. sing. fem. *ȝho* (i. e., *hyo*), neut. *itt*; in the acc. sing. masc. *himm*, fem. *hire*, neut *itt*; in the pl. nom. *theȝȝ* (i. e., *they*), gen. *theȝȝre* (i. e., *theyre*) and *heore*, dat. acc. *theȝȝm* (i. e. *theym*) and *hemm*.

§ **123.** The possessive pronouns *min*, my, *thin*, thy, are declined as indefinite adjectives. Before a consonant *min*, *thin*, sometimes become *mi*, *thi*: *mire*, *thire*, take the place of *minre*, *thinre*. But for all the forms with case endings, **B.** has only *mine*, *thine*. The other possessives, *unker(e)*, our (of two), *inker(e)* (**O.** *ȝunkerr*), your (of two), *ure* or *oure*, our, *eower* or *eow(e)re* (**B.** *ȝoure*, *ȝure*, **O.** *ȝure*), your, are undeclined. In **O.** *hiss*, his, is treated as an adjective, with pl. *hise*.

§ **124.** The indefinite article *an* — which is only the numeral "one" applied to this use — is declined, both in **A.** and **B**, with the same peculiarities as *min*. **B.** often uses *on*, *one*, for *an*, *ane*; but when *n* is dropped, it has *a*, never *o*. A genitive *ones* is also found in **B.**, and a gen. *aness* and dat. *ænne* are met with in **O.**

§ **125.** The definite article is thus declined: the forms in quotation marks are found only in **A.**

	Sing.			Plur.
	Masc.	Fem.	Neut.	
Nom.	*the*	'*tha*,' *the*	*that*	'*tha*,' *the*
Gen.	*thes*	'*there*,' *thare*	*thes*	'*there*,' *thare*
Dat.	*than*	'*there*,' *thare*	*than*	'*than*'
Acc.	*thene*	'*tha*,' *the*	*that*	'*tha*,' *the*

The variations, most of them orthographical, are numerous: thus, in **A.**, *thæ* for *tha*; *thæt*, *thet*, for *that*; *thæs*, *thas*, for *thes*; *thære* for *there*, etc.: in **B.**, *this* for *thes*: in both, *thon* for *than*; *thane* for *than* and *thene*. And *theo* for sing. *tha*, and *thaie* for pl. *tha*.

The form *the* is sometimes used in **B.** as an indeclinable article for all cases and numbers. Traces of this use are found even in **A.** In **O.** it is general; though the antecedent of a relative pronoun takes, instead of *the*, a demonstrative, *thatt*, *tha*, or *thiss*, *thise*.

§ **126.** The demonstrative *thes* is thus declined: —

	Sing.			Plur.
	Masc.	Fem.	Neut.	
Nom.	*thes*	'*thas*,' *theos*	*this*	'*thas*,' *theos*
Gen.	*thisse(s)*	*thisse(re)*	*thisse(s)*	*thisse(re)*
Dat.	*thisse(n)*	*thisse(re)*	*thisse(n)*	*thisse(n)*
Acc.	'*thesne*,' *thisne*	'*thas*,' *theos*	*this*	'*thas*,' *theos*

For *thas*, which is confined to **A.**, we find *theos* and *thes* in both **A.** and **B.** For *thisses*, *thissere*, *thissen*, **B.** has almost always *thisse*. For most of the forms, **B.** has also *this* used as an indeclinable demonstrative; and traces of this use are found even in **A.**

O. has sing. *thiss*, this, pl. *thise*, these; while it makes also sing. *thatt*, that, pl. *tha*, those; approaching nearly to the later English usage.

§ 127. *Swilc* or *su ulc* (**B.** *soch*), such, is declined as an indefinite adjective. *Ilk*, declined with the definite article, is used for "the same."

§ 128. The interrogative pronoun *u ha*, who? makes gen. *whes* (only in **A.**), dat. and acc. *u ham*, *whan*, neut. nom. acc. *what*. These in **B.** are spelled *u o*, *wam*, *wan*, *wat*. **O** uses *u hamm* as dat. acc. sing. The use of this pronoun as a proper relative begins to appear in **B.** and **O**. *Whather* (**B.** *u ather*) is undeclined. *While* or *u hule* is declined as an indefinite adjective: in **B.** it is written *woche*, and begins to be used as a relative.

§ 129. The relative pronouns in **A.** are *the* and *that*, for all genders and numbers, the latter being especially used in reference to an indefinite or an omitted antecedent; also *tha* (more rarely *theo*), in reference chiefly to a feminine or a plural. In **B.** and **O.** *that* has taken the place of all the rest, and become the general relative.

VERBS.

§ 130. **General Remarks.** In the inflection of the verb, the final *en* of the infinitive, the plural forms, and the past participle, often loses the *-n* in **A**, generally so in **B.**, but rarely in **O**. For *-n* added in **A.** to forms that end in *-e*, see § 103.

§ 131. In **A.** and **B.** the plural of the present indicative ends in *-eth* (AS. *-að*). But in **O** it has the ending *-enn*, which came in, probably, from the subjunctive and the perfect; as, *u e hellpenn* (**A. B.** *u e helpeð*), we help. The Anglo-Saxon use of *-e* instead of *-að*, when the verb is followed by a subject pronoun, — as, *helpe u é*, — appears also in the Middle English of the First Period. The form of the verb in the plural of the pres. ind affords a convenient criterion for dialect. South English has the ending *-eth* (*helpeth*, AS. *helpað*); the Midland dialect has *-en* (*helpen*); the Northern, *-es* (*helpes*) In the Middle English of the First Period we have, as has already been remarked, scarcely anything preserved in the Northern dialect

§ 132. The dative of the infinitive in *-enne* (or *-ene*), with the preposition *to*, — as, *to helpenne*, — is occasionally found in **A** and **B**, rarely in **O**. It is sometimes written with *-ende* for *-enne*, by a confusion with the present participle. But commonly the preposition *to* is prefixed to the infinitive in *-en*; as, *to helpen*.

§ 133. The present participle is singularly infrequent in Middle English of the First Period, and partly perhaps on this account became confounded with the verbal substantive in *-inge*. In **A.** the old termination *-ende* (or *-inde*) is still the prevailing one for the participle; but in **B.** *-inge* occurs about as many times as *-ende*.

§ 134. The past participle very frequently takes the prefix *i-* (AS. *ge-*), which, however, is not confined to the participle: thus, *iboren* (AS. *geboren*) = *boren*, born. But this prefix is scarcely at all used in **O**.

§ 135. **Verbs of Primary Inflection** (*Strong Verbs*). The classes of the Anglo-Saxon are more or less confounded, as will appear from the following specimens. We give the infinitive, the singular of the preterit, the plural of the preterit, and the past participle. The vowels are given (when possible) according to **O.**, where they are written more consistently than in **A.** and **B.**

REDUPLICATING CLASSES.

	Inf.	Pret. Sing.	Pret. Plur.	Past Part.	
I.	[*blenden*]	——	——	——	
II.	*haten*	*het* or *hehte*	*hehten*	*haten*	bid
III.	*cnawen*	*cne(o)w*	*cne(o)wen*	*cnawen*	know
IV.	*lĕten*	*let*	*leten*	*lĕten*	let
	slæpen	*slep* or *slepte*	*slepten*	——	sleep
V.	*halden*	*held*	*helden*	*halden*	hold
	fallen	*fell*	*fellen*	*fallen*	fall
VI.	*hæwen*	*he(o)w*	*he(o)wen*	*hæwen*	hew

NON-REDUPLICATING CLASSES.

	Inf.	Pret. Sing.	Pret. Plur.	Past Part.	
I.	*drifen*	*draf*	*drifen*	*drifen*	drive
	writen	*urat*	*writen*	*writen*	write
II.	*bugen*	*bæh*	*bugen*	*bogen*	bow
	luken	*læc*	*luken*	*loken*	lock
III.	(1) *finden*	*fand*	*funden*	*funden*	find
	(2) *delfen*	*dalf*	*dulfen*	*dolfen*	delve
	(3) *wurthen*	*warth*	*wurden*	*wurthen*	become
IV.	*beren*	*băr*	*bæren*	*boren*	bear
	nimen	*năm*	*nomen*	*numen*	take
	cumen	*cŏm*	*comen*	*cumen*	come
V.	*ȝifen*	*ȝăf*	*ȝæfen*	*ȝifen*	give
VI.	*faren*	*for*	*foren*	*faren*	fare
	waxen	*wex*	*wexen*	*waxen*	wax
	dragen	*droh*	*drogen*	*dragen*	draw

Most of these forms appear also in **A.** and **B.**, but accompanied often by other modes of spelling. Thus, in some cases, *o* is used for *a*, and *eo* for *e*; as, *fond*, *bigon*, *nom*, *drof*, *wrot*, for *fand*, etc.; *weox*, *weopen*, for *wex*, *wepen*; *holde*, *cnowe*, **B.**, for *halden*, *cnawen*. In **B.**, *e* is used for *æ*, and sometimes *ea* for *a*; as, *hewe*, *ȝeaf*, for *hæwen*, *ȝaf*. In **A.**, *a*, *æ*, *e*, are much confounded; as, *halden*, *hælden*, *helden*.

§ 136. Paradigm: *helpen*, to help.

	Pres. Ind.	Pres. Subj.	Pret. Ind.	Pret. Subj.
Sing. 1.	*helpe*	*helpe*	*halp*	*hulpe*
2.	*helpest*	*helpe*	*hulpe*	*hulpe*
3.	*helpeth*	*helpe*	*halp*	*hulpe*
Plur.	1, 2, 3. *helpeth*	*helpen*	*hulpen*	*hulpen*

	Imp.	Inf.	Part.
Sing. 2.	*help*	*helpen*	Pres. *helpende*
Plur. 2.	*helpeth*	*helpenne*	Past *holpen*

The omission of *e* in the 2d and 3d sing. of the pres. ind. is much less common than in AS; as, *halt* for *haldeth*.

§ 137. In **O.** the 2d sing. of the pret. ind. is sometimes the same as the 1st and 3d sing.; as, *badd*, badest, *barr*, borest, for *bæde*, *bære*.

§ 138. The changes mentioned in § 87 are found also in Middle English of the First Period; as, *droh*, drew, from *dragen* (AS. *dragan*), to draw, *slogen*, they slew, from *slan* (for *slahan*), to slay; *coren* (also *chosen*), from *chesen*, to choose. From *seon*, *sen*, to see, come pres. 1. *seo*, *se*, 2. *sihst* (**O.** *seost*, *sest*), 3. *siht*, *seoth* (**O.** *seth*), pl. *seoth* (**O.** *sen*), subj. *seo*, *se*; pret. *sah*, pl. *sægen*; past part. *segen*, *sen*.

§ 139. **Verbs of Secondary Inflection** (*Weak Verbs*). The first class form the preterit by adding *-de* (or *-te*, after a voiceless mute) directly to the root, before this *-te*, a *k* or *ch* is sometimes changed to *h*, the root vowel appearing as *e* in the present, but as *o* in the pret. and the past part., thus, *sechen* (**O.** *sekenn*), to seek.

	Pres. Ind	Pres. Subj.	Pret. Ind.	Pret. Subj.
Sing. 1.	*seche*	*seche*	*sohte*	*sohte*
2.	*sechest*	*seche*	*sohtest*	*sohte*
3.	*secheth*	*seche*	*sohte*	*sohte*
Plur.	1, 2, 3 *secheth*	*sechen*	*sohten*	*sohten*

	Imp.	Inf.	Part.
Sing. 2.	*sech*	*sechen*	Pres. *sechende*
Plur. 2.	*secheth*	*sechenne*	Past *soht*

§ 140. The second class form the preterit by adding *-ede* to the root; as, *makien*, to make.

	Pres Ind.	Pres Subj.	Pret. Ind.	Pret. Subj.
Sing. 1.	*makie*	*makie*	*makede*	*makede*
2.	*makest*	*makie*	*makedest*	*makede*
3.	*maketh*	*makie*	*makede*	*makede*
Plur.	1, 2, 3. *makieth*	*makien*	*makeden*	*makeden*

	Imp.	Inf.	Part.
Sing	2. *make*	*makien*	Pres. *makiende*
Plur.	2. *makieth*	*makienne*	Past *maked*

§ 141. The *i* of these verbs is lost in **O.**; thus, *makenn*, subj *make*, for *makien*, *makie*; *lufenn* (**A.** *luuien*), to love; *oppnenn* (**A** *openwen*), to open; *spellenn* (**A.** *spelien*), to declare. In the sing. imp., *-e* is sometimes omitted; as, *mace*, in **O.**, for *make*, *loc*, **O.**, *lok*, **B**, though both have also *loke*, from *lokien* (**O.** *lokenn*), to look.

§ 142. From *leowen* (pronounced *leorwen*), or *libben*, to live, **A.** makes pres. 1. *leoure*, *libbe*, 2. *leouest* (**O.** *lifesst*), 3. *leoueth* (**O** *lifeththh*); pret. *leouede*. From *habben*, to have, come pres 1 *habbe*, 2. *hauest*, *hafest*, 3 *haueth*, *hafeth*, pl. *habbeth*, subj. *habbe*; pret. *hafde* (also *hauede* in **A.**, *hadde* in **B.**); past part. *haued*.

§ 143. **Anomalous Verbs. A** The Preteritives (§ 94) are —

	Pres. Sing. 1, 3.	Pres. Sing 2.	Pres. Plur.	Pret.	
(a)	*wat*, *wot*	*wast*, *u ost*	*u iten*	*wiste*, *wuste*	know
(b)	*ah*	*azest*	*azen*	*ahte*	own
(c)	*dæh*	——	——	——	avail
(d)	*an*, *on*	——	*i-unnen*	*uthe*	grant
(e)	*can*	*canst*	*cunnen*	*cuthe*	know
(f)	*tharf*	*therft*	*thurfen*	*thurfte*	need
(g)	*dar*, *der*	*darst*, *derst*	*durren*	*durste*	dare
(h)	*scal*	*scalt*	*sculen*	*scolde*	shall
(i)	*may*	*miht*	*mazen*	*mihte*	may
(j)	*mot*	*mote*	*moten*	*moste*	may, must

For *scal*, etc., **O.** has *shall*, *shallt*, *shulenn*, *shollde*; for *mazen*, *muzhenn*. From *tharf*, **A.** makes 2d sing. pres. *thræt*, *dert* (for *thert*), **B.** *thert*. In the pret. **B.** makes *theorte*, **O.** *thurrfte*. For *may* (**B.**), **O.** has *mazz*, **A.** *mæi*, etc.

The verb (**k**) *u ullen*, to will, makes pres. 1. *wulle*, *nulle* (=*ne wulle*, will not), 2. *wult*, *nult*, 3. *wulle*, *nulle*, pl. *wulleth*, *nulleth*, pret. *wolde*, *nolde*. In the pres. **B.** has *wolle*, *nolle*, *u olt*, *nolt*, etc.; **O.** *wile*, *nile*, *willt*, *nillt*, pl. *u ilenn*, *nilenn*. **A.** shows considerable variety in spelling, having, besides *wulle*, etc., forms like *u ille*, *wolt*, *u olleth*, *u ulde*, etc.

§ 144. **B.** (a) The verb of existence is thus inflected: —

	Pres. Ind.	Pres. Subj.	Pret. Ind.	Pret. Subj.
Sing. 1.	*am*		*was*	*were*
2.	*art*		[*u ere*]	*u ere*
3.	*is*		*was*	*were*
Plur.	1, 2, 3. *sunden*		*weren*	*weren*
Sing. 1.	*beon*, *beo*	*beo*		
2.	*beost*, *bist*	*beo*		
3.	*beoth*, *bith*	*beo*		
Plur.	1, 2, 3. *beoth*, *beo*(*n*)	*beon*		

	Imp.	Inf.	Part.
Sing. 2.	*beo*	*beon*	Past *beon*, *beo*
Plur. 2.	*beoth*		

In the ind. 1st sing., **O.** has only *amm*. In **B.** and **O.**, *eo* is often contracted to *e*; thus, **O.** has *best* for *beost*, and *ben*, *beth*, as well as *beon*, *beoth*. In the pret., **O.** writes *were*, *werenn*, instead of *u ere*, *ueren*; but in the ind. 2d sing. it has *wass*, wert. The plural, *sunden*, is not found in **B.**, which uses *beoth*, *beth*, instead. **O.** has *sinndenn*, but uses also *arrn* (Eng. *are*). The subj. sing. *si* is still found in **O.** and **A.**; the plur. *seon* in **A.** In the imperative sing. **A.** has also *seo*.

(b) *gan*, d. inf. *ganne*; pres. (1. *ga*), 2. *gæst* (**O.** *gast*), 3. *geth* (**O.** *gath*), pl. *gath*, *ga* (**O.** *gan*); imp *ga*, pl. *gath*; part. pres. *gannınde* (**B.** *goinde*, *goinge*), past *gan*. In all these forms, **B.** has *o* for *a*. A verb *ȝeongen* (**B.** *ȝongen*, **O.** *ganngenn*) is also used in the present, and **A.** and **B.** have a pret *gengde* or *geinde*. The common pret. is *eode* (**O.** *ȝeode*, **B.** *ȝede*). In frequent use, also, is the pret. *wende*, went, from the regular verb *wenden*.

(c) *don*, d. inf *donne*; pres. (1. *do*), 2. *dest* (**B.**, **O.**, *dost*), 3. *deth*, *doth*, pl. *doth* (**O.** *don*); imp. *do*, pl. *doth*; pret *dede*, *dude* (**O.** *dide*); part. pres. *donde*, past *don*.

§ 145. **C.** Several verbs vacillate between primary and secondary inflection; as, pret. *bæh* or *bogede*, from *bugen*, to bow, pret. *for* or *ferde*, from *faren*, to fare; pret. pl. *heo clumben*, **B.** *hii clomden*, from *climben*, to climb.

The verbs *fon*, to take, *hon*, to hang, make present forms from these roots; as, *underfoth*, they undertake; but from *fangen* and *hangen*, the preterits *feng*, *heng*. The verb *standen* (**O.** *stanndenn*) makes pret. *stod*, pl. *stoden*, part. *stonden* (**O.** *stanndenn*).

§ 146. **D.** The following verbs of secondary inflection are irregular: *thenchen* (**O.** *thennkenn*), to think, pret. *thohte*, part. *tholt*; *thuncheth* (**O.** *thinnkeththh*), seemeth, pret. *thuhte*; *wurchen* (**O.** *wirrkenn*), to work, pret. *wrohte*, part. *wroht* (in **A.** also *worhte*, *worht*); *buggen* (**O.** *biggenn*), to buy, pret. *bohte*, part. *boht*; *bringen*, to bring, pret. *brohte*, part. *broht*.

MIDDLE ENGLISH INFLECTION.

SECOND AND THIRD PERIODS.

§ **147.** The periods in the history of our language which are known as the Second and Third Middle English Periods differ considerably in the vocabulary, but in grammatical points they are not so far unlike as to require a separate treatment in this sketch. One can be briefer here, as the inflectional system is now reduced more nearly to its modern proportions; and in the Ormulum, which, though written about 1200, stands, by virtue of its more northern dialect, farther than Layamon from the Anglo-Saxon, we have already seen much of what is most striking in early English inflection. The object will be to represent especially the language of Chaucer in its characteristic features.

§ **148.** It must be observed at the outset, that the unaccented final *e*, which is silent in modern English, was generally pronounced by Chaucer. A multitude of apparent exceptions are accounted for by noticing these three peculiarities in the poet's verse: 1. The unaccented final *e* is generally elided before a word beginning with a vowel; so also before a pronoun or adverb with initial *h*, and before forms of the verb *to have*. 2. The unaccented final *e* is sometimes suppressed before a word beginning with a consonant. 3. An unaccented final *er* is often treated as a part of the preceding syllable, its *e* being suppressed, especially where a vowel or *h* follows in the next word, and sometimes an unaccented final *en* or *eth* is treated in the same way. Many of the exceptional cases are undoubtedly attributable to variations and corruptions introduced by the transcribers. Toward the middle of the fifteenth century final unaccented *e* ceased to be pronounced, and this far-reaching change brought with it a great simplification in inflectional forms, which may be understood by disregarding this *-e* in the paradigms that follow and observing the result. Thus the difference between the singular and the plural of adjectives, that between their definite and indefinite forms, and that between the preterit and the past participle of weak verbs all vanished as soon as this *-e* disappeared from pronunciation.

SUBSTANTIVES.

§ **149. Nominative Singular.** Where the Anglo-Saxon had a final vowel (*a*, *e*, *o*, *u*) in the nom. sing., Middle English of the Second Period has *-e;* as, *oxe*, *herte*, *ere*, *herde*, *lawe*, *elde* (AS. *oxa*, ox, *heorte*, heart, *éare*, ear, *hierde*, (shep)herd, *lagu*, law, *ieldu*, age). Even where the Anglo-Saxon had a final consonant, most feminine words have an added *-e;* as, *dede*, *sorwe*, *youthe* (AS. *dǽd*, deed, *sorh*, sorrow, *geogud*, youth); but the verbals in *-yng* do not generally add *-e;* as, *conning*, less often *conninge*, cunning. An unorganic *-e* is also found in the nominative of some masculines and many neuters: thus, *weye* (but also *wey*), *dale*, etc.

§ **150. Genitive Singular.** The gen. sing. ends in *-es;* as, *kinges*, *names*, from *king*, *name*. In Chaucer the *-es* is almost always a separate syllable. Genitives without *-es* are sometimes found, in accordance with earlier modes of inflection; as, *mym herte blood*, *his lady grace*, *hir fader hous;* but *heven king*, AS. *heofon-cyning*, is properly a compound word.

§ **151. Dative and Accusative Singular.** The acc. sing. is always like the nom.; the dat. sing. is usually so. But where the nom. ends in a consonant, a dative in *-e* is often found with prepositions, especially at the end of a line in verse. In Chaucer, and to a considerable extent in other writers, this dative is confined to certain fixed or petrified idiomatic phrases which have an existence more or less independent of the individual history of their component parts, and to similar phrases formed by analogy; but as a living, usable formative element, the dative ending does not exist. Thus we have: — *to dethe*, but *of his deth; to toune*, but *traitor to the town; on fyre* (nom. *fyr*), *on horse* (nom. *hors*), *in honde* (nom. *hond*), *on lyve* (nom. *lyf*), *to yere* (nom. *yer*), etc.

§ **152. Plural.** The plur. has *-es* in all the cases; as, nom. gen. dat. acc. *kinges*, *dedes*, *shippes*, *wyves*, *names*, *hertes* (AS. nom. pl. *cyningas*, *dǽda*, *scipu*, *wif*, *naman*, *heortan*). In Chaucer the plural often ends in *-s* alone (or *-es* pronounced as *-s*) especially where two or more syllables precede; as, *shoos*, *knees*, *pilgryms*, *lovers*, *frankeleyns*, *servaunts*, *complexions*. Some words still retain the plural of the old N declension; as, *oxen*, *eyen* (eyes), *asshen* (also *asshes*), *shoon* (also *shoos*), etc.; while some others take *-n* by mistaken analogy, as *bretheren*, *sistren* (also *sustres*), *children* (also *childre* or *childer*), *kyn* (kine), etc. Some words, which were of neuter gender in the AS., make the plur. like the sing.; as, pl. *deer*, *good*, *sheep*, *swin* (swine), *folk* (or *folkes*), *hors* (or *horses*), *thing* (or *thinges*), *yer* (or *yeres*). The plurals with change of vowel are *feet*, *gees*, *men*, *teeth*, etc., as in modern English.

§ **153.** If the ending *-es* or *-s* is not used in the nom. pl., it is added to form the gen. pl.; as, *folkes wyves*, *mennes soules*, *wymmens counseiles*.

ADJECTIVES.

§ **154.** Adjectives are inflected as in the Ormulum: the pl. of the indefinite adjective and both numbers of the definite end in *-e;* as, *yong man*, *yonge men*, *the yonge man*, *the yonge men*. In Chaucer this inflection is almost confined to monosyllables; nearly all adjectives of two or more syllables, and of course all adjectives that end in *-e*, are uninflected. In occasional instances the indefinite adjective takes *-e* in the sing., especially before names of persons, following the analogy of the vocative construction (§ 72). On the other hand, *-e* of the indefinite plural is sometimes omitted when the adjective is a predicate; as, *they were glad:* the predicate participle is almost always undeclined.

§ **155.** Chaucer has a remnant of the old gen. pl. indef. in *aller*, *alder*, or *alther*, of all; as, *at your alther cost*, *alther best*.

§ **156.** The comparative and superlative are formed as in modern English. Superlatives of one syllable are inflected; as, *the beste man*, *his laste word*. Change of vowel is seen in *lenger*, from *long; strenger*, *strengest*, from *strong; elder*, *eldest*, from *old*.

§ **157.** Adverbs are formed from adjectives as in the earlier language: either with the ending *-e;* as, *brighte*, *faire*, *harde*, *longe*, from *bright*, *fair*, etc.: or with the ending *-ly* or *-liche* (AS. *-lice*); as, *shortly*, *sothely*, *sikerly*, *specially*, from *short*, *soth*, etc.

PRONOUNS.

§ **158.** In the first person, Chaucer has *I*. In certain idiomatic phrases, *ich* (AS. *ic*) occurs; as, *so thecch* (for *thee ich*), so may I thrive. In imitating the Northern Dialect Chaucer uses *ik*. In the second person, he has *thou*, *ye*, *you*, for AS. *þú*, *gé*, *éow*. The dual forms are no longer met with. In the third person, he has —

	Sing.			Plur.
	Masc.	Fem.	Neut.	
Nom.	*he*	*she*	*hit*, *it*	*they*
Gen.	*his*	*hire*, *here*	*his*	*here*, *hire*
Dat.	*him*	*hire*	*him*	*hem*
Acc.	*him*	*hire*	*hit*, *it*	*hem*

The forms *hire* and *here* were usually pronounced *hir*, *her*, and were sometimes written *o*. In the Second Period (though not in Chaucer) we still find *heo* in the nom. sing. fem., and *heo* or *hi*, *hii*, in the nom. plur.

§ **159.** Reflexives are made in Chaucer by adding *self*, or *selve*, or *selven*, to *my*, *thy*, *him*, *hir*, *our*, *your*, *hem;* as, *myself*, *myselve*, *myselven*, etc.

§ **160.** The possessives *myn*, *thyn*, in Chaucer, retain *n* before a vowel or *h*, sometimes before other consonants: they retain it also when used absolutely, *i. e.*, after the substantive, or without a substantive, or as predicates, in which cases, too, they admit of inflection; as, *children myne*, *thin be the glorie*, *neghebour of myne*. The possessives *oure*, *youre*, are usually pronounced *our*, *your*, and are sometimes written so: when used absolutely, they usually take *-s;* *ours*, *youres* (in two syllables). *Hire*, her, and *here*, their, have the same absolute form (*heres*).

§ **161.** Among the forms of the definite article which we have seen in the First Period, there are some that appear occasionally and irregularly in the two following periods, but the one form *the* is generally, and at length constantly, used for all genders and numbers. The indefinite article *an* gives up its *n*, except before a vowel or *h*.

§ **162.** The demonstratives in Chaucer are sing. *that*, pl. *tho*, and sing. *this*, pl. *these*, *thise* (usually pronounced as one syllable, and often written *thes*, *this*). *That*, in *that oon*, *that other*, sinks from a demonstrative to a mere article.

§ **163.** The interrogatives are *who*, *what*, *whos*, *whom;* *which*, what kind of? *whether*, which (of two)?

§ **164.** The common relative in Chaucer, as in the Ormulum, is *that* for all numbers and genders. Instead of *that*, we sometimes find *which that;* as, *Creon*, *which that was of Thebes king*. *Which* itself, or *the whiche*, is used as a relative, but chiefly after prepositions or in agreement with a substantive following. We find also *who*, *whos*, *whom*, used as relatives; but they are less common.

VERBS.

§ **165.** The verbs of primary inflection (*strong verbs*) are reduced in number, some which once belonged to this order having taken up the secondary (weak) inflection. In those which remain, the classes have become much obscured and confounded, as will be evident from the following examples, in which are given, as before, the infinitive, the singular of the preterit, the plural of the preterit, and the past participle: —

REDUPLICATING CLASSES.

	Inf.	Pret. Sing.	Pret. Plur.	Past Part.	
I.	[*blenden*]	——	——	——	blend
II.	*hoten*	*heet*, *hight*(e)	*highten*	*hoten*, *hight*	bid, etc.
III.	*knowen*	*knew*	*knewen*	*knowen*	know
IV.	*leten*	*leet*	*leeten*	*leten*, *laten*	let
	slepen	*sleep*	*sleepen*	*slepen*, *slept*	sleep
V.	*holden*	*held*	*helden*	*holden*	hold
	fallen	*fel*	*fellen*	*fallen*	fall
VI	*beten*	*beet*	*beeten*	*beten*, *bet*	beat
VII.	*wepen*	*weep*	*weepen*	*wopen*, *wepen*, *wept*	weep

NON-REDUPLICATING CLASSES.

	Inf.	Pret. Sing.	Pret. Plur.	Past Part.	
I.	*risen*	*roos*	*risen*	*risen*	rise
	driven	*drof*	*driven*	*driven*	drive
	writen	*wrot*	*writen*	*writen*	write
II.	*chesen*	*chees*	*chosen*	*chosen*	choose
	crepen	*creep*	*cropen*	*cropen*	creep
III.	(1) *finden*	*fond*	*founden*	*founden*	find
	bi-ginnan	*-gan*	*-gonnen*	*-gonnen*	begin
	(2) *helpen*	*halp*	*holpen*	*holpen*	help
	(3) *kerven*	*carf*	*corven*	*corven*	carve
IV.	*beren*	*bar*	*beren*, *baren*	*boren*, *born*	bear
	comen	*cam*	*comen*	*comen*	come
V.	*yiven*	*yaf*	*yaven*	*yiven*, *yeven*	give
	speken	*spak*	*speeken*	*spoken*	speak
VI.	*shapen*	*shop*	*shopen*	*shapen*	shape
	waxen	*wex*	*wexen*	*waxen*	wax
	drawen	*drough*	*drowen*	*drawen*	draw

We also find *slepte*, *bette*, *wepte*, *crepte*, secondary preterits for *sleep*, *beet*, *weep*, *creep;* also, *bigon* for *bigan*, and *fonden* for *founden*. In the forms of *waxen*, *a* and *e* are much confounded, and a participle *woxen* is met with. Chaucer and others often use *y* for *i;* as, *fynden*, *bygynnen*, *dryven*.

§ **166. Final n.** In the inflection of the verb, the final *n* of the infinitive, the plural forms, and the past participle, is omitted with great freedom: thus, *to maken* or *to make*, *we knowen* or *we knowe*, *they seyden* or *they seyde*, *founden* or *founde*. An unaccented *e*, before the omitted *n*, is generally sounded in Chaucer, but was sometimes dropped in pronunciation, and occasionally so in writing; as, *to let*.

§ **167. Present Indicative.** The first person singular still ends in *-e*, which in Chaucer is generally sounded; as, *I seye*, *I knowe*. The second person singular ends in *-est* or *-st;* as, *tellest*, *seyst*. The third person singular ends in *-eth*, from which *e* is sometimes omitted; as, *telleth*, *comth*. The 3d sing. in *-es* or *-s* (West Midland and Northern) is rare in Chaucer. Where the root ends in *t* or *d*, contraction often occurs; as, *sit* for *sitteth*, *byt* for *byddeth*, *stant* for *standeth;* and in like manner *rist* for *riseth*. In the plural the Southern ending *-eth* (A. S. *-að*) is found in Chaucer; as, *loveth;* but the common termination is *-en* (or *-e*); as. *loven* (or *love*). In the Northern Dialect the plural ends in *-es*.

§ **168. Preterit Indicative.** Verbs of primary inflection make the second person singular like the first and third; as, *thou bar*, *thou spak*, *thou swor;* but a few instances show the old ending *-e;* as, *thou were*, *thou yave*. The plural has *-en* (or *-e*)

§ **169.** Verbs of secondary inflection add *-de* to the root, either immediately, as *seyde*, *answerde*, or with a connecting *e*, as *weddede*, *servede*. In the former case, *-de* after *p*, *k*, *t*, *s*, or *gh*, becomes *-te;* as, *kepte*, *mette*, *kiste: alight-de* is changed to *alighte*, *fast-de* to *faste*, *send-de* to *sende* or *sente*, *wend-de* to *wente*, and the like. For other changes, see § 181. The final *e* of the 1st and 3d sing. is sometimes dropped; as, *seyd*, *thought*, *left* (*left*). So especially in forms that do not syncopate *e* before *-d;* as, *loked*, *opened*, *thonked*, and French verbs like *entended*, *graunted*. The 2d sing. has *-est*, the plural *-en* (or *-e*).

§ **170. Subjunctive.** The subjunctive in both tenses has *-e* in the three persons of the singular, and *-en* (or *-e*) in the plural; but in weak preterits the indicative ending *-est* is common in the 2d sing. in subjunctive constructions (as in late Anglo-Saxon); thus, — "I nolde that thou *wendest*," I should be unwilling that thou *shouldst think*.

§ **171. Imperative.** The singular of the imperative is the same as the root of the verb; as, *spek* (speak), *ber* (bear), *com* (come), *yif* (give). But verbs which have *-ede*

in the perfect take *-e* in the imperative; as, *love*, *aske;* and this is occasionally true of others also, as, *telle*, *thou wrote* (perhaps subj.). The plural ends in *-eth* (or *-th*); as, *cometh*, *draweth*, *seyth*, *goth*, *beth*. but in Chaucer this ending is often reduced to *-e;* as, *holde* (for *holdeth*); and is frequently omitted altogether; as, *tel* (for *telleth*), *tak* (for *taketh*), *lat* (always for *latteth*).

§ **172. Infinitive.** The infinitive ends in *-en* (or *-n*), but often drops the final *n;* as. *helpen*, *yiven*, *don*, *ben;* or, *helpe*, *yive*, *do*, *be*. A few forms in Chaucer, like *to doone*, *to seyne*, come from the old dative case of the infinitive.

§ **173. Participles.** The old ending for the present participle, AS. *-ende*, is still found in the fourteenth century, and is the regular form in Gower, as *comende*, coming. But it yields more and more to the termination *-inge* or *-ing* (in Chaucer *-ynge* or *-ynge*), which, in the Anglo-Saxon and other Teutonic languages, belongs solely to abstract nouns of action. The isolated forms in *-and* found in some Chaucer manuscripts are due to the scribes.

§ **174.** The past participle of primary inflection freely gives up the final *n;* as, *comen* or *come*, *songen* or *songe*. It is thus often omitted in Chaucer from participles that always have it in modern English; as, *yiven* and *yive*, *gon* and *go*, *ben* and *be*. The prefix *i-* or *y-* (AS *ge-*) is often used by Chaucer before this participle; as, *i-maked* or *i-maad*, *y-brent* (burnt), *i-writen*, *y-corve* (carved), *i-be* (been), seldom before other forms of the verb.

§ **175.** Primary inflection. *helpen*, to help.

	Pres.		Pret.	
	Ind.	Subj.	Ind	Subj.
Sing. 1.	*helpe*	*helpe*	*halp*	*holpe*
2.	*helpest*	*helpe*	*halp(e)*	*holpe*
3.	*helpeth*	*helpe*	*halp*	*holpe*
Plur. 1, 2, 3.	*helpe(n)*	*helpe(n)*	*holpe(n)*	*holpe(n)*

	Imp.	Inf.	Part.
Sing. 2.	*help*	*helpe(n)*	Pres. *helping(e)*
Plur. 2.	*helpeth*		Past *holpe(n)*

§ **176.** Secondary Inflection: *seken* (*sechen*), to seek.

	Pres.		Pret.	
	Ind.	Subj.	Ind.	Subj.
Sing. 1.	*seke*	*seke*	*soughte*	*soughte*
2.	*sekest*	*seke*	*soughtest*	*soughte*
3.	*seketh*	*seke*	*soughte*	*soughte*
Plur. 1, 2, 3.	*seke(n)*	*seke(n)*	*soughte(n)*	*soughte(n)*

	Imp.	Inf.	Part.
Sing. 2.	*sek*	*seke(n)*	Pres. *seking(e)*
Plur. 2.	*seketh*		Past *sought*

§ **177.** Secondary Inflection: *loven*, to love.

	Pres.		Pret.	
	Ind.	Subj.	Ind.	Subj.
Sing. 1.	*love*	*love*	*loved(e)*	*loved(e)*
2.	*lovest*	*love*	*lovedest*	*loved(e)*
3.	*loveth*	*love*	*loved(e)*	*loved(e)*
Plur. 1, 2, 3,	*love(n)*	*love(n)*	*lovede(n)*	*lovede(n)*

	Imp.	Inf.	Part.
Sing. 2.	*love*	*love(n)*	Pres. *loving(e)*
Plur. 2.	*loveth*		Past *loved*

§ **178.** The verb *haven* loses its *v* in several forms: thus, inf. *have(n)* or *han*, pres. 1. *have*, 2. *hast*, 3. *hath*, pl. *have(n)* or *han;* pret. *hadde;* past part. *had*. In Chaucer *-e* is regularly suppressed in pronunciation in the form *have*. The verb *maken* loses its *k* in certain forms: thus, pret. *makede* or *made;* past part. *maked* or *maad*.

§ **179. Anomalous Verbs. A.** The Preteritives (§ 94) are as follows:

	Pres.		Pret.
	Sing 1, 3.	Sing. 2.	Plur.	
(a)	*wot*	*wost*	*wite(n)*	*wiste*
(b)	*owe*, *oweth*	*owest*	*owe(n)*	*oughte*
(c)	*can*	*canst*	*conne(n)*	*couthe*, *coude*
(d)	*dar*	*darst*	*dar*, *dorre*	*dorste*, *durste*
(e)	*shal*	*shalt*	*shul(l)en*	*sholde*, *shulde*
(f)	*may*	*might*	*mowe(n)*	*mighte*
——		*mayst*	*may*	——
(g)	*mot*	*most*	*mote(n)*	*moste*

In the present of these verbs the singular form of the 1, 3 pres. occurs also as a plural. *Wil* has 2 sing. *wilt*, *nolt*, pl. *wil(n)*, *nol(n)*, perf. *wolde;* *nyl* has *nylt* and *nolde*.

The AS. *thearf* (Early Middle English *tharf*), needs, is represented by the defective *thar:* — pres. ind. *thar;* pret. *thurfte*.

§ **180. B.** (a) The verb of existence is thus declined: —

	Pres.		Pret.	
	Ind.	Subj.	Ind.	Subj.
Sing. 1.	*am*	*be*	*was*	*were*
2.	*art*	*be*	*were*	*were*
3	*is*	*be*	*was*	*were*
Plur. 1, 2, 3.	*be(n)* or *arn*	*be(n)*	*were(n)*	*were(n)*

	Imp.	Inf.	Part.
Sing. 2.	*be*	*be(n)*	Pres. *being(e)*
Plur. 2.	*beth*		Past *be(n)*

(b) Inf. *go(n)*; pres. 1. *go*, 2. *gost*, 3. *goth*, pl. *go(n)*; pret. *went(e)* or *yede* (AS. *éode*); past part. *go(n)*.

(c) Inf. *do(n)*; pres. 1. *do*, 2. *dost*, 3. *doth*, pl. *do(n)*; pret. *dide;* past part. *do(n)*.

§ **181. C.** Several verbs of secondary inflection have in the preterit and the past participle a vowel different from that of the present stem: thus, *sellen* makes *solde*, *sold;* *tellen*, *tolde*, *told;* *caechen*, *caughte*, *caught;* *techen*, *taughte*, *taught;* *rechen* (reach), *raughte*, *raught;* *recchen* or *reklen* (reck), *roughte*, *rought;* *strecchen*, *straughte*, *straught;* *sechen* or *seken*, *soughte*, *sought;* *beyen*, *boughte*, *bought;* *bringen*, *broughte*, *brought;* *thenken* (think), *thoughte*, *thought;* *thynken* (seem), *thoughte*, ——; *werken*, *wroughte*, *wrought*. From *fecchen* (fetch) comes an irregular past part *fet*.

SPECIMENS OF THE ENGLISH LANGUAGE IN ITS EARLIER STAGES.

§ **182.** *The so-called Hymn of Cædmon; A. in the old Northumbrian dialect (from a MS. of the eighth century). B. in the West Saxon dialect (version called King Alfred's).*

For translation see § 25.

§ **183.** *From an interpolation made by King Alfred in his translation of Orosius* (the *extract here given is preserved in a contemporary MS, and therefore gives a trustworthy representation of the West Saxon dialect of the ninth century*)

Óhtere séde his hláforde, Ælfréde cyninge, þæt hé ealra Norðmonna norðmest búde. Hé cwæð þæt hé búde on þém lande norðweardum wið þá Westsé. Hé séde þéah þæt þæt land sie swíðe lang norð þonan; ac hit is eall wéste, búton on féawum stówum styccemælum wiciað Finnas, on huntoðe on wintra, ond on sumera on fiscaðe be þáre sé. Hé séde þæt hé æt sumum cirre wolde fandian hú longe þæt land norðryhte lége, oððe hwæðer énig monn be norðan þém wéstenne búde.

Translation. — Ohtere said to his lord, king Alfred, that he dwelt farthest-north [northmost] of all Northmen. He said [quoth] that he dwelt in the land northward along the West Sea. He said, though, that that land extended [was] far [long] north from there; but it is all waste, except that in a few places here and there Finns live, hunting [in hunting] in winter and in summer fishing [in fishing], by that sea. He said that he on one occasion wished to explore how far that land extended due north [how long that land lay north-right], or whether any man dwelt north of the waste.

§ **184.** *From the Anglo-Saxon version of Matthew (about the year* 1000), *eighth chapter, verses* 1–10.

Sóðlice þá se Hælend of þám munte nyðer-ástáh, þá fyligdon him mycle mænio. þá genéalæhte án hréofla tó him and hine tó him ge-éaðmédde, and þus cwæð: Drihten, gyf þú wylt, þú miht me geclænsian. þá ástrehte se Hælend hys hand, and hrepode hyne, and þus cwæð: Ic wylle, béo geclænsod. And hys hréofla wæs hrædlice geclænsod. þá cwæð se Hælend tó him: Warna þé þæt þú hyt nánegum men ne secge; ac gang, ætéow þé þam sacerde, and bring hym þá lác þe Moyses bebéad, on hyra gecýðnesse. Sóðlice þá se Hælend inéode on Capharnaum, þá genealæhte hym an hundredes ealdor, hyne biddende, and þus cwéðende: Drihten, min cnapa líð on minum húse lama, and mid yfle gepréad. þá cwæð se Hælend tó him: Ic cume and hine gehæle. þá andswarode se hundredes ealdor and þus cwæð: Drihten, ne eom ic wyrðe þæt þú ingange under mine þecene; ac cweð þín án word, and mín cnapa bið gehæled. Sóðlice ic eom man under ánwealde gesett, and ic hæbbe þegnas under mé; and ic cweðe tó þysum, Gang, and hé gæð; and ic cweðe tó óðrum, Cum, and hé cymð; tó minum þéowe, Wyrc þis, and hé wyrcð. Witodlice þá se Hælend þis gehýrde, þá wundrode hé and cwæð tó þám þe him fyligdon: Sóð ic secge éow, ne gemétte ic swá mycelne geléafan on Israhel.

Translation. — [Words wanting in the original are introduced in Italics: explanations or kindred words are inserted in brackets.] Soothly when the Savior from the mountain came-down, there followed him *a* great multitude [mickle many]. Then came-near a leper to him, and him(self) to him humbled, and thus said [quoth], Lord, if thou wilt, thou mayest me cleanse. Then stretched-out the Savior his hand, and touched him, and thus said: I will, be cleansed. And his leprosy was quickly cleansed. Then said the Savior to him: Beware [warn thee] that thou it to no man say; but go: show thee to the priest [Lat. sacerdos], and bring him the gift that Moses bade, for their information. Soothly when the Savior went-in to Capernaum, there came-near him an hundred's chief, him begging [bidding], and thus saying: Lord, my boy [knave] lieth in my house lame [paralytic], and with evil afflicted. Then said the Savior to him: I *will* come and him heal. Then answered the hundred's chief and thus said: Lord, I am not worthy that thou go-in under my roof [thatch]; but say thy one word, and my boy will-be healed. Soothly I am a man under authority set, and I have servants [thanes] under me; and I say to this, Go, and he goeth; and I say to *an* other, Come, and he cometh; to my servant, Work this, and he worketh *it*. Indeed, when the Savior this heard, then wondered he, and said to those that followed him: Sooth I say to-you, I have not met [ne met I] so much faith [belief] in Israel.

§ **185.** *From the latter part of the Anglo-Saxon Chronicle.*

An. MLXXXVII. —. . . Þissum þus gedóne se cyng Willelm cearde ongéan tó Normandige. Réowlic þing hé dyde and réowlicor him gelamp. Hú réowlicor? Him geyfelade, [óð] þæt him stranglice eglade. Hwæt mæg ic teollan? Se scearpa déað, þé

ne forlét né rice menn né héane, se hine genam. Hé swealt on Normandige on þone nexstan dæg æfter natiuitas Sče Marie; and man bebyrgede hine on Caþum æt Sče Stephanes mynstre: ærer hé hit árærde, and syððan mænitealdlice gegódade. Éalá, hú leas and hú unwrest is þysses middan-eardes wela. Sé þe wæs árur rice cyng and maniges landes hláford, he næfde þá ealles landes búton seofon fót máel; and se þe wæs hwilon gescrid mid golde and mid gimmum, hé læg þá oferwrogen mid moldan. Hé léfde æfter him þreo sunan, Rodbeard hét se yldesta, se wæs eorl on Normandige æfter him · se óðer hét Willelm, þé bær æfter him on Engleland þone kine-helm: se þridda het Héanric, þám se fæder becwæð gersuman unáteallendlice.

Translation. — A. D. 1087. — . . . This *being* thus done, the king William returned again to Normandy. *A* rueful thing he did and *a* ruefuller befel him. How ruefuller? He [it., to him] grew-ill, till that *it* strongly ailed him. What may I tell" The sharp death, that *does* not let-pass neither rich men nor poor, this took him. He died in Normandy on the next day after the nativity of St. Mary; and men [man] buried him in Caen at St. Stephen's minster; earlier he up-reared it, and afterward [sithence] manifoldly enriched [conferred-*goods*-on] *it*. Alas! how fickle and how unstable is this middle-world's weal! He that was earlier powerful king and many *a* land's lord, he had-not then of-all land but seven feet measure; and he that was whilom clothed [shrouded] with gold and with gems, he lay then covered-over with mold. He left after him three sons: Robert was-named [hight] the eldest, who was earl in Normandy after him; the other [second] was-named William, that bore after him in England the crown [regal-helm]: the third was-named Henry, to-whom the father bequeathed treasures innumerable [un-*tell*-able].

§ 186. *From Béowulf* (ll. 710–722).

Þá cóm of móre under mist-hleoðum
Grendel gongan, godes yrre bær.
Mynte se manscaða manna cynnes
sumne besyrwan in sele þam héan;
wód under wolcnum tó þæs þe he winreced,
goldsele gumena, gearwost wisse
fættum fáhne: ne wæs þæt forma síð
þæt hé Hróðgáres ham gesóhte.
Nǽfre hé on aldordagum ær né siððan
heardran hæle, healþegnas fand!
Cóm þá tó recede rinc síðian
dréamum bedǽled: duru sóna onarn,
fýrbendum fæst, syððan hé hire folmum hrán.

Translation. — Then came from *the* moor under mist-hills Grendel to-go, God's ire *he* bare. *He* meant, the wicked-destroyer [scather], of men's kin some *one* to insnare in the high hall: *he* stalked under welkin, until that *the* wine-mansion, *the* gold-hall of-men, he most-clearly knew, with-jewels bedecked: nor was that *the* first [foremost] time that Hrothgar's home he visited [sought]. Never in *his* life-days, ere *this* nor since, *a* hardier hero *or* hall-servants [hall-thanes] he found! Came then to *the* mansion *the* martial-one to-journey, from-joys divided: *the* door soon gave-way, *though* with-fire-bands fast, when he it [her] with-*his*-palms touched.

§ 187. *From the Genesis formerly ascribed to Cædmon* (ll. 1296–1305).

Ic wille mid flóde folc ácwellan,
and cynna gehwilc cucra wuhta,
þára þe lyft and flód lédað and fédað,
feoh and fuglas: þú scealt frið habban
mid sunum þínum, þonne sweart wæter
wonne wælstréamas werodum swelgað
sceaðum scyldfullum. Ongyn þé scip wyrcan,
merehús micel, on þám þú monegum scealt
reste gerýman, and rihte setl
ǽlcum, æfter ágenum, eorðan tudre!

Translation. — I will with *a* flood *the* folk destroy [quell, kill], and each of-*the*-kindreds of-living creatures [quick wights], of-those that air and flood *do* lead and feed, cattle and fowls: thou shalt have peace, with thy sons, when *the* swart waters, wan death-streams, swallow multitudes, wretches guilt-full. Begin thee *a* ship to-work, *a* great sea-house [mere-house mickle], on which thou for-many shalt *a* resting-place make-roomy, and arrange [make-right] *a* seat for-each *one*, after *its* own *kind*, of earth's offspring.

§ 188. *From Layamon's Brut* (ll. 1–22). [Dialect of North Worcestershire, about 1200.]

A. Earlier Text.	B. Later Text.
An preost wes on leoden,	A prest was in londe,
Laȝamon wes ihoten:	Laweman was [i]hote:
he wes Leouenathes sone;	he was Leucais sone;
lithe him beo drihten!	lef him beo drihte!
He wonede at Ernleȝe,	He wonede at Ernleie,
at æthelen are chirechen,	wid than gode cnithte,
uppen Seuarne stathe:	uppen Seuarne:
sel thar him thuhte:	merie ther him thohte:
on fest Radestone,	fastebi Radistone,
ther he bock radde.	ther he bokes radde.
Hit com him on mode,	Hit com him on mode,
and on his mern thonke,	and on his thonke,
thet he wolde of Engle	that he wolde of Engelond
tha æthelæn tellen,	the rihtnesse telle,
wat heo ihoten weoren,	wat the men hi-hote weren,
and wonene heo comen,	and wanene hi comen,
tha Englene londe	the Englene lond
ærest ahten	ærest afden
æfter than flode	after than flode
the from drihtene com,	that fram god com,
the al her a-quelde	that al ere acwelde
quic that he funde.	cwic that hit funde.

Translation [by Sir F. Madden. The quotation marks show what belongs only to A., the brackets what belongs only to B.]. — *There* was a priest on earth (*or* in *the* land), *who* was named Layamon; he was son of 'Leovenath' [Leuca], — may *the* Lord be gracious to him! — He dwelt at Ernley, 'at a noble church' [with the good knight] upon 'Severn's bank' [Severn], — 'good' [pleasant] *it* there seemed to him — near Radestone, where he books read. It came to him in mind, and in his 'chief' thought, that he would tell the 'noble deeds' [history] of '*the* English' [England]; what 'they' [the men] were named, and whence they came, who first 'possessed' [had] *the* English land, after the flood that came from '*the* Lord' [God], that destroyed here all that it found alive.

§ 189. *From the same* (ll. 25,725–25,744).

A.	B.
To there midnihte,	To thare mid-nihte,
tha men weoren aslepe,	tho men were a-sleape,
Arthur forth him wende,	Arthur forth him wende,
athelest alre kinge.	baldest alre kinge.
Biforen rad heore lod-cniht,	Bi-vore ȝeode hire lod-cniht,
that hit was dæilliht:	forte hit was day-liht:
heo lihten of heore steden,	hii lihte of hire stedes,
and rihten heore iweden.	and rihte hire wedes
Tha iseȝen heo nawiht feorren	Tho hii selhȝen noht vorre,
a muchel fur smokien,	on mochel fur smokie,
uppen ane hulle,	uppen one hulle,
mid sæ ulode bi-uallen;	mid séé flode bi-falle;
and an other hul ther wes swithe heh;	an other hulle was thar heh;
thæ sæ hine bifledde ful neh;	the séé hine biflozede swithe neh;
ther uuen on heo iseȝen a fur,	thar upon he iseh a fur,
that wes muchel and swithe stor.	that was mochel and swithe stor.
Thæ cnihtes tha tweoneden,	The cnihtes tho nuste,
to whathere heo faren mihten,	to wather hii wende mihte,
thet the eotend war neore	that the eatant war neore
of theos kinges fore.	of this kinges fore.

Translation. — At the midnight, when men were asleep, Arthur forth him went, 'noblest' [boldest] of all kings. Before 'rode' [proceeded] their guide, until it was daylight; they alighted from their steeds, and righted their weeds. Then saw they not far, a great fire smoke, upon a hill, surrounded by the sea flood; 'and' another hill there was 'most' high; the sea by it flowed 'full' [very] nigh; thereupon 'they' [he] saw a fire, that was mickle and most strong. The knights then 'doubted' [knew not] to whether *of the two* they might go, that the giant were not aware of the king's movement.

§ 190. *From the beginning of the Ormulum* (ll. 1–16). [Midland dialect, about 1200.]

Nu, brotherr Wallterr, brotherr min
affterr the flæshess kinde;
annd brotherr min i Crisstenndom
thurrh fulluhht annd thurrh trowwthe;
annd brotherr min i Godess hus,
ȝet o the thride wise,
thurrh thatt witt hafenn takenn ba
an reȝhellboc to follȝhenn,
unnderr kanunnkess had annd lif,
swa summ Sannt Awwstin sette;
icc hafe don swa summ thu badd,
annd forthedd te thin wille,
icc hafe wennd inntill Ennglissh
Goddspelless hallȝhe lare,
affterr thatt little witt tatt me
min Drihhtin hafeth lenedd.

Translation. — Now, brother Walter, brother mine after the flesh's kindred; and brother mine in Christendom through baptism and through truth; and brother mine in God's house, yet on the third wise, seeing [through] that we-two have taken both one rule-book to follow, under *a* canonic's hood and life, so as Saint Austin set; I have done so as thou badest, and furthered thee thy will, I have turned into English *the* Gospel's holy teaching [lore], after the little wit that *to* me my Lord hath lent.

§ 191. *From the same* (ll. 95–110).

Annd whase wilenn shall thiss boc
efft other sithe writenn,
himm bidde icc thatt het write rihht,
swa summ thiss boc himm tæchethth,
all thwerrt ut affterr thatt itt iss
uppo thiss firrste bisne,
withth all swillc rime alls her iss sett,
withth all se fele wordess;
annd tatt he loke wel thatt he
an bocstaff write twiȝȝess,
eȝȝwhær thær itt uppo thiss boc
iss wrîtenn o thatt wise:
loke he well thatt het write swa,
forr he ne maȝȝ nohht elless
onn Ennglissh writenn rihht te word,
thatt wite he wel to sothe.

Translation. — And whoso shall wish this book again *another* time to-write, him bid I that he-it write right, so as this book him teacheth, all throughout after that [*i. e.*, according as] it is upon this first exemplar, with all such meter [rhyme] as here is set, with all so many words; and that he look well that he a letter write twice, everywhere where it upon this book is written on that wise; look he well that he-it write so, for he may not else in English write right the word, that wit he well to sooth [*i. e.*, let him know that well for truth].

§ 192. *From the Ancren Riwle.* [South English dialect, first quarter of 13th century.]

"Thet is the ende of the tale," seith Seneke the wise, "Ichulle thet ȝe speken selde and theonne buten lutel." Auh moni punt hire word uorte leten mo ut, as me deth water et ter mulne cluse; and so duden Jobes freond thet weren icumen to urouren him · seten stille alle seoueniht; auh theo heo hefden alles bigunne uorto spekene, theone kuthen heo neuere astunten hore cleppe. So hit is ine monie, ase seint Gregorie seith. "Silence is wordes fostrild." Long silence and wel iwust nedeth the thouhtes up touward ther heouene; also as ȝe muwen iseon the water, hwon me punt hit and stoppeth bituoren wel, so thet hit ne muwe adunweard, theonne is hit ined aȝein uorto climben upward.

Translation. — "That is the end of the tale," saith Seneca the wise, "I will that ye speak seldom, and then but little." But many *a one* shuts up [impoundeth] her words for-to let more out, as one does water at the milldam [close]; and so did Job's friends that were come to comfort him, — sat still all *a* week [se'nnight]; but when they had once begun for-to speak, then they could never stint their noise [clap]. So it is in many, as Saint Gregory saith: "Silence is word's foster-mother." Long silence and well guarded forceth the thoughts up toward the heaven; just as you can see the water, when one confines it and stops it well in front, so that it can not *flow* downward, then is it forced again for-to climb upward.

§ **193.** *From the Cursor Mundi* (ll. 3,595–3,608). [Written in the latter part of the 13th century in the Northern dialect; preserved in MSS. of the 14th century.]

Sua[1] has eild[2] now this Ysaac ledd
That he in langur lijs in bedd;
Him wantes sight, als I said yow,
And cald on his son Esau.
"Esau, life[3] son," he said,
"Ga lok thi tacle be purvaid,
And faand[4] to stalk the sa nere,
That thou mai drep[5] me sum dere;
If thou me dere flesse[6] ani gete,
Gladli wald I thar-of ete.
Leve sun, thou has hidir-till
Gladli don thi fader will,
Thou ert schotter wit the beist,[7]
Bath in feild and in forest."

[1] *sua*, so.
[2] *eild*, age.
[3] *life*, dear.
[4] *faand*, make trial.
[5] *drep*, strike, slay.
[6] *flesse*, flesh.
[7] *wit the beist*, among [with] the best.

§ **194.** *From the Chronicle known as Robert of Gloucester's* (ll. 7,537–7,547). [Southern Dialect, about 1300.]

Thus com lo! Engelond into Normandies hond,
and the Normans ne couthe speke tho bote hor owe speche,
and speke French as hii dude atom, and hor children dude also teche;
so that heiemen of this lond, that of hor blod come,
holdeth alle thulke speche that hii of hom nome;
vor bote a man conne Frenss, me telth of him lute;
ac lowe men holdeth to Englisa and to hor owe speche 3ute.
Ich wene ther ne beth in al the world contreyes none
that ne holdeth to hor owe speche, bote Engelond one.
Ac wel me wot vor to conne bothe wel it is;
vor the more that a mon can, the more wurthe he is.

Translation. — Thus came, lo! England into Normandy's hand, and the Normans knew not *how to* speak then but their own speech, and spoke French as *they* did at-home, and their children did so teach, so that *the* high-men of this land, that of their blood came, hold all the-same [the-ilk] speech that they of them took; for unless [but] a man knows French, men reckon [tell] of him little; but *the* low men hold to English, and to their own speech yet. I ween there be not in *the* world countries none, that hold not to their own speech, but England alone [one]. But, well men wot, for to know both well it is; for the more that a man knows, the more worth he is.

§ **195.** *From the Chronicle of Robert Manning of Brunne* (ll. 1,309–1,322). [Midland dialect, 1303.]

When the Troianes were al dight
Wyth seyl upon the mast upright,
With anker and ore and other ware,
And were al redy for to fare,
When the wynd was wel them lent,
They toke ther leve and forth they went.
When they were redy to sailie,
Thre hundred schipes ther was in taille,
And foure mo, the story seys,
When they departed fro the Gregeys.
Two dayes they sailled and two nyght,
That lond ne havene reche they ne myght;
The thrydde day in the even tyde,
In Leogise they gon to ride.

§ **196.** *From Dan Michel's Ayenbite of Inwit.* [Dialect of Kent, 1340.]

Thyse byeth the tuelf articles of the cristene byleue, that ech man cristen ssel yleue stedeuestliche, uor otherlaker he ne may by yborȝe, huanne he heth wyt and scele. And therof byeth tuelf, by the tale of the tuelf apostles, thet hise zette to hyealde and to loky to alle thon thet wyleth by yborȝe. . . . The uerste article is thellich: "Ich beleue ine God, the uader almiȝti, sseppere of heuene and of erthe." This article zette saynte Peter. The other article belongeth to the zone, aze to his godhede, thet is to zigge, thet he is God, and is thellich: "Ich beleue ine Yesu Crist, oure lhord, Godes zone, the uader, in alle thinges thet belongeth to the godhede, an is onlepi thing mid the uader, bote of the persone thet is other thanne the persone of the uader." This article zette sayn Ion the godspellere.

Translation. — These are the twelve articles of the Christian belief, that each Christian man must [shall] believe steadfastly, for otherwise he can not be saved when he hath understanding [wit] and reason [skill]. And of them [thereof] are *there* twelve, according to [by] the number [tale] of the Twelve Apostles that appointed [or composed, *set*] these for all those that wish to be saved to hold and to look to. . . . The first article is this: "I believe in God, the father almighty, creator of heaven and of earth." This article Saint Peter composed. The second article pertaineth [belongeth] to the Son, as to his godhead, that is to say that he is God, and *it* is this: "I believe in Jesus Christ, our Lord, son of God, the father, in all things that pertain to the godhead, and is one *and the same* thing with the Father except as regards [but of] the person, which is other than the person of the Father." This article St. John the Evangelist [gospeler] composed.

§ **197.** *From the beginning of Piers Plowman.* [Midland dialect; middle of fourteenth century.]

In a somer seson whan soft was the sonne,
I shope me in shroudes[1] as I a shepe[2] were,
In habite as an heremite unholy of workes,
Went wyde in this world wondres to here.
Ac[3] on a May mornynge on Malverne hulles
Me byfel a ferly[4] of fairy me thoughte.
I was wery for-wandred and went me to reste
Under a brode banke by a bornes side,
And as I lay and lened and loked in the wateres,
I slombred in a slepyng, it sweyed so merye.[5]
Thanne gan I meten a merveilouse swevene,[6]
That I was in a wildernesse, wiste I never where;
And as I bihelde into the est on hiegh to the sonne,
I seigh[7] a toure on a toft[8] trieliche y-maked,[9]
A depe dale binethe, a dongeon thereinne,
With depe dyches and derke and dredful of sight.
A faire felde ful of folke fond I ther bytweene,
Of alle maner of men, the mene and the riche,
Worchyng[10] and wandryng as the worlde asketh.

[1] *shope me in shroudes*, put me into clothes.
[2] *shepe*, shepherd.
[3] *ac*, but.
[4] *ferly*, strange thing.
[5] *sweyed so merye*, sounded so pleasant.
[6] *swevene*, dream.
[7] *seigh*, saw.
[8] *toft*, hill.
[9] *trieliche y-maked*, excellently made
[10] *worchyng*, working

§ **198.** *From Wycliffe's Translation of the Bible, the first ten verses of the eighth chapter of Matthew.* [Midland dialect, about 1380.]

Forsothe when Jhesus hadde comen doun fro the hil, many cumpanyes folewiden hym. And loo! a leprouse man cummynge worshipide hym, sayinge. Lord, ȝif thou wolt, thou maist make me clene. And Jhesus holdynge forthe the hond, touchide hym, sayinge: I wole; be thou maad clene. And anoon the lepre of hym was clensid. And Jhesus saith to hym: See, say thou to no man; but go, shewe thee to prestis, and offre that ȝifte that Moyses comaundide, in to witnessing to hem. Sothely when he hadde entride in to Capharnaum, centurio neiȝide to hym, preyinge hym, and saide: Lord, my child lyeth in the hous sike on the palsie, and is yuel tourmentid. And Jhesus saith to hym: I shal cume, and shal hele hym. And centurio answerynge saith to him: Lord, I am not worthi that thou entre vndir my roof; but oonly say bi word, and my child shall be helid. For whi and I am a man ordeynd vnder power, hauynge vnder me knyȝtis; and I say to this, Go, and he goth; and to an other, Come thou, and he cometh; and to my seruaunt, Do thou this thing, and he doth. Sothely Jhesus, heerynge these thingis, wondride, and saide to men suynge him: Trewly I saye to ȝou, I fond nat so grete feith in Ysrael.

§ **199.** *The same, from Purvey's Recension of Wycliffe's Translation.* [About 1388.]

But whanne Jhesus was come doun fro the hil, mych puple suede hym. And loo! a leprouse man cam and worschipide hym, and seide: Lord, if thou wolt, thou maist make me clene. And Jhesus helde forth the hoond, and touchide hym, and seide: Y wole; be thou maad cleene. And anoon the lepre of him was clensid. And Jhesus seide to hym: Se, seie thou to no man; but go, shewe thee to the prestis, and offre the ȝift that Moyses comaundide, in witnessyng to hem. And whanne he hadde entrid in to Cafarnaum, the centurien neiȝede to him, and preide him, and seide: Lord, my childe liȝth in the hous sijk on the palesie, and is yuel turmentid. And Jhesus seide to him: Y schal come, and schal heele him. And the centurien answeride, and seide to hym: Lord, Y am not worthi, that thou entre vndur my roof; but oonli seie thou bi word, and my childe shal be heelid. For whi Y am a man ordeyned vndur power, and haue knyȝtis vndir me; and Y seie to this, Go, and he goith; and to another, Come, and he cometh; and to my seruaunt, Do this, and he doith it. And Jhesus herde these thingis, and wondride, and seide to men that sueden him: Treuli I seie to ȝou, Y foond not so greet feith in Israel.

§ **200.** *From the Prologue to Chaucer's Canterbury Tales (Ellesmere MS.).*

Whan that Aprille with hises choures soote[1]
The droghte of March hath perced to the roote,
And bathed every veyne in swich licour,
Of which vertu engendred is the flour;—
Whan Zephirus eek with his swete breeth
Inspired hath in every holte and heeth
The tendre croppes, and the yonge sonne
Hath in the Ram his half[e] cours y-ronne,[2]
And smale foweles maken melodie,
That slepen al the nyght with open eye,[3]
So priketh hem nature in here corages:[4]—
Thanne longen folk to gon on pilgrimage[s],
And palmers for to seeken straunge strondes,
To ferne halwes, kowthe[5] in sondry londes;
And specially, from every shires ende
Of Engelond, to Caunturbury they wende,
The holy blisful martir for to seke,
That hem hath holpen whan that they were seeke.[6]

[1] *soote*, sweet.
[2] *y-ronne*, run.
[3] Read *ye*, eye
[4] *corages*, hearts.
[5] *ferne halwes, kouthe*, ancient saints known.
[6] *seeke*, sick.

§ **201.** *From the Tale of Melibeus, in Chaucer's Canterbury Tales (Ellesmere MS.).*

A yong man called Melibeus, myghty and riche, bigat upon his wif, that called was Prudence, a doghter which that called was Sophie. Upon a day bifel, that he for his desport is went into the feeldes hym to pleye. His wyf and eek his doghter hath he left inwith his hous, of which the dores weren fast y-shette. Thre of hise olde foos han it espyed, and setten laddres to the walles of his hous, and by wyndowes ben entred, and betten his wyf, and wounded his doghter with fyve mortal woundes, in fyve sondry places, this is to seyn, in hire feet, in hire handes, in here erys, in hir nose, and in hire mouth; and leften hire for deed, and wenten awey.

§ **202.** *From Trevisa's translation of Higden's Polychronicon* (vol. ii., p. 161). [South English dialect, 1385.]

Iohn Cornwaile, a maister of grammer, chaunged the lore in gramer scole and construccioun of Frensche in to Englische; and Richard Pencriche lerned the manere techynge of hym and othere men of Pencrich; so that now, the ȝere of oure Lorde a thowsand thre hundred and foure score and fyve, and of the secounde kyng Richard after the conquest nyne, in alle the gramere scoles of Engelond, children leveth Frensche and construeth and lerneth an Englische. . . . Also gentil men haveth now moche i-left for to teche here children Frensche.

§ **203.** *From Caxton's Prologue to Malory's Morte d'Arthur.* [1485.]

For it is notoyrly knowen thorugh the vnyuersal world that there been ix. worthy and the best that euer were, that is to wete, thre paynyms, thre Jewes, and thre crysten men. As for the paynyms, they were tofore the incarnacyon of Cryst, whiche were named, the fyrst Hector of Troye, of whome thystorye is comen bothe in balade and in prose; the second Alysaunder the grete; and the thyrd Julyus Cezar, emperour of Rome, of whome thystoryes ben wel kno and had. And as for the thre Jewes, whyche also were tofore thyncarnacyon of our Lord, of whome the fyrst was duc Josue, whyche brought the chyldren of Israhel in to the londe of byheste; the second Dauyd kyng of Jherusalem; and the thyrd Judas Machabeus; of these thre the Byble reherceth al theyr noble hystoryes and actes. And ȝythe sayd incarnacyon have been thre noble crysten men stalled and admytted thorugh the vnyuersal world in to the nombre of the ix. beste and worthy, of whome was fyrst the noble Arthur, whos noble actes I purpose to wryte in thys present book here folowyng: the seconde was Charlemayn, or Charles the grete, of whome

thystorye is had in many places oothe in Frensshe and Englysshe ; and the thyrd and last was Godefray of Boloyn, of whos actes and lyf I made a book vnto thexcellent prynce and kyng of noble memorye kyng Edward the fourth.

§ **204.** *From Tyndale's New Testament, the first ten verses of the eighth chapter of Matthew.* [1526.]

When Iesus was come downe from the mountayne, moch people folowed him. And lo, ther cam a lepre and worsheped him saynge: Master, if thou wylt thou canst make me clene. He putt forthe his hond and touched him, saynge: I wyll, be clene, and immediatly his leprosie was clensed. And Iesus said vnto him: Se thou tell no man, but go and shewe thy silf to the preste, and offer the gyfte that Moses commaunded to be offred, in witnes to them. When Iesus was entred into Capernaum there cam vnto him a certayne Centurion, besechyng hym and saynge: Master, my servaunt lyeth sicke att home of the palsye, and is grevously payned. And Iesus sayd vnto him: I wyll come and cure him. The Centurion answered and saide: Syr I am not worthy that thou shuldest com vnder the rofe of my housse, but speake the worde only and my servaunt shalbe healed. For y also myselfe am a man vndre power, and have sowdeers vndre me, and y saye to one, go, and he goeth, and to another, come, and he cometh · and to my servaunt, do this, and he doeth it. When Iesus herde these sayngs, he marveyled and said to them that folowed him, Verely y say vnto you, I have not founde so great fayth no, not in Israell.

A GUIDE TO PRONUNCIATION.

KEY TO THE SYMBOLS USED IN THE RESPELLING FOR PRONUNCIATION.

The figures refer to sections in this GUIDE where a full treatment of the sound is given.

ā, as in **āle, fāte, lā'bor, chā'os, chām'ber, pā'tri-ar'chal** (§ 113).
ȧ, ,, ,, **sen'ȧte, pref'ȧce, prel'ȧte, del'i-cȧte, leg'is-lȧ-tive** (§ 124).
â, ,, ,, **câre, shâre, pâr'ent, com-pâre', plow'shâre', beâr, âir** (§ 114).
ă, ,, ,, **ăm, ădd, făt, răn'dom, ăc-cept', re'ăd-mit'** (§ 116).
ă̈, ,, ,, **fi'năl, in'fă̈nt, guid'ă̈nce, val'ĭănt, hus'bănd, mad'ăm** (§ 126).
ȧ, ,, ,, **ärm, fär, fä'ther, mär'tyr, äh, älms, ärt, pälm** (§ 117).
å, ,, ,, **åsk, gråss, dånce,ståff, påth** (§ 119).
a, ,, ,, **so'fȧ, i-de'ȧ, ȧ-bound'** (§ 127).
b, ,, ,, **baby, be, bit, bob, but** (§ 132).
ch, ,, ,, **chair, much**; also for **tch**, as in **match, etch'ing**; for **ti** as in **question**; for **te** as in **righteous** (§ 139).
d, as in **day, den, din, do, dun, did, add'ed**; also for **ed** as in **robbed** (§ 145).
dū: for **du** as in **ver'dure**; for **deu** as in **gran'deur** (§ 250).
ē, as in **ēve, mēte, se-rēne', hē'li-om'e-ter** (§ 149).
ė̄, ,, ,, **ė̄-vent', dė̄-pend', crė̄-ate', so-ci'ė̄-ty, de-lin'ė̄-ate, sė̄-rene'** (§ 156).
ĕ, ,, ,, **ĕnd, mĕt, ĕx-cuse', ĕf-face', car'pĕt, con'dĕm-na'tion** (§ 150).
ė̆, ,, ,, **re'cėnt, de'cėn-cy, pru'dėnce, pen'i-tėnt, nov'ėl** (§ 158).
ē, ,, ,, **ev'ēr, speak'ēr, cin'dēr, pēr-vert', in'fēr-ence** (§ 157).
f, ,, ,, **fill, feel**; for **ph** as in **philosophy, triumph**; for **gh** as in **laugh** (§ 167).
g (always "hard"), as in **go, begin, great, anger**; also for **gu** as in **guard**; for **gue** as in **plague**; for **gh** as in **ghost** (§ 168).
gz: for **x** as in **ex-ist', ex-act', ex-am'ple** (§ 260).
h, as in **hat, hen, hide, hot, hurt, oho** (§ 176).
hw: for **wh** as in **what, why, where** (§ 258).
ī, as in **īce, sīght, in-spīre', jus'ti-fī'a-ble, ī-de'a, bī-ol'o-gy** (§ 179).
ĭ, ,, ,, **ĭll, ad-mĭt', hab'ĭt, dĭ-vide', ĭn-fĭn'ĭ-tīve, pity** (pĭt'ĭ) (§ 181).
j, ,, ,, **joke, jolly** (§ 188); also for "soft" **g**, as in **gem, giant**; for **gi** and **ge** as in **religion, pigeon**; for **di** as in **soldier**; for **dg(e)**, as in **edge, knowledge** (§ 169).
k, as in **keep, kick**, also for "hard" **ch**, as in **chorus, epoch**, for "hard" **c**, as in **cube**; for **ck**, as in **pack**; for **qu** as in **conquer, coquette**; for **que** as in **pique** (§ 191).
ĸ (small capital): for **ch** as in German **ich, ach**, etc. (§ 144).
ks: for **x** as in **vex, exit, perplex, dextrous** (§ 259).
kw: for **qu** as in **queen, quit, quality** (§ 219).
l, as in **late, leg, lip, lot, lull, holly** (§ 193).
m, as in **man, men, mine, mob, mud, hum, hammer** (§ 196).
n (the ordinary sound), as in **no, man, many, manner**; also for **gn** as in **sign** (§ 197).
ŋ (like ng): for **n** before the sound of **k** or "hard" **g**, as in **bank, junction, linger, single, canker** (§ 198).
ɴ (small capital): indicates the nasal tone (as in French or Portuguese) of the preceding vowel, as in **ensemble** (ăɴ'săɴ'bl'), **intrigante** (ăɴ'trē'gäɴt') (§ 60, NOTE 2).
ng, as in **long, sing'er**; also for **ngue**, as in **tongue** (§ 198).
ō, as in **ōld, nōte, rōw, bōld, ō'ver, he'rō. ver'ti-gō, cal'i-cō** (§ 200).
ȯ, ,, ,, **ȯ-bey', tȯ-bac'co a-nat'ȯ-my, prȯ-pose'** (§ 210).
ô, ,, ,, **ôrb, lôrd, ôr'der, law** (lô), **saw** (sô), **all** (ôl) (§ 202).
ŏ, ,, ,, **ŏdd, nŏt, tŏr'rid, fŏr'est, cŏr-pus'cu-lar, hŏr'ror** (§ 204).
ŏ, ,, ,, **cŏn-nect', cŏn-trol', cŏm-bine'** (§ 211).
o͝o, ,, ,, **so͝oft, do͝g, clo͝th** (§ 205).
oi, ,, ,, **oil, nois'y, a-void', re-joice', em-broid'er-y, goi'ter** (§ 212).
o͞o, ,, ,, **fo͞od, mo͞on, fo͞ol, no͞on**; **rude** (ro͞od), **ru'mor** (ro͞o'mẽr) (§ 214).
o͝o, ,, ,, **fo͝ot, wo͝ol, bo͝ok, go͝od, put** (po͝ot), **pull** (po͝ol) (§ 215).
ou, ,, ,, **out, thou, de-vour'** (§ 216).
p, ,, ,, **papa, pen, pin, pop, put** (§ 217).
r, ,, ,, **rap, red, rip, rod, rule, horrid**; also for **rh** as in **rhizopod, rhododendron, rhomboid** (§ 220).
s (always voiceless, or "sharp"), as in **so, this, haste**; also for **c** as in **cell, vice**, for **sc** as in **scene, science**; for **ss** as in **hiss** (§ 225)
sh, as in **she, ship, shop**; also for **ch** as in **machine, chaise, chandelier**, for **ce** as in **ocean**; for **ci** as in **social**; for **sci** as in **conscious**; for **s** as in **sure**; for **se** as in **nauseous**; for **si** as in **pension**; for **ss** as in **issue**, for **ssi** as in **passion**: for **ti** as in **nation** (§ 232).
t, as in **time, talk**, also for **ed** as in **baked, crossed, capped**; for **th** as in **thyme, Thomas** (§ 235).
th (voiceless), as in **thin, through, wealth, worth, breadth, width** (§ 236).
t͟h (voiced): for **th** as in **then, though, this, smooth, breathe** (§ 236).
tū: for **tu** as in **cul'ture, na'ture, pic'ture, ac'tuate** (§ 250).
ū, as in **ūse, pūre, mūte, tūne, lūte, dū'ty, hū'man** (§ 241).
ŭ, ,, ,, **ŭ-nite', for'mŭ-late, mŭ-si'cian, hŭ-mane'** (§ 250).
û, ,, ,, **ûrn, fûrl, con-cûr', her** (hûr), **fern** (fûrn), **fir** (fûr), (§ 247); for Ger. **ö, oe**, as in **schön** (shûn), **Goethe** (gû'tẽ) (§ 212); for Fr. **eu**, as in **jeu** (zhû) (§ 166).
ŭ, as in **ŭp, tŭb, stŭd'y, ŭn'der, ŭp-hill'** (§ 246).
ă̆, ,, ,, **cir'că̆s, cau'că̆s, dā'tă̆m, cir'că̆m-stance** (§ 251).
ü: for German **ü**, as in **grün, Sün'de**, for French **u**, as in **menu** (mė̆-nü') (§ 248).
v, as in **van, vent, vile, vote, revoke, revive**, also for **f** as in **of** (§ 255).
w,,, ,, **want, win, weed, wood** (§ 256).
y, ,, ,, **yard, yet, yellow, beyond** (§ 263).
z, ,, ,, **zone, haze**; also for voiced ("soft") **s**, as in **is, lives, wise, music, ears, figs** (§ 266), for **x** as in **Xenophon, xylography** (§ 261)
zh. for **z** as in **azure**, for **zi** as in **glazier, brazier**, for **s** as in **pleasure, usual**; for **si** as in **vision**; for **ssi** as in **abscission**; for **g** as in **rouge, cortége, genre** (§ 267).
' as in **pardon** (pär'd'n), **eaten** (ēt'n), **evil** (ē'v'l): indicates the elision of a vowel or its reduction to a mere vocal murmur (§ 159).

☞ FOR FULL DISCUSSION OF THE SOUNDS of the language see Section III. of this GUIDE.

☞ For the general distinction between **ā, ē, ō, ū** and **ă, ĕ, ŏ, ŭ**, and between **ă, ĕ, ŏ, ŭ** and **ă̈, ė̆, ȯ, ü**, see § 93

REFERENCES. Numbers following the respelling for pronunciation of some words in the vocabulary refer to sections in this GUIDE.

ACCENTS AND HYPHENS. The principal accent is indicated by a heavy mark (′), and the secondary accent by a lighter mark (′), at the end of the syllable (§ 80). Syllable division is indicated by a light hyphen except where this is replaced by an accent mark, or by a heavier hyphen used to join the members of words written or printed with a hyphen.

When teachers or others desire to indicate PRONUNCIATION WITHOUT RESPELLING, the table below may be used in connection with the one above. This system is, in the main, the same as that given for this purpose in preceding editions of the Dictionary. For indicating PRONUNCIATION BY RESPELLING, however, the table above is complete in itself and is alone used throughout this Dictionary.

The lower table is to be used only when any letter of a word has a sound that is represented in the upper table by a different letter. Thus, in the upper table **s** is used for one sound only, that in **sin** or **so**. To show the **z** sound of **s** (as in **his**) without respelling, the marked **s** (**s̲**) from the lower table should be used,—thus, **hi̲s**. In the lower table, the symbols in parentheses are the equivalent symbols from the upper table.

In digraphs, mark only the letter that is to be regarded as sounded, as in **breāk, brĕad, yiēld, veil**, etc. Silent **e** at the end of a syllable, as in **fate**, etc., need not be marked. **Ce, ci, sci, se, si**, or **ti** before a vowel, and immediately after an accented syllable, usually have the sound of **sh**, and need not be marked. Where desirable, any letter regarded as silent may be shown as an unmarked italic. In a few words, the pronunciation can be indicated only by respelling.

ą (= **ŏ**), ... as in **wąlf, wąm'an, wąl'ver-ine', bąs'om.**
Ọ, ọ (= **o͞o**), ... ,, ,, **ọoze, dọ, whọ, tọmb, re-mọv'al.**
Ȯ, ȯ (= **ŭ**), ... ,, ,, **ȯth'er, sȯn, wel'cȯme, wis'dȯm, can'nȯn.**
ŏ (= **ė̆**), ... ,, ,, **sail'ŏr, mi'nŏr**; or (= **û**), as in **wŏrk, wŏrth.**
Ow, ow (= **ou**), . . ,, ,, **owl, cow'ard, vow'el, al-low', bow'wow'.**
Oy, oy (= **oi**), . . ,, ,, **oys'ter, boy, roy'al, en-joy', an-noy'ance.**
Ụ, ụ (= **o͞o**), ... ,, ,, **rụde, rụ'mor, in-trụde'.**
Ụ̄, ụ̄ (= **o͝o**), ... ,, ,, **fụ̄ll, pụ̄t, pụ̄sh, joy'fụ̄l.**
ȳ (= **ī**), ... ,, ,, **fȳ, skȳ, stȳle, de-fȳ', dȳ'ing.**
Y̆, y̆ (= **ĭ**), ... ,, ,, **ȳt'tri-a, hy̆mn, ly̆r'ic, my̆-thol'o-gy̆.**
ȳ (= **ė̆**) . . . . . ,, ,, **sat'ȳr, mar'tȳr-dom**; or (= **û**), as in **mȳrrh, mȳr'tle** (§ 264).

C, c (= **k**), ... as in **cat, coneur.**
Ç, ç (= **s**), ... ,, ,, **çell, viçe.**
Ch, ch (= **k**), ... ,, ,, **chorus, echo, epoch.**
Çh, çh (= **sh**), ... ,, ,, **çhaise, maçhine.**
G̲, g̲ (= **g**), ... ,, ,, **g̲et, beg̲in, ang̲er.**
Ġ, ġ (= **j**), ... ,, ,, **ġem, enġine.**
dġ (= **j**), ... ,, ,, **edġe, bridġe, badġer.**

s̲ (= **z**), ... as in **i̲s, ha̲s, wi̲sdom.**
x̲ (= **gz**), ... ,, ,, **ex̲-ist', ex̲-am'ple.**
x (**ks**), ... ,, ,, **vex, exit.**
Ph, ph (= **f**), ... ,, ,, **phantom, sylph, sulphur.**
Qu, qu (= **kw**), ... ,, ,, **queen, conquest.**
Wh, wh (= **hw**), ... ,, ,, **when, what.**

A GUIDE TO PRONUNCIATION.

SYNOPSIS OF CONTENTS.

I. Standard of English Pronunciation, §§ 1–10.
II. Phonetic Principles, §§ 11–111.
1. The Organs of Speech, §§ 13–28.
2. Elements of Pronunciation: —
Sounds in Isolation: Breath, § 29; Voice, §§ 30–32, Whisper, § 33; Vowels, §§ 36–48, Consonants, §§ 49–71.
Sounds in Combination Quantity, §§ 73–77; Accent (Stress), §§ 78–87, Relationship between Accent and Vowel Quantity and Quality, §§ 88–93; Glides, § 94, Diphthongs and other Vowel Combinations, §§ 95–100, Consonants in Combination, §§ 101–109, The Syllable, § 110; Characteristics of English Articulation, § 111.
III Elements of Spoken English: The Letters of the Alphabet, §§ 112–269.
IV. List of Common English Words with Weak Forms, § 270.
V. Rules for the Pronunciation of Latin and Greek Words, § 271–274
VI. Rules for the English Pronunciation of Names from the Hebrew, § 275.
VII. Rules for the Syllabic Division of Words in Writing or Print, § 276.
VIII. Synopsis of Words Differently Pronounced, § 277.

I. THE STANDARD OF ENGLISH PRONUNCIATION.

§ 1. RELATIONSHIP BETWEEN WRITTEN AND SPOKEN ENGLISH. In the early periods of English the spelling was substantially phonetic, that is, the written form of a word indicated fairly well its pronunciation. In modern English, however, the spelling of many words is so far from phonetic that it scarcely even suggests the pronunciation. This change in the relationship between the written and the spoken word has resulted from various causes. The spoken form of language is always more changeable than the written form, and changes in pronunciation are only slowly reflected in the spelling. Moreover, since the invention of printing, English spelling has tended to become more and more conventional and fixed, while changes in pronunciation have continued. One has only to call to mind such common words as *busy, bosom, colonel, women, bough, enough, tough, night*, to realize how unphonetic their spelling is with reference to their present pronunciation. Again, the written forms of some words, as *mountain, fountain, evil, devil, often, soften, Christmas, chestnut, handsome, handkerchief*, more nearly phonetic, mislead many persons, who feel that they should speak as they write, into pronunciations that depart from the best usage by making *-tain* rime with *rain, -il* rime with *hill*, by sounding the *t* in *often, Christmas*, etc. In still other words, however,— and they form a large part of our vocabulary — the spelling very well represents the present pronunciation, and now that the use of printed words has become quite as frequent and important as that of spoken ones — with some persons even more so — there is an evident tendency to assimilate the spoken to the written form. This tendency is stronger in America than in England, and to it may be ascribed some of the differences in pronunciation existing between the two countries.

§ 2. CHANGES IN PRONUNCIATION AND HOW THEY ARISE. Our language changes in its pronunciation from generation to generation. The speech of an Englishman of Chaucer's day, could we hear it, would be quite unintelligible to most of us, even those words which had the same, or nearly the same, form as now having in many cases a pronunciation quite different from their present one. The pronunciation of an Elizabethan speaker, or of one of even a still later period, would contain much that would be strange and foreign to our ears. A child learns the main body of his speech by imitating that of the persons with whom he is most intimately associated. Each speech sound is the result of many fine adjustments of the organs of speech, influenced by all the past experiences of the individual, conscious or unconscious, in hearing, thinking, and speaking. Through constant correction and the strong incentives to learn, the difficulties of the child, due to defective perception of sounds, to incomplete and erroneous sound memories, and to imperfect control over the vocal organs, are usually entirely overcome. Imitation is, however, probably never entirely perfect, and the child's speech varies, however slightly, from that of those from whom he takes it. Slight deviations easily pass unheeded, and later become more marked because of failure to throw the organs of speech into exactly the same positions, such failure being due to carelessness, depressed vitality, economy of effort, change of speed in speaking, and other causes. Differences in temperament and of climatic conditions cause differences in pronunciation even of the same individual, some of which may become permanent.

Even minute individual changes would, in the course of several generations, appreciably affect the pronunciation of the language as a whole, but many other causes, such as shifting of population, changes in fashion, increasing refinement of taste, etc., bring about wider divergences. Thus change is constantly going on, both in the separate sounds of the language, and in the words of which it is composed. New forms exist side by side with the old, though usually one of them ultimately supersedes the other. All changes that endanger the true function of language, which is the intelligible expression of ideas, are strongly resisted.

§ 3. ORTHOËPY NOT A FEATURE OF THE EARLIER ENGLISH DICTIONARIES. The earliest dictionaries of our language made no attempt to indicate pronunciations. About the beginning of the eighteenth century, however, works began to appear which indicated the accentuation of words, but went no further except for occasional remarks on orthoëpy. Even Doctor Johnson, whose great dictionary, on its appearance in 1755, became at once the standard, and continued such for many years, considered it unnecessary to do more in this respect. Benjamin Martin, in a small dictionary published in 1749, indicated the number of syllables in the words included, and by the use or omission of a double accent mark indicated many vowels as short or long. James Buchanan, whose small dictionary first appeared in 1757, was probably the first actually to mark the full pronunciations of words. He indicated the syllables, marked the quantity of the vowels, and distinguished the silent letters. From that time the indication of pronunciation has been an essential feature of all dictionaries of English.

§ 4. STANDARD ASSUMED BY THE EARLY ORTHOËPISTS. The early orthoëpists, of whom some of the best-known are Kenrick, Perry, Sheridan, Walker, and Smart, were usually actors or elocutionists who relied mainly upon their own experience, observations, and personal tastes for the establishment of their standards. Each maintained for his work that it represented the pronunciation of the most highly cultured people of London, the literary center of England. Walker, whose dictionary became a popular manual of pronunciation, running through many editions in England and America, took as his avowed standard "a sort of compound ratio of the learned and polite, as well as the bulk of speakers," — which is somewhat indefinite. That the claims of any one of these men to represent the best pronunciations were not always admitted by others is evidenced by the severe criticisms that each received.

§ 5. PRESENT STANDARD OF PRONUNCIATION. Since the establishment of orthoëpy as a feature of English dictionaries, the standard assumed has been considerably changed, and has of necessity been made broader. While usage is still and must always be the standard, it is no longer the usage of a particular locality, since the pronunciation of no one locality can now claim admitted precedence. Nor can the pronunciation of any one person, or group of persons, be taken as a standard, for such pronunciation is in some cases more advanced, in others more archaic, than the average. Orthoëpists of former generations are authorities for the present generation only in so far as their work agrees with good present usage.

The standard of English pronunciation, then, so far as a positive standard may be said to exist, is the usage that now prevails among the educated and cultured people to whom the language is vernacular; or, it might be better to say, the usage that would be most generally approved by them. On some points, it is true, good usage varies, but the pronunciation of cultured persons, wherever English is spoken, is substantially uniform, being marked by comparatively unimportant differences, especially if differences of intonation and emphasis be ignored.

Many common words have certain pronunciations that are universally recognized by the cultured as belonging to the speech of the uneducated or the imperfectly educated, though these same pronunciations may once have been standard. There is a continual though gradual orthoëpic change going on in the language. What to-day is regarded as pedantic, vulgar, or provincial, may, in the course of a generation or two, gain equal recognition with, or even supplant, what is now considered the best usage. Thus, in Queen Anne's time *back'rd* and *for'rd* were the recognized pronunciations of *backward* and *forward*, and the full pronunciations of these words as indicated by the spelling were avoided, but present usage is exactly the reverse. The pronunciation of *ea* as *ā* (*āle*) in such words as *tea, sea, meal*, remained in good use as late as the eighteenth century, but only the pronunciation with *ē* (*ēve*) is now recognized as standard, although the other is still common in dialect, and remains as an exception in good usage in *great, steak*, and *break*.

In the choice of a standard pronunciation the extremes of affected precision or fashion are to be avoided on the one hand, as is all that savors of archaism, ignorance, or slovenliness on the other. Few, even of those who desire to do so, are able entirely to free themselves from local peculiarities, and not many care to make themselves conspicuous by a pronunciation differing too widely from that of those about them. The standard is, therefore, seldom adopted as a whole by any one person.

While we cannot yet hope to fix upon a standard of pronunciation that will be universally accepted, essential uniformity is obviously to be preferred to diversity. There is a constant tendency toward greater uniformity, due to various causes, such as the wider diffusion of education, the interchange of population facilitated by improved means of travel, and the increasing use of modern pronouncing dictionaries, in which substantial agreement is becoming continually more evident.

§ 6. FUNCTION OF A PRONOUNCING DICTIONARY. The function of a pronouncing dictionary is to record as far as possible the pronunciations prevailing in the best present usage, rather than to attempt to dictate what that usage should be. In so far as a dictionary may be known and acknowledged as a faithful recorder and interpreter of such usage, so far and no farther may it be appealed to as an authority.

In the case of diverse usages of extensive prevalence, the dictionary must recognize each of them, preferring that pronunciation which is used by the majority of the well-educated, but it is not required to notice local peculiarities, though it may sometimes do so as a matter of interest, especially in the case of dialect or local words. Nor is it called upon to indicate fine distinctions of sounds used by only a limited number even of educated speakers.

In the vocabulary of the dictionary there is a constantly increasing body of technical terms which, being more often written than spoken, are often called "book words." For many of these no accepted usage can properly be said to exist, and their pronunciations must be determined on the analogies of words more often spoken, or according to the accepted rules of pronunciation for the languages from which they are derived. Again, many words from the modern foreign languages are adopted into English and come into more or less extended use. In such cases the pronunciation sometimes changes rapidly as a word becomes naturalized, and it is often a difficult matter to determine how far usage has given it an English pronunciation. To solve these questions by extended inquiry and comparison is a duty of the dictionary.

Many words no longer in use in the living language are included in the vocabulary of the modern dictionary, because of their occurrence in the standard literature of the past. The pronunciation of such obsolete words offers many difficulties, since in the history of any given word it has frequently varied at different periods, and often even during the same period. In this Dictionary, words which have come down in living use into the modern period have in most cases been given a modern pronunciation only. In the case of words longer obsolete, the accentuation, with the syllabication, has usually been given, when ascertainable; but where this was not the case, or where the accentuation or the number of syllables was known to have been variable, as, for instance, in the case of many words of the Chaucerian period, the pronunciation and indication of the syllabication has usually been omitted. Former pronunciations, or often simply the accentuations, of many important words have been noted in addition to their current pronunciations, as of interest in the study of the earlier periods of English literature, especially with reference to poetry.

A large number of purely dialect words, especially from the various dialects of Great Britain, are now included in the vocabulary of the Dictionary. For such words, the pronunciations which they have in actual dialect use have been indicated as nearly as possible, though no attempt at exhaustive treatment has been made.

§ 7. STYLES OF SPEAKING SUITED TO VARIOUS OCCASIONS. The fact that there are several styles of speaking, any one of which may properly be adopted according to circumstances, further complicates the task of producing a pronouncing dictionary. Professional speakers — actors, clergymen, orators — in the effort to impart great clearness and carrying power to their words cultivate a style of enunciation that would be considered artificial, pedantic, or affected if used in ordinary conversation. Dr. Johnson long ago recognized a double standard, for he says in the grammar prefixed to his dictionary, "They [the writers of English grammar] seem not sufficiently to have considered, that of English, as of all living tongues, there is a double pronunciation, one cursory and colloquial, the other, regular and solemn." There are, in reality, several varieties of speaking style, the differences in which are largely dependent upon the rate of utterance. The most formal speech is that used in public oratory, in the acting of certain parts upon the stage, or upon the most solemn occasions. Training in this style, in which weight is given to nearly every syllable, belongs to the teaching of oratory or elocution. For ordinary public speaking, reading aloud, and careful conversation, a style may be employed which makes the unaccented syllables lighter, allowing the vowels contained in them to turn more often toward the neutral vowel sound, *ẽ* in *ev'ẽr*, or, as in the case of unaccented *ĕ* in *addĕd*, toward the

sound of ĭ in *pĭn*. Whatever standard is taken as a model, it should be remembered that the ordinary speech of cultured people is not "slovenly," if colloquial weakening is not carried too far. The difference between the pronunciation of a word when taken alone and as it occurs in a sentence should also be carefully kept in mind; thus *and* considered alone is *and*, but in such a combination as *bread and butter*, it is ordinarily weakened to *'nd*, or even to *'n*; *a* in the phrase *for a day* becomes *a* (*so'fa*), etc. Cf. Section IV. of this Guide.

Since the Dictionary indicates the pronunciations of words apart from any context, and since the full, distinct sounds of words considered individually are usually carefully taught in the schools, the pronunciations given in the Dictionary are for the most part those of the more deliberate and careful form of speech, but two pronunciations of some common words are indicated, the first being the more careful and precise one, the other that which is more usual in ordinary conversation. Many differences in the pronunciations of particular words as given in the various dictionaries are due to a difference in the choice of style, especially with reference to rate of speaking, adopted as a standard. Some words, when spoken at all, are almost entirely limited to use in formal speech, while others are characteristically colloquial. The same standard is, therefore, evidently not applicable to all the words given in any dictionary.

§ 8. VARIATIONS IN THE VOWEL SOUNDS. Even when the actual usage to be adopted as a standard is determined upon, only approximation to exactness can be attained in its indication. The sounds which must be indicated by the same symbol are often subject to a considerable variation as spoken, not only by members of different communities, but also, frequently, by members of the same community. How much divergence a sound may present and yet be treated as the same sound is a difficult question. The extent to which the subdivision of the sounds of the language has been carried may be seen, for instance, in the Palæotypic Alphabet of A. J. Ellis, which contains some 270 symbols, intended to represent as many different sounds actually in use in English pronunciation. When the sounds of a language are submitted to so minute an analysis, it is not surprising that there should be such variety of opinion among different authorities on pronunciation, and that the same sound should be described in divergent ways. Dr. Ellis himself said of his system: "It is essentially a makeshift scheme, adapted solely to scientific, not popular, use." An elaborate transcription is quite useless for those who have not had a practical training in phonetics, and instead of being an aid leads to confusion. There exist, however, especially in some of the vowel sounds, actual variations in pronunciation (all equally good, or allowable) that are so wide as to require special mention. Such, for example, are the sounds of *o* in *glory* (§ 201), and the *a* in *vary* (§ 115). The vowel sounds indicated in marking pronunciations are rarely invariable; what is marked in any case is the average or typical sound, around which the one actually spoken may vary according to conditions. Sounds vary somewhat with locality, with the personal preference of the speaker, with changes in the surrounding sounds, and with the style and rate of utterance. Each element undergoes variation as conjoined with this or that other element in a syllable, a word, or a phrase. The *ū* in *ūse*, *mūsic*, *tūne*, *lūte* (§ 242) affords an instance of such variation, as does also the sound of *k*. We do not, for instance, usually distinguish between the *k* sounds in *key* and *call*, though they are made with quite different positions of the tongue (§ 191).

Differences in accent (stress), pitch, and intonation, make differences in the pronunciation of the separate sounds. The same word in varying relations to accent, emphasis, and feeling, varies by shades of sound incapable of notation. As Sir Henry Irving has said, "You can not stereotype the expression of emotion; . . . the speaker who is sounding the gamut of human feeling will not be restricted in his pronunciation by dictionary rule." In the case of unaccented syllables, there is often in the vowels an obscurity and uncertainty, a lack of uniformity in usage, and an allowable and proper variation according as the utterance is quite rapid, or more or less deliberate, and these sounds are therefore peculiarly difficult to define and describe precisely. The proper medium must be sought between the indiscriminating mode of speech which reduces all such vowels to the same neutral sound at all times, and on the other hand a pedantic and affected precision which deprives the syllables of their proper character as unaccented. By employing the italic letters *ă*, *ĕ*, *ŏ*, *ŭ* (§ 93), for the short vowels of unaccented syllables, it is possible to indicate, in a very large number of words, both the more formal pronunciation, and at the same time its colloquial modification.

§ 9. DIFFICULTIES INVOLVED IN THE CHOICE OF KEY WORDS. The practical means at command for identifying the sounds intended to be represented by the symbols adopted are unavoidably imperfect. It is impossible, in the case of some of our vowel sounds, to select for an example, or key word, any word not subject to considerable diversity of pronunciation. Yet such key words must be for a long time to come the chief means of identification to be employed. A description of the positions and motions of the vocal organs in uttering the various speech sounds furnishes a further means of identification. But this method also is beset with difficulties. The vocal organs are mostly out of sight during speech, and though diagrams and artificial devices help to make clear the various positions which they assume in the utterance of different sounds, still the sense of feeling in the organs themselves must be cultivated in order that these positions may be fully understood. Moreover, in this, as in every method, there is required a discriminating ear for the sounds of speech, which, like an ear for music, may be wanting. A practical mastery of sounds implies the power to recognize them by the ear whether pronounced by the same voice or by different voices, and to utter them accurately and without hesitation. Since no single method is entirely adequate, the best results are to be gained by combining different methods and making one supplement the deficiencies of another.

§ 10. POLICY OF THE INTERNATIONAL WITH REGARD TO PRONUNCIATIONS AND SYMBOLS MAINTAINED. For the present as for the previous editions of the Dictionary, thorough endeavor has been made to ascertain the actual current usage which may properly be taken as the standard of correct pronunciation, whether in America or in England. The words in the vocabulary have been marked in accordance with what is believed to be the pronunciation most generally approved at the present time by well-educated people in the two countries. In cases of difference between American and British usage, or of divided usage in either country, and especially in cases of disagreement among authorities, there has been added a reference to the article in this *Guide to Pronunciation* treating of such differences or disagreement, or else to the *Synopsis of Words Differently Pronounced by Different Orthoepists*, forming Section VIII. of this *Guide*.

The pronunciation recorded for each word in the vocabulary has been adopted only after comparison with all the leading modern authorities. Assistance of the greatest value has been received from many teachers, scientists, scholars, and public speakers, some of whom have answered questions regarding specific words, while others have given their opinion as to the pronunciation of a long list of words and of classes of words with disputed pronunciations. In cases of unsettled but nearly evenly divided usage, the alternative pronunciations are indicated. The simple phonetic symbols of the International have been retained with but little change. These have met with almost universal approval, as shown by their use in many other reference books, in encyclopedias, Bibles, atlases, etc., and above all in the school text books. They are, therefore, familiar to all persons that have been educated in the public schools, and can be used with little expenditure of time and effort. It did not seem desirable to discard such a system in favor of any one of the several phonetic alphabets proposed for special purposes or known to only a few scholars or students, none of which has met with a general acceptance.

II. PHONETIC PRINCIPLES.

§ 11. PHONETICS is the branch of Acoustics (Science of Sound) which treats particularly of SPEECH SOUNDS; — how they are produced, what acoustic effects they have upon the ear, how they act and react upon one another when in combination. It is now often treated by itself, and defined as the Science of Speech Sounds. While it is impossible thoroughly to understand the sounds of a language without some knowledge of the principles of phonetics, only those principles which are essential to a correct understanding of current English pronunciation will be considered here.

§ 12. Speech sounds are now studied and classified chiefly with reference to their physiological or organic formation, though consideration is also given to their effect upon the ear, since each variation in organic formation usually causes a corresponding difference in acoustic effect. In the early attempts at phonetic analysis, only the audible effects of sounds were considered, which accounts for such terms as "hard," "soft," "broad," "flat," etc., which are now replaced in part by a more scientific terminology.

1. THE ORGANS OF SPEECH.

§ 13. The physical basis of speech is the BREATH. In order to produce articulate sounds, the current of breath must be variously modified in the throat and mouth.

§ 14. Speech sounds are usually produced with expiration of the breath; very rarely with inspiration. Examples of the few sounds produced with inspiration are the exclamation often used to indicate sudden fear or pain, the sound imitative of sipping, sometimes used to indicate pleasurable anticipation, etc. Sounds are sometimes made in the mouth without either expiration or inspiration of air. Such are the click, or cluck, used in urging on a horse, the exclamation written "*tut*," etc. Sounds thus made are rare with us, and hardly to be classed as speech sounds at all, though common elements in some languages. See CLICK, *n.*, 3, in the *Vocabulary*.

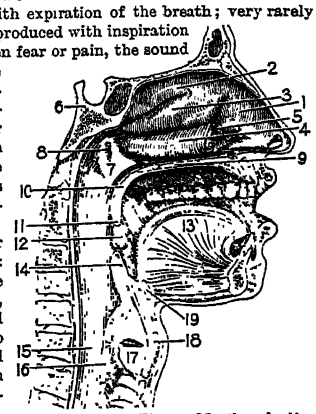

Fig 1. Section of Human Mouth and adjacent Structures. 1 Interior of Nasal Fossa; 2, 3, 4 Superior, Middle, and Inferior Turbinated Bones; 5 Opening of Nasal Duct; 6 Sphenoid Bone; 7 Interior of Pharynx; 8 Opening of Eustachian Tube; 9 Hard Palate; 10 Soft Palate; 11 Uvula; 12 Tonsil; 13 Tongue; 14 Epiglottis; 15 Interior of Esophagus; 16 Cricoid Cartilage; 17 Interior of Larynx; 18 Thyroid Cartilage; 19 Hyoid Bone.

§ 15. The chief ORGANS OF SPEECH, or VOCAL ORGANS, in the widest sense, include: the DIAPHRAGM, or MIDRIFF; the LUNGS; the LARYNX, including the GLOTTIS; the MOUTH, with the TONGUE, TEETH, and PALATE; and the NOSE. The most important speech organs to be considered for the present purpose lie in and above the larynx, are comparatively simple in their structure, and open to inspection. An ordinary hand mirror is of help in studying them.

§ 16. The breath, exhaled from the lungs through the action of the diaphragm, or of the thorax, passes through the windpipe, or trachea, into the larynx—which is the upper, enlarged end of the windpipe, forming in men the projection in the throat familiarly called the Adam's apple. The windpipe has the power to vary somewhat its length and caliber, and to assume different degrees of tension. The larynx is held firmly in place by two sets of muscles. It rises and falls over a space of about half an inch in the production of different speech sounds, as can often be felt by placing the finger upon the projection in the throat while speaking or whispering different vowels.

§ 17. Across the interior of the larynx are the VOCAL CORDS (called also *vocal bands* and *vocal lips*), formed by the free median edges of two elastic ligaments covered with thin and closely adherent mucous membrane, the whole forming two folds in the mucous membrane of the glottis. The term "cord" as commonly used is misleading, in that it often gives the erroneous idea that these cushionlike folds are simply vibrating "strings," like those, for instance, of a violin. For this reason the term "Vocal Lips," though not so common, serves better to keep a true picture of the folds before the mind. The ligaments within the folds are firmly attached to the walls of the larynx in front, while at the back each is attached to an adjusting cartilage, the ARYTENOID. At every other point they are free, though, of course, owing to the covering of mucous membrane by which each is surrounded, the only opening is in the middle, between the folds. This wedge-shaped opening (with apex in front) which is included between the vocal cords (or vocal lips), and which extends also between the two arytenoids, is the GLOTTIS (*glottal chink*). The glottis can be opened, narrowed, or closed, at pleasure, through the action of the muscles controlling the arytenoids, or adjusting cartilages.

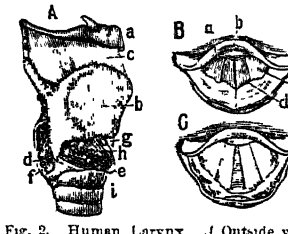

Fig. 2. Human Larynx. *A* Outside view from the right. *a* Hyoid Bone, *b* Thyroid Cartilage; *c* Thyrohyoid Ligament, *d* Lower Horn of Thyroid articulating with Cricoid Cartilage; *e*, *f* Cricoid Cartilage; *g* Cricothyroid Membrane; *h* Cricothyroid Muscle, which pulls the Cricoid and Thyroid Cartilages together in front and stretches the Vocal Cords; *i* The three upper Cartilaginous Rings of the Trachea.
B View from above, as seen by the aid of the laryngoscope while the voice is being produced. *a* Root of Tongue; *b* Epiglottis, very much foreshortened; *c* False Vocal Cords, or Folds of Mucous Membrane, above the Vocal Cords, *d*.
C Similar view when no voice is being produced.

§ 18. In ordinary breathing or in sighing the glottis is open. In blowing hard it is open to its fullest extent. In clearing the throat and in coughing the vocal cords (or lips) are pressed closely together, the breath is stopped momentarily, and then bursts through the closure. In hiccuping the glottis is suddenly closed, with inspiration of the breath.

§ 19. As is shown above (§ 17) the glottis consists of two parts; — the opening between the vocal cords, the CORD GLOTTIS (GLOTTIS PROPER, or VOICE GLOTTIS), constituting about two thirds of the whole; and the opening between the arytenoid cartilages, the CARTILAGE, or WHISPERING, GLOTTIS. The two divisions of the glottis can be narrowed or closed independently. The vocal cords can also be lengthened or shortened, tightened or relaxed, in various degrees, through their elasticity and the perfect mechanism supplied by the cartilages of the larynx and the muscles controlling them. They are of different lengths in men, women, and children, which accounts for the different pitch of voices. In men the cords average a trifle more than half an inch in length, the whole glottis being nearly an inch.

§ 20. Above the glottis is the UPPER, or FALSE, GLOTTIS, formed by the VENTRICULAR BANDS, or FALSE VOCAL CORDS, which are the lower extremities of two mem-

branous folds, one on each side, forming the upper edges of two little pockets, or ventricles, of which the lower edges are formed by the vocal cords. By means of the ventricular bands the passage may be narrowed, independently of the true glottis.

§ 21. Over the upper opening of the larynx is the EPIGLOTTIS, an elastic cartilage forming a sort of lid, or valve, by means of which the opening can be closed, to prevent food from entering the windpipe. The larynx may thus be closed without closing the glottis.

§ 22. Between the larynx and the mouth the passage widens, and the cavity here formed is a sort of antechamber to the mouth, being continuous below with the esophagus and above with the nasal passage, the Eustachian tubes (small passages extending to the tympanum of each ear), and the mouth. This cavity is called the PHARYNX. It can be expanded and contracted in various ways. The narrowed passage from the pharynx into the mouth is the FAUCES.

§ 23. The pharynx, the mouth passage, and the nasal passage, taken together are called the DELTA.

§ 24. The roof of the mouth is called the PALATE; its back part is the SOFT PALATE, and its front part the HARD PALATE. The boundary between them can easily be found with the finger, and the whole may easily be seen with the aid of a hand mirror. The soft palate (*velum palati*, "veil of the palate"), hangs like a "veil," or curtain, over the root of the tongue. It is muscular and can be lengthened or shortened at will. The fleshy, pendent lobe, shaped somewhat like a grape, in which it ends is the UVULA (Lat. *uva*, a grape). The uvula acts as a sort of switch, which through its muscular action directs the breath or voice through the oral or the nasal passage at will. In all sounds that are not nasal the soft palate is pressed back so as to close the passage into the nose. When the pressure is relaxed the breath flows entirely or partially through the nose, as in breathing and in the formation of nasal sounds such as **m**, **n**, the French nasal in **bon**, etc. Cf. §§ 59–60.

§ 25. We distinguish the FRONT of the mouth, extending forward from the boundary between the hard and the soft palate, and the BACK, extending backward from the same boundary. The size and shape of the oral cavity can be regulated by movements of the tongue and jaw, while the size and shape of its openings can be varied by adjustment of the lips, soft palate, epiglottis, etc.

§ 26. The TONGUE may, for convenience in describing sounds, be divided into the BACK, or root; the FRONT, which includes the middle and part just in front of the middle; the BLADE, or part just behind the tip; and the POINT, or tip. The tongue acts as a movable and flexible plug, by means of which the cavity of the mouth can be entirely closed at any point, or its configuration modified in an infinite number of ways.

§ 27. The ALVEOLAR RIDGE is the slight ridge formed just behind the back of the teeth by the gums covering the alveolars, or tooth sockets.

§ 28. The TEETH play an important part in articulation, as do also the LIPS. Many sounds are modified by lip movement, and the various degrees of lip action form distinguishing characteristics of various languages, as, for instance, French and German (§ 111).

2. THE ELEMENTS OF PRONUNCIATION.

SOUNDS IN ISOLATION.

§ 29. BREATH and VOICE. It has already been stated (§ 18) that in ordinary free breathing the glottis is wide open. The breath from the lungs passes through the glottis without producing any sound other than that caused by its slight friction against the sides of the throat and mouth passages. A sound produced by the breath alone, without any action of the vocal cords, other than a slight tensing, is called a *breath sound*, or *breath*. The simplest breath sound forming an element of speech is the aspirate, **h**. It will be seen below, under Consonants, how the breath may be stopped and otherwise modified *after* it has passed through the glottis, forming more complicated breath sounds, but the *open glottis* with no vibration of the vocal cords is characteristic of all such sounds, which are therefore said to be *voiceless*, *breathed*, *surd*, or *nonvocal*. Such are the sounds represented by **p**, **t**, **k**, **f**, etc.

§ 30. If, however, the vocal cords (or vocal lips) are closed so tightly that the breath must force them apart, passing through in an extremely rapid series of puffs, we have *voice*, or vocal tone. In producing voice, the vocal cords (or vocal lips) do not vibrate like strings nor like thin membranes that swing in the breath current and set the air in vibration, as often formerly supposed, but like two cushions, or pads, which by alternate compression and relaxation close and open the slit between them, the larynx thus emitting puffs of air, as a siren does, with sufficient rapidity to make a tone. The pitch of this tone depends on the rapidity with which the puffs follow one another; its quality, or timbre, depends upon their form. The puffs of air may be very brief and may be separated by comparatively long intervals of rest, or they may be of smoother form, even resembling the vibrations of a tuning fork. "Voice" may be observed by pronouncing any vowel, or by alternating the sounds of *s* (voiceless) and *z* (voiced) [sz sz sz, etc.]. The effect is heightened by stopping the ears with the fingers. The vibration may also be felt by placing the thumb and forefinger on opposite sides of the "Adam's apple," or by pressing the palm of the hand upon the top of the head. A sound made with voice is called a *voiced*, or *sonant*, sound. All the vowels, and such consonants as **b**, **d**, **g**, etc., are voiced.

§ 31. The terms "chest voice," "head voice," etc., indicate common misconceptions. No sound is produced in the chest or in the head. *All* voice sound is produced at the glottis, though it is variously *modified* elsewhere, chiefly by different conformations of the vocal organs above the glottis. The voice may be given an added resonance by allowing it to pass wholly, or in part, through the nasal cavity, and may apparently be somewhat modified in quality by action of the chest as a sounding board. The ventriloquist may modify his voice in various ways by abnormal action of the throat, diaphragm, etc., and by skillful suggestion make the imagination of his hearers aid in their own deception, but all the actual voice that he produces comes from his larynx.

§ 32. The larynx is thus seen to contain the organ of voice, which is composed of the vocal cords (or vocal lips), together with the adjusting cartilages and muscles. The larynx has been called the "*voice box*," which, though rather fanciful, may serve to make a more vivid mental picture of it for some. The oral cavities above the larynx are adjusted in a certain way for each vowel or consonant sound, which is thus "articulated" or given its characteristic quality. The breath from the larynx, either voiced or voiceless, striking the cavities as thus adjusted produces the various sounds of speech.

NOTE. Inability to speak and defects of voice are seldom found to arise from any fault or weakness in the vocal cords. Those born deaf are mute because speech is learned chiefly through imitation of sound impressions received through the ear. In hearing persons most vocal defects are due to faulty breathing and imperfect articulation.

§ 33. WHISPER, which next to voice is the most important production of the vocal cords, is produced by bringing the cords close enough together to cause decided friction of the breath against them, but no vibration. The weak whisper is produced by narrowing the whole glottis, the strong whisper by closing the cord glottis altogether, so that the breath passes through the cartilage glottis only (§ 19). The exaggerated "stage" whisper is the strong whisper accompanied by contraction of the upper, or false, glottis (§ 20), and, sometimes, by depression of the epiglottis (§ 21). In whisper, we have tones such as come from a flute or an organ pipe so badly blown that the instrument refuses to speak, but still gives out windy tones of recognizable degrees of pitch. In whispering, as opposed to speaking aloud, breathed sounds, as **f**, **k**, **t**, etc., remain unchanged, while sounds like **v**, **b**, **d**, etc., that are voiced in speech, are uttered with the glottis contracted, but not sufficiently so to produce voice.

§ 34. GLOTTAL STOP. When the breath in passing through the glottis is checked by a sudden contraction of the cords, a percussive effect is produced analogous to that heard when the breath is checked in the mouth in the articulation of **p**, **b**, or **k**. This is called the *glottal stop* or *glottal catch*. An ordinary cough, or the "grunt" often accompanying a push or a pull, are familiar examples of a sound formed in this way, but as occurring in speech the glottal stop is much less vigorous. The glottal stop is not usually noticed as an element of English speech, but is heard in certain languages and dialects, as in North German, Danish, etc.

§ 35. VOICE CHANNEL. The passage by which the breath or voice issues from the larynx to the open air is called the *voice channel*. It consists most often of the pharynx and the mouth, but its upper part may be the nasal passage, or it may be divided so that the whole delta is employed.

VOWELS.

§ 36. VOWELS are the open, sonorous sounds of a language, formed by the modifications of the voice, or vocal tone (§ 30) in the oral cavity, but without the audible friction or stoppage which characterizes a consonant (§ 49). For each distinct vowel sound there is a definite configuration of the oral passage, which assumes various forms through different adjustments of the flexible and movable parts of the mouth; namely, the *tongue*, *soft palate*, *lower jaw*, *lips*, *cheeks*, and the walls of the *pharynx*. The nasal vowels, as in French, add a resonance in the nasal passage, but no English vowel should ordinarily be nasalized (§ 60).

§ 37. The terms *vowel* and *consonant* are commonly used with two meanings: (*a*) to designate the chief sounds of which a language is composed, and (*b*) to designate the written letters which represent these sounds. Unless this double meaning is kept in mind, confusion will arise, the liability to which is increased by the fact that the letters of the alphabet are given names which in most cases do not represent the sounds which the letters represent. In this discussion, unless otherwise indicated, it is the *sound* itself that is meant in any case.

VIEWS OF THE VOCAL ORGANS (THE RIGHT HALF) IN VOWEL POSITIONS.

The positions are somewhat exaggerated.

1 **Hard Palate.** 2 **Soft Palate.** 3 4 **Back Wall** of the **Pharynx.** 5 **Tongue.** 6 **Tongue, or Hyoid, Bone.** 7 Right **Vocal Cord,** below; right **False Vocal Cord,** above; both attached to the **Thyroid Cartilage** in front, and to the right **Arytenoid Cartilage** behind. 8 **Fold,** extended from the border of the right half of the **Epiglottis** in front to the right **Arytenoid Cartilage** behind; back of which is shown, in cross section, the **Transverse Muscle** that runs from the right to the left **Arytenoid.** 9 **Cricoid Cartilage.** 10 **Windpipe.** 11 **Esophagus.** C **Place of Constriction.**

The Thyroid Cartilage extends back in two broad plates, one on each side; each one hinged, or pivoted, at a point on the outside and near the bottom of the Cricoid. The Thyroid thus serves as a lever for stretching or relaxing the Vocal Cords. The Tongue Bone extends back in two branches above the Thyroid plates. Each Arytenoid is a pyramid with a triangular base, of which the outer angle (not seen in the illustration) rests upon the Cricoid, while to the inner front angle is attached the end of a Vocal Ligament, and the inner angle in the rear is held fast to the Cricoid by a short ligament. The Arytenoids serve as levers for moving and adjusting the Vocal Cords. When the Cords are brought close together the passage between the Cartilages may either remain open or be closed: closed by the joining, and opened by the disjoining, of their front edges from the bottom to the top, — the Transverse Muscle barring the way behind at all times. The False Vocal Cords have no direct agency in phonation.

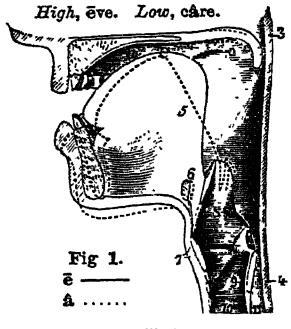

Fig 1.
ē ——
ȧ .....

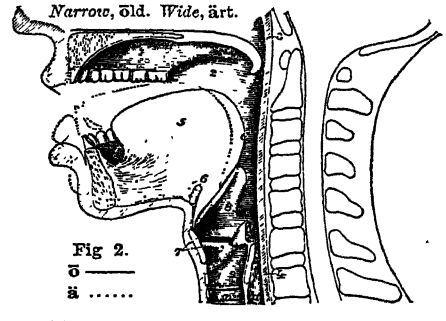

Fig 2.
ō ——
ä .....

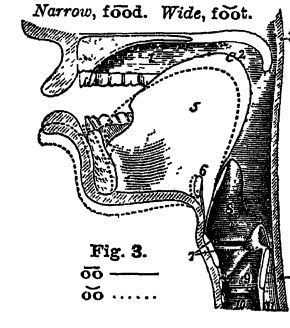

Fig. 3.
o͞o ——
o͝o .....

On Fig. 1, ā (āle) would have an intermediate position, while ō (ōrb) and ŏ (nŏt) would have positions slightly lower than those shown in Fig. 2.

§ 38. The audibility of language depends largely upon the vowels. Those languages, as Italian, in which vowel sounds occur most frequently as compared with consonants are the most musical.

§ 39. The classification of the vowels which is here presented has for its basis the manner and place of their formation by the vocal organs, and agrees, in the terminology and in the main features of the analysis, with the system of Alexander Melville Bell, especially as modified by Henry Sweet. In the study of the different vowel sounds it often helps the student if he merely whispers them; after a time he will be able to recognize them by the muscular sensations associated with their formation.

§ 40. RESONANCE. VOWEL CHAMBERS. Resonance is the augmentation of sound by the sympathetic vibration of some body other than that by which it is originated, such sympathetic vibration being in unison either with the fundamental tone or with one of its overtones. Thus, a violin string vibrating in free air has but a feeble sound, but when it vibrates over the sounding box of the instrument its sound is much stronger. Resonance may determine the ultimate quality and pitch of a sound, in many wind instruments, as the flute, or the pipes of an organ, the pitch of the tone is chiefly determined by the shape and size of the resonance cavity or tube. The more elastic a resonating body is, the more readily is it set in vibration by sound waves from another body, and the stronger is the reinforcement or the modification of the resultant sound. The air inclosed within a limited space is especially well adapted for such modification of sounds. Such a space with its inclosed column of air forms a *resonance chamber*. The air-filled oral cavity as adjusted for a particular vowel sound (§ 36) is such a resonance chamber, and is commonly called the *vowel chamber* for that sound. By its size and shape the vowel chamber gives to its vowel the particular tone or quality by which it is chiefly recognized. A vowel sound, therefore, consists of vocal tone, that is, a series of explosive puffs of air from the glottis (§ 30), acting on the oral cavity as adjusted for that vowel. This oral cavity is not simple, but consists of a complicated system of cavities (the larynx, pharynx, mouth, and nose), with variable shapes, sizes, and openings. The effect of the vocal tone on each of these component cavities is, first to arouse in it a vibration with a period depending on the cavity, and secondly, to force on it a vibration of the same period as that of the vocal tone. The prevalence of one of these factors over the other depends on the form of the puffs, the walls of the cavity, etc. The "overtone theory" of Helmholtz and others supposed that the vocal cavities act like metallic resonators to reinforce certain overtones of the glottal tone; but these cavities have soft, or only moderately hard, walls lined with moist membrane, and cannot act like metallic resonators. Also, as shown by recent investigations in experimental phonetics, the tones of the oral cavity do not necessarily coincide with the harmonic overtones of the laryngeal tones. The whole cavity is adjusted to certain tones for each vowel; the puffs from the larynx strike the cavity as thus adjusted, and bring forth these tones. Each puff of voice striking a component cavity produces a vibration the period of which is that of the cavity; the periods of these vibrations may stand in any relation to the interval at which the puffs come, that is, to the fundamental tone. Each vowel sound may have its pitch raised or lowered by adjustment of the vocal cords (or vocal lips) and any vowel may be spoken or sung at this pitch. But each vowel has, besides this, an oral pitch of its own, due to the size and shape of its vowel chamber. Thus, in speaking aloud or in singing, the voice may be pitched higher or lower at pleasure, carrying with it all the while, for any individual vowel, the characteristic tone of the oral cavity as adjusted for that vowel. Thus, if ē, ä, o͞o are all sung on the same note, ē will have the highest oral pitch, ä the next highest, and o͞o the lowest.

NOTE. The vowel chamber necessary to give the distinctive quality to a vowel sound may be formed in mouths of different sizes by lowering or raising the tongue, shifting it backward or forward, and increasing or decreasing the mouth aperture, and it is by such compensations that the child in learning to speak is able to adapt his mouth in such a way as to produce the same oral tones and hence the same vowel sounds as the adult, and that adults with mouths of varying size and shape are able so to adjust them as to produce the vowel sounds of their language.

§ 41. The chief organ employed in changing the various configurations of the mouth to produce different sounds is the *tongue* (§ 26). The number of possible vowel sounds is very great, since even a slight change in the position of tongue and lips will change the form of the oral cavity (vowel chamber) and thus produce a different vowel. But the ear cannot ordinarily recognize such slight variations of sound as often mark vowels even of quite different formations. Also, some vowel sounds are clearer and of pleasanter sound than others. Hence, in each language, certain typical vowel sounds have been fixed upon, usually by unconscious evolution, as being the clearest or the most easily distinguished one from another. A certain amount of variation from these type vowels is negligible, while still greater variations produce vowels which, while they may be classed as the same sounds if the variations are not too great, are still enough different from the standard sounds to be considered dialect variations (§ 8). During speech, the tongue never occupies exactly the same position for an appreciable period of time. In the production of any of the typical speech sounds of a language, its movement is, however, momentarily confined within a certain range so small that its position while limited to this range may be regarded as fixed. In producing a group of speech elements it passes with a rapid gliding movement from the main position for one element through a variety of positions to that which produces the typical, or characteristic, portion of the next element (§ 94).

§ 42. In the formation of a vowel chamber, there is in every instance a PLACE OF CONSTRICTION made by a more or less close approximation of some part of the tongue to the hard or the soft palate, and vowels are accordingly classified as: (1) BACK VOWELS (otherwise called *guttural*, or *velar*, *vowels*) when the place of constriction is between the *back*, or root, of the tongue and the soft palate, as in oo (po͞ol), ä (ärm); (2) FRONT VOWELS (or *palatal vowels*) when it is between the *front* of the tongue and the hard palate, as in ē (ēve); (3) MIXED VOWELS, in which neither front nor back articulation predominates, as in û (fûr), ĕ (mak′ĕr). In the formation of the *back vowels*, the root of the tongue is elevated or bunched up under the soft palate, partly by retraction of the entire tongue, and partly by pressing down its fore part. In the formation of the *front vowels*, the tongue is massed in the front of the mouth, its front is raised toward the hard palate, and its main body slopes backward, and more or less downward. In the formation of the *mixed vowels*, the tongue sinks into its neutral flattened shape, and in the formation of some of them at least there is a slight sinking in the middle.

§ 43. HEIGHT. The vertical movements of the tongue, which are generally accompanied by lowering and raising of the lower jaw, produce various degrees of "height," or distance of the tongue from the palate at the place of constriction. Thus, in ē (ēve) the front of the tongue is raised as high and as close to the hard palate as is possible without causing more or less audible friction (which would change it into a consonant, as into a variety of y as in you); in ă (măn), it is much lowered; in ĕ (yĕt), it is in a position about midway between those for ē and ă.

§ 44. According to the height of the tongue in pronouncing them, vowels are classified as HIGH, MID, and LOW. Thus, ē (ēve) is a "high-front" vowel; ĕ (mĕn) a "mid-front" vowel; ă (măn) a "low-front" vowel. There are, of course, other degrees of height, as the tongue is raised or lowered by imperceptible degrees, but this subdivision is sufficient to identify all the chief vowels. These distinctions of height apply equally to *back* and *mixed* vowels, and we thus have altogether nine cardinal vowel positions: three back, three mixed, and three front.

§ 45. NARROW and WIDE. Vowels may be further classified in pairs having the same or very nearly the same tongue position. The vowels in each pair are usually distinguished from each other by a difference in quality, one being clear and sharp, the other less so. This difference depends mainly upon the tenseness or laxness of the tongue. Usually in the case of the clearer vowel that part of the tongue which gives character to the sound is tense and convex, *narrowing* the passage, while in the formation of the duller ones, though at the same or nearly the same height, it is relaxed and flattened, leaving the passage *wider*. Vowels in such pairs are therefore distinguished as NARROW and WIDE, or, otherwise, as TENSE and LAX. In the front wide vowels, the tongue is not pressed quite so far forward as for the narrow ones; in the back wide ones it is not drawn quite so far back as for the back narrow ones. The lip-rounding of the back vowels is greater in the case of the narrow than the wide. In uttering the narrow back vowels (o͞o, o͝o, ô, etc.) there is felt, in addition to the tenseness and convexity of the tongue, a tenseness and drawing down of the soft palate. Sometimes the clearer vowel is formed simply with a little higher tongue position than the other, and such a pair are often distinguished as close and open; but these terms are also used to distinguish vowels of different "heights," as o͝o and ô, ă and â, and hence they are wanting in exactness. Instead of the terms "narrow" and "wide," "primary" and "secondary" are used by some. NARROW and WIDE are used in this discussion to distinguish all such pairs of vowels as are here described; ē, ā, â, o͞o, ô, are examples of *narrow* vowels, ĭ, ĕ, ă, o͝o, ŏ, being the corresponding *wide* ones. There are many intermediate degrees of "narrow" and "wide," which for practical purposes need not be considered. In naming the vowels according to this system *height* comes first, then *place*, followed by *width*; thus, ē (ēve) is "high-front-narrow," ĭ (ĭll) is "high-front-wide," etc. In the English vowel system, there is a corresponding wide vowel for each of the narrow front vowels, and for each of the narrow back vowels, as shown in the table, § 48.

§ 46. ROUNDING. In the pronunciation of some vowels, as o͝o and o͝o, the mouth opening is narrowed by drawing together, or pursing, the lips. This is called *rounding*, and the vowel is said to be *rounded*, or *labialized*. In a vigorous pronunciation there is often considerable protrusion of the lips, which intensifies the effect of rounding. In English pronunciation, however, there is seldom protrusion, but the same acoustic effect may be produced by lateral compression of the corners of the mouth, or the diminished lip-rounding may often be compensated by increased retraction of the tongue, which lowers the pitch of the vowel chamber, as rounding does. Rounding is especially characteristic of the back vowels (o͝o, o͝o, etc.), to which it adds clearness and pleasantness of character. This may be tested by trying to "unround" the o͝o as in fo͝od, that is, to speak it with the lips flat and extended, without changing the tongue position. The front vowels are usually made with an elongated opening of the lips. Rounded front vowels do not occur in the regular pronunciation of English. Rounded vowels have different *degrees* of rounding according to their height; the high vowels, as o͝o (fo͝od), having the narrowest, the low, as ô (ôrb), having the widest, lip opening.

§ 47. On the basis of height and horizontal position, there are, as already seen (§ 44), nine cardinal vowel positions, as follows:

high-back	high-mixed	high-front
mid-back	mid-mixed	mid-front
low-back	low-mixed	low-front

As each of the vowels occurring in these positions may be narrow or wide, and rounded or not rounded, the combination of the four elements (height, horizontal position, width, and rounding) gives 25 primary vowels as shown in the following table. Not all of these vowels occur in modern English. The front vowels are evidently the easiest to analyze, as the front of the tongue is free, and its movements are easily felt and seen; phoneticians therefore agree closely in the analysis of these vowels, while there is some disagreement in the analysis of the mixed and back vowels (except the two high backs o͞o as in fo͞od and o͝o as in fo͝ot, in the formation of which the tongue's movements are the most easily felt). The diphthongs (§§ 95–8), being composed of two elements, cannot be tabulated in the position of either. The ȧ as in ȧsk, etc., and the obscured sounds, as *ă* in finăl, *ĕ* in momĕnt, ȧ in senȧte, etc, being variable according to different styles of speech (§ 7), are also omitted. Further, it should be remembered that many of the English vowels (in addition to the usually recognized diphthongs) are *not simple sounds*, and the positions of some of them are shifted slightly forward or backward, upward or downward, from the main positions here shown. The Visible Speech system of Bell has been made more comprehensive by Dr Sweet (Organic system), who has invented a number of "modifiers," which, attached to the main symbols, indicate a position somewhat higher or lower, further forward or further back. A full description will be found in his *Primer of Phonetics*, third edition, Oxford, 1906. A FULL DISCUSSION of each VOWEL and DIPHTHONG as it occurs in actual pronunciation will be found in the ELEMENTS OF SPOKEN ENGLISH, Section III. of this Guide.

NARROW.			WIDE.		
high-back	high-mixed	high-front ēve	high-back	high-mixed	high-front ĭt
mid-back	mid-mixed ŭp	mid-front āle	mid-back ärt	mid-mixed ĕvĕr	mid-front mĕn
low-back	low-mixed ûrn	low-front câre	low-back	low-mixed	low-front măn
NARROW-ROUND			**WIDE-ROUND.**		
high-back fo͞o͞d	high-mixed	high-front Fr. menü	high-back bo͝ok	high-mixed	high-front
mid-back o͞ld	mid-mixed	mid-front	mid-back o͝bey	mid-mixed	mid-front
low-back ôrb	low-mixed	low-front	low-back ŏdd	low-mixed	low-front

§ 48. The "chess-board" arrangement, as in the above table, while most convenient for tabulating the vowels, does not show the actual shifting of the tongue and jaw in passing from one position to another. Actually, they are drawn slightly *backward* as well as *downward* in passing from the high-front to the low-front position, and *forward* as well as *downward* in passing from the high-back to the low-back position, as shown in the following table: —

	Back.	Mixed.	Front.	
High	o͞o (fo͞od) o͝o (fo͝ot)		ē (ēve) ĭ (ĭll)	High
Mid	ŏ (old) ă (ärt)	ĕ (evĕr) ŭ (ŭp)	ā (āle) ĕ (mĕn)	Mid
Low	ô (ôrb) ŏ (nŏt)	û (fûrn)	â (câre) ă (măn)	Low

CONSONANTS.

§ 49. CONSONANTS are the less sonorous sounds of a language, formed either with complete closure or decided obstruction of the oral passage. They differ widely in character, grading from those which, formed with complete closure, have almost no sound in themselves and are hence most characteristically consonantal, as **p, t, k**, etc., to those that are most sonorous, and hence most nearly like vowels, as **l, n, r, w**, etc.

NOTE. It must be remembered that throughout the Guide, unless otherwise stated, it is the *sound* represented by the letters that is meant, and not their names, pē, tē, kā, etc. Readers should, if they have not already done so, learn to isolate and pronounce separately the sounds of the language. Thus **p, t, k** represent simple breath sounds without the slightest voice sound or vowel accompanying, and may be isolated by pronouncing in each case some simple word beginning with one of them, as **pea, tea, key**, and then dropping off the vowel sound altogether.

§ 50. The essential feature in the production of a consonant sound is *obstruction* in the voice channel, which may amount to complete closure. The breath current in any case may or may not be voiced. The chief characteristic of all vowels, on the contrary, is voice (§ 30), modified, to be sure, by various configurations of the mouth, but free from either complete stoppage or decided friction of the breath. Vowels, as already seen, are distinguished from one another chiefly by the oral tone of each, due to the size and shape of its oral chamber; the *form* and *place* of the *obstruction* is what mainly distinguishes one consonant from another. There is, indeed, in the formation of the vowels, what might in one sense be called an obstruction in the oral passage above the glottis; that is, at the place of constriction (§ 42). This, however, only serves to form the oral vowel chamber, and does not obstruct the sound, either completely or sufficiently to cause any decided friction or rustling. When the place of constriction becomes much narrowed, as in the case of ē and o͝o or ĭ and o͝o, a very little further raising of the tongue, or an increase in the force of expiration, will produce a slight frictional rustling, and thus give a consonantal character to the vowel, which easily passes completely over into the corresponding consonant, as ĭ into **y**, o͝o into **w**. Indeed, if either of these vowels is passed over rapidly before a following vowel, the two sounds being in one syllable, the effect produced is also **y** or **w**; as in **ameliorate** (ə-mēl′yo-rāt), **zo͝ouave** (zo͝o-äv′; zwäv). Hence **y** and **w** are often called *semi-vowels*, and **w** has also been called "consonant **u**" (**u** as in **full** = o͝o).

§ 51. Consonant means "sounding with,"—that is, "with" a vowel. But it is not to be supposed that consonants can be uttered only as combined with vowels. Every consonant can be sounded by itself, and such voiced consonants as **l, m, n**, can be not only indefinitely prolonged, but even musically intoned; or, in other words, they can function as vowels. The reason is that though **m** and **n** have a complete closure of the mouth passage, yet the breath can pass out freely through the nose, while for **l** the breath can pass out on both sides (or on one side) of the tongue tip without any decided friction. Similarly, **r** can function as a vowel. (Cf. § 64.) In actual usage, however, scarcely any recognized word is composed of consonant sounds alone, although both syllables and words often consist of vowel sounds alone. Certain of the consonants sometimes have temporarily the value of vowels, and may then be syllabic, but only unaccented syllables are thus formed in ordinary English; as in **eaten** (ēt′n). Usually there must be for every syllable one of the open, more sonorous sounds, called vowels (§ 36).

NOTE. The exclamation **psht!**, used to attract attention, and a few other similar combinations of sounds, if really words, may be given as examples of words composed entirely of consonants. Such abbreviations as *'n* for *and*, as in *bread 'n butter*, are really enclitics, forming unaccented syllables attached in pronunciation to the preceding word.

§ 52. It is thus seen that the line of demarcation between vowel and consonant is not always sharply defined. It is, however, convenient to retain the traditional division of the sounds of the language into vowels and consonants. The respective relations of vowel and consonant to the syllable are a natural consequence of their different characteristics as stated above. Vowels and consonants readily combine into one continuous blend of sound in passing either way, from vowel to consonant or from consonant to vowel.

CLASSIFICATION OF CONSONANTS.

§ 53. Consonants pronounced with voice (§ 30) are called VOICED CONSONANTS, or SONANTS, as **b, v, z, d, g** (**go**), etc.; those unaccompanied by voice are called VOICELESS CONSONANTS, BREATH CONSONANTS, or SURDS, as **p, f, s, t, k**, etc. All consonants can be whispered.

NOTE 1. The voiceless, or breath, consonants (surds) are otherwise styled *nonsonant*, *nonvocal*, *uninton*ated, *toneless*, and sometimes, improperly, *whispered* (§ 33). They have also been called *aspirates*, but this term is properly restricted, as by most grammarians and phoneticians, to the *h* sounds and aspirated consonants. Cf. ASPIRATE, *n.*, in the *Vocab.*

NOTE 2. In the voiced (sonant) consonants (called also *subvocals*, *subtonics*, and *vocal*, *intonated*, and *phthongal* consonants) a part of the strength of the outflowing breath is expended in vibrating the vocal cords, and thus there is less force left to give character to the sound at the place of formation than in the case of the voiceless (surd) consonants. Voiced consonants are, therefore, as a rule, weaker than voiceless consonants. For this reason voiceless consonants are often called "*hard*," "*strong*," or "*sharp*," the corresponding voiced consonants "*soft*," "*weak*," or "*flat*." The terms *voiced* and *voiceless*, however, are unambiguous, and are now preferred by most phoneticians.

§ 54. Consonants may be further classified: (1) according to the MANNER of their formation; (2) according to the PLACE of their formation.

SUBDIVISION I.—According to Manner of Formation (Form).

§ 55. Consonants are formed in three ways:

(1) The breath, either voiced or voiceless, is entirely shut off for a moment, and then usually explosively released, as in **p, t, b, d, k, g** (**go**). The closure may be at the lips, as for **p, b**; between the point of the tongue and the gums back of the upper teeth, as for **t, d**; or at the back of the mouth, as for **k, g** (**go**).

(2) The vocalized breath is stopped in the mouth, and turned back through the nasal passage, as in **m, n, ng** (**sing**) or **ŋ** (**iŋk**). The closure of the oral passage in this class is at any of various places, as in (1).

(3) The breath, either voiced or voiceless, is much impeded ("squeezed") in its flow through a narrowing of the passage above the glottis, usually sufficiently to produce audible friction. The narrowed opening through which the breath is squeezed, and which gives to the consonant its character, varies in width and position for the different consonants thus formed. The amount of friction depends, of course, upon the degree to which the passage is narrowed. The narrowing may be between the lower lip and the upper teeth, as in **f, v**; between the blade of the tongue and the teeth, as in **s, z**, etc.

§ 56. Consonants produced with a complete stopping of the breath at some point in the oral passage, while the nasal passage also remains closed (§ 55, 1), are called STOPPED CONSONANTS, or STOPS (otherwise *mutes*, *checks*, or *explosives*). The stops in English are: **b, d, g** (**go**), *voiced*, and **p, t, k**, *voiceless*. See TABLE OF CONSONANTS, § 71.

NOTE. The voiceless stops (surd mutes) **p, t, k**, are the only ones of the stopped consonants to which the name 'mutes" is, strictly speaking, applicable. They have no sound whatever in themselves, being audible only at the moment of transition from or to some other sound, although they can be pronounced separately by exploding each with audible emission of breath. See §§ 101-3.

§ 57. Consonants produced by forcing, or squeezing, the breath through the oral passage which is narrowed, or divided (as in **l**), but not otherwise closed either entirely or in part (§ 55, 3), and also those in which the oral passage is stopped, but the nasal passage open (§ 55, 2), are called OPEN CONSONANTS or CONTINUANTS. The open consonants in English are: voiced, **j, l, m, n, ng, r, th** (**then**), **v, w, y** (**yet**), **z, zh** (**pleasure**), voiceless, **ch** (**chop**), **f, h** (**him**), **s, sh** (**she**), **th** (**thin**), **wh** (**why**). See TABLE OF CONSONANTS, § 71.

§ 58. Those open consonants which are uttered with so little audible friction and are so sonorous that they closely resemble vowels are called VOWEL-LIKE CONSONANTS, also *sonorous*, or *sonorant*, consonants. Such are the nasals, **m, n, ng**, the liquids, **l, r**, and the semivowels, **w, y**. These sounds, although usually classed as consonants, really form a group intermediate between the vowels and those sounds which are in all cases purely consonantal. Cf. § 52.

§ 59. In the NASAL CONSONANTS, **m, n, ng** or **ŋ** (**ink**), the mouth passage is completely stopped as in the case of the stops, but at the same time the velum, or soft palate (§ 24), is lowered and the intonated breath thus passes into or through the nasal passage, the resonance of which, combined with that of the mouth passage back of the place of closure, gives its peculiar character to each of these consonants (§ 55, 2). The quality of each nasal consonant varies according as the oral passage is stopped at the lips, as in **m**, between the tip of the tongue and the gums back of the upper front teeth, as in **n**, or toward the back of the mouth, as in **ng**. The three nasals are normally all voiced sounds.

§ 60. If we take one of the stopped consonants, **b** for instance, and instead of exploding it, allow the soft palate to drop and the voiced breath thus to pass out through the nose, we obtain the corresponding nasal, in this case **m**. In a similar way we have also the pairs **d** and **n**, **g** and **ng**. As the intonated breath is thus completely *stopped* in the mouth and turned back through the nasal passage, the nasals are classed by some with the stopped consonants. On the other hand, although the breath is stopped in the mouth, the opening through the nose forms an open passage from the throat to the external air, and since these sounds are not momentary or explosive, as are **p, t, k**, etc., but continuous, they are better classed with the open sounds, or continuants.

NOTE 1. Except in the utterance of the three nasal consonants, **m, n, ng**, the entrance from the mouth into the nasal passage must be kept closed. If the velum (§ 24) is allowed to drop, opening the passage, the speech is characterized by nasality, or a nasal "twang," which is usually considered a blemish in speaking, although it is sometimes cultivated by singers as giving additional resonance to the tones, and some teachers of voice production maintain that the best vowel sounds are produced when the velum does not quite close the nasal passage. The velum, with its lower extremity, the *uvula*, hanging down at the back of the mouth, may be examined with the aid of a hand mirror, if the observer stand so that as much light as possible falls into the mouth. After a little practice the muscular sense may be so cultivated in the velum that it can be moved up or down at will. Obstruction of the nasal passage, as from a cold, or from adenoid growths, prevents the proper utterance of nasal sounds, as of **m, n, ng**, the cognate sounds **b, d, g**, being substituted for them. This is commonly called "speaking through the nose," but it is in reality just the reverse.

NOTE 2. Although NASAL VOWELS are not considered admissible in standard English, such vowels exist in some other languages in the accepted pronunciation. In French there are four such vowels indicated by a following *n* in the spelling (not if the *n* is doubled or followed by a vowel in the same syllable), as in the phrase *un bon vin blanc* (ŭN bôN vĂN blän). These are pronounced by uttering the vowels as here marked while allowing the velum to hang loose, the breath or voice passing out through *both nose and mouth*, only the vowel being pronounced in any case, the written or printed *n* merely indicating the nasalization. Thus these nasal vowels differ from the nasal consonants, in which the breath or voice passes out through the *nose only*.

§ 61. In the formation of the LIQUIDS, **r** and **l**, the oral passage is either divided as in **l**, the tongue dividing the passage so that the breath passes out either at both sides or at one side, or it is narrowed by the approximation of the tongue to the back upper gums or to the palate, as in **r**. Since the passage is not entirely closed (or, in the case of trilled **r**, is closed and opened in extremely rapid succession) these sounds are classed with the open sounds. Both the liquids are normally voiced in English.

NOTE 1. The consonant **l** is usually formed with the tongue in such a position that the passage through the mouth is divided laterally into two parts, the tip of the tongue usually touching the gums above the back of the upper front teeth. Such a consonant is called a DIVIDED consonant (otherwise a *lateral*, or *side*, consonant). Some, however, pronounce **l** by completely stopping one side of the passage with the tongue and allowing the breath to pass out on the other side, in which case it is called *unilateral*.

NOTE 2. The term LIQUID was applied by the Greek grammarians to the consonants **l, m, n, r**, because of their smooth and flowing quality, and the fluency with which any one of them combines with a stopped consonant, as **p, k**, etc., either immediately preceding or following it; as in English **clay, play, pray, help, camp**. The term was adopted by the Roman grammarians, and has since been in common, though variable, use. By many recent writers the name has been limited, as here, to **r**, and **l**, while others include under it **l, m, n**, and **r**, and still others apply it to all the vowel-like consonants (§ 58).

§ 62. The open consonants, except the vowel-like consonants and the nasals, are called FRICATIVES, as being characterized by decided friction. The term SPIRANT has been variously used by different writers; by some to indicate all the fricatives, by others to indicate only **f, v, th** (**thin**), **th** (**then**), and the two sounds of **x** (§ 144). The voiceless fricatives **s** and **sh**, the corresponding voiced fricatives **z** and **zh**, and also, sometimes, the compound consonants **ch** (= **tsh**), as in **chin**, and **j** (= **dzh**), as in **judge**, are often called SIBILANTS, indicating their hissing sound.

NOTE. All the voiced fricatives are BUZZES, so called because of the buzzing sound which characterizes them. In their formation there is, at the place of articulation, a vibration of the elastic tissue, which may be perceived to vary in rapidity as the pitch of the voice is higher or lower. This responsive and secondary vibration modifies the primary tone of these consonants, which is dulled in quality.

§ 63. TRILLS, or *rolled consonants*, are sounds characterized by rapid periodic interruption of the breath, made by vibrating one of the flexible parts of the mouth against some other part. The effect is caused by the breath, voiced or voiceless, driving the flexible part into a position of contact with, or very close approximation to, the other part, the elasticity or muscular force of the flexible part causing it to resume its former position. Thus **r** may be trilled by vibrating the point of the tongue against the back of the upper teeth, or the gums above. This form of **r** is now rare in standard English, in which **r** is now only occasionally trilled (§ 220). The trilled **r** is, however, common in Scotland, and in various English dialects. It is the more usual form of **r** in the Continental languages, as Italian, Spanish, French, and German, although in the latter two languages the **r** is now often pronounced by trilling the uvula (§ 24) against or close to the back of the tongue, as in the "Parisian" **r** (**r** grasseyé). A form of **r**, the so-called "glottal" **r**, may also be pronounced with a rather slow vibration of the vocal cords. The lips may also be trilled.

NOTE. A trill in music differs from the trill described above. It consists of rapid alter-

nation between two tones of slightly differing degrees in pitch, and, in singing, is effected, of course, by action of the vocal cords.

§ 64. Consonants, like vowels (§ 45), may be *narrow* or *wide*, that is, pronounced with the tongue tense or lax. This distinction, however, is not so noticeable in the case of consonants, because of their less sonorous sounds and because they do not, like the vowels, occur in pairs having the same tongue position and distinguished chiefly by narrowness and wideness. But the distinction is often of use in comparing the sounds of different languages. Thus English **w**, as in **we**, is *wide*, while the French **w** sound as in **oui** (wē) is narrow, both being formed with practically the same tongue position, but with the tongue lax in English and tense in French, the lip rounding also being less in English. Again, the English **y** in **yea** (yā), is wide, having so little friction as to be scarcely distinguished from a vowel, while the German **y** sound, as in **je** (yā) is narrow, so that the sound is a buzz (§ 62, NOTE) sounding almost like **zh** (as in **pleasure**) to an unaccustomed ear.

SUBDIVISION II. — According to Place of Formation (Place).

§ 65. Consonants may be subdivided according to the *place of* their *formation* (the place at which the narrowed passage or the closure which gives them their character is formed (§ 55). By place consonants may be divided into five main classes, as shown in §§ 66-70. and the table, § 71. As with the vowels (§ 41), however, the number of possible consonant sounds is very large, the position of many consonants being more or less variable as uttered by different persons, or in different combinations. Slight variations from what may be taken as type consonants in each language are commonly unrecognized, and may be ignored.

§ 66. LABIALS, or LIP CONSONANTS, are those having the place of formation at or near the *lips*, as follows: (a) between the lips, as in the *bilabials*, **p**, **b**, **m**, (b) between the lower lip and the upper teeth, as in the *labiodentals*, or *lip-teeth* consonants (otherwise called *dentilabials*), **v**, **f**; and (3) those pronounced with the lips rounded and the back of the tongue raised, as in the *labiogutturals*, **w** and **wh** (**why**). The labiogutturals have thus two places of articulation, at the lips and at the back of the mouth, but they are usually classed simply as labials.

§ 67. The DENTALS are those consonants that have the place of formation at or near the *teeth*, and include: (a) those formed with the *point*, or tip, of the tongue extended between the edges of the front teeth, as **th** (**then**) and ~~**th**~~ (**thin**), (b) those formed with the *point*, or tip, of the tongue touching the back of the upper front teeth, or, in English, more often the gums above, as **t**, **d**, **n**, **l**, **r**; (c) those formed with a narrow passage between the *blade* of the tongue (§ 26) and the back of the upper front teeth, as **z** and **s**; (d) those formed with a passage between the blade of the tongue and the front teeth similar to that in (c), but with the point, or tip, of the tongue raised, as **sh** in **ship**, **zh** in **pleasure**. Consonants formed as in groups (a) and (b) are often called POINT consonants; those formed as in groups (c) and (d) are often called BLADE consonants.

NOTE. The sounds of **t**, **d**, **n**, **l**, being most commonly pronounced in standard English with the point of the tongue brought against the ridge formed by the gums back of the upper front teeth (i. e., the *alveolar* ridge) and not against the back of the teeth, as in French, Italian, and many other languages, are called *alveolars* by some. But it is better to retain the term *dental*, which has long been in use to designate this group.

§ 68. PALATALS, or FRONT consonants, are formed by raising the front or middle of the tongue toward the hard palate, as **y** in **yet**.

NOTE. The English **r**, which is formed in various ways by different persons (§ 220), is classed with the palatals by some.

§ 69. GUTTURALS, or VELARS, otherwise called BACK consonants, are formed with the root (back) of the tongue raised toward the soft, or back, palate or *velum*, as **g** (**go**), **k** (**cop**), **ng** (**sing**), **ŋ** (**iŋk**).

NOTE. The place of formation for **k** and **g** varies widely according to the vowel which precedes or follows; thus, in **key** or **gimlet** it is forward, on the edge of the hard palate, while for **call** or **go** it is back, on the soft palate. Therefore **k** and **g** may be classed either as palatals or gutturals. They are, however, more often classed as gutturals, or velars, and no account is usually taken of their shifting position.

§ 70. GLOTTAL CONSONANTS are those made with the place of formation in or near the glottis (§ 17). In English the aspirate, **h**, is such a consonant sound. This sound begins usually as a weak, voiceless glottal consonant produced by friction of the breath against the vocal cords as they are drawn together to produce the vocality of the following vowel, but ending before the organs have assumed the full position for the vowel. Its latter part is a voiceless gliding vowel corresponding in position to the following vowel.

NOTE. A glottal **r** (§ 63) and a glottal stop (§ 34) sometimes occur as elements of speech, but are not recognized in standard English.

§ 71. The consonants are generally easier to recognize than the vowels and hence more easily imitated, and with one or two exceptions they vary but little in various parts of the English-speaking world. Each consonant is fully described in its alphabetical place in the Description of English Sounds, section III of this Guide. The following table exhibits the English consonants grouped according to the foregoing classification:

SOUNDS IN COMBINATION.

§ 72. Thus far the sounds of the language have been chiefly considered as typical elements, each complete in itself and each having a certain definite formation. In actual speech, however, sounds rarely occur thus isolated, and many sounds occur only in certain combinations. As combined in speech, sounds are variously modified in formation, and hence in their acoustic effects. It is such modifications that must now be considered.

The most important characteristic of sounds as occurring in speech groups — such as syllables, words, and sentences — is quantity, or length.

QUANTITY.

§ 73. The QUANTITY, or LENGTH, of any speech element, whether vowel or consonant, properly means the comparative length of time devoted to its pronunciation. Thus we call those sounds to the pronunciation of which the greatest time is given, *long*, those to the pronunciation of which the least time is given, *short*, those intermediate, *half-long*. We may distinguish still other degrees of quantity which occur exceptionally, as *very long* or *very short*. The three degrees, *long*, *half-long*, and *short* are, however, sufficiently definite, and for practical purposes *long* and *short* are often sufficient.

§ 74. Strictly, the terms "long" and "short" as applied to speech sounds should refer only to *quantity*. Thus, the **a** in **art** is a long vowel, of which the **a** in **ar-tis'tic** is the true short form. The vowel has practically the same *quality* in both words, being distinguished only by a difference in the *length of time* given to its pronunciation. As pronounced in **art** the time devoted to it is about twice as great as in **artistic**. But in present English usage **ā**, as in **āle**, is commonly called "long" **a**, while **ă**, as in **ăt**, is called "short" **a**, although these sounds do not have at all the same *quality*, and hence are not the true long and short of the same sound. So **ē**, as in **ēve**, is commonly called "long" **e**; **ĕ**, as in **mĕn**, "short" **e**, etc. Thus in present use "long" and "short" as commonly applied to the English vowel sounds designate differences in *quality* rather than differences in *actual length*, although a difference in actual quantity also often exists.

The present use of "long" and "short" in naming English vowels, although in a way illogical, has come about through the natural growth of the language and has become fixed in popular usage. It has grown out of the fact that the sounds we now call "long" **a** and "short" **a**, "long" **e** and "short" **e**, "long" **i** and "short" **i**, "long" **o** and "short" **o** have in each case often developed from the true long and short of the same, or nearly the same, vowel sound. The *symbols* have remained unchanged, but now represent in each case not the same sound with different *quantities*, but entirely different sounds.

Just how the confusion arose may be briefly stated. In the days of Chaucer the symbol **a**, for instance, had two values in English, one our present sound of **a** in **art**, the other the same sound shortened. Thus **name**, with "long" **a**, was not pronounced at all as at present (nām), but rather nä'mĕ, while **man**, for instance, had a true "short" **a**, pronounced about as our **a** in **artistic**. In the course of time (it was not until the beginning of the 18th century that the change became fully established) **name** came through gradual changes to be pronounced, not with the vowel sound **ä** (ärt), as formerly, but with the vowel sound **ā** (**āle**), which it now has. The word **man**, on the other hand, came to be pronounced with the vowel **ă** (**ăm**) which it has at present. This characteristic *sound* change took place in the pronunciation of a great many words, but the *spelling* of the language, largely through the conservative influence of printing, which had meanwhile come into use, was not changed to correspond. In consequence, the name of the letter **a** became **ā** (**āle**), instead of **ä** (ärt), and the present vowel sound in **name** came to be called "long" **a**, and that of **man** "short" **a**, although they had now become entirely separate sounds and were no longer the true long and short of the same sound. In a similar way **e**, formerly pronounced like **ā** (**āle**) when long, and approximately **ĕ** (**ĕnd**) when short, came to have two entirely distinct sounds, namely, our present **ē** (**ēve**), called "long" **e**, and our **ĕ** (**ĕnd**), called "short" **e**. The letter **i**, formerly representing the sounds of **ē** (**ēve**) when long, and **ĭ** (**ĭll**) when short, also now represents two different sounds; namely, the "long" **i**, as in **īce**, and the "short" **i**, as in **ĭt**.

§ 75. The *actual quantity* of present English vowel sounds is as follows:

(1) Those commonly called "long" and the diphthongs are: (*a*) *long*, when they are accented and either final or followed by a voiced (sonant) consonant; as in **āye**, **āim**; **älı**, **älms**; **saw** (sô), **Saul** (sôl); **sēa**, **sēize**; **sīgh**, **sīze**; **gō**, **gōad**; **mo͞o**, **mo͞on**, etc.; (*b*) *half-long* when they are accented and followed by a voiceless (surd) consonant, as in **pāte**, **cēase**, **sīte**, etc.; or unaccented before an accented vowel, as in **ā-ē'ri-al**, **chāot'ic**, etc.; (*c*) *short* when unaccented, and not followed immediately by an accented vowel; as **ī** in **ī-de'a**, **ō** (**au**) in **au-gust'**, **ä** in **är-tis'tic**, etc.

(2) The sounds denoted by **ȧ** (**sen'ȧte**), **ȩ** (**ȩ-vent'**, **bȩ-gin'**), **o͝o** (**o͝o-bey'**, **vi'o͝o-let**), **u͝** (**u͝-nite'**) are short in actual quantity, but they are often called HALF-LONG VOWELS, since in careful speech they usually retain more or less of the quality of the "long" vowels to which they correspond. In rapid speech they tend to widening (relaxing) or obscurity; the **ȧ**, as in **sen'ȧte**, etc., being usually a sound between **ĕ** (**ĕnd**) and **ĭ** (**ĭll**), the **ȩ**, as in **ȩ-vent'**, etc., approaching **ĭ** (**ĭll**), the **o͝**, at least in many words, as in **vi'o͝-let**, tending toward the obscure vowel sound **ẽ** as in **evẽr**, the **u͝**, as in **u͝-nite'**, having its final element changed from that of **ū** (= **yo͞o**) to the **o͝o** in **bo͝ok**. The **ȧ**, **ȩ**, and **o͝**, are hence classed by some as obscure vowels.

(3) The vowels now usually called "short," as in **măn**, **rĕd**, **bĭt**, **pŏt**, **rŭt**, etc., are

PLACE OF ARTICULATION.	GLOTTAL	GUTTURAL or VELAR (BACK)	PALATAL (FRONT)	DENTAL				LABIAL OR LIP		MANNER OF FORMATION	
				BLADE		POINT					
	Throat	Root of tongue and soft palate	Middle of tongue and hard palate	Blade of tongue and gums Tip of tongue raised	Blade of tongue and teeth	Tip of tongue and gums back of upper teeth	Tip of tongue and edge of teeth (Interdental)	Lower lip and upper teeth (Labiodental)	Both lips (Bilabial)		
VOICED		**g** (go)[1]				**d** (do)			**b** (boy)	Stopped consonants or stops.	
VOICELESS		**k** (cow)[1]				**t** (ten)			**p** (pit)		
VOICED				**zh** (azure) **j** (jet)[2]	**z** (zeal)		**th** (then)	**v** (vim)		Fricatives	Open consonants or continuants.
VOICELESS	**h** (him)	(**wh**)[3]		**sh** (she) **ch** (chop)[2]	**s** (so)		**th** (thin)	**f** (fine)	**wh** (why)[3]		
VOICED		**ng** (sing) or **ŋ** (iŋk)				**n** (no)			**m** (me)	Nasals	Vowel-like consonants.
VOICED						**l** (lip)	**r** (red)[4]			Liquids	
VOICED		(**w**)[3]	**y** (yet)						**w** (we)[3]	Semi-vowels	

[1] See § 69, NOTE.

[2] **ch** (chop) and **j** (jet) are compound consonants, equivalent respectively to **tsh** and **dzh**, and the place of formation for each therefore shifts during its pronunciation, beginning with that of **t** or **d** and moving into that of **sh** and **zh**, the latter, however, being the most characteristic. So also **x** (§ 59) combines the positions of **k** (or **g**) and **s**.

[3] See § 66.

[4] See § 68, NOTE.

regularly slightly shorter in actual quantity than a "long" vowel would be under the same conditions of position and stress.

(4) The "obscure" vowels, as in **ev'ĕr, so'fȧ, re'cĕnt, fi'nȧl**, etc., are always short in actual quantity.

§ **76.** Throughout the remainder of this discussion and in the Dictionary, the usual and familiar classification of English vowels as *long, half-long* and *short*, in which the real distinction, as shown above (§ 74), has in most cases come to be of *quality* rather than of actual *quantity*, is followed. Thus, vowels are classed as **long, half-long, short,** and **obscure**, — as **ā** in **āle**, long, **ȧ** in **sen'ȧte**, half-long, **ă** in **măn**, short, **ȧ** in **fi'nȧl**, obscure. The sounds symbolized by **ā, ē, ī, ō, ū** (**āle, ēve, īce, ōld, ūse**), as being the most frequent of the long sounds denoted by these letters, are commonly called their REGULAR LONG sounds, and, for a similar reason, **ă, ĕ, ĭ, ŏ, ŭ** (**ăm, ĕnd, ĭll, ŏdd, ŭp**), are commonly called their REGULAR SHORT sounds. In addition to the "regular long" and "regular short" sounds, the vowels in **fool** (or **u** in **rude**) **call, art, care** (or **e** in **where**) are long, and the **oo** in **took** (or **u** in **pull**) is short. It must be remembered, however, as explained above, that the "regular long" and "regular short" sounds of the same letter in English are in no case variants of each other, either as "narrow" and "wide," or as the long and short of the *same* sound.

§ **77.** The "regular short" vowels in English are a marked peculiarity of the language. The vowel sounds in most of the European languages that come nearest to any of these sounds are usually narrower (that is, made with the tongue more tense, and slightly higher). Hence, those bred to speak other languages find it difficult to give these English sounds with precision.

ACCENT.

§ **78.** ACCENT, in its wider sense, may be defined as the prominence given, or the act of giving prominence, by whatever means, to one syllable over others in a word or phrase. The prominence thus customarily accorded, in the case of any word, is called the *accent* of the word, and is an essential part of its spoken form. Accent may be effected by greater stress (force of utterance), or by longer quantity, or by raised pitch, in the accented syllable, or by any or all of these combined. Accent, in a narrower sense, signifies that — whether stress, quantity, or pitch — by which the syllabic prominence is effected. Stress is the chief element in the accentuation of English words, and accent is therefore often used as synonymous with stress. The force with which a speech sound or a syllable is produced is the direct result of the physical effort made in expelling the breath from the lungs in its pronunciation. A syllable pronounced with strong stress (accent) is uttered with a greater effort of the voice, and hence is louder or clearer, or both louder and clearer, and also, often, of greater length, than its neighbors.

NOTE 1. EMPHASIS (called also *sentence accent*) is the accentuation of words or significant syllables in a sentence as opposed to that of syllables in a word or phrase. It employs, besides devices of its own, the same means as does word accent, the two often coinciding; but instead of being fixed by habitual usage, as word accent usually is, emphasis varies with occasion. Its purpose is not only to make prominent and impress, but often to color and modify the ideas to be conveyed.

NOTE 2. PITCH, or INTONATION, is the modification of voice as high or low on the musical scale. Pitch is an instinctive means of emphasis, and in the earlier stages of language the accent of words was often one of pitch rather than of stress. Pitch as thus used often became attached to words, giving them a special meaning. Such fixed pitch was a characteristic of Sanskrit, Greek, etc. In some languages now spoken, as notably in Chinese and some other Asiatic languages, and, to a considerable extent, in Swedish, such fixed pitch forms an important element in distinguishing various meanings of words. Pitch of this sort, except in the cases of a few exclamations, is not a recognized element in English accentuation, in which, as in that of most other modern languages, pitch is free or movable, modifying the meaning of sentences as a whole more often than that of single words, and expressing varying emotions rather than particular ideas.

§ **79.** There are various DEGREES of ACCENT (stress) in English, as may be seen by considering such a word as **incommunicability**, in which we usually distinguish three accents, or stresses, a strong one on the sixth syllable, and a medium one on the first and on the third; thus, **in'com-mu'ni-ca-bil'i-ty.** But if the last three syllables are pronounced by themselves each is seen to have a different accent, the first being the strongest, the third weaker than the first, but stronger than the second. For practical purposes it is, however, sufficient to distinguish three degrees of accent, or stress; — **primary**, or strong, **secondary**, or medium, and **weak**. Those syllables which are pronounced with the least stress are said to be *unaccented*. It is often difficult to distinguish the various degrees of accent, because the superior sonority of long, clear vowels makes it easy to imagine that the syllables containing them have stronger accent than they really have. Also, changes of pitch are apt to be confused with changes of stress.

§ **80.** PRIMARY AND SECONDARY ACCENT. Two accentual marks, a heavy one (′), called the primary accent, and a lighter one (′), called the secondary accent, are employed throughout this Dictionary, both in the syllabic division and in the respelling for pronunciation, to mark those syllables which are to be pronounced with a primary or a secondary accent, or stress.

In every word of more than one syllable at least one syllable is under primary stress, and hence is to be marked with the primary accent; as **o-bey′, com-mand′, walk'ing.** In many words of three syllables, and in most words of more than three, both the primary and the secondary accents are used; thus, **un'der-take′, mag'ni-fi'er, af'fa-bil'i-ty.** In all three-syllable words which have the primary accent on the last syllable, as in **un'der-take′, con'tra-dict′**, this fact is indicated by the use of the written primary accent; but, when, as in **mag'ni-fy, ded'i-cate, tur'pen-tine**, the last syllable is under secondary stress, and contains a long vowel, the accentual mark is not inserted, the existence of stress being usually sufficiently indicated by marking the vowel as of full length. There are many dissyllabic words, neither syllable of which can be properly spoken with absolutely weak stress. Such are **a-men, fare-well**, most two-syllable compounds, as **horse–rake, house–top**, etc., and many words not of that class. The final syllables of such words as **ab'scess, con'test, ac'cess**, are pronounced with greater force and clearness than are those of **heir'ess, tall'est, ax'es**, etc. It is, however, customary to mark the secondary accent in such words only when it is very decided, as in such compounds as **horse'rake′, house'top′**, and in a few such words as **a'men′, fare'well′**, etc.

§ **81.** POSITION OF THE ACCENT IN ENGLISH. For English no fixed rules, such as often exist in other languages, can be given by which the accent of most of its words may be determined. Words of new formation or words recently adopted into the language are usually accented according to the analogy of similar words of longer standing. In the case of some two-syllable words used both as verbs and as nouns or adjectives, the final syllable is accented for the verb, and the first for the noun or adjective; as, **con-test′** and **con'test, sub-ject′** and **sub'ject, ab-sent′** and **ab'sent**, etc. But many others are accented alike for both verb and noun; as **de-feat′, re-gard′, at-tack′, cap'ture, re-mark′**, etc.

The tendencies at work in the determination of accent are of interest, and often of help in deciding what the proper accentuation is in any doubtful case. The following sections give the chief characteristics of English accentuation.

§ **82.** ENGLISH ACCENTUATION IS RECESSIVE, that is, the general tendency of the language is to carry the chief accent, or stress, back towards or to the first syllable. The working of this principle is seen in such words as **bal'co-ny**, formerly **bal-co'ny**; **con'fis-cate**, *v.*, formerly (and still by some) **con-fis'cate**, etc. In many words the struggle between this principle and former usage is reflected in varying present usage, as in the pronunciations **ad'ver-tize** and **ad-ver-tize′**, **il'lus-trate** and **il-lus'trate**, etc. (see -ATE in the Dictionary). It should be remembered, however, that this tendency, though important, is often less strong than other influences.

§ **83.** The RHYTHMIC CHARACTER OF ENGLISH ACCENT is a marked feature of the language. English pronunciation, like the German, and that of other Teutonic languages, is characterized by strongly accented syllables followed by much weaker ones. In French there is a general tendency to even accent, the stronger syllables rising only a little above the others, while in the other Romance languages, as Italian and Spanish, the accent (stress), though stronger than in French, is not so marked as in either English or German. Strong accent (stress) involves a considerable vocal effort and the expenditure of an increased amount of breath. Before another syllable is pronounced with the same force, there must usually be an opportunity to recover from the first effort. This may be gained by the pronunciation of one or more weak syllables. The prevailing tendency in English is to alternate strong and weak accent regularly. Thus, in such a word as **modify**, while the strongest accent is on the first syllable, the third syllable is stronger than the second. In rapid speech this distinction between the last two syllables in a word like **definite** is scarcely recognizable, and in verse two such syllables may be treated simply as weak compared with the much stronger first syllable. Grammatical and logical principles also at times require the juxtaposition of two or more weak or strong syllables, but the general tendency of the language is, nevertheless, to employ the trochaic rhythm in its accentuation of words (- ⏑, - ⏑, - ⏑).

§ **84.** EVEN ACCENT. When a word contains two syllables each of which is pronounced with the same degree of force, the word is said to have EVEN (or LEVEL) ACCENT. Even, or nearly even, accent occurs in the numerals **thirteen, fourteen**, etc., when used alone or separated from the noun modified, as in "he is **thir'teen′**," but not in counting or when preceding an accented syllable, as in **four'teen' days'**, in which cases the stronger accent falls on the first syllable. Level, or nearly level, accent also sometimes occurs in compounds, as **well'–be'ing, red'–hot'**, etc., but the tendency is to make the accent somewhat stronger on one syllable or the other according to the rhythmic principle (§ 83). Thus, *a red'-hot' stove; the stove is red'-hot'*, etc.

§ **85.** CONTRASTING ACCENT. When it is desired to contrast two or more words, they are often given an accentuation different from their more usual one, as **a-gree'a-ble** and **dis'a-gree'a-ble, bear** and **for'bear.** Such contrasting accent is really a form of emphasis (§78, NOTE 1), but it sometimes becomes attached to words as the regular accentuation, especially in the pronunciation of those who habitually use words thus contrasted, as for instance, scientists, who often have occasion to employ a group of terms having a common ending but different prefixes, or vice versa, as, **bivalent, trivalent**, etc., which are pronounced by most chemists **bī'vā'lent, trī'vā'lent**, etc., although from their etymology and by analogy they would be pronounced (as by many) **bīv'a-lent, trīv'a-lent**, etc, like **e-quiv'a-lent.**

§ **86.** SHIFTING, or VARIABLE, ACCENT. Words in which the accent varies as it does in the classes mentioned in the last two sections are said to have SHIFTING ACCENT. Shifting accent is common in English, but is not ordinarily noted in the pronunciations given in the Dictionary, where in most cases only the more usual accentuation of a word is indicated. It may be understood, however, that in certain positions and for special purposes such words may properly be given an accentuation somewhat different from their more usual one.

In former periods of English the accentuation was often more variable than in present use. Thus in Shakespeare we have many such instances as *Of thy advérse pernicious enemy. Thy ádverse party is thy advocate. And gilded honor shamefully misplàced. The misplaced John should entertain an hour. In shape profáne. What profáne wretch art thou?* Such variable accent was admissible in Shakespeare's time because then many words, especially from the French, were in a transition stage as regards their accentuation, and were accented in either of two ways. This was true not only of many adjectives but also of nouns, as **confessor** and **cónfessor, révenue** and **revénue**, etc. Most such words have in present English become fixed in accentuation, or at least have an accent recognized as the usual one, as **ad-verse′, de-spised′, rev'e-nue**, etc. But from the tendency to rhythmic accent, even in prose (§ 83), such accentuation of adjectives as in *ádverse winds, óbscure vówels* is not uncommon.

§ **87.** The determination of accent in phrases and compound words offers many difficulties because such words or combinations are particularly liable to shifting accent according to the dominant idea in the mind of the speaker or according to the accentuation of following words, following the rhythmic principle (§ 83). In general, however, it is governed by the logical principle that EVEN ACCENT (–′ –′) keeps distinct the original ideas expressed by the members of the compound or phrase, while UNEVEN ACCENT (–′ –, or – –′) combines them into a single new idea (*combinative accent*).

Thus when the compound or phrase is composed of two nouns, the first of which has the function of a simple attribute, even accent is the commoner, as in **horse'–chest'nut, ber'ry pie′, steel' pen'**, etc. But in modern English, especially in America, there is a strong tendency to stress the second element in such compound substantives or substantive phrases; as, **old' maid′, ice' cream′, ber'ry pie′**, etc. This is especially noticeable at the end of a clause or sentence (as, *a dish of ice' cream′, a piece of ber'ry pie′*), a position favoring strong stress owing in great part to the fact that the loss of inflectional endings in English has frequently left a heavily stressed syllable so situated.

When the meanings of the two components become so intimately blended that the separate ideas are lost sight of in the single idea expressed by the compound or phrase we have combinative stress, as in **rain'bow′, book'case′, but'ter-fly′, black'bird′**, etc. *Street* being very common in phrases loses its strong accent, and we have **Main' Street′, Wa'ter Street′**, etc., but **Row, Lane**, etc., being much less common, retain their accent, and we have **Mal'den Lane′, Riv'er-side Drive′, Park' Row′**, etc In at least some such compounds the first-syllable accent is apparently due to the superior logical prominence of the first element, the second element being in fact often little more than a suffix or derivative ending; as, **sand'stone′, whet'stone′, shop'man, cler'gy-man**, etc.

When two adjectives are combined, even, or nearly even, accent is common when the compound adjective is used absolutely, or as a predicate adjective. Thus we have **well'–bred′, well'–worn′, hard'–heart'ed**, etc., in such collocations as *He is well'bred′, The shoes are well'-worn′*, but when the compound thus formed is used attributively with the noun following, especially when the noun is monosyllabic or accented on the first syllable, the accentuation usually becomes (–′ –), as in *a well'-bred' man, a hard'-heart'ed wretch*, etc. The accent in all such compounds is therefore variable. The attributive use being the more usual and characteristic one, the accent proper to such compound adjectives as thus used is the only one usually given in the Dictionary, together with a reference in most cases to this article.

In compounds consisting of two nouns connected by *of* or *and* the accentuation is

(-/-'), as **man'-of-war'**, **pen'-and-ink'**, **bread'-and-but'ter**. In combinations of titles with names we have the same accentuation; as, **Miss' Smith'**, **Cap'tain Brown'**, **Sir' Hen'ry**.

RELATIONSHIP BETWEEN ACCENT AND THE QUANTITY AND QUALITY OF VOWELS.

§ **88.** An intimate relationship exists between accent and the length and quality of speech sounds, especially the vowels. Certain sounds require a greater expenditure of breath, a greater articulative effort, than others, and their production is, therefore, usually accompanied by a stronger stress and occupies more time. When time and accent (stress) are lacking, the complete organic position required for a vowel sound may not be attained, and thus what would, under greater accent, be a clear, full vowel falls more or less short of this, usually tending first toward a wide form (laxer formation), as in **ă** or **ĕ** for **ā** (**sen'ăte**), **ĕ** or **ĭ** for (**bē-gin'**), etc., and often, still farther, in the direction of the "mixed" or "neutral" form, **ē** in **ev'ĕr**. In entirely unaccented syllables all vowels are modified in the direction either of the neutral vowel, or of **ĭ** in **pĭn** or of an obscure vowel sound between **ĕ** (**bĕd**) and **ĭ** (**pĭn**). There are thus formed certain vowel sounds which occur only in unaccented (unstressed) syllables.

NOTE. The important influence of accent (stress) may be seen in the still wider changes of pronunciation which occur, or at least begin, in unstressed syllables, such are the complete loss of vowels, as in the past participles in *-ed*, such as *loved*, *believed*, etc., which were formerly dissyllabic but are now reduced to one syllable, the loss of entire syllables, as *fortnight*, from *fourteen nights*, etc. Again, some monosyllabic words have come to be distinguished in spelling through the effect of sentence stress or emphasis, as *to* and *of* (unemphatic) from *too* and *off* (emphatic); thus, *Will you go to St. Louis too? He went off, and that was the last of him.* So also *h* is weakened and by many persons dropped in ordinary speech in unemphatic forms, as in *I saw him to-day* (§ 270). This dropping of the *h* may be clearly seen in such forms as *it* in *It rains* (from AS. *hit*).

§ **89.** All the English long vowels and diphthongs when pronounced with full quality and quantity (§§ 76, 98) occur only in syllables having either primary or secondary accent (although the latter is often indicated in the dictionary only by marking the vowel as of full length, § 80). The vowels of accented syllables, pronounced with full quality, may be called **heavy** vowels as distinguished from the **light** vowels of unstressed or lightly stressed syllables. Heavy vowels never occur entirely unstressed, and any weakening of their stress usually alters their quality, so that for all the heavy vowels there are corresponding light forms, which still differ, however, from the obscured vowels of entirely unstressed syllables. Such light forms are the so-called "half-long" vowels (§ 75–6). The **ă** in **leg'is-lă-tive** differs more or less in quality from the **ā** in **āle**, **ĕ** in **ē-vent'** from the **ē** in **ēve**, **ŏ** in **ō-bey'** from the **ō** in **ōld**, and **ŭ** in **ŭ-nite'** from the **ū** in **ū'ni-ty**, etc., although even as thus weakened these half-long vowels are not, in careful speech, absolutely without stress. When the stress on them is very weak, as in hurried colloquial speech, all these light forms are still further modified either in the direction of the neutral vowel **ĕ** in **ev'ĕr** or of an obscure vowel sound between **ĕ** in **mĕn** and **ĭ** in **pĭn** (§ 88).

§ **90.** The English short vowels (§ 76) are also all characteristically affected by the remission of stress, as follows:

1. The **ĭ** (**pĭt**) undergoes but slight alteration when deprived of stress. Thus, between the vowels in the accented and unaccented syllables in **fin'ish**, **in-stil'**, **pit'i-ful**, **in'fi-nite**, there should be but a slight and hardly appreciable difference in quality. Taking the word **pitiful**, for instance, the second **i**, being stressless, is usually pronounced with the front of the tongue somewhat lower than for the first **i**, so that the vowel is between **ĭ** as in **pĭt** and **ĕ** as in **pĕt**. This modification is characteristic of unaccented **i**, especially in open syllables (§ 110). In very rapid speech the retraction becomes more marked, the vowel sometimes passing into the neutral form, in hurried speech; **pitiful** being pronounced pĭt'ĕ-f'l, **infinite**, ĭn'fĕ-nĭt, etc. Throughout this discussion it should be remembered that the *style* and *rate* of speech (§ 7), largely affects all weakly stressed vowels (the oratorical style, for instance, requires a distinct utterance of each word and syllable, so that it will not require effort on the part of the hearer to catch the words and syllables usually unaccented. What would be entirely pedantic in the colloquial style of conversation would be most proper when read from the pulpit).

2. The **ĕ** (**ĕnd**) in unaccented (unstressed) syllables tends to become **ĭ** (**ĭll**), as in **riv'et**, **kitch'en**, **add'ed** (§ 151); to become obscured in the direction of the neutral vowel **ē** in **ev'ĕr**, as in **mo'ment**, **pru'dent** (§ 158), or to drop altogether, as in **eat'en**, **sev'en** (§ 159). In those cases where it retains its quality with but slight modification, as in **ef-face'**, **ex-ist'**, the stress, though weakened, is not usually entirely absent. But even in such cases the **ĕ** may, in rapid speech, fall into one of the other sounds, or may even be still further weakened, being uttered with whisper (§ 33) instead of voice, as before a stopped consonant followed immediately by an accented syllable, as in Sep-tem'ber.

3. The **ă** (**ăm**) under weak stress, as in the second syllable of **ab'stract**, is somewhat lightened. Where the stress is still further weakened, as in the first syllables of **at-tack'**, **af-ford'**, **al-low'**, the last syllable of **fi'nal**, etc. (in which it approaches, or in colloquial speech often becomes the neutral vowel **ē** in **ev'ĕr**), and especially in unemphatic monosyllables, such as **and** (bread *and* butter), **an**, **am**, **that**, etc., the effect is still more marked (§ 270).

4. The other short vowels have the general tendency, upon the remission of stress, to pass over into the neutral vowel sound (**ē** in **ev'ĕr**), a sound occurring (except in dialect) only in entirely unaccented syllables. The unstressed **o** as in **con-nect'**, **rec'ol-lect'**, etc., loses more or less of its rounding (§ 46), and turns toward the neutral form, which it approaches more or less nearly according to the rate of speech (§ 7). The same may be said of the other short (wide) back vowels (§ 47). In the case of **u** in **aw'ful**, **ful-fill'**, etc., and the **u** in **cau'cus**, **un-done'**, etc., while there is the same tendency toward the neutral quality, it is less noticeable than in the other cases, since these vowels are, even when stressed, less widely separated from the neutral vowel.

§ **91.** The TENDENCIES ON THE REMISSION OF ACCENT (STRESS), may be summed up as follows: In entirely unaccented syllables all vowels are modified either in the direction of the neutral vowel, or of the short **ĭ** in **pĭn**, or a sound between **ĭ** in **pĭn** and **ĕ** in **pĕn**, the back vowels losing more or less of their rounding (§ 46). When under weakened stress, but still not entirely stressless, the general tendency is to lower and widen the sound, as in the case of the narrow long vowels. In very rapid speech most vowels, especially most short vowels, are liable to fall into the neutral form when under weak stress.

In hurried and careless colloquial speech, these modifying and obscuring tendencies in both word and phrase are intensified. Such loose colloquial usage, however prevalent, must be regarded as a departure from the standard of careful pronunciation.

§ **92.** These tendencies take the reverse direction when, instead of stress remitted or weakened, the quantity of a vowel, or both the stress and quantity, is increased. Increasing the length, and consequently the stress, of a long vowel tends to narrow and raise it and make it clearer. In all cases of quite deliberate speech, as in oratorical delivery, and especially in that most effective kind of emphasis which makes use of long-drawn time, we have increased quantity and stress upon both accented and unaccented syllables, while their relations to each other as accented and unaccented remain unchanged. The vowels which are ordinarily obscured in unaccented syllables thus get the more energetic articulation of front or back vowels, though they will not, for the most part, reach the exact and full sound proper to the vowel as strongly stressed; thus, in the word **sen'ate**, however deliberately spoken, the vowel in the final syllable would never take quite the full sound which it has in **fate**.

§ **93.** In the marking of unaccented syllables the italic vowels (*ă*, *ĕ*, *ŏ*, *ŭ*, § 8) indicate that the vowel sounds in these syllables have, in the most formal pronunciation, the sounds indicated by the corresponding symbols not italicized, but, in ordinary speech, are modified more or less toward the neutral vowel. The degree to which they are stressed, and hence have their quality preserved, is thus determined by the rate and style of speech (§ 7). In the case of the vowels **ā**, **ē**, **ō**, **ū**, which under full stress are naturally long, but which under weakened stress become **ā**, **ē**, **ŏ**, **ŭ**, it might for practical purposes have been sufficient to have retained the marks they have when fully accented (**ā**, **ē**, **ō**, **ū**), but it has seemed best to indicate the modified sounds by modified symbols. Since the **ī** as in **ī-de'a**, the **i** as in **ar-tis'tic**, and the **au** as in **au-tum'nal**, are but little changed in quality by the absence of stress, no special symbols are employed to indicate the natural shortening of quantity which they have when thus unaccented (§ 89).

GLIDES.

§ **94.** In pronouncing a word or a phrase the organs of speech constantly change their relative positions, while sound is continually produced. Certain positions of the organs are held for a minute but recognizable space of time, and the definite sounds then produced are called speech sounds or elements. Through the intervening positions the organs move with great rapidity, and the constantly changing sounds then produced, often unrecognized, especially by an untrained ear, are called GLIDES. When, for instance, the word **ale** (**āl**) is spoken, there may be heard not only the two definite speech sounds represented by **a** and **l**, but also an indefinite sound produced while the organs are shifting from the definite position assumed for **a** to that assumed for **l**. It is such a transitional sound that is called a glide.

In changing from one definite position to another, the organs of speech take the shortest way in each case. The glide which connects any two elements is therefore always fixed in direction, but its acoustic effect varies according to the force and rate of utterance

With reference to any particular speech sound, a glide is called an ON-GLIDE when it precedes the sound, an OFF-GLIDE when it follows it. Thus, in the word **e'vil** (**ē'v'l**) the on-glide of **v** is that uttered in passing to it from **e**, while its off-glide is heard on passing from it to the **l**.

Glides, like consonants (§ 53), may be voiceless (BREATH GLIDES) or voiced (VOICE GLIDES). Thus, the off-glide of either **k** in **kick** is voiceless, **k** being a voiceless consonant; so also the off-glide of the **g** in **beg** is voiceless, although the **g** is a voiced consonant; but the off-glide of the **g** in **beggar** (**bĕg'ĕr**) or in **go**, where the following sounds are also voiced, is a voice glide.

DIPHTHONGS AND OTHER VOWEL COMBINATIONS.

§ **95.** A DIPHTHONG is a combination of two vowel sounds pronounced in one syllable, that is, with one breath impulse, and without remission of stress, the sound gliding from the initial element to the final without a break, as **oi** (**oil**), **ou** (**out**), **ī** (**īce**) = **aI**. A diphthong is therefore a compound, but continuous, vowel sound, and is not to be considered as two entirely distinct sounds connected by a glide. For the so-called *murmur diphthongs*, see § 100; and for the so-called *consonantal diphthongs*, see § 105.

NOTE. A written diphthong is the letter or combination of letters (as **i** when indicating the sound **ī**, **oi**, **ou**, etc.) representing a spoken diphthong, while a vowel DIGRAPH, with which it should not be confounded, is a combination of two letters used to indicate a single simple sound, or *monophthong*, as **ea** in **head** (**hĕd**), or in **bead** (**bēd**), etc. The term *diphthong* may properly be used either of a compound vowel sound as described above or of a combination of letters, as **oi**, **ou**, which together represent such a sound, while *digraph* is properly used only for the combined *letters* standing for a simple sound. Vowel digraphs are sometimes called *improper diphthongs*.

§ **96.** STRESS IN DIPHTHONGS. One of the vowel elements, usually the first, which compose a diphthong always receives the stress, the other being unstressed and unsyllabic (that is, not forming a syllable). Diphthongs in which the first element is accented have been called *descending* or *falling* (also *decrescendo*), those in which the second element bears the stress, *ascending* or *rising* (*crescendo*).

§ **97.** COMPOSITION OF DIPHTHONGS. There is some diversity of opinion as to the elements of which the different diphthongs are composed. It is impossible to dwell upon the elements in any case without altering their character as combined in the diphthong, and an exact analysis is therefore difficult to make. The unsyllabic (unstressed) element of a diphthong is usually of higher formation than the syllabic (stressed) element, as in **ou** in **out** (approximately **ä'o͝o**), **oi** (approximately **o'ĭ**), **ī** (approximately **ä'ĭ** or **ă'ĭ**), etc. (cf. § 47). The accented element naturally forms the main part of a diphthong and is usually longer and more distinct than the unaccented one, which is rarely spoken with the full high position indicated by that one of the two letters which represents it.

§ **98.** THE FULL OR COMPLETE DIPHTHONGS. The most perfect diphthongs in English are **i** as in **ice**, **ou** as in **out** (§ 97), and **oi** as in **oil** (§ 97). These are all descending diphthongs, that is, the stress is upon the first element.

§ **99.** DIPHTHONGAL CHARACTER OF ENGLISH LONG VOWELS. (1) Long **i** (**īce**) has been seen to be a full diphthong (§95).

(2) Long **ū** (as in **ūse**, **mū'sic**, **tūne**, **lūte**, **nūde**, etc.) is also diphthongal or compound, much more so when initial and after certain consonants than when following certain other consonants. Its main element is **o͞o**, preceded by a more or less distinct **ĭ**, which becomes **y** when the **ū** is initial, as in **ūse**, **dis-ūn'ion**, and also when the **ū** follows certain consonants, as in **mū'sic**. Cf. § 243.

NOTE. Combinations of "consonantal" **i** (or **y**, § 186), with a following vowel sound, and also similar combinations of the semivowel **w** with a vowel sound, have been called *impure diphthongs*. Examples of the first kind are the **ū** in **use**, and also in **few** (fūˌ), **mū'sic**, etc., when pronounced with the initial element as **y**; also various combinations of **y** or "consonantal" **i** with a following vowel, as in **yarn**, **you**, **yore**, **yawl**, **fil'ial**, **fa-mil'iar**, **gen'ius**, **min'ion**, and in **cor'dial**, **te'dious** when pronounced with the **i** as **y**; also in a very few combinations of "consonantal" **e** (§ 160) with a following vowel, as in one pronunciation of **gran'deur**. Examples of the second kind are **wet**, **wa'ter**, **quail**, **quite**, **qual'i-ty**, **gua'no**, **swim**, **swan**, **swell**, etc.

(3) The long vowel sounds **ā** and **ō** are generally diphthongal in English, being markedly so in the cultivated speech of southern England, but having less of this quality, and sometimes none at all, in other localities Cf. §§ 113, 200. When diphthongal, **ā** ends in a more or less distinct **ĭ** sound, **ō** in a more or less distinct **o͝o** sound. These two vowel sounds are variously classed as "diphthongs," "imperfect diphthongs," "half diphthongs," "doubtful diphthongs," or simply as long vowels. The latter is the more usual designation, and is used in this Dictionary.

(4) The sound of long **e** (ēve, sēe) in English is not a perfectly simple sound, but often ends with a more or less audible sound approaching that of consonant **y** in **yes** (§ 149), which is more noticeable when the ē is the last sound in a word or phrase. So also o͞o is often slightly diphthongal (§)

§ **100.** TRIPHTHONGS are combinations of three vowel sounds pronounced with one breath impulse, that is, in one syllable. In such a word as **fire** (fīr), the ī is, as has been seen, a diphthong. Following this diphthong is commonly a glide, or "murmur," like a very slight sound of ē (ev'ĕr) connecting it with the following sound of **r**. This glide should not be exaggerated so as to make the word two-syllabled. In the case of those who "drop their R's" the "murmur" is more distinctly heard, often, indeed, becoming a more or less full vowel sound (as fīʳē). Cf. § 221. So also in such words as **our, pūre**, we have the diphthong **ou** or the diphthongal long vowel ū (§ 99, 2), followed by a murmur preceding the **r**, such combinations being often called *murmur triphthongs*. These are the only triphthongs occurring in standard English. When the preceding vowel is undiphthongal, as in **there** (thâr), it forms with the following murmur a *murmur diphthong*.

☞ Each of the diphthongs and digraphs occurring in English is treated separately in Section III, The Elements of Spoken English, §§ 112–269.

CONSONANTS IN COMBINATION.

§ **101.** The STOPPED CONSONANTS (§ 56) as they occur in different positions have various formations and acoustic effects. It is simpler to consider the voiceless and the voiced stops separately.

§ **102.** VOICELESS STOPS IN COMBINATION. (1) When a voiceless stop, **p, t,** or **k,** is initial and followed by a vowel, as in **pea, pole, tie, toe, kill, cut,** etc., only the opening of the stopped position (i. e. the "explosion") is audible. This is usually followed in English by a slight puff of accumulated breath (breath glide), which may be symbolized by **h**, thus: **pea** (pʰē), **tie** (tʰī), **kill** (kʰĭl), etc. If the voiceless stops are pronounced without this puff of breath, as in some languages, as those of southern Europe, they often sound to an ear unaccustomed to them like the corresponding *voiced* stops, **b, d, g**. It is not necessary to symbolize this breath puff in an ordinary phonetic transcription.

(2) Except in the compound, or diphthongal, consonants **ch** (**tsh**) and **j** (**dzh**) described below (§ 127), the only consonant sounds which follow an initial stop in English pronunciation are the oral vowel-like consonants, **l, r, w** (§ 71). A voiceless stop never takes after it, in the usual modern English pronunciation, a nasal consonant, as formerly in **know, knife,** etc., and as in modern High German, or as in the Greek, from which we derive **pneumatic,** etc. No English syllable begins with the sounds **ps, ts, ks, pf, tf, kf, psh,** or **ksh,** combinations which occur initially in some other languages.

(3) When a voiceless stop is final after a short vowel, as in **up, hat, neck,** the sudden closure of the oral passage produces a percussive effect, which is usually followed by explosive release of the breath. If the mouth is kept shut after the closure for the stop is made, the word still sounds complete to the ear, but the acoustic effect is not so strong as when the closure is released and the mouth opened. When a long vowel precedes the stop, as in **hope, hate, make,** etc., the release of the stop is essential to a complete and clear pronunciation. When another voiceless stop precedes, as in **apt, act,** etc. (which happens only in the case of **t**, if both consonants are in the same syllable), the explosive release of breath is the only part of the final stop which is audible, and the preceding consonant is audible only by its on-glide from the vowel sound before it. Cf. § 104 (2). When a voiceless open consonant (§ 71) precedes a final stop the audible effect is an abrupt ending of the open consonant, followed by the final breath puff of the stop; as in **cast, mask, hasp, left, washed** (wŏsht), **hushed** (hŭsht). The combinations formed by a nasal preceding a final stop, as in **camp, sent, sink,** are explained below, as are also the glideless combinations of stops with following vowel-like consonants (§ 104). When a final voiceless stop is followed in a succeeding syllable by a voiced stop, or a nasal, having the same place of articulation, the breath explosion of the first stop is suppressed; as in **Et'na, ship'mate', cup'bear'er, back'ground',** etc., the opening of the nasal passage (in the case of the nasals) marking the end of the stop and the beginning of the nasal, which often sounds to the untrained ear like the ordinary explosion of the stop. The breath explosion of a stop is also usually suppressed when the following sound is a voiceless continuant, as in **cap'tion** (-shĭn), **out'side',** etc.

(4) When a voiceless stop occurs in the middle of a word, ending one syllable and beginning another, as in **sup'per, sit'ting, ac-cuse', cit'y, bak'er,** etc., both the percussive effect of the oral closure and the subsequent explosion are heard with no perceptible interval of silence between the closure and its explosive release. It is only in this position that all three elements of a stop — the closure, its momentary holding, and subsequent explosive release — can be easily made apparent to the ear. The consonant, though often written double in such words, is not so pronounced in English (§ 107). If the position of the vocal organs assumed between the closure and the explosive release is held long enough to be noticeable it makes the consonant sound as if it were doubled in pronunciation, which is to be avoided in English. In phrases or compounds, as **coat tail, nighttime,** etc, the two stops are usually pronounced in the same way as in **sit'ting,** etc., except that the closure is longer held and thus makes upon the ear the impression of the doubled consonant. It is only in a very deliberate pronunciation that the two stops in such compounds are both fully pronounced, i. e. with two explosions.

§ **103.** VOICED STOPS IN COMBINATION. (1) From the foregoing section it will be seen that in speech the voiceless stops are audible only at the moment of transition to or from some other sound. The voiced stops, **b, d, g,** on the contrary, have sounds audible during the holding of the stopped position, due to the forcing of the intonated breath into the air-tight chamber behind the closure. It is obvious, however, that even these voiced sounds can be only momentary.

(2) When a voiced stop begins a syllable, as in **buy, day, go,** there is first heard the vocal sound just described, followed, as in the case of the voiceless stops, by an explosive release, which, however, is not so strong as in the voiceless sounds. The voiced stops, like the voiceless ones, form glideless combinations with the vowel-like consonants. Cf. § 104 (3).

(3) When a voiced stop ends a syllable, as in **slab, had, hag,** the percussive effect noticed in the case of the voiceless stops (§ 102, 3) is less apparent, and the terminal explosion, if heard at all, is slight, the total acoustic effect being mainly due to the vocal sound produced during the holding of the closure.

NOTE. The whole vocal action, in the case of voiced stops, is marked by less abruptness than in the case of voiceless ones, and the voiced sounds are therefore often called "weak" or "soft," in contrast with the voiceless ones, called "sharp" or "hard." Cf. § 53, note 2.

(4) When it occurs in the middle of a word, as in **rob'ber, bod'y, rid'er, beg'ging,** all three elements of a voiced stop may be made apparent to the ear, as in the case of the voiceless stop, but the interval between closure and explosion is, as with the voiceless stops, usually almost imperceptible. Cf. § 102 (3). In compounds, or phrases, as in **wood duck,** what is heard in the pronunciation of a doubled voiced stop is usually the closure for the first and the explosion of the second, together with a longer holding of the stopped position than in a word like **bidder.** The longer holding of the stopped position gives the oral impression of the doubled consonant sound. Cf. § 102 (4).

§ **104.** GLIDELESS COMBINATIONS OF CONSONANTS. (1) Following the general principle of speech that the shortest way is taken between the oral positions for two adjacent elements, certain consonantal combinations are produced without any intervening glide. Such is always the case in sequences of consonants having the same place of formation (§ 65), and also in some sequences in which the consonants are formed in nearly the same place. Thus in the combinations **nd** as in **band, nt** as in **sent,** etc., there is no glide, the tongue position being the same for both consonants, the only difference in formation being the opening of the nasal passage for the **n**, followed by the oral explosion of the **d**. When **t** or **d** is followed by **n**, as in **eat'en** (ēt'n), **wid'en** (wid'n), etc., there is, in the usual pronunciation, the same sort of glideless combination, the oral closure common to the **t** or **d** and the **n** being held while the nasal passage is opened for the **n**. In the glideless combination **mp,** as in **jump, lamp,** the two consonants have the same oral closure, at the lips. The nasality of the voiced **m** is followed by the oral explosion of the voiceless **p**, which, with the longer holding of the closure than for either **m** or **p** alone, makes the combination both forcible and abrupt. In the combinations **ld,** as in **held,** and **lt,** as in **welt,** the tip of the tongue retains the same position for both the **l** and the **d** or the **t**, an opening being formed at the sides, or at one side, for the **l** (§ 61, note 1), and the **d** or the **t** being exploded as usual. When **t** or **d** is followed by **l**, as in **bat'tle, i'dle,** the tongue position is held in the same way, but the explosion of the **d** or the **t** occurs at the sides of the tongue, through the openings made for the **l**. When **g** follows **n** at the end of a word or syllable, as in **rang, sing, sing'er,** the **n** is assimilated in place to the **g** (§ 108), the two blending into the single nasal sound **ng** (cf. § 198).

(2) Even when two consecutive consonants have different positions, they are sometimes combined without a glide, although the gliding combination is more usual. Thus in the combination **ct** (**kt**), as in **act** (ăkt), the tip of the tongue is usually brought into position for the **t** before the **k** contact is loosened, and hence no glide is heard in the usual pronunciation of the combination. So in **apt** the **pt** forms a similar glideless combination. In the combination **mpt,** as in **exempt** (ĕg-zĕmpt'), **jumped** (jŭmpt), etc, there is heard in the **mpt** the nasal **m** followed in glideless combination by the first part of a **p** and the explosion of the **t**, the whole combination being not precisely indicated either by **mpt** or **mt.**

(3) The oral vowel-like consonants (**l, r, w**) form glideless combinations with the stops (§ 56), as in **play, blaze, pray, draw, tray, clay, queer** (kwēr), **twine, guano** (gwä'nō), etc. In such combinations, the breath glide following a voiceless stop passes over into the vowel-like consonant, partly unvoicing it. The **r** in **tray** thus differs from that in **draw,** the **l** in **play** from the **l** in **blaze,** etc.

§ **105.** CONSONANTAL DIPHTHONGS. The sounds of English **ch** as in **chop** and **j** in **jet** (§ 71) are properly described as consonantal diphthongs. They are not simply **t** + **sh** and **d** + **zh,** but in them these sounds, somewhat modified, are so blended as to form consonantal compounds analogous to the vowel diphthongs (§ 95). Consonantal diphthongs are thus seen to be intimate blendings of two consonant sounds (**sh** and **zh** being regarded as simple sounds, § 105), and not the mere junction of two or more consonants under one stress impulse, as in **sk** in **sky, rm** in **harm, nst** in **canst,** etc.

NOTE. The term "diphthong" is commonly used only of *vowel* combinations; when applied to consonant combinations the phrase "consonantal diphthong" is generally used.

§ **106.** A CONSONANTAL DIGRAPH is a combination of two consonants representing a single sound, as **sh** in **she** (§ 232), **zh** in **azure** (§ 267), **ng** in **sing** (§ 198). The **wh** in **when** as pronounced by some is a simple sound; as pronounced by others it is compound (§ 258).

☞ Each of the consonantal diphthongs and digraphs, as well as the other consonantal combinations used as elements of English pronunciation, will be described in proper alphabetical order under the heading ELEMENTS OF SPOKEN ENGLISH, §§ 112–269.

§ **107.** DOUBLED CONSONANTS in English are pronounced double in compounds, as **kk** in **bookkeeper, tt** in **cat-tail,** etc. (cf. §§ 102, 4 & 103, 4), and in many words formed with prefixes, especially separable prefixes, as **tt** in **outtalk, nn** in **innest,** etc., but also in some words formed with other prefixes as **nn** in **unnerve,** etc., and **nn** in **innate, mm** in **immetrical,** etc., as pronounced by some. Otherwise but one of the consonants is usually pronounced; as in **immense** (ĭ-mĕns'), **inner** (ĭn'ĕr), **flatter** (flăt'ĕr). Even though pronounced single, the consonant is, as actually spoken, often divided more or less evenly between the preceding and the following syllable, the syllabic division (cf. § 110) occurring rather *within* the consonant than before or after it, and hence doubled consonants have often been written double in respellings for pronunciation, whether actually pronounced so or not.

§ **108.** ASSIMILATION is the more or less complete conformation of one speech sound to another neighboring one, either in the character of the sound, as voiceless or voiced, etc., or in its articulative position. Thus the word **cats** is pronounced with voiceless **s** following the voiceless **t**, but in **dogs** the **s** is assimilated to the voiced **g**, and becomes itself voiced, the word being pronounced **dogz.** Assimilation of voiceless to voiced and voiced to voiceless sounds is a marked and recognized characteristic of English, especially in the inflections of nouns and verbs; as, **looked** (lo͝okt), **hoped** (hōpt), **missed** (mĭst), **warms** (wôrmz), **blinds** (blīndz), etc. But the vowel-like consonants **l, r, m, n, ng, w,** and **y** (§ 71), except in the case of verb and noun inflections, usually form combinations without voicing of the adjacent consonant, as in **help, art, curse, hence, else, smile, smite, ply, try, fly, ink.** Cf. § 104 (3).

Assimilation of place of articulation (§ 65) is very common. An example may be seen in the change of articulative position of **k** in **cow** (kou), preceding a back vowel, and in **keep,** preceding a front vowel. This change of place in the **k** will be more distinctly felt if the words are whispered. In the word **horseshoe** (hôrs'sho͞o') there is commonly assimilation of the **s** to the **sh**, and we often hear **horsh'shoe** or **hor'shoe.** In the phrase **can't go,** when rapidly spoken, the **t** often drops out and the dental **n** is assimilated in place to guttural **g**, the whole sounding as **kăn-gō'.** Again, in rapid and careless speech, in such combinations as **cl, gl,** etc., as in **clay** (klā), **cling** (klĭng), **glow** (glō), there is often assimilation of the guttural **k** or **g** sound to the dental, **l** (§ 193), so that such words sound as **tlay, tling, dlow,** etc. Such assimilations as those mentioned in this paragraph, except the first instance, though very common in rapid colloquial speech (and characteristic especially of children's speech) are not recognized in a more formal standard, and should, in general, be guarded against.

Assimilation may, or may not, be reflected in the usual spelling In the examples given above, the assimilation is not usually indicated by the spelling, though such spellings as **lookt, jumpt, leapt, spelt,** are common. The words **cupboard** and **blackguard** are pronounced **cub'board** and **blag'gard,** while their spellings remain unchanged. But we have, for instance, **gossip** from the older **godsib**: so also **suppress, supplant,** where the **b** of the Latin prefix **sub-** has become **p** through assimilation. Such assimilatory changes of various kinds and degree are very common and form a large proportion of the historical changes in the forms of words, though only a part of them are reflected in the conventional spelling.

The assimilatory effect of consonant upon vowel is well marked in the case of certain consonants. Thus it is through the influence of the following **r** that the present sound of **u** in **fern** (fûrn), **her** (hûr), and in **fir** (fûr), **sir** (sûr), etc., has been developed from the original sounds of ĕ (ĕnd), or ĭ (ĭll) or ē (ēve), and **a** with the sound of ŏ or ô has been developed after **w**, as in **wan** (wŏn), **ward** (wôrd). The same tendency is still

operative; as seen in **poor**, pronounced **pōōr, pŏŏr**, and by many, especially in England, **pŏr**; and in **court, glory**, etc., pronounced by many **kōrt, glōr'ĭ**, etc.

§ **109.** PALATALIZATION is a form of assimilation in which a non-palatal sound, as **t, d, s, g**, is partially or entirely converted into a palatal sound through the influence of a neighboring palatal sound (i. e. a sound formed with the place of articulation between the blade of the tongue and the hard palate, such as the **y** in **yet**, or the **ĭ** in **it**). The front, or palatal, vowel sound **ĭ** (§ 181) and its consonantal cognate **y** (**yes**), into which it easily passes (§ 50), have a strong palatalizing effect upon certain preceding consonants, and modern English abounds with examples of palatalization. The sound of **sy** (from the spellings **si, ci** — with **c** pronounced as **s**, **sci, ti** — when this **t** represents an earlier Old French **c** which finally passed into the sound of **s**) easily passes into that of **sh**, as in **expan'sion** (-shŭn), **spa'cious** (-shŭs), **vi'cious** (vĭsh'ŭs), **con'science** (-shĕns), **na'tion** (-shŭn), etc. A voiced (sonant) **s** or a **z** in like manner becomes sounded as **zh**, as in **vi'sion** (vĭzh'ŭn), **gla'zier** (-zhĕr) etc. Similarly, the sound of **ty** (from **ti**) easily becomes **ch**; as in **ques'tion** (-chŭn), **mix'tion** (-chŭn), **Chris'tian** (krĭs'-chăn, as commonly pronounced), etc. Also a **d** (the voiced correlative of **t**, § 145) takes, or tends to take, by assimilation with a following **ĭ** sound or **y** sound (through the sound of **dy**), the sound of **j** (= **dzh**, the voiced correlative of **ch**, § 188); as in **cor'dial** (kôr'-jăl), **sol'dier** (-jẽr), etc. Likewise a **g**, assimilating with **i**, has its soft sound (**j**); as in **le'gion** (-jŭn), **re'gion** (-jŭn), etc. The **e** has also often a similar, but less marked and frequent, effect upon certain preceding consonants. Cf. § 160.

Palatalization is a natural phonetic development. Such words as **spacious, nation, passion, glazier**, etc., are, in modern English, pronounced even in the most careful speech with the sounds **sh** or **zh**, but in many cases the tendency to palatalization is often restricted by the conservative element in language development, in accordance with which there is a strong tendency to keep the spoken forms of words from change in order to preserve them from contamination and confusion, as is especially necessary when a language is spoken over a large area. Thus in the words **Christian, Christianity**, the usually accepted pronunciation is krĭs'chan, krĭs'chĭ-ăn'ĭ-tĭ, or -chăn'ĭ-tĭ, but many still try to avoid, more or less, this fusion of the **t** and the **i**, pronouncing krĭst'yan, krĭst-yăn'ĭ-tĭ. In **soldier** the assimilation is complete, and the pronunciation sōl'jer is fixed, but in **Indian** the formerly common pronunciation ĭn'jun is now considered vulgar or dialectal. In words like **nature, verdure**, the **i** or **y** element of the long **u** (§ 241) tends to palatalize the **t**, and the words are pronounced in colloquial speech nā'cher, vûr'jer, etc., but the tendency to palatalization is here more strongly resisted, especially in formal speech. There are in such words, therefore, various degrees of palatalization, largely depending upon the rate and style of speaking (§ 7). The same tendency to assimilation is sometimes seen in two words in juxtaposition, as in **don't you**, in which the **y** commonly palatalizes the **t** more or less, the two words being often, in hurried speech, pronounced **dōnchōō'**. In the pronunciations given in this Dictionary great care has been taken to give in each case the pronunciation or pronunciations which represent the best current usage in the careful, but not necessarily the most formal, style of pronunciation.

THE SYLLABLE.

§ **110.** In any group of speech sounds, some make a stronger impression upon the ear than others; that is, some have greater *acoustic prominence* or *acoustic impressiveness*. Such prominence of a sound may be due to *accent*, with greater force or higher pitch of the voice, or to the superior *sonority* of the sound. When the prominence of a sound in a group is due to its superior sonority we recognize it as forming a **syllable**, either alone (as **a** in **a'ble**) or together with the less sonorous sounds about it (as **tram** in **tram'ple**). In such a word as **halt** (hôlt), there is the very sonorous sound represented by **a**, the less sonorous sound of **l**, and the unsonorous sounds of **h** and **t**. If we take the word **halted**, in which the two very sonorous sounds of **a** and **e** are separated by the unsonorous **t**, we feel that the word is thus divided into two groups, each characterized by a point of superior sonority, and we say that the word is *dissyllabic*, that is, that it has *two syllables*. That sound in a group which is the most sonorous is said to be *syllabic;* all the other members of the group are said to be *unsyllabic*. Vowels from their nature (§ 37) are almost always used in syllabic function, but the more vowel-like consonants, as **l, n, r**, may also be so used. Thus in **battle**, (a dissyllable) the final **e** is silent and the vowel-like **l** has the syllabic function

We commonly pronounce words like **penny** (pĕn'ĭ), **missive** (mĭs'ĭv), in two sound waves, but with a single breath impulse, the medial consonant (**n**) or (**s**) being pronounced but once, while in words like **missend** (mĭs-sĕnd'), **penknife** (pĕn'nīf') as carefully pronounced we have two sound waves and also two breath impulses, the medial consonant (**s**) or (**n**) being pronounced double. In either case we have two syllables, which in **penny** (pĕn'ĭ), **missive** (mĭs'ĭv) we recognize chiefly from the superior sonority of the two vowels, there being no perceptible break, or pause, between the two syllables in ordinary pronunciation. One syllable ends and the other begins with the medial consonant, so that the end of the first and the beginning of the second are simultaneous, as the end of one hour and the beginning of the next. In **missend** (mĭs-sĕnd'), however, we recognize the two syllables not only from the superior sonority of the two vowels, but also from the sensible though slight break, or pause, between the end of the first breath impulse and the beginning of the next, the medial consonant being doubled, or geminated.

Speech sounds differ widely in sonority, according as they are voiced or voiceless and unimpeded or impeded in their utterance. The vowels being the most open voiced sounds are, therefore, the most sonorous sounds, and it is upon them that language chiefly depends for its audibility, although also, to a less degree, upon the vowel-like consonants (as **l, r, n**). Of the vowels the most sonorous are, of course, the most open, as **ä** (**ärm**), **ō** (**ōrb**), the least sonorous are the high vowels as **ē** (**ēve**), **o͞o** (**po͞ol**), etc., the high *front* vowels being less sonorous than the high *back* ones. Voiced consonants are, next to the vowels, the most sonorous sounds, and the voiceless consonants are the least sonorous, the voiceless stops having practically no sonority. The less sonorous consonants, having little sound in themselves, may be said merely to modify the vowels. Words in which each consonant is separated from the next by a vowel are the most distinct, and a language consisting of such words would be ideal from this point of view. On the other hand, a phonetically *complete* syllable would, ideally, consist of a group of speech sounds increasing in sonority from the least sonorous sound up to the most sonorous and decreasing again to the least sonorous. The syllable-forming power of a speech element in combination with other elements is variable, depending upon its *relative* sonority. Thus in such a word as **play'ing** the sonority of the vowel **a** so far exceeds that of the sonorous consonant **l** (which in some cases can form a syllable) as entirely to overcome the latter's syllabicness, or syllable-forming power. Thus, when two sounds of unequal degrees of sonority come together, that one which has the greater sonority is the syllable former. Minor superiorities of acoustic prominence are generally not noticed; therefore such words as **spry, sky, rats**, are treated as monosyllabic, though the unsonorous stops, **p, k, t**, really break each of the words into two sound groups. A diphthong, as already seen (§ 95) is always monosyllabic, either by itself, or together with the less sonorous sounds about it. One element of a diphthong is always more open and sonorous than the other, and is therefore, the syllable former, the other being nonsyllabic. Thus, in **ai, au**, the first sound (approximately **ä**) is syllabic.

The **boundary between syllables** is, in any case, the point of weakest sonority The force or stress of utterance is often weakest at the point of weakest sonority, increasing with the increase in sonority, and a new syllable, therefore, often begins with the beginning of the increase in force.

When one medial consonant sound stands between two vowels the new syllable usually begins with the consonant sound when the first syllable is unaccented, as in **be-gin', become'**, or when the first syllable is accented and contains a long vowel, as in **la'dy**, it usually begins after, or within, the consonant when the first syllable is accented and contains a short vowel, as in **never** (nĕv'ẽr), **pen'ny** (pĕn'ĭ). It is not, however, possible to draw an exact line in all cases. A very slight difference in the distribution of stress will often determine whether a single consonant is thrown with a preceding or a following syllable. Etymological consciousness sometimes causes a division, not only in print but also in the spoken word, slightly different from one based entirely upon sound, as when we say **up-on'**, instead of **u-pon', van'dal-ism**, instead of **van'da-lism**, etc.

An **open syllable** is one ending in a vowel, as either syllable in **la'dy**; a **closed syllable** is one ending in a consonant, as either syllable in **com'mon**. A syllable that is closed as written or printed may be open as spoken; as, **at-tend'** (ă-tĕnd').

In the mechanical **syllabication of words in writing or print** (§ 276), the division is partly phonetic (coincides with the pronunciation) and partly etymological (corresponds with the derivation), as, **la'dy** (lā'dĭ), **cot'ton** (kŏt''n), but **bend'ing** (bĕn'-dĭng). Such mechanical separation of the syllables also often indicates a more distinct break or pause than occurs in speech. Thus in **missend**, and in a careful pronunciation of **penknife**, we make a distinct break, a sensible pause, between the two syllables, but in **missive, penny**, no such break occurs in pronunciation (as is seemingly indicated by the hyphen, **pen-ny**), the boundary of the two syllables being marked simply by a diminution of the sonority, or of the stress, or of both.

CHARACTERISTICS OF ENGLISH PRONUNCIATION.

§ **111.** Every language has certain characteristics of pronunciation which give it distinctive phonetic character. In English, the tongue, when articulating, is characterized by laxity. It is not made so tense as in many other languages, as the French, for instance. In articulating the front vowels it is not pushed so far forward, nor in the back vowels drawn so far back. There is also a constant tendency to lower and flatten the tongue, hollow the front of it more or less, like a spoon, and to draw it away from the teeth. The lips are inactive, never, except sometimes for rhetorical purposes, protruded and vigorously rounded as in the French and German rounded vowels, nor spread at the corners as is often done for clearness in uttering the unrounded vowels of those languages.

The characteristic neutral position of the tongue in English speech favors wide, low, and mixed vowels: the second elements of the diphthongs are usually indistinct, while the hollowing of the tongue often imparts to the speech a dull and hollow sound, such as is particularly noticeable in the pronunciation of **I**. There is a constant tendency to obscure the vowel sounds in all unaccented syllables, and to modify many accented vowels into or toward the mixed form as **e** in **her** or **u** in **but**.

English articulation may, in general, be characterized as sluggish or muffled, the French and German, for example, as vigorous and clear. American articulation is, in general, clearer than British. The articulative position is characteristically further forward in the mouth and the articulation more vigorous, while the vowels of lightly accented, or even unaccented syllables, are pronounced more clearly in America than in the south of England (cf. involuntary, *Amer.* -tā-rĭ, *Eng.* -tā-rĭ; extraordinary, *Amer.* -nā-rĭ, *Eng.* -nā-rĭ, etc.). Nasalization, which is common in both countries, is more characteristic of American pronunciation. Intonation (inflection) which is rather marked in British speech, is much less so in American speech, which is, therefore, more nearly monotonic.

III. THE ELEMENTS OF SPOKEN ENGLISH.

THE LETTERS OF THE ALPHABET AND IMPORTANT COMBINATIONS.

A number of foreign sounds which are of frequent occurrence in the words included in the vocabulary, and which are either more or less exceptional, or are pronounced in more than one way in accepted usage, are described in this list. A description of many other foreign sounds, together with general observations on some of the more important foreign languages, with reference to accent, etc., precedes the Gazetteer, pp. 2375–8.

A.

§ **112.** In the Greek language the letter *alpha* (the Greek letter with which our **a** corresponds) represented a single sound, that of English **a** in **art**, which was either long or short in quantity, the short sound having the same *quality* as the long, but being pronounced more quickly (§ 74). This was the value of the letter **a** in Latin also, and in the various alphabets founded upon the Latin, including that of Anglo-Saxon, or Old English; and the same value is mainly retained to the present day in the languages of Continental Europe. In present English use, however, the letter **a**, like the other vowel letters, has come to have a number of different values. Its original sound, as in **art**, now a comparatively rare sound in English, has been continually weakened or narrowed into other vowel sounds, but the symbol has been retained for all of them. Thus **a**, in standard modern English, represents the following sounds:

ACCENTED.

(1) **ā** in **āle**, § 113.	(5) **à** in **àsk**, § 119.
(2) **â** in **câre**, § 114.	(6) **a** in **all**, § 120 = **ô**, § 156.
(3) **ă** in **ăn**, § 116.	(7) **a** in **swan**, § 122 = **ŏ**, § 204.
(4) **ä** in **ärm**, § 117.	(8) **a** in **any**, § 123 = **ĕ**, § 150.

UNACCENTED.

(9) **ā** in **sen'āte**, § 124.	(10) **ă** in **ăc-count'**, § 126.
(11) **ȧ** in **so'fȧ**, § 127.	(12) **a** in **cel'lar** = **ĕ**, § 157.

The chief of these (accented) sounds are those in **am, ale, all, arm.**

ā.

§ **113.** (1) **ā** as in **āle, fāte, māk'er, pro-fāne'**, commonly called "long **a**" (§ 76). This is the name sound of the letter. It is otherwise represented as in **pain, day, break, veil, obey**, and also, exceptionally, as in **gaol, gauge, aye**. The typical sound here represented is the mid-front-narrow vowel (§ 47), of which the wide correlative is **e** in **end** (§ 150). In standard English **ā** is not usually a pure, or simple, sound, but is diphthongal in character, often beginning with the initial element lowered and widened toward, or even to, the sound of **ĕ** in **ĕnd**, and ending with a brief sound (glide or vanish) as of **ĭ** in **ĭt**. This

vanish is more marked in the accepted pronunciation of the south of England than in American English, in which it is often nearly or quite lacking. It comes out more clearly in some positions than in others, as when the vowel ends a syllable, or comes before a voiced (sonant) consonant, as in **āle**. Long vowels are slightly shortened before voiceless (surd) consonants, and the vanish is less evident in such words as **gāte, fāke**, etc.

The symbol **ā** is used in the respelling for pronunciation to represent the close sound of **e** in foreign loan words, which in most of the languages that such words come from is the pure mid-front-narrow vowel, as in **consommé, forte, auto-da-fé, José**, etc., the glide or vanish, common in English, being entirely absent. In addition to being a pure, or simple, sound, it is commonly slightly higher and narrower in such languages as German, French, Italian, etc., than in English. In the Scottish dialect the long **a** (**ā**) is pure, like the foreign sound.

â.

§ **114.** (2) **â** as in **câre, shâre, com-pâre′, pâr′ent**, etc., occurs in standard English only in syllables closed by **r**, and more or less strongly accented. The sound is also often represented by **e** before **r**, as in **thêre** (§ 94), and otherwise as in **air, bear, heir, prayer**. The typical sound here represented may be considered as the low-front-narrow vowel (§ 47), of which the wide correlative is **ă** in **ăm** (§ 116), and not simply the latter sound prolonged, as it is described by some. It is described as low-front-narrow by Dr. Sweet, who identifies the sound with the French and Italian long "open" **e** (as in **tête, père**, etc.). The sound, however, varies in the mouths of different speakers, and has therefore been differently analyzed by phoneticians and orthoepists. By A. J. Ellis, and later by Dr. Murray in the Oxford English Dictionary, the sound has been described as the long or narrow correlative of **ĕ** in **ĕnd**, which is the usage of many speakers.

In passing from the vowel to the **r** in all these words there is a distinct glide (§ 94), as of **ĕ** in **ev′ĕr**. The vowel sound in such words as **e′er, ere**, etc., is sometimes indicated by **ā**, but in these cases the glide from the initial element of the **ā** (§ 113) is similar to **ē** in **ev′ēr** rather than to the **ĭ** in **ĭt**, with which the **ā** as in **āle** ends.

The **â** does not occur in perfectly weak, or unaccented, syllables. In words like **wel′-fâre, war′fâre, cor′sâir**, etc., the final syllable is slightly stressed (§ 80).

§ **115.** An **a** before **r** does not ordinarily take the sound **â** when the **r** immediately precedes a sounded vowel or another **r** in a following syllable of the word; as in **păr′i-ty, păr′ry, chăr′i-ty**, etc.; and in **chā′ry, wā′ry, Mā′ry, vā′ry**, etc. In the words of the second group its pronunciation varies between **ā** (**āle**) and **â** (**câre**), being most often **ā** in American usage and **â** in British usage. The sound, however, remains unchanged by the addition of an inflectional ending to a root word (as **shâre**), as in **shâr′ing, shâr′er**. For an analogous effect of a following **r** upon the vowels **e** and **o**, see §§ 154, 202.

ă.

§ **116.** (3) **ă** as in **ăm** (emphatic), **hăt, băck, răn′dom, tăp, păr′i-ty, hăd, hăg, măn, hăm**, etc., is commonly called "short" **a** (§ 76). It is otherwise represented as in **plaid, guaranty**, etc., and is the commonest (accented) sound of **a** in English.

The standard sound is low-front-wide (§ 47). Many Americans lengthen the sound in certain words, as in the monosyllables beginning with **had** in the preceding paragraph, so that it becomes almost identical with the low-front-narrow **â** in **câre**. The proper sound of "short" **a** is a difficult one for foreigners to acquire, and **ȧ** (**ȧsk**), or **ĕ** (**ĕnd**), is often substituted for it. In English and Scottish dialect speech either **ȧ** or the short form of **ä** is the usual sound where standard English has **ă**.

"Short" **a** occurs unaccented in initial syllables, as in **ac-count′, al-lude′, at-tack′** in rhetorical speech, but ordinarily it is more or less obscured in this position; see § 126.

ä.

§ **117.** (4) **ä** as in **ärm, färr, fä′ther, äh, älms, pälm**, etc., with equivalents as in **hearth, aunt, guard**, etc., is commonly called "**Italian**" **a**, although it is characteristic also of Spanish, German, and other European languages. It is, in fact, with some slight variations, the usual sound of the letter **a** in other languages than English.

This sound is classed by Dr. Sweet as the mid-back-wide vowel (§ 47), but it is variously classed by other phoneticians, many of whom conceive it to be lower than mid-back. It is often called the "**open-throat**" **vowel**. In American pronunciation, **ä** occurs most often before **r**, but it is also used by some American and many English speakers, especially in the south of England, before **f, s, th, nce, lf**, etc. (see § 119), in such words as **waft, ask, path, basket, master, pass, bath, after, last, answer, France, dance, calf, half**, etc. Most Americans, however, employ in these words either a transition sound (intermediate between **ä** and **ă**, § 119) or the **ă** in **ăm**. Before **l**, as in **calf, half**, etc., **ä** is the generally accepted sound, though **ȧ** (§ 119) or **ă** is also common in many of these words (not, however, in **calm, palm**, etc., in educated speech.) For the sound of **ä** as represented by the digraph **au**, see § 131. There is considerable variation in the pronunciation of **ä** in English, a medial form with a moderate opening of the mouth being perhaps most approved.

§ **118.** The symbol **ä** is also employed to represent "Italian" **a** in unaccented initial syllables, as in **är-tis′tic**. In such cases it indicates the short form of **ä** (§ 74). It is also used to indicate the "Italian" **a** sound in foreign words, whether in accented or in unaccented syllables, the *quality* in either case being practically the same, the only difference being one of actual *quantity*.

ȧ.

§ **119.** (5) **ȧ** occurs in **ȧsk, stȧff, grȧft, pȧth, pȧss, grȧsp, lȧst, dȧnce, chȧnt, com-mȧnd′**, and similar words, before **sk, ff, ft, th, ss, sp, st, nce, nt, nd**; and in some other cases. The sound here represented is not the short form of "Italian **a**" (**ärt**) described in the preceding paragraph. It is medium or long in *quantity*, and variable in *quality* between the limits **ă** (**ăm**) and **ä** (**ärt**), usually more closely resembling the latter sound, but articulated further forward in the mouth, which is not usually so widely opened as for **ä**. Dr. Murray says of the symbol employed for this sound in the Oxford English Dictionary that it is purposely ambiguous. Dr. Sweet does not recognize the sound in current English, but marks the words of this group as pronounced with the vowel sound in **art**, which is a common pronunciation among cultured speakers in the south of England, especially in London, and with some Americans.

The intermediate, or transition, sound here employed is useful as being a compromise between the **ä** (**ärt**), which by many is considered affected in this class of words, and the **ă** in **ăm**, which is disagreeably "flat" to those whose ears are trained to the fuller sound. It is indicated in the chief dictionaries of English, and is used by many cultivated speakers.

The symbol **ȧ** is also used to indicate the sound of French **ȧ** as in **pȧtte**, etc., which in accepted French pronunciation has also an intermediate sound, often approaching **ă** in **ăt**.

a as in all = ô.

§ **120.** (6) **a** as in **all, talk, swarm, wharf, wa′ter, bal′sam**, etc., — otherwise represented in **haul, draw, awe**, etc., — is equivalent to **ô** in **ôrb, bôrn** (see § 202), and the symbol **ô** is used in the respelling for pronunciation, however the sound may be represented in the usual spelling; thus, **all** (ôl), **talk** (tôk), etc. To mark a word containing this sound of **a** without respelling, two dots are placed beneath the **a**; thus, **a̤ll, ta̤lk**.

§ **121.** When the sound occurs in initial unaccented syllables it is briefer, and consequently the tongue position is more lax and the lips slightly less rounded (§88); as in **al-might′y, au-thor′i-ty, aus-tere′, au-dac′i-ty, ȧl-though′**. The symbol **ô**, however, is used in the respelling for pronunciation for the sound wherever it occurs, whether long or short. This shorter sound of **au** in unaccented syllables is not the same as the **ŏ** in **ŏdd, nŏt**, etc. (§ 204), as that sound is pronounced by the majority of educated speakers either in England or in America, and should not be identified with it. It is of the same quality as accented **au**, but shorter in actual quantity.

a as in swan = ŏ.

§ **122.** (7) **a** as in **was, what, wan′der, wal′low, swan, qual′i-ty**, etc. The sound is the same as that of **ŏ** (**ŏdd, nŏt**) described in § 204, and is represented in the respelling by **ŏ**; thus, **swan** (swŏn), **was** (wŏz), etc. To mark a word containing this sound of **a** without respelling, a dot is placed beneath the **a**; thus, **wa̤s, swa̤n**.

a as in any = ĕ.

§ **123.** (8) **a** with the sound of **ĕ** (**ĕnd**) occurs in but a few words; as **any** (ĕn′ĭ), **many** (mĕn′ĭ), **Thames** (tĕmz) (the river in England).

ȧ.

§ **124.** (9) **ȧ** as in **sen′ȧte, prel′ȧte, pref′ȧce, sur′fȧce, rav′ȧge, sav′ȧge, vil′lȧge**, etc. In words of this class, the **ȧ**, in ordinary conversation, falls into a sound nearly that of **ĕ** in **ĕnd**, or of **ĭ** in **ĭt**, but more or less obscured. It is only in formal or syllabic utterance that an approach to the sound of **ā** (**āle**) is heard, and even in this form of speech the vanishing sound commonly heard in **ā** (§ 113) is properly omitted, leaving simply the initial element of the **ā** sound. The symbol (**ȧ**), which is used in the respelling of these words, indicates by the downward stroke the omission of the vanish.

§ **125.** The same symbol (**ȧ**) is used in the case of many adjectives and nouns where the corresponding verb is marked with **ā**, as in **ad′vo-cāte** (*n.*), **ag′gre-gāte** (*n.*), **con′ju-gāte** (*a.*), and in such cases the sound, even in colloquial speech, is often nearly that of **ā**, and in some cases is marked with **ā**.

Also, **ȧ** often occurs before another vowel, usually accented, in the following syllable, as in **chȧ-ot′ic, Ju′dȧ-ism**. Here, too, the sound commonly is nearer that of **ā** (**āle**). In words like **mis′cel-lȧ-ny, sal′u-tȧ-ry, sump′tu-ȧ-ry**, the **ȧ**, before **ny** or **ry** final, and with the preceding syllable unaccented, has somewhat of the **ā** sound; more often so in American than in British use; but if the preceding syllable is accented, as in **bot′a-ny, di′a-ry, sal′a-ry, pri′ma-ry, bound′a-ry**, the sound of **ȧ** as in **so′fȧ** (§ 127), is usually preferred, yet in **con′tra-ry** and **li′bra-ry** the **ȧ** (approaching **ā**) is easier to give, and in these and some others of the class is common and allowable. The **ay** in **Monday**, etc., varies between **ȧ** and **ĭ** (**ĭll**), in ordinary speech, commonly becoming almost or quite **ĭ**. In words of the various classes mentioned in this group, the **ȧ** is usually more obscured in quality by English than by American speakers.

ȧ.

§ **126.** (10) **a** in initial syllables, closed by a consonant in the spelling, as in **ab-bre′vi-ate, ac-count′, ac-crue′, ac-cu′mu-late, ad-ja′cent, ad-just′**, etc., — also in final closed syllables, as in **fi′nal, mor′bal, loy′al, syl′van, va′cant, break′fast, dis′taff, mad′am, myr′i-ad**, etc., — is more or less obscured in ordinary speech, becoming almost or quite the same as **ȧ** in **so′fȧ, i-de′ȧ** (§ 127). It is only in formal speaking that the full quality, **ă** in **ăt**, is brought out. These words are marked with an italic (*ă*) to indicate the quality of **ă** (**ăt**), with allowable and variable obscuration in colloquial speech; thus **ac-count′** (ă-kount′), **accrue** (ă-krōō′).

ȧ.

§ **127.** (11) **ȧ** as in **ȧ-bound′, ȧ-bun′dant, ȧ-bide′, cȧ-rouse′, di′ȧ-dem, bot′ȧ-ny, so′fȧ, i-de′ȧ, Af′ri-cȧ**, etc., occurs in open unaccented syllables (cf. § 110). The sound of **a** in these words has long been taken to be that of **ȧ** (**ȧsk**) with more or less obscuration toward the neutral vowel sound **ē** in **ev′ēr**. In previous editions of Webster's Dictionary the mark **ȧ** has been used for the sound of **a** here described, but in the present edition the **ȧ** is made italic (*ȧ*) to show the usual obscuration. Some phoneticians would mark the **a** here, as well as in the groups described in the preceding paragraph, with the same symbol as for **ē** in **ev′ēr**, and they would do the same for unaccented **ŏ** as in **vi′ŏ-let**, etc., but many are opposed to such complete obscuration, preferring a more careful or formal pronunciation with more of the quality of the sounds as occurring accented.

æ.

§ **128.** Usage varies somewhat in the pronunciation of this digraph. It is usually pronounced as **e** would be in the same position. A pedantic pronunciation of it as long **ē** (**ēve**) where it naturally takes the short sound in English pronunciation, as in **æsthetic, æstuary**, obtains to some extent, especially in British academic circles.

æ represented in Anglo-Saxon, or Old English, a simple sound, that of modern English **ă** (**ăm**). It was either long or short in quantity, but always the same in quality (§ 74) Short **æ** was replaced by **a** or, sometimes, **e**; as, AS. **glæd, hæt**; ME. **glad, hat** (with short **ă**, as in **ăr-tis′tic**); modern English **glad, hat** (with **ă** as in **ăm**). Long **æ** was replaced by **e** long or **ee** (pronounced as **ā** in **āle**) in ME., becoming **ee** or **ea** (pronounced as **ē** in **ēve**) in modern English; as, AS. **sæd, rædan**; ME. **seed, rede**; mod. Eng. **seed, read**. Before **r**, long **æ**, variously represented in mod. Eng., has usually retained its long sound; as, AS. **hær, hwær**, mod. Eng. **hair, where**, etc.

In the early modern English period the symbol **æ** was re-introduced in words derived from the Latin with **æ** (**ae**), and in words from the Greek with **αι**, coming through the Latin; as, **æther, ægis**. As this **æ** is usually pronounced as a simple **e** would be in the same position, the value of the character has been chiefly etymological, and whenever a word containing it has come into the common English vocabulary, except where for some reason other than phonetic it has been desirable to retain it, as in technical terms or in words indicating classical things, or in classical names, there has been a strong tendency to change the **æ** to **e**; as in **primeval, coeval**, etc. In many modern books the digraph **æ** is printed **ae**. In this case dissyllabic **ae**, as in **aërial**, should be printed **aë**.

ai.

§ **129.** The digraph **ai** usually represents the sound of "long" **a** (**ā**) as in **ail, mail, sail, vain, rain**, etc. (§ 113), or before a following **r**, the sound of **â** (**câre**), as in **air, fair, pair**, etc. (§ 114). In words of foreign origin and of recent adoption it often has the sound of **äĭ** or **ī**, as in **kaiser, Ainu**. In French it has, when long, nearly the sound of **ā** (**āle**, § 113); when short, nearly that of **ĕ** (**ĕnd**).

ail, aill, in French. See **il**. **aim, ain**, in French. See § 130.

am, an, and other nasal vowels in French words.

§ **130.** **M** and **n** in French, when final, or followed in the same syllable by a consonant other than another **m** or **n**, and following a vowel, indicate that the preceding vowel is pronounced with a nasal tone (§ 60). In producing these nasal vowels, the breath or voice is allowed to pass out through *both* the *nose* and the *mouth*, so that the vowel sounds remain unchanged, except for the accompanying nasalization. The **m** or **n** is not sounded, except as thus giving the nasal tone to the vowel. These nasal vowel sounds thus differ materially from English vowels *followed* by **n** or **ng**, in the pronunciation of which the oral passage is entirely closed. A small capital (N) is used in the respelling to indicate that

a preceding vowel (also, in Portuguese, a diphthong) is nasal. The nasal vowels in French are **an, an, en,** all having regularly the sound of **ä** in **fär,** made nasal as here described; **aim, ain, eim, ein, im, in, yn,** all having the sound of **ă** in **făt** made nasal (**ien,** when final in a word or syllable, as in **mien, bien,** etc., also in certain inflections of the verbs *venir* and *tenir,* as **viens, tiens, devient,** is pronounced as **y** followed by **ă** made nasal; as, **mien, bien,** *pron.* myăn, byăn, etc.), **om, on,** having the sound of **o** in **or** made nasal; **um, un,** having the sound of **u** in **up** made nasal. There are thus four French nasal vowel sounds (variously written), as in *un bon vin blanc* (ŭn bôn văn blăn), *a good white wine.*

au.

§ **131.** This digraph, occurring in words of Anglo-Saxon (exceptionally), Old French, Latin, and Greek origin, regularly represents the sound of **ô** (**lôrd, law**), as in **aught, taut, caught, caustic, haul,** etc., but also, when followed by **n,** as in **taunt, haunt, launch, laun'dry,** etc., the sound of **ä** as in **ärt.** In the second group of words usage varies, many educated speakers using **ô** (**ôrb, law**), and both pronunciations of these words are given in the Dictionary, that with **ä** being usually preferred.

In French words of later adoption **au** often has the modern French sound **ō.** as in **au lait, vaudeville** (the latter through popular use now often pronounced with **ô** (**ôr**)) In words from the German, and most other languages, it has the sound of English **ou** (**out**), as in **sauerkraut, flauto.**

aw.

A digraph, pronounced as **ô** (**ôr**), formerly interchangeable with **au,** but now the usual form finally and before **k, l,** and **n**; as in **caw, law, saw, hawk, crawl.**

ay.

A digraph representing the sound of **ā** (**āle**), as in **hay, say,** etc.; or, unaccented, **ă,** as in **Mon'day,** etc. Exceptionally, it has the sound of **ē** (**ēve**) in **quay,** and of **ĕ** (**ĕnd**) in **says.**

B.

§ **132. B** as in **boy, cab, ebb, rob'ber, beau'ty, bring, blow, a'ble, herb, bulb, robs,** etc. This is the voiced labial stop (§ 71), the correlative voiceless stop being **p,** as in **pie** (§ 217), both sounds having the same articulative position as the nasal **m** (§ 196), the oral closure for all three being between the lips, which are brought lightly but firmly together in the pronunciation of each (§ 60). **B** is usually silent after **m** in the same syllable, as in **bomb, climb, tomb, thumb**; though sometimes sounded, as in **rhomb.** It is usually silent before **t** (except in compound words); as in **debt, doubt, sub'tle.** In a few other cases, especially when initial before another consonant, as in **bdel'li-um,** it is also silent.

In the chief foreign languages from which loan words are taken **b** is in general as in English. For exceptions and special cases see page 2376.

§ **133.** In Spanish, **b** has nearly the same, but not quite so forcible a sound as in English, being made with the lips brought together with a loose or feeble contact, not a firm one as in English. It often sounds, therefore, especially between two vowels, as in **caban** (ka-băn'), **juba** (hōō'ba), much like English **v** in **have,** so that the two sounds and also their symbols are often interchanged. Cf **Havana, Habana, Córdoba, Cordova.** The sound of Spanish **b** between vowels is the same that **b** (*beta*) has in all positions in modern Greek, and much the same as the **w** sound common in middle and south Germany. Spanish **b** is usually indicated by **b** in the respelling, with a reference to this section.

bb is usually pronounced as a single **b.** See § 107.

§ **134. bh** in Sanskrit and many modern East Indian words is, in the native pronunciation **b** + **h,** as in **cob house,** but the **h** may be omitted in English pronunciation.

C.

The letter **c** represents sounds of two classes:

§ **135.** (1) The so-called "**soft**" **c** has a sibilant sound of three varieties. The most frequent of these sounds is identical with "sharp" **s,** as in **sun.** It is sometimes written **ç,** as in **façade,** and this device is used when it is desired to indicate the sound without respelling a word containing it. In the respelling for pronunciation it is represented by **s.** The letter has this sound before **e, i,** or **y,** as in **cede, civil, cypress, acid, glance, force, vice,** etc. "Soft" **c** occasionally has the sound of **z,** as in **sacrifice.**

Before an **i,** less often an **e,** followed by another vowel in the same syllable, "soft" **c** commonly takes the sound of **sh,** either by itself, as in **oceanic,** or by assimilation with the **i** or the **e,** which palatalizes it, as in **vicious, ocean,** etc. See § 109.

§ **136.** (2) The so-called "**hard**" **c** with sound of **k,** and represented by **k** in the respelling, or by **c** when it is desired to indicate the sound without respelling. **C** has this sound before **a, o,** or **u,** or a consonant (except **h**; cf. **ch**), and at the end of a syllable if not followed by **i** or **e**; as in **call, cave, cold, pic'ture, ac'rid, act, ethics, cry, clay, arc, talc, sanc'tion, disc, almanac, scan, ac-cord', vac'ci-nate**; also before **e** in **sceptic,** as sometimes spelled, and before **i** in **scirrous,** etc.

§ **137. C** is **silent** in **czar,** etc., as commonly pronounced; also in **victuals, indict,** and in **muscle, corpuscle,** etc.

§ **138. C** in Castilian Spanish (*Sp.* in the respelling for pronunciation) before **e** or **i** is pronounced like English **th** in **thin,** but in other parts of Spain, as Andalusia, it is pronounced as **s** in **sun,** and this latter is the usual pronunciation in Spanish America, where the Castilian sound, although often taught in the schools, is commonly regarded as affected. In the Philippine Islands, also, the sound of **s** is usually given to **c** in this position. In this Dictionary **c** before **e** or **i** in Spanish words and names pertaining to Spain, or in general use, is given the Castilian sound, as theoretically, at least, the better; in words or names pertaining especially to Spanish America or to the Philippine Islands, the letter is given the more usual **s** sound (together with a reference to this paragraph), although in learned words, or words likely to be used chiefly by the highly educated, the Castilian sound is also given. Cf. **Z,** § 268.

☞ For **C,** alone or in combination, and with various diacritical markings, in other foreign languages, see page 2376.

cc is usually pronounced as **k-s,** as in **flaccid** (flăk'sĭd), **hæcceity** (hĕk-sē'ĭ-tĭ), etc.

Ch.

This digraph, which is treated as a separate element of the alphabet in some languages, as Spanish and Welsh, has various sounds in English, as follows:

§ **139.** (1) The most frequent sound is diphthongal, and is approximately described as **tsh**; as in **chin, child, choose, church, much, beech, arch,** etc. Most phoneticians analyze this sound as a combination of **t** and **sh,** but these elements are not simply pronounced in succession, without change, as are, for instance, **k** and **s** in **box** (bŏks); they blend into a composite sound, in which the sound both of the **t** and of the **sh** is changed somewhat, so that many can hear neither element, and hence regard the sound as simple. **Ch** has this diphthongal sound in all native English words. It often has as an equivalent the trigraph **tch** at the end of a syllable; as in **hatch, watch, fetch, ditch, satchel.** The sound is the same as that of German **tsch,** as in **Deutsch,** except that in German pronunciation the lips are more vigorously protruded. **Ch** occasionally has the sound of **j,** as in one pronunciation of **spinach.**

The sound of **ch** (**tsh**) is also represented by **ti,** as in **bastion, question,** rarely by **te,** as in **righteous,** and also in colloquial pronunciation by assimilation of **t** or **d** to the initial element of **u** in **nature, verdure,** etc. See § 109.

§ **140.** After **n,** as in **bench, finch, lunch, munch, wench,** etc., most English orthoepists treat the **ch** as simple **sh,** writing phonetically **bensh, finsh,** etc., while those of America indicate **ch** (or **tsh**), and this apparently represents a real difference in British and American pronunciation.

§ **141.** (2) **Ch** has in English the sound of **sh** in **she** in words from modern French, as **chagrin, machine, mustache, barouche**; also in some words from Old French, in which historically the sound is **ch** (**chop**), but in which through analogy with other more recent borrowings it has become **sh,** as in **chivalry, champaign** (flat ground). To mark a word containing **ch** with sound of **sh** without respelling, **ç**h is used.

§ **142.** (3) **Ch** "hard" has the sound of **k,** by which it is represented in the respelling, the sound being otherwise indicated by **-ch** when it is desired not to respell a word containing it. The digraph has this sound in most words (except quite recent ones) taken from the Greek, directly or through the Latin, as in **chorus, epoch, echo. chlorine, chrism, character, chyle**; also in most words or names from the Hebrew, as in **Chaldea, Enoch, Nebuchadnezzar.** In a comparatively few such words the sound of **ch** (**chop**) occurs; as in **chart, church, cherub, Rachel**; also in the prefix **arch-,** as in **archbishop, archdeacon, archduke**; but the **k** sound remains in **architect, archangel, architrave.**

§ **143. Ch** is **silent** in **drachm, schism, yacht,** and in **fuchsia,** as a common plant name.

§ **144. Ch** represents a palatal (front) or guttural (back) fricative in an accurate pronunciation of certain words from the German, Dutch, Scotch, Celtic, modern Greek (represented by χ), the Slavonic, and various Oriental languages. The sounds represented by **ch** in these words vary considerably in character, both according to the language from which the words come, and according to the sound immediately preceding (or following) the **ch**; but they may be described as of two typical classes:

(**a**) The palatal (front) fricative is made with the tongue in position for the sound of **y** in **yes,** but raised closer to the hard palate, so that there is more distinctly audible friction. It should be learned from one familiar with it, but may be imitated by exaggerating the slightly fricative sound of **y** in **yes** (making the sound voiceless), or of **h** in **hue,** or by pronouncing **k** in **key** so that the breath passes through an extremely narrow passage between the tongue and the hard palate, instead of being entirely stopped. This palatal (front) fricative is typically that of **ch** in standard German "**ich,**" often called the "ich-laut" (i. e. "ich-sound"). This sound commonly occurs after front vowels, as **i, e,** and after consonants.

(**b**) The guttural (back) fricative is usually deeper and stronger than the palatal (front) form, and resembles somewhat a light hawking or clearing of the throat. It may be imitated by pronouncing **c** in **cow,** with the closure between the back of the tongue and the soft palate loosened so that the breath passes through an extremely narrow passage, instead of being entirely stopped. The German sound of **ch** in **ach,** often called "ach-laut" (i. e. "ach-sound") may be taken as the typical guttural fricative sound, which follows a back vowel (as **a, o, u**).

These sounds of **ch,** from whatever source, are indicated in the respelling by a small capital (ĸ), so that those who are familiar with them or who wish to imitate them may know that the word so marked is not entirely Anglicized and that the foreign sound may properly be given. The nature of the sound immediately preceding a **ch,** or, when the **ch** is initial, of that immediately following it, will in any case sufficiently determine whether the **ch** sound is palatal (front) or guttural (back). Ordinarily, one who has not acquired the foreign pronunciation, if he has occasion to employ a word containing such a **ch** sound, usually pronounces it as simple **k.** Cf. **gh.**

Ch, chh in Sanskrit and many modern East Indian words are pronounced respectively like English **ch** in **chop** and **ch** + **h** as in **catch him,** but the second **h** in **chh** may be omitted in the English pronunciation of such words.

ci, ce. See under **C,** § 135.

D.

§ **145. D** as in **day, dry, dwell, bed, old, hard, aimed, end, idle, maiden, hugged, enraged, lived, amazed, rugged, naked, assuredly, fixedness, send, send'st** (**s** as in **sun**), is the dental, or, as commonly pronounced in English, alveolar, voiced stop (§ 67), of which the correlative voiceless stop is **t** (§ 235). It is pronounced as **t** when it is preceded by a voiceless sound in the same syllable; as in **hissed, looked, arched** (hĭst, lo͝okt, ärcht). Cf. § 108. It is silent in the first syllable of **Wednesday,** as most often pronounced, and in **handkerchief, handsome**; also in the usual colloquial pronunciation of **grandfather, granddaughter,** etc. In rapid speech, **d** is often palatalized by a following **i** or **ū** (**ūse**), as in **tedious** (*colloq.* tē'jŭs), **verdure** (*colloq.* vûr'jēr). See § 109.

§ **146. D** in Spanish does not have the vigorous English sound, but has more or less of the sound of **th** in **this** Between vowels and at the end of words this sound is more apparent, becoming almost exactly **th** (**this**). At the end of words, however, the sound is weak, and is given as **th** (**thin**) by many, while in colloquial pronunciation it often disappears altogether, as in **Madrid** (mă-drē'). In the respelling, the sound of Spanish **d** beween vowels and at the end of syllables will be indicated by **th** (**this**), together with a reference to this paragraph, as, **barbudo** (bär-bo͞o'thō), **pulgada** (po͞ol-ga'thă).

dd is usually pronounced as a single **d.** See § 107.

☞ For the sounds of **d,** alone and in combination, in other languages, see page 2376.

§ **147. dh** in Sanskrit and in modern East Indian tongues descended from it sometimes represents **d** followed by an aspiration, about as in **madhouse,** but may be pronounced as simple **d** in English pronunciation.

E.

§ **148.** In the classical pronunciation of Latin, the letter **e,** when long (as when representing Greek *eta,* η) represented practically the same sound as English **ā** (**āle**), and when short the same sound pronounced more quickly, or a wider sound, that of **ĕ** (**ĕnd**), the wide correlative of **ā** (§ 48). In most of the languages of Europe which have adopted the Roman alphabet, these two sounds have been retained for the letter, as they were in Anglo-Saxon, or Old English, and in Middle English. In modern English, however, owing to the great changes in pronunciation without corresponding changes in spelling, what was originally the true long sound of the letter **i** (**ē** in **ēve**) has so generally passed over to the letter **e** in certain positions that we now call this sound "long **e**," while the "short **e**" (**mĕt**) has remained as originally sounded, so that we now apply the terms "long **e**" and "short **e**" to sounds which are phonetically unrelated. Cf. §§ 73–4.

The symbol **e** has also acquired other values, the sounds which it expresses in standard modern English being as follows:

ACCENTED.

(1) **e** as in **eve** (ēv), § 149.
(2) **e** " " **end** (ĕnd), § 150.
(3) **e** " " **fern** (fûrn), § 152.
(4) **e** " " **sergeant** (sär'jĕnt), § 153.
(5) **e** as in **there** (thâr), § 154.
(6) **e** " " **English** (Ĭŋ'glish), § 155.
(7) **e** " " **eh** (ā), § 155.

UNACCENTED.

(8) **e** as in **event** (ē-vent'), § 156.
(9) **e** " " **maker** (māk'ĕr), § 157.
(10) **e** as in **moment** (mo'mĕnt), § 158.
(11) **e** " " **heaven** (hĕv'n), § 159.

E is also an element of numerous digraphs. See §§ 162–166.

ē.

§ 149. (1) ē as in ēve, mēte, con/crēte, etc., called "long" e, with the name sound of the letter in modern English, has numerous equivalents, as in feet, beam, de-ceive/, peo/ple, key, Cae/sar, machine, field, quay (exceptional), Phœbus, Portuguese.

The sound here represented has, at least for its main element, the high-front-narrow vowel sound, the wide correlative of which is i in ill. It is the closest and highest of the front vowel sounds (§ 48). A very slight raising of the blade of the tongue from the ē-position, or a slight increase in the force of utterance, by causing slight audible friction, or rustling, of the breath, turns the sound into a consonant, as y in yes. As usually uttered, especially when preceded by a consonant, English ē is not usually precisely this simple high-front-narrow vowel sound, but commonly starting with this sound slightly widened in the direction of ĭ (ill), it is raised and narrowed, the high, narrow vowel sound being its main element. In addition to this the sound commonly ends in an off-glide, or vanish, approaching the sound of consonant y (yes), which is more marked in British than in American English. The actual sound is thus seen to be of diphthongal character in either case, and may be graphically represented thus; iĭ or ɪĭ, though such representation exaggerates slightly the limits between which the sound passes. The ē in English occurs only in words or syllables under some degree of stress (accent), or emphasis. In such words as con/crēte, cen/ti-pēde, there is really a slight stress upon the syllable containing the ē; as there also often is in the prefix re-, as in rē-clothe/ (to clothe anew), and in de-, as in dē-horn/ (to remove the horns from)

The ē is used in the respelling to symbolize the sound commonly represented by i in various foreign languages (§ 178); as in French (divorcée (dē-vôr/sā/), Italian divisi (dē-vē/zē), etc. The sound in these languages, especially in accented syllables, is usually nearly or quite the pure high-front-narrow vowel.

ĕ.

§ 150. (2) ĕ as in ĕnd, pĕt, tĕn, ĕr/ror, etc.; otherwise represented as in feath/er, heif/er, leop/ard, friend, di-ær/e-sis, as-a-fœt/i-da, bur/y, any, said, etc.; is commonly called "short" e. This is the mid-front-wide vowel sound, of which the narrow correlative is ā as in āle (§§ 48, 113). It commonly occurs in closed syllables.

§ 151. Unaccented, ĕ occurs in initial syllables in such words as ĕx-cuse/, ĕn-large/, ĕf-face/, ĕs-tate/, ĕr-ro/ne-ous; also medially in such words as in/tĕl-lĕct, con/stel-la/tion, etc.; but to bring out the full quality of the ĕ in such words it is necessary to give some slight degree of stress or emphasis to the syllable containing it In ordinary colloquial speech the ĕ is obscured somewhat in quality, usually in the direction of the obscure vowel sound between ĕ (ĕnd) and ĭ (pĭn).

The unaccented ĕ in final syllables often verges toward the sound of ĭ in (ĭll), as in ros/ĕs, hors/ĕs, fair/ĕst, wis/ĕst, for/ĕst, riv/ĕt, car/pĕt, end/ĕd, wick/ĕd, wool/ĕn, kitch/ĕn. In this class of words some phoneticians indicate the sound by ĭ (ill). In this book the marking ĕ is preferred as representing the more formal sound and the one to be preferred in the teaching of syllabic pronunciation, but the usual colloquial pronunciation with the vowel nearly ĭ is also indicated in many common words; as, added (ăd/ĕd; ăd/ɪd). The obscuration of the e in these words is thus seen to be always in the direction of ĭ and not in the direction of ŭ (cir/cŭs). The pronunciation of such words as horses, chicken, witness, as hors/ŭz, chick/ŭn, wit/nŭs is not approved. Since ĕ, as in re/cĕnt, indicates the obscuration of e in the direction of ŭ, the symbol ĕ could not properly be used in these words. Cf. §§ 158, 159, 161.

e as in fern = û.

§ 152. (3) The sound of e as in fern, err, her, herd, verge, er/mine, in-fer/, as ordinarily pronounced is identical with the û in ûrn (§ 247), and is symbolized in the respelling by û. Unaccented, it is reduced to ĕ as in mak/ĕr, bak/ĕr, of which it may be considered the long correlative. In words spelled with "er" (accented) when the r immediately precedes a vowel or another r in the following syllable of the same word the vowel sound is that of ĕ (ĕnd), as in vĕr/y, pĕr/il, mĕr/ry, ĕr/ror; except that verbs having the sound of e in her (hûr) almost always retain it when inflected, as in con-fer/ring, de-ter/ring, con-fer/rer.

To indicate the sound without respelling, the words are variously marked as follows: fẽrn, ẽarn, sĩr, mў̃rrh.

e before r.

§ 153. E before r formerly often had the sound of ă (ărm), as in clerk, serve, earth, German, Berkeley, Derby, Hertford, etc. Traces of this pronunciation still remain, as in clerk, Berkeley, Derby, Hertford, Kerr, etc., which in England, esp. in the South, are still often pronounced klärk, bärk/lĭ, därbĭ, Här(t)/ford, kär, etc. Sergeant (sär/jĕnt) preserves this sound in the standard pronunciation of England and of America. In many words where this change of sound has occurred, the spelling is now with a; as, dark, starve, Clark (proper name), etc.

e as in there = â.

§ 154. (4) E as in there, where, and, unaccented, in there-by/, where-by/, otherwise represented as in their, heir, etc., occurs only before r, and is identical with â in câre (§ 114), by which it is represented in the respelling. To indicate this sound of e without respelling it ê is used; as, thêre.

e = i and ā.

§ 155. (6, 7) The sounds of e as in English, England, and as in eh (ā), are exceptional (although e as ā is common in foreign words, cf. § 113).

ĕ.

§ 156. (8) ē as in ē-vent/, é-pit/o-mē, cre-ate/, dē-lin/ē-ate, so-ci/ē-ty is shorter in actual quantity than ē (ēve), and also tends to widen into the sound of ĭ in ĭll, which it often becomes in colloquial speech; as in believe (bĭ-lēv/), receive (rĭ-sēv/), etc.

To give the sound of ĕ in place of ĕ (as so-ci/ĕ-ty) is condemned as a vulgarism, while the pronunciation with the quite narrow ē (so-ci/ē-ty) is frowned upon as pedantic.

ĕ.

§ 157. (9) Unaccented e before r, as in ev/ĕr, read/ĕr, lov/ĕr, sev/ĕr, sev/ĕr-al, pĕr-form/, rev/ĕr-ent, in/fĕr-ence, in/fĕr-view, cav/ĕrn, etc., with equivalents in e-lix/ĭr, zeph/ўr, ac/tor The vowel sound here indicated is, at least in ordinary speech, the "neutral" vowel already described (§ 88). Its tongue position is nearly the same as that for ŭ (§ 246), or for û (§ 247), but the sounds of ŭ and û occur in stressed (accented) syllables only, and in pronouncing either of them the tongue is tenser than for ĕ, the laxity of the tongue in pronouncing ĕ giving it a quite different quality from either of the other two sounds, as may easily be heard and felt by pronouncing such pairs of words as cûr and mak/ĕr, cŭt and sev/ĕr. In colloquial speech, most of the other vowels, when unsupported by stress, tend to fall into this neutral vowel sound (cf. ă, ā, ĕ, ŏ, ŭ, §§ 126-7, 158, 211, 251), and hence in some systems in which regard is had for the colloquial form of speech only, the vowel sounds in unstressed syllables, which in this Dictionary are marked ă, ā, ĕ, ē, ŏ, and ŭ, are identified as one sound, that of our ĕ. Words containing this sound spelled otherwise than with e may be marked without respelling, as follows: e-lix/ĭr, zeph/ўr, ac/tŏr, etc.

ĕ.

§ 158. (10) The e before n and l in unstressed syllables, — as in mo/ment, pru/dent, de/cen-cy, nov/el, in/fi-del, jew/el, cru/el, cam/el, gos/pel, an/gel, chan/nel, etc., — is more or less obscured in ordinary speech. Orthoepists have been divided as to the exact sound which the vowel takes when thus obscured, but such discussion is useless, since the sound varies in the mouths of different speakers, and under different circumstances, and only the limits between which it varies can be positively defined. In the formal or syllabic style of utterance these words are pronounced nearly, or quite, with the sound of ĕ (ĕnd); as mo/mĕnt, pru/dĕnt, nov/ĕl. From this formal pronunciation there is, however, an allowable colloquial weakening or obscuration, which may reduce the sound even to that of the "neutral" vowel described above. In order to indicate the formal standard, and, at the same time, the usual obscuration in such words, an italic short e (ĕ) is used in their respelling; thus, mo/mĕnt, re/cĕnt. The obscuration should never take the form of a full short ŭ (ŭ), as mo/mŭnt, cam/ŭl; the sound in any case is a "light" vowel, the vowel sometimes appearing to be almost elided, as, mo/m't, cam/'l. In some words, as wool/en, kitch/en, the obscuration often takes the direction of ĭ (ĭll). Cf. § 151.

e obscure before n and l.

§ 159. The unaccented e of obscure quality before n and l, in some words, — as eat/en, heav/en, sev/en, o/pen, gold/en, swol/len, shriv/el, — is so far reduced as to become a mere vocal murmur (which differs from other cases of the neutral vowel by its extreme brevity only), or even to drop out altogether, leaving to the n or the l the function of a vowel (§ 51). Such words are marked in the respelling of this Dictionary with an apostrophe (') to indicate the reduction or elision of the vowel, and in these words the pronunciation with elided vowel is the usually accepted one.

The letters i and o also are similarly reduced in many words, as in e/vil (ē/v'l), dev/il (dĕv/'l), cousin (kŭz/'n), ba/sin (bā/s n), but/ton (bŭt/'n), par/don (pär/d'n). To pronounce the words e/vil, dev/il, etc., with a full vowel sound in the final syllable is considered pedantic, even in formal discourse. In words like these, and also in such as a/ble (ā/b'l), gen/tle (jĕn/t'l), the apostrophe usually indicates simply a syllabic l or n.

Note. A "syllabic" l or n must be carefully distinguished from a non-syllabic one in a similar position. Thus, l has a value in a/ble different from that which it has in a/bler, a/blest, dissyllables in which the e, being more sonorous than the l (§ 110), assumes the vowel function while the l retains its consonantal value. There is the same difference between the l in ap/ple and that in ap-ply/; between the l in tack/le and that in cloud or ac-claim/, etc.; between the n in even and that in eve/ning. An m is also often syllabic, as in schism (sĭz/m), chasm (kaz/m), bap/tism (bap/-tĭz/m), and in such words care should be taken not to let a full vowel sound (parasitic vowel) develop before the m.

e with consonant value.

§ 160. When an unaccented e is closely followed by another vowel, it often assumes more or less of a consonant y sound, and may, by assimilation with the following vowel, form an impure, or semi-consonantal, diphthong (§ 99). Cf. i, with consonant value (§ 186). After t or d, or ç or s, this y sound often coalesces with the consonant and changes its sound; as in right/eous (rī/chŭs, by some pronounced rīt/yŭs, rī/chē-ŭs, etc.), gran/deur (grăn/dŭr; by some, grăn/d'yĕr; by others grăn/jĕr), mi-ca/ceous (-shŭs), o/cean (ō/shŭn), nau/seous (nô/shŭs). Cf. § 109. Even when, by partial assimilation, the e has changed the sound of the preceding consonant, it may still sometimes appear, especially when the stress falls upon the following vowel; as in o/ce-an/ic (ō/shē-ăn/ĭk), mi-ca/ceous (by some mī-kā/shĭŭs *or* -shyŭs), crus-ta/cean (by some krus-tā/shĭŭn *or* -shyŭn). The best present usage does not favor the consonant value of e in cu-ta/ne-ous (-nē-ŭs), hid/e-ous (-ē-ŭs), lin/e-al (-ē-ăl), mal/le-a-ble (-lē-a-b'l), and the like.

e silent.

§ 161. Following a consonant at the end of a syllable, this letter usually has no sound of its own in present English words, but is written: (1) to indicate the preceding vowel as long; as in cāme, tōne, sāme, hōme, etc. In many words, however, the preceding vowel is short; as in băde, hyp/o-crīte, fer/tīle, ol/īve, prom/īse, exam/-ĭne, one, none, some, gone, done, etc. (2) To indicate a preceding c or g as "soft;" as in ser/vice, rav/age, vice, o-blige/. (3) After certain consonants not usually written in a final position, as v, th (then) and s (when not the sign of the plural) or z; as in leave, wreathe, mouse, nurse, pulse, bronze, etc.

In the ending -ed of the past tense and participle of verbs, the e, except in the solemn or poetic form of speech, is for the most part elided; unless the verb stem ends in d or t, as in add/ed, o-mit/ted, in which case the -ed is fully sounded (§ 151). When the e is thus elided in pronunciation, a following d is sounded as t after a voiceless consonant; as, stopped (stŏpt), hoped (hōpt), licked (lĭkt). Cf. § 107. For other cases where e is often elided in ordinary speech, leaving to a following consonant the function of a vowel, see §§ 158-9, and for cases where it is more or less absorbed by assimilation with an adjacent sound, see § 160.

☞ For e in various foreign languages other than those here given, see page 2377.

ea.

§ 162. ea, in modern English, has usually either the sound of ē (ēve), — as in beach (bēch), bead (bēd), beak (bēk), beam (bēm), freak (frēk), seal (sēl), seat (sēt), bē-neath/ (bē-nēth/), breathe (brēth), wreathe (rēth), etc.; or of ĕ (ĕnd), — as in breath (brĕth), bread (brĕd), death (dĕth), head (hĕd), lead (lĕd), etc. Final, in guin/ea (gĭn/ĭ), the sound drops to ĭ. In the early modern English period, the digraph had usually the sound of ā (āle); and it retains this sound in the standard pronunciation in a few words, as break (brāk), great (grāt), steak (stāk); and in a few proper names, as Yeames (yāmz), Yeatman (yāt/măn); also in some forms of dialectal speech, as in one dialectal pronunciation of beast (bāst), beat (bāt), please (plāse), seat (sāt). It is variously sounded when followed by r; as in bear (bâr), earn (ûrn), hear (hēr), hearth (härth).

eau.

§ 163. eau occurs only in words of French origin, and has usually the sound of ō (ōld); as in beau (bō), bureau (bū/rō), chateau (shă/tō/), etc. In beauty (bū/tĭ) and its cognates it is pronounced as ū (ūse). It occurs in a few proper names, where it has various sounds; as, Beauchamp (bē/chăm), Beaulieu (bū/lĭ), Beaumont (bō/mŏnt).

ee.

§ 164. ee has usually the sound of ē (ēve); as in beet (bēt), deep (dēp), feet (fēt), etc. In been it is usually as ĭ (pĭn) in America, and, at least when emphatic, usually as ē (ēve) in British English. In breech, the pronunciation brĭch is now vulgar, but is accepted in breeches (brĭch/ĭz). In coffee the sound drops to ĭ (kŏf/ĭ).

ei.

§ 165. ei has commonly either the sound of ē (ēve), as in con-ceive/, de-ceive/, re-ceive/, lei/sure, etc.; or of ā (āle), as in deign (dān), rein (rān), vein (vān), etc. When final, the digraph is usually written ey, and in accented syllables has the sound of ā (āle), as in grey (grā), o-bey/ (o-bā/), they (thā), etc.; unaccented, it usually becomes ĭ (ĭll), as in mon/key (mŭng/kĭ), mon/ey (mŭn/ĭ), hon/ey (hŭn/ĭ), etc.,

which is also the sound represented by **ei** unaccented, as in **for'eign** (for'ĭn). Words containing the digraph with either of its two usual sounds may be marked without respelling as follows: **con-çēive'**, **de-çēive'**; **rein**, **vein**, **grey**, etc. In words of Greek or Latin etymology or form, especially scientific terms, **ei** has the sound of **ī** (**īce**); as in **ei-do'lon** (ī-dō'lon), **ei'do-scope** (ī'dŏ-skōp), **Lei-po'a** (lī-pō'ȧ), etc. It is also usually as **ī** (**īce**) in recent words from the Teutonic languages; as, **ei'der** (ī'dẽr), **leit'mo-tif'** (līt'mō-tēf'), **meis'ter-sing'er** (mīs'tẽr-), **geyser** (gī'sẽr), etc., following the modern High German pronunciation. But in words or names from the classical Icelandic, or Old Norse, it is better to pronounce **ei** as in **veil**, **rein**, the older Teutonic pronunciation. In the words **ei'ther** and **nei'ther** usage still on the whole favors **ē** (**ēve**), although in southern England **ī** (**īce**) prevails. In French words of recent adoption the sound represented by **ei** is nearly **ā** (**āle**) or **ĕ** (**ĕnd**); as, **seiches** (sĕsh). Like **ea** (§ 162), **ei**, representing an older pronunciation, remains as **ā** (**āle**) in a common dialectal pronunciation of such words as **de-ceive'**, **re-ceive'**, etc. In the Scottish dialect **ei** has regularly the sound of **ē** (**ēve**); as in **deil** (dēl), **feil** (fēl). For the values of **ei** in other languages, see p. 2377.

ei (*continued*).

ei, **ey** in Dutch represents a sound between **ī** in **ride** and **ei** in **veil** or **rein**. In South African Dutch the sound is more distinctly like **ei** in **veil**, **rein**.

ein, em, en.

ein, **em**, **en**, representing French nasal sounds. See § 130.

eo.

eo as a digraph is rare in English; in **people** it has the sound of **ē** (**ēve**); in **leopard** that of **ĕ** (**ĕnd**); in **yeoman** that of **ō** (**ōld**); in the proper name **Macleod** that of **ou** (**out**).

eu.

§ **166.** **Eu** in English regularly represents the sound of long **u** (**ū**), as in **feud** (fūd), **deuce** (dūs), etc., or, when unaccented, **ŭ**, as in **euphonic** (ŭ-fŏn'ĭk), etc. In words from the modern French containing **eu**, as **chauffeur**, **jeu**, **jeune**, **leur**, etc., the **eu** represents a sound somewhat like English **e** in **fern**, **her**, or **u** in **urn**, **fur**, and is represented in the respelling by **û** (**ûrn**, § 247). Those who are familiar with the exact foreign sound may properly give it in words not thoroughly Anglicized. In French, **eu** has two distinct, though similar sounds, the narrow and the wide, the one occurring usually in open syllables, the other in closed syllables. Both of these sounds also occur long and short in actual quantity. The sounds should be learned from one familiar with them, but they may be approximately imitated by observing the following directions. The narrow French **eu** (mid-front-narrow-round vowel) is formed by putting the tongue in position for **ā** (**āle**), rounding the lips as for **ō** (**ōld**), and then pronouncing **ā**. The wide form (mid-front-wide-round), when long, is produced by placing the tongue in position for **â** (**câre**), but with the fore part slightly sunk, and then pronouncing **â**, while rounding the lips as for **ō** (**ōld**); when short, it is produced by similarly pronouncing **ĕ** (**mĕn**).

ew.

ew, representing usually the same sounds as **eu**, is the usual form which the digraph takes at the end of words or syllables; as in **pew** (pū), **new** (nū), **hew** (hū), **blew** blōō), **threw** (thrōō). It also occurs (rarely) initially and medially; as in **ewe** (ū), **ewer** (ū'ẽr), **newt** (nūt). It has exceptionally the sound of **ō**; as in **sew** (sō), **shew** (shō).

ey. See **ei.**

F.

§ **167.** **F** as in **fame**, **fly**, **free**, **few**, **cuff**, **staff**, **oft**, is the voiceless (surd) labiodental (or lip-teeth) consonant (§ 71), rarely becoming purely labial. Its sonant correlative is **v** (§ 255). The usual sound of **f** is a fricative or spirant formed by the audible friction of the breath (without voice, § 29), as it is forced out between the lower lip and the upper teeth, which are lightly brought together in pronouncing it. The most usual equivalent of **f** in English is **ph** (chiefly in words from the Greek), as in **pha'lanx**, **phan'tom**, **phar'i-see**, **pho'to-graph**, etc.; the sound being otherwise represented in some words by **gh**, as in **laugh**, **cough**, **rough**, **tough**, etc. (§ 174); also exceptionally by **u**, as in the usual British pronunciation of **lieutenant** (lĕf-tĕn'ănt). In **of**, and usually in the compounds **hereof**, **thereof**, **whereof**, the letter takes the sound of **v**.

G.

This letter represents three sounds: —

§ **168.** (1) The so-called "hard" **g**, as in **gay**, **go**, **gun**; marked with plain **g** in the respelling, or by **g̃** (**g̃ay**, **g̃o**, **g̃un**) when it is desired not to respell. This sound of **g** is the voiced (sonant) guttural or velar (back) stop (§§ 56, 69), the voiceless (surd) correlative of which is **k** as in **king** (§ 71). It is pronounced with a complete closure of the mouth passage by contact between the back of the tongue and the back, or soft, palate, the place of closure varying somewhat, according to the sound immediately preceding or following the **g**, — being, for instance, farther forward in the pronunciation of **get** than in that of **go** (§ 108). Coincident with the formation of the closure the voiced, or intonated, breath is forced into the cavity behind it, and then usually, but not necessarily, expelled with an explosive breaking of the momentary closure (stop). Cf. § 103.

In modern English, **g** has its "hard" sound: (*a*) Always at the end of a word; as in **hug**, **hag**, **egg**, **berg**; also in the derivatives of such words even when the **g** (doubled in the spelling) is followed by **e**, **i**, or **y**; as in **cragged**, **druggist**, **foggy**. (*b*) Before **a**, **o**, or **u**, or an **l**, **r**, or **s** in the same syllable; as in **gay**, **go**, **gun**, **glad**, **glide**, **grow**, **lingual**, **argue**, **bags**, **haggle** (except in the British **gaol** (jāl), **gaoler**). (*c*) In words of Teutonic origin before **e** and **i**; as in **get**, **give**, **gig**; also when doubled before **y**; as in **bug'gy**, **mug'gy**, etc. (*d*) In a few words and proper names from the Hebrew; as **ge'rah**, **Gid'e-on**. The sound of "hard" **g**, followed by **z**, is also represented by **x** in certain words; as **exist** (ĕg-zĭst'), **example** (ĕg-zăm'p'l). See § 260.

This sound of **g** is otherwise indicated by **gu**, as in **guard**, **guest**, etc.; by **gh**, as in **ghost**, **ghastly**, etc.; and by **gue**, final, as in **plague**, **catalogue**, etc.

NOTE. The interposition of a glide sound, as of **ĭ** (**ĭll**) or **y** (**yes**) between a "hard" **g** and a following **ä** (**ärt**) or **ī** (**īce**), as in **gar'den** (gʸär'd'n), **guard** (gʸärd), **guide** (gʸīd), etc., and in like manner often before a **k** or a "hard" **c**, as in **card** (kʸärd), **kind** (kʸīnd), etc., formerly in vogue, and still heard in some parts of England and the United States, is now generally regarded as archaic or dialectal.

§ **169.** (2) The "soft" **g** has the sound of **j** (§ 188), and is represented by that letter in the respelling; or when it is desired not to respell, by **ǧ**, **ġ**. The letter **g** has this sound usually before **e**, **i**, or **y**, chiefly in words of Latin or Romance origin (those of Teutonic origin having usually the "hard" sound as stated in § 168); as in **gem**, **en'gine**, **rage**, **caged**, **exag'gerate**, **mag'ic**, **gin'ger**. The sound is usually indicated by **dg**, **dge**, or **ge** at the end of a word or syllable, in which position **j** is not used in English words; as in **badg'er**, **badge**, **edge**, **judge**, **midg'et**, etc.

§ **170.** (3) In a few words from the French, **g** retains the native sound, like **z** in **azure**; as in **rouge**, **mirage**, **cortège**, etc.

§ **171.** **G** is now silent in English before **m** and **n** final, and when initial before **n**; as in **phlegm**, **sign**, **gnat**, **gnaw**, etc. In the digraph **ng**, as in **sing**, the **g** loses its own sound, blending with the **n**, the two together forming a new sound (§ 198).

§ **172.** **G** has various values in different sections, and often even in the same section, of Germany. The easiest rule for an English speaker to adopt, and one which has much good usage to warrant it, is to pronounce **g** as English **g** in **go**, **get**, in all positions, except at the end of a word or syllable, where (unless doubled) it usually sounds as **k** or **ĸ** (§ 144). In Spanish, **g** before **e** or **i** is a fricative, nearly equal to German **ch** in **ach** (§ 144); in other positions it is like English **g** in **go**. The Spanish **g** when fricative is indicated by **h** in the respelling, and reference is made to this section. In Dutch, **g** in all positions is a strong palatal or guttural fricative somewhat like the German **ch** in **ich** or **ach**, and is usually indicated in the respelling by **ĸ**, except in a few cases where initial, together with a reference to this section.

☞ For the sounds of **g** in other foreign languages, see p. 2376.

ge.

§ **173.** **ge** often represents the sound of **j** at the end of words, as in **gorge** (gôrj), **large** (lärj) (§ 169); and in words from the French the sound of French **g** (§ 170), as in **menage** (mā-näzh').

gh.

§ **174.** **gh** occurs initially in but few purely English words, in which it has the sound of "hard" **g**; as in **ghast'ly**, **ghost**, **a-ghast'**. In other positions it either has become silent or has taken the sound of **f**. It is silent (*a*) after **i** (or **ei**), as in **high**, **nigh**, **sigh**, **sleigh**, **weigh**, etc.; (*b*) before **t** in the same syllable, as in **bought**, **caught**, **drought**, **eight**, **fraught**, **right**, **straight**, **thought** (an exception is **draught** with the sound of **f**); (*c*) often at the end of words or syllables after **au** or **ou**, as in **daugh'ter**, **slaugh'ter**, **dough**, **dough'y**, **though**, **plough**, **bough**, **through**. It has the sound of **f**, often after **au** or **ou** at the end of a word or syllable, as in **laugh**, **laugh'ter**, **cough**, **rough**, **e-nough'**. In the word **hough**, the sound has become, exceptionally, **k**. In the Irish form of a few Celtic words, as **lough**, the native sound is that of German **ach**, Scotch **loch** (§ 144), but is usually given as simple **k** by English speakers, or, in some cases, is omitted altogether.

gi. See § 169.

gli.

gli, in words from the Italian, often retains the Italian sound, **lli** in **William**; as in **seraglio** (sĕ-räl'yō) If no other vowel follows the **i**, the **gl** alone takes this sound, as in **seragli** (sĕ-räl'yē).

gn.

gn, in words from the French and Italian, has the sound of **ni** in **onion**, **pinion**; as in **mignonette** (mĭn-yŭn-ĕt').

gu.

§ **175.** **gu** in English words represents "hard" **g** (§ 168). It represents the same sound in words from the French, before **e**, **i**, or **y**, as in **guéridon** (gā'rē-dôn'), **guillotine** (gĭl'ō-tēn), **guimpe** (gănp; gămp), etc. If followed by a consonant or **ë** in French, it is pronounced as "hard" **g**, followed by French **u** (§ 248).

In many words borrowed from the Spanish, **gu** has the sound of **gu** in **anguish** before **a** and **o**, and that of hard **g** (**gō**) before **e** and **i**; as in **agua** (ä'gwä), **Aguinaldo** (ä'gē-näl'dō). **gü** before **e** or **i** is pronounced as **gw**; as in **agüero** (ä-gwā'rō), **lingüista** (lĭn-gwēs'tä).

gue.

gue final represents "hard" **g** (**gō**); as in **rogue**, **vogue** (§ 168), etc.

H.

§ **176.** **H** as in **hate**, **here**, **hire**, **house**, **home**, **hard**, **hit**, **hoop**, **hoot**, is often called the aspirate. The varying sound of this letter has already been described in § 70. The letter, which represented an aspirate in the earlier forms of Latin, became silent in the late Latin period, as it is now, for the most part, in the various Romance languages, as French, Italian, Spanish. In native English words initial **h** has been sounded throughout the history of the language, and, chiefly through analogy with such words, many words of Latin origin, especially those coming through the French, have gradually had the aspirate restored in pronunciation, when, in the case of most of them, it has been restored in the writing. This restoration of the initial **h** sound has extended so far that, in the best present usage, only the words **heir**, **honest**, **honor**, **hour**, and their derivatives, are universally pronounced without the **h**, while in the case of **herb**, **hostler** (when so spelled), **humble**, **humor**, present usage is divided, but on the whole favors the sounding of the aspirate. The pronunciation of **h**, especially when initial or in the digraph **wh** (§ 258), is usually more vigorous in America than in England, where, however, the sound is often pronounced more strongly than formerly. In a common English dialectal pronunciation of the middle and south of England, often called Cockney, **h** is frequently inserted or omitted in pronunciation in direct contradistinction to the accepted usage, and extended criticism of this fault has led to a careful cultivation of the **h** sound in England. In both England and America there are numerous instances of a silent **h** at the beginning of a syllable; as in **exhaust**, **exhort**, **shepherd**, **Durham**, etc. It is also universally silent or weakened, in such words as **he**, **his**, **him**, **her**, when following a strongly stressed word, as in the sentence "I saw him yesterday," unless the pronoun is emphatic. Cf. § 270.

§ **177.** After a vowel, **h** is regularly silent, but usually marks the vowel as long. In a prolonged pronunciation of the exclamations **ah**, **oh**, **bah**, more or less of the aspirate is often heard. It is silent in **John**, **phthisic**; and is either silent, or blended with a neighboring sound in such a way as to lose its own characteristic pronunciation, in the digraphs **gh**, **kh**, **ph**, **rh**, and **sh**, and in the consonantal diphthong **ch**, which see in their alphabetic order.

I.

§ **178.** In the classical pronunciation of Latin, the letter **i**, when long, had practically the same value as modern English **ē** as in **ēve** (§ 149), and this is the value which it still has in the chief languages of Europe, and, in fact, of most languages except English. This sound of **i** occurs in English chiefly in words of foreign origin, or under foreign influences; as in **machine**, **chique**, **pique**, in some words ending in **-ine** (§ 183), etc. The short sound of the letter is supposed to have been the true short of the long form, that is, the same in sound quality, but shortened in time.

The letter **i** in Anglo-Saxon and Middle English had, when long, the sound described above, namely the undiphthongal sound of modern English **ē**, but its short sound, as in German and other Teutonic languages, was wider than that of the Latin and the Romance short form, being that of **ĭ** in **ĭll** (§ 181). English has retained this short form of **i** down to the present time, but the long form has undergone a decided change, having within the modern English period become a true diphthong, so that what we still call "long **i**" (**ī** as in **īce**) is no longer a simple sound, but one composed of two elements. See § 179.

The letter has other values according to its position and the source of the words containing it, representing in modern English the following sounds:

ACCENTED.

(1) **ĭ** in **īce**, § 179.
(2) **ĭ** in **ĭll**, § 181.
(3) **i** in **sir** = **û**, § 185.
(4) **i** in **machine** = **ē**, § 178.

UNACCENTED.

(5) **i** in **elixir** = **ĕ**, § 185.
(6) **i** in **evil** (ē'v'l), § 159.

ī.

§ 179. (1) ī as in **īce, tīme, sīght, chīld, bīnd, gī'ant, mīght'y, jus-ti-fī'a-ble,** etc., has the name sound of the letter, and is commonly called "long" i (§ 76). This sound is otherwise variously represented in present English spelling; as in **vie, guile, height, aisle, thy, buy, choir, rye,** eye, and in **ay** or **aye** (yes).

The sound of modern English long i has already been described as a diphthong. The quality of the sound is subject to considerable variation, due chiefly to its initial element, which varies all the way from ä (ärm) to ă (măn), the final element being in any case ĭ (ĭll). Cf. § 97. In America the initial element is most often as in the Northern and some of the Southern States ä (ärt), or the same sound shortened and slightly advanced (about as a in **ar-tis'tic**), and the pronunciation with this initial sound may be taken as the standard American pronunciation. In the standard pronunciation of the South of England the initial element is made further forward in the mouth than in America, lying between ŭ (ŭp) and ĕ (ev'ĕr). The sound (ī) is usually more prolonged in England than in America, and its character as a diphthong thus made more evident. The difference in the pronunciation of long i is one of the characteristic distinctions between British and American English.

Note. Long i before **r** in the same syllable, as in **fire, hire,** as often pronounced, is followed by a glide as of ĕ (ev'ĕr), and these words therefore contain a triphthongal sound (§ 100). The glide is not indicated in the respelling of this Dictionary. It is inserted naturally in the pronunciation, being caused by the following **r.**

§ 180. Long i unaccented, as in **ī-de'a, bī-ol'o-gy, trī-bu'nal, bī-car'bo-nate, dī-am'e-ter,** does not differ essentially from ī (īce), except that it is commonly pronounced more quickly, and is hence somewhat shortened. Cf. **art** (ärt), **ar-tis'tic** (är-tĭs'tĭk); **au'gust** (ô'gust), **au-gust'** (ô-gŭst').

ĭ.

§ 181. (2) i short, as in **ĭll, pĭt, pĭt'y, ĭs'sue, ad-mĭt', un-tĭl',** etc., is the commonest sound of the letter in English. It has equivalent spellings as in **for'eign, sur'feit,** cir'cuit, **guin'ea,** mis'**chief,** car'**riage, sieve,** and exceptionally in **busy, women, breeches, been,** English, let'**tuce,** tor'**toise** (as pronounced by some), also in colloquial pronunciation, in the final syllables of sur'**face,** vil'**lage,** pri'**vate,** add'**ed,** wick'**ed,** etc. Phonetically, it is the high-front-wide vowel having for its narrow correlative the ē in **ēve** (§ 149)

For the palatalizing effect of short i (ĭ) on certain preceding consonants, see § 109. For i with consonant value, see § 186.

§ 182. Unaccented syllables containing short i are, in the greater number of cases, closed by a consonant, as in **cab'ĭn, ĭl-lume', ĭn-hab'ĭt,** etc. In open unaccented syllables, as in **qual'ĭ-ty, quan'tĭ-ty, trin'ĭ-ty,** the sound is lower and wider, tending slightly toward that of the neutral vowel ĕ in ev'ĕr (§ 157), but in careful pronunciation its quality is maintained almost, if not quite, unimpaired, and to pronounce the **ĭ** in this position like the ē in **ev'ēr** or the ü in **cir'cüs** is regarded as a distinct fault. In words ending in **-ization,** as **civ'i-li-za'tion, fer'ti-li-za'tion,** the unaccented i is usually ĭ in America (-ĭ-zā'shŭn), ī in England (-ī-zā'shŭn). In closed syllables, as in **e'vil** (ē'v'l), **basin** (bā's'n), the i is usually dropped altogether, leaving to the **l** or the **n** the function of a vowel (§ 159). When a final silent **e** ends an unaccented syllable containing i, the i usually has the sound of ĭ (ĭll), or that of ī (īce); as, **fer'tīle, frag'īle** (in England often **fer'tĭle, frăj'ĭle**), **gen'tīle** (*or* -tĭl); **mar'i-tīme** (*or* -tĭm), **pan'to-mīme**; **of'fice, sac'ri-fice; er'mine, fe'line, gran'ite, con'trite**; etc. Otherwise it has the sound of ē. Cf. -ile, in the Vocabulary, and §§ 183, 184.

§ 183. The suffix **-ine,** variously derived, is pronounced **-īn, -ĭn,** or **-ēn-,** depending somewhat upon its source, the length of time a word formed with it has been in English, the place of accent, etc., but following no very definite rules and varying considerably in usage. In the preferred pronunciation of most adjectives in natural history, the ending (representing Latin *-īnus*) is **-īn,** as in **bo'vine, el'e-phan'tine, fe'line, le'o-nine, lep'o-rine, fal'co-nine,** etc., though many of these are also otherwise pronounced with **-ĭn** or **-ēn.** In many adjectives from names of plants, minerals, etc, as **emeraldine, hyacinthine,** etc., the preferred pronunciation of **ine** (repr. Lat. *-ĭnus*) is **-ĭn,** but from analogy with other words in **-ine,** the pronunciation is often **-ĭn** or **-ēn.** In most trade names, as of fabrics, cosmetics, and proprietary articles generally, commemorative names, etc., as **soapine, butterine, grenadine, brilliantine, listerine,** etc., the pronunciation is usually **-ēn,** probably after the French, from which language many such terms have come into English. Similar words are often spelled with **-ene** or **-een** to represent this pronunciation, as **silkalene, velveteen,** etc. In Christian names of women, as **Adelline, Caroline, Catherine, Christine, Pauline,** etc., of Romance origin, the ending varies in pronunciation, being in some always **-ēn,** while in others it has become **-ĭn** or **-īn.**

§ 184. The endings **-ine** and **-ide** in chemical terms are variously pronounced. In the case of **-ine,** usage in America is mostly divided between **-ēn** and **-ĭn,** very few chemists using **-īn.** Apparently a majority of chemists at the present time pronounce these words with **-ēn,** but the pronunciation with **-ĭn** seems to be slowly gaining ground. The Oxford English Dictionary gives **-ĭn** only in most of these chemical terms, but this is by no means the only pronunciation in use in England. In the case of **-ide,** especially in those words which have been long in the language, usage decidedly favors **-īd,** though **-ĭd** is also used by many.

The spelling of these chemical terms is not settled, but with respect to those ending in **-ine** usage seems to be shaping after the rules of the London Chemical Society, in accordance with which the spelling **-ine** is used in forming the names of alkaloids and other basic substances, as **codeine, aniline,** etc., which are thus distinguished from the names of neutral substances, as proteids, etc., spelled with **-in,** as **albumin, amygdalin,** etc. In the names of the elements, and some other substances not belonging to either of the above classes, the spelling **-ine** is usually retained. The Chemical Section of the American Association for the Advancement of Science voted in 1889 in favor of the pronunciation of all chemical terms in **-ine** and **-ide** with short i as in **ĭll.** It then, further, voted to drop final **e** in the spelling, as in **bromin, chlorin, iodid, bromid, chlorid,** etc.; and these forms are used to some extent in the United States.

In terms ending in **-ine** and **-ide** the pronunciation often varies even in the mouth of the same speaker, and this is especially true of teachers, who often are obliged to pronounce such words in the way that seems most likely to avoid confusion of the endings.

i as in fir = û.

§ 185. **I** before **r,** as in **fir, bird, vir'tue, vir'gin, irk'some,** etc., is the equivalent of ē (fērn) and û (ûrn). The sound is variously represented in current English spelling, as described in § 247. The symbol employed in respelling, as shown in the same article, is û; as, **fir** (fûr), **bird** (bûrd), etc The wider sound, occurring in unaccented syllables, equivalent to ĕ (ev'ĕr), and represented by that symbol in the respelling, occurs in a few instances; as, **tapir** (tā'pĕr), **na'dir** (nā'dĕr), **elixir** (e-lik'sĕr). Both sounds may be represented by ĭ, when it is desired to mark words containing them without respelling; as, **fĭr, bĭrd, tā'pĭr,** etc.

i consonant.

§ 186. A short **i** (ĭ), closely followed by another vowel, often and naturally falls into a **y** sound, and thus produces an "impure diphthong" (§ 99); as in **filial** (fĭl'yăl), **min'ion** (mĭn'yŭn), **gen'ial** (jēn'yăl), etc. The **ĭ** sound, like the other front vowels, is formed with an approximation of the blade of the tongue to the hard palate (§ 42). The **ĭ** being formed with a high tongue position readily turns into **y** by a slight raising of the tongue, or a slight increase in the force of utterance (§ 50) has very commonly a palatalizing effect upon a neighboring consonant (cf. § 109).

ien, in French. See § 130

ij, in Dutch, is like Dutch **ei.** See **ei.**

il, ill.

§ 187. **il,** in French, when final, and **ill** in the middle of words (not when initial, where **il, ill** sound nearly like English **ill**) is usually like ē (mē) followed by **y** as in **yes.** When the **il** or **ill** are preceded by a pronounced vowel they indicate simply the sound of **y** in **yes.** Thus, **billet-doux** (bĭl'yĕ'dōō'), **mouillé** (mōō'yā').

☞ For the sounds of i, alone and in combination, in other languages, see p. 2376.

J.

§ 188. **J** as in **jar, jam, jade, jest, jut, jute,** etc., is a consonantal diphthong compounded of **d** and **zh** (**dzh**), with certain changes in the sound of each element, as explained in § 105. It is the voiced correlative of **ch** (= **tsh,** § 139), and has as equivalents "soft" **g, ge,** or **dg(e),** by which it is represented at the end of a syllable; as in **page, venge'ance, reg'is-ter, mag'ic, badg'er, judge,** etc, with **prej'u-dice, proj'ect, maj'es-ty, caj'e-put** as exceptions, see § 109. Also, **j** or **dj** occurs at the end of a syllable in some foreign words and names, mostly Oriental; as in **Aj'a-lon, hadj', hadj'i, Mij'a-min, Raj, Raj'pur, Raj'poot,** etc. In words from the Sanskrit and modern East Indian languages **j** has its usual English sound. In the word **hallelujah, j** has the sound of **y** (which was the classical Roman pronunciation) as also in words and names from the German and other languages in which the letter has this sound. In a few French words not entirely naturalized, **j** retains its French sound (= zh), as in **déjeuner** (dā'zhū'nā'), **jeune** (zhûn), etc.

§ 189. **J,** in Spanish, has the sound of a strongly aspirated **h,** being somewhat like the German **ch,** as in **ach,** or the Scottish **ch** in **loch** (§ 144). It is indicated in the respelling by **h,** together with a reference to this section.

jh.

§ 190. **jh,** in Sanskrit and many modern East Indian words, often represents the sound of English **j** in **jet,** followed by an aspiration, the combination sounding about like **dgeh** in **hedgehog,** but in the English pronunciation of such words **jh** may be given as simple **j** in **jet.**

For **di, ge** and **gi** with sound of **j,** and for **du** with more or less of the **j** sound, see § 109.

☞ For the sounds of j in other languages, see p. 2377.

K.

§ 191. **K** as in **kite, kill, skill, ask, ark, elk, milk, ink, oak,** etc, is the voiceless guttural (back) stop, otherwise called surd velar mute (§ 71), the voiced or sonant correlative of which is the "hard" **g** as in **go** (§ 168). **k** and **g** have the same articulative position as the nasal **ng** (§ 198), the oral closure for all three being between the blade of the tongue and (according to the preceding or following sound) the soft palate or back edge of the hard palate (§ 108). The sound of **k** is variously symbolized in modern English spelling otherwise than by its regular symbol, **k**; as in **call, hough** (hŏk), **biscuit** (-kĭt), **choir, coquet, antique, sacque, queen.** The sound is also the first component of the compound consonant usually represented by **x,** as in **box** (§ 259). Before **n** in the same syllable, **k** is now silent in English; as in **knot, knee,** etc. **ck** has the sound of simple **k,** as in **back**; as does **lk** usually after the sound of **a** in **all** (ôl) or **ō** (**ōld**), as in **walk, folk, yolk** (usually), etc.

kh.

§ 192. This combination represents several fricative and aspirated sounds, usually loosely classed as gutturals (see guttural in the Vocabulary), in the Englished forms of numerous words and names from the Arabic, East Indian, Turkish, Persian, and other languages; as **khan, khir, khoja,** etc. In most of these it is proper in English pronunciation to give a simple **k** sound, but some of them are marked in the Dictionary with a small capital **k** (§ 144) to indicate the nature of the original sound.

L

§ 193. **L** as in **lie, low, ill, all, sole, blow, clay, fly, elm, help, else, halls, halt,** etc., is one of the so-called *liquid* consonants, and has already been considered phonetically in § 61. The sound expressed by the letter in English is normally the voiced point divided or point side dental consonant, formed or articulated with partial closure of the oral passage by contact of the *point* of the tongue with the back upper gums at the same point as for **t, d,** and **n** (§ 67), the voiced or intonated breath passing out at one side, or at both sides, and thus producing slightly audible friction, the consonant being therefore sometimes classed as a fricative. The English **l** is of different quality from that of the French and German, being often designated as "dull," "thick," or "hollow" in contrast with the "clear" sound in those languages. The difference is due to the different conformation of the tongue in articulating the sound, the tongue in English being hollowed out just back of the point of contact, while in German and French it is kept quite straight (§ 111).

There is no voiceless, or surd, correlative of **l** in English, but the **l** itself is often partly unvoiced by a preceding voiceless sound, as in **plate, inflate,** etc. Cf. § 104 (3). French **l,** as in **table d'hôte** (tä'bl'), is often voiceless. In Anglo-Saxon and Icelandic, **hl,** and in Welsh, **ll,** represent voiceless **l,** which may be approximately imitated by placing the tongue in position for pronouncing **l** and then pronouncing a strong **h** without any accompanying voice, or vocal tone (§ 29).

§ 194. Like the other liquids (**r, m,** and **n**), **l** often fulfills the office of a vowel in an unaccented syllable, as in **battle** (băt'l), **bustle** (bŭs'l), **bridle** (brī'd'l). Cf. § 159. After **t** or **d** the **l** often partakes somewhat of the explosive nature of the preceding consonant, as in **battle, pickle, couple,** etc. See §102 (3). In certain combinations the **l,** originally sounded, has regularly become silent, after having modified the sound of the preceding vowel, the written **l** now serving only to indicate the pronunciation of the vowel; thus the **l** is now silent in **would, could, should, alms, balm, malmsey, calm, palm, palmer, psalm, salmon, almond, half, behalf, calf, halve, salve, calves, balk, chalk, calk, talk, stalk, walk, folk, yolk** (often), with like words and their derivatives.

☞ For **l** alone and in combination in other languages, see p. 2377.

ll.

§ 195. **ll,** in English, is usually pronounced as single **l,** as in **bel'low** (bĕl'ō), **fol'low, hol'low, mel'low,** etc. See § 107. **ll,** in Spanish, is pronounced about like **lli** in **William** (wĭl'yam); as in **villa** (vēl'yä), **llano** (lyä'nō), etc. It is often colloquially pronounced like **y** in **yes,** and this pronunciation, though not correct for Spanish, has become usual in some Spanish words, as esp. in some words common in the Southwestern United States. For **ll,** in Welsh, see § 193.

M.

§ 196. **m** as in **me, may, tame, him, named, lamp, smile, palm, drachm, paradigm,** etc., is the voiced (sonant) labial nasal (labionasal) consonant, formed with the lips brought lightly but firmly together, making a complete closure of the oral

passage as for **p** and **b**, while at the same time the soft palate is lowered, allowing the voice to pass into or through the nasal passage (§§ 59–60).

A **b** after **m** in the same syllable is usually silent, as in **climb, limb,** etc.: an **n** after **m** at the end of a syllable is always silent (cf. § 197), initially **m** before **n**, occurring in a few words from the Greek, is silent; as in **mnemonics** (nĕ-mŏn′ĭks).

Like **l**, **n**, and **r**, **m** may serve as a vowel; as in **schism** (§§ 51, 110).

mb. See above.

mm is usually pronounced as a single **m**; as in **ham′mer** (hăm′ẽr). **slim′mer**, etc. Cf. § 107.

mn. See above.

mp, mped (= mpt). See § 104 (2).

N.

§ 197. **N** as in **none, inn, one, ten, fern, snow, tent, annul, change, ingress,** etc., is the voiced (sonant) dental nasal consonant, otherwise designated as dentinasal or linguanasal, and is formed or articulated with a complete closure of the oral passage by the point and sides of the tongue in the same position as for **d**, **l**, and **t** (§ 67). Simultaneously with this closure, the soft palate is lowered, and the breath or voice passes through the nasal passage (§§ 59–60). Like **r**, **l**, and **m**, **n** often serves as a vowel in unaccented syllables; as in **even** (ē′v'n), **eaten** (ēt′'n), etc. See § 51.

After **m**, a final **n** is silent, as in **hymn, condemn, solemn,** etc.; but when to such words a suffix or inflection is added, the **n** is usually sounded, as in **condemnation, condemnatory, solemnize, solemnity, hymnology, hymnist, limner, autumnal,** etc. In the participles **damned, damning, limning,** usage is divided, while in **condemning, contemning, hymning,** and the cognate nouns **condemner,** and **contemner,** usage now favors the silent **n**. In **kiln** and **limekiln,** the **n** is usually silent. In the initial combinations **kn, pn, mn,** only the **n** is now sounded in English words; as in **know, knight.** In words from the Greek, as **pneumatics, mnemonics,** etc., some scholars pronounce both consonants, but in the more usual pronunciation only the **n** is sounded.

ñ.

ñ, in Spanish words, is pronounced about like English **ni** in **onion**, that is, it combines the sounds of **n** and consonant **y**; as **cañon** (kăn′yŭn).

ng.

§ 198. The digraph **ng** represents a nasal consonant sound (§ 59) formed with a complete oral closure between the back of the tongue and the soft palate, at the same point as for **g**, and is hence commonly classed as a guttural, or velar, nasal and often designated as gutturonasal (§ 69). In this sound, the sounds of **n** and **g** are so closely blended that neither can be distinguished. The sound is, therefore, composite, but not compound (§ 106). At the end of an accented syllable, an **n** followed immediately, either in the same or the succeeding syllable, by the sound of **k** or "hard" **g** (**gō**), commonly takes more or less of the **ng** sound (being marked in the respelling with **n̆**, or by **n̲** when a word is not respelled), as in **ink, think, thank, anxious** (ăn̆k′shŭs), **an′ger, fin′ger, un′cle, din′gle, an′chor, con′gress, con′gre-ga′tion, can′ker, con′quest,** etc.; also often in unaccented syllables, as in **e′lon-ga′tion, pro′lon-ga′tion, san-guif′erous,** which retain the **ng** sound from their root-words. The **n** does not take this sound in the prefixes **in-, en-, on-, un-, non-**; as in **in′come, un′con-cern′, non′commit′tal.** When **ng** is followed in the same syllable by a silent **e**, as in **flange, range, mange,** etc., it does not take the composite sound described above, but is simple **n** followed by the sound of **ge** (= **j**, § 173).

nn is usually pronounced as a single **n**; as in **can′ny** (kăn′ĭ), **fun′ny, sun′ny,** etc. See § 107.

O.

§ 199. The historical value of the letter **o** is the mid-back-narrow-round vowel heard in modern English **ōld, vōte,** when pronounced without a final glide (§ 200). In many languages other than English the sound exists both long and short in actual quantity (§ 73), as it did in Latin and Greek, in the latter of which languages its long form was represented by a special symbol in the classical period. In standard modern English the nearest approach to the true short form is **ŏ** as often heard in **ŏ-bey′**, etc. The New England dialectal pronunciation of **o** in **stone, home, whole,** etc., still often heard, is a true short **o**. What is usually called "short" **o**, as in **odd, not,** etc., is a sound of quite different quality (§ 74). The letter has also acquired other values in modern English, in which it now represents the following sounds:

ACCENTED.

(1) **ō** in **ōld**, § 200.	(5) **o** in **to = o͞o**. § 206.
(2) **ô** in **ôrb**, § 202.	(6) **o** in **wolf = o͝o**, § 207.
(3) **ŏ** in **ŏdd**, § 204.	(7) **o** in **son = ŭ**, § 208.
(4) **ō͝** in **sō͝ft**, § 205.	(8) **o** in **work = û**, § 209.

UNACCENTED.

(9) **ŏ** in **ŏ-bey′**, § 210.	(10) **ŏ** in **cŏn-nect′**, § 211.
(11) **o** in **nation = ŭ**, § 212.	(12) **o** in **ac′tor = ẽ**, § 157.

(13) **o** in **but′ton** (bŭt′'n), § 159.

ō.

§ 200. (1) **ō** as in **ōld, nōte, bōne, ō′ver, pro-pōse′, lō′co-mō′tive,** etc. — with equivalents as in **oh, roam, foe, shoul′der, grow, owe, sew, yeo′man, beau, haut′boy, door** (§ 201) — is the name sound of the letter **o**, and is commonly called its "long" sound (§ 76).

The main part of this vowel sound in standard English is the mid-back-narrow-round vowel (§ 47), in pronouncing which the back of the tongue is raised toward the back, or soft, palate, its maximum elevation being about midway between that which it assumes in the articulation of **ô** (**ôrb**, § 202) and of **o͞o** (§ 214). In addition to this main element, the vowel commonly takes a distinct vanishing sound of **o͝o** (**fo͝ot**), or even **o͞o** (**fo͞od**), which makes it more or less diphthongal. Cf. § 99 (2). This diphthongal quality is more marked in the standard pronunciation of the South of England (London, etc.) than in the North, or than in America, where it is often nearly or quite pure, that is, pronounced without the vanish. The pure sound is heard in standard German, French, and Italian, in which languages it has, however, a somewhat different quality due to slight differences in articulative position (§ 111). The main element of the diphthongal sound used in the South of England is commonly pronounced further forward in the mouth than is the sound common in America, often becoming a mixed vowel sound, approximately the **ŭ** in **bŭt**.

§ 201. Before **r** in accented syllables, the long **o**, when diphthongal, commonly has as its vanish a slight sound as of **ẽ** in **ev′ẽr**; as in **glō′ry, ōre, dōor, fōur, cōurt, flōor,** etc. The **ō** sound in this position has been largely replaced in the cultivated speech of the South of England (especially in London) by the sound of **ô** (**ôrb**), so that **mourn′ing** is pronounced like **morn′ing, pork** rimes with **fork, court** with **tort,** etc. The ordinary modern English "long" **o** (**ō**) is still retained even in this position, however, in the North of England, and, as a rule, in America.

ô.

§ 202. (2) The sound of **ô** as in **ôrb, lôrd, ôr′der,** etc., is also represented by **a** in certain positions, as in **swarm** (swôrm), **all** (ôl), **talk** (tôk), **wa′ter** (wô′ter), etc., with other equivalents as in **extraordinary, georgic,** etc. This vowel sound, the low-back-narrow-round vowel (§ 47), the narrow correlative of **ŏ**, is essentially identical in standard English in the two groups of words given. In its utterance the place of constriction is between the back of the tongue and the back, or soft, palate, the elevation of the tongue being the least of any of the back vowels (§ 42). The lower jaw is depressed, and the "rounding," which is usually slight (§ 111), is accomplished by elongating the lip opening up and down and drawing in the lips at the sides. The sound, however, varies in the mouths of different speakers, and deviations are frequent, either on the one side toward **ō** (**ōld**), or on the other toward **ŏ** (**ŏdd**). It has developed historically sometimes from **ä** and sometimes from **o͞** (or **oa**), which accounts for the variations both in the spelling and in the pronunciation. Although often spelled with **a** or **au**, this sound is properly classed as an **o** sound because of the labial rounding with which it is properly articulated (§ 46).

§ 203. As indicated by the letter **o**, and followed by **r**, the **ô** is, for the most part, limited to accented syllables with the **r** not followed by a vowel or another **r** in the same word, except in the case of inflected verbs (as **ab-hôr′ring**) and the cognate nouns in **-er** (as **ab-hôr′rer**). Otherwise the vowel is usually **ŏ**, as in **fŏr′eign, ŏr′ange, tŏr′rid,** or **ō**, as in **mōre, glō′ry, dōor,** but all these words are pronounced with **ô** by many speakers (cf. § 201), and in such cases the vowel hardly needs to be distinguished from **ŏ** (**nŏt**), either sound being allowable.

When represented by **a**, as in **call** (kôl), **fall** (fôl), etc., by **au**, as in **haul** (hôl′), **taut** (tôt), etc., or by **aw**, as in **caw** (kô), **law** (lô), etc., the sound may be indicated by marking the **a** with two dots beneath, if it is desired not to respell, thus: **c̣all, f̣all, ḥaul, ḷaw,** etc.

ŏ.

§ 204. (3) **ŏ** as in **nŏt, hŏt, ŏdd, pŏd,** and in **dŏg, lŏg, Gŏd,** etc., is commonly called "short **o**" (§ 76), and has equivalents as in **what** (hwŏt), **was** (wŏz), **swap** (swŏp), etc. (§ 122), and also in **knowl′edge, hough,** etc. The proper sound in such words in standard English is generally conceded to be the low-back-wide-round vowel (§ 47), pronounced with practically the same tongue position as its narrow correlative **ô** (§ 203), but with the tongue laxer and the lip rounding even less marked. In America, however, probably a majority even of educated speakers give the sound of **ä** (**ärt**), or its short form as in **är-tis′tic,** in the words of the first group at the beginning of this paragraph, while in the words of the second group usage is divided between the **ŏ** sound, the **ä** sound, and the sound of **ô** (**ôrb**). The pronunciation of these words with the full sound of **ô** is generally considered to be a fault. For a medial sound of **o**, as in **soft, long,** etc., cf. § 205. "Short" **o** sometimes occurs in unaccented syllables, as in **ma′crŏn, car′bŏn,** etc., but except in very formal speech it is generally more or less obscured, as in **cŏn-clude′, ŏc-cur′, rec′ŏl-lect′,** etc. (§ 211), the obscuration being more marked, even in formal speech, in most final unaccented syllables, as in **cot′ton, but′ton, na′tiŏn,** etc., in which the vowel may disappear altogether, leaving to the consonant the function of a vowel, as in **cot′ton** (kŏt′'n), **but′ton** (bŭt′'n), etc. (§ 159).

ō͝.

§ 205. (4) **ō͝** as in **sō͝ft, ō͝ff, ō͝ft, ō͝f′ten, cō͝st, crō͝ss, gō͝ne, sō͝ng, lō͝ng, brō͝th, clō͝th,** etc. Words of this class are often pronounced either with the sound of **ô** (**ôrb**, § 202) or with that of **ŏ** (**ŏdd**, § 204), but properly take a medial sound between the two. The exact quality of the sound in such words, is, however, somewhat doubtful, being thought by some to lie rather between **ō** (**ôrb**) and **ŏ** (**ŏ-bey′**) or **ō** (**nōte**), than between **ô** (**ôrb**) and **ŏ** (**nŏt**). Words containing this sound are marked with a special symbol in the Oxford English Dictionary, which designates the vowel as of "doubtful quality."

o as in do = o͞o.

§ 206. (5) **o** as in **do** (do͞o), **prove** (pro͞ov), **tomb** (to͞omb), etc., is an exceptional sound of **o**, and is equivalent to **o͞o** (**fo͞od**), § 214, being indicated by that symbol in the respelling. When it is desired to indicate this sound of **o** in a word containing it, without respelling, the **o** is marked with two dots underneath, thus: **d̤o, pro̤ve,** etc.

o as in wolf = o͝o.

§ 207. (6) **o** as in **wolf** (wo͝olf), **wom′an** (wo͝om′an), **bos′om** (bo͝oz′om), etc., has the same sound as **o͝o** (**fo͝ot**), § 215, and is indicated by **o͝o** in the respelling. To indicate the sound without respelling, a dot is placed beneath the **o**, thus: **wo̤lf, wo̤m′an,** etc.

o as in son = ŭ.

§ 208. (7) **o** as in **son** (sŭn), **done** (dŭn), **oth′er** (ŭ̱th′ẽr), etc., has the same sound as **ŭ** (**ŭp**), § 246, and is indicated by **ŭ** in the respelling. To indicate the sound in a word without respelling **ô** is used, thus: **sôn, dône, ôther.**

o as in worm = û.

§ 209. (8) **o** as in **worm** (wûrm), **work** (wûrk), **world** (wûrld), etc., occurs only before **r** in accented syllables, and is the same as **û** (**ûrn**). It is indicated by **û** in the respelling. To indicate the sound without respelling a dot is placed over the **o**, thus: **wȯrm, wȯrk,** etc., the **r** serving to distinguish the sound from that in **sôn, dône,** etc.

ȯ.

§ 210. (9) **ȯ** as in **ȯ-bey′, to-bac′co, pȯ-et′ic, eu′lȯ-gy, a-nat′ȯ-my, trans′ito-ry,** etc., differs from the **o** in **ōld** (§ 200) not only in having, as usually pronounced, no vanishing sound, or only a very slight one, but also in that it commonly takes a wider form, which varies, inversely, according to the degree of stress and prolongation (§§ 88, 89). The sound, however, in careful pronunciation usually retains the narrow quality of **ō** before a vowel; as in **po-et′ic.** In other positions, where it takes the wide form, it tends, in rapid speech, toward the neutral vowel sound of **ẽ** in **ev′ẽr**; as in **tō-bac′co, vi′ō-let,** etc. The symbol **ō** is often used in foreign words to indicate a short, and sometimes wider, **o** sound (§ 199) which is foreign to English, as in German **Gott** (gōt), French **homard** (ō′mȧr′), etc., the **ō** being used for the long and narrow sound as in German **grosse** (grōs′ẽ), French **gros** (grō).

ŭ.

§ 211. (10) **ŭ** as in **ŏc-cur′, cŏn-nect′, ŏf-fend′,** etc., in formal speech has nearly or quite the sound of **ŏ** (**ŏdd**; 204), but ordinarily the sound becomes more or less obscure, according to the rate and style of speech (§ 7), such usual obscuration being indicated by making the letter italic.

o as in nation = ŭ.

§ 212. (11) **o** as in **na′tion** (nā′shŭn), **cau′tion** (kô′shŭn), etc., is never properly given as **ŏ** (**ŏdd**, § 204), even in the most formal speech, but takes the sound of **ŭ** (**ŭp**) which is more or less lightened or obscured in ordinary speech, as indicated by making the letter italic.

ö, oe.

ö, oe, in German words, are practically equivalent to French **eu** (§ 166), and are indicated by **û** (**ûrn**) in the respelling.

oa.

oa usually represents the sound of **ō** (**ōld**, § 200); as in **oak, soap, soar** (§ 201), etc. In **broad** it has the sound of **ô** (**ôrb**, § 202).

oe.

oe represents the sound of **ō** (**ōld**, § 200), as in **hoe, sloe**; rarely that of **o͞o** (§ 213), as in **shoe**. In German words it is equivalent to **ö**, as in **Goethe**, and is represented in the respelling by **û** (**ûrn**). Cf. **ö**.

œu.

œu, in French words, has the same sounds as French **eu** (§ 166).

oi (oy).

oi (**oy**) is a full diphthong in English; as in **oil, boy**, etc. Cf. §§ 97, 98. As a digraph **oi** represents several other sounds, as in cham′ois, av′oir-du-pois′, **choir**, tor′toise, etc. **oi, oy**, in French words, are pronounced **wa**, or **wȧ**, and **oin** is **wăn** (cf. § 130).

om, on, in French. See § 130.

oo.

§ 213. **oo** in modern English regularly represents the sounds of **o͞o** as in **bo͞ot**, and **o͝o** in **fo͝ot**; exceptionally it represents the sound of **u** (**ŭp**), as in **flood** (flŭd), **blood** (blŭd), etc., or of **o** as in **door** (§ 201). The digraph **oo** is the special representative of the sounds **o͞o** and **o͝o** in English, and the symbols **o͞o** and **o͝o** are therefore used in the respelling in this book for these two sounds however they are represented in the usual spelling.

§ 214. **o͞o** as in **mo͞on, fo͞od, fo͞ol, to͞ot, mo͞or** (§ 201), etc. This sound is otherwise represented as in **rude, group, drew, fruit, do, canoe, rheum, manœuvre**. It is in any case the high-back-narrow-round vowel sound (§ 47), articulated with the back of the tongue raised close to the back palate and the lips firmly and closely rounded (§ 46). As often spoken, it is not this absolutely simple element, but a sound of slightly diphthongal quality, beginning with a very brief wider sound, as of **o͝o**, and gliding quickly from this to the narrow form which is its main element. The initial element is most clearly brought out when the sound is joined to a preceding consonant, as in **boot, fool**; the narrowness of the final element is emphasized when the sound is final and accented before a pause, as in **who** (ho͞o)? In the latter position the final element often passes nearly or quite into a slight sound of the cognate consonant **w** (§ 256). Before **r**, as in **poor, moor**, the sound of **o͞o** is slightly more open than in other positions, and **o͝o** is substituted for the **o͞o** in such words in the pronunciation of many.

oo.

§ 215. **o͝o** as in **fo͝ot, wo͝ol, go͝od, cro͝ok**, etc. The most usual equivalent is **u** in **full** (fo͝ol), **pull** (po͝ol), etc.; **o** as in **wolf, woman**, and **ou** as in **would, could**, being exceptional. The sound is the high-back-wide-round vowel (§ 47), the wide correlative of **o͞o**, of which it is also called the short form. The sound of **o͞o** differs from that of **o͝o** not only in actual quantity but also somewhat in quality, the two not being the precise long and short of the same sound (§ 74). There are well-marked local diversities in the pronunciations of the sounds of **o͞o** and **o͝o**. The pronunciation of such words as **could, would**, with a sound between the full back **o͝o** and the **ŭ** in **bŭt**, common in some parts of America, is generally regarded as a distinct fault.

ou.

§ 216. **ou** regularly represents in modern English the diphthong heard in **out, a-bout′, pout, house** (§ 97), and it is used in the respelling for pronunciation to indicate this sound however it may be represented in the usual spelling. The symbol **au** used in some systems to represent the sound of **ou** in **out**, never has this sound in English words (§ 131). As a digraph, **ou** has also various other sounds in English: as, **o͞o**, in **soup, route, you**, etc., the regular sound in words from the French; **ô**, in **brought** (brôt), **trough** (trôf), etc.; **ō**, in **soul, pour** (§ 201); and **ŭ** in **cou′ple, e-nough′**, etc. Unaccented, it is usually **ŭ** (cir′cŭs), as in **griev′ous, glo′ri-ous**, etc.; often becoming **ē** (ev′ēr) in rapid speech.

ow.

ow also represents the sound of **ou** (**out**), as in **owl, cow, prow**, and occurs regularly in the usual spelling for this sound when final; but it also has the sound of **ō** (**ōld**) in many words, as in **know, tow, bowl**, etc.

oy.

oy regularly has the sound of **oi** (**oil**), as in **boy, toy, coy**, etc., being the usual spelling of the sound when final, rarely occurring medially, as in **sloyd**. Cf. **oi**.

P.

§ 217. **P** as in **pea, pay, cup, cape, pray, play, harp, help, spy, spread, oppress, happy**, etc. This is the voiceless labial (lip) stop (§ 71), otherwise called surd labial mute, the voiced correlative of which is **b** (§ 132). Both sounds have the same articulative position as the nasal **m** (§ 196), the oral closure for all three being between lips, which are brought lightly but firmly together in the pronunciation of each. The letter **p** is silent as initial before **n, s, sh**, and **t**, as in **psalm, pshaw, ptarmigan**; and usually in words of Greek derivation, as **pneu′ma, psi-lo′sis, pte-ran′o-don**, although in these words, especially the less common ones, some scholars pronounce the **p**. The letter is also silent in **raspberry, receipt, sempstress, accompt, corps**, and their derivatives. For the sound of **mpt** in **tempt**, etc., see § 104 (2).

pf.

pf does not occur initially in English, but is common in this position in some other languages, as German (as in **Pfeffer, Pfund**), in which it is pronounced as **p** followed by **f**, although the **p** is somewhat assimilated in position to the **f** and the two form a glideless combination (§ 104).

ph.

§ 218. **ph** as in **phantom**, etc., usually represents the sound of **f** as in **five**, and occurs chiefly in words of Greek derivation; as in **phantom, sylph, philosophy**, etc. It has, exceptionally, the sound of **v** in **Stephen**, and in **nephew**, as pronounced by some. In **diph′thong, triph′thong, diph-the′ri-a, naph′tha**, and other similar words, the **ph** is sometimes sounded as **p**, but the sound of **f** is the best present usage in all such words. In words from the Sanskrit and modern East Indian tongues descended from it, **ph** often sounds about as in **taphouse**, but it need not be distinguished from **p**, in the English pronunciation of such words.

pn. See § 217.

pp is usually pronounced as single **p**; as in **happy** (hăp′ĭ), **oppress, upper, rapping**, etc. Cf. § 107.

ps. Cf. § 217.

pt. Cf. § 217.

Q.

§ 219. **Q** is in all cases followed by **u**, and the two letters together commonly have the sound of **kw** (§ 253); as in **queen, conquest**, etc. They have the sound of **k** in a few words from the French, as in **coquette, etiquette**, etc., as has the ending **-que** in **antique, burlesque**, etc.

R.

§ 220. **R** as in **room**, **rope, pear, very, merry**, etc., is very difficult to analyze, not only because it is pronounced quite differently in different localities, but also because when occurring in different positions it represents different sounds in the pronunciation of even the same speaker. In general, the letter represents an open, voiced consonant in the articulation of which the point of the tongue is raised toward the hard, or front, palate, back of the upper front teeth, the exact position and height varying more or less according to the neighboring sounds. In English and American pronunciation the tip of the tongue is usually raised just far enough to make the sound consonantal (§ 49), but it is seldom made to vibrate, and thus produce the trilled **r** common in many other languages (§ 63). The untrilled **r** of standard English is strong or weak according as the tongue is more or less raised. In the pronunciation of many speakers in the United States, the tip of the tongue is retracted as well as turned upward, producing a slight hollowing back of the point, and thus giving the peculiar pronunciation known as the "American **r**," which is more closely allied to the mixed vowels, as **û** (**ûrn**), than is the characteristic **r** of England, pronounced further forward and employing only the tip of the tongue. Moreover, in the pronunciation of some Americans, the vowels (especially the mixed vowels) when followed by **r** are pronounced with the tip of the tongue raised toward the **r** position, the combination of the vowel and the **r** in any case giving the acoustic effect of a somewhat muffled vowel followed by, or combined with, a more or less vigorous **r** sound. The **r**, when pronounced with retraction of the tongue, often has a decided effect upon a preceding consonant; thus, in **draw, train**, etc., the **d** and **t**, under the influence of the following **r**, are often pronounced with the tip of the tongue turned up toward the dome of the palate, becoming almost cerebral (cf. CEREBRAL, *a.*, in the Vocabulary).

§ 221. Before a sounded vowel, as in **round, through, dry, cry**, etc., or between two vowels, both of which are sounded, as in **very, merry, other arm**, etc., **r** is almost universally sounded by speakers of English. Usage varies, however, with regard to **r** when it is followed by another consonant, or is final and not followed by a vowel in the succeeding word, as in **art, arm, parley, car, farther, better made**, etc. In the South of England and in parts of the Southern United States and New England, the majority of native speakers either drop the **r** altogether when thus situated, or pronounce it as **ē** (**ev′ēr**); thus, **art** (ät *or* äēt); **parley** (pä′lĭ *or* pä′ē-lĭ); **farther** (fä′ᵗʰē *or* fä′ē-ᵗʰē).

NOTE 1. Leaving out of account the British colonies, the locations given above are those in which the "dropping" of the **r** when final or followed by a consonant is most general. The **r** is also dropped by some speakers in other sections of Great Britain and the United States. Those who treat **r** in this way when final or before a consonant usually drop it entirely in any unaccented syllable, and also in accented syllables after **ä** and the mixed vowels **û** and **ē**; as in **färˌ fûr, ev′ēr**. When the **r** follows **ô** (**ôr**), some speakers regularly pronounce the **r** as **ē** (**ev′ēr**), others suppress it altogether, while still others give it the sound of **ē** only when followed by a pause, as in **which ear?**, suppressing it altogether in other positions; as in **norm, normal, car barn**, etc. When an **r** follows any of the other vowels, the sound of **ē** is substituted by nearly all those who do not pronounce the **r** as **r**; as in **pore, po′rous, poor, poor′ly, pure, fire, fear, mere**, etc.

NOTE 2. Those who thus drop their **r**'s or substitute a vowel sound for them are apt to insert an **r** after a final **ä** or **ē** sound, especially when followed by another vowel in the next word, as in **Emma(r), idea(r) of**, etc., probably owing to unconscious confusion caused by the fact that such words as **other, ever**, etc., have with these speakers two pronunciations, one with **r** silent, where it is final, and one with **r** pronounced, when followed by a vowel (§ 221).

NOTE 3. By some speakers in a few sections the sound of **ä** (**ärt**), instead of the **ē** sound, is substituted for **r** as in **fear** (fēa), **wire** (wīă), etc. This pronunciation is generally considered affected, as is also the substitution of the sound of **w** for **r** in some positions which is sometimes heard.

§ 222. When trilled, the **r** is usually formed by advancing the point of the tongue more than for the smooth or untrilled form, and trilling it rapidly against the gums or the back of the teeth (cf. § 63). Such a trilled **r** is still heard in the Scottish dialect, but is rare in standard spoken English, being now mostly used in singing and for occasional elocutionary effect. An **r** between two vowels, especially when doubled, as in **merry**, is often pronounced by English, rarely by American, speakers with a slight trill, or, more often, a single flap of the tongue. It is also sometimes so pronounced after **th**, as in **three, through**.

NOTE. The point trilled **r** is characteristic of some foreign languages, as Italian and Spanish, in which it is very vigorous. In France and Germany it is giving way, especially in the larger cities, before the uvular, or velar, **r** (**r grasseyé**), formed by trilling the uvula, the point trill being now used chiefly by singers, elocutionists, tragedians, and the like. Cf. § 63. In England a velar **r**, often called the "Northumbrian burr," is common in the Northumbrian dialect (see **burr**, *n.*, 13, in the Vocabulary).

§ 223. In the respelling for pronunciation in this Dictionary all **r**'s are marked as being pronounced, but the only recommendation made as to the pronunciation of the letter is the general one that harshness and obscurity are alike to be avoided as far as possible.

rh.

rh as in **rhetoric, rheum, myrrh**, is pronounced as **r** would be in the same position.

rr.

rr as in **merry, ferry, harrow, parry**, is usually pronounced as a single **r** in the same position, but when between two vowels it is sometimes slightly trilled; cf. § 222.

☞ For the sounds of **r**, alone or in combination, in other languages, see p. 2377.

S.

§ 224. This letter represents four different sounds, all of which are open dental fricatives (§ 71), two being voiceless, or surd, as in **sun** (sŭn), **sure** (sho͝or), and two voiced, or sonant (§ 30), as in **has** (hăz) **vision** (vĭzh′un).

§ 225. (1) Voiceless, or surd, **s** (commonly called "sharp" **s**), as in **see, so, hiss, yes, scorn, sky, sly, smile, snow, spy, basis, nuisance, practise, false**, etc., is formed in several ways, both in England and America. Probably the commonest manner of articulating it is by forming a rather narrow aperture between the blade of the tongue and the back of the upper front teeth, or the gums just above them. The unintonated breath is forced through this aperture, and impinging upon the edges of the teeth produces the peculiar kind and degree of fricative sound commonly called "hissing"; and this sound of **s** and its voiced correlative, **z** (**zeal**), are hence often called the "*hissing sounds*." In the pronunciation of some, the tongue is not raised quite so high. In a quite different formation the tongue is brought against the backs of the *lower* front teeth. The various tongue positions produce sounds that are much the same in quality, and it is not advisable for one to change his usual tongue position, providing his **s** sounds are clear and do not have any of the **sh** sound (§ 232), which is produced if the aperture is made too far back, between the tongue and the palate.

The sound of **s** is also represented in the usual spelling by **c** "soft" (§ 135), as in **cell, civil, vice**; by **sc**, as in **scēne, science**, etc.; by **sch**, as in **schism**; and by **ps**, as in **psalm, psychology**, etc. In the latter case it is perhaps better simply to consider the **p** as silent.

NOTE. The voiceless sound of **s** (as in **sun**) is one of the commonest, if not the commonest, sound in English, forming, according to Prof. Whitney, nearly five per cent of our utterance.

§ 226. (2) Voiced, or sonant, **s** (commonly called "soft" **s**), as in **is, has, ribs, rides, easy, pansy, accuse, husband, resolve**, etc., is formed with the same articulative position as the voiceless, or surd, **s**, except that the tongue is more tense for the voiced sound, making the passage somewhat narrower than for the voiceless sound (§ 64). The voiced **s** has exactly the same sound as **z** (**zeal**) and **z** is used in the respelling to represent the sound whichever way it is spelled. When it is desired to mark a word containing voiced **s** without respelling, a bar is attached to the **s**; thus, **eggs, runs**.

§ 227. The **s** is sometimes voiced as the final sound of verbs, and voiceless as the final sound of the cognate nouns or adjectives, as in **use** (ūz, *v.*; ūs, *n.*), **abuse** (*a*-būz′, *v.*; *a*-būs′, *n.*), **diffuse, rise** (as distinguished by some), **house, close**, etc. Compare **advise** (*v.*) and **advice** (*n.*), etc.

§ 228. The prefix **dis-** is now usually pronounced with voiceless (sharp) **s**, as in **disenchant, disembark**, etc.; but sometimes with voiced **s**, as in **disease**, and, in the pronunciation of some, **dishonor, disdain, disobey**, etc. In the case of the suffix **-ese**, as in **Chinese, Siamese, Maltese**, etc., usage is divided, apparently favoring the **z** sound.

§ 229. (3) An **s** is often palatalized into the sound of **sh** by fusion with a following **i** or **y** sound; as in **version, mansion, convulsion, censure, sensual, sure, sugar**, etc. In the case of doubled **s**, the first **s** is assimilated to the second; as in **passion** (păsh′ŭn), **issue** (ĭsh′ū), etc. In a few words **s** takes the **sh** sound while leaving the following vowel unchanged; as in one pronunciation of **Asia** (ā′shĭ-*a*, ā′zhĭ-*a*), in **nausea** (nô′shē-*a*), **oceanic** (ō′shē-ăn′ĭk), etc. Cf. § 109.

§ 230. (4) **S** takes the sound of **zh** as in **azure** (ăzh′ūr), by assimilation with a following **i** or **y** sound, when it is preceded by a vowel in an accented syllable; as in **vision, decision, adhesion, suasion, explosion, confusion**, etc. When doubled in this position, the first **s** is assimilated to the second; as in **seission, abscission**. Cf. § 109.

sc.

§ 231. **sc** before **e, i**, or **y** has usually the sound of **s**, as in **scene, scent, scissors, science, scythe**; otherwise, it has with a following **i** the sound of **sh**, as in **conscience, prescience**, etc. Before **a, o, u**, or a consonant, it has usually the sound of **sk**, as in **scare, landscape, scold, scout, scuttle, scrape**, etc. In the middle of a word it sometimes has the sound of **z**, as in **discern** (dĭ-zûrn′).

sch.

sch has usually the sound of **sk**, as in **school, schooner, scheme, schedule** (skĕd′ūl; in England usually shĕd′ūl); also the sound of **s**, as in **schism**; and of **sh**, as in **schist**.

Sh.

§ 232. **Sh** as in **she, sharp, shine, rash, usher**, is a voiceless dental fricative (§§ 67, 71), formed with a rather narrow opening between the blade of the tongue, just behind the tip, and the back upper gums, at a place somewhat farther back than for **s** (§ 225). The exact place and manner of formation differ slightly with different speakers. The current of air is broader, and the resulting fricative sound fuller and softer, than in the case of **s**. The sound of **sh**, and its sonant correlative the **zh** as in **azure** (§ 230), are hence sometimes called the "*hushing sounds*." Cf. § 225.

In the production of the **sh** sound the blade of the tongue is somewhat retracted, the teeth are brought close together, and the lips slightly protruded, but not so much so as in the pronunciation of similar sounds in German and French. The breath current is forced through the narrow passage, impinging upon the edges of the front teeth. The resulting fricative sound is a combination of the friction of the breath as it passes through the narrow passage and as it breaks upon the teeth, the whole being modified somewhat by the slight protrusion of the lips. The sound is thus seen to be composite, but at the same time it is reckoned as a simple element, since it can be indefinitely prolonged and has the acoustic effect of a single sound.

§ 233. The sound of **sh** is otherwise represented by **c** or **s** with or before **e** or **i** (§§ 135, 229); and by **sc** or **t** with or before **i** (§§ 231, 235); by **s**, sometimes, before **u** (§ 229); by the **s** element of **x** (§ 259) combined with a following **i** sound (§ 109), as in **anxious** (ăŋk′shŭs), **luxury** (lŭk′shŏŏ-rĭ); by **ch** in **chaise**, etc.; by **chs** in **fuchsia** (fū′shĭ-*a*; -shā), as a common plant name; and by **sch** as in **schist**, etc. (§ 231).

si is often pronounced as **sh** or **zh**. Cf. §§ 230, 233.

ss.

§ 234. **ss** is pronounced as **s**, as in **passing, pressing, bass**, etc. Cf. § 107. Combined with the sound of **i** (**ill**) it often has the sound of **sh**, as in **passion** (§ 229); or of **zh** as in **scission** (§ 230).

☞ For the sounds of **s**, alone and in combination, in other languages, see p. 2377.

T.

§ 235. **T** as in **tie, it, note, try, tune, twine, stay, stray, apt, act**, etc., is the voiceless dental (or often alveolar) stop (§ 71), formed by bringing the point of the tongue against the back of the upper front teeth, or the gums just above them. In the production of the sound in English more of the tongue is commonly brought into contact with the teeth or gums than is the case in German, French, etc., and English **t** has therefore a "thicker" or "duller" effect than has **t** in those languages (§ 111). The acoustic effect of **t** is produced in various ways according to its position in a word or its relation to other sounds. In combination with a following **i**, **t** often has the sound of **sh**, as in **nation**, etc., or of **ch**, as in **question**, etc. Cf. § 109.

The sound of **t** is otherwise represented by the combinations **bt, ct, th, cht, ght, phth**, in which the consonants other than **t** are silent, as in **doubt, indict, thyme, yacht, night, phthisic**, etc.; also by the verb inflection **-ed** after voiceless sounds other than **t**. See §§ 108, 145. The **t** is silent in **Matthew, mortgage, hautboy, chasten, hasten, often** (cf. in the *Vocab.*), **listen**, etc.

Th.

§ 236. **Th** has two sounds, one voiceless—as in **thin, thing, thrive, length, birth**, etc.; the other, marked **th**, voiced, as in **the, thy, than, with, breathe**, etc. Both sounds are made with the same articulative position, which varies slightly with different speakers. They are in any case produced with the point of the tongue brought against or near the teeth, and are hence designated as voiceless point dental and voiced point dental, respectively. Cf. § 71. These are the sounds which mark the vocal defect called lisping, in which they are improperly substituted for other sounds, and the two sounds of **th** are hence sometimes called the "*lisping sounds*." The sounds of **th** are usually produced with the tip of the tongue pressed gently against the lower edge of the upper teeth, its extreme point filling the small gap between the upper and lower rows of teeth, without usually advancing beyond them. The sounds may be produced without bringing the tongue against the teeth, or they may be produced by bringing the tongue against or near the upper gums. The breath, intonated or unintonated, passes out through the interstices of the upper front teeth, and between the lower edges of these teeth and the tip of the tongue, the whole acoustic effect being that of a dull hiss. The sounds may also be formed with the tongue tip extended between the teeth, and they are hence sometimes called *interdental* sounds. This latter pronunciation is usually the easiest for foreigners to acquire, if they have not the sounds in their own language.

§ 237. The plural of nouns ending in voiceless **th** (**thin**) in the singular usually retains the voiceless **th** after a short vowel or a consonant, as in **breaths, deaths, myths, breadths**, etc., but in some cases, especially when following a long vowel, the plural has voiced **th** (**then**), as in **baths, laths, mouths, oaths, paths, wreaths, sheaths, youths, truths, moths, cloths**.

NOTE. The pronunciation of the **th** in some of the words in the second group of this list varies with different speakers, but the voiced sound is usual. In the case of **cloth**, the **th** in the plural is often given as voiceless in speaking of various kinds or qualities of cloth, as in "The shop has a great variety of *cloths*," and otherwise as voiced, as in "Three table-*cloths*," etc. In **baths, laths, moths, cloths**, the **th** is most likely to be voiced by those who lengthen the vowel sounds (bȧth, bäth, môth, clōth).

§ 238. Verb and noun forms ending in **th** often differ in pronunciation, the noun having the voiceless, the verb the voiced sound; as **mouth**, *n.* & *v.*, **south**, *n.* & *v.*, etc. The voiced sound of the verb is often indicated by a final silent **e**; as, **breath, breathe; wreath, wreathe; bath, bathe**. Cf. § 161 (3).

§ 239. **Th** has the sound of **t** in **thyme, Thomas, Thames** (Eng.), **Esther**; and, with **ph**, in **phthisic**. It is commonly silent in **isthmus** and **asthma**. In most modern foreign languages it has the sound of English **t**; as in French **théâtre** (tā′ä′tr′). In words from the Sanskrit and modern East Indian tongues, it often sounds about as in **hothouse**, in the native pronunciation, but it may be given as simple **t** in the English pronunciation of these words.

ti has the sound of **sh** in **nation, ration, physician**, etc., and of **ch** in **Christian, question**, etc. Cf. § 109.

tt is usually pronounced as single **t**; as in **hatter** (hăt′ẽr), **cotton** (kŏt′n), **matting** (măt′ĭng), etc. Cf. § 107.

U.

§ 240. The historical value of the letter **u** and the value which it still retains in most languages other than English is a pure o͞o sound, the same as that heard in **mo͞on, fo͞od**, etc. (§ 214), which may be either long or short in actual quantity. This was the sound that the vowel had in Anglo-Saxon, or Old English, but in Chaucer's time (Middle English) long **u** occurred only in French words and with the sound of French **u** (§ 248), the sound o͞o being represented in the current spelling by **ou**. The French sound of **u** continued in use nearly to the eighteenth century, being used interchangeably with the **ū** as in present English **pūre** during the seventeenth century, and it is still common in the Scottish dialect of English. The letter, like the other vowels in English, has come to have in present usage a variety of sounds, its original sound being now comparatively rare. What we now call "long" **u** is a diphthongal sound consisting of the original o͞o sound with an initial element **y** or **ĭ** (**ill**) prefixed (§ 99), and what we call "short" **u** is the mixed vowel sound heard in **but, bun, son**, etc. (§ 47). The letter has the following sounds in current standard English:

ACCENTED.

(1) **ū** in **ūse**, §§ 241–3.
(2) **u** in **rule** = o͞o, § 244.
(3) **u** in **pull** = o͝o, § 245.
(4) **ŭ** in **ŭp**, § 246.
(5) **û** in **ûrn**, § 247.
(6) **ü** in French **lune** (lün), Ger. **müde** (mü′dĕ), § 248.
(7) **u** in **busy** (bĭz′ĭ), **bur′y** (bĕr′ĭ), exceptional sounds, § 49.

UNACCENTED.

(8) **û** in **û-n′ite**, § 250. (9) **ŭ** in **cir′cŭs**, § 251.

NOTE. **U**, like **i** and **y**, is never doubled in English.

ū.

§ 241. (1) **ū** as in **ūse, a-būse′, fū′sion, pūre, mūte, cūbe, tūne, dū′ty, lūte, hū′man, nū′mer-ous**, etc., commonly called "long" **u**, has the name sound of the letter (§ 76). It has equivalents as in **beauty, feudal, feud, pew, ewe, lieu, view, cue, suit, yule, yew, you**. The sound is limited to accented syllables, being modified in unaccented syllables (cf. § 250).

§ 242. The pronunciation of **u** is more difficult of analysis than is that of any other English vowel, owing to the great diversity of usage, not only in the pronunciation of different speakers but also in the pronunciation of the same person as the sound occurs in different positions. The main element in any case is the sound of o͞o (fo͞od), which in a full pronunciation of the **ū** is preceded by the sound of **y** (**yes**), as in **ūse, dis-ūse′**, etc. In other positions the initial element becomes **ĭ** (**ĭll**), which is often so much lightened that it becomes a mere glide (§ 94), and in some positions disappears altogether, leaving the simple o͞o sound (§ 243).

§ 243. At the beginning of a syllable, as in **ūse, ūn′ion, dis-ūn′ion**, etc., the initial element is **y** (**yes**), the **ū** in such words sounding the same as in **you, youth**, etc. Otherwise, the **y** element comes in most clearly after **p, b, m, v, f, c** ("hard" = **k**), and **g** ("hard," as in **go**); as in **pūre, bū′reau, beaū′ty, mūte, view** (vū), **fū′tile, cūbe, gūle**. After **n**, it is less prominent, often becoming **ĭ** (**ĭll**); as in **new** (nū), **nū′merous**. After **d, l, s, t**, and **th**, as in **duke, lute, suit, as-sume′, tune, en-thu′siasm**, the **y** sound comes in with more difficulty, and the initial element usually becomes **ĭ** in American usage. The initial element is not, however, properly omitted in any of these cases, so that the **ū** becomes simple o͞o.

There is a strong tendency to lessen or omit the initial element in certain positions unfavorable to its production. After **r**, as in **rude** (ro͞od), the **u** is now simply o͞o in the best usage, both in England and America, although many speakers still retain traces of the older pronunciation. The same is true of the **u** after **sh**, as in **sure** (sho͞or), and usually after **l** when preceded by another consonant, as in **blue** (blo͞o), and after **j**, as in **jury** (jo͞o′rĭ). The usage of the different recent authorities in regard to such words is shown in the following table, in which the symbol o͞o (as in fo͞od) used in this Dictionary is substituted for its precise equivalent in the other works cited.

	Oxf. E. D.	Cent.	Stor.	F. & W.
rude	rōōd	rōōd	rōōd	rōōd
blue	blōō	blōō	blōō	blōō
jury	jōō′rĭ	jōō′rĭ	jōō′rĭ	jōō′rĭ

In accordance with the majority of the best current usage, as ascertained by extended observation, inquiry, and comparison, the **u** in these positions (after **r**, after **l** preceded by another consonant, and usually after **j**) has been marked in this Dictionary, as in those here mentioned, as having properly the sound of o͞o.

NOTE. The pronunciations of **u** as given in the preceding paragraphs are those which the sound has in present standard English, but as usage varies in different sections, and especially as between England and America, the following general statement may be made. The **y** initial element is more frequent in England, being heard in positions in which it rarely occurs in American usage. Thus, after **d, l, n, s, t, th**, and **z**, the initial element of **u** is generally **y** (**yes**) in England, especially outside of London, while in America the initial element is generally either **ĭ** (**ĭt**), or by many is omitted altogether; as in **dude,**

lu'nar, nude, con-sume', tune, en-thu'si-asm, re-sume'. The initial **y** sound, if introduced after **d** or **t**, tends to palatalize them to the sounds of **j** and **ch** respectively (§ 109), resulting in such pronunciations as **jū** for **due**; **chūn**, for **tune**, etc., which are common in England. Exceptionally, the **s** in **sure** (sho͝or), **su'gar** (sho͝og'ẽr), and their derivatives, is palatalized to **sh** in recognized usage by fusion with the initial element of the following **u**, the vowel being reduced to simple o͝o (**fo͝od**) or o͝o͝ (**fo͝o͝t**).

u in rule (= o͝o).

§ 244. (2) **u** as in **rule, rude, ru'mor, blue, flute, ju'ry, June**, also in a few words after the sound of **sh**, as in **chute** (sho͝ot), **shute, sure** and its derivatives, has the sound of **oo** in **fo͝od**, and is marked with o͝o in the respelling for pronunciation (§ 243). The sound may, however, with propriety take a brief initial element in o͝o͝ (**fo͝o͝t**), or nearly this, somewhat more prominently than does the o͝o after other consonants (§ 214). The o͝o sound should not be unduly prolonged, as in a drawling pronunciation, considered dialectal or vulgar, and often caricatured.

To indicate this sound of **u** without respelling a word containing it, two dots are placed beneath the **u**; thus, **rụde, rụmor**, etc.

u as in bull (= o͝o͝).

§ 245. (3) **u** as in **bull, full, put, push, pull**, etc., etc., has the same sound as o͝o͝ in **fo͝o͝t** (§ 215), and the symbol o͝o͝ is used for the sound in the respelling however it may be indicated in the ordinary spelling; thus, **bull** (bo͝o͝l), **book** (bo͝o͝k), etc. The **u** also has this sound after the sound of **sh** in **sugar** (sho͝og'ẽr), **sure**. Cf. § 243.

This sound of **u** occurs unaccented in the syllable **-ful**; as in **joy'ful, joy'fulness, ful-fill'**, etc. After **r**, as in **fru-gal'i-ty, cor'ru-gate**, etc., the sound often becomes o͝o͝, but usually, especially in deliberate speech, retains more of the narrow quality of the accented **u** after **r** (= o͞o), § 244.

To indicate this sound of **u** without respelling a word containing it, a dot is placed under the **u**; thus, **fu̇ll, bu̇ll**, etc.

ŭ.

§ 246. (4) **ŭ** as in **ŭp, tŭb, ŭs, ŭsh'er, ŭn'der**, etc., is called "short" **u** (§ 76). It has equivalents as in **son, does, blood, touch**, etc. The sound may be classed as mid-mixed-wide (§ 47), although it is usually formed with a position farther back than the other mixed vowels, **û** and **ẽ**, and is pronounced by some as a back vowel.

The vowel occurs unaccented in the prefix **un-**, as in **un-wor'thy, un-done'**, etc.; also occasionally in other syllables; but usually as occurring unaccented it is more or less obscured or lightened in pronunciation. Cf. *ĭ*, § 251.

û.

§ 247. (5) **û** as in **ûrn, ûrge, bûrn, hûrl**, etc., may be taken as the low-mixed-narrow vowel (§ 47), although it varies considerably in the mouths of different speakers and as occurring in different words. It is variously represented in the usual spelling otherwise than by **u**; as in **fern, err, earn, heard, pearl, sir, bird, girl, whirl, mirth, guerdon, word, journal, worthy, myrrh**, etc., as usually pronounced. The sound thus variously symbolized in the usual spelling occurs in standard English only in syllables under some degree of accent, and before **r** in the same syllable (but not when the **r** is doubled, as in **hŭr'ry**, otherwise than in derivatives, as **fûr'ry**).

Orthoëpists have long divided such words as those in the first list of the preceding paragraph into two classes, the one typified by such words as **her, fern, err**, the other by **urn, burn**, etc., and have considered those of the first group to have a sound produced somewhat farther forward in the mouth than is that of the second. Thus Walker (c. 1800) marked the two sounds with ĕ as in **bĕd, ĕnd**, etc., and **ŭ** (**ŭp**), and remarks: "This sound [of **e**] before **r** is apt to slide into short **u**, and we sometimes hear *mercy* sounded as if written *murcy;* but this, though very near, is not the exact sound." Smart, Walker's reviser (c. 1840), speaks of **er** and **ir** when distinguished from **ur**, as "delicacies of pronunciation that prevail only in the more refined classes of society;" describing the sound as one that lies between **ā** (**āle**) and **ŭ** (**ŭp**). Dr. Murray, in the Oxford English Dictionary, employs two symbols, one for the sound in **fern, fir**, etc., and another for that in **urn, fur**, etc., the vowels being, he says, "discriminated by the majority of orthoëpists, though commonly identified by the natives of the South of England." The present fact is that the majority of English-speaking people, constituting the great bulk of reputable usage, do not make the distinction at all, and those who do make a distinction, or who try to, do not all use the same sound in the same class of words, and furthermore they commonly use the one sound or the other in a part only of the words in which it logically belongs. Most contemporary phoneticians consider the sound as the same, or practically the same, for both groups, regardless of how it is represented in the spelling. The vowel is symbolized in the respelling for pronunciation in this Dictionary by **û**, however it is represented in the usual spelling; as, **fern** (fûrn), **earn** (ûrn), **sir** (sûr), **word** (wûrd), **myrrh** (mûr).

The symbol **û** (**ûrn**) is used to respell words from the modern French containing **eu**, as **chauffeur, jeu, jeune, leur**, etc.; and in those from the German containing **ö** or **oe**, as **schön, Goethe**, etc. This representation, while not exact, is near enough for practical purposes. Those who are familiar with the precise foreign sounds may properly use them in such words when they are not thoroughly Anglicized. In French, **eu** has two distinct sounds, the "close" and the "open." Both of these sounds also occur long and short in actual quantity. These sounds should be learned from one familiar with them, but they may be approximately imitated by observing the following directions: The narrow French **eu** (mid-front-narrow-round vowel) is formed by assuming the tongue position for **ā** (**āle**), rounding the lips as for **ō** (**ōld**), and then pronouncing **ā**; the wide form (mid-front-wide-round) is produced by taking with the middle and back of the tongue the position for **ĕ** (short) or **ā** (long), hollowing out the fore part of the tongue, rounding the lips as for **ō** (**ōld**), and then pronouncing the **ĕ** or the **ā**. In the imitation of these unfamiliar sounds the use of a hand glass is a help. In German, **ö** (**oe**) likewise represents two sounds, practically the same as the French narrow and wide forms; the narrow form occurring both long and short, the wide occurring short only. The English **û** used in the respelling of these sounds represents a "mixed" sound, formed farther back in the mouth than the actual sounds of **eu, ö, oe**, but the retraction and lowering of the tongue in forming **û** gives an acoustic effect similar to that produced by the rounding of the lips in the foreign sounds, and hence it is a fair substitute for them, and the one to be preferred, on the whole, by those unfamiliar with the others. Its sound is most nearly that of the wide form of **eu** or **ö**.

ü.

§ 248. (6) The sound of **u** as in French **lune** (lün), **apercu** (à'pêr'sü'), and German **ü** in **grün, mü'de, Hüt'te**, occurs only in foreign loan words not yet naturalized, and is symbolized in the respelling by **ü**. The **ü** here represents two sounds, the high-front-narrow-round and the high-front-wide-round vowel. Only the narrow form, "close" **ü**, occurs in French, but both forms occur in German. The narrow form may be imitated by pursing the lips as if to pronounce o͞o (**mo͞on**), but with even more rounding than is usual in English, almost as in whistling, and then, while holding the lips in this position, pronouncing **ē** (**ēve**). The wide form is approximately **ĭ** (**ĭll**), pronounced with somewhat less rounding than for the narrow form. No attempt is made to distinguish the two forms in the Dictionary.

u, exceptional sounds.

§ 249. (7) The sounds of **u** in **busy** (bĭz'ĭ) and **bury** (bĕr'ĭ) are exceptional. The **u** in **bury** when unaccented often becomes **ē** (**ev'ẽr**), as in **Banbury**.

ū.

§ 250. (8) **ū** as in **ū-nite', grad'ū-ate, ac'tū-ate, em'ū-late, tū-mul'tū-ous, jū-di'cial, ad'jū-tant, sū-preme', in'sū-lar, lū-cid'i-ty, in-dis'so-lū-ble, val'ū-a-ble, na'tūre, ver'dūre, cen'sūre, sen'sū-al, is'sū-ing, meas'ūre**, etc., represents a modification of the sound of **ū** (§§ 241-3), in unaccented syllables. The sound differs from that of **ū** by taking for the final element the wide o͝o (**fo͝o͝t**) instead of the narrow o͞o (**fo͞od**). A preceding **t** is more or less palatalized in ordinary speech by the **ĭ** or **y** element of the **ū**, the two together forming a more or less clear **ch** sound; as in **na'tūre, pic'tūre, nat'ū-ral**, etc. A preceding **d** is in the same manner commonly palatalized by the **ĭ** or **y** into the sound of **j**; as in **ver'dūre, grad'ū-al**, etc. Cf. § 109. Since many careful speakers aim to avoid the palatalization, which though common is usually considered colloquial, such words are marked in this Dictionary with a tie bar connecting the **t** or the **d** with the following **u**; as **nature** (nā'tu̇r), **natural** (năt'u̇-răl), **verdure** (vûr'd͡u̇r), **gradual** (grăd'u̇-ăl). The tendency to palatalization is thus shown, and the pronunciation of such words with the sounds of **ch** and **j**, as **na'chur, nach'u-ral, ver'jur, graj'u-al** (with **u** pronounced as o͝o͝, often obscured to **ẽ** in **ev'ẽr**) may be considered allowable in ordinary colloquial speech. A preceding **s**, in a syllable not initial (as in **cen'sure, sen'su-al**, etc.), takes more commonly an **sh** sound, and a **z** or a voiced **s** (as in **az'ure, sei'zure, lei'sure, cas'u-al**, etc.) takes a **zh** sound. But the preceding **s** remains unchanged in initial, and sometimes also in medial, syllables; as in **sū-preme', con'sū-lar, in'sū-lar**, etc.

ŭ.

§ 251. (9) *ŭ* in **cir'cŭs, da'tŭm, sŭb-mit', vol'ŭn-ta-ry, cir'cŭm-stance** is a variation of **ŭ** (**ŭp**, § 246), occurring in unaccented syllables. In formal utterance it is often given as **ŭ**, but in ordinary speech it is usually lightened and obscured, readily falling into the sound of **ẽ** (**ev'ẽr**). The usual obscuration is indicated by the italic vowel. Cf. § 93. The **ou** in **pi'ous**, etc., the **oi** in **por'poise**, the **eo** in **dun'geon**, etc., the final element of the **eou** in **right'eous**, etc., and of **iou** in **gra'cious**, etc., and the **o** in **at'om, irk'some, na'tion**, etc., also have this sound.

u silent.

§ 252. A silent **u** often occurs after **g**, which is then always hard (as in **go**); as in **guar'anty, guard, guess; plague, rogue, tongue, catalogue** (§ 175). The **u** in these cases may be considered either as belonging with the **g**, and indicating its hard quality, or as forming a digraph with the following vowel (§ 95, *note*). For **u** silent after **q**, see § 219.

u as a consonant.

§ 253. **u** with consonant value, equivalent to consonantal **w**, often occurs after **q** or hard **g** and before another vowel, as in **qual'i-ty, quite, quote, ques'tion, gua'no, lan'guage**, etc.; also after **s**, as in **per-suade'. suite**, etc. The **u** in these cases forms the initial element of an impure diphthong (§ 99, *note*). The **w** sound is derived from the original sound of **u** with the value of o͞o (**fo͞od**), or o͝o (**fo͝ot**). Cf. § 240.

ua.

ua, considered as a digraph (§ 252), has the following values: **ă**, as in **guăr'an-ty**, etc.; **ä**, as in **guärd**, etc.; **wa**, as in **guano, quality**, etc. Cf. §§ 252, 253.

ue.

ue has the following values: **ĕ** as in **guĕss**, etc.; **û**, as in **gûer'don**; **ū**, as in **cūe**, etc.; **o͞o**, as in **rue**, etc. It is silent in **rogue, plague, antique**, etc. Cf. §§ 252, 253.

ui.

§ 254. **ui** has the following values in English: **ī**, as in **guīle**; **ĭ**, as in **buĭld**, etc. (cf. § 253); **ū**, as in **sūit**; **o͞o**, as in **re-cruit'**, etc. In the Scottish dialect it is usually pronounced as "French **u**" (§ 248). In French, **ui** is pronounced as **üĕ** (cf. **ü**, § 248), the **ü** being very short and the accent on the **ĕ**. It may be pronounced as **wē**, as a sufficiently close approximation; as in **huître** (wē'tr'). In Dutch, **ui** and **uy** represent a sound between the English **oi** in **boil** and the French **eu** (§ 247).

um, un.

um, un, French nasals. See § 130.

uy.

uy has the sound of **ĭ** (**īce**) in **buy, guy**, etc.; of **ĭ** (**ĭll**) in **pla'guy**, etc.; cf. **ui**, § 254.

☞ For the sounds of **u** in other languages, see pp. 2375–8.

V.

§ 255. **V** as in **vain, vivid, ever, live, lived, move, moves, calves, wolves**, etc., is a labio-dental, or lip-teeth, fricative, the voiced correlative of **f** (§ 71). English **v** is produced by pressing the lower lip gently but firmly against the upper front teeth. The sound of **v** is taken by **f** in **of**, and usually in its compounds, **hereof, whereof**, etc.

NOTE. A sound resembling English **v** may be formed by bringing the two lips lightly together (bilabial), instead of the lip and the teeth. The German **w**, equivalent to English **v**, is often pronounced in this way, especially in the middle and south of Germany, but as thus pronounced it usually sounds to an English ear more like English **w** than like English **v**. The Spanish **b**, which is a bilabial, often sounds like English **v**. Cf. § 133.

W.

§ 256. **W** as in **we, wet, worse, dwarf, twelve, twin, swan**, is a voiced open labial consonant (§ 71), produced with so little audible friction as closely to resemble a vowel, and thus properly classed as a semivowel. It has a close relationship to the vowel o͞o (**fo͞od**, § 214) or o͝o (**fo͝ot**, § 215). It has already been seen that o͞o, o͝o, are the highest and closest of the back vowels. A slight further elevation of the tongue from this position, or an increase in the force of utterance, produces the slight friction of **w**. The articulative position for the **w** is thus the same as for o͞o, or o͝o, the only difference being the slight audible friction which gives the **w** its character as a consonant. The consonant **w** commonly takes as an on-glide (§ 94) a brief sound of o͝o, the consonantal element also being very brief, hardly more than a starting point from which to reach the following sound. As for o͞o, so for **w**, there is not only rounding of the lips, but there is also a constriction between the back of the tongue and the back, or soft, palate. The **w** is thus seen to have two places of articulation, and to be a back, or guttural, as well as a labial, consonant, although commonly classed as a labial (§ 71). It is sometimes classed as *lip-back* or *labioguttural*.

§ 257. When not silent, or forming part of a diphthong, **w** is always followed by a

vowel. It is sometimes represented by **u** before another vowel, as in **quail, language.** Cf. § 253. Preceded by **s**, the **w** may be regarded as forming an impure diphthong with the following vowel; as in **swan, persuade** (pēr-swād′). Cf. § 99, *note*. Preceded by a stop, as **t, d, p,** or hard **g** (**go**), it forms with the consonant a glideless combination (§ 104). After a vowel in the same syllable, the **w** either forms a diphthong with the vowel, as in **cow, town, few,** or is silent. In the latter case it often lengthens or emphasizes the preceding vowel, as in **glow, thrown,** or determines its sound, as in **awe, law.** See § 131. **W** is silent before **r** in the same syllable, as in **wring, wrote,** etc.; also in **answer, sword, toward, two,** and in **who, whom, whoop,** etc.

☞ For the sounds of **w**, alone or in combination, in other languages, see pp. 2375–8.

wh.

§ **258. wh as when, what, which,** is, in America, usually pronounced as **h** + a voiceless **w** (§ 29), no voice being heard until the beginning of the following vowel. In England, and by many American speakers, it is usually pronounced simply as a voiceless **w**, though still often, especially in the South of England, as an ordinary **w**. The standard sound is described by Dr. Sweet and other English phoneticians as the voiceless correlative of **w** as in **we**, but it is symbolized by **hw** in the system of respelling of the Oxford English Dictionary. For practical purposes the sound is best indicated by **hw** as in the system of respelling employed in this Dictionary.

x.

X has two chief sounds; one voiceless, the other voiced; otherwise it sounds as **z**.

§ **259.** (1) The voiceless sound of **x** is equal to **ks**; as in **box, wax, ex′e-cute, ex′it, ex′o-dus, ex′u-da′tion, ex-claim′, ex-treme′, ex-cell′, ex′cel-lent, ex′hor-ta′tion, tax′es,** etc. This, the more common sound of **x**, occurs usually in accented syllables, or when it is followed by a sounded consonant, as in the examples above. When preceding an accented syllable beginning with a vowel or a silent **h**, the voiceless sound is exceptional; as in **al′lox-an′ic, aux-et′ic, ax-il′la, ax-in′o-man-cy, ex-ar′chate, ex-or′cent, hex-am′e-ter, ox-al′ic,** and a few other words. In words such as **anx′ious, nox′ious, lux′u-ry,** the **s** component of the **x** is palatized to **sh** by fusion with the following sound of **i** or **y** (§ 109).

§ **260.** (2) The voiced sound of **x** is equal to **gz**; as in **ex-ist′, ex-alt, ex-ag′ger-ate, ex-am′ple, ex-empt′, ex-ert′, ex-ot′ic, ex-ult′, ex-haust′, ex-hib′it, ex-hort′, ex-hil′ar-ate,** etc. The **x** usually takes this sound when unaccented and followed by an accented syllable beginning with a vowel, or with a silent **h**, as in the examples given; but in the derivatives of such words **x** often retains the sound under accent, as in **ex′em-pla-ry, ex′emp-ti′tious,** etc. Cf. § 259.

§ **261.** (3) As initial in a word or syllable, **x** has a third sound, that of **z** (**zeal**); as in **xan′thic, xe′bec, xy-log′ra-phy, par′a-xan′thine, met′a-xy′lene,** etc.

§ **262. X**, in Spanish, formerly had the guttural sound of Spanish **j** (§ 189) in many words and names, in which it is now replaced by **j** in the modern orthography of the Spanish Academy. In accordance with the rules of the Academy, **x** now represents only the sound of **x** as in English **wax, box.** Many of these older words or names, however, especially those pertaining to Spanish America, some of which are included in the Vocabulary, retain the older orthography and the guttural sound of **x**, although in the dialects from which they come the consonantal sound is often pronounced only as a slight breathing or is elided together.

y.

§ **263. Y** in English serves both as a vowel and as a consonant. The late Greek and Latin value of **y** was a vowel sound equivalent to French **u** (**ii**, § 248), and the letter passed with this value into Anglo-Saxon, or Old English. Its sound, however, gradually changed into that of **ē** (**ēve**) when long and into that of **ĭ** (**ĭll**) when short, the two written letters **y** and **i** becoming interchangeable in Middle English. The semivowel **y** differs from the other semivowel, **w**, in that it often serves like **i** as the only vowel in a syllable, whether at the end of a word, where it oftenest occurs, or elsewhere; as in **my, sky, myth, deny, pony,** etc. The **y** is also interchangeable with **i** in diphthongs and vowel digraphs, which usually have the **y** when final, as, **ai, ay; ei, ey; oi, oy.**

§ **264.** (1) As a vowel, **y** has four sounds: that is, all the sounds of **i**, except **ē** as in **pique** (pēk). These sounds are: (*a*) **y** = **ī**, as in **de-fy′, style, fly, hy-e′na, my-ol′o-gy**, (*b*) **y** = **ĭ**, as in **nymph, lyr′ic,** and (unaccented) **pit′y, hap′py**; **ey** final also serving thus instead of **y**, as in **hon′ey, mon′key, ab′bey,** etc.; (*c*) **y** = **û**, as in **myrrh, myr′tle**; (*d*) **y** = **ē** (**ev′ĕr**), the same as (*c*) unaccented, as in **zeph′yr,** etc. These sounds of **y** are all symbolized in the respelling for pronunciation by the **i** equivalents, as here given. When it is desired to mark the **y** without respelling, it may be done as follows for the values given above: (*a*) **ȳ**, (*b*) **y̆**, (*c* & *d*) **ÿ**.

Note. The unaccented **y** final as in **pit′y, van′i-ty,** is slightly wider and lower than accented **i** in **pit,** but it does not tend toward the neutral vowel sound, **ē** in **ev′ĕr,** as unaccented **i** in a medial syllable often does, as in **van′i-ty,** etc. (§ 182).

§ **265.** (2) As a consonant, **y** may be classed as a voiced palatal semivowel, or as a fricative, although the friction is but slight (§§ 50, 62); as in **year, you, young, beyond, vineyard, halyard,** etc. In many words this consonant is descended from an Anglo-Saxon hard **g**; in others, from a vowel. In certain cases the sound is represented by an **i** from which it has been developed, as in **poniard, onion, genial, familiar,** etc. (§ 186); and in like manner by **e** (§ 160); and it often forms a part of the vowel **ū** as in **ūse** (§ 242). The place of formation for this consonant extends further back than does the place of constriction for the vowel **ē** (**ēve**), often involving the soft palate, as the place of constriction for **ē** never does.

y, as a consonant, occurs characteristically at the beginning of a syllable; at the end or in the middle, it is usually a vowel, as in **my, myth, happy,** etc. (§ 263). It is used in this Dictionary in giving the pronunciation of some foreign words, as **fiord, lorgnette, camarilla,** etc.; and in such cases is not restricted to the beginning of a syllable.

ym, yn.

ym, yn, French nasals. See § 130.

z.

§ **266. Z** as in **zeal, zone, maze, size, amazed, frozen, hazy, dizzy, sizar, buzz,** etc., is ordinarily a voiced dental fricative (§ 62); the sound is often represented by **s**, as in **easy, his, ears,** etc. (§ 226); sometimes by **c**, as in one pronunciation of **suffice, sacrifice,** etc. It is the voiced correlative of "sharp" **s** (§ 225). The sound is not compound, except that, when final in a syllable and not followed immediately by a vowel or other voiced element, it takes as a vanish a voiceless **s** sound.

z as in azure (= zh).

§ **267.** In some words **z** takes a sound (**zh**) which is the voiced correlative of **sh** (§ 232); as in **azure, seizure, grazier.** This sound is developed by palatalization of the **z** with a following **y** or **i** sound (§ 109). The same sound is represented by **si** in **fusion,** etc.; by **ti**, exceptionally, in a pronunciation of **transition** (cf. **insition**; § 230); and by **g** in **rouge, manège, mirage,** and other words from the French (§ 170).

§ **268. Z**, in Castilian Spanish (which is meant by the abbreviation *Sp.* in the respelling for pronunciation), before **a, o, u,** and at the end of syllables, is pronounced like **th** in **thin,** but in Spanish America, in the Philippine Islands, and in parts of Spain it is commonly pronounced like English **s** in **sun,** as in **cazo** (kä′sō; -thō). In Spanish America, the **th** sound (cf. § 133), although often taught in the schools, is usually considered somewhat pedantic.

Note. The pronunciation of **z** and **c** as **th** (**thin**) in Castilian Spanish dates only from about 1550.

§ **269. Z** and **zz**, in Italian, represent a long and vigorous **ts**, as in **can-zo′ne** (kän-tsō′nā), **bel-lez′za** (bĕl-lät′sä); or, exceptionally, a long and vigorous **dz**, as in **mez′zo** (mĕd′zō).

IV. LIST OF COMMON ENGLISH WORDS WITH WEAK FORMS.

§ **270.** The pronunciation of words indicated in the vocabulary is usually that which they have when taken alone and with their usual accent (§§ 7, 86). Certain monosyllables, however, so frequently occur unaccented in connected speech that they develop "weak" forms by the side of the original "strong" one, the degree of weakening depending upon the style and rate of speech (§ 7). Thus, **do** in its "strong" form is pronounced **dōō**, but in the sentence *How do you do?* it would sound strange to pronounce the first **do** so, its pronunciation in this position being reduced in ordinary speech to **dŏŏ, dē,** or even **d′**. So in the phrase *to go away*, the **to** is ordinarily reduced to **tŏŏ, tē,** or **t′**. The articles and certain verbal forms often have characteristic weak forms as occurring in certain combinations: thus, in *a boy and a girl*, the article **a** is ordinarily reduced to the sound that **a** has in **sofa** (*ȧ*), the **and** being pronounced **ănd** or **′nd**. Similarly, **the**, in *the boy and the egg*, becomes in the first case **thē**, and in the second **thĭ**. **Are** and **is**, as in the sentences *They are going away, Where is he going?* are pronounced with light forms, unless emphasized, often being reduced to **′re** and **′s**. In the sentence *I saw him yesterday*, **him**, unless emphasized, is commonly **′im**.

To pronounce words like these with their strong forms in such positions as here indicated either emphasizes them and thus gives them a special meaning, or makes the speech sound more or less abnormal, except in the very formal speech of special occasions. The degree of weakening is dependent in any case upon the rate and style of speaking (§ 7). To give a proper weakening to words normally so pronounced is dependent upon a natural instinct or cultivated feeling (Sprachgefühl) for the proper shades of sound. The following is a list of some of the more important English words having regular weak forms. In each case the strong form is given first, followed by one or more weakened forms. It is impossible, with a limited number of phonetic symbols, to indicate all the weak forms to be heard in the case of many words. Weak forms are sometimes indicated in the ordinary spelling; as in *I′ve been away*, *That′s so*, etc.

a, ā, *ȧ*.
am, ăm, ăm, 'm.
an, ăn, ăn, 'n.
and, ănd; ănd, 'nd (before vowels); ăn, 'n (before consonants).
are, är, *ȧr*, 'r (as in wēr, "we are").
as, ăz, ăz.
at, ăt, ăt.
can, kăn, kăn, k'n.
could, kŏŏd, k'd.
do, dōō, dŏŏ, d'.
does, dŭz, dŭz.
for, fôr, fŏr.
from, frŏm, frŏm, fr'm.
had, hăd, hăd, h'd, 'd.
has, hăz, hăz, ăz, 'z (as in hēz gŏn, "he 's gone").
have, hăv, hăv, ăv, 'v.
he, hē, hē, ẗ.
her, hûr, hĕr, ĕr.
him, hĭm, ĭm.
his, hĭz, ĭz.
is, ĭz, 'z, 's.
me, mē, mē, mĭ.
must, mŭst, mŭst, mŭs.
not, nŏt, n't (with verbs).
or, ôr, ŏr, 'r.
Saint, St. (followed by proper name) sānt, sŭnt, s'nt.
she, shē, shē, shĭ.
should, shŏŏd, sh'd.
some, sŭm, sŭm.
than, thăn, thăn.
the, thē; thē (before consonants), thĭ (before vowels).
them, thĕm, thĕm, ĕm.
to, tōō; tē (before consonants), tŏŏ (before vowels).
us, ŭs, ŭs, 's.
was, wŏz, wŏz.
we, wē, wē, wĭ.
were, wûr, wĕr.
will, wĭl, w'l, 'l (as in ĭl gō, "I 'll go").
would, wŏŏd, w'd, 'd.
you, yōō, yŏŏ, y'.
your, yōōr (§ 201), yŏŏr.

V. RULES FOR THE PRONUNCIATION OF WORDS FROM THE LATIN AND GREEK.

§ **271.** Two methods of pronouncing Latin are now in extended general English use; one, the so-called English method, follows in general the analogies of English pronunciation according to certain formal rules; the other, the so-called Roman method, attempts to follow more or less closely, as far as it is known, the pronunciation of the Romans themselves at the height of their civilization (about B. C. 50 to A. D. 50). Another method of pronouncing Latin is the so-called Continental method, developed from the modern languages during the Middle Ages and widely used by the Roman Catholic Church. By this method the vowels have their general Continental values (practically as by the Roman method) but the consonants are pronounced as in the language of the speaker. Thus **Cicero,** as a Latin name, would be pronounced in Germany as tsē′tsĕ-rō, in Spain thē′thă-rō or sē′să-rō, in Italy chē′chă-rō, in France sē′sā′rō′, in England or America sē′sĕ-rō.

The English method was until recently used in teaching Latin in both England and America, but has been almost entirely replaced for that purpose in American schools and colleges within recent years, and now to some extent in England also. It is still used, however, almost exclusively in the pronunciation of Latin scientific words in English, for Latin and Greek proper names in English context, for Latin legal phrases, and for familiar phrases and quotations from Latin in English context, though with many variations, especially since the English method of pronunciation ceased to be widely taught in the schools. Since most of the Latin words and phrases contained in the Dictionary fall in one or another of these categories, their pronunciation is indicated according to the English method.

SYLLABICATION AND ACCENT OF LATIN WORDS.

Every Latin word has as many syllables as it has vowels or diphthongs. In the English method, words are syllabified according to English analogies, but with certain formal differences. In the Roman method, words are syllabified as follows: (*a*) A single consonant (including consonant **i** and **v**) or, by many, any consonant group (as **sp, st, gn**) that can begin a word, when between two vowels is written and pronounced with the following vowel. Doubled consonants are separated. Examples: **mi′li-tes, de′ti-net.** Some carry over an **x** to the following syllable, as in **di′xit**; but the division **dix′it** is, on the whole, to be preferred. (*b*) Prefixes and suffixes are kept separate.

Words of two syllables are accented on the first syllable; as, **pa′ter, mi′les.** Words of more than two syllables are accented on the penult (next to the last syllable), if it is long; otherwise they are accented on the antepenult (last syllable but two).

Note. No attempt is made to cover the rules for determining the quantities of Latin vowels and syllables. A complete statement of these is to be found in any Latin grammar.

The proper accentuation is indicated for all Latin words and phrases included in the vocabulary. In accordance with most present usage, Latin words and phrases which are considered to be purely such (usually indicated by ||, as || **non de'ti-net** (dĕt'ĭ-nĕt)) are divided into syllables according to the second method above, and in Latin quotations further indication of the pronunciation is usually omitted, except that when such division would lead to mispronunciation of any word according to the English method, the pronunciation of the word according to that method is shown; as, || **non de'ti-net** (dĕt'ĭ-nĕt). For those who prefer to pronounce such Latin quotations according to the Roman method, the syllabification as indicated, together with the rules given in § 273, will be a sufficient guide.

RULES FOR THE ENGLISH PRONUNCIATION OF LATIN.

§ **272.** The following rules for the English pronunciation of Latin, based upon those of Walker, have generally been used in America. The rules now used in England differ somewhat, but not essentially, from these. Syllabic division, as forming a basis for these rules, follows the *English* method of division (§ 271), thus, **det'i-net**, etc.

1. Vowels, when ending accented syllables, have always their **long** English sounds; as, **pā'ter**, **hō'mo**. When final in unaccented syllables they are as follows:

a final in an unaccented syllable has the sound of *ȧ* in **so'fȧ**; as in **mu'sa** (mū'zȧ).

e, **o**, and **u**, at the end of an unaccented syllable, have nearly the same sound as when accented, but slightly shorter; as **rē'tĕ**, **vō'lŏ**, **po'pu-li** (pŏp'ŭ-lĭ).

i, when the final sound of a word, always has its long sound (as in **īce**); as, **qui** (kwī). *Exception:* the final **i** of **tibi** and **sibi** has, like the first **i**, its short sound (as in **ĭt**).

i, at the end of an unaccented syllable, not final, has its short sound; as, **de'tĭ-net**. *Exception:* **i** has its long sound in the first syllable of a word the second syllable of which is accented, when it either stands alone before a consonant, as in **ī-dō'lum**, or ends a syllable followed by a vowel, as in **fī-ē'bam**, **ī-ăm'bus**.

y is always pronounced like **i** in the same position.

2. Vowels have always their **short** English sounds, when followed by a consonant in the same syllable; as **mag'nus**, **reg'num**, **hoc**. *Exceptions:* —

a, following **qu** before **dr**, has the sound of **a** in **quadrant**, as in **quad'rans** (kwŏd'rănz); when followed by **rt** it has the sound of **a** in **quart**, as in **quar'to**. Otherwise, **a** before **r** has the sound of **a** in **art**, as in **par'ti-ceps**, **ar'ma**; except when followed by another **r**, as in **păr'ri-ci'da**.

e, **i**, and **y**, before **r** final in a word or final in a syllable, when followed in the next syllable by any other consonant than another **r**, have the sound of **i** in the English words **her** and **fir**; as **fer'vet** (fûr'vĕt), **hir'cus** (hûr'kŭs).

es, at the end of a word, sounds like the English word **ease**; as, **mi'li-tes** (mĭl'ĭ-tēz).

os, at the end of plural cases, sounds like **ose** in **dose**; as, **do'mi-nos** (dŏm'ĭ-nōs).

post, alone or compounded, is pronounced like **post** in English, as **post'e-a**; but not in its derivatives, as **pŏs-tre'mus**.

3. Diphthongs are as follows:

æ (**ae**) and **œ** (**oe**) are always diphthongs unless separated by diæresis. They are pronounced as **e** would be in the same position; as, **æ'vum** (ē'vŭm), **æs** (ēz).

au, when a diphthong, is pronounced as **ô** (**ôr**); as in **au'rum**.

au, in the termination of proper names from the Greek, has the vowels pronounced separately; as, **Men'e-lā'us**.

ai, **ei**, **oi**, and **yi**, usually have the vowels pronounced separately. When they are accented, and followed by another vowel, the **i** is pronounced like initial **y**, and the preceding vowel has its long sound; as, **Harpeia** (hăr-pē'yȧ), **Troia** (trō'yȧ).

ei, when a diphthong, and not followed by another vowel, is pronounced like **ī**; as in **ei-do'lon**.

eu, when a diphthong, is pronounced as **ū** (**ūse**), as in **Eu-phrā'tes**, **e'heu**.

eu has the letters pronounced separately in the terminations **eus** and **eum** of Latin nouns and adjectives, except neuter; as **me'um**, **me'us**. Otherwise it is pronounced as a diphthong, as in **Eu-rō'pa**, **The'seus** (thē'sūs).

NOTE. The termination **eus**, in proper names, derived from the third declension of Greek contracts in **-εύς**, is better pronounced in one syllable, as in **Or'pheus** (ôr'fūs), **The'seus** (thē'sūs); although many pronounce it in two, **Or'phe-us**, **The'se-us**.

ua, **ue**, **ui**, **uo**, **uu**, when diphthongs, are pronounced like **wa**, **we**, etc., as in **lin'gua** (lĭŋ'gwȧ), **quo'ta** (kwō'tȧ), **e'quus** (ē'kwŭs), etc. They are always diphthongs after **q** and usually after **g**.

ui in **cui** and **huic** is pronounced like **ī**, (**kī**), (**hīk**); or, by some, like **wī**, (kwī).

4. Consonants are, in general, pronounced as in English, but the following cases are to be noted.

C, before **e**, **i**, and **y**, and the diphthongs **æ**, **œ**, and **eu**, is pronounced as **s**; as, **Cæ'sar**, **coe'lum**. *Exception:* **c**, ending or following an accented syllable, before **i** followed by a vowel, and also before **eu** and **yo**, has the sound of **sh**; as, **fi'e-ri fa'ci-as** (fī'ā-shĭ-ăs), **si'cy-on** (sĭsh'ĭ-on).

ch has always the sound of **k**; as, **char'ta** (kär'tȧ). **ch**, before **th** at the beginning of a word, is silent; as in **Chthonia** (thō'nĭ-ȧ).

ct, initial, in words of Greek origin, is pronounced as **t**; as in **cte-nid'i-um** (tē-nĭd'ĭ-ŭm).

G is pronounced "soft" (like **j**) before **e**, **i**, and **y**, and the diphthongs **æ** and **œ**; as **ge'nus** (jē'nŭs), **æ'gis** (ē'jĭs). Otherwise it has its "hard" sound (as in **bag**, **go**).

When **g** comes before another **g** "soft," it is assimilated to it in pronunciation; as in **Ag'ger** (ăj'ĕr).

gn, initial, in words of Greek origin, is pronounced as **n**; as in **gno'mon** (nō'mŏn).

mn, initial, in words of Greek origin, is pronounced as **n**; as in **mne-mos'y-ne** (nē-mŏs'ĭ-nē).

ph is usually pronounced as **f**. Before **th** at the beginning of a word it is usually silent, as in **phthi'sis** (thī'sĭs), though it is pronounced (as **f**) by some, even in this position, in Latin words not common in English.

ps, initial, in words of Greek origin, is pronounced as **s** or, by some, as **ps**; as in **psy-cho'sis** (sī-kō'sĭs; psī-kō'sĭs).

pt, initial, in words of Greek origin, is pronounced as **t**, or, by some, as **pt**; as in **pter'o-dac'tyl** (tĕr'ō-dăk'tĭl; p'tĕr'ō-).

S is usually "sharp" (as in **sun**). *Exceptions:* (*a*) **si**, followed by a vowel and immediately preceded by a consonant in an accented syllable, is pronounced as **shi**, or, by some, as **sh**; as, **Al'si-um** (ăl'shĭ-ŭm). (*b*) **si** and **zi**, followed by a vowel and immediately preceded by an accented vowel, are pronounced **shi** and **zhi** (by some **sh** and **zh**); as, **Rafflesia** (rȧ-flē'zhĭ-ȧ), **Sabazia** (sȧ-bā'zhĭ-ȧ). In a few proper names, **s** preceded by a vowel in an accented syllable and followed by **i** before another vowel, has the sound of **sh**; as, **Asia** (ā'shĭ-ȧ), **Theodosia** (thē'ō-dō'shĭ-ȧ).

NOTE. There is great confusion in the present English pronunciation of words ending in **-sia**, etc.; **-shĭ-ȧ**, **-shȧ**, **-sĭ-ȧ**, **-zhĭ-ȧ**, **-zhȧ**, all being heard from educated persons. For the vocabulary entries great pains have been taken to ascertain the best usage, and no attempt has been made, especially in scientific names, to follow absolutely a fixed rule for such words. In Latin quotations, when it has been necessary to mark them in whole or in part (cf. § 271, *note*), it has been done in accordance with the above rule.

S, final in a word, after **e**, **æ**, **au**, **b**, **m**, **n**, and **r**, has the sound of **z**; as, **mi'lēs**, **æs**, **laus**, **leng**, **Mars**. In accordance with English analogy, **s** is pronounced as **z** in **Cæ'sar**, **cæ-su'ra** (usually), **mi'ser**, **mu'sa**, **re-sid'u-um**, **çau'sa**, **ro'sa**, and their derivatives, and in some other words; but not (usually) in **Cæsarea**, nor in **trans** or its compounds, as **trans'e-at**.

T, following an accented syllable and preceding an **i** followed by another vowel, sounds like **sh**, as in **ra'ti-o** (rā'shĭ-ō; -shō), **Ig-na'ti-us** (Ig-nā'shĭ-ŭs; -shŭs). But **t** in such positions retains its sound as in English tin after **s**, **t**, or **x**, as in **Sal-lus'ti-us**, **Brut'ti-i**; and in proper names ending in **-tion** or **-tyon**, as in **The'o-do'ti-on**, **Am-phic'ty-on**.

X, initial, has the sound of **z**, as in **Xan'thi-um** (zăn'thĭ-ŭm), **Xen'o-phon**; otherwise it has the sound of **ks**, as in **ax'is** (ăk'sĭs), **ex'e-unt**. *Exceptions:* When **ex** (also by some **ux**) is followed by a vowel in an accented syllable, **x** has the sound of **gz**; as in **ex-em'plum** (ĕg-zĕm'plŭm).

X, final in a syllable, before **i** followed by another vowel, or before **u** with the sound of **ū** or **ŭ**, is pronounced as **ksh**; as, **nox'i-us** (nŏk'shĭ-ŭs).

RULES FOR THE "ROMAN" PRONUNCIATION OF LATIN.

§ **273.** In the "Roman" method of pronouncing Latin there are no silent letters and no obscured vowels. Each vowel has always the same, or nearly the same, sound, but may be long or short in actual quantity (cf. § 74). The sounds of Latin according to this method are as follows: *

1. Vowels.

a (long), as in **art**.
e (long), as **a** in **pale** or **ça'os**.
i (long), as in **po-lice'**.
o (long), as in **pole**.
u (long), as in **rude** (rōōd).

a (short), as in **ar-tis'tic**.
e (short), as **a** in **cha-ot'ic**, or as **e** in **pen**.
i (short), as in **tin**.
o (short), as in **o-bey'**.
u (short), as in **pull** (pōōl).

y as French **u** or German **ü** (§ 248).

2. Diphthongs.

æ (**ae**) as **ai** in **aisle**.
oi (**oe**) as **oi** in **oil**.
ei as **ei** in **veil**.

au as **ou** in **house**.
eu as **ā'ōō**.
ui as **wē**; as in **cui** (kwē), **huic** (hwēk).

3. Consonants.

b, **d**, **f**, **h**, **k**, **l**, **m**, **n**, **p**, and **qu** are pronounced as in English; except that **bs** and **bt** are pronounced as **ps** and **pt**.

c always as in **cow**; never as in **city** or in **gracious** (-shŭs). Cf. **t**.

ch as **k** + **h**, about as in **truck horse**; but it may be pronounced as simple **k**.

g always "hard," as in **go**; never as in **gem**. When **ngu** precedes a vowel, the **gu** has the sound of **gw**; as in **languens**.

j is like **y** in **yes**.

ph as **p** + **h**, about as in **loophole**; but it may be pronounced as simple **p** or like English **ph** (**f**), a sound which it acquired soon after the classical period.

r is trilled slightly with the tip of the tongue.

s always "sharp," as in **sun**.

su as **sw**; as in **suavitas**.

t always as in **tun**; never as in **nation** (-shŭn).

th as **t** + **h**, about as in **hothouse**; but it may be pronounced as simple **t**.

v like **w**.

x always as in **box**; never as in **ex-ist'** (ĕg-zĭst'), or in **xe'bec** (zē'bĕk).

z as in **maze**, or as **dz** in **adz**.

NOTE. Doubled letters, as **dd**, **ll**, **pp**, etc., should be pronounced so that both are distinctly audible, as **dd** in **had done**, etc.

THE PRONUNCIATION OF GREEK.†

§ **274.** Various methods of pronouncing classical Greek are in use, as: (*a*) The English method, which follows the rules for the English pronunciation of Latin, the written accents being disregarded. This method is now practically unused in America in teaching Greek, though still common in England. Greek proper names, however, when written in Roman letters, are pronounced according to this method. (*b*) The Continental method, in which the letters are sounded according to the analogies of the native languages, is used chiefly by the European nations (cf. § 271). (*c*) The modern Greek method, according to which the letters have their values as in modern Greek, is not widely used. (*d*) The classical pronunciation, which reproduces, as nearly as possible, the Attic pronunciation of the fourth century B. C. This is the method now almost exclusively used in the schools and colleges of the United States. The values of the letters according to this method are as follows:

1. Vowels.

α long, as Eng. **a** in **art**; short, as **a** in **artistic**.
ε as Eng. **e** in **cha-ot'ic**, or as **e** in **pen**.
η as Eng. **a** in **fate**, or as **e** in **there**.
ι long, as Eng. **i** in **police**; short, as **e** in **be-gin'**.
ο as Eng. **o** in **o-bey'**.
ω as Eng. **o** in **tone**, or as **o** in **orb**.
υ as French **u** in **menu** (§ 248).

2. Diphthongs.

αι as Eng. **ai** in **aisle**.
αυ as Eng. **ou** in **out**.
ει as Eng. **ei** in **veil**.
ευ as **ĕ'ōō**.
οι as Eng. **oi** in **oil**.
ου as Eng. **ou** in **soup**.
υι as **ōō'ĭ**.

3. Consonants.

β as Eng. **b** in **boy**.
γ as Eng. **g** in **go**.
γ before κ, γ, χ, ξ, as Eng. **ŋ** in **iṇk**.
δ as Eng. **d** in **dog**.
ζ as **zd** in **dazed** (dāzd), or as **dz** in **adz**.
θ about as Eng. **th** in **hothouse**.
κ as Eng. **k** in **kind**.
λ as Eng. **l** in **let**.
μ as Eng. **m** in **me**.
ν as Eng. **n** in **not**.
ξ as Eng. **x** in **wax**.
π as Eng. **p** in **pie**.
ρ as Eng. **r** in **red**, but trilled with the tip of the tongue.
σ, ς as Eng. **s** in **sun**.
τ as Eng. **t** in **toe**.
φ about as Eng. **ph** in **loophole**.
χ about as Eng. **ckh** in **blockhouse**.
ψ as Eng. **ps** in **Topsy**.

* No attempt is here made to give more than the approximate classical pronunciation as commonly taught in the schools and colleges; nor is any discussion of questionable points entered into. For a brief summary of the Roman pronunciation the reader is referred to Lord's *The Roman Pronunciation of Latin*, and for a more extended treatment to Lindsay's *The Latin Language*, and Seelman's *Die Aussprache des Latein*.

† For a more complete treatment of Greek pronunciation, see Blass's *Pronunciation of Ancient Greek* (*English* translation, 1890).

VI. RULES FOR THE ENGLISH PRONUNCIATION OF NAMES FROM THE HEBREW.

§ 275. The Greek and Latin names occurring in the Scriptures follow, in general, the same rules of pronunciation as other Greek and Latin proper names (cf. § 271). These rules, so far as they relate to syllabication and vowel sounds, are also generally observed in the pronunciation of the names derived from the *Hebrew*; but the true *accentuation* of these names cannot now be ascertained with certainty, the original pronunciation of Hebrew having been lost. The Masoretic vowel system and accents, commonly used in our Hebrew Bibles, were developed by Jewish scholars at some time from the sixth to the eleventh century after Christ. But these differ so much from the ordinary English pronunciation that usually more regard has been paid to the corresponding Greek forms in the Septuagint; and in many cases, where the Greek word differs essentially from both the Hebrew and the English, reference has been made to analogy, custom, euphony, the usage of the poets, and the authority of orthoëpists. Many now follow the Masoretic accentuation of Scripture names more than formerly; and it often seems best to give two modes of pronunciation

The names in the Vocabulary have been accented, divided into syllables, and marked in accordance with this plan. The consulter will not, therefore, require any Rules to guide him to a correct pronunciation; but the few which follow, — being short, and easy to remember, — may be of some use when he happens not to have the Dictionary at hand.

RULES.

1. In Hebrew proper names, the letters have their usual English sounds as in the English pronunciation of Latin (§ 272), except in the cases specified below.

2. The letter **a** when final in an unaccented syllable is pronounced as *ȧ* in **so'fȧ**, except when immediately followed by **i**, in which case it has the sound of **ā**, as in **Hag'gā-ī.**

3. Every final **i**, forming a distinct syllable by itself, or with the preceding consonant, has its long sound; as, **Ab'dī, Hag'gā-ī, Ed'rė-ī, Thom'ō-ī.**

4. The vowels **ai** are sometimes pronounced in one syllable, as, by some, in **Hu'shai, Si'nai**; and sometimes in two, as in **Sham'mā-ī, Bar-zil'ā-ī.** When pronounced in one syllable, they should be sounded like **ai** in **aisle**; as, **Hu'shaī, Si'naī.** Some choose to give them the diphthongal sound of **ā** (**āle**), but this is now rather archaic.

5. The vowels **ei**, when followed by a consonant, form a digraph, and are pronounced like **ei** in **seize**; as, **Cēi'lan.** When followed by a vowel, they are pronounced in separate syllables, and the **i** is generally like consonant **y**; as, **Sa-me'ius** (*sȧ-mē'yŭs*).

6. The vowels **ia**, following an accented vowel, are commonly pronounced in one syllable, the **i** taking the sound of consonant **y**; as in **Ban-na'ia** (*băn-nā'yȧ*), **I-sa'iah** (*ī-zā'yȧ*); although some pronounce **ai** as in **aisle**, as in **Isaiah** (*ī-zī'ȧ*). In other cases, they are pronounced separately and the accent is on the **i**, as, **Sar'a-ī'ȧ, Ber'a-ī'ah.**

7. The letter **g** has its "hard" sound before **e** and **i**, as in the English words **get, give**; as, **Gethsemane, Gilead. Bethphage**, in consequence of having passed through the Greek of the New Testament, is an exception, the **g** being sounded "soft," like **j**, conformably to the usual English mode of pronouncing names derived from the Greek (§ 271).

8. **Ch** is pronounced like **k**; as, **Chaldea, Enoch. Rachel** is the only exception, the **ch** in this name being sounded like **ch** in **chest. Cherub** (kē'rub), a city of Babylonia, must not be confounded in pronunciation with **cher'ub**, one of an order of angels.

9. Gentile names in **-ite** (sing.) and **-ites** (pl.), together with feminine nouns of the same class in **-itess**, are English formatives, and follow the accent of their primitives, as, **Am'mon-īte, Is'ra-el-īte**s. The same is true of gentile adjectives in **-itish**, as, **Mo'ab-īt'ish.** Gentile names in **-ene** and **-ine**, with their plurals, are also Anglicised, in spelling and pronunciation, except **Mag'da-le'ne**, which is thus pronounced as a classical name, though often in three syllables, **Mag'da-len**, as an English name.

VII. RULES FOR THE SYLLABIC DIVISION OF WORDS IN WRITING OR PRINT.

§ 276. ☞ The aim of this set of Rules is to furnish a practical general guide for ordinary use. The division of a word as entered in heavy-faced type in the Vocabulary is to be followed in any particular case. The divisions of the respellings in the parentheses following the vocabulary entries, being intended only to represent the pronunciation, do not coincide in every case with the divisions of the vocabulary entries. Cf. § 110, end.

Rule I. The members of a compound word, which are themselves English words with meanings unchanged in the compound, are separated in syllabication; as, **foot-stool, mill-stone, way-faring.**

Rule II. Two or more letters, when they represent a diphthong (**oi** in **oil, ou** in **out**, etc.), or form a digraph or trigraph, whether vowel (**ai** = **ā, â**, etc., **ea** = **ē, ā, ê, ă, ĕ, ē**, etc., **eau** = **ō, ū**, etc.) or consonant (**ph** = **f**, **gh** = **f, k**, etc., **th** in **thin** or **this**, **sh** in **ash**, **gn** in **sign**, **ng** in **sing**, **ss** in **peeress-es**, **sc** in **science**, **sch** in **schist**, **ck** in **sick**, etc.), are not separated, but are treated as if single vowels or consonants; and this is to be understood when "vowel" or "consonant" is used in the following Rules.

EXCEPTIONS. In **pas-sion, Hes-sian, expres-sion, mis-sion, pres-sure, fis-sure, is-sue**, etc., the double **s** is divided (see Rule IV., A, 2 & 3, and Rule VIII.).

Rule III. Two vowels coming together and sounded separately belong to separate syllables; as, **a-orta, a-eri-al, sci-ence, curi-osity, o-olite, ortho-epy, aye-aye, moi-ety, cow-ard, abey-ance, joy-ous, buoy-ant.**

Rule IV. A. Certain consonants are NOT TO END a syllable: —

1. **C** and **g** "soft", as in **wa-ger, exi-gency, eulo-gize, invin-cible**; except as coming before a recognized English suffix (as **-ing, -ed, -er**, etc.), as in **rang-er, rag-ing, delug-ing**, etc. (see Rule V.); or as coming without another consonant next after a short accented vowel, or in the digraph **dg** = **j**, as **capăc'ity, măg'ic, rĕg'iment, prĕç'ipice, rustĭc'ity, dĭg'it, lŏg'ic, jŭdg'ment, acknowledg-ing.**

2. Any of the consonants **t, s, z, ç, sc, g**, or **d**, when wholly or partially absorbing a following **i** or **e**, and thus having the sound of **sh** or **zh** or **ch** or **j**; as, **condi-tion, nă-tional, ră-tional, spĕ-çial, vi-çious, cŏn-science; glā-zier, vi-sion, evā-sion, ques-tion, admix-tion; reli-gion, pi-geon, contā-gious; sōl-dier.**

EXCEPTIONS. **Right-eous** and its derivatives. — For **omnis-cient**, cf. **effi-cient**, etc., and see Rule VII., B, 1. — For **pas-sion**, etc., see Rule II., Exc.

3. Any of the consonants **s, z, t, d**, when modified by a following **u** towards or into the sound of **sh, zh, ch** or **j**; as, **cen-sure, sen-sual, in-sure, pres-sure; era-sure, sei-zure; na-ture, fea-ture, ves-ture, depar-ture, intellec-tual, tumul-tuous; proce-dure.** But a consonant so modified is joined to the preceding short vowel or vowel digraph, when this is accented and no consonant intervenes; as, **ăz'ure, plĕas'ure, căs'ual; năt'ural, habĭt'ual, congrăt'ulate; ĕd'ucate, nŏd'ule, schĕd'ule.** In general, this Rule does not give way to Rule V. in respect to etymology.

EXCEPTIONS. **Fraud-ulence, spirit-ual**, etc. See Rule V., paragraphs 1 & 2.

B. Certain consonants are NOT TO BEGIN a syllable: —

1. **X** when pronounced **ks** or **gz**; as, **anx-ious, ex-amine, vex-ation, complex-ion, crucifix-ion, flux-ion.**

2. **R** preceded by **â** (or an equivalent), as in **pâr-ent, beâr-er, fâir-est**; or by **ē** (or an equivalent), as in **avēr-age, genēr-al, timor-ous, liquor-ice.**

3. A single **l** or **n** or **v** followed by **i** with the sound of consonant **y**; as, **fōl-io, ăl-ien, pecūl-iar, carnēl-ian, gēn-ius, ūn-ion, convēn-ient, sāv-ior, behāv-ior; văl-iant, Spăn-iard, bĭl-ious, pavĭl-ion, mĭn-ion, on-ion.** — For **rebĕl-lion, păn-nier, rŭf-fian**, etc., see Rule VIII.

Rule V. Prefixes and suffixes which are such beyond question, and are universally and obviously recognizable, as **-er, -est, -ing, -ist, -eth, -ish**, etc., are separated from the body of a word (without regard to the general rules IV., VI., VII., VIII.); either when added directly to it, as in **sweet-ish, sweet-er, counter-act, trans-act, lead-er, relent-ing, district-ed, controvert-ed, heart-i-ly, wasp-ish, eat-able**; or when the suffix displaces a final silent **e** of the stem, as in **māk'er, wāv'ing, desīr'ing, overrāt'ed, baptīz'ing, danc'er, rag'ing, delug-ing, pros'trat-ed, a'erat'ed, ex'ercis'ing, com'promis'er, deo'doriz'er, Is'raelit'ish, an'tidot'al.** When the syllable affixed causes a doubling of the final consonant of the stem, the added consonant goes with the added syllable; as, **glad-den, rob-ber, allot-ted, con-fer-ree, confer-rable.**

This principle is restricted to derivatives in which the spelling and the pronunciation (with the accentuation) remain as they were in the original words; as is not the case in **ăb'stĭnĕnce**, from **ab-stain'**; **prĕs'ī-dĕnt**, from **prē-sīde'**; **ĭn'cī-dĕn'tal**, from **ĭn'cī-dĕnt**; **trĭ-ŭm'phănt**, from **trī'ŭmph**; **çau-săl'i-ty**, from **cause**; **prŏc'lā-mā'tion**, from **pro-claim'**, etc.; and further, to those cases in which the meaning of the original is carried fully and plainly into the derivative, without deviation by specialization or otherwise; as is not the case in **trus-tee**, from **trust**; **trea-tise**, from **treat**, etc.

Words ending in **-ive** or **-or** (not the English suffix **-er**) follow the division of Latin or French, from which they come, or after the analogies of which they are formed; as, **de-struc-tive, con-struc-tive, abu-sive, instruc-tor, cre-a-tor**, etc; and so also the feminines **instruc-tress, çre-a-tress**, etc.

The double suffix **-ical** is divided **i-cal**; as, **log'i-cal, mag'i-cal, spher'i-cal**, etc.

Rule VI. When a single consonant (or digraph or trigraph; Rule II.) comes between two sounded vowels (or equivalents; Rule II.), it naturally joins the following vowel; as in **fa-ther, fa-vor, rea-son, beau-ti-ful, pro-hi-bi-tion** (Rule IV.), **inva-lid, no-ti-fy, no-ti-fi-ça-tion, ro-ta-to-ry, pla-guy, pla-gui-ly, ro-guish**, etc., except as follows:

1. When the preceding vowel is short and under an accent the consonant is carried back with it; as **hăb'it, habĭt'ual, prŏph'et, prophĕt'ic, liv'id, livĭd'ity, ac-ăd'emy, ăc'adĕm'ic, admŏn'ish, bọs'om, wọm'an, pŭn'ish.** — For **vĭ'sion, văl'iant**, etc., see Rule IV., A, 2, and B, 3.

2. In a prefix, a short vowel though unaccented takes the following consonant; as, **ĭm-ăgine, ăb-ăctor, ĭn-augurate, ĕn-ămor, dĭs-ărm, mĭs-anthropy.** (Rule V.)

3. The unaccented vowel **ŭ** or an equivalent, and sometimes one of the other short or obscure vowels (**ĕ, ĭ, ŏ, ŭ, ĕ, ĭ, ŏ**), especially in an unaccented root syllable, may take the following consonant; as, **visĭŏn-ary** (Rule V., 1), **custŏm-ary, symptŏm-atology, systĕm-atic, muskĕt-eer, visĭt-ation, Mennŏn-ite**, etc.

4. A long vowel may take the following consonant according to Rules IV., V., as, **āl-ien, māk-er**, etc.

Rule VII. When two or more consonants, which may be used together to begin a syllable, come between two sounded vowels; —

A. All may be joined to the FOLLOWING vowel: —

1. When the preceding vowel is long and accented, or is capable of ending an unaccented syllable; as, **enā'bling, Hē'brew, rụ'bric, cȳ'clone, sā'cred, ī'dler, hȳ'dra, trī'fler, bū'gler, ē'gress, pēo'ple, A'pril, prē'script, hā'tred, neū'tral, inte-gral, terri-bly, fee'ble, sā'bre, ō'chre, a'bler.**

2. When the following vowel is in an accented syllable; as, **o-blige', vi-bra'tion, cy-clop'ic, a-chro'matism, a-cros'tic, hy-drau'lic, re-flect', re-frain', anaglyph'ic, emi-gra'tion, re-ple'tion, e-qua'tion, re-proof', de-scrip'tion, respect', re-splen'dent, be-stride', be-stow'al, be-twixt'.**

B. ONE of them may be joined to the PRECEDING vowel: —

1. When this vowel is short; as, **tăb-let, ăg-let, ăs-thenic, ăph-logĭs-tic, ĕquity, lĭq-uid, jăs-per, ăs-tral, vĕs-tige, ĕs-teem, illŭs-tration, regĭs-tration, ŏb-lation, nĕc-rological, prŏc-lamation, ăch-romatic, mĕd-ley, ăt-las, rĕs-cue, mŭs-ket, dĕs-potism, ĕs-pecial, ăb-rupt, săc-rament, pĕt-rify, omnĭs-cient.** — For **spĕ-cial, vĭ-sion**, etc., see Rule IV., A, 2. — For **băgn-io, serăgl-io**, etc., see Rule IX.

EXCEPTIONS. **Trou'ble, dou'ble**, etc.

2. When the consonants are **st, str**, or **sp**, especially if the preceding or following syllable is under an accent; as, **mas'ter, empāis'tic, aus-tere', aus'tral, pās'try. oys'ter, aus'cultation, aus-pi'cious, acous'tics, Lancas-tē'rian.** See **C.**, below.

C. COMBINATIONS like **st**, which are capable of ending as well as of beginning a syllable, may be joined to the PRECEDING vowel, Rule V.; as, **hāst-ed, wāst-ing, hast'y, hast'ily, ēast-ern, lāst-ed, cōast-er, pōst-age, wāsp-ish. grāsp-er, āsk-er.**

Rule VIII. When two or more consonants, not capable of together beginning a syllable, come between two sounded vowels, one or more, but not the whole of them, is joined to the preceding vowel, whether this vowel be long or short; as, **an-gel, cam-bric, oc-tave, sym-bol, mort-gage, in-jury, com-punc-tion, con-ver-sation, ar-chitecture, con-vul-sive, con-temp-tible, in-ciden-tal, trium-phant, diph-thong, for-mality, speçk-le, pick-le, buck-le, this-tle, han-dle, spec-tre.**

EXCEPTION. This Rule gives way to Rule V., when the derivative retains the spelling and accentuation together with meaning of the root or the original word; as, **bank'er, pound'ed, com'pass-es, dress'es, add'ing, distill'er, conscrĭpt'ing. conflict'ing, nôrth'ĕrn-ĕr, tĕmpt'ed, tĕll'er, danc'er, chang'ing.**

NOTE. This Rule is particularly exemplified when a consonant is doubled, as the syllabic division is then usually made between these two letters; as, **dab-ble, stab-bing, dif-fer, ruf-fian, metal-lic, excel-ling, expel-lable, distil-lation, rebellion, hal-liard, bril-liant, surveil-lance, ban-ner, dap-per, bar-ren, passion, at-tack, diz-zy, bat'tle.** — Cf. Rule II., Exc.

Rule IX. Certain letters or combinations in foreign words, into which the sound of consonant **y** enters, are kept in the same syllable; as, **gl** (= **ly**) in **serăgl-io, imbrōglio; gn** (= **ny**) in **băgn-io, cō-gnac**, etc. — For **ll**, see Rule VIII., NOTE.

Rule X. In writing or print no syllable is separable which does not include a vowel. Thus **chasm, hour, prism, James's**, etc., are treated as monosyllables (cf. § 101).

VIII. SYNOPSIS OF WORDS DIFFERENTLY PRONOUNCED BY DIFFERENT ORTHOËPISTS.

§ 277. This Synopsis is a complete revision of that appearing in the International Dictionary. Many words in the older list have been replaced by others, and the list has been increased by the addition of several hundred additional words, now totaling more than 1600 words. Recent dictionaries have replaced some that were previously cited. The aim of the Synopsis is not simply to gratify curiosity, but mainly to give information about words — especially important words — whose present pronunciation is a matter of doubt or controversy. Of the dictionaries here cited, in addition to Webster, three — the Oxford English Dictionary, Stormonth, and the Encyclopædic — are English, and three — the Century, Funk and Wagnalls, and Worcester — are American. The best editions of these works have been used in the preparation of the list. There are other works that might be cited as authoritative; but of those that contain complete vocabularies, these best represent the pronunciations which now prevail in good usage. In the table the pronunciations given in the column under the caption *Webster* are those of this edition of Webster, *Webster's New International Dictionary*.

The *Oxford English Dictionary* is one of the new dictionaries now cited in the Synopsis. This monumental work originated in a resolution of the English Philological Society, passed in 1857, by which it was proposed that materials should be collected for a new English dictionary. From that time a vast amount of data was accumulated through the efforts of several hundred voluntary readers. In 1879, the preparation of the vocabulary in its present form was begun by Dr. (now Sir) James A. H. Murray, who has been assisted in the general editorship of the later volumes by Dr. Henry Bradley and Dr. W. A. Craigie. The pronunciations given in this work reflect in general the cultivated usage of the south of England.

The *Century Dictionary*, another dictionary added to those formerly cited, is based upon Ogilvie's *Imperial Dictionary*, which is now dropped from this list. The Century was prepared under the superintendence of William Dwight Whitney, Ph. D., LL. D., and since its appearance in 1891 has been held in high esteem.

Funk and Wagnalls' "*Standard*" *Dictionary*, now cited, was prepared under the supervision of Isaac K. Funk, D. D., Editor in Chief, and appeared in 1893. The spelling and pronunciation in this work were done under the editorship of Francis A. March, LL. D., L. H. D., and in general reflect the usage prevailing at the time of its preparation.

The Dictionary of Rev. *James Stormonth* is still retained in the Synopsis. Mr. Stormonth himself was a Scotchman, and died in 1882, but the pronunciation of his dictionary has been edited by Rev. *Philip Henry Phelp*, who received his degrees of B. A. and M. A. at St. John's College, Cambridge, England. It is thus representative of English conservative progress, and closely allied to Walker's Dictionary (c. 1800) in its general system of pronunciation.

The *Encyclopædic Dictionary*, edited by Rev. *Robert Hunter*, M. A., LL. D., and issued in fourteen parts, 1879–1888, is likewise retained in this list. The Preface, in the last part, says: "The work has been carried on under the personal supervision of Mr *John Williams*, M. A., late scholar of Trinity College, Oxford [Eng.], who has revised and signed every page for press, and who is responsible for the general arrangement of the work, especially as regards matters of style, pronunciation, etc."

The Pronouncing Dictionaries of Dr. *Joseph E. Worcester* give evidence of long-continued and conscientious attention to the subject of pronunciation. His quarto edition of 1859, with its Supplement issued in 1882, is here quoted under the name of *Worcester*.

The diverse systems of notation employed by the orthoëpists whose modes of pronunciation are here reported are of necessity represented by that which is used in this Dictionary; and although, as a consequence, the precise shade of sound intended may not in all cases be expressed with minute accuracy, yet it is believed that very few, if any, important discrepancies will be found to exist. It should be remembered that many minor differences of pronunciation as indicated in the different dictionaries, especially with reference to the vowels of unaccented syllables, are due to the choice of a slightly different standard of pronunciation by each editor (cf §7). The syllabic division of words has been made to agree with that in Webster where this has involved only slight and non-essential differences. The following peculiarities may be noted. The *Oxford English Dictionary* has a very complete and complicated system of phonetic notation, with many shades of sound, especially in the obscure vowels, not usually distinguished in other dictionaries. These have in each case been recorded in what was deemed the nearest Websterian equivalent for the sound as occurring in that particular position. In words like **ambrosia, bes'tial, Cauca'sian, Chris'tian, conve'nient,** etc., the letters **ia, ie,** etc., are not separated in the pronunciations given by *Century* and *Funk and Wagnalls*, nor is it indicated whether the **i** is vocalic or consonantal. The **ia, ie,** etc., are, therefore, left undivided in such words, when cited from these two books. *Stormonth* ascribes the sound of **a** in **am** (our **ă**) to the **a** in such words as **ask, sym'pa-thy, a-mend', com'ma,** for which this Dictionary has **ȧ** and **ȧ**.

ORTHOGRAPHY.

OBSERVATIONS.

The English language, as being the offspring of two parent languages very different in form and spirit, and having been, in no inconsiderable degree, modified in its growth by influences from various other tongues, contains, as was inevitable, very many anomalies, and in no particular are these anomalies more numerous and striking than in its orthography, with the single exception, perhaps, of its orthoëpy. Neither the Anglo-Saxon nor the Norman-French could boast of any great regularity in orthography, though writers in either of these two languages spelled their words, each in his own fashion, so as to represent their sounds, and not according to an arbitrarily fixed orthography such as exists for modern English. When, therefore, the vocabularies of these two languages, widely different both in their orthographical structure and their phonological character, were combined, the result is a language in which the orthography has almost reached the extreme of irregularity. To such an extent, in fact, have the signs representing sounds been multiplied, that many of the letters are pronounced in several different ways, while the letters, or combinations of letters, for a single sound amount, in some cases, to scores. Indeed, it is computed that many words of no more than two syllables may be spelled in several thousand different modes, by the use of combinations actually employed in other words in the language. The word *scissors*, for instance, may be thus written, as is computed by Ellis, in nearly six thousand different ways. Of course, comparatively very few of these possible forms of spelling are ever employed in the case of any one word; yet the causes of disorder mentioned above have operated so effectually, that the words in respect to which even the most careful writers are at variance are numbered by thousands, while those in which an orthography contrary to analogy has been universally adopted are equally numerous.

Bad as is the orthography of the present day, however, it is order itself compared with that of a few centuries ago. It would, of course, be unreasonable to expect that there should be any general correspondence of orthographical forms in the works of different authors before the types of the printer gave prominence to certain forms, which finally became recognized as standards; and manuscripts conclusively prove that the wildest license prevailed in spelling words. Even proper names, which would naturally receive more attention and be written with more care than any other class of words, are found recorded in great multitudes of forms, several variations being sometimes found in the same manuscript or work. Disraeli states that "Leicester has subscribed his own name eight different ways," and that "the name *Villers* is spelled fourteen different ways in the deeds of that family." A still more remarkable instance is stated by Lower; namely, that the family of *Mainwaring* has the extraordinary number of one hundred and thirty-one variations of that single name, all drawn from authorized documents. But there is evidence that, in the midst of all this confusion, there were some writers who were attentive to the proper forms of words, and who were notable exceptions to the general rule. The spelling of the Ormulum, which was written in the thirteenth century, though strange and cumbrous, is very remarkable for its regularity; and the author strenuously urges his copyists to follow his orthography with the utmost exactness. *History of the English Language*, § 190. So also Chaucer, more than a century later, carefully revised and corrected his own works; and he enjoined upon his scribe to "write more trew" that which was intrusted to him, saying that he was obliged "it to correct and eke to rubbe and scrape," because of the negligence and haste with which it had been copied.

The invention of printing commenced a new era, though for a long time even this had little effect to fix the exterior form of the language. Indeed, much of the perverse orthography of books printed two or three centuries ago is to be attributed to the printer, who often inserted or expunged letters as the length of the lines or convenience of spacing required. It is no uncommon thing to find, in the works of Chaucer, Spenser, and other early writers, or in books printed two or three centuries ago, the same words occurring in several different forms upon the same page. Even as late as the time of Shakespeare, orthography was very unsettled; and, as Halliwell states, the name of the great bard himself was written in more than thirty different ways. The printers, however, were not solely, nor even chiefly, responsible for this confusion; for it is certain that their arbitrary changes and deviations from uniformity would not have been tolerated had they been made in defiance of established usage; and there is abundant evidence to prove that writers themselves were careless in the extreme. The fact must not be overlooked, that in the writings of Wycliffe, Chaucer, and other early authors, there were still many remnants of the Semi-Saxon inflection, which have since utterly disappeared, and which gave to some words a variety of form to be attributed neither to the carelessness of the writer, nor to an unsettled orthography. For copious examples, see *History of the English Language*, §§ 182–204.

The irregularities found in early books, though continuing for so long a time, were neither unnoticed nor looked upon with indifference. On the contrary, not only have numerous complete systems for the reformation of orthography been proposed, but various scholars have advocated, with more or less acuteness and learning, changes in regard to a great number of particular points. Sir Thomas Smith, Secretary of State to Queen Elizabeth, endeavored to introduce a regular system of orthography; after him, William Bullokar brought forward another system; a few years after this, Dr. Gill, Master of St. Paul's School, in London, a teacher of considerable eminence, proposed another scheme; and, still later, Charles Butler devised a new method of spelling, and printed a book in which it was employed. These writers agreed essentially as to the manner in which they sought to attain the end proposed, their plan being to reduce the spelling of words to uniform principles and make it practically phonetic, by the use of new characters, by applying various diacritical marks to the old letters, and by making the letters, or their combinations of characters, represent certain definite sounds. It is needless to say that these projects were never carried into practice.

In the time of Charles I., many changes were introduced; and it was still very common, even among eminent scholars, to spell words according to their pronunciation, omitting such letters as were deemed superfluous. These attempts at improvement, being made upon no settled or uniform principles, had little or no permanent effect upon the language. Another elaborate plan was proposed, in the seventeenth century, by Bishop Wilkins, similar in its general character to those of Smith, Bullokar, Gill, and Butler, and equally unsuccessful.

The celebrated Dictionary of Dr. Samuel Johnson, first published in 1755, has contributed more than any work written, either before or since, to fix the external form of the language and to diminish the number of irregularities; for though numerous inconsistencies are to be found in it, and many oversights, the learning of the author, and the sound judgment and practical wisdom which he displayed, gave it at once an authority which it has not even yet entirely lost; and the orthography of the present day, though it has received some important modifications since his time, is substantially the same as that exhibited in his dictionary. The changes in the spelling of words, introduced by Dr. Johnson, were generally made in order to restore the ancient orthography, or to remove some anomaly; and perhaps the most important office performed by his work was its having settled usage definitely in favor of some one of the numerous forms in which many words were written, thus removing the cause of much confusion. Among the most prominent alterations made by him were the restoration of *k* to many words which had long been written without it, as in *musick*, *rhetorick*, and the like, and the insertion of *u* in the termination of many words which previously ended in *or*, as in *ancestour*, *authour*, *errour*, and others. The former of these changes, a revival of the "ancient practice," was not received with favor, nor was this spelling adopted by subsequent writers; the latter, as it was thought to be justified by the analogy of the corresponding termination *eur* in the French, through which language many, perhaps a majority, of the words affected by it were derived from the Latin, was generally followed. Johnson's practice in this respect, however, was not in harmony with his theory; for he wrote only about half the words of this class with the ending *our*, leaving the rest in *or*, though for no reason that would not equally apply to them all. Yet this notable inconsistency was not only overlooked, but was perpetuated, especially in the orthography of English writers. In the United States a different practice now generally prevails, as will presently be mentioned.

The scheme of Pinkerton, who, in 1785, under the name of Robert Heron, proposed to render the language more euphonious by adding vowels to words ending in consonants, and by pronouncing the silent final vowels of others, in a manner perfectly arbitrary, is too ridiculous to deserve further mention. About twenty years later another absurd plan was published by Elphinstone, who printed a book in order to introduce it, but without success. During the 18th century, several English divines, as Lardner, Benson, and others, employed in many words methods of spelling peculiar to themselves, chiefly such as had long been abandoned, as in writing *ie* for final *y*; in adding *e* to words ending in *ss*; and in the use of such forms as *præface*, *persue*, *procede*, *sais* (for *says*), and the like. So also Mitford used many singular forms, such as *iland*, *intire*, *endevor*, *meer* (for *mere*), *spred*, etc. It is proper to mention here also the innovations of Archdeacon Hare, in the 19th century, who, on the ground of pronunciation, etymology, and analogy, employed in his works such forms as *atchieve*, *compell*, *enure*, *firy* (for *fiery*), *forein*, *invey* (for *inveigh*), *highth*, *ploulman*, *smugler*, and the like. He also advocated the omission of the apostrophe in the possessive case, and the substitution of *t* for *ed* in those preterits in which the latter termination is pronounced like *t*; as in *exprest*, *fixt*, *publisht*, etc., for *expressed*, *fixed*, *published*, etc. This substitution of *t* for *ed*, however, is not peculiar to Hare, since it accords with the usage of the early writers and of many, both poets and prose writers, in later times, and is also advocated in the later systems of the American Philological Association and the English Philological Society.

Besides the imperfect attempts mentioned above, many plans have been devised, at different times, for reducing the spelling of words to absolute uniformity and the greatest simplicity, by a complete reform in the method of representing the sounds of words by written characters; that is, by employing a new alphabet in which each sign stands for one, and only one, definite sound, and each sound is represented by one, and only one, character. Such a method of spelling was invented by Dr. Franklin, in the 18th century, though he never brought it to perfection, and scarcely used it, except in a brief correspondence with a friend. The *Phonotypy* of Isaac Pitman and A. J. Ellis promulgated in 1840, the *Glossic* of A. J. Ellis published in 1871, the *Broad Romic* of Henry Sweet, 1878, are ingenious systems of phonetic spelling employing the ordinary alphabet, with various modifications and additions. None of these has come into any extensive general use. The schemes of Lepsius, Müller, and others who have endeavored to form philosophical alphabets of universal application, are hardly to be mentioned here, as they are but indirectly related to English orthography.

Several organized attempts at a more or less thorough revision of English spelling have been made within recent years. In 1883, the Philological Society of England and the American Philological Association took joint action on the amendment of English spelling, and twenty-four joint rules were adopted, on the basis of which a list of amended spellings was made. Many of these spellings agree with those already adopted in this Dictionary and in general use. The others, which have not come into extended use, are now included in the Dictionary as variants of the more usual forms. The recently organized Simplified Spelling Board, in America, and the Simplified Spelling Society, in England, aim at the gradual simplification of English spelling by the reduction to uniformity of certain classes of words, and the elimination of sporadic anomalies.

In 1828, Dr. Webster published his Dictionary of the English Language, and the changes in spelling advocated by him have had no inconsiderable influence upon orthography, especially in the United States. These alterations were proposed by him chiefly on the ground of etymology and of analogy, from a desire, on the one hand, to make the words correspond, as far as practicable, with their primitive forms, so as to reveal more clearly their etymological affinities, and on the other to reduce as much as possible the number of anomalies and exceptional cases. Of the words whose orthography had been changed for the former reason, many were restored to their ordinary forms by Dr. Webster himself in the second edition of his work, published in 1840, and others still were restored in subsequent editions. The alterations of the second class have been received with favor and adopted by a large portion of the writers in the United States, and by some authors also in England.

It is to be observed that many of Dr. Webster's deviations from the usage of his time were not innovations, but restorations of older forms which were once very generally employed. The most important points in his orthography in reference to which there is still difference of usage among scholars, are included in the following list, in which the numbers refer to the sections of the Rules for Spelling Certain Classes of Words (see below), where the cases are mentioned particularly. These are, the not doubling the final consonant in derivatives of words like *travel*, *worship*, etc. (§ 8); doubling the *l* in *installment*, *enrollment*, etc. (§ 9); doubling the final letter in such words as *fulfill*, *instill*, etc. (§ 16); retaining the *i* in derivatives of *villain* (§ 27); writing *defense*, *offense*, etc., for *defence*, *offence*, etc., and *practice* for *practise* (§ 27); writing the termination *-er* for *-re* in words like *center*, *meter*, etc. (§ 31); writing *mold* and *molt* without *u* (§ 34). It may be remarked further with regard to words often written with the termination *-re*, but which in this book are spelled with two endings, *-er* and *-re*, that the use of *-er*, as in *meter*, etc., is but a restoration of the older spelling; and the same is true of the substitution of the termination *-or* for *-our*.

RULES FOR SPELLING CERTAIN CLASSES OF WORDS,

FOUNDED ON THE ORTHOGRAPHY OF DR. WEBSTER, AS EXHIBITED IN THIS VOLUME.

FINAL CONSONANTS.

§ 1. The letters f and l, at the end of monosyllables, and standing immediately after single vowels, are generally doubled: as in *staff*, *cliff*, *doff*, *puff*; *all*, *bell*, *hill*, *toll*, *null*. The words *clef*, *if*, *of*, *pal*, *nil*, and *sol*, are the most important exceptions.

§ 2. The letter s, at the end of a monosyllable, and standing immediately after a single vowel, is generally doubled, except when (e. g., in *o's*, *spade's*, *tones*, *loves*, *has*, *is*, *was*, etc.) it is used to form the possessive case or the plural of a noun, or the third person singular of a verb, as in *grass*, *press*, *hiss*, *moss*, *truss*. The only important exceptions are *as*, *gas*, *yes*, *gris*, *his*, *this*, *pus*, *plus*, *bus* (for *omnibus*), *thus*, and *us*.

§ 3. B, d, g, m, n, p, r, t, z are the only other consonants (besides *f*, *l*, and *s*) that are ever doubled at the end of a word. The following list contains nearly all the words in which these letters are doubled, including some that are spelled more or less with a single consonant: namely, *abb*, *ebb*; *add*, *odd*, *dodd*, *wadd* (Min.), *rudd*; *jagg*, *egg*, *bigg*

(n. & v.), *snigg, vugg; lamm, mumm* (to mask); *Ann, ann* (Law), *inn, Finn, jinn, wynn, bunn, sunn* (Bot.); *Lapp, wrapp; gnarr, parr, err, birr, shirr, skirr, dorr, whorr, burr, hurr, murr, purr; brett, frett, butt* (Naut.), *matt, platt, smutt, pott* (paper), *butt; jizz, frizz, buzz, fuzz, huzz.* The words *let, net,* and *set* are sometimes incorrectly spelled *lett, nett,* and *sett;* and some other words which should have the final letter single are spelled, by some writers, with it doubled.

§ 4. **A consonant is rarely doubled** when standing at the end of a word immediately after a diphthong or double vowel. The words *ail, peat, haul, door,* and *main,* are examples. The words *feoff, enfeoff, gneiss, speiss* are exceptions. The word *guess* is only an apparent exception, as the *u* does not strictly form a diphthong with the *e*, but serves merely to render the *g* hard.

§ 5. **Monosyllables ending with the sound of k,** and in which *c* follows the vowel, have usually *k* added after the *c;* as in *black, flock, cluck, knock,* and *buck.* The words *bac, lac, sac, tac, talc, zinc, ploc, roc, soc, arc, marc, orc, torc, disc,* and *fisc,* are exceptions.

Words of more than one syllable, ending in *-ic* or *-iac,* which formerly ended in *k,* also words derived from the Latin or Greek, or from other sources, and similar to these, or formed in an analogous manner, are now written without the *k;* as, *maniac, elegiac, zodiac, cubic, music, public.* The word *derrick* is an exception. Words of more than one syllable, in which *c* is preceded by other vowels than *i* or *ia,* commonly end in *ck;* as, *arrack, barrack, hammock, hillock, wedlock.* The words *almanac, carac, sandarac, limbec, rebec, varec, zebec, manioc* or *mandioc, havoc,* are exceptions. *Almanac, limbec, rebec,* and *havoc,* however, are sometimes written with *k* after the *c,* especially in England, and *carac* is oftener written *carack* or *carrack.*

DERIVATIVES.

§ 6. **In derivatives formed from words ending in c,** by adding a termination beginning with *e, i,* or *y,* the letter *k* is inserted after the *c,* in order that the latter may not be inaccurately pronounced like *s* before the following vowel: as *colic, colicky; traffic, trafficked, trafficking, trafficker; physic, physicked, physicking; zinc, zincked, zincking, zincky.* We find also *zincing, zincite, zincy, zinky* (as from *zink*), etc., not conformed to this rule.

§ 7. **Final consonant doubled.** In derivatives formed by adding a termination beginning with a vowel to monosyllables and words accented on the last syllable, when these words end in a single consonant (except *h* and *x*) preceded by a single vowel, that consonant is doubled: as, *clan, clan'nish; plan, planned, plan'ning, plan'ner; bag, bag'gage; hot, hot'ter, hot'test; wit, wit'ty; cabal', cabal'ler; abet', abet'ted, abet'ting, abet'tor; begin', begin'ning, begin'ner; infer', inferred', infer'ring.* The consonant is doubled in these words in order to preserve the short sound of the vowel, as otherwise the latter would be liable to be pronounced long. Thus, *plănned, hŏttest,* and *abĕtted,* would naturally be pronounced *plāned, hōtest,* and *abēted,* if the consonant were not doubled. Words of this class, in which the final consonant is preceded by *qu,* followed by a single vowel, form no exception to the rule, since the *u* performs the office of consonant *w:* as, *squab, squab'bish, squab'by; squat, squat'ting, squat'ter; quit, quitted, quit'ting; acquit', acquit'ted, acquit'ting.*

The derivatives of the word *gas* (except *gas'sing* and *gas'sy*) are written with but one *s;* as, *gas'eous, gase'ity, gas'ify. Ex'cellence,* as being from the Latin *excellens,* retains the double *l,* though one *l* has been dropped from the termination of *excel'.* Besides these, the chief exceptions to the rule are those derivatives in which the accent of the primitive is thrown back upon another syllable: as, *cabal', cab'alism, cab'alist; prefer', pref'erence; refer', ref'erence; defer', def'erence.* But *infer'able, transfer'able,* are common exceptions. It is no exception to this rule that *chancellor,* and the derivatives of *metal* and *crystal,* as *metalloid, metallurgy, crystalline, crystallize,* and the like, are written with the *l* doubled, since they are derived respectively from the Latin *cancellarius* (through the French), and *metallum,* and the Greek κρύσταλλος. So also the word *tranquillity* has the double *l,* as being from Latin *tranquillitas,* while the English derivatives of *tranquil,* though often written with two *l*'s are more properly written with only one, as *tranquilize, tranquilizer,* etc.

§ 8. **Final consonant not doubled.** When a diphthong, or a digraph representing a vowel sound, precedes the final consonant of a word, or the accent of a word ending in a single consonant falls on any other syllable than the last, or when the word ends in two different consonants, the final consonant is not doubled in derivatives formed by the addition of a termination beginning with a vowel: as, *daub, daubed, daub'er; need, need'y; brief, brief'er, brief'est; trav'ail, trav'ailed, trav'ailing; rev'el, rev'eled, rev'eling; trav'el, trav'eling, trav'eler; prof'it, prof'ited; act, act'ed, ac'tor; perform', perform'er; stand, stand'ing.* See Note, below.

The final consonant is doubled in the derivatives of a few words ending in *g* in order to diminish the liability to its being pronounced like *j,* before *e* or *i:* as, *hum'bug', hum'bugged', hum'bug'ging; pert'awig, pert'awigged.* The derivatives of *kid'nap',* which properly has a secondary accent on the final syllable, are spelled with or without the *p* doubled; as, *kid'naped'* or *kid'napped', kid'nap'ing* or *kid'nap'ping, kid'nap'er* or *kid'nap'per.* The word *wool'en* is more generally thus written, in the United States, with one *l;* but in England it is written *wool'len.*

Note. There is a large class of words ending in a single consonant, and accented on some other syllable than the last, the final consonants of which are, by very many writers and lexicographers, doubled in their derivatives, unnecessarily and contrarily to analogy. These words are chiefly those ending in *l,* with also a few of other terminations. The following list, the words in which are chiefly verbs, includes the most important of those in regard to which usage varies: namely, *apparel, barrel, bevel, bias, bowel* and its compounds, *cancel, carburet* and all similar words ending in *-uret, cavil, carol, channel, chisel, counsel, cudgel, dial, dishevel, dowel, drivel, duel, empanel, enamel, equal, funnel, gambol, gravel, grovel, handsel, hatchel, imperil, jewel, kennel, kidnap, label, laurel, level, libel, marshal, marvel, metal* (see § 7), *medal, model, panel, parallel, parcel, pencil, peril, pistol, pommel, quarrel, ravel, revel, rival, rowel, shovel, shrivel, snivel, tassel, tinsel, trammel, travel, tunnel, unravel, vial, victual, worship.* Worcester doubles the final letters of all these words, except *parallel,* in forming derivatives by the addition of terminations beginning with vowels, though he remarks, with respect to those ending in *l,* that "it better accords with the analogy of the language" to spell their derivatives with but one *l.* Smart retains the double consonant in this class of words solely on the ground that usage favors it, but remarks that "the double *p* in *worshipped, worshipper,* etc., the second *l* in *travelling, traveller,* etc., are quite unnecessary on any other score than to satisfy the prejudices of the eye." Stormonth doubles the final consonant in this class, except in the derivatives of *channel, dial, parallel, pistol,* and in some of those from *equal, peril, quarrel, victual, worship.* The Imperial (published by Blackie & Son in England) agrees with Stormonth in respect to derivatives of *dial, equal, parallel, peril, pistol, victual,* and most derivatives of *worship;* doubles the *l* in derivatives of *channel;* gives *caroling* or *carolling* as a noun, of *worship;* doubles the *l* in derivatives of *channel;* gives *caroling* or *carolling* as a noun, *duellist* and *duelist, enamelar* and *enamellar,* and so *-er* and *-ist;* has *quarrelous* and *quarrelous* — Stormonth giving only the latter, but both agreeing in *quarrelled, quarrelling, quarreller,* — while the *Imperial* increases the breach with *trammeler* and *trammeller, worshipper* and *worshiper, gamboled* or *gambolled, gamboling* or *gambolling,* etc. The Encyclopædic Dictionary gives both ways for derivatives of *bias, channel* (except *channelize*), *drivel, ravel,* etc.; but marks *beveled* and *beveling* as rare, and *worshiper* as obsolete; generally omits the participles, except in citations; and appears to favor the use of the double *l,* etc., in most of these derivatives. The Oxford English Dictionary prefers the forms with the doubled letters, except for a few words like *bias, carol, pistol.* Perry wrote the derivatives of these words with but one *l,* according to the rule, and the same practice was advocated by Walker. Conformity to the regular rule has been advocated also by other eminent scholars; but, for the accommodation of the whole English-speaking public, both of the prevalent spellings are usually given in this Dictionary, that with the single consonant having the first place.

§ 9. **Double consonant retained.** Derivatives formed from words ending in a double consonant, by adding one or more syllables, commonly retain both consonants: as, *ebb, ebbing; odd, oddly; stiff, stiffness; fell, fellable; skill, skillful, skillfulness; will, willful, willfulness; dull, dullness; full, fullness.* So also the double *l* is retained in the words *installment, inthrallment, thralldom,* and *enrollment* (from *install, inthrall, thrall,* and *enroll*), in order to prevent a false pronunciation if spelled with one *l.* Many writers and lexicographers, especially in England, omit one *l* in these words, as also in the derivatives of *skill, will, dull,* and *full,* formed by adding the syllables *-ly* and *-ness.* See §§ 16, 17.

The derivatives of *pontiff* are exceptions to the rule, being written with only one *f;* as, *pontific, pontifical, pontificial,* and the like. One *l* is also dropped in a few words formed by adding the termination *-ly* to words ending in *ll,* in order to prevent the concurrence of three *l*'s: as, *ill, illy; dull, dully; full, fully.* Words similarly formed by adding the termination *-less,* however, are written either with the three *l*'s, a hyphen being inserted before the termination, or with two *l*'s, and without the hyphen; as, *skill-less,* or *skilless, smell-less* or *smelless.*

§ 10. **Silent e retained.** In derivatives formed from words ending with silent *e,* the *e* is generally retained when the termination begins with a consonant: as, *pale, paleness; hate, hateful; incite, incitement; chaste, chastely, chasteness; move, movement.* When, however, the *e* is immediately preceded by another vowel (except *e*), it is often dropped from the derivative: as, *due, duly; argue, argument, true, truly; awe, awful;* and the derivatives and compounds of these words.

The words *wholly, nursling, wisdom, abridgment, acknowledgment, lodgment, judgment,* and the compounds of some of these, are exceptions. The last four, however, are written, by many authors, *abridgement, acknowledgement, lodgement, judgement.*

§ 11. **Silent e omitted.** In derivatives formed from words ending with silent *e,* when the termination begins with a vowel, the *e* is generally omitted, except in the cases mentioned in the next paragraph: as, *bride, bridal; guide, guidance; plume, plumage; use, usable, usage; grieve, grievance; come, coming; shape, shaping; move, movable; sale, salable; fleece, fleecy; force, forcible, true, truism.*

The *e* is retained in the words *hoeing, shoeing,* and *toeing* (from *hoe, shoe,* and *toe*), in order to guard against mispronunciation, and is generally, for a like reason, excluded from *shoer* (cf. *hoed, shod, toed*). It is retained, also, in the words *dyeing, singeing, springeing, swingeing, tingeing* (from *dye, singe, springe, swinge, tinge*), to distinguish them from *dying, singing, springing, swinging, tinging* (from *die, sing, spring, swing, ting*). The word *mileage,* as commonly written, does not omit the *e,* though it is sometimes spelled *milage.* The words *lineage, lineal,* and *pineal,* though apparently exceptions, are not really such, since they are derived not directly from *line* and *pine,* but from the Latin *linea* (through the French), *linealis,* and *pinea.* The *e,* standing, in a derivative, before a termination beginning with *a* or *o,* and immediately after *c* or *g,* is retained in order to prevent the pronunciation of these consonants with the hard sound: as, *peace, peaceable; notice, noticeable; manage, manageable; change, changeable, advantage, advantageous; outrage, outrageous. Mortgagor,* pronounced *mor'ga-jor',* from *mortgage,* and *pledgor,* pronounced *plej-or',* from *pledge,* are the forms preferred in usage, though under this rule they should be *mortgageor* and *pledgeor.* In derivatives in *-able,* as *usable, useable, salable, saleable,* etc., usage is divided and often inconsistent with the same authors.

§ 12. **Ending *-ing* added to *ie*.** In derivatives formed from words ending in *ie,* by adding the termination *-ing,* the *e* is usually dropped, and the *i* changed to *y,* in order to prevent two *i*'s from coming together: as, *die, dying; hie, hying* (but some writers write *hieing*); *lie, lying; tie, tying; vie, vying.*

§ 13. ***y* preceded by a consonant.** In derivatives of words ending in *y,* preceded by a consonant, and formed by appending any termination except one beginning with *i,* the *y* is usually changed into *i:* as, *icy, icier, icily; mercy, merciless; tidy, tidiness; modify, modifies; foggy, fogginess; earthy, earthiness; pity, pitiful.*

The derivatives of adjectives of one syllable ending in *y,* preceded by a consonant, are exceptions, and usually retain the *y:* as, *shy, shyness; sly, slyest; dry, dryly; spry, spryer, spryest; wry, wryness.* But the adjectives *drier* and *driest,* from *dry,* are commonly written with *i* instead of *y;* and the forms *dryly, shily, slily,* are not uncommon. Derivatives formed by adding the termination *-ship,* as *secretaryship, suretyship, ladyship,* and the like, also retain the *y,* though some authors write them with *i,* according to the rule. Derivatives in *-like,* as *citylike, countrylike,* and those formed from *baby* and *lady,* keep the *y.* The *y* is also retained in the possessive case of nouns, when formed by adding *s* with the apostrophe; as, *country's, everybody's.*

§ 14 ***y* preceded by a vowel.** Derivatives formed by affixing a termination to words ending in *y* preceded by a vowel, generally retain the *y* unchanged: as, *gay, gayety, gayly; play, player, plays; sway, swayed; obey, obeying; joy, joyful; enjoy, enjoyed, buy, buying; gluey, glueyness.*

The words *daily, laid, paid, said, saith, slain,* and *staid* (from *day, lay, pay, say, slay,* and *stay*), with their compounds, are exceptions. *Staid,* however, is sometimes written *stayed. Gaiety* and *gaily* are preferred by many writers. *Says* is regular in form, but not in pronunciation. *Dewiness* is a recognized exception. Derivatives from words ending in *uy,* as *colloquies,* from *colloquy,* are not exceptions to the rule, as *u,* in such cases, is not strictly a vowel, but stands for the consonant *w.*

§ 15. **Adding a vowel to a vowel ending.** Derivatives formed by appending a syllable beginning with a vowel to words ending with a vowel sound, generally retain the letter or letters representing such sound: as, *huzza, huzzaed; agree, agreeable, agreeing; weigh, weighing; dough, doughy; echo, echoed; woo, wooer; bow, bowed; beau, beauish.* We sometimes see *cooes, wooes* (from the verbs *coo, woo*); but it is better to write *coos, woos,* with *taboos, shampoos,* and the like. *Cooed* and *wooed* are proper, like other participles in *-ed.*

Derivatives of words of this class ending in silent *e,* as also those formed from words ending in double *e* by adding a termination beginning with *e,* drop the final *e:* as, *hoe, hoed; sue, sued; owe, owed: free, freer, freest; see, seer; oversee, overseer; agree, agreed, agreer.* The cases mentioned in sections 11, 12, and 13 are also exceptions.

§ 16. **Derivatives formed by prefixing** one or more syllables to words ending in a double consonant commonly retain both consonants: as, *tipstaff, rebuff, recall, befall, inthrall, disinthrall, foretell, undersell, fulfill, enroll, emboss* (from *staff, buff, call, fall, thrall, tell, sell, fill, roll, boss*).

The word *until* is an exception, being always written with one *l.* Those words of this class which end in *ll* are written by some authors, especially in England, with one *l;* as, *recal, befal, inthral, foretel, fulfil, enrol.* The words *distill* and *instill* should be written with the *l* doubled, though they are often written *distil* and *instil,* with only one *l.*

§ 17. **Compound words** formed by joining two or more words commonly retain all letters of the simple words; as, *stiff-necked, well-bred, dull-eyed, save-all, wide-mouthed.*

There are numerous exceptions to this rule, many of them compounds which by long use have acquired the force of single words. They are: some compounds of *all* and *well;* as, *almighty, almost, alone, already, also, although, altogether, always, withal, therewithal, welcome, wherewithal, welfare;* — compounds of *mass;* as, *Candlemas, Christmas, Lammas, Michaelmas,* etc.; — words of which the second part is the adjective *full;* as *artful, hateful, rueful, woeful* or *woful;* also, the words *chilblain,* often *dumfound, expire* and its derivatives (cf. *inspire*), *fulfill* (see § 16), *namesake, neckerchief, numskull, pastime, standish, where'er* and *wherever.*

PLURALS.

§ 18. **The plural of English nouns regularly ends in *s*, or, in certain classes of words, in *es*.**

When the noun in the singular ends with such a sound that the sound of *s* can unite with it, and be pronounced without forming a separate syllable, *s* only is added in forming the plural: as, *bay, bays; shah, shahs; sea, seas; tree, trees; pie, pies;* *Hindu, Hindus; woe, woes; canto, cantos; virtue, virtues; purlieu, purlieus; claw, claws; cab, cabs; panic, panics; bead, beads; chief, chiefs; bag, bags; path, paths; ache, aches; plaque, plaques; lock, locks; bell, bells; gem, gems; fan, fans; cup, cups; ear, ears; act, acts.* The plurals of some nouns ending in ***o* preceded by a consonant** end in *es;* as, *echo, echoes; cargo, cargoes; embargo, embargoes; motto, mottoes; potato, potatoes.* Other nouns of this class generally form their plurals regularly, though usage differs with regard to some of them. Those in which final *o* is **preceded by a vowel** form their plurals regularly; as, *cameo, cameos; punctilio, punctilios.* The plural of *alkali* is written *alkalies* or *alkalis;* that of *rabbi,* either *rabbis* or *rabbies.* With regard to other **nouns ending in *i*** usage differs, though they are more properly written with the termination ***is.***

When the noun in the singular ends with such a sound (as that of *ch* in *much*, *sh*, *j*, *s*, *x*, or *z*) that the sound of *s* cannot unite with it in pronunciation, but must form a separate syllable, *e* is inserted before *s* in forming the plural, unless the word ends with silent *e*, in which case the latter serves to form a separate syllable with *s:* as, *church, churches; rush, rushes; age, ages; edge, edges; lace, laces; gas, gases; class, classes; alias, aliases; marquis, marquises; case, cases; loss, losses; box, boxes; maze, mazes.* For *classis, crisis*, and like words, see § 25.

Plural of a letter, figure, sign, etc. To express the plural of a letter, figure, or any character or sign, or of a word mentioned without regard to its meaning, the letter *s*, generally preceded by the apostrophe, is appended, as in the phrases, "The two *l's* in *all;*" "The two *0's* in *400;*" "Two **'s* in Orion:" "The *why's* and *wherefore's* of the question." Some writers, however, omit the apostrophe in such cases, joining the *s* immediately to the letter, character, or word, as in the phrases "The two *ls* in *all;*" "Two **s* in Orion;" "The *pros* and *cons.*" The names of the letters with their proper plural endings may be used instead of the letters themselves; as, the two *ees, ejs, ells, esses*, and the like. The plurals of letters are also rarely expressed by simply doubling them, without adding any plural sign; as, "The two *ee* in *bee;*" "The two *ll* in *all;*" but this practice is not to be commended, as *ee, ll*, etc., are properly read *double e, double l*, and the like.

§ 19. Nouns ending in *y* **preceded by a consonant** form their plural by adding *es* and changing *y* into *i:* as, *mercy, mercies; lady, ladies; sky, skies; army, armies; pity, pities.* This rule includes words ending in *quy*, in which *u*, being pronounced like *w*, is strictly a consonant; as, *colloquy, colloquies.* The plural of proper nouns ending in *y* preceded by a consonant is formed by changing *y* into *ies*, according to the rule; as, "The three *Maries.*" Many good writers, however, form the plural of such words by simply adding *s;* as, "The three *Marys.*"

When the singular of a noun ends in *y* **preceded by a vowel** (except *u* having the power of *w*), the plural is regularly formed by adding *s* only: as, *day, days; key, keys; money, moneys; monkey, monkeys; attorney, attorneys; alloy, alloys; guy, guys.* Some plurals of the latter class are often, but less properly, written with the termination *ies*, as, *monies, attornies*, and the like.

NOTE. Nouns now ending in *y* formerly ended in *ie*, and formed their plurals regularly by adding *s;* as, *memorie, memories; mercie, mercies.* *Y* was finally substituted for *ie* in the singular, but the plural still retains its old form.

§ 20. The plurals of a few **nouns ending in *f* or *fe*** are irregularly formed by changing *f* or *fe* into *ves.* The following words, with their compounds, are the principal examples: namely, *life, lives; knife, knives; wife, wives; leaf, leaves; sheaf, sheaves; loaf, loaves; beef, beeves; thief, thieves; calf, calves; half, halves; elf, elves; shelf, shelves; self, selves; wolf, wolves.* The plural of *staff* is usually *staves*, except when it means a corps of officers, either military or civil, in which sense it is always written *staffs.* The plural of *wharf* is generally written *wharfs* in England; in the United States it is more commonly written *wharves*, as it is also by some recent English writers. The plural of *scarf* is *scarfs*, rarely *scarves.* The plurals of *hoof* and *turf*, formerly written *hooves* and *turves*, are now usually written *hoofs* and *turfs.* The plurals of other nouns ending in *f, fe*, or *ff*, are formed regularly by the addition of *s* only.

§ 21. **Plural formed by change of vowel.** In the following nouns, the singular and the plural differ in their vowels or vowel sounds namely, *man, men, woman, women, goose, geese* (but *gooses* in the sense of tailor's irons); *foot, feet; tooth, teeth; brother, brethren* (see §§ 22, 23); *louse, lice; mouse, mice.* Compounds ending with these words form their plurals in the same manner: as, *workman, workmen; dormouse, dormice.* Words which end in the syllable *-man*, and are not compounds, form their plurals regularly, by adding *s* only: as, *cayman, caymans; desman, desmans; firman, firmans; talisman, talismans; German, Germans; Mussulman, Mussulmans; Ottoman, Ottomans; Turcoman, Turcomans.* The plurals of *talisman* and *Mussulman* are sometimes incorrectly written *talismen* and *Mussulmen.*

§ 22. **A few plurals end in -en**; namely, *brother, brethren* (see §§ 21, 23); *child, children; ox, oxen.* To these may be added the obsolete or archaic forms, *eyen* or *eyne, kine, shoon, hosen, housen, sistren* (from *eye, cow, shoe, hose, house, sister*), all of which, though some have received a slightly different form, end, as pronounced, with the sound of *n.*

§ 23. **Words having two plurals with different meanings.** Some words, as *brother, die, pea, penny, cherub, cloth, genius, index, seraph, staff, stamen*, have two plurals of different forms and with different meanings. See the explanations of these words in the *Vocabulary.* See also § 24. For *acquaintance*, as formerly both singular and plural, see ACQUAINTANCE, *n.*, 2, in the *Vocabulary.*

§ 24. **Plural same as singular.** Some words, mostly names of animals, have the same form in the plural as in the singular; as, *deer, sheep, swine, grouse, trout*, and the like, but these words and some others which ordinarily have no plural, as *wheat, barley*, have plurals formed by adding *s* or *es* when used to denote a number of species. See the Note under PLURAL, *n.*, in the *Vocabulary.* Gentile nouns in *-ese* also have the same form in the plural as in the singular; as, *Chinese, Portuguese, Tyrolese, Japanese. Fish, fowl*, and some other words, may be used for an indefinite number; or the individuals may be designated as *fishes*, etc.

§ 25. **Foreign words.** Many words adopted from foreign languages retain their original plurals: as, *datum, data; criterion, criteria; genus, genera; larva, larvæ; classis, classes* (see *class*, pl. *classes*, in § 18); *crisis, crises; matrix, matrices; focus, foci; monsieur, messieurs.*

Many words of this class, while retaining the original plurals, have also a second formed after the analogy of English words of similar termination: as, *formula, formulæ* or *formulas; beau, beaux* or *beaus; focus, foci* or *focuses; index, indices* or *indexes; stratum, strata* or *stratums; bandit, banditti* or *bandits; cherub, cherubim* or *cherubs; seraph, seraphim* or *seraphs.* The plurals of the last two words are sometimes incorrectly written *cherubims* and *seraphims*, with double plural terminations, without regard to the fact that in Hebrew words *-im* is a plural ending.

§ 26. **In certain loose compounds** consisting of a noun followed by an adjective or other qualifying expression, the plural is commonly formed by making the same change in the noun as when it stands alone: as, *court-martial, courts-martial; cousin-german, cousins-german; son-in-law, sons-in-law; knight-errant, knights-errant.* (but cf. KNIGHT BACHELOR, KNIGHT TEMPLAR, MANSERVANT, etc., which have the plurals *knights bachelors, knights templars, menservants.* When, however, the adjective is so closely joined to the noun that the compound has the force of a simple word, the plural of the compound is commonly formed like that of any other word of the same termination: as, *cupful, cupfuls; handful, handfuls.*

MISCELLANEOUS RULES.

§ 27. There are many words, besides those mentioned in the preceding paragraphs, in respect to which usage, even that of the best authors, is variable. The most important of these words are mentioned in this and the succeeding sections.

The derivatives of the word *villain*, as *villainous, villainy*, etc, though sometimes, esp. formerly, written *villanous, villany*, etc., now commonly retain the *i*, like those of other words similarly ending in *ain:* as, *mountainous*, from *mountain; captaincy*, from *captain;* and the like.

The words *connection, deflection, inflection*, and *reflection*, follow the spelling of the words *connect, deflect, inflect*, and *reflect*, though often written, especially in England, *connexion, deflexion, inflexion*, and *reflexion.* See Note under CONNECTION, in the *Vocabulary.*

The word *woe*, though often written without the final *e*, should retain it, like most other nouns of one syllable and of similar form; as, *doe, floe, foe, hoe, sloe, toe*, and the like. Monosyllables other than nouns and also words of more than one syllable having a similar termination, omit the *e;* as, *do, go, no, so, canto, motto, potato.*

The words *defense, expense, offense*, and *pretense* are preferably written thus, though they are often, esp. in England, spelled with *c* instead of *s*, for the *s* is used in all their derivatives.

The words *drought* and *height* have also often been written *drouth* and *highth* or *hight;* but these forms are now rare in literary usage.

The verb *practice* is thus written like the noun, in preference to the form *practise*, though the latter spelling is used by many writers, especially in England. The difference in spelling between the noun and the verb is properly observed, in words of this kind, only in such as are accented on the last syllable, as *device, devise.* See Note under PRACTISE, in the *Vocabulary.*

Derivatives of the Greek ἕδρα (seat, base, side; pronounced *hĕd'rā*), as *polyhedron, tetrahedron, octahedral*, and the like, are properly thus written with *h* before the *e* of the termination, but are sometimes written *polyedron, tetraedron, octaedral*, etc.

§ 28. **-able** or **-ible.** There is a class of adjectives ending either in *-able* or in *-ible*, of which a large majority have the termination *-able;* as, *blamable, laudable, legible, mutable, navigable, vendible* Many of them are from Latin words ending in *-abilis* or *-ibilis;* some are from the French; and not a few are formed by adding the termination to English words. The forms in *-ible* occur mostly in words going back directly to Latin verbs ending in *-ere* or *-ire.* For English compounds the form in *-able* has become usual. See Note under -ABLE, in the *Vocabulary*

§ 29. **en- or in-.** There is a class of words beginning with *en-* or *in-*, as *enclose* or *inclose, enquire* or *inquire, ensure* or *insure*, and the like, many of which take either form of the prefix indifferently. They are chiefly derived from the Latin, either directly or through the French, the prefix *in-* belonging to the former language, and *en-* to the latter. In some of these words, *en-* is preferred; in others, *in-;* many of them are used indifferently. See the different words of this class in the *Vocabulary.*

§ 30. **-ant** or **-ent.** There was formerly considerable diversity of usage in respect to the terminations *-ant* and *-ent*, both of which were, in certain cases, used almost indifferently; as in the words *confidant* or *confident, dependant* or *dependent*, and the like. Present usage, however, is definitely settled in favor of one or the other form, in nearly or quite every word of this class, though not always upon uniform principles. Thus, the abstract noun *confidence* and the adjective *confident* are universal, while the common noun is sometimes the English *confident*, but often the French *confidant.* The abstract noun *dependence* and the adjective *dependent* have almost entirely superseded *dependance* and *dependant*, while the noun *dependant*, which was at least as commonly seen in Walker's time as the noun *dependent*, has now yielded its place in great measure to *dependent* (see Note under DEPENDANT, in the *Vocabulary*). On the other hand, we now have both the adjectives and the common nouns *attendant* and *repentant;* and the abstract nouns *attendance* and *repentance.* See -ANCE, in the *Vocabulary.*

§ 31. **-er** or **-re.** There is a class of words ending in *-er*, some of which are written by many authors with the termination *-re;* as, *center, meter, theater*, etc., which are often written *centre, metre, theatre*, etc. *Acre, chancre, lucre, nacre, massacre*, and *ogre* retain the termination *-re*, in order to preserve the hard sound of the *c* and *g.* Still, we have the adjective *eager*, the noun *eagre* or *eager*, and the preposition *mauger* or *maugre.*

§ 32. **-id** or **-ide.** There are two classes of chemical words ending respectively in *-id* or *-ide* and *-in* or *-ine*, in regard to which usage has varied. Most of them were formerly written without the final *e;* but in present usage *-ide* is preferred to *-id*, and there is an attempt to establish a technical distinction between *-in* and *-ine* See -INE in the *Vocabulary* (cf. § 104, *Guide to Pronunciation*). The word *tannin* is always written without the final *e. Oxide* is now generally written with the termination *-ide.*

§ 33. **-ize** or **-ise.** There is a class of words ending, as pronounced, with the sound of long *i*, followed by *z*, some of which are differently written, by different authors, with either *-ize* or *-ise* to represent this sound: as, *criticize* or *criticise; civilize* or *civilise; naturalize* or *naturalise; patronize* or *patronise.* These words are mostly verbs, and are chiefly derived from Greek words ending in *-ίζειν*, often through the French and Latin (see -IZE, in the *Vocabulary*). There are a few from other sources, but formed in analogy with these. Those derived from Greek words properly have the termination *-ize;* as, *anathematize, baptize, characterize, dramatize, tantalize.* The spelling *exorcise* is, however, in common use. Those formed in an analogous manner from English words are likewise written with *-ize;* as, *albumenize, bastardize, memorize, sensitize.* But those derived from the French verb *prendre* (participle *pris* or *prise*) end in *-ise;* as, *apprise, comprise, emprise, enterprise, surprise.* The following are the principal English verbs ending in *-ise;* namely, *advertise, advise, affranchise, apprise, arise, chastise, circumcise, comprise, compromise, demise, despise, devise, disenfranchise, disfranchise, disguise, emprise, enfranchise, exercise, exorcise, franchise, merchandise, premise, revise, supervise, surmise, surprise.* It may be remarked that most of those in respect to which usage varies are now by most authorities, including the Oxford English Dictionary, written with the termination *-ize*, and that there is a tendency to extend the use of the *-ize* to all analogous terms.

§ 34. **mold** or **mould.** The words *mold* and *molt*, and their compounds and derivatives, are written in this Dictionary with *o* instead of *ou*, in analogy with the words *bold, bolt, colt, gold*, etc., from which the *u* has been dropped. Many authors, however, write these words *mould* and *moult*, and their derivatives in like manner; and this spelling is also given in this Dictionary as alternative.

§ 35. **-or** or **-our.** There is a numerous class of words almost universally written in the United States with the termination *-or*, many of which are also written, esp. in England, with the termination *-our;* as, *candor, favor, honor, labor, rumor, vigor.* English usage, however, is not uniform with respect to these words, many of them being written with *-or* in English books. See the Observations on Orthography, prefixed to these rules.

§ 36. **-ped** or **-pede.** There is a small class of words ending with the syllable *-ped* (from Lat. *pes, pedis*, foot), the termination of some of which was formerly, and is still frequently, written *-pede;* as, *biped, centiped, milliped, palmiped, quadruped, soliped*, and the like. The words *biped* and *quadruped* are universally written without the final *e;* and most of the others, according to the best usage, should be written in the same manner. The form *centipede*, however, is the more common; and *velocipede* is practically the only form in use.

ABBREVIATIONS USED IN THIS WORK.

NOTE. Abbreviations like *accus.*, *Bacteriol.*, printed in this list *acc(us).*, *Bact(eriol)*, have sometimes been further shortened by omitting the letters inclosed by the parentheses. Similarly forms like *adj(s).* indicate that both a singular, *adj.*, and a plural, *adjs.*, have been used.
For List of Authors Quoted see page 000.

EXPLANATORY NOTES.

† means Obsolete Variant of; thus, **pencion** † PENSION is to be read: *pencion* is an obsolete spelling of PENSION.

‖ prefixed to a vocabulary word indicates that this word is from a foreign language and that it would usually be printed in italic letters if used in English; as, ‖ **a'ban'don'**, ‖ **ab an'te**, ‖ **a'bat'-jour'**.

= The sign of equality, preceding a word in small capitals, indicates either that the vocabulary word has all the senses of the word in small capitals; as, **signatary**, *a. & n.* = SIGNATORY; or that one specific sense of the vocabulary word is the same as a meaning or meanings of the word in small capitals; as, **platen**, 2 = PATEN **a.** **pendent**, 2 **c** = PLUMB LINE. The form in small capitals is to be considered the preferred form.

X 2, X 12, $\frac{1}{2}$, $\frac{1}{12}$, etc., inserted at illustrations indicate that the picture is twice, twelve times, one half, one twelfth, etc., as long (and as high) as the original.

Figures, as 59, 277, etc., placed with the pronunciation within the parentheses invite attention to information at the sections specified in the Guide to Pronunciation, p. xxxvii.

Preferred Forms of Spelling or Pronunciation. When two or more forms of spelling or of pronunciation are recorded the general rule has been to place first the one that has been selected as preferable. Each form entered, however, has the support of good usage, and in many cases this usage is practically equally divided. Where adjectives ending in *-ic* and *-ical* are entered together in alphabetic order no indication of preference as to form is intended. See the Note under the suffix *-ic*, page 1063. When instead of, or in addition to, a definition there is a cross reference (introduced by = or by *Var. of*) to another spelling or another word the form referred to is the one usually preferred.

Plurals are given whenever they are irregular in form or when an irregular form might be expected. Rules for the regular formation of plurals are given in the Rules for Spelling, §§ 18–26, at page lxxvii.

Use of the Hyphen. Words that are to be written or printed with a hyphen between their components have this hyphen indicated by a mark heavier and longer than the short light hyphen used to show division into syllables; as, **able-bodied, Austro-Hungarian, gun-shy.** In this dictionary the hyphen is used less frequently than it is by some authorities. In general, the two-word form has been preferred to the hyphened form when the words have the same meaning in unconnected succession as when joined; and the solid-word form has been preferred to the hyphened form when this solid form is not confusing to the eye. But these rules, however reasonable, cannot be rigidly applied, because good usage sometimes dictates a form not conforming to them. The practice of lexicographers, authors, and printers is so various in this matter that in a multitude of instances it is hypercritical or whimsical to pronounce dogmatically that either the hyphened or unhyphened form is the only correct one.

Pronunciation. Part or the whole of a pronunciation is often omitted when it is the same as that of a word immediately preceding, or (in the case of derivative words in the lower section of the page) when it is the same as the main word in the vocabulary.

The accentuation only, without respelling for pronunciation, is given for many compound words, as *yacht'-built'*, *blue'gown'*, and for many derivatives ending in common suffixes like *-ess*, *-est*, *-ing*, *-ist*, *-less*, *-like*, *-ness*, *-ship*, if the pronunciation is perfectly regular and can therefore be easily learned from the separate parts.

The pronunciation of two-word phrases, as "*word method*," is to be got from the simple words.

The pronunciation of many obsolete variants and other obsolete words is open to dispute, and has therefore been omitted.

The pronunciation of variants other than obsolete forms, if omitted, is usually the same as that of the preferred spelling.

NEW WORDS

Å, A, *or* **å, a.** *Physics.* A symbol for *Ångström* (unit of wave length), that is, 0.000,000,1mm. Cf. Å. U., below.

ab-. [Short for *absolute.*] *Physics.* A prefix used to denote a C.G.S. electromagnetic unit, as in the following table. *Abstat-* is sometimes used in the same sense. Cf. STAT-.

UNIT	NATURE	EQUIVALENT
abampere	current	10 amperes
abcoulomb	quantity	10 coulombs
abfarad	capacity	10^9 farads
abhenry	inductance	10^{-9} henrys
abohm	resistance	10^{-9} ohms
abvolt	potential	10^{-8} volts

A battery. *Radio.* An electric battery used to heat the filament serving as cathode in an electron tube; — called also *filament battery.* See B BATTERY, C BATTERY, below.

A B C. The initial letters of *Argentina, Brazil,* and *Chile,* South American states which, in 1914, acted as mediators between the United States and Mexico, and have since coöperated for the preservation of peace; — used attributively; as, the *A B C* powers, alliance, etc.

ab're-act' (ăb'rē-ăkt'), *v. t. & i.* [*ab-* + *react.*] *Psychoanalysis.* To discharge (affect) by abreaction. See CATHARSIS, below.

ab're-ac'tion (ăb'rē-ăk'shŭn), *n.* [*ab-* + *reaction,* after G. *abreagirung.*] *Psychoanalysis.* The discharge of affect either through direct adequate reaction or through substitute action, as in speech. See CATHARSIS, below.

‖ **a'bri'** (a'brē'), *n.; pl.* ABRIS. [F., a shelter.] A shelter, as a dugout, a shed, or a cavity in a hillside.

absolute scale. The scale of absolute temperature, in which the zero is −273.1° C; — called also *Kelvin scale.* See ABSOLUTE TEMPERATURE, in the *Dictionary.*

ab-sorp'tion*, *n. Radio.* Diminution of power, associated with traveling radio waves, due to loss in the ground, particles of dust in the atmosphere, or other objects. See ATTENUATION, below.

absorption circuit. *Radio.* A circuit or network used in a transmitting set to absorb the power of a certain frequency or frequencies so as to prevent its radiation.

abstat-. *Physics.* = AB-, above.

A. C., *or* **a. c.** *Abbr. Elec.* Alternating current

ac-cel'er-ant (ăk-sĕl'ĕr-ănt), *n. Chem.* A catalyzer.

ac-cept'ance*, *n. Com.* An accepted bill of exchange. See BANKERS' ACCEPTANCE, TRADE ACCEPTANCE, below.

ac-cep'tor*, *n. Radio.* A combination of capacity and inductance which permits ready reception of a certain frequency and no other frequencies. Cf. FILTER, REJECTOR, WAVE TRAP, below.

accessory chromosome. = HETEROCHROMOSOME, below.

ace*, *n.* In the World War, an aviator in the French army who brought down at least five enemy machines within the French lines and, as a result, was named in official communications; hence, any aviator of similar achievements; as, an American *ace,* a British *ace,* etc. By extension, one who excels in any line; as, a baseball *ace* — **ace'ship,** *n.*

ace of aces. An ace of superior attainments.

ac'e-tyl-cel'lu-lose (ăs'ē-tĭl-sĕl'ū-lōs), *n.* = CELLULOSE ACETATE, below.

acetylene tetrachloride. See TETRACHLORETHANE, below.

ac'i-do'sis (ăs'ĭ-dō'sĭs), *n.* [NL.; E. *acid* + *-osis.*] *Med.* A condition of acidity; specif., a form of auto-intoxication due to the accumulation in the blood of certain fatty acids, especially beta oxybutyric acid.

acid test. A severe or final test, as of value, authenticity, genuineness, or the like; — perh. referring to the testing of gold by means of acid (see AQUA REGIA, in the *Dict.*).

ac'ri-fla'vine (ăk'rĭ-flā'vĭn; -vēn), *n.* Also **-vin.** [*acridine* + L. *flavus* yellow.] *Pharm.* A brownish-red, crystalline compound (diamino-methyl-acridinium chloride, $C_{14}H_{14}N_3Cl.H_2O$), used as an antiseptic, esp. for wounds. Cf. PROFLAVINE, below.

ac'ro-ba-cy (ăk'rō-bā-sĭ), *n.* Acrobatics, esp. aërial.

ac'ro-bat'ics (-băt'ĭks), *n.* The art, profession, or performances of an acrobat; acrobatism; as, aerial *acrobatics,* the "stunting" of aviators, looping, spinning, rolling, etc.

activated sludge. A composition of suspended mineral solids and aërobic bacteria which is contained in sewage that has been subjected to prolonged aëration, as in some systems of sewage disposal, and which by virtue of its microorganisms greatly hastens the clarification and purification of sewage brought into contact with it.

ac'ti-va'tion*, *n.* A process of treating sewage by prolonged aëration and exposure to the effects of activated sludge.

ac'ti-va'tor (ăk'tĭ-vā'tĕr), *n.* One that activates, as, *Chem.,* a ferment that renders another substance active.

active component. *Elec.* The component of an alternating current that is in phase with the electromotive force; — sometimes called *energy,* or *inphase, component.* Cf. REACTIVE COMPONENT, below.

ac'tiv-ist (ăk'tĭ-vĭst), *n.* One who favors a more active policy; specif., in the World War, one who favored a more energetic action in prosecuting, or in taking sides in, the war. — **ac'tiv-ism** (-vĭz'm), *n.*

A. C. W. *Abbr. Elec.* Alternating continuous waves; continuous waves modulated by alternating current.

ac'yl-ate (ăs'ĭ-lāt), *v. t.* [*acyl* + *-ate.*] *Chem.* To introduce an acid radical into. — **ac'yl-a'tion** (-lā'shŭn), *n.*

Ad'am-son Act (ăd'ăm-sŭn). [After Wm. C. *Adamson* (1854–), representative from Georgia.] An act of Congress, passed Sept. 3, 1916 (64th Congress), in order to establish, among other things, an eight-hour day for employees of carriers engaged in interstate commerce. Its eight-hour provision went into effect on Jan. 1. 1917.

ad'ap-ta'tion*, *n. Psychoanalysis.* Adjustment to environment through integration and socialization of the libidinal impulses.

ad'dict (ăd'ĭkt), *n.* One who is addicted to a habit, esp. the habit of taking some drug, as opium, cocaine, etc.

ad-dres'so-graph (ă-drĕs'ō-grăf), *n.* A kind of machine, bearing the trade-mark *Addressograph,* for addressing letters, etc., printing each address separately from characters embossed on a plate.

ad-vec'tion (ăd-vĕk'shŭn), *n.* [L. *advectio,* fr. *advehere* to carry (anything) to (a place); *ad* + *vehere* to carry] *Meteor.* The horizontal shifting of a mass of air, considered in its causal relation to changes of temperature or other changes therein; — disting. from *convection* (which see, in the *Dictionary*) — **ad-vec'tive** (-tĭv), *a.*

A. E. F. *Abbr.* American Expeditionary Force (*or* Forces)

a-ë'ri-al* (ā-ē'rĭ-ăl), *a.* Of or pert. to aircraft; designed for, or operating from or against, aircraft; as, an *aerial* gun. — *n. Radio.* **a** The elevated conductor portion of a condenser antenna. **b** = ANTENNA, 3, in the *Dict.*

aërial barrage. A barrier of barrage balloons raised against an air attack. Cf. BARRAGE and BARRAGE BALLOON, below.

aërial cascade. *Meteor.* A swift wind passing down the side of a hill or mountain above surface eddies, following, roughly, the major contours of the land.

aërial circuit. *Radio.* = ANTENNA CIRCUIT, below.

aërial drainage, *or* **air drainage.** *Meteor.* The downward flow of surface air, as down a steep slope, caused by its relatively high density produced by contact cooling, a phenomenon prevalent on still, clear nights.

aërial sickness. A kind of nausea sometimes affecting persons in an aircraft, caused by rapid change of altitude, high speed, or rolling and pitching.

aërial torpedo. *Mil.* **a** Any inclosed charge of explosive designed to be propelled through the air either by its own motive power or by gravity (as when dropped from an aircraft). **b** The explosive projectile thrown by a trench mortar, constructed so as to fall point down.

a'ër-o (ā'ĕr-ō), *n.; pl.* AËROS (-ōz). An airplane, airship, or the like. *Colloq.* — *a.* Of or pert. to, concerned with, or devoted to, airplanes or aeronautics; as, an *aero* club.

a'ër-o-boat' (-ō-bōt'), *n.* [*aero-* + *boat*] A seaplane

a'ër-o-bus' (-bŭs'), *n.* [*aëro-* + *bus.*] A large airplane having accommodations for a number of passengers

a'ër-o-craft' (-kraft'), *n. sing. & pl.* = AIRCRAFT, below.

a'ër-o-do-net'ics (ā'ĕr-ō-dō-nĕt'ĭks), *n.* [*aero-* + Gr δονητός shaken, fr. δονεῖν to shake] *Aëronautics.* The science of gliding and soaring flight.

a'ër-o-drome'* (ā'ĕr-ō-drōm'), *n.* An airdrome.

aërodynamic pitch. See PITCH, below.

a'ër-o-foil' (ā'ĕr-ō-foil'), *n.* [*aëro-* + *foil* a leaf.] = AIRFOIL, below.

a'ër-o-graph'*, *n.* A radiotelegraph, or wireless telegraph. *Rare.* — *v. t. & i.* To send (a message) by aerograph.

a'ër-o-gun' (-gŭn'), *n.* [*aëro-* + *gun.*] A gun capable of being trained at very high angles for use against aircraft.

a'ër-o-ma-rine' (-mă-rēn'), *a.* [*aëro-* + *marine*] Of or pertaining to aërial navigation above sea or ocean.

a'ër-o-me-chan'ic (-mē-kăn'ĭk), *n.* A mechanic or mechanician expert in the art and practice of aëronautics.

a'ër-o-me-chan'ic (-mē-kăn'ĭk), *or* **a'ër-o-me-chan'i-cal** (-ĭ-kăl), *a.* Of or pert. to aëromechanics.

a'ër-o-me-chan'ics* (-ĭks), *n.* The science of the equilibrium and motion of air or an aëriform fluid, including aerodynamics and aerostatics.

a'ër-o-mo'tor (ā'ĕr-ō-mō'tĕr), *n.* [*aero-* + *motor.*] A light and powerful motor for propelling aircraft.

a'ër-o-phone'*, *n.* An apparatus for wireless telephoning.

a'ër-o-pho-tog'ra-phy (ā'ĕr-ō-fō-tŏg'rā-fĭ), *n.* [*aëro-* + *photography.*] The art of photographing from aircraft.

a'ër-o-plane'* (ā'ĕr-ō-plān'), *n.* See AIRPLANE, below.

a'ër-o-plane' (ā'ĕr-ō-plān'), *v. i.* To airplane. — **a'ër-o-plan'ist** (-plān'ĭst), *n.*

a'ër-o-stat'*, *n.* Any aircraft which embodies a container filled with a gas lighter than air and which is sustained by the buoyancy of this gas; an airship; balloon.

a'ër-o-sta'tion*, *n.* The art or science of operating lighter-than-air aircraft, as balloons or airships; — opposed to *aviation,* which is the operating of heavier-than-air craft.

a'ër-o-tech'ni-cal (-tĕk'nĭ-kăl), *a.* [*aëro-* + *technical.*] Of or pert. to the science, art, or technic of aeronautics.

A.F.*, *or* **a.f.*** *Abbr.* Audio frequency.

af'fect* (*in this sense usually* ăf'ĕkt), *n. Psychol.* **a** The emotional complex accompanying an idea or mental process and including more or less perceptible sensory and motor activities. An *affect* may be suppressed, inverted, or dissociated from its idea and displaced to another, as in dreams. **b** Affectivity.

af-fec'tion*, *n. Psychol.* An instinctive desire or impulse

af'fec-tiv'i-ty (ăf'ĕk-tĭv'ĭ-tĭ), *n. Psychol.* That aspect of mental life which is composed of affects, emotions, and feelings of pleasure and displeasure, closely bound with sensory and motor innervations.

A. F. of L. *Abbr.* American Federation of Labor.

‖ **A'fri-kaans'** (ä'frē-käns'), *n.* [Cape Dutch.] The form of Dutch spoken in South Africa; — called also *Taal* (which see, in the *Dict.*) and *Cape Dutch.*

Af'ri-kan'der-ism* (ăf'rĭ-kăn'dĕr-ĭz'm), *n.* [D. *Afrika* + *-ander,* as in Holl*ander* + *-ism.*] A word or expression adopted into English in South Africa from South African Dutch.

‖ **a'gent' pro'vo'ca'teur'** (ä'zhänt' prô'vô'kä'tûr'); *pl.* AGENTS PROVOCATEURS. [F.] One employed, as in the secret service of a state, to associate himself with suspected persons and by simulated sympathy with their aims, etc., lead them on to use seditious language or commit some overt act of offense, for which they may be apprehended.

ag'ri-mo'tor (ăg'rĭ-mō'tĕr), *n.* [L. *agri,* gen. of *ager* field + E. *motor.*] A mechanical tractor used for drawing agricultural implements in the field. *Brit.*

Ag'ro-my'zi-dæ (ăg'rō-mī'zĭ-dē), *n. pl.* [NL.; Gr. ἀγρός field + μύζειν to suck.] *Zoöl.* A family of small or minute acalyptrate two-winged flies. — **ag'ro-my'zid** (-zĭd), *a. & n.*

ai'le-ron* (ā'lē-rŏn), *n. Aëronautics.* A hinged or pivoted movable auxiliary surface of an airplane, usually part of the trailing edge of a wing, the primary function of which is to enable the pilot to make the machine roll on its longitudinal axis.

air*, *n. Radio* The medium of transmission of radio waves. — **on the air,** broadcasting; being transmitted by radio.

air, *a. Aeronautics.* Of or pertaining to the navigation of the air; occurring in the air; done by means of, or using, balloons or airplanes; as, an *air* fight, *air* forces, *air* route.

air base. *Aëronautics.* A base of operations for aircraft and for the housing, repairing, etc, of the craft.

air cataract. *Meteor.* The precipitate fall of dense, or heavily laden, air, such as occurs where abnormally cold surface air flows over a precipice.

air condenser*. *Radio.* A condenser in which air is the dielectric material, one set of plates being held apart from the other by a minimum amount of solid dielectric material.

air'—core' trans-form'er. *Elec.* A transformer in which an iron core is not used; — a somewhat loose expression. Cf. IRON-CORE TRANSFORMER, below.

Air Council. In Great Britain, an administrative body, analogous to the Army Council (which see, below) in which is vested the control of the Royal Air Force (which see, below). The Secretary of State for Air (Air Minister) is president of the Air Council.

air'craft' (ār'krăft'), *n. sing. & pl.* Any form of craft designed for the navigation of the air, as an airplane, balloon, helicopter, kite, kite balloon, orthopter, glider, or the like. Aircraft are mostly either airplanes or aërostats. Cf. AIRPLANE, below, AËROSTAT, above.

aircraft carrier. *Naval.* A ship designed to carry aircraft and so constructed that aircraft can be launched from it and landed on it.

air drainage. *Meteor.* See AËRIAL DRAINAGE, above.

air'drome' (ār'drōm'), *n.* [*air* + *-drome*] A field providing facilities for aircraft to land and take off and for the storage, maintenance, and repair of aircraft.

air fleet. *Aëronautics.* A group or assemblage of aircraft; esp., a large group of military aircraft under a single command; also, the collective military aircraft of a nation.

air'foil' (ār'foil'), *n.* [*air* + *foil.*] *Aeronautics.* Any surface, flat or curved, as a wing, aileron, or rudder, designed to obtain reaction upon its surfaces from the air through which it moves. Cf. DRAG, LIFT, below.

airfoil section. A section of an airfoil made by a plane parallel to the plane of symmetry of the airfoil and to the normal direction of motion.

air force. = AIR SERVICE, below.

air hole*. A local region in the atmosphere, which on account of peculiar meteorologic conditions, affords little or no support for the sustaining surfaces of an airplane.

air lane. A path through the air made easy for aërial navigation by steady winds.

air line*. A system of transportation by aircraft, or the equipment which the system operates; also, the company or business organization owning or operating it; also, the route covered. — **air'lin'er** (ār'līn'ĕr), *n.*

air mail. The system of transporting mail by aircraft; also, the equipment so used; also, the mail so transported.

air'man (ār'măn), *n.* A man who flies in an aircraft, esp. as its pilot or as a member of its crew — **air'man-ship,** *n.*

air'—mind'ed (ār'mīn'dĕd; 87), *a.* Interested in or favorably disposed toward aerial activities. — **air'—mind'ed-ness,** *n.*

Air Ministry. A department of the British ministry (see MINISTRY, *n.*, 5, in the *Dict.*), formed on January 2, 1918, dealing with matters pertaining to aviation, both military and civil. The Air Minister has the status of a Secretary of State (see SECRETARY OF STATE, in the *Dict.*, and ROYAL AIR FORCE, below).

air'plane' (ār'plān'), *n* A form of aircraft, heavier than air, which is driven through the air by a screw propeller, and which obtains support by the dynamic reaction of the air against the wings. *Airplane* is commonly used to designate airplanes with landing gear suited to operation from the land. If the landing gear is suited to operation from the water, the specific term *seaplane* is generally used. Cf. SEAPLANE, below. Airplanes are classified as *monoplanes, biplanes, triplanes, quadruplanes,* or *multiplanes,* according to the number of parts into which their main supporting surface is divided.

☞ The form *airplane* has been officially adopted by the United States Army and Navy, Bureau of Standards, etc.; *aëroplane* is still generally used by British writers.

air'plane', *v. i.* To fly in an airplane.

airplane carrier. See AIRCRAFT CARRIER, above.

air'plan'ist (-plān'ĭst), *n.* One who flies in an airplane.

air pocket. An air hole.

air'port' (ār'pōrt'), *n.* A place to which aircraft may resort, as to land and discharge, or receive, cargoes and passengers, make repairs, or take in fuel.

air raid. A raid made by one or more military aircraft, esp. for destruction by dropping bombs. — **air raider.**

air'scape (ār'skāp), *n.* [Cf. LANDSCAPE.] A picture taken, or a view, from the air while in an aircraft or on a height.

air scoop. *Aeronautics.* A cowl, or hood, projecting from an airship, or aërostat, which catches the air flowing by, the pressure thus produced in the interior of the ballonet serving to maintain its shape.

air scout. See SCOUT, below.

air service. A service of a state, analogous to, or a part of, the military and naval services, charged with the operation of aircraft; — sometimes called the *third service* as being additional to the army and navy.

air'ship'*, *n.* A lighter-than-air aircraft, or dirigible. Airships are distinguished as: *rigid,* when the form is maintained by a rigid structure contained within the envelope; *nonrigid (flexible),* when the form is maintained by the pressure of the contained gas; and *semirigid,* when the

‖ **Foreign Word.** + **combined with.** = **equals.** * **additional definition.**
Full explanations of Abbreviations, Signs, etc., immediately precede the Vocabulary.

form is maintained by means of a rigid or jointed keel and the pressure of the contained gas

air'sick' (ăr'sĭk'), *a.* Affected with aerial sickness (which see, above). — **air'sick'ness,** *n.*

air speed. The speed of an aircraft with relation to the air, as distinguished from speed relative to the earth.

air'—speed' in'di-ca'tor. An anemometer mounted on an aircraft to indicate the air speed of the craft. A *true-air-speed indicator* gives the true air speed, independently of the density of the air; in an *apparent-air-speed indicator* the readings vary with the density of the air.

air'—speed' me'ter. An air-speed indicator.

air stream. *Physics.* A body of air in motion relative to a solid body, whether the air moves past the solid body while the body is at rest, or the solid body moves through the (otherwise) quiet air.

air'way'* (ăr'wā'), *n.* A designated way or route along which aircraft may ply from airport to airport.

air'wom'an (-wo͝om'ăn), *n.* A woman who ascends or flies in an aircraft, esp. as its pilot or a member of its crew.

air'wor'thy (-wûr'thĭ), *a.* *Aeronautics.* Fit for operation in the air; able to bear the strains of flight, to withstand storms, etc., as an airplane. — **air'wor'thi-ness,** *n.*

A-ka'li (a-kä'lē), *n.*; *pl.* **-lis** (-lēz). [Punjabi *Akal* or *Akal Purukh*, fr. Skr. *akāla purusha* Timeless Soul.] One of a fanatical, monistic sect of the Sikhs (cf. SIKHISM, in the *Dictionary*); — so called from the fact that they are devotees of *Akal*.

Al'ba-tros (ăl'bă-trŏs; *G.* äl'bä-trōs'), *n.* A certain make of German airplanes, or an airplane of this make. Albatros machines do not constitute a type.

al-bin'ic (ăl-bĭn'ĭk), *a.* Of, pertaining to, or affected with albinism.

al'co-gel (ăl'kō-jĕl), *n.* [*alco*hol + *gel*atin.] *Phys. Chem.* A jelly formed by the coagulation of an alcosol.

al'co-sol (ăl'kō-sŏl; -sōl), *n.* [*alco*hol + *sol*ution.] *Phys. Chem.* An alcoholic colloidal solution.

al'da-zine (ăl'dă-zĭn; -zēn), *n.* Also **-zin.** [*alde*hyde + *azine*.] See AZINE, below.

al-deb'a-ra'ni-um (ăl-dĕb'ä-rä'nĭ-ŭm), *n.* [NL., fr. *Aldebaran*] *Chem.* See YTTERBIUM, in the *Dictionary*.

al'go-lag'ni-a (ăl'gō-lăg'nĭ-ä), *n.* [NL.; Gr. ἄλγος pain + Gr. λαγνεία lust.] *Psychol.* The finding of pleasure in inflicting or suffering pain. See MASOCHISM, SADISM, in the *Dictionary*.

Allen treatment. [After Dr. Frederick M. *Allen* (1879–), of New York.] *Med.* A method of treating diabetes by starving the patient, or by reducing his diet, till sugar disappears from the urine.

al-ler'gic (ă-lûr'jĭk), *a.* Of, pert. to, or possessing allergy.

al'ler-gy (ăl'ĕr-jĭ), *n.* Also **al-ler'gi-a** (ă-lûr'jĭ-ä). [*allo-* + *energy*.] *Med.* A kind of acquired immunity, associated with anaphylaxis, by which a person reinfected reacts differently from the way he reacted after the primary infection.

al-lied'* (ă-līd'), *p. p. & p. a.* from ALLY, *v.* When used of the Allies (see ALLY, below), often *cap.*

al'lo-er'o-tism (ăl'ō-ĕr'ō-tĭz'm), *n.* [*allo-* + *erotism*.] *Psychoanalysis.* Erotism pert. to objects outside one's self; — opposed to *autoerotism*. — **al'lo-e-rot'ic** (-ē-rŏt'ĭk), *a.*

al-ly'* (ă-lī'), *n.* — **the al-lies'** (ă-līz'), a group of nations allied against another nation or group of nations, as the allies of the Grand Alliance, the Balkan allies (Montenegro, Serbia, Greece, and Bulgaria) in the Balkan Wars of 1912–13, etc.; in recent use, esp. [*generally cap.*], the nations (originally the members of the Triple Entente, together with Serbia, Belgium, Montenegro, and Japan) in alliance against the Central Powers in the World War (which see, below), later joined by Italy, Portugal, Roumania, Greece, the United States, and 15 other countries. After the United States joined the Allies they became officially known as the Allied and Associated Powers.

alpha particle. *Physics.* A positively charged particle, consisting of four protons and two electrons, forming a constituent of the nuclei of many atoms; — so called from its presence in alpha rays (see RADIUM, in the *Dict.*). It is identical with the nucleus of the helium atom.

alpha test. A psychological test originally given in the U. S. Army during the World War (1914–1918) to determine roughly the mental capacities of officers and soldiers able to speak and read English. The test consists of 212 questions which are answered by checking, underlining, and crossing out. Cf BETA TEST, below.

‖ **Al-pi'no** (al-pē'nō), *n.*; *pl.* ALPINI (-nē). [It., fr. adj *Alpino* of the Alps.] In the Italian army, a member of a certain army corps specially organized to defend the mountain passes leading into Italy.

Alta. *Abbr.* Alberta, Canada.

al'ti-graph (ăl'tĭ-grăf), *n.* [L. *altus* high + *-graph*.] *Physics.* An instrument, usually the same in principle as an aneroid barometer, which makes on a chart a permanent record of the altitude.

al-tim'e-ter*, *n.* An aneroid barometer having a dial marked in feet, yards, or meters, used to indicate altitude.

a-lu'mi-no-sil'i-cate (ă-lū'mĭ-nō-sĭl'ĭ-kāt), *n.* [*aluminium* + *silicate*.] *Min. & Chem.* Any of various complex silicates which contain aluminium and are regarded as salts of hypothetical **a-lu'mi-no-si-lic'ic ac'ids** (-sĭ-lĭs'ĭk). Thus, anorthite, $CaAl_2Si_2O_8$, is a calcium *aluminosilicate*.

amalgam arc. *Elec.* An arc in a vacuum tube having electrodes of mercury amalgamated with zinc, cadmium, or other metal. The spectra of such arcs contain the bright lines corresponding to the metals in the electrodes.

am'a-tol (ăm'ă-tŏl; -tōl), *n.* [Prob. *ammonium* + *toluene*.] An explosive consisting of ammonium nitrate and trinitrotoluene (in equal parts, according to one formula).

am'ber-oid (ăm'bĕr-oid), *n.* [*amber* + *-oid*.] A substance produced by heating and compressing into a mass bits of amber, sometimes together with other resins such as camphor and copal. It is used for pipe mouthpieces, cigar holders, and beads.

am'bi-tend'en-cy (ăm'bĭ-tĕn'dĕn-sĭ), *n.* [*ambi-* (fr. L. *ambo* both) + *tendency*.] *Psychol.* The state of having together with each tendency a countertendency.

am-biv'a-len-cy (ăm-bĭv'ă-lĕn-sĭ), *or* **am-biv'a-lence** (-lĕns), *n.* [*ambi-* (fr. L. *ambo* both) + *valency, valence*.] The quality or fact of being ambivalent; specif., *Psychol.*, the presence of contrary feeling tones, associated with the same idea or object.

am-biv'a-lent (-lĕnt), *a.* [*ambi-* + L. *valens, -entis*, p. pr. of *valere* to be strong, be worth; cf. EQUIVALENT.] Exerting (mental or moral) forces that conflict; influencing in opposing ways; as, *ambivalent* feelings or impulses; also, characterized by ambivalent feelings, impulses, or emotions.

I mean that the relation is really "*ambivalent*," that is, it is composed of conflicting feelings of tenderness and hostility. *Sigmund Freud* (in translation).

am'brine (ăm'brĭn; -brēn), *n.* [*amber* + 2d *-ine* **b.**] *Med.* A preparation of oil of amber mixed with paraffin, bearing the trade-mark *Ambrine*, used in treating burns.

am'bu-lance (ăm'bŭ-lăns), *v. t.* To convey by ambulance.

a-men'ti-a†, *n.* *Med.* A state of mild mental confusion characterized by perplexity and incoherence, and accompanied by mild motor unrest, often with fleeting hallucinations or delusions; — used loosely also of such mental defectiveness as idiocy or imbecility.

A-mer'i-can-ese' (ă-mĕr'ĭ-kăn-ēz'; -ēs'), *n.* English containing words, locutions, and usages, esp. slangy and colloquial, which are peculiar to the United States; also, all the terms and usages, collectively, peculiar to the United States. *Recent.*

American Federation of Labor. An American association of national and international trade and industrial unions, chiefly of skilled laborers, having for its objects the establishment of self-governing unions in every trade and legitimate occupation, general improvement in the conditions and wages of labor, and the formation of public opinion by the agencies of platform, press, and legislation

American Legion. An organization of naval and military veterans, both male and female, of the World War, "non-partisan, nonpolitical, nonmilitary, and permitting of no distinction due to rank or place of service," incorporated by Act of Congress, Sept. 16, 1919.

Am'ex' (ăm'ĕks'), *n.* Short for *American Expeditionary Forces*, that is, the American army abroad, esp. in France during the World War.

am'mine (ăm'ĭn; -ēn), *n.* [*ammonia* + 2d *-ine* **b.**] *Chem.* **a** A molecule of ammonia, NH_3, as it exists in certain complex compounds called **am'mi-no com'pounds** (-ĭ-nō); — so spelled by Werner to distinguish it from the *amines*, or substituted ammonias. **b** An ammino compound; as, the platinum *ammines* (of which the compound $[Pt(NH_3)_4]Cl_2$ is an example).

am-phib'i-an*, *n.* *Aeronautics.* An airplane designed to rise from and alight on either land or water.

am'phi-er'o-tism (ăm'fĭ-ĕr'ō-tĭz'm), *n.* [*amphi-* + *erotism*.] *Psychoanalysis.* Capacity of erotic reaction toward either sex, as in a child toward its parents. — **am'-phi-e-rot'ic** (-ē-rŏt'ĭk; ĕr-ŏt'ĭk), *a.*

am'pli-fi-ca'tion*, *n.* *Elec.* Increase of electric current or voltage through control of a larger amount of power than that originally present. **Audio-frequency amplification** is amplification of current of audio frequency, which in receiving sets is in the stages following the detector. **Radio-frequency amplification** is amplification of current of radio frequency, which in receiving sets is in the stages preceding the detector. See also CASCADE AMPLIFICATION, REGENERATIVE, below.

amplification factor. *Elec.* In an electron tube, the ratio of change of plate voltage to change of grid voltage, plate current remaining unchanged.

am'pli-fi'er*, *n.* *Radio.* A device to magnify electric impulses, usually including one or more electron tubes. The power of the magnified impulse or signal comes from the battery used in the amplifier, not from the incoming signal. See also POWER AMPLIFIER, below.

am-poule' (ăm-pōōl'), *n.* [See AMPUL.] A small glass capsule for holding a hypodermic solution, usually one dose.

am'y-lo-pec'tin (ăm'ĭ-lō-pĕk'tĭn), *n.* [*amylo-* + *pectin*.] *Chem.* A mucilaginous substance said to be present in starch granules and to impart to starch paste its viscosity.

an'a-bat'ic*, *a.* [Gr. ἀναβατικός ready in mounting, fr. ἀναβαίνειν to mount; ἀνά up + βαίνειν to go.] *Meteorol.* Upward-moving; as, an *anabatic* wind, such as the valley breeze, is one that ascends, owing to surface heating.

an'a-gog'ic* (ăn'ă-gŏj'ĭk), *a.* *Psychoanalysis.* **a** Pertaining to or arising from the striving of inner psychic forces toward progressive ideals; as, an *anagogic* image. **b** Pertaining to the interpretation and psychotherapy of dreams, symptoms, etc., with emphasis on such striving; as, *anagogic* methods.

an'a-phyl'a-tox'in (-fĭl'ă-tŏk'sĭn), *n.* [*anaphylaxis* + *toxin*.] *Physiol. Chem.* The toxic agent which produces anaphylactic shock.

an'a-phy-lax'is (-fĭ-lăk'sĭs), *n.* [NL.; E. *ana-* + *-phylaxis* as in *prophylaxis*.] *Med.* Excessive susceptibility; esp., acute susceptibility to an albuminous substance in a person recently subjected to the influence of the same substance. Serum sickness, hay fever, and urticaria from the eating of shellfish, strawberries, etc., are regarded as manifestations of anaphylaxis. — **an'a-phy-lac'tic** (-lăk'tĭk), *a.*

An'a-plas'ma (-plăz'mă), *n.* [NL.; *ana-* + *plasma*.] *Zool.* A genus of certain protozoan organisms in the red blood cells of cattle, described as *marginal points*; — so called by Theiler in 1910.

an'a-plas-mo'sis (-plăz-mō'sĭs), *n.* [NL.; *anaplasma* + *-osis*.] A disease of cattle caused by a protozoan organism of the genus *Anaplasma*.

an'e-mo-bi'a-graph (ăn'ĕ-mō-bī'ä-grăf), *n.* [*anemo-* + Gr. βία force + *-graph*.] *Meteorol.* A form of pressure-tube anemograph.

an'er-oid'o-graph (ăn'ĕr-oid'ō-grăf), *n.* [*aneroid* + *-graph*.] *Meteorol.* An aneroid barometer provided with a mechanism for recording automatically and continuously the atmospheric pressure.

angle of attack. *Aëronautics.* The acute angle between the direction of the relative wind and the chord of an airfoil; that is, the angle between the chord of an airfoil and the direction of its motion relative to the air.

angle of bank. = ANGLE OF ROLL, below.

angle of incidence*. *Aëronautics.* = ANGLE OF ATTACK.

angle of pitch. *Aëronautics.* The angle between two planes one of which includes the lateral axis of the aircraft and the direction of the relative wind, the other the lateral axis and the longitudinal axis. In normal flight the angle of pitch is the angle between the longitudinal axis and the direction of the relative wind. It is called *positive* when the nose of the aircraft rises.

angle of roll. *Aëronautics.* The angle through which an aircraft must be rotated about its longitudinal axis in order to bring its lateral axis into a horizontal plane. It is positive when the left wing is higher than the right. See AXIS, below.

angle of yaw. *Aëronautics.* The angle between the direction of the relative wind and the plane of symmetry of an aircraft. It is positive when the aircraft turns to the right.

angle of zero lift. See ZERO LIFT ANGLE, below.

An'glo—I'rish* (ăn'glō-ī'rĭsh), *a.* Of or pertaining to the English and the Irish; as, the *Anglo-Irish* treaty.

An'glo—Jap'a-nese', *a.* Of or pertaining to the English and the Japanese; as, the *Anglo-Japanese* treaty.

Ång'ström (ōng'strûm; ông'-), *or, Angl.*, **Ang'strom, ang'strom** (ăng'strŭm), *n.* *Physics.* An Angstrom unit (which see, in the *Dict.*).

animal husbandry. The branch of agriculture which is concerned with farm animals, esp. as regards breeding, judging, care, and production.

an'i-ma-tism (ăn'ĭ-mă-tĭz'm), *n.* [See ANIMATE.] A form of animism according to which all inanimate objects are endowed with reason, intelligence, and volition, as well as animated beings, but do not have individual souls. — **an'i-ma-tis'tic** (-tĭs'tĭk), *a.*

a-no'ci-as-so'ci-a'tion (ă-nō'sĭ-ă-sō'sĭ-ā'shŭn; -shĭ-ā'-shŭn), *n.* Also **a-no'ci-a'tion** (-ā'shŭn). [*a-* not + L. *nocere* to injure + E. *association*.] *Surg.* A method of preventing the shock and exhaustion incident to surgical operations by guarding the patient against injuring (noxious) physical and psychical contacts before, during, and after operation. For preoperative and postoperative protection special management is employed. During operation physiological disconnection between the field of operation and the nervous system is achieved by blocking with a local anæsthetic, such as novocaine; by the use of the inhalation anæsthetic nitrous oxide-oxygen; by sharp dissection, and by careful handling of the tissue. In suitable cases quinine and urea hydrochloride are injected, by means of which the physiological disconnection is continued for about five days. *G. W. Crile.*

anode rays. *Elec.* Rays of positively charged particles that start from the heated anode of a vacuum tube.

a-noph'e-line (ă-nŏf'ē-lĭn; -līn), *a.* *Zool.* Of or pertaining to *Anopheles*, a genus of mosquitoes. — *n.* A mosquito of that genus. See ANOPHELES, in the *Dictionary*.

antenna circuit. *Radio.* The complete electric circuit of which the antenna is a part.

antenna grounding switch. = LIGHTNING SWITCH, below.

antenna inductance. *Radio.* **a** The inductance of an antenna. Its value varies at different frequencies according to the current distribution. **b** The inductor or loading coil in an antenna circuit.

antenna resistance. *Radio.* Actual resistance, at a particular frequency, of the entire antenna circuit. It is equal to the ratio of the average power dissipated in the circuit to the square of the effective current at the point of maximum current.

antenna switch. *Radio.* = LIGHTNING SWITCH, below.

ant-he'li-on*, *n.* *Meteorol.* A white luminous spot opposite the sun and at the same altitude as the latter above the horizon. It is a rare species of halo. Called also *antisun* and *countersun*.

an'ti-*. For many recent formations with *anti-*, expressing hostility or opposition, as *anti-Allied, anti-Bolshevik, -Bolshevist* (*or antibolshevik, -bolshevist*), *antifascist, anti-Fascisti, antifeminism, anti-Japanese, anti-Prohibitionist, antivivisectionist, anti-Soviet*, see ANTI-, **b**, in the *Dict.*

an'ti-air'craft' (ăn'tĭ-âr'krăft'), *a.* *Mil.* Used for defense against aircraft, as a gun, battery, shell, etc.; — said esp. of a semiautomatic gun firing shrapnel, and capable of very high elevation.

an'ti-dump'ing (-dŭm'pĭng), *a.* *Com.* Made or acting in opposition to dumping (which see, below); as, *antidumping* legislation, policy, etc.

an'ti-gen (ăn'tĭ-jĕn), *n.* [*anti-* + *-gen*.] *Bacteriol. Chem.* **a** A substance the introduction of which into the body gives rise to the production of antibodies Cf. SIDE-CHAIN THEORY, in the *Dictionary*. **b** The basic substance used in complement fixation. Its action is supposed to depend upon liquid substances. It is specific in its action. — **an'ti-gen'ic** (-jĕn'ĭk), *a.*

an'ti—in'tel-lec'tu-al-ism (ăn'tĭ-ĭn'tĕ-lĕk'tū-ăl-ĭz'm), *n.* See BERGSONISM, below.

an'ti-lip'oid (ăn'tĭ-lĭp'oid), *n.* [*anti-* + *lipoid*.] *Med.* An antibody that has the power of reacting with lipoids.

an'ti-neu-rit'ic (-nū-rĭt'ĭk), *a.* *Med.* Relieving neuritis. — *n.* A remedy for neuritis

Anti—Saloon League of America. A national organization, founded in 1895, having for its object the suppression of the liquor traffic throughout America and the world.

an'ti-se'rum (ăn'tĭ-sē'rŭm), *n.* *Med.* A serum, containing specific antibodies, obtained from the blood of an animal that has been subjected to repeated sublethal doses of a microorganism. The injected serum neutralizes the toxins of the microörganism from which it is prepared. Antiserums are especially serviceable in diphtheria, tetanus, and cerebrospinal meningitis.

an'ti-sub'ma-rine', *a.* Of or pertaining to, or used in, operations against hostile submarines.

an'ti-sun' (ăn'tĭ-sŭn'), *n.* See ANTHELION, above.

an'ti-throm'bin (-thrŏm'bĭn), *n.* [*anti-* + *thrombin*.] *Physiol. Chem.* A substance in the blood which is antagonistic to the clotting action of thrombin.

anx-i'e-ty* (ăng-zī'ĕ-tĭ), *n.* *Psychoanalysis.* Expectancy of evil or danger, irrespective of cause or objective, explained as transformed emotion associated with repressed libido.

anxiety equivalent. *Psychoanalysis.* A spontaneous attack in which an intense somatic symptom, as in relation to the heart, replaces fear.

anxiety hysteria. *Psychoanalysis.* Anxiety associated with definite objects or situations as phobias.

anxiety neurosis. *Psychoanalysis.* A neurotic disturbance, from insufficient relief of sexual excitation, appearing in expectant fear or anxiety equivalents.

An'zac (ăn'zăk), *n.* [An acrostic formed from the initials of *Australian and New Zealand Army Corps*, first used as a code signal or telegraphic address of this corps in Egypt, during the World War.] **a** A member of the Australian and New Zealand Army Corps, esp. one who, during the World War, served on, or in the vicinity of, Gallipoli

peninsula; — a nickname. **b** A region or section occupied by the "Anzacs" on Gallipoli peninsula. — *a.* Of or pertaining to the "Anzacs"; as, *Anzac* exploits. *Colloq.*

‖**a'pache'** (ä'pàsh'), *n.; pl.* APACHES (F. a'pàsh'). [F., fr. *Apache* an Apache.] A member of a powerful gang or class of criminals in Paris, notorious for their desperate and vicious character. — **a'pach'ism** (ä'pàsh'ĭz'm), *n.*

aperiodic circuit. *Elec.* A circuit which cannot be tuned. In such a circuit a voltage impulse produces transient current in one direction only.

a-poth'e-sine (*a*-pŏth'ē-sĭn; -sēn), *n.* [A trade name.] *Pharm.* A white crystalline compound, $C_{16}H_{24}O_2NCl$, used as a local anæsthetic. Chemically it is the hydrochloride of γ-diethyl-amino-propyl cinnamate.

ap-pen'dix*, *n. Aëronautics.* The tube at the bottom of a balloon, used for inflation. In the case of a spherical balloon it also serves to increase the "head" of gas, and so to build up an internal pressure sufficient to keep the envelope from being pulled out of shape by the weight of the basket.

apple blotch. *Hort.* A disease of apple trees caused by the parasitic fungus *Phyllosticta solitaria*, producing blotches on the fruit, cankers on the twigs, and leaf spots

ap-port' (*a*-pōrt'), *n. Spiritualism.* Something, as a bunch of flowers, a musical instrument, or any object, introduced, professedly by occult or supernormal means, as at a séance.

a'qua-plane (ä'kwȧ-plān), *n.* [*aqua* + *plane*.] A plank attached by ropes behind a power boat, on which a person may stand and by changing his position can to some degree control the plank, as it is dragged rapidly over the water, after the manner of a hydroplane. — **a'qua-plane,** *v. i.*

aquo-. [L. *aqua* water.] A combining form denoting the presence or action of, or resemblance to, *water;* specif., *Chem.*, denoting the water molecule, H_2O, in ammino compounds.

ar'a-chin (ăr'ȧ-kĭn), *n.* [*Arachis* + *-in.*] *Chem.* A globulin which is the chief protein of the peanut.

ar-al'kyl (ăr-ăl'kĭl), *n.* [*aryl* + *alkyl.*] *Org. Chem.* An aryl derivative of an alkyl radical; thus, methyl (CH_3) is an alkyl, while its phenyl derivative (called benzyl, $C_6H_5CH_2$) is an *aralkyl.*

ar'bo-rize (ar'bŏ-rīz), *v. t.;* -RIZED (-rīzd); -RIZ'ING (-rīz'ĭng). Also **ar'bo-rise.** [L. *arbor* tree.] To give a treelike appearance to. — *v. i.* To assume a treelike appearance.

arc generator. *Radio.* A generator of alternating current employing an electric arc shunted by a combination of capacity and inductance.

ar-cha'ic*, *a. Psychoanalysis.* **a** Of or pertaining to the phyletic period preceding an individual human existence, as recapitulated in embryonic or infantile periods. **b** Designating the unconscious remnants and trends of racial and infantile past which reappear in dreams, psychopathological symptoms, and other regressive manifestations.

Ar'chi-bald* (ar'chĭ-bôld), *n.* [The proper name *Archibald.*] A German mobile antiaircraft gun; hence, any antiaircraft gun; — gen. abbr. to **Ar'chie** (ăr'chĭ). *Slang.*

ar'chie (ăr'chĭ), *v. t.* To shell with an "Archie," or antiaircraft gun; — generally in the passive; as, to be *archied.*

arc process. See NITROGEN FIXATION, below.

arc transmitter. *Radio.* A transmitting set using an arc generator.

‖**Ar-di'ti** (ăr-dē'tē), *n. pl.; sing.* ARDITO (-tō). [It. *arditi*, adj., pl. of *ardito* brave, bold, audacious.] *Mil.* A body of picked Italian volunteer infantry serving as shock or storm troops during the World War.

Ar'gen-tine ant (ar'jĕn-tēn; -tĭn). *Zool.* A small brown ant (*Iridomyrmex humilis*), introduced from South America into the southern United States, where it has become a household and orchard pest.

‖**ar'gol** (ar'gŏl), *n.* Also **ar'gal.** [Mongolian.] Dry dung, as of camels, cattle, sheep, etc., often used as fuel, esp. in the steppe regions of central Asia.

ar'gy-rol (ar'jĭ-rōl; -rŏl), *n.* [Gr. *ἄργυρος* silver + 3d *-ol.*] *Pharm.* Silver vitellin, a proteid salt of silver, bearing the trade-mark *Argyrol.* The aqueous solution is used as a local antiseptic, as for the eyes and throat.

Armistice Day. The 11th day of November, on which day, in 1918, a general armistice was declared between the Allies and the Central Powers in the World War.

Army Council. The administrative body, composed of the Secretary of State for War, the heads of departments of the War Office, and the permanent secretary of the War Office, which administers the land forces of the Empire. *Eng.*

ar-rest'er*, *n. Radio.* = LIGHTNING ARRESTER, below.

ar-rhyth'mi-a* (*ă*-rĭth'mĭ-*ȧ*), *n.* [NL., fr. Gr. *ἀ-* want of + *ῥυθμία* rhythm.] *Pathol.* Any variation from the normal rhythm of the heart, as the variations produced by normal changes of pressure (as during forced respiration), or, more esp., by functional or organic disturbances of the nerve supply or degenerative changes of the heart structure itself.

ar-rive'*, *v. i.* To attain success or recognition; as, a genius who had never *arrived. Colloq.*

ar'row-wood'*, *n. Bot.* = OCEAN SPRAY, below.

ars'phen-am'ine (ärs'fĕn-ăm'ĭn; *-ă*-mēn'), *n.* [*arsenic* + *phenol* + *amine.*] *Pharm.* Salvarsan.

arterial highway. In some American cities, a through street (which see, below) carrying a state road or highway through the city.

articulated keel. *Aëronautics.* A keel made up of a series of members hinged together at their ends.

ar'vi-cul'ture (ar'vĭ-kŭl'tŭr), *n.* [L. *arvum* cultivated land + E. *culture.*] *Agric.* The cultivation of field crops; the science and art of growing field crops.

‖**ar'zun** (ar'zŭn), *or* **ar'zan** (-zăn), *n.* [Pers. *arzan* millet.] A cereal (*Panicum italicum* or *Setaria italica*) used as food in parts of Asia and neighboring regions.

a-sex'u-al-i-za'tion (*ā*-sĕk'shŭ-*ăl*-ĭ-zā'shŭn; -ĭ-zā'shŭn), *n.* The act or process of sterilizing an animal or a human being, as by vasectomy.

as'ka-ri (ăs'kȧ-rē), *n.; pl.* -RIS (-rēz). [Ar. *'askari*, fr. *'askar* army.] **a** An askar. **b** On the east coast of Africa, a native soldier in the service of a European power.

as'pect*, *n. Mechanics.* A view of a plane from a given direction, usually from above; more exactly, the manner of presentation of a plane to a fluid (as the air) through which it is moving or to a current. If an immersed plane meets a current of fluid long side foremost, or in *broadside aspect*, it sustains more pressure than when placed short side foremost. Hence, long narrow wings in airplanes are more effective than short broad ones of the same area.

aspect ratio. *Aëronautics.* The ratio of span to mean chord of an airfoil. Thus, if the airfoil is rectangular, and if it is moving through the air in a direction at right angles to its long sides, the aspect ratio is the ratio of its long to its short side.

as'pi-rin (ăs'pĭ-rĭn), *n.* [A trade name.] *Pharm.* A white crystalline compound, $C_9H_8O_4$ (the acetyl derivative of salicylic acid), used instead of salicylic acid and the salicylates as producing fewer undesirable effects

as-sem'bly*, *n. Mach.* A set of parts which together form one unit of a machine, as a hub *assembly.*

at'mos-phere* (ăt'mŏs-fēr), *n. Physics.* A unit of atmospheric pressure, called specif. the *C. G. S. atmosphere*, equivalent to the *bar*, which is the unit in which atmospheric pressure is now generally measured and expressed. See BAR, below; C. G. S., in the *Dict.*

atmospheric absorption. *Radio.* Absorption due to imperfect electrical characteristics of the atmosphere.

at'mos-pher'ics (-fĕr'ĭks), *n. pl., or* **atmospheric disturbances.** *Radio.* Electrical effects produced in radio receiving apparatus and disturbing the reception They are due to atmospheric electrical phenomena. Also, the phenomena causing the effects.

atomic number. *Physics & Chem.* A number supposed to be that of the positive electric charges carried by the atom of a given chemical element Atomic numbers are intimately related to atomic weights, but are regarded as even more fundamental. They form a series (with a few gaps unfilled) of consecutive whole numbers, beginning with 1 for hydrogen, 2 for helium, 3 for lithium, etc., and ending with 92 for uranium.

a-tom'ics (*ȧ*-tŏm'ĭks), *n* [See -ICS.] The scientific study of atoms; specif., *Chem.*, the science of pure chemistry.

at'o-nal'i-ty (ăt'ō-năl'ĭ-tĭ), *n.* [*a-* not + *tonality.*] *Music.* Absence of tonality, whether from building up dissonances, or, as in the works of Arnold Schonberg, from composing without conscious reference to any scale or tonic.

at'o-nic'i-ty (ăt'ō-nĭs'ĭ-tĭ), *n.* [*a-* not + *tonicity.*] *Med.* A condition in which tone or tension is lacking.

at'o-phan (ăt'ō-făn), *n.* [*a-* not + *tophus* + *-an.*] *Pharm.* A colorless, crystalline compound, $C_{16}H_{11}O_2N$, bearing the trade-mark *Atophan*, used to promote the excretion of uric acid, as in gout. Chemically it is 2-phenyl-cinchoninic acid.

at'ta'ché' case (ȧ'tȧ'shā'). A traveling case or bag, like a suitcase, but smaller, fitted with writing materials, such as is carried by attachés; — called also *tachy case. Eng.*

at-ten'u-a'tion* (*ă*-tĕn'ū-ā'shŭn), *n. Elec.* Decrease of amplitude of a wave or current with increasing distance from the source of transmission; — sometimes, *Radio*, erroneously used for *absorption* (which see, above).

at'ti-tude*, *n.* The position, or orientation, of an aircraft in the air as seen by an observer stationary on the earth. The attitude is determined, and expressed mathematically, by the inclination of the axes of the aircraft to three fixed axes on the earth ("frame of reference"). Cf. AXIS, below.

Å. U. *or* **A. U., Å. u.** *or* **A. u., å. u.** *or* **a. u.** *Abbr.* Ångström unit. Cf. Å and ÅNGSTRÖM, above.

auction bridge. A development of the game of bridge in which the players bid for the privilege of naming the trump and playing with the dummy for that deal by offering to take one or more tricks above the book; — called also *auction*, or, commonly, *bridge.* There is a penalty for failure to make the bid. The score value for each trick above the book is, when the trump is clubs, 6; diamonds, 7; hearts, 8; spades, 9; and no trump, 10.

au'di-bil'i-ty*, *n. Radio.* The degree of intensity of a received signal, estimated as the ratio of the current in the telephone receiver to that producing a barely audible signal, that is, one which just permits the differentiation of telegraphic dot and dash elements of letters.

audibility meter. *Radio.* An instrument for measuring audibility or intensity of radio signals. It consists essentially of a variable resistor and a telephone receiver.

au'di-ence*, *n.* An assembly of spectators, as at a moving-picture show. *Audience* in this sense, though objected to by some as etymologically inaccurate, has come into general use. Other expressions, as *optience* (which see, below), that have been suggested have not been generally accepted. For similar extended uses, compare *churl, handkerchief, humor, knave, pen, person, phenomenon*, etc.

au'di-o (ô'dĭ-ō), *a.* [From L. *audire* to hear.] *Radio.* Of or pert. to electric currents or phenomena of frequencies corresponding to normally audible sound waves. These frequencies are approximately 15 to 20,000 a second.

au'di-o—fre'quen-cy, *a. Radio.* Of or pert to the frequency of electric waves that are normally audible to the human ear; — contrasted with *radio-frequency*, below; — as, *audio-frequency* amplification.

audio—frequency amplification. Cf. AMPLIFICATION, above.

au'di-on (ô'dĭ-ŏn), *n.* [L. *audire* to hear.] *Radio.* A three-electrode electron tube bearing the trade-mark *Audion*, esp. one in which a small amount of gas is present and helps in the functioning of the device as a detector.

au're-ole*, *n. Meteorol.* **a** The luminous area surrounding the sun or other bright light when seen through thin cloud, fog, or mist; a corona or glory. **b** The inner portion of a corona, or the whole of only an incompletely developed one.

Au'rig-na'cian (ô'rĭg-nā'shăn), *a. Ethnol.* Of, belonging to, or pertaining to, the type of paleolithic culture characterized by the remains found in a cave at Aurignac, a village in southwestern France. The *Aurignacian* culture directly preceded the Solutrian; it extended from Europe into northern Africa. — **Au'ri-gna'cian,** *n.*

Australian crawl. *Swimming.* A modification of the crawl stroke in which the swimmer uses an alternating arm and leg motion which causes the body to roll from side to side. Cf. TRUDGEN STROKE, in the *Dict.*

au'tism (ô'tĭz'm), *n.* [*auto-* + *-ism.*] *Psychol.* Absorption in phantasy to the exclusion of interest in external reality. — **au'tist** (-tĭst), *n.* — **au-tis'tic** (ô-tĭs'tĭk), *a.*

au'to-a-nal'y-sis (ô'tō-*ȧ*-năl'ĭ-sĭs), *n.* [*auto-* + *analysis.*] Self-application of psychoanalysis.

au'to-bus' (ô'tō-bŭs'), *n.* [*auto-* + *bus.*] An automobile omnibus.

au'to-chrome (ô'tō-krōm), *a.* [*auto-* + Gr. *χρῶμα* color.] Designating, or pert. to, the Lumière process (which see, in the *Dictionary*) of color photography. — *n.* The specially prepared panchromatic negative plate used in the Lumière process; also, a positive plate or print obtained from such a negative. — **au'to-chro'my** (ô'tō-krō'mĭ), *n.*

au'to-con-vec'tion (-kŏn-vĕk'shŭn), *n. Meteor.* Convection without the aid of mechanical disturbance

autoconvection gradient. *Meteor.* That rate of decrease of temperature of the air with increase of altitude which gives the same density at all levels

au'to-dyne (ô'tō-dīn), *a.* [*auto-* + *dyne.*] *Radio.* Designating a special type of heterodyne in which the auxiliary current is generated in the device used for rectification. — **au'to-dyne,** *n.*

au'to-er'o-tism (ô'tō-ĕr'ō-tĭz'm), *n.* [*auto-* + *erotism.*] Also **au'to-e-rot'i-cism** (-ē-rŏt'ĭ-sĭz'm, -ĕr-ŏt'-). **a** *Psychol.* Erotic impulse arising spontaneously and not from any external influence. *Havelock Ellis.* **b** *Psychoanalysis* Erotism which is concerned solely with physical gratification through one's own bodily sensations or with absorption in phantasy. — **-e-rot'ic** (-ē-rŏt'ĭk; -ĕr-ŏt'ĭk), *a.*

autogenous vaccine. *Med* A vaccine, consisting of a standardized broth of killed or attenuated bacteria, which has been prepared from cultures obtained from some specific lesion and is used to immunize the host against further spread and progress of the same organism.

autogenous welding. = AUTOGENOUS SOLDERING, in *Dict.*

au'to-mat'ic*, *a. Psychol.* Due to a complex or complexes acting independently of consciousness; as, *automatic* writing.

au'to-mo'tive (ô'tō-mō'tĭv), *a.* [*auto-* + *-motive* as in *locomotive.*] Self-propelling; automobile; hence, of, pertaining to, or concerned with, vehicles or machines (such as automobiles, airplanes, motor boats, etc.) that are self-propelling; as, an *automotive* engineer.

au-ton'o-mous*, *a. Psychol.* Designating a complex or complexes acting without conscious control.

au'to-se'ro-ther'a-py (-sē'rō-thĕr'ȧ-pĭ), *n.* [*auto-* + *sero-* + *therapy.*] *Med.* The treatment of a disease by the administration of the individual's own serum, which may, or may not, have been subjected to heat or the addition of drugs.

au'to-sta-bil'i-ty (ô'tō-stȧ-bĭl'ĭ-tĭ), *n. Mechanics.* Automatic stability; also, inherent stability. An airplane is inherently stable if it keeps in steady poise by virtue of its shape and proportions alone; it is automatically stable if it keeps a steady poise by self-operative mechanism.

au'to-sug-ges'tion* (ô'tō-sŭg-jĕs'chŭn), *n. Psychoanalysis.* Suggestion from within oneself, distinguished from that coming from another, as influenced by unconscious ideas and affects. — **au'to-sug-ges'tive** (-tĭv), *a.*

au'to-ther'a-py (-thĕr'ȧ-pĭ), *n.* [*auto-* + *therapy.*] *Med.* Treatment of a disease by the use of the pathological excretions of the patient himself.

au'to-truck' (ô'tō-trŭk'), *n.* An automobile truck.

aux'i-mone (ŏk'sĭ-mōn), *n.* [Gr. *αὐξμος* promoting plant growth.] *Bot.* Any of certain accessory organic plant foods, vital to the life of the plant, but needed only in small quantities, analogous to vitamins in animal foods.

aux'o-graph (ŏk'sō-grăf), *n.* [Gr. *αὔξειν* to increase + *-graph.*] *Physics.* An instrument of precision for the automatic recording of variations in volume of any body; — orig. used to measure the swelling and shrinking of certain parts of plants. — **aux'o-graph'ic** (-grăf'ĭk), *a.*

av'a-lanche (ăv'ȧ-lânch; 277), *v. i.* To slide or slip down in the form of, or like, an avalanche.

a'vi-ate (ā'vĭ-āt), *v. i.* To fly, or navigate the air, in an airplane, or heavier-than-air flying machine. *Colloq.*

A'vi-a-tik' (a'vĕ-ȧ-tēk'), *n.* A certain make of German airplanes, or an airplane of this make; esp, a fast tractor biplane, orig. with backswept wings, much used by the Germans as a battleplane. The *Aviatik* is not a type.

a'vi-a'tor* (ā'vĭ-ā'tĕr), *n.* The operator or pilot of a heavier-than-air craft, as an airplane or a seaplane; — often so called regardless of the sex of the operator.

a'vi-a'tress (-ā'trĕs), **a'vi-a'trice** (-trĭs), **a'vi-a'trix** (-ā'trĭks), *n.* A woman aviator. Cf. AVIATOR, above.

a'vi-ette' (ā'vĭ-ĕt'), *n.* A heavier-than-air flying machine using motive power furnished solely by the aviator.

‖**a'vion'** (ā'vyŏN'), *n.* [F.] An airplane. — ‖ **a'vion'-ca'non'** (-kȧ'nôN'), a French military airplane mounting a quick-firing gun on the bow. — ‖ **a'vion' de chasse'** (dĕ shȧs'), an airplane used in pursuing enemy aircraft.

A'vo-ga'dro num'ber (ä'vō-gȧ'drō). *Chem.* The number of molecules in a mass of any gas equal to its molecular weight, as, for oxygen, the number in 32 grams. Its value is 60.62×10^{22}. See AVOGADRO'S HYPOTHESIS, in the *Dict.*

A. W. L., *or* **a. w. l.** *Abbr.* Absent with leave.

A. W. O. L., *or* **a. w. o. l.** *Abbr.* Absent without leave.

ax'is*, *n. Aëronautics.* In an aircraft, any of three fixed lines of reference, usually centroidal and mutually rectangular. The principal longitudinal axis in the plane of symmetry, usually parallel to the axis of the propeller, is called the *longitudinal axis;* the axis perpendicular to this in the plane of symmetry is called the *normal axis;* and the third axis, perpendicular to the other two, is called the *lateral axis.* In mathematical discussions the first of these axes, drawn from front to rear, is called the X axis; the second, drawn upward, the Z axis; and the third, running from right to left, the Y axis.

az'ine* (ăz'ĭn; -ēn), *n.* Also **-in.** A compound of the general formula R:NN:R, formed by the action of hydrazine on aldehydes (giving *aldazines*) or on ketones (giving *ketazines*). Thus, acetone, $(CH_3)_2CO$, yields the ketazine $(CH_3)_2C{:}NN{:}C(CH_3)_2$.

A-zo'to-bac'ter (*ā*-zō'tō-băk'tĕr), *n.* [*azote* + *bacteria.*] *Bacteriol.* A genus or group of aërobic nonsymbiotic bacteria which fix atmospheric nitrogen, and thus play an important rôle in maintaining soil fertility; also [*l. c.*], a bacterium of this genus

az'u-lene (ăz'ū-lēn), *n.* [Sp. *azul* blue + *-ene.*] *Org. Chem.* A liquid hydrocarbon, $C_{15}H_{18}$, of intense blue color, found in very small amounts in some essential oils, as oil of cubebs.

ba'bas-su' (bȧ'bȧ-sōō'), *n.* [Prob. S. Amer. Indian name.] *Bot.* A South American palm (*Attalea speciosa*) growing esp. in Brazil. Its hard-shelled nuts yield about 60 per cent oil of excellent quality.

Bab'bitt (băb'ĭt). **a** In Sinclair Lewis's novel "Babbitt" (1922), a prosperous, vulgar, middle-class realtor, who under business and social pressure conforms to the re-

spectable materialism of his class. Hence, **b** A business or professional man who strictly accepts the social and ethical standards of his group; — used in a derogatory sense. — **Bab'bitt-ism** (-ĭz'm), *n.* — **Bab'bitt-ry** (-rĭ), *n.*

Ba-be'si-a (bȧ-bē'sĭ-ȧ). A genus of parasitic Protozoa, formerly called *Piroplasma*, which see, in the *Dict.*

baby beef. A prime bovine beast fattened for butchering at from one to two years old; also, meat from such an animal.

baby bond. A bond having a face value of $100 or $50 (instead of $1,000 or $500). *Financial Cant or Slang, U. S.*

back'swept' (băk'swĕpt'), *a. Aëronautics.* Of an airplane wing, having the leading edge inclined backward and outward from the body so that it forms an angle with the lateral axis of the machine.

bac'te-rin (băk'tē-rĭn), *n.* Also **-rine** (-rĭn; -rēn). *Med.* A bacterial vaccine.

bac-te'ri-o-phage (băk-tē'rĭ-ō-fāj), *n.* [*bacterium* + Gr. φαγεῖν to eat.] *Bacteriol.* An agent, normally present in the intestinal tract of man and animals, esp. those recovering from a bacterial disease, and in blood, urine, pus, etc., that has the power to destroy bacteria. It is regarded by some as an ultramicroscopic organism, by others as a chemical agent, such as an enzyme or a toxin.

bac-te'ri-ot'ro-pin (-ŏt'rō-pĭn), *n.* Also **-pine** (-pĭn; -pēn) [*bacterio-* + *-trope* + *-in.*] *Physiol. Chem.* A relatively thermostable substance found in immune serum. Its action resembles that of opsonin.

bac'ter-ize (băk'tēr-īz), *v. t.*; -IZED (-īzd); -IZ'ING (-īz'ĭng). To subject to, or modify by, bacterial action; as, *bacterized* peat. — **bac'ter-i-za'tion** (-ĭ-zā'shŭn; -ī-zā'shŭn), *n.*

B. A. F. *Abbr.* British Air Force

baffle painting. A form of camouflage in which a ship is so painted as to give it a deceptive appearance as to its size and form and, also, its course and speed.

Ba-hai' (bȧ-hȧ'ē), *n.*; *pl.* BAHAIS (-hȧ'ēz). A member of the sect of the Babis consisting of the adherents of Baha (Mirza Husain Ali (1817–1892), entitled "Baha'u'llah," or "the Splendor of God"), the elder half brother of Mirza Yahya of Nur, who succeeded the Bab as the head of the Babists. Baha in 1863 declared himself the supreme prophet of the sect, and became its recognized head. — **Ba-ha'ism** (bȧ-hȧ'ĭz'm), *n.* — **Ba-ha'ist,** *n.*

Ba-hi'a grass (bȧ-ē'ȧ). [From *Bahia*, Brazil.] *Agric.* A valuable perennial pasture grass (*Paspalum notatum*), native to tropical America, grown in Florida and adjacent Gulf regions

bai-dar'ka (bī-dar'kȧ), *n.* = BIDARKA, in the *Dict.*

ba'ke-lite (bā'kĕ-līt), *n.* [After Leo Henry *Baekeland* (1863–), its discoverer.] A condensation product of phenols and formaldehyde, of high electrical and chemical resistance, bearing the trade-mark *Bakelite.* It is used similarly to hard rubber and celluloid and in other ways. *Bakelite A* is a fusible and soluble form; *bakelite B* is plastic but insoluble; both are converted by heat and pressure into *bakelite C*, the final infusible, insoluble form. As ordinarily made bakelite is brown or black.

ba'ke-lite-di-lec'to (bā'kĕ-līt-dĭ-lĕk'tō), *n Elec.* A laminated phenolic insulating material, bearing the trade-mark *Bakelite-Dilecto.*

ba'ke-lite mi-car'ta (mĭ-kär'tȧ). *Elec.* A laminated phenolic insulating material, bearing the trade-mark *Bakelite Micarta.*

balanced surface. *Aëronautics.* A surface, such as a rudder, aileron, or the like, part of which is in front of its pivot Cf. SURFACE, below.

balancing coil. *Elec.* An autotransformer (see, in *Dict.*).

balancing condenser. *Radio.* A variable condenser used in an auxiliary way with a direction finder to make the indications of the instrument more precise. It balances out the deleterious effect of capacity of the apparatus to ground.

balancing flap. *Aëronautics.* An aileron.

Bal'kan-ize (bôl'kȧn-īz), *v. t.*; -IZED (-īzd); -IZ'ING (-īz'ĭng). To cause (as a region) to separate into hostile units; — referring to the inharmonious conditions prevailing in the so-called Balkan States (Bulgaria, Roumania, Serbia, etc.), especially at the time of the Balkan Wars (1912–13). — **Bal'kan-i-za'tion** (-ĭ-zā'shŭn; -ī-zā'shŭn), *n.*

Balkan splint, *or* **Balkan frame.** *Surg.* A frame employed for continuous extension in treatment of fractures of the femur, consisting of an overhead bar supported from the floor, with pulleys, which supports the leg in a metal sling; — first employed in the Balkan countries.

bal'lo-net'*, *n. Aëronautics.* A small balloon within the interior of a balloon or airship for controlling its ascent or descent and for maintaining pressure on the outer envelope so as to prevent deformation. The ballonet is kept inflated at the required pressure, under the control of valves, by a blower or by the action of the wind caught in an air scoop.

bal-loon'*, *n. Aëronautics.* An aërostat that derives its support in the air from the buoyancy of the air displaced by an envelope the form of which is maintained by the pressure of a contained gas lighter than air and that has no power plant or means of controlling the direction of its flight in the horizontal plane. The term includes *free*, or *flight, balloons*, of the old-style spherical type; *captive balloons*, secured by a cable to the earth; *barrage balloons*, captive balloons used in forming an aërial barrage against airplane attacks; *kite balloons*, captive balloons of elongated form having tail fins to keep them headed into the wind; *nurse balloons*, for storing gas, etc.; *pilot balloons*, sent up to show the direction of the wind; and *sounding balloons*, small balloons to be sent aloft without passengers but with self-registering meteorological instruments, used in securing meteorological data.

balloon bed. *Aëronautics.* A mooring place on the ground for a captive balloon.

balloon cloth. The cloth, generally cotton, of which balloon fabrics are made. Cf. BALLOON FABRIC, below.

bal-loon'et (bȧ-lōōn'ĕt), *n.* A ballonet; — a misspelling.

balloon fabric. The finished material, generally rubberized, of which balloon or airship envelopes are made. Cf. BALLOON CLOTH, above.

balloon tire. Also **bal-loon'*,** *n.* A kind of large, flexible, thin-walled pneumatic tire, which is inflated to a low pressure. Its relative softness causes the absorption of shocks and vibrations.

Ball'platz' (bäl'plȧts'), *n.* The Austrian Foreign Office; — from the square (G. *platz*) in Vienna on which it is located.

bal-op'ti-con (băl-ŏp'tĭ-kŏn), *n.* [Gr. βαλεῖν to throw + stereo*opticon.*] A form of projector (see PROJECTOR, below), bearing the trade-mark *Balopticon.*

bal'sa wood (bôl'sȧ). [Sp *balsa* raft. Cf. BALSA.] The wood of *Ochroma lagopus* and allied species, small trees of the family Bombacaceæ, occurring in Central America and the West Indies. It is lighter than cork, but strong, and is used for floats, life rafts, etc.; — called also *corkwood.*

Baltic question. The question as to the political status of the three former Baltic provinces of Russia (Kurland, Esthonia, and Livonia), later forming two independent republics (Esthonia and Latvia), and of Lithuania, comprising the former Russian governments of Kovno and Grodno, and parts of others, later an independent republic.

band*, *n. Radio.* A range of frequencies or of wave lengths; as, radio broadcasting in the frequency *band* from 550 to 1500 kilocycles.

band, *or* **band-pass, filter.** *Radio.* See FILTER, below.

band spectrum*. *Physics.* A type of group of spectrum lines characteristic of emission by a molecule rather than an atom.

band'wag'on (bănd'wăg'ŭn), *n.* A wagon, usually ornate and high, for a band of musicians. — **to climb, get,** *or* **be, on the band wagon,** to join a movement which seems certain to succeed. *Slang, U. S.*

bank*, *v. i. & t. Aëronautics* To incline (an airplane) laterally, to prevent skidding when rounding a curve. *Right bank* is to incline the airplane with the right wing down; *left bank*, the opposite.

bank*, *n. Aëronautics.* The lateral inclination of an airplane, as when it rounds a curve.

bankers' acceptance. A bill of exchange of which the acceptor is a bank or trust company, or a firm, person, company, or corporation engaged in the business of granting bankers' acceptance credits. Cf. TRADE ACCEPTANCE, below.

banking indicator. See INCLINOMETER, **a,** below.

bank, *or* **banked, winding.** *Radio.* A type of winding of coils in which the turns are staggered in such a way as to reduce the capacity of the whole coil. Each turn is wound successively in each of two or more layers and is kept from being adjacent to turns differing greatly in potential.

bank'-wound' coil (băngk'wound'). *Radio.* A coil wound by some form of bank winding.

banner cloud. *Meteor.* A cloud touching and extending out from the lee side of a mountain peak, like a flag or banner.

Ban'ti's dis-ease' (băn'tēz). [After Guido *Banti*, contemporary Italian physician.] A disease characterized by anæmia, cirrhosis of the liver, dyspnœa, enlargement of the spleen, and ascites.

bar*, *n. Physics.* A unit of atmospheric pressure: one megadyne per square centimeter, or the pressure of 29.5306 inches (750.076 millimeters) of mercury at the temperature of melting ice and at sea level in latitude 45°; — called also the *C. G. S. atmosphere.*

Ba-rac'a (bȧ-răk'ȧ), *n.* An international, interdenominational organization of Bible classes of young men; — adaptation of the Hebrew word *Berakah* ("blessing") in 2 Chron. xx. 26 and 1 Chron. xii. 3. Cf. PHILATHEA, below

bar'bi-tal (bär'bĭ-tăl), *n. Pharm.* = VERONAL, in the *Dict.*

Bar'low's dis-ease' (bar'lōz). [After Sir Thomas *Barlow* (1845–), English physician.] *Med.* Infantile scurvy (which see, below).

bar'o-cy'clon-om'e-ter (băr'ō-sī'klŏn-ŏm'ē-tẽr), *n.* [*baro-* + *cyclone* + *-meter*] *Meteor.* A special form of aneroid barometer used, in conjunction with a dial having adjustable arrows (the cyclonometer, or wind disk), to determine the location and movement of a tropical cyclone.

bar'o-graph* (băr'ō-grȧf), *n. Aëronautics.* An instrument used to make a permanent record of variations in barometric pressure, the charts on which the records are made sometimes indicating altitudes directly.

bar'rage' (bȧ'rȧzh'; *E.* bar'ăj), *n.*; *pl.* -RAGES. [F. *barrage*, in *tir de barrage* barrage fire.] *Mil.* A barrier to the advance or retreat of enemy troops, formed by rapid and continuous artillery or machine-gun fire (*barrage fire* or *curtain fire*) concentrated on a designated line or area; — called specifically a *standing barrage* or *curtain of fire.* The barrage was originally used as a means of defense only. A *barrage of interdiction* is one applied to a particular line, area, or point so as to debar the enemy from the use of it. A *protective barrage* is one placed in front of a designated position to protect troops occupying it. A barrage established by fire from guns behind advancing troops and shifted slowly forward to protect them as they advance is a *creeping barrage* or *rolling barrage.* A *box barrage* is one applied to two or more sides of a position so as to isolate it. Barrages are also classified as *frontal, oblique,* or *enfilade* according to the direction of the target from the guns. *Barrage* is also applied to a barrier of balloons (see BARRAGE BALLOON, below) raised against attacks by airplanes — called specifically an *aërial barrage* — and to a barrier of mines planted at sea to intercept enemy ships; as, the North Sea *barrage*, a mine field extending from the British Isles to the Scandinavian peninsula in the World War. The word is also often used figuratively.

barrage balloon. A small captive balloon, used to support wires or nets as a protection against attacks by airplanes. Cf. BARRAGE, above.

barrage reception. *Radio.* A system of reception in which interference from one or more directions is prevented, as by directional properties of antennæ.

barrel roll. *Aviation.* An aerial maneuver in which a complete revolution about the longitudinal axis is made, the direction of flight being approximately maintained.

bas'ket*, *n. Aëronautics.* The car suspended beneath a balloon, for passengers, ballast, etc.

basket weave*. *Radio.* A type of coil winding in which the windings of successive layers are woven in and out of one another.

ba'tik (bȧ'tĕk), *n.* Also **bat'tik.** [Malay *batik.*] A method of executing designs in color, as on textile fabrics, originally practiced by natives of the Dutch East Indies, in which the parts of the fabric that are to be protected from a dyestuff are given a coating of wax which, after the dipping, is removed by boiling. This process is repeated as many times as there are colors in the design. Also, a design executed thus, or a fabric decorated by this method.

ba'tik, *v. t.*; BA'TIKED (-tĕkt); -TIK-ING. To execute a design on by the batik method. — **ba'tik-er,** *n.*

battery charger. *Elec.* = CHARGER, below.

battery eliminator. *Radio.* A device to supply voltage to electron tubes from electric power supply mains.

battle cruiser. A warship of dreadnought size and of the highest speed and heaviest battery, but without the heavy armor protection of the dreadnought, designed for high-speed cruising, scouting, and long-range fighting.

bat'tle-plane' (băt''l-plān'), *n.* A fast, high-powered, military airplane, mounting a gun or guns, and designed especially for encounters with hostile airplanes.

bay*, *n. Aëronautics.* The cubical or prismoidal section of a truss included between the transversely adjacent sets of struts or bulkheads. The first bay of the wing trussing of an airplane is the one closest to the plane of symmetry.

B battery. *Radio.* An electric battery connected between the plate and the filament of an electron tube to cause the flow of electron current in the tube; — called also *plate battery.* See A BATTERY, above, and C BATTERY, below.

beam (bēm), *a. Radio.* Pertaining to wave transmission in a fairly well defined beam as distinguished from substantially uniform diffusion in all directions; as, *beam* antenna.

bean*, *n.* The head, esp. the top of the head. — *v. t.* To hit on the head. *Both Slang, U. S.*

beat reception. *Radio.* A method of receiving in which the received current has superimposed on it locally produced current of nearly but not quite the same frequency, so as to produce audible beats. Cf. HETERODYNE, below.

beet leaf hopper. *Agric.* A small cream-colored to greenish leaf hopper (*Eutettix tenella*) which transmits the cause of curly top, a disease of the sugar beet, from infected to healthy plants by puncturing the leaves.

be-hav'ior*, be-hav'iour* (bē-hāv'yẽr), *n. Psychol.* The response of an organism toward the stimuli acting upon it from without and from within in the constant interaction of the life processes.

be-hav'ior-ism, be-hav'iour-ism (bē-hāv'yẽr-ĭz'm), *n. Psychol.* A theory and method of psychological study based on the conception that sound psychological progress must rest upon a purely observational and objective analysis of behavior, thus avoiding the *psychologist's fallacy* (see in *Dict.*). — **-ist** (-ĭst), *n. & a.* — **-is'tic** (-ĭs'tĭk), *a.*

bell system of control. *Aëronautics.* An apparatus used in controlling certain kinds of airplanes, and consisting principally of a steering column supported by a universal joint at the base, which bears a hemispherical flange, or "bell," to which are attached the cables for controlling the wing-warping devices, elevator planes, and the like.

bench root. *Agric.* An abnormal root development due to the presence of tough seed coats. The roots are often twisted together or badly formed.

Ben Day, *or* **Ben'day', proc'ess** (bĕn'dā'). [After *Benjamin Day*, New York printer (1838–1916).] A process for shading, stippling, or mottling part, esp. the background, of a drawing, photograph, or printing plate with a machine (the *Ben Day* shading machine), preparatory to transferring or to engraving or etching. Those parts of the drawing or plate not to be shaded are masked out with a stencil or painted out with gamboge or glue. The pattern of the shading is engraved in relief on one side of a thin, gelatinous film, which is inked with a hand roller, is mounted in a hinged frame holder, and is held rigidly against the copy or plate while being pressed with special tools to transfer the design.

be-ni'to-ite (bĕ-nē'tō-īt), *n. Min.* A sapphire-blue crystallized barium titanosilicate, $BaTiSi_3O_9$, found in San Benito County, California. It has been used as a gem.

Be-noist' scale (bĕ-nwȧ'), **Be-noist's' scale** (bĕ-nwaz'). *Physics.* An arbitrary scale expressing the hardness of X rays in terms of the thickness of aluminium necessary to reduce the intensity of the rays to that of the same rays which have passed through a standard disk of silver, usually .11 mm. in thickness. The penetrating power of the ray varies with its hardness in respect to aluminium; it is assumed to be independent of its hardness in respect to silver. The Benoist scale has 12 steps, or degrees, and "Benoist 5," for example, means that the absorption by 5 mm. of aluminium equals that by the standard silver disk.

ben'zen-oid* (bĕn'zĕn-oid; bĕn-zĕn'-), *a.* [*benzene* + *-oid.*] *Chem.* Like benzene; specif., having benzene linkage, as opposed to *quinonoid.*

ben'zo-hy'drol (bĕn'zō-hī'drōl; -drŏl), *n.* Also **benz-hy'drol** (bĕnz-hī'drōl; -drŏl). [*benzo-* + *hydro-* + *-ol.*] *Org. Chem.* A crystalline secondary alcohol, $(C_6H_5)CHOH$, obtained by reduction of benzophenone and in other ways It is a hydroxyl derivative of diphenylmethane. See HYDROL, 2, below.

be-ra'kah (bĕ-rȧ'kä), *n.*; *pl.* -KOTH (-kōt). [Heb.] Benediction; — a general term for Hebrew blessings, as the kiddush and habdalah.

Berg'son-ism (bĕrg'sŭn-ĭz'm), *n.* The philosophy of Henri Bergson (1859–), a French philosopher and professor. Bergson conceives the world as a process of "creative evolution" in which the novelty of the successive phenomena rather than the constancy of natural law is the significant fact. Reality is time or duration (*la durée réelle*) which is the same as free motion and is the expression of the vital impetus (*élan vital*), or creative force. Space and material objects are regarded as images of past events, not as present realities; and all formalism (of which the type is space forms) is viewed as falsification of the free-moving reality. This position is often described as *anti-intellectualism.* — **Berg-so'ni-an** (bĕrg-sō'nĭ-ăn), *n. & a.*

ber'lin* (bûr'lĭn'; bûr'lĭn), *n.* Also **berline.** *Automobiles.* A limousine with the driver's seat completely inclosed. See AUTOMOBILE, *Illust.*, in the *Dictionary.*

Berne, *or* **Bern, Bureau.** *Radio.* The International Bureau of the Telegraph Union, located at Berne, Switzerland (see *Gaz.*). It collects and issues information as provided in the International Radiotelegraph Convention, esp. international lists of radio stations, giving call letters.

Berne, *or* **Bern, Convention.** A treaty governing international copyright ratified at Berne, Switzerland, Sept. 5, 1887, by representatives of Great Britain, Belgium, France, Germany, Italy, Spain, Switzerland, Tunis, and Haiti, the basis of which is that authors or publishers of works in any of the contracting countries, on complying with certain necessary formalities, such as registration in the country where the work is first published, shall enjoy in each of the other countries the same rights as the laws of that country

grant to native writers. The United States did not subscribe to the Berne Convention.

Ber'tha* (bûr'thȧ), *n.* [With allusion to Frau *Berta* (or *Bertha*) Krupp von Bohlen und Halbach, head of the Krupp steel works, which made most of the large guns of the German army.] Any of certain German guns of large bore or of long range, esp. any of those used in reducing Belgian and French fortresses during the summer of 1914, or in bombarding Paris in 1918. *Slang.*

Bes'sa-ra'bi-an (bĕs'ȧ-rā'bĭ-ăn), *a.* Of or pertaining to Bessarabia or its inhabitants. — *n.* A native or inhabitant of Bessarabia.

be'ta par'ti-cle (bē'tȧ; bā'tȧ). *Physics & Chem.* An electron; — so called from its presence in beta rays. See RADIUM, in the *Dict.*

be'ta test (bē'tȧ; bā'tȧ). A psychological test similar to the alpha test (which see, above) for foreigners unable to read or speak English but literate in their native tongues.

beth-ab'a-ra (bĕth-ăb'ȧ-rȧ), *n.* = NOIBWOOD, below.

be-tween'maid' (bē-twēn'mād'), *n.* A maidservant whose work supplements that of the cook and the housemaid; a tweeny. *Eng.*

bi'as*, *n. Radio.* Applied grid voltage, usually negative. *Cant.*

bible paper. A kind of strong, thin, opaque book paper, originally used for Bibles.

Big Five. At the Paris Peace Conference of 1919, France, Great Britain, Italy, Japan, and the United States, or their leading representatives (Clemenceau, Lloyd George, Orlando, Makino, and Wilson). *Colloq.*

Big Four*. **a** At the Paris Peace Conference of 1919, the four leading nations, that is, France, Great Britain, Italy, and the United States, or their leading representatives. *Colloq.* **b** The railroad brotherhoods of conductors, locomotive engineers, firemen and enginemen, and trainmen.

bill fold. A pocketbook or case for bills, or bank notes, in which the bills are inserted flat and which is then folded.

Bill'—Jim', *or* **Bill'jim'**, *n.* An Australian soldier; an Australian. *Colloq.*

billow cloud. *Meteor.* A long narrow cloud or, usually, a series of such clouds roughly parallel to each other, caused by the flow of one layer of air over another, thereby producing waves at their interface, the relatively cold crests of which, when the humidity is just right, are cloud-capped and their relatively warm troughs clear.

bi-mo'tored (bī-mō'tĕrd), *a.* [*bi-* + *motor.*] Equipped with two distinct motors, as some airplanes (**bi-mo'tors**).

bind'er*, *n.* = BINDING RECEIPT, below.

binding receipt. *Life Insurance.* A receipt given to an applicant for life insurance when he signs the application and pays his first premium, stipulating that the insurance shall go into effect immediately upon the fulfillment of certain conditions dependent upon the acceptability of the risk, but irrespective of the date of delivery of the policy, and providing for the return of the money paid if the risk is declined; — called also *binder* and *conditional receipt*

Bi'net' age (bē'nĕ'). The age of a normal child to whose intellectual power the intellectual power of an (older) abnormal person corresponds. Thus, an abnormal person 20 years old may have a *Binet age* of eight. Cf. BINET TEST, below, and MORON, below.

Bi'net' (bē'nĕ'), *or* **Bi'net'—Si'mon'** (bē'nĕ'-sē'môN'), **test.** [After Alfred *Binet* (1857–1911) and Théodore *Simon* (1873–), French psychologists.] *Educational Psychol.* A series of graded questions and tasks designed to test the relative intellectual power of children up to the age of twelve. A revised form has also questions for children up to fifteen and for adults.

bin'gle (bĭŋ'gl), *n. Baseball.* A sharp hit; generally, a base hit. *Slang or Cant.*

bi-og'ra-phee' (bī-ŏg'rȧ-fē'), *n.* [See -EE.] The subject of a biography.

bi'o-type (bī'ō-tīp), *n.* [*bio-* + *-type.*] *Biol.* = GENOTYPE, **b**, below. — **bi'o-typ'ic** (-tĭp'ĭk), *a.*

Bi-pa'li-um (bī-pā'lĭ-ŭm), *n.* [NL., fr. L., double mattock.] *Zoöl.* A genus of terrestrial flatworms of the group *Tricladida*, found in tropical countries and containing species of large size.

bi'pa-ren'tal (bī'pȧ-rĕn'tȧl), *a.* [*bi-* + *parental*] Pertaining to or derived from both parents.

bipp (bĭp), *n.* [Formed from the initials of the components + *p* for *paste*] *Med.* An antiseptic dressing for wounds, consisting of bismuth (one part by weight), iodoform (2 parts by weight), and liquid paraffin (sufficient to make a thick paste); hence, bismuth-iodoform-paraffin paste.

bird'ie*, *n.* [See BIRD, 5; 2d -Y.] *Golf.* A score of one stroke less than par on a hole. *Slang or Cant.*

bird'man (bûrd'mȧn), *n.* An airman. *Colloq.*

bird'wom'an (-wo͝om'ȧn), *n.* An aviatress. *Colloq.*

birth control. Control or limitation of the number of children born, esp. by preventing, or lessening the frequency of, impregnation, as by the use of contraceptives.

bis'mut-o-pla'gi-o-nite (bĭz'mŭt-ō-plā'jĭ-ō-nīt; bĭs'-), *n* [*bismuto-* + *plagionite.*] *Min.* A bluish lead-gray sulphide of lead and bismuth. Sp. gr., 5.35.

bit'ter—end'er, *n.* One who would hold out "to the bitter end"; one who will not compromise or yield anything of the program laid down by him or his party. — **bit'ter—end'er-ism** (-iz'm), *n. Both Colloq. or Slang.*

bitter pit. *Hort.* A nonparasitic disease of the apple, producing spots of dead brown tissue in the terminal branches of the vascular bundles of the fruit; — called also *fruit pit.*

Black and Tan. A recruit of the Royal Irish Constabulary, enlisted in England for service in Ireland during the disturbances of 1919–21; — so called because such recruits often wore the khaki uniform of soldiers with a black hat and arm band. *Colloq.*

black canker*. A destructive disease of the chestnut in Europe characterized by a black exudate on the tree trunk. It is attributed to several species of fungi which attack and destroy the cambium; — called also *ink disease.*

black'heart'*, *n. Agric.* A condition of potatoes characterized by blackened areas within the tubers due to the breaking down of the tissue. It is nonparasitic and is attributed to temperature and ventilation conditions during shipment and storage.

Black Hundred *or* **Hundreds.** The party consisting of the reactionary supporters of czarism in the former Russian Empire, who aimed at the extermination or complete subjugation of the Liberals and Radicals They were organized under the name of "the Union of the Russian People," but the name "Black Band" (Russ. *chernaya sotnia*) or "Black Hundred(s)" was applied to them by the people, because of the cruel, unscrupulous acts ascribed to them.

black'leg'*, *n. Agric.* **a** A destructive disease of cabbage and other plants of the family Brassicaceæ caused by the parasitic fungus *Phoma lingam*, producing a girdling of the stems at the surface of the soil. **b** A disease of potato plants caused by *Bacillus phytophthorus.*

black Maria*. A gun shell the bursting charge of which is an explosive, such as trinitrotoluene, which does not contain within itself enough oxygen for complete combustion, so that on bursting it emits great volumes of dense smoke; — called also *coal box* and *Jack Johnson.* *Slang.*

black scab, black wart. *Agric.* = WART DISEASE, below.

black shirt. One of the Italian Fascisti, of whose uniform the black shirt is the distinctive part. — **black'shirt'ed**, *a.*

black stem rust. *Agric.* A form of wheat rust distinguished by black lines formed on the stem of the cereal or grass by the teliospores of the fungus. See WHEAT RUST, in the *Dictionary.*

black'strap'*, *n.* The final mother liquor remaining after the crystallization of sugar from the juice of the sugar cane or sugar beet; also, a product of similar composition and appearance got in the refining of raw sugar. See MOLASSES, *n.*, 1, in the *Dictionary.*

blank'ite (blăŋk'īt; -ĭt), *n.* Also **blank'it.** An unstable salt, sodium hyposulphite or hydrosulphite, $Na_2S_2O_4$, used as a bleaching agent, esp. in the sugar industry.

☞ *Blankit* is a trade-mark name.

blast roasting. *Metal.* The process of roasting finely divided ores by means of a blast maintaining internal combustion in the charge, as in desulphurizing ores of lead, copper, etc. There are several patented processes, as: The **Huntington and Heberlein process**, in which the ore is roasted in pots, with the addition of calcium oxide (whence the names *pot roasting* and *lime roasting*); the **Savelsberg process**, which also is a pot roasting, applied to ores containing calcium carbonate; and the **Dwight and Lloyd process**, in which the blast is forced downward through the charge, to avoid agitation of the particles (which would hinder their sintering) or loss by volatilization and flue dust.

Blau gas (blou). [After Hermann *Blau*, German chemist.] An improved form of *Pintsch gas* (which see, in the *Dict.*) supplied in liquid form in steel cylinders under pressure, and used for lighting, heating, and, in combination with oxygen, for cutting steel, as plates or beams.

B. L. E. *Abbr.* Brotherhood of Locomotive Engineers.

‖ **bles'sé'** (blĕ'sā'), *n.* [F.] A man who has been wounded.

blight'er* (blīt'ẽr), *n.* One that is regarded with hatred, disdain, or contempt; a scamp; rascal; blackguard *Slang.*

blight'y (blīt'ĭ), *n.* [Hind. *wilāyat* (foreign) country, England; cf. *wilāyatī, bilātī*, European, English; fr. Ar. *wilāyat* province, country.] **a** England; home. **b** Something that will take one home or away from the front, as a wound or a furlough; as, to get one's *blighty.* **c** One who has returned to England or his home, as on account of a wound. — *adv.* To England. — *a.* English; as a *blighty* doctor; that makes necessary or possible a return to England, or home; as, a *blighty* wound. *All British Slang.*

blimp (blĭmp), *n.* A small nonrigid airship driven by an engine installed in an airplane fuselage slung beneath the gas bag. *Cant or Slang.*

bli'my (blī'mĭ), *interj.* Short for *Gawblimy*, that is, God blind me, used as a petty oath. *Brit*

blind pig. A blind tiger. — **blind'—pig'ger**, *n.* — **blind—pig'ging**, *n. All Local Slang, U. S.*

blister canker. *Hort.* A disease of the apple tree caused by the parasitic fungus *Nummularia discreta*, producing roughened and blackened canker areas on the trunk and larger limbs.

blister rust. = WHITE-PINE BLISTER RUST, below.

‖ **bloc** (blŏk), *n* [F., block, lump Cf. EN BLOC.] *Politics.* In European countries, esp. France and Italy, a combination of two or more groups or parties willing to make common cause for some definite object In the United States, a combination of members of different parties for a similar purpose, esp. in Congress, as the agricultural, or farm, *bloc*, formed in 1921, in which the members from the agricultural States of the Middle West and South sought to agree upon a plan of action in regard to agricultural legislation, irrespective of party lines and sectional influences

block'ing*, *n. Psychol.* Inhibition of psychical expression from internal countertendencies.

blocking condenser. = STOPPING CONDENSER, below.

blood line. *Biol.* A particular character transmitted through several generations of animals or plants.

blood pressure. *Physiol.* The pressure or tension of the blood on the walls of the blood vessels, which varies in amount or degree according to age and physical condition.

blos'som—end' rot. *Hort.* A disease of certain fruits which produces a rotting at the blossom end of the fruit, attributed in the tomato to physiological disturbances within the plant, and associated in the watermelon with several species of fungi, as *Diplodia, Pythium*, etc.

blow*, *v. i. Elec.* To melt; — said of a fuse.

blow'—out'*, *n.* The bursting of a pneumatic tire, as of an automobile, from pressure of the contained air on a spot weakened as by wear or a previous puncture; also, the hole in the tire so made.

Blue Cross. **a** A branch, founded in 1912, of an English society, "Our Dumb Friends' League," for the succor of horses and dogs. It was active in the Balkan Wars (1912–13) and in the World War. **b** A society (**American Blue Cross Society**) formed in the United States in 1914 to further the humane treatment of animals.

blue'—cross' shell. A type of gas shell used by the Germans in the World War, which liberated a poisonous and sternutative smoke (**blue-cross gas**); — so called from its marking. It generally contained a solid or oily chemical compound called *diphenylchlorarsine*, $(C_6H_5)_2AsCl$.

blue'—sky' law. A law enacted to provide for the regulation and supervision of the sale of stocks, bonds, or other securities, so as to protect the public against such as are obviously unsound, or that do not meet certain standards; — so called in allusion to a remark of the proposer of the first blue-sky law in Kansas (1911) that some companies sought to "capitalize the blue skies." *Colloq.*

blue'top' (blōō'tŏp'), *n.* Any of various pasture and forage grasses of the genus *Calamagrostis. Northwestern U. S.*

blurb (blûrb), *n.* A brief summary or laudatory estimate of a book, issued as an announcement and also, often, printed on the jacket; also, a similar editorial summary introducing a magazine story; — a coined word. *Slang or Cant.*

Board of Trade unit (B. O. T. unit). See *Miscellaneous Units*, under UNIT, in the *Dict.*

boat seaplane. A form of seaplane having for its central portion a boat which provides flotation in addition to serving as a fuselage; a flying boat. It is often provided with auxiliary floats or pontoons.

bob'tail'*, *v. t* To expel, or discharge with dishonor, from the army. *Soldiers' Slang.*

bob'tail'*, *n., or* **bob'tail' dis-charge'.** A dishonorable discharge from the army. *Soldiers' Slang.*

‖ **Boche,** *or* **boche** (bŏsh), *n.* [F., slang, prob. shortened fr. F. *caboche* head, and hence a hard-headed or thick-headed man, a stupid man.] A German. *Slang.*

bod'y*, *n. Aeronautics.* In an aircraft, a more or less elongated, and now usually inclosed, streamline structure containing the accommodations for pilot and passengers and, usually, the power equipment, fuel supply, etc. A body may have the form of a fuselage or a nacelle.

Bohr theory (bōr). *Physics.* An atomic theory, comprising a model for the hydrogen atom, a formula for the emission of radiation, and a hypothesis for the orbits of electrons, — so called from its proposer, Niels Bohr.

bo'hunk (bō'hŭŋk), *n.* [*Bohemian* + *Hungarian.*] *Slang, U. S.* **a** A laborer, usually unskilled, as from the former monarchy of Austria-Hungary; a Czech, a Slovak, a Magyar, or a Croatian. **b** Czech, Slovak, Croatian, or Magyar speech; as, to jabber *Bohunk.*

bo-liv'i-a (bō-lĭv'ĭ-ȧ), *n.* A woolen fabric, of medium to heavy weight, having a soft silky finish, used esp. for women's and children's coats and wraps.

Bol'she-vik' *or, often,* **bol'she-vik'** (bŏl'shĕ-vĕk'), *n.; pl.* BOLSHEVIKI, BOL- (bŏl'shĕ-vē-kē'; *com., in English,* bŏl'shĕ-vē'kĕ), -SHEVIKS (-vĕks'). [Russ. *bolshe*, the larger; — because the Bolsheviki orig. were the majority group of the party.] **a** In Russian politics, a member or adherent of the radical wing (the **Bolsheviki**) of the Social Democratic party (which see, below). The Bolsheviki favored an immediate effort to prepare for the full introduction of the Marxian Socialist program, using for this purpose a "dictatorship of the proletariat." After inaugurating this program they formed the Third International (see INTERNATIONAL, below). The Bolsheviki now call their party (since 1918) the *Communist party.* **b** Hence, often, any radical socialist or political upheavalist, esp. one who believes in the overthrow of the institution of private property (capitalism) by force, and the establishment of the "dictatorship of the proletariat." — **-vik'ism** (-vĕk'ĭz'm), *n*

Bol'she-vik' *or, often,* **bol'she-vik'**, *a.* Bolshevist.

Bol'she-vi-ki' *or, often,* **bol'she-vi-ki'** (bŏl'shĕ-vē-kē'; *com., in English,* bŏl'shĕ-vē'kĕ), *n. pl.* See BOLSHEVIK, *n.*, above.

Bol'she-vism *or, often,* **bol'she-vism** (bŏl'shĕ-vĭz'm), *n.* Doctrines, tactics, or practices of, or like those of, the Bolsheviki; Bolshevistic form of government.

Bol'she-vist *or, often,* **bol'she-vist** (-vĭst), *n.* A member, adherent, or follower of the Bolshevik party.

Bol'she-vist, Bol'she-vis'tic (-vĭs'tĭk) *or, often,* **bol'-**, *a* Of or pertaining to the Bolsheviki or Bolshevism; advocating or favoring Bolshevism. — **-vis'ti-cal-ly**, *adv.*

Bol'she-vize *or, often,* **bol'she-vize** (bŏl'shĕ-vīz), *v. t;* -VIZED (-vīzd); -VIZ'ING. To make Bolshevist in character, form, or principle; to change, as a state, to a Bolshevistic, or communistic, form of government or control. — **-vi-za'tion** (-vĭ-zā'shŭn; -vĭ-), *n.*

Bol'she-vy, *or* **bol'she-vy** (bŏl'shĕ-vĭ), *n.* Bolshevism; the Bolshevist world. *London Times.*

bomb*, *v. t.* To drop bombs upon, as from an aircraft.

bom-bard'*, *v. t Physics.* To subject (a body) to the impingement of small particles or rays; also, to cause (small particles or rays) to impinge upon.

bomb calorimeter. A special form of calorimeter of rugged construction designed to measure heat of combustion, as of coal or coke. See BOMB, 6, in the *Dict.*

bomb'er (bŏm'ẽr), *n.* One that throws bombs; an airplane or other aircraft used for bombing.

bombing machine, bombing plane, *or* **bomb plane.** An airplane used in bombing; a bomber.

bomb thrower*. *Mil* A device for throwing a bomb, as a howitzer or a kind of catapult. Cf. CATAPULT, *n.*, **a**, below.

bone'head' (bōn'hĕd'), *n.* [*bone* + *head*] One who thinks as ineptly as if his head were "solid bone"; a stupid dolt — **bone'head'ed**, *a. Both Slang.*

bon'go (bŏŋ'gō), *n; pl.* BONGOS (-gōz). Either of two large antelopes (*Boocercus eurycerus* of West Africa, and *B. isaaci* of East Africa) of a reddish or chestnut-brown color with narrow white stripes. Their flesh is esteemed as food.

bon'naz' (bŏ'nȧz'), *n.* A kind of embroidery made with a complicated sewing machine said to have been invented by a Frenchman named *Bonnaz.*

bon'net*, *n.* The appliance, having the form of a parasol, which protects the valve of a spherical balloon against rain.

bon'zer (bŏn'zẽr), *a.* Excellent; exceptionally good; — said to be a corruption of *bonanza. Australian Slang.*

booby trap. A device to catch boobies, or dunces; specif., in the World War, any of the many traps or stratagems prepared by the Germans to take the soldiers of the Allies unawares, as by attaching a wire to some small object, which when picked up sets off a bomb, etc. *Slang*

boost'er*, *n.* One who promotes or advances the interests of someone, or something, as a cause, place, or enterprise, with enthusiasm and determination; — sometimes used in a derogatory sense. *Slang.*

booster battery. *Radio.* A battery used to maintain a certain voltage across a crystal detector. This voltage increases the sensitivity of the detector by adjusting conditions for increased response for a given input.

boot'leg'*, *v. i. & t.* **a** To transport or sell alcoholic liquor in prohibited territory. **b** To transport or sell anything illicitly, as uninspected milk. **c** To transport, esp. to import, illegally; as, to *bootleg* aliens into the country. — **boot'leg'ger***, *n.*

bor'ing*, *p. pr & vb n.* of BORE. — **boring from within,** act or practice of undermining the membership or policies of a party, organization, or the like, by placing agents inside the ranks to spread hostile propaganda through personal contact with coworkers. *Cant or Colloq.*

Bosche, *or* **bosche** (bŏsh), *n.* Var. of BOCHE.

bos'ton*, *n.* A form of waltz characterized by a rise on the ball of the foot and a descent during the same beat.

bottom drawer. See HOPE CHEST, below.

bot'u-lism*, *n. Med.* A form of food poisoning, due to the presence of *Bacillus botulinus*, first recognized in poisoning from spoiled sausage, but now known to occur from eating other kinds of food, as canned meat, vegetables, or fruit, which have become infected with the bacillus.

Bou'guer's' ha'lo (bōō'gāz'). [After Pierre *Bouguer*, French mathematician.] *Meteor.* A faint white halo about 32° minimum radius around the antisolar point.

bou'le-vard*, *n.* In some American cities, an avenue for pleasure vehicles only; often, one on which all vehicles have legal right of way at crossings over vehicles traveling on intersecting streets. Cf. THROUGH STREET, below.

Bour'don' tube (bōōr'dôn'). A curved thin-walled tube, oval in cross section and closed at one end, that tends to straighten out with increase of internal pressure. It is the essential element of the Bourdon gauge (see, in the *Dict.*).

‖ **bour'geois'*** (bōōr'zhwâ'), *n. masc.* } *Collective pl.* **bour-**
‖ **bour'geoise'*** (-zhwâz'), *n. fem.* } **GEOIS.** Among radical socialists, as the Bolsheviki, a person who has private property interests, as in real estate, factories, business establishments, etc., and is, therefore, supposedly favorable to capitalism and antagonistic to the proletariat. — *a.* Pert. to, or characteristic of, bourgeois collectively.

bour'geoi'sie'* (-zhwa'zē'), *n.* Bourgeois collectively, or as a class.

Bow'er–Barff' proc'ess (bou'ĕr-barf'). *Metal.* A process for producing upon articles of iron or steel an adhering coating of the magnetic oxide of iron (which is not liable to corrosion by air, moisture, or ordinary acids).

bow stiffener (bou). *Aëronautics.* One of the rigid members attached to the bow of a nonrigid or semirigid envelope of an airship to reënforce it against pressure caused by the motion of the ship; — called also *nose stiffener.*

box ball. [A trade name.] A bowling game played with five pins that can be reset by the players by pulling a lever. The balls pass into a box at the farther end of the alley, and are returned by means of gravity to the players' end.

box tail. *Aëronautics.* In a flying machine, a tail or rudder, usually fixed, resembling a box kite.

boy scout. Orig., a member of the "Boy Scouts," an organization of boys, founded in England in 1908, by Sir R. S. S. Baden-Powell, to promote good citizenship by creating in them a spirit of civic duty and of usefulness to others, by stimulating their interest in wholesome mental, moral, industrial, and physical activities, etc. Hence, a member of any of the other similar organizations, now world-wide. In "The Boy Scouts of America" (incorporated Feb. 8, 1910), which may be taken as typical, the local councils are generally under a *scout executive*, its chief administrative officer, and a *scout commissioner*, the ranking commissioned volunteer officer, under whose supervision are *scoutmasters*, each in charge of a *troop* of three or more *patrols* of eight scouts each, who are of three classes, *tenderfoot, second-class scout,* and *first-class scout.*

B. P. O. E. *Abbr.* Benevolent and Protective Order of Elks See ELK, *n.*, 2, below.

bra'chysm (brā'kĭz'm; brāk'ĭz'm), *n.* [*brachy-* + *-ism*] A dwarfing in plants that is characterized by a shortening of the internodes only.

bra-chyt'ic (brā-kĭt'ĭk), *a.* Dwarfed from brachysm.

Brad'bur-y (brăd'bĕr-ĭ), *n.* An English treasury note bearing the signature of John Bradbury (Sir John Swanwick Bradbury (1872–), secretary to His Majesty's Treasury from 1913. Cf. FISHER, below. *Slang, Eng.*

brass hat. A general or staff officer; — from the ornamental gold braid on the cap. *Brit. Soldiers' Slang.*

‖ **bras'sière'** (brä'syâr'), *n.* [F.] A form of woman's stiffened underwaist, worn to support the breasts.

braz'i-lette' (brăz'ĭ-lĕt'), *n.* The heartwood of a certain leguminous tree of tropical America (*Hæmatoxylon brasiletto*), which yields brasilin. See BRAZILWOOD, in the *Dict.*

bread line. A line of persons waiting to receive bread (or other food) given as charity.

break'–in' (brāk'ĭn'), *a. Radio.* Of or pertaining to a system or arrangement in which an automatic device permits the transmitting operator to receive incoming signals in the intervals between his own transmitted signals.

bri'dle* (brī'd'l), *n. Aëronautics.* A sling of cordage which has its ends attached to the envelope of a captive balloon or airship, or to a preceding bridle, and to an intermediate point of which a rope or cable is attached which may hang loose or run to any desired place.

Brill's disease (brĭlz). [After Dr. Nathan Edwin *Brill* (1860–), Am. physician.] *Med.* An acute infectious disease, now considered to be a mild form of typhus.

Bri-nell' ma-chine' (brĭ-nĕl'). [After J. A. *Brinell* (1849–), Swedish engineer, who devised it.] A device for measuring the hardness of metals, in which a steel ball of standard size (usually 10 millimeters in diameter) is pressed with a standard pressure (usually 3000 kilograms) into the specimen under test, the hardness or resistance to penetration **(Brinell hardness)** being expressed by a number **(Brinell number)** denoting the applied pressure in kilograms divided by the spherical area of indentation in square millimeters.

‖ **bri'sance'** (brē'zäns'), *n.* [From F. *brisant*, p. pr. of *briser* to break.] The shattering effect shown by such explosives as nitroglycerin and guncotton. A high velocity of explosion is a necessary condition, but other factors also seem involved in its production.

‖ **bri'sant'** (brē'zän'), *a.* [F.] Causing brisance.

Brix scale (brĭks). [After A. F. W. *Brix* (1798–1890).] An arbitrary hydrometer scale for expressing the specific gravity of liquids, according to the formula, specific gravity = $\frac{400}{400-n}$ at 15.6° centigrade, wherein *n* represents the reading on the scale.

broad'cast'*, *v. t.; pret. & p. p.* BROAD'CAST', *also* **-CAST'ED;** *p. pr. & vb. n.* **-CAST'ING.** *Radio.* To send out from a radio transmitting station information, lectures, music, or messages of any kind by radiotelegraph or radiotelephone, for the benefit of an unlimited number of receiving stations. — **broad'cast',** *n.* — **broad'cast'er,** *n.*

☞ The form *broadcasted* for the preterit and past participle, though illogical on the analogy of *cast*, is common.

broad'tail' (brŏd'tāl'), *n.* **a** Any of certain Asiatic sheep, the young of which are known in the fur trade as "Persian lambs." Cf. PERSIAN LAMB, below. **b** *Furriery.* The skin, or pelt, of very young lambs of the broadtail sheep, killed before the black curly wool, which resembles fur, has had time to develop beyond the flat wavy state when its appearance suggests moiré silk.

broad waves. *Radio.* Waves produced by a transmitting set which are of high decrement. Cf. SHARP WAVES, below.

Brock'en bow (brŏk'ĕn bō). = BROCKEN SPECTER, in *Dict.*

bro'mide* (brō'mīd; -mĭd), *n.* A person who is conventional and commonplace in thought and conversation; — referring to the sedative effect of medicinal bromides. *Gelett Burgess. Slang.* — **bro-mid'ic** (brō-mĭd'ĭk), *a.*

bro-mid'i-om (brō-mĭd'ĭ-ŭm), *n.* [*bromide* + *idiom.*] A trite, banal saying, characteristic of bromides. *Slang.*

brough'am* (brōō'ŭm; brōōm; brō'ŭm), *n. Automobiles.* **a** An electric automobile having a closed body like that of a coupé, but usually somewhat larger, with accommodations for four or five passengers. See AUTOMOBILE, *Illust.*, in the *Dictionary.* **b** A gasoline-driven automobile having a body like that of a limousine, but without a roof over the driver's seat. See AUTOMOBILE, *Illust.*, in the *Dict.*

brown heart. *Hort.* = BITTER PIT, above.

Brown'ing (broun'ĭng; *n.* [After John M. *Browning* (1855–), Am. inventor.] Short for BROWNING PISTOL, an automatic pistol of modern type; also, for BROWNING AUTOMATIC RIFLE and BROWNING MACHINE GUN.

Browning automatic machine rifle. A gas-operated gun firing small-arms ammunition on the automatic principle. In construction it is identical with the Browning automatic rifle, except that a tripod barrel rest is provided, and the barrel itself is of the radiator type to facilitate cooling.

Browning automatic rifle. [See BROWNING, above.] A gas-operated, air-cooled, portable automatic machine rifle fed from a magazine so placed that cartridges are pressed upward into the chamber and firing normally 200 to 350 rounds a minute. It is similar in principle to the Lewis automatic rifle (which see, below), but has additional mechanism for taking up the recoil when fired.

Browning machine gun. [See BROWNING, above.] An automatic machine gun fed from a web belt containing 250 cartridges of .30 caliber, operated by recoil action, and capable of firing more than 500 shots a minute, the barrel being cooled by a water jacket. The gun weighs 34½ pounds and is mounted on a tripod, the stability of its mount permitting indirect, overhead, and barrage fire.

brown ring. *Agric.* A disease of the potato, one type of which is caused by *Bacillus solanacearum*, characterized by a browning of the fibrovascular bundles within the tuber.

brunch (brŭnch), *n.* [*breakfast* + *lunch.*] A meal taken between breakfast time and lunch time and taking the place of breakfast and lunch. *Eng. Univ. Slang.*

buck'a-roo' (bŭk'ä-rōō'; bŭk'ä-rōō'), *n.* Also **buck-ay'ro** (bŭk-ä'rō), **buck'er-oo'** (bŭk'ĕr-ōō'; bŭk'ĕr-ōō'). [Prob. corrupt. of Am. Span. *vaquero* cowboy.] A bronchobuster; a cowboy. *Western U. S. and Canada.*

buck'brush' (bŭk'brŭsh'), *n. Bot.* Any of various species of shrubby plants, as *Ceanothus velutinus, C. sanguineus,* and *Kunzia tridentata*, that furnish browse for sheep, deer, etc. *Western U. S.*

bud'dy (bŭd'ĭ), *n.; pl.* **-DIES** (-ĭz). [Prob. a dimin. of *brother.*] *Colloq., U. S.* **a** Brother; little boy. **b** Companion; mate; pal; also, a soldier of the United States.

bug*, *n. Elec.* Any fault in the connections or trouble in the working of electrical apparatus. *Cant.*

bulb*, *n. Radio.* = ELECTRON TUBE, below. *Cant.*

bulge*, *n. Naval.* A semicylindrical compartment, built on the outer hull of a vessel between the water line and bottom plating and extending over the length of the vital portions of the ship, designed to receive the shock of explosion of torpedoes and mines and thus protect the ship.

Bull Moose. *U. S. Politics.* **a** *[often l. c.]* A follower of Theodore Roosevelt in the presidential campaign of 1912; — a sense said to have originated from a remark made by Roosevelt, on a certain occasion, that he felt "like a bull moose." *Cant.* **b** The figure of a bull moose used as the party symbol of the Progressive party in the presidential campaign of 1912; hence, **Bull Moose party,** the Progressive party. *Cant.* — **Bull Moos'er** (mōōs'ĕr). *Cant.*

bull's'-eye'*, *n.* One of the small rings of wood, metal, etc., forming part of a balloon rigging and used for the connection or adjustment of ropes.

bun'dook (bŭn'dōōk), *n.* [Hind. *bandūk.*] A rifle; musket; — Brit. soldiers' adaptation of the Hindustani term.

bun'ga-low'*, *n. Arch.* A more or less solidly constructed house for permanent residence, generally of one story, but sometimes of a story and a half, preserving only the low, sweeping exterior lines and wide veranda (generally on the front only) of the bungalow of India. *U. S. and Canada.*

bunk (bŭnk), *n.* [Short for BUNCOMBE or BUNKO.] False, misleading, or empty speech; buncombe; humbug; bunko. — *v. t.* To humbug with "bunk." *Both Slang.*

bunny hug. *Dancing.* See TURKEYTROT, below.

buoy'an-cy*, *n. Aëronautics.* The upward force exerted on a lighter-than-air craft due to the air which it displaces. A balloon or airship is said to have *positive buoyancy* when the buoyancy is greater than the weight of the balloon or airship, and *negative buoyancy* if it is less.

burble point. *Aëronautics.* In the case of an airplane in flight, the angle of attack at which the value of the lift decreases both when the angle decreases and when it is increased. The burble point marks a change in the nature of the flow of air, which becomes turbulent.

Burgundy mixture. *Hort.* A mixture of copper sulphate, sal soda, and water, used as a fungicide.

Bur'ley, *or* **bur'ley** (bûr'lĭ), *n.* [Prob. from the proper name *Burley.*] A kind of fine-fibered tobacco, generally very light colored when cured, grown especially in Kentucky but also in neighboring States, and valued particularly for plug chewing tobaccos.

bur'ro weed (bŏor'ō; bŭr'ō). A weed (*Dondia moquini*), of the goosefoot family, growing on alkaline lands in the southwestern United States.

bus*, *n.* **a** An automobile. *Slang.* **b** An airplane. *Slang.*

bus boy, *or* **bus,** *n.* A waiter's assistant; an omnibus (see OMNIBUS, *n.*, 4, in the *Dictionary*); in cafeterias or self-service restaurants, a boy or man who clears up after patrons as they finish, carrying out the soiled dishes, etc. — **bus girl.** *All Cant or Slang, U. S.*

bush league. A minor league of professional or semiprofessional baseball teams. — **bush leaguer.** *Both Slang.*

bust*, *n. Moving Pictures.* A very close view of some object, as a ring, a watch, or a pocketbook, or of a person, necessary to the understanding of the picture or to emphasize some point. It differs from CLOSE-UP (below) in not being intended to show action or facial expression. *Cant.*

bust*, *v. t. & i.* To degrade or reduce from rank, as an officer or noncommissioned officer; break; to fail or cause to fail. *Slang, U. S.*

butt*, *v. i.* — **to butt in,** to thrust one's self upon others; to intrude. *Slang, U. S.*

button stick. A strip of brass, about ten inches long, slotted in such a way that it will pass over a row of buttons, as on a soldier's blouse or jacket, allowing each button to appear through an opening in the device so that it may be polished without soiling the cloth.

B. W. I. *Abbr.* British West Indies.

by'—pass' con-dens'er. *Elec.* A condenser providing a path for alternating current around some part of a circuit through which the current cannot readily pass.

‖ **ca'bane'** (kä'bän'), *n.* [F.] *Aëronautics.* A pyramidal or prismoidal framework, for supporting the wings of an airplane at the fuselage; also, the system of trussing for supporting overhang in a wing.

cab'a-ret'* (*in this sense pron. com.* kăb'ä-rā'), *n.* In the United States, a café or restaurant where the guests are entertained by performers who dance or sing on the floor between the tables, after the practice of certain French taverns; hence, an entertainment of this nature.

cab'ri-o-let'* (kăb'rĭ-ō-lā'), *n.* An automobile somewhat resembling a coupé in appearance and capacity, having a folding top and glass windows in the doors. See AUTOMOBILE, *Illust.*, in the *Dictionary.*

ca' can'ny (kä, *or* kô, kăn'ĭ). [See CALL, *v. i.*, 4, in *Dict.*] A deliberate slowing down of production by workingmen. *Labor Cant, chiefly British.*

cack (kăk), *n.* An infant's heelless shoe with a sole-leather bottom. *Cant.*

cad'die, cad'dy (kăd'ĭ), *v. i.;* **CAD'DIED** (-ĭd); **CAD'DY-ING.** To serve as a caddie.

Ca-det' (kä-dĕt'), *n.* [Russ. *Kadet*, pl. *Kadeti*, fr. *K. Dti*, that is, K. D.'s, abbr. of *Konstitutsionalnyie Demokrati* Constitutional Democrats.] In Russian politics, a member of the former Constitutional Democratic party.

caf'e-te'ri-a (kăf'ĕ-tē'rĭ-ä), *n.* [Amer. Sp. *cafeteria* coffee shop; cf. F. *cafetière.*] A restaurant or café at which the patrons serve themselves from, or are served at, a counter, taking the food to tables to eat. *U. S.*

cage antenna. *Radio.* An antenna whose conductor consists of parallel wires, stretched between two hoops, and arranged as elements of the curved surface of a cylinder.

cal-cim'e-ter (kăl-sĭm'ĕ-tĕr), *n.* [L. *calx, calcis*, lime + *-meter.*] *Chem.* An instrument for liberating and measuring the carbon dioxide in limestone, soil, or the like, and also for estimating the amount of lime in soils.

calcium cyanamide. Also **-id.** *Chem.* A compound, $CaCN_2$, obtained in impure, cokelike form by passing dry nitrogen over calcium carbide at 1200° C. (2190° F.) and used as a fertilizer and as a source of other nitrogen compounds. The commercial product is called also *lime nitrogen* and *nitrolim.*

cal'i-brate*, *v. t.* **a** To standardize. **b** *Gunnery.* To adjust the powder charge and sights of a battery of guns by the data obtained from actual firing, so that for a given range, as indicated on the sights, all projectiles fired from that battery will strike at the same distance.

cal'o-rie*, *n. Dietetics.* The large, or great, calorie (see CALORIE **b**, in the *Dict.*) used as a unit in expressing the heat-producing or energy-producing value of food; also, a quantity of food capable of producing an amount of heat or energy equivalent to one such unit.

cal'o-rite (kăl'ō-rīt), *n.* [L *calor.* heat.] *Metal.* An alloy of nickel, iron, and chromium which resists oxidation at high temperatures, bearing the trade-mark *Calorite.* It is used esp. for the wiring in electrical-resistance heating units.

cal'o-rize (kăl'ō-rīz), *v. t.* [L. *calor* heat + *-ize.*] *Metal.* To treat by a process for coating metal (usually iron or steel) with aluminium. The metal is heated in a reducing atmosphere in a closed retort which is filled with a mixture containing finely divided aluminium. The aluminium alloys with the metal, penetrating to a depth dependent on the time of treatment. When calorized metal is exposed to high temperatures a film of aluminium oxide forms on the surface, protecting the metal from further oxidation under the action of heat. Cf. SHERARDIZE, in the *Dict.*

ca'ma-chi'le (kə'mä-chē'lā) } *n. Bot.* A certain Mexican
ca'man-chi'le (kä'măn-) } leguminous tree (*Pithecolobium dulce*) having edible pods and a bark rich in tannin, now growing in abundance in the Philippines.

cam'ber*, *n.* The convexity or rise of the curve of an airfoil from its chord; — usually expressed as the ratio of the maximum departure of the curve from the chord to the length of the chord. *Top camber* is the camber of the top surface of an airfoil; *bottom camber*, the camber of the bottom surface; *mean camber* is the mean of these two.

cam'er-a-man' (kăm'ĕr-ä-măn'), *n.* A man who operates a camera, esp. an expert, as in taking moving pictures.

ca'mias (ka'myäs), *n.* [Philippine name.] *Bot.* A small tree, *Averrhoa bilimbi*, of tropical Asia, often cultivated for its oblong, greenish, acid fruits, which are used for pickles and preserves; — called also *bilimbi.*

‖ **ca'mion'** (kä'myôn'), *n.* [F.] **a** A kind of low wagon; dray. **b** A truck; motor truck.

cam'i-sole*, *n.* A kind of short chemise or corset cover.

cam'ou-flage' (kăm'ōō-flăzh'), *n.* [F., fr. *camoufler* to disguise.] *Mil.* The disguising of a camp, battery, arsenal, ship, etc., as by paint, screens, shrubbery, or the like, to reduce its visibility or conceal its actual nature or location from the enemy; also, the disguise so applied or utilized. Often used figuratively.

cam'ou-flage', *v. t.;* **-FLAGED'** (-flăzhd'); **-FLAG'ING** (-flăzh'ĭng). To disguise by camouflage. — **-flag'er** (-flăzh'ĕr), *n.*

‖ **ca'mou'fleur'** (kă'mōō'flûr'), *n.; pl.* -FLEURS. A person employed or skilled in the work of camouflage.

camp'craft' (kămp'krăft'), *n.* Skill and practice in whatever pertains to camping.

camp'—fire' girl. A member of "The Camp Fire Girls of America," an organization of girls between the ages of 12 and 20, corresponding to the boy-scout organizations, and having as its general aim to utilize the outdoor play impulse in the development of character and of the spirit of cooperation, and to invest home duties and occupations with a real and lively interest. The girls of each *Camp Fire*, or local branch or chapter, are immediately supervised by a regularly licensed *guardian of the fire*, and are of three ranks, or orders, *wood gatherer*, *fire maker*, and *torch-bearer*, advancement from one order to the (following) next higher being contingent upon the performance of certain useful tasks, and the attainment of honors in *health craft*, *home craft*, *nature lore*, *campcraft*, *handcraft*, *business*, and *patriotism*. The organization originated in 1911, and was incorporated in January, 1914.

camp robber. The Canada jay.

ca-na'di-um (kă-nā'dĭ-ŭm), *n.* [NL., fr. *Canada.*] *Chem.* A supposed new element found native as a soft white metal in a British Columbia mine.

ca-nard'* (kă-nard'; *F.* kà'nàr'), *n.* A type of pusher airplane having the elevator, rudder, etc., in front of the supporting planes instead of to the rear.

can'de-lil'la (kăn'dă-lēl'yă; 195), *n.* [Sp. *candelilla* little candle.] A euphorbiaceous shrub, *Pedilanthus pavonis*, of northern Mexico and adjacent regions, yielding a wax (**candelilla wax**) used for waxing floors, in making varnish, graphophone records, electrical insulation, etc. Also, any of certain other species of Euphorbia.

canned*, *p. a.* Recorded for reproduction by artificial, esp. mechanical, means, as on a phonograph; as, *canned* music; *canned* lectures. *Slang, U. S.*

ca-pac'i-tive (kă-păs'ĭ-tĭv), *a. Elec.* Of or pert. to (electric) capacity.— **capacitive coupling**, *Radio*, coupling by means of condensers;— sometimes restricted to the special case in which one condenser is common to the two circuits coupled.— **capacitive reactance**, *Radio*, the reactance due to capacity. Its value is proportional to the reciprocal of the product of frequency and capacity.

ca-pac'i-ty*, *n.* **1.** *Aëronautics.* The cubic contents or volume, under specified conditions, of the gas-containing portion of an aerostat.

2. *Elec.* **a** The ability of an electric circuit or part thereof to hold an electric charge in equilibrium during the application of voltage. It is estimated as the ratio of the electric quantity to the voltage. **b** A source of such capacity; as, an antenna functioning as a *capacity*.

capacity coupling. = CAPACITIVE COUPLING, above.

capacity reactance*. = CAPACITIVE REACTANCE, above.

cape*, *n.* Short for **capeskin**, a kind of leather orig. made of sheepskins from South Africa and given a glacé finish, but now from any sheepskins or goatskins similarly tanned and finished. Hence, **cape**, *a.*; as, *cape* gloves.

Cape Dutch. = AFRIKAANS, above.

capital levy. A levy on capital, either personal or industrial or both, in addition to income and other taxes, as to extinguish the war debt of a country, or to reduce it so that the interest on the remainder may be met by ordinary taxation. It amounts to a partial conscription of property.

capital ship. A warship of the first rank in point of size, armament, etc. For the purposes of the naval disarmament treaties of 1921–22, a capital ship was defined as "a vessel of war, not an aircraft carrier, whose displacement exceeds 10,000 tons standard displacement, or which carries a gun with a caliber exceeding eight inches."

Cap-no'di-um (kăp-nō'dĭ-ŭm), *n.* [NL., fr. Gr. *καπνώδης* smoky, dark (in color), fr. *καπνός* smoke.] *Bot.* A genus of ascomycetous fungi of the order Perisporiales, certain species of which produce sooty mold on the citrus, coffee, oak, olive, oleander, etc., proposed by Montagne. Recent investigators have referred many of the species, as *Meliola* and *Pleosphæria*, to other genera.

captive balloon. A balloon restrained from free flight by means of a cable attaching it to the earth.

‖ **Ca'ra-bi-nie're** (kă'rà-bē-nyĕ'rā), *n.; pl.* -BINIERI (-rē). [It., fr. F. *carabinier*. See CARBINE.] A member of the Italian military police.

ca'ra-cul' (kă'rà-kōōl'; *popularly*, kăr'ă-kŭl), *n.* Var. of KARAKUL, a kind of fur. See in the *Dictionary*.

car'ba-zine (kär'bà-zĭn; -zēn), *n.* Carbazide.

car'bo (kär'bō), *n.* [L. *carbo* coal.] A carbonaceous residue from petroleum distillation; oil-retort carbon.

carbonyl chloride*. Carbonyl chloride or phosgene was much used in the World War, both in cloud attacks and in shells and bombs. It is a severe respiratory irritant and its deadliness is increased by the fact that serious symptoms appear only after some hours following the exposure.

car'bu-re'tion (kär'bū-rĕsh'ŭn), *n.* The act or process of carbureting.

Car'gile treat'ment (kär'gĭl). [After Dr. Charles H. *Cargile* (1853–), Am. surgeon.] *Surg.* A method of treating surgical wounds in which the so-called **Cargile membrane**, made from the peritoneum of the ox, is used for packing and to prevent adhesions.

car'o-tin-oid (kăr'ō-tĭn-oid), *n.* [*carotin* + *-oid.*] *Physiol. Chem.* Any of a class of yellow and red pigments found in various plants and animals and related to carotin. — *a.* Resembling carotin; pertaining to the carotinoids.

‖ **Car'ran-zis'ta** (kär'răn-sēs'tà), *n.* [Sp.] A follower of Venustiano Carranza (1859–1920), president of Mexico from 1915 to 1920.

Car-rel'—Da'kin treat'ment (kă-rĕl'-dā'kĭn). [After Alexis *Carrel*, Am. surgeon, and Henry Drysdale *Dakin*, Eng. research chemist in Amer.] *Surg.* The Carrel treatment with Dakin's solution as irrigating medium.

Car-rel' treat'ment (kă-rĕl'). [After Alexis *Carrel*, Am. surgeon.] *Surg.* Intermittent deep irrigation of wounds after the latter are freed from all foreign matter.

Car-rel' tube. *Surg.* A combination of rubber tubes of small bore for the conveyance of antiseptic solution in disinfecting and irrigating wounds in the Carrel treatment.

car'riage*, *n.* *Aëronautics.* Undercarriage.

car'ri-er*, *n.* **1.** *Med.* A person who carries in his system and disseminates the microörganisms of a disease, as diphtheria or typhoid fever, to which he himself is immune; also, any animal or thing which similarly disseminates disease germs.

2. *Elec.* The wave, or current, or frequency transmitted in electrical communication. The amplitude (or frequency) of the wave or current is varied in accordance with the signal by the process of modulation. — *a. Elec.* Of or pertaining to a carrier; as, radio receiving apparatus is tuned to the *carrier* frequency.

carrier current. *Elec* Alternating current carrying a signal or communication over wires in the form of a modulation lower in frequency than the carrier.

carrier suppression. *Elec.* A method of signal transmission in which the power associated essentially with the carrier frequency is not transmitted.

car'ry*, *v. i.* — **to carry on***, to keep behaving or acting in a certain way (see under CARRY, *v. i.*, in the *Dictionary*), esp. to persevere unfalteringly in the line of duty.

car'ry-o'ver (kăr'ĭ-ō'vĕr), *n.* That part of a crop, as of grain, tobacco, or wool, which remains unconsumed when a new crop begins to be marketed.

car'tel*, *n.* **a** [G. *kartell.*] *Econ* Esp. in Germany and Austria, a form of agreement entered into by two or more business houses in order to regulate their business by fixing the output, apportioning the business among themselves, fixing prices, etc.; also, the houses or the businesses, collectively, associated under such an agreement. The *cartel* corresponds to the American *trust* and the British *syndicate*. **b** [F. *cartel*, from the Ger.] *Politics.* Esp. in France and Belgium, an agreement between syndical or political groups for common action.— **car'tel-ist**, *n.*

car'tel-ize (kär'tĕl-īz), *v. t.*; -IZED (-īzd); -IZ'ING (-īz'ĭng). To combine into a cartel; bring under the control of a cartel.— *v. i.* To combine in a cartel; form a cartel.— **car'tel-i-za'tion** (-ĭ-zā'shŭn; -ī-zā'shŭn), *n.*

Ca-sa'ba, *or* **Cas-sa'ba, mel'on** (kă-sa'bà). [From *Kassaba*, Smyrna, Asia Minor, whence the melon was introduced.] A type of winter muskmelon, with a yellow rind and sweetish, white, watery flesh.

cascade amplification. *Radio.* Multistage amplification; use of two or more electron tubes each amplifying the output of the preceding.

cas'ca-ron' (kàs'kà-rōn'), *n* [Sp. *cascarón*.] Lit., an eggshell; hence, an eggshell filled with confetti to be thrown by revelers at balls, carnivals, etc. *Western U. S.*

cas'ing* (kās'ĭng), *n.* The shoe, or outer covering, of a pneumatic tire.

cas'se-role*, *n.* A vessel of earthenware, porcelain, or the like, usually having a cover and a handle or a separable holder of metal, in which food may be baked and served.

cas'si-o-pe'ium (kăs'ĭ-ō-pē'yŭm), *n.* [NL., fr. *Cassiopeia.*] *Chem.* Lutecium;— Welsbach's name.

cat'a-comb*, *n.* *Radio.* An assemblage of portions of a radio receiving device, including such items as transformers and condensers, sealed in a metal box.

cat'a-lyst (kăt'à-lĭst), *n.* A catalytic agent.

Cat'—and—Mouse' Act. An act, called the "Prisoners' Temporary-Discharge-for-Ill-health Act," passed by the British Parliament in April, 1913, to provide for the temporary discharge of prisoners whose further detention in prison is undesirable on account of the condition of their health, and for their return upon the expiration of the period of discharge. The act was aimed esp. against the hunger strikes among the militant suffragettes. *Slang.*

cat'a-pult*, *n.* **a** Any of various mechanical devices utilizing the recoil of a spring drawn taut and suddenly released, for hurling grenades, bombs, or the like. **b** *Aëronautics.* A device, as a truck moved on a track by powerful springs, for launching an airplane from the deck of a ship.

cat'e-na-ry*, *n.* A catenary curve, or a suspended chain, wire, etc., having such a curve; specif., such a wire when used to support a trolley wire at uniform height by means of hangers of various lengths.

cat'er-pil'lar*, *n., or, more fully,* **caterpillar tractor.** A tractor, bearing the trade-mark *Caterpillar*, made especially for use on very rough ground, which travels upon two endless belts, one on each side of the machine, kept in motion by cogged driving wheels so that the tractor moves forward with the revolution of the belts.

ca-thar'sis* (kà-thär'sĭs), *n.* *Psychotherapy.* The process of relieving an abnormal excitement by reestablishing the association of the emotion with the memory or idea of the event that first caused it, and of eliminating it by complete expression. See ABREACTION, above.

cathedral chimes. *Music.* Bell-metal tubes of different lengths, played by striking at the upper ends with a mallet, producing tones closely resembling distant church bells.

ca-thex'is (kà-thĕk'sĭs), *n.; pl.* CATHEXES (-sēz). [NL., fr. Gr. *κάθεξις* retention.] *Psychoanalysis.* Concentration of psychic energy in any particular channel, as in direction of libido toward a loved object.— **ca-thec'tic** (-tĭk), *a.*

cath'o-lyte (kăth'ō-līt), *n.* [*cathode* + *electrolyte.*] *Physics & Chem.* That portion of the electrolyte which is adjacent to the cathode.— **cath'o-lyt'ic** (-lĭt'ĭk), *a.*

cat'ta-lo (kăt'à-lō), *n.; pl.* -LOES OR -LOS (-lōz). = CATALO, in the *Dictionary*.

cat'walk' (kăt'wôk'), *n.* A narrow footway along the keel of a rigid airship.

cat whisker. *Radio.* Fine wire making contact with crystal in a crystal detector.

C battery. *Radio.* An electric battery connected between the grid and the filament of an electron tube to control the amount of average plate current;— called also *grid battery*. See A BATTERY and B BATTERY, above.

C. C. S. Casualty Clearing Station (from which wounded soldiers are sent home, to hospitals, etc., for treatment). *Brit.*

cedar rust. *Hort.* Any of certain heteroecious rusts of the genus *Gymnosporangium*, which in their æciostage attack the foliage and fruit of the apple and other pomaceous trees, and have for their alternate hosts various species of cedar of the genus *Juniperus*. Cf. CEDAR APPLE, in *Dict.*

ceil'ing*, *n.* *Aëronautics.* The highest altitude to which an aircraft can attain or approach under given conditions, as: **a** The height above sea level at which a given aircraft ceases to rise at a rate of speed greater than a small specified one (100 feet a minute in the United States Air Service);— called specifically the *service ceiling*. **b** The maximum height above sea level which a given aircraft can approach asymptotically, assuming standard air conditions;— called specif., the *absolute ceiling*.

ce-les'ta (sĕ-lĕs'tà), *n.* [F. *célesta.*] *Music.* A keyboard instrument having a pianolike action, with hammers that strike steel plates suspended above wooden resonance boxes.

cell*, *n.* **1.** *Math.* Any solid or extent of three dimensions, conceived as partially bounding an extent or space of four dimensions; thus, the polyhedrons that bound or form a polyhedroid are *cells*. See FOURTH DIMENSION, below.

2. *Aeronautics.* **a** In an airplane, the entire structure of the wings and wing trussing on one side of the fuselage, or between fuselages or nacelles, where there are more than one. **b** In a balloon or airship, the bag, or one of the bags containing the aerostatic gas

cel'lite (sĕl'ĭt; -īt), *n.* Also **cel'lit.** See CELLULOSE ACETATE.

☞ *Cellit* is a trade-mark name.

cel'lo-bi'ose (sĕl'ō-bī'ōs), *n.* [*cellulose* + *biose*, **a.**] *Org. Chem.* A sugar, $C_{12}H_{22}O_{11}$, of the biose or disaccharide class, obtained as a white, faintly sweet powder by the hydrolysis of cellulose;— called also *cellose*.

cel'lon (sĕl'ŏn), *n.* See CELLULOSE ACETATE, below.

cel'lo-phane (sĕl'ō-fān), *n.* [*cellulose* + Gr. *φαίνειν* to show.] Viscose solidified in thin, transparent, waterproof sheets or strips, bearing the trade-mark *Cellophane*. It is used for wrapping confectionery, ornamental novelties, surgical dressings, and the like.

cel'lose (sĕl'ōs), *n.* [*cellulose* + *-ose*, 2 **a.**] = CELLOBIOSE.

cellulose acetate. *Chem.* Any of several noninflammable compounds, insoluble in water, formed by the action of glacial acetic acid, acetic anhydride, and concentrated sulphuric acid (or by some similar method) on cellulose, esp. cotton. They are used for making artificial silk, photographic films, electric insulators, varnishes, etc. The compounds or compositions containing them are sold under various trade names, as *cellite* and *cellon*.

cel'ti-um (sĕl'shĭ-ŭm), *n.* [NL., fr. L. *Celtae* Celts.] *Chem.* See HAFNIUM.

cen'sor*, *n.* *Psychoanalysis.* The hypothetical agent effecting censorship.

cen'sor-ship*, *n* *Psychoanalysis.* A force or system which blocks the expression of the unconscious, or modifies it, as by distorting the expression of wishes in dreams.

cen-ta'vo (sĕn-tà'vō), *n.; pl.* -VOS (-vōz) [Pg.] A Portuguese coin worth 1/100 of an escudo (which see, below).

center, *or* **centre, of buoyancy***. The center of gravity of the air displaced by a balloon or airship. It is approximately the center of gravity of the contained gas.

cent'ge-ner (sĕnt'jē-nĕr), *n.* [L. *centum* hundred + *genus, generis*, birth, race.] *Agric* A large number (properly, a hundred) of plants or animals having a common parentage; esp., a hundred plants, as of corn, derived from a single parent and so planted, as in plots or rows, that the value of the breed may be determined. **b** A device for planting one hundred seeds equally spaced and at a uniform depth.

cen'ti-bar' (sĕn'tĭ-bar'), *n.* [*centi-*, 2 + *bar.*] *Physics.* The hundredth part of a bar (see BAR, *n*, above).

Central Powers. Austria-Hungary and Germany;— so called, since the beginning of the World War, because of their geographic position. The term was later used to include their allies, Bulgaria and Turkey.

cen-troi'dal (sĕn-troi'dăl), *a.* Of or pertaining to the centroid, or center of mass of a body; passing through the centroid; as, a *centroidal* axis

Cen'tro-so'yus (sĕn'trō-sō'yŏōs), *n.* [Russ.; fr. *centralnyi* central + *soyus* union.] Formerly, the central executive body of the Russian consumers' coöperative societies. Now, as reorganized under the Soviet government, the central administrative union controlling the consumers' coöperative societies under the supervision of the Supreme Economic Council; also, sometimes, all the societies, collectively.

cer'e-bron'ic (sĕr'ē-brŏn'ĭk), *a. Chem.* Designating an acid, $C_{25}H_{50}O_3$, formed by the decomposition of cerebron.

Ce'ri-on (sē'rĭ-ŏn), *n.* [Gr. *κηρίον* honeycomb, beeswax.] *Zool.* A genus of pupa-shaped land shells having numerous species in the Bahama Islands, Florida Keys, etc.

C. G. M. *Abbr.* Conspicuous Gallantry Medal (awarded in the British Navy since 1874).

C. G. T. *Abbr.* Confédération Générale du Travail (an organization which is the French syndicalist labor union).

C. H. *Abbr.* Companion of Honor (a member of a British order, the Companions of Honor, estab. in 1917).

chain store. One of a number of retail stores under the same ownership and selling the same classes of merchandise.

chair car. **a** A parlor car. *Local, U. S.* **b** A railroad car having reclining chairs or chairs with high adjustable backs. These cars are used chiefly on long-distance trains. An extra fare is rarely, if ever, charged. *Local, U. S.*

chair'wom'an, *n.* A woman presiding officer.

cham'oi-sette' (shăm'wà-zĕt'), *n.* [*chamois* + *-ette.*] **a** A trade-mark for gloves. **b** Hence, a closely woven cotton fabric used esp. for gloves, bearing the trade-mark *Chamoisette*.

chan'nel*, *n.* *Radio.* A narrow band of frequencies of sufficient width for a single radio communication. The width of a *channel* depends upon the type of radio transmission, as spark, continuous-wave, or radiotelephone.

char'ac-ter-is'tic*, *n.* *Radio.* A curve or graph showing a relation between the plate, grid, and filament voltages and currents of electron tubes.

characteristic rays. *Physics.* X rays, nearly homogeneous as to wave length, obtained by exposing a metal surface to ordinary X rays. The secondary radiation emitted by the metal has a wave length approximately proportional to the reciprocal of the square of the atomic weight of the metal.

charcoal rot. *Agric.* A disease of the sweet potato, caused by the fungus *Sclerotium batatricola*, producing a coal-black rot of the roots.

charg'er*, *n.* *Elec.* A device for charging storage batteries;— called also *battery charger*.

char'ka* (chŭr'kà), *n.* [See CHURKA.] A spinning wheel. *India.*

Charles'ton (chärlz'tŭn), *n.* [From *Charleston*, S. C.] A kind of round dance, in four-four time, characterized by a sidelong hip movement and by lifting the heels alternately out and back while the knees touch.

‖ **char'meuse'** (shär'mûz'), *n.* [F.] A soft satin fabric of light weight, having a lustrous surface with a dull back.

chas'er* (chās'ĕr), *n.* **1.** *Aëronautics.* A small, light, usually single-seated, military airplane of great speed and climbing power, used in repelling hostile aircraft.

2. *Naval.* A submarine chaser.

Chau-tau'qua (shȧ-tô'kwȧ), *n.* [*often l. c.*] An assembly for educational purposes conducted more or less on the plan of the summer schools at Chautauqua, N. Y.; hence, an entertainment or lecture or a series of such meetings of an educational nature, often held out of doors, in a tent, etc. — **Chau-tau'qua,** *or* **chau-tau'quan** (-kwȧn), *a.* — **Chau-tau'quan,** *or* **chau-tau'quan** (-kwȧn), *a.*

check'—off' (chĕk'ôf'), *n.* An arrangement by which a trade-union, esp. the United Mine Workers, receives the dues, fees, fines, and assessments of its members directly from the employer, who withholds them from wages.

check writer. A machine, bearing the trade-mark *Check Writer*, which prevents alteration of the amount of a check or draft by grilling or roughening that part of the paper on which it prints the figures or the spelled-out amount.

chedd'ite (chĕd'īt), *n.* [From *Chedde*, town in Haute-Savoie, France, where it was first made.] A widely used blasting explosive consisting essentially of a mixture of potassium or sodium chlorate with one or more nitrohydrocarbons and, orig., castor oil. There are many varieties.

Che'ka (chā'kȧ), *n.* [Russ., fr. *che* and *ka*, names of initial letters of *Chrezvichainaya Kommissiya* extraordinary commission.] In the Soviet government, a committee operating as a secret police against counter-revolutionary movements; hence, any similar body in Germany, Bulgaria, etc.

chemical warfare. Warfare conducted by utilizing certain resources of chemical science, as gases, incendiary materials, screening smokes, signal smokes and lights, and protection from similar enemy measures. The **Chemical Warfare Service** is a branch of the U. S. Army whose field is chemical warfare.

chem'o-ther'a-py (kĕm'ô-thĕr'ȧ-pĭ), *n.* [*chemical* + *therapy.*] *Med.* The treatment of internal disease by chemical reagents that have a specific and immediate toxic effect upon the microörganism that causes the disease, without seriously poisoning the patient. Examples are the treatment of malaria with quinine and of syphilis with mercury. — **chem'o-ther'a-peu'tic** (-pū'tĭk), *a.*

cher'vo-nets (chĕr'vô-nĕts), *n.*; *pl.* CHERVONTSI (chĕr-vônt'sē). Also **cher'vo-netz.** [Russ., lit. ducat.] A gold monetary unit of the Union of Socialist Soviet Republics, established by a decree of 1922, equivalent to ten rubles, and worth about $5.15. The chervontsi in circulation consist of notes of the Soviet State Bank, in various denominations.

chestnut blight. *Forestry.* A very destructive disease of American chestnut trees, due to the fungus *Endothia parasitica*, marked by dead sunken areas of bark in which pustules of the fungus are formed, and by the death of limbs girdled by the fungus; — called also *chestnut bark disease.* The fruit from diseased trees is not poisonous.

chev'on (shĕv'ŭn), *n.* [F. *chèvre* goat + mou*ton* mutton.] The flesh of the goat used as food. *Recent.*

chi'nin (chē'nĕn), *n.* *Bot.* = COYO, below.

chi'ro-prac'tor (kī'rō-prăk'tẽr), *n.* A practitioner of chiropractic (which see, in the *Dictionary*).

chloramine*, *n.* Also **-amin.** **a** *Inorganic Chem.* An oily compound, NH_2Cl, obtained by the reaction of sodium hypochlorite with ammonia. **b** *Pharm.* Chloramine T.

chloramine T. Also **chloramine-T, chloramin T.** [Cf. CHLORAMINE.] *Pharm.* A white crystalline powder used as an antiseptic in dentistry, in treating wounds, etc. Chemically, it is the sodium derivative of *N*-chloro-*p*-toluenesulphonamide, $CH_3C_6H_4SO_2NClNa$. Called also *chlorazene, chloramine.*

chlo'ra-zene (klō'rȧ-zēn), *n.* [*chlor-* + *azo-* + *-ene.*] See CHLORAMINE T, above.

Choc'taw*, *n.* In figure skating, a figure consisting of a combination of a stroke forward on either edge of either skate, followed by a stroke backward on the opposite edge of the skate on the opposite foot.

choke*, *n.* Also **choke coil.** *Radio.* An inductor used to stop or reduce current flow.

Cho'la, cho'la (chō'la), *n., fem.* of CHOLO, CHOLO, below.

‖ **cho'lam** (chō'lȧm), *n.* [Tamil. *cholum.*] Grain sorghum (*Andropogon sorghum*); — native name. *India*

Cho'lo (chō'lō), *n.*; *pl.* CHOLOS (-lōz). [Spanish American.] **1.** An Indian of a race of Quichuan linguistic stock inhabiting the mountain regions of Peru.

2. *[l. c.]* In some Spanish American countries, as Mexico and Bolivia, a mestizo; a person of Spanish and Indian blood. The cholos of Bolivia furnish nearly all the skilled labor of the country.

chon'dri-o-some' (kŏn'drĭ-ô-sōm'), *n.* [Ult. fr. Gr. χόνδρος grit, cartilage + *-some.*] *Biol.* See MITOCHONDRIA, below.

chop'per*, *n.* *Elec.* An interrupter, usually a rotating one.

chord*, *n.* *Aëronautics.* The line of a straight edge brought into contact with the lower surface of an airfoil section at two points. In the case of an airfoil having double convex camber, it is the straight line joining the leading and trailing edges, which for this purpose are the two points in the section that are farthest apart.

chord length. *Aeronautics.* The length of the projection of an airfoil section on its chord

Chris'ti-ad (krĭs'tĭ-ăd), *n.* [NL. *Christias, -iadis*, fr. *Christus*, on analogy of *Ilias.* See ILIAD.] An epic relating to Christ, esp. the *Christiad* of Marco Girolamo Vida.

chro-mat'i-cism* (krō-măt'ĭ-sĭz'm), *n.* *Music.* Marked use of the semitones in the chromatic scale or of harmonics containing many accidentals, as by Debussy, Stravinski, and Schönberg. Also, the quality of being chromatic. Cf. DIATONISM, below.

chro'mo-lip'oid (krō'mô-lĭp'oid), *n.* [*chromo-* + *lipoid.*] *Physiol. Chem.* Any of a certain class of pigments, resembling fats, and found in plants and animals.

‖ **chy'pre** (shē'pr'), *n.* [F., fr. *Chypre* Cyprus.] A blended perfume of delicate odors.

Cin-cin'cis (sĭn-sĭn'sĭs), *n.* A variety of pear of the Chinese type, valuable for canning and preserving, first grown in America in Ohio about 1860 from a seedling imported with others from France, and later introduced into southern Florida, where it has proved to be well adapted.

cin'e-ma (sĭn'ē-mȧ), *n.* [Short for *cinematograph.*] *Orig. British.* **a** A moving picture; also, with *the*, moving pictures collectively. **b** A moving-picture theater; called also *cinema* theater. — **cin'e-mat'ic** (sĭn'ē-măt'ĭk), *a.*

cin'e-ma—mi-cros'co-py (-mȧ-mī-krŏs'kō-pĭ), *n.* The art or process of photographing objects of microscopic size upon a moving film for cinematographic projection so that they appear upon the screen in magnified form.

cin'e-mat'o-graph (-măt'ō-grăf), *v. t.* To take a series of photographs of with the cinematograph; make chronophotographs of. — **cin'e-ma-tog'ra-phy** (-mȧ-tŏg'rȧ-fĭ), *n.*

cin'e-mel'o-dra'ma (-mĕl'ō-drȧ'mȧ), *n.* [*cinema* + *melodrama.*] A photoplay depicting a melodramatic story.

Circassian walnut. The wood of the walnut *Juglans regia*, native to the eastern slopes of the Caucasus, ranging eastward to the foothills of the Himalaya Mountains.

cir'cuit*, *n.* *Radio.* = HOOK-UP, below. *Cant.*

cir'cum-a'vi-ate (sûr'kŭm-ā'vĭ-āt), *v. t.* [*circum-* + *aviate.*] To fly round in an aircraft; as, to *circumaviate* the earth. — **cir'cum-a'vi-a'tion** (-ā'vĭ-ā'shŭn), *n.* — **cir'cum-a'vi-a'tor** (-ā'vĭ-ā'tẽr), *n.*

cir'cus*, *n.* = FLYING CIRCUS, below.

ci-tric'o-la scale, *or* **ci-tric'o-la** (sĭ-trĭk'ō-lȧ), *n.* [NL., fr. L. *citrus* citron tree + *-cola* (as in *incola*) inhabitant; *in* + *colere* to dwell.] A scale insect, *Coccus citricola* Campbell, of California, injurious to citrus fruit trees.

cit'ri-cul'ture (sĭt'rĭ-kŭl'tūr), *n.* [L. *citrus* citron tree + E. *culture.*] *Hort.* The cultivation of citrus fruits. — **cit'ri-cul'tur-ist** (-kŭl'tūr-ĭst), *n.*

cit'rus* (sĭt'rŭs), *a* Pertaining to the genus *Citrus* (containing the lemon, lime orange, etc.); citrous; as, *citrus* scale, *citrus* canker, *citrus* fruit.

☞ *Citrus* as an adjective seems to be superseding *citrous.*

citrus canker. A serious bacterial disease of the grapefruit, orange, lemon, etc., caused by the organism *Bacterium citri*, occurring in eastern Asia, the southern United States, and South Africa. It is believed that it was introduced into the United States from Japan.

citrus scab. A widely spread disease of citrus trees, due to the fungus *Cladosporium citri*, which attacks the trees, leaves, and fruit. It is especially injurious to the grapefruit.

city—manager plan. A method of municipal government by which a nonpolitical, central executive (**city manager**) is hired under a charter provision by a city commission (commission-manager plan), or a mayor and council (council-manager plan), to manage all the administrative affairs of a city. He may or may not be a local resident. He is usually removable solely by the commission or the council, and appoints and controls the heads of the administrative departments at his discretion, and the remaining city employees subject to civil-service provisions.

civ'vy (sĭv'ĭ); *pl.* CIVVIES (-ĭz). *Slang, Chiefly Eng.* **a** A civilian. **b** *pl.* Civilian as opposed to military dress.

clas-mat'o-cyte (klăs-măt'ō-sīt), *n.* [Gr. κλάσμα, κλάσματος, a fragment + *-cyte.*] *Biol.* A large connective-tissue cell having a tendency to split up

Clay'den ef-fect' (klā'dĕn). [After Arthur W. *Clayden* (1855–), Eng. scientist.] The reversal of a photographic image of exceedingly short exposure by the action of a subsequent illumination, as in "dark lightning"

Clay'ton An'ti-trust' Act, *or* **Clay'ton Act** (klā'tŭn). [After Henry D. *Clayton*, former representative from Alabama.] An act, passed October 14, 1914 (63rd Congress), to supplement the Sherman Antitrust Act of 1890 (which see, below). It prohibits discriminating prices and trade agreements, interlocking directorates of banks and large competing corporations, and the holding by one corporation of the stock of another where the effect is "to substantially lessen competition." It limits injunctions and contempt proceedings in labor disputes, and exempts from antitrust laws, labor and agricultural organizations not conducted for profit.

clean'-up'*, *n.* *Elec.* In incandescent lamps and electron tubes, the disappearance of the small amount of residual gas after the filament, of certain metals, burns for a time.

clei'thro-pho'bi-a, *or* **cli'thro-pho'bi-a** (klī'thrō-fō'bĭ-ȧ), [NL.; Gr. κλεῖθρον bolt + *-phobia.*] = CLAUSTROPHOBIA, in the *Dictionary.*

click*, *v. t.* To seize hastily; to grab; hence, to receive or get suddenly; to experience (usually, a misfortune). *Slang & Dial., Eng.*

click*, *v. i.* — **to click it,** to be taken ill; to be injured, esp. seriously or fatally; to "catch it." *Slang & Dial., Eng.*

cli-nom'e-ter*, *n.* See INCLINOMETER, below.

‖ **cloche*** (klōsh), *n.* **a** *Aëronautics.* = BELL SYSTEM OF CONTROL, above. **b** A kind of close-fitting, bell-shaped hat.

clone (klōn), *n.* [Gr. κλών a slip or twig.] *Biol.* Any assemblage of race organisms descended by asexual reproduction from a single sexually produced individual.

close coupling. *Elec.* = TIGHT COUPLING, below.

close'—up' (klōs'ŭp'), *n.* **a** *Moving Pictures.* A picture of a character or a portion of a scene taken with the camera moved closer than for the main part of the picture, and hence showing a detail or details on an enlarged scale. **b** Hence, any photograph taken at close range. Also fig.

club car. *Railroads.* A parlor car with movable chairs, and, usually, with magazines, writing desks, etc., suggestive of a room in a club.

club wheat. A type of wheat characterized by short, compact heads, short, stiff straw, and soft grain; — called also *square head.*

C. M. T. C. *Abbr.* Citizens' Military Training Camp.

coach*, *n.* An automobile, similar to a sedan, but somewhat less roomy and of a more economical construction, having an inclosed body of one compartment, usually with two doors, and two cross seats for four or five passengers.

coal box. See BLACK MARIA, above. *Slang.*

cock'pit'*, *n.* In some airplanes, an open space or one of the open spaces in which the pilot and passengers are accommodated. A cockpit completely housed in is a *cabin.*

co-con'scious-ness (kō-kŏn'shŭs-nĕs), *n.* [A term chosen by Morton Prince (1854–), American physician. See *co-.*] *Psychol.* A division of subconsciousness which includes both the fringe of consciousness and the pathologically split-off complexes, but excludes unconscious physical neurograms. — **co-con'scious,** *a.*

co'cose (kō'kōs), *n.* [*coco* + *-ose.*] A substitute for butter and lard, made largely from coconut oil or grease.

co-en'zyme (kō-ĕn'zīm), *n.* [*co-* + *enzyme.*] *Physiol. Chem.* An organic substance occurring with an enzyme and rendering it active; — called also *coferment.*

co-fer'ment (kō-fûr'mĕnt), *n.* [*co-* + *ferment.*] *Physiol. Chem.* = COENZYME, above.

coil antenna. *Radio.* An antenna consisting of one or more complete turns of wire or other conductor. A *coil antenna* functions as an inductance rather than as a capacity. Cf. LOOP ANTENNA, below.

cold—pack method. *Canning.* A method by which food materials (vegetables, fruits, meats, soups) are prepared for preservation, a common form of which consists of (1) scalding or blanching (except for berries and soft fruits); (2) dipping in cold water; (3) packing immediately in hot, clean containers (pouring hot sirup over fruit), then covering (glass jars) or sealing (tins); (4) processing, or sterilizing, in a hot-water bath or pressure cooker; and (5) sealing glass jars at once while contents are still hot.

collar blight. *Hort.* Pear blight or fire blight of the pear and the apple; — so called when it attacks the junction of the stem and root.

collar rot. *Hort.* **a** Any of various diseases of certain tropical trees, in which the attack is mainly at the collar and on the larger roots. **b** = COLLAR BLIGHT, above.

collective unconscious. *Psychol.* The psychical inheritance of racial experience, functionally potential in each individual, out of which the individual unconscious is differentiated through contact with environment. *C. G. Jung.*

colloidal fuel. A liquid or semisolid fuel consisting of powdered coal, coke, or other carbonaceous matter mixed in fuel oil, tar, or the like, with a small amount of some other substance to keep the powdered matter in suspension, that is, to keep it from settling.

col'or-ful, col'our-ful (kŭl'ẽr-fo͝ol), *a.* Full of color (literally or fig.); of striking color or colors. — **-ful-ly,** *adv.*

Columbus Day. The 12th day of October, on which day in 1492 Columbus discovered America; — called also *Discovery Day.*

col'umn*, *n.* *Newspapers.* A special department. See COLUMNIST, below. *Cant.*

col'um-nist (kŏl'ŭm-nĭst), *n.* *Newspapers.* A writer who conducts a special department, usually one column wide, as of humor, sports, or literary gossip, under a permanent title.

com'bi-na'tion*, *n.* A one-piece undergarment combining corset cover with drawers or petticoat, or, as in the union suit, constituting undervest and drawers.

come*, *v. i.* — **to come across*,** to pay over money; contribute; hand over something; "fork out"; as, they *came across* handsomely. *Slang.* — **to come back*,** to regain a former condition or state, as of physical activity, fitness, supremacy, or the like, from which one has declined or has been deposed; to reenter a calling, profession, or the like, from which one has retired or has been deposed. *Slang.*

come'back'*, *n.* **a** The act or an instance of coming back (to a former condition or state, etc.). **b** An answer; retort; repartee. *Both Slang or Colloq.*

com'ic*, *n.* *Cant.* **a** A comic picture. **b** *Moving Pictures.* A picture presenting broad comedy or farce.

comic strip. A strip of consecutive drawings in panels — usually three to six — presenting a comic or humorous adventure or action involving a character or characters who are the creation of the artist. *Usually Newspapers.*

‖ **co'mi-ta'dji** (kō'mē-ta'jē). Var. of KOMITAJI, below.

com'mis-sar*, *or* **com'mis-sa-ry*,** *n.* [Cf. F. *commissaire.*] A commissioner; member or head of a commissariat; — in recent use [through Russ. *kommissar*] esp. one of the *People's Commissars*, or heads of the commissariats (departments of government) in the separate republics of the Union of Socialist Soviet Republics. The commissars of the U. S. S. R. collectively form the Russian national cabinet — the *Union Council of People's Commissars* — which consists of a president, six vice presidents (one for each state), the heads of the commissariats, and a few other Union officials. See COMMISSARIAT, below.

com'mis-sa'ri-at* (kŏm'ĭ-sā'rĭ-ăt; 115), *n.* A body of commissars or commissaries; the office of commissar or of a commissar; — in recent use [Russ. *kommissariat*] esp. any of the departments of government within the Union of Socialist Soviet Republics, whose heads form a *Council of People's Commissars.* See COMMISSAR, UNION CENTRAL EXECUTIVE COMMITTEE (below).

commission—manager plan. See CITY-MANAGER PLAN, above.

‖ **com'mu'ni'qué'** (kô'mu'nē'kā'), *n.*; *pl.* -QUÉS. [F.] A communication or piece of information given out officially.

community chest. A general fund, accumulated from individual subscriptions, to defray the demands on a community for charitable purposes.

com'pact (kŏm'păkt), *n.* A small box for face powder, usually containing also a powder puff and mirror, and sometimes (**double compact**) also rouge.

company union. *U. S.* An inclusive organization of the various kinds of workers, skilled and unskilled, at different trades and occupations in a single plant or company, usually encouraged or promoted by the employer. It differs from a trade-union in that the latter includes workers at only a single trade or at closely allied trades, and commonly includes the workers at the trade in all or most of the available plants, usually in the country.

com-pen'den-cy (kŏm-pĕn'dĕn-sĭ), *n.* *Math.* The factor property of being compendent; connectedness.

com-pen'dent (-dĕnt), *a.* *Math.* Holding together; connected; — said esp. of Riemann's surfaces.

compensating condenser. = BALANCING CONDENSER.

com'pen-sa'tion*, *n.* **a** *Psychol.* The act or result of seeking a substitute for something unacceptable or unattainable. **b** Effort or attainment in correcting an organic inferiority or overdeveloping a vicarious organ or function.

complement fixation. *Physiol. Chem.* A combination of complement with lipoid (the specific antigen) and antilipoid (a positive serum) which prevents a hæmolytic reaction. When no antilipoid is present hæmatolysis takes place and the reaction is considered negative. Complement fixation is the basis of the Wassermann test (see, below) for syphilis and of similar tests for gonorrhea and glanders.

com'plex*, *n.* *Psychol.* An association of mental elements which have a common affective bond, and thus tend to act in the mind and to enter consciousness together, esp. an unconscious one which in disguised form exerts a dominating influence upon the personality; as, the Œdipus *complex.*

compound spectacles. = PANTOSCOPIC SPECTACLES, in *Dict.*

com'stock-er-y (kŭm'stŏk-ẽr-ĭ), *n.*; *pl.* -ERIES (-ĭz). [After Anthony *Comstock* (1844–1915), American reformer.] **a** Zealous prosecution of immorality in books, papers, and pictures. **b** Hence, in a derogatory sense, censorious opposition to any work of art, as a book or picture, which infringes on strict standards of morality or purity; prudery.

concentration ring. *Aëronautics.* **a** In a free balloon, a

hoop to which are attached the ropes suspending the basket and to which the net also is secured. **b** In a parachute, a hoop to which the rigging of the parachute is attached and also the line sustaining the passenger. **c** In an airship, a ring to which several rigging lines are brought from the envelope and from which one or more lines also lead to the car.

con'chy (kŏn'chĭ), *n.; pl.* -CHIES (-chĭz). A conscientious objector (which see, below). *Slang, Eng.* [2] *Galsworthy.*

con'den-sa'tion*, *n. Psychoanalysis.* Fusion and compression of unconscious elements seeking expression into a single form of presentation, as often in dreams and wit.

condenser antenna. *Radio.* An antenna consisting of two capacity areas, a lower capacity area (the ground or a counterpoise), and an upper capacity area, which when consisting of an elevated wire or wires, is called an aërial.

condenser transmitter. *Elec.* A telephone transmitter whose operation depends on variation in electrical capacity produced by action of sound waves on a condenser plate.

con-dens'ite (kŏn-dĕn'sīt), *n.* [*condense* + *-ite*] An electrical insulating material, a condensation product of phenols and formaldehyde, bearing the trade-mark *Condensite.*

cone of fire, *or* **cone of dispersion*.** *Mil.* The figure formed in space by all the trajectories collectively of a series of shots fired from a machine gun, a rifle, or artillery at a common target on the same range.

con-fig'u-ra'tion*, *n. Psychol.* = GESTALT, below.

con-fig'u-ra'tion-ism, *n. Psychol.* The theory that psychical and physical function occurs through configurations acting as units or in interrelation. — **con-fig'ur-a'tion-ist**, *n.*

Con'gress-wom'an (kŏn'grĕs-wo͝om'ăn), *n.* A woman who is a member of the Congress of the United States.

conscientious objector. One who, for conscience' sake, objects to warfare or to military service, esp. such as involves the use of arms or force by him.

con-sol'i-date*, *v. t.* — **to consolidate a position**, *Mil.*, to organize and strengthen a position or ground recently captured and make it a part of one's own defense system.

con-sor'ti-um*, *n.* Any agreement for united action made by the banking interests of two or more nations for the financial assistance of another nation.

Conspicuous Gallantry Medal. A British silver medal awarded to petty officers and seamen in the Navy.

con'stel-la'tion*, *n. Psychol.* An associative combination of several psychic elements or groups, as a group of interrelated complexes.

Constitutional Democrat. In Russian politics, a member of the **Constitutional Democratic party**, formed about 1905. It favored autonomy for Poland and a federal constitution for the Russian Empire. The Constitutional Democrats have ceased to be active since the Revolution of 1917. Cf. CADET, above.

contact receptor. *Physiol.* A sense organ responsive only to stimuli from objects in actual contact with it.

continental code. *Radio.* A telegraphic alphabet or code in radiotelegraphy, differing from the Morse alphabet (which see, in the *Dict.*) in eleven letters; — called also *continental Morse code* and *international code.*

con'ti-nu'i-ty*, *n. Moving Pictures.* A scenario.

continuity writer. *Moving Pictures.* A person employed in a moving-picture studio to arrange, adapt (as by adding, or cutting, if necessary), and prepare for picturization a story or plot for a photoplay.

continuous waves. *Radio.* **a** Radio waves which continue with unchanging intensity or amplitude, without modulation. **b** Radio waves of which the intensity continues unchanged except for modulation; — sometimes called *undamped waves*, but more properly called *modulated continuous waves.* See KEY-MODULATED CONTINUOUS WAVES, INTERRUPTED CONTINUOUS WAVES, below.

con'tra-cep'tion (kŏn'trȧ-sĕp'shŭn), *n.* [*contra-* + *-ception* as in *inception.*] The prevention of conception or impregnation. Cf. BIRTH CONTROL, above.

con'tra-cep'tive (-tĭv), *n.* A means of contraception. — **con'tra-cep'tive,** *a.*

con'trast-y (kŏn'trȧs-tĭ), *a. Photography.* Having very dark shadows and very white high lights, due to underexposure or to overdevelopment of the negative *Cant.*

con-trol'* (kŏn-trōl'), *n.* **1.** *Mach.* The apparatus used to control a mechanism or machine in operation, as an aircraft or motor boat, including all the means provided to enable the operator to control the speed, direction, etc.; a control system; also, any of the mechanisms of a control. **2.** In aircraft racing, a station at which the craft may stop, as for minor repairs, etc., a limited amount of time being allowed which is not counted. Cf. CONTROL, *n.*, 2 **e**, in the *Dictionary.* **3.** *Climatology.* Any of the physical factors determining the climate of any particular place, as latitude, distribution of land and water, altitude, exposure, prevailing winds, ocean currents, mountain barriers, and vegetation.

control column. A lever, having a rotatable wheel mounted at its upper end, for controlling esp. pitching and rolling in an airplane. Pitching is controlled by fore-and-aft movement of the column; rolling, by rotation of the wheel. This type of control is called *wheel control.* Called also *yoke.* Cf. CONTROL STICK, below.

control stick. The vertical lever by means of which certain of the principal controls of an airplane are operated. Pitching is controlled by a fore-and-aft movement of the stick; rolling, by a side-to-side movement. This type of control is called *stick control.* Cf. CONTROL COLUMN, above.

control surface. *Aeronautics.* A movable surface designed to be rotated or otherwise moved by the pilot in order to change the attitude of the airplane or airship.

con-ver'sion*, *n. Psychoanalysis.* Transformation of repressed affects into indirect physical manifestations, as in hysteria.

con-vert'er*, *n. Cotton Trade.* A wholesale merchant who at his own risk and expense has the gray cloth (usually woven to his order) converted into finished forms.

con-vert'i-ble*, *a. Automobiles.* Changeable from a closed to an open style; — said of an automobile body.

Cool'idge tube (kōōl'ĭj). [Devised by Dr. William David *Coolidge* (1873–), an American physicist.] *Physics.* A tube, for the generation of X rays, in which the cathode consists of a spiral filament of incandescent tungsten, and the target, which also serves as the anode, is of massive tungsten. In such a tube the temperature of the cathode completely determines the intensity of the X rays.

coon-can' (ko͞on-kăn'), *n.* [Corrupt. of *conquian.*] A game of cards derived from conquian (which see, in the *Dictionary*), played by two or more with one or two packs.

co-ŏp'er-a-tive* (kō-ŏp'ĕr-ȧ-tĭv), *n.* A cooperative enterprise, establishment, or the like

coot'ie (ko͞ot'ĭ), *n.* A body louse. *Soldiers' Slang.*

co'pen-ha'gen*, *n.* A certain light shade of blue.

cor'do-ba (kôr'dō-vȧ; 133), *n.* [Prob fr. the Spanish explorer Francisco Fernández de *Córdoba*] The monetary unit of Nicaragua, equiv. to the United States gold dollar.

Corfu, Declaration of. See DECLARATION OF CORFU, below.

co-ro'na*, *n. Elec.* The visible glow in which the discharge from a conductor is manifested when the potential of the conductor is above a certain critical value, depending upon the size and shape of the conductor and upon the density of the air or surrounding medium.

cor-rect'i-tude (kŏ-rĕk'tĭ-to͞od), *n.* [From *correct* on the analogy of *rectitude* See -TUDE.] The quality of being correct. esp. with reference to the proprieties; correctness.

cor'ri-dor*, *n.* [*usually cap when specific.*] *Political Geography.* A narrow strip of land across territory previously foreign, joining a country and its seaport; as the Polish *Corridor* across Germany to the free city of Danzig; or such a strip connecting one part of a country with another, or two countries, one with the other.

cos-moc'ra-cy (kŏz-mŏk'rȧ-sĭ), *n. Rare.* **a** A government including the whole world. **b** The people of the world, esp when regarded as the source of government.

cos'mo-crat (kŏz'mō-krăt), *n.* A universal monarch or world ruler — **cos'mo-crat'ic** (-krăt'ĭk), *a. Both Rare.*

cost'ing (kŏs'tĭng), *n.* The calculating of all expenditures in a manufacturing, business, or agricultural operation. *British.*

cost plus. Of or pert. to a method of calculating payment for work done under contract, as the construction of a building, the total price of which is determined by adding to actual cost a certain percentage of the cost as profit. *Cant.*

Cot'trell proc'ess (kŏt'rĕl). [After the inventor, Frederick Gardner *Cottrell* (1872–).] A method of removing particles of solid an liquid matter (dust and condensed fume) from gases by the principle of electrostatic precipitation in which the particles receive an electric charge by passing through the field of an electrode supplied with high-tension direct current and are attracted to the electrode of opposite charge, where they are thrown down. It is used to abate the dust nuisance in factories, and to recover metal values which would otherwise be lost in the chimney gases.

Coulom'miers' (ko͞o'lô'myā'), *n., or* **Coulommiers cheese.** A soft cream cheese made in the region of Coulommiers, France. Also, a cheese of the same type made elsewhere.

coun'cil*, *n.* — **the Council.** See LEAGUE OF NATIONS, below. — **Council of Ambassadors**, a council formed in January, 1920, of the ambassadors at Paris representing the United States, Great Britain, Italy, and Japan, together with the premier of France, having power over all routine matters, leaving the larger issues to the Supreme Council (which see, below). — **C. of Five**, the part of the Supreme Council, or Council of Ten, of the Peace Conference at Paris (1919), composed of the Secretary of State of the United States, the ministers of Foreign Affairs of Great Britain, France, and Italy, and Baron Makino of the Japanese delegation, which met to act upon matters of secondary importance. Sometimes applied also to the five ranking delegates of the great powers (the Supreme Council) acting for the Allied nations after the signing of the Peace Treaty with Germany, June 28, 1919. — **C. of Four**, that part of the Supreme Council, or Council of Ten, of the Peace Conference at Paris (1919) which after March 24, 1919, took over active control of negotiations It was composed of President Wilson, and Premiers Lloyd George of Great Britain, Clemenceau of France, and Orlando of Italy. Called also the *Big Four.* From April 24 to May 7, 1919, during the absence of the Italian premier, it was known as the *Council of Three.* — **C. of Premiers**, the Supreme Council (which see, below), after January, 1920. Cf. COUNCIL OF AMBASSADORS, above. — **C. of Ten.** See SUPREME COUNCIL, below. — **C. of the League of Nations.** See LEAGUE OF NATIONS, below. — **Council of Three.** See COUNCIL OF FOUR, above.

council—manager plan. See CITY-MANAGER PLAN, above.

Council of Nationalities. See UNION CENTRAL EXECUTIVE COMMITTEE, below.

coun'ter-bar'rage' (koun'tĕr-bâ'rȧzh'), *n. Mil.* A barrage laid down in opposition to a hostile barrage.

counter electromotive force. *Elec.* Electromotive force in a circuit which opposes the electromotive force impressed on the circuit.

coun'ter-poise'*, *n. Radio.* A system of wires or other conductors (not the ground) forming the lower plate of a condenser antenna.

coun'ter-sun' (-sŭn'), *n.* See ANTHELION, above.

cou'pé'* (ko͞o'pā'), *n.* An automobile having an inclosed body of one compartment usually seating two to four persons, including the driver. See AUTOMOBILE, *Illust.*, in *Dict.*

cou'pe-let' (ko͞o'pȧ-lā'), *n.* = CABRIOLET, above.

cou'ple* (kŭp''l), *v. t* **a** *Elec.* To join (as cells or coils) so as to form a single circuit. **b** To bring (two circuits) into association by coupling (sense **a**).

cou'pler* (kŭp'lĕr), *n. Radio.* A device coupling two electric circuits. See LOOSE-COUPLER, VARIOCOUPLER, below.

cou'pling* (kŭp'lĭng), *n. Elec.* Means of electric connection of two electric circuits by having a part in common to both. The common part is a condenser in *capacitive coupling*, an inductance coil in *direct coupling*, the magnetic field of a mutual inductance in *inductive coupling*, and a resistor in *resistive coupling.*

coupling coefficient. *Elec.* The degree of association of two coupled electric circuits; specif., the ratio of the mutual or common impedance component to the square root of the product of the total impedance components of the same kind in the two circuits.

Court of International Justice, Permanent. See PERMANENT COURT OF INTERNATIONAL JUSTICE, below.

‖ **cou'tu'rier'** (ko͞o'tü'ryā'), *n., prop. masc.* } [F.] Dress-mak-
‖ **cou'tu'rière'** (-ryâr'), *n. fem.* } er; modiste.

cov'er*, *v. t.* To report the proceedings, news, etc., of (an event, meeting, or the like). *Newspaper Cant.*

cov'er-age (kŭv'ĕr-ăj), *n.* The aggregate of risks covered by the terms of a contract of insurance.

cowl*, *n.* In an automobile, the irregularly shaped top portion of the front part of the body forward of the two front doors, to which are attached the windshield and instrument board, and which supports the rear end of the hood.

cowl'ing, *n.* Also **cowl.** *Aëronautics.* A removable metal covering which houses the engine and, sometimes, a portion of the fuselage or nacelle as well.

co'yo (kō'yō), *n.; pl.* COYOS (-yōz). *Bot.* The tree and fruit of a species of the genus *Persea* (*P. schiedeana*), occurring in Central America and Mexico. The fruit resembles the common avocado; — called also *chinin.*

C Q. *Radio.* The general inquiry call, or announcement calling attention to signals from a radiotelegraph station

C Q D. *Radio.* The former code call (cf. S O S, below) of ships in distress, formed by combining CQ (general call for all stations) with D for "distress."

craft*, *n* An aircraft, or aircraft collectively.

craft paper. = KRAFT PAPER, below

crank case, *or* **crank'case'**, *n.* The case or covering within which the crank shaft of an engine, as in an automobile or motor boat, is inclosed. It often serves also as an oil reservoir, esp. in splash lubrication.

crash*, *v.t. & i. Aëronautics.* To bring (an airplane) down in such a manner that by the act of landing the craft is damaged; as, the pilot *crashed* his machine; the pilot *crashed* —*, *v. t.* To disable (an enemy airplane) to such an extent that it falls out of control and is wrecked on hitting the ground.

crash*, *n. Aëronautics.* The act or an instance of crashing.

credit union. A kind of cooperative banking institution organized, as by the members of a trade-union, or other group, for the purpose of stimulating thrift among its members and of making loans to them on favorable terms.

crêpe' me'te-or (krāp' mē'tē-ôr). A fine grade of crêpe, or crape, with a satin finish.

critical angle*. The angle of attack at which the flow about an airfoil changes abruptly, with corresponding abrupt changes in the lift and drag. An airfoil may have two or more critical angles, one of which almost always corresponds to the angle of maximum lift.

‖ **croix' de guerre'** (krwȧ' dĕ gâr') [F., war cross.] A French cross of bronze, suspended by a green ribbon with red stripes, awarded to officers or soldiers for gallant action in war. It was instituted by a decree of April 9, 1915.

Cro-nar'ti-um (krō-när'shĭ-ŭm), *n. Bot.* A genus of heteroecious fungi of the order Uredinales, the æciostage of which occurs on conifers. *C. ribicola*, the cause of the white-pine blister rust, occurs in its uredostage and teliostage on currants, gooseberries, and other species of *Ribes.*

crossing over. *Biol.* A supposed interchange of factors (bearers of inherited characters) between chromosomes This is believed to account for certain irregularities in the inheritance of linked characters. — **cross'o'ver,** *n. & a.*

cross'—wind' force. *Mech.* The component perpendicular to the lift and the drag of the total force on an aircraft due to the air through which it moves.

cross'—word' puz'zle. A word-guessing puzzle, developed from the word square (which see, in the *Dict.*), in which the words, when correctly supplied, cross each other vertically and horizontally, so that most letters appear in two words

cro'tin (krō'tĭn), *n.* [*Croton* + *-in.*] *Chem.* A mixture of poisonous proteins found in the seeds of *Croton tiglium.*

crow's'—foot'*, *n.* A system of diverging short ropes for distributing the pull of a single rope. Cf. CROWFOOT, *n.*, 2 **a**, in the *Dictionary.*

cry-og'e-ny (krī-ŏj'ē-nĭ), *n.* [*cryo-* + *-geny.*] The subject of refrigeration; — used esp. with reference to the methods employed in producing very low temperatures.

cryp'tam-ne'si-a (krĭp'tăm-nē'sĭ-ȧ; -zĭ-ȧ), *n.* Also **cryp'tom-ne'si-a** (krĭp'tŏm-). [NL.; *crypto-* + *amnesia*] *Psychol.* The appearance in consciousness of memory images which are not recognized as such but appear as original creations. — **cryp'tam-ne'sic** (-nē'sĭk; -nē'zĭk), *a*

crystal, crystal detector, crystal rectifier. See DETECTOR, below.

Ct. *Abbr. Chem.* [no period, *Ct*] Celtium.

C. T. A. U. *Abbr.* Catholic Total Abstinence Union.

cte'to-some (tē'tō-sōm), *n.* [Gr. *κτητός* that may be acquired + *-some.*] *Biol.* Any of a group of supernumerary chromosomes, observed in the spermatogenesis of spiders, which are always associated with and at times fused with the heterochromosomes during the maturation divisions, and are, therefore, distributed in an orderly way among the germ cells. Cf. PLANOSOME, below.

C'—tube', *n.* A microtelephonic listening device towed from a vessel engaged in antisubmarine operations to locate the position of enemy submarines, as in the World War.

Cuban heel. *Shoes.* A high straight heel, without the curve of the French heel. Cf. FRENCH HEEL, in the *Dict.*

cub'ism (kūb'ĭz'm), *n. Art* A movement or phase in post-impressionism (which see, below). — **cub'ist** (-ĭst), *n.*

cum'bu (kŭm'bo͞o), *n.* [Perh. Skr *kambu* shell; — also the name of various plants.] A graminaceous grain and forage crop (*Pennisetum typhoideum*) of India and other tropical countries.

cu'pro-nick'el (kū'prō-nĭk'ĕl), *n.* [*cupro-* + *nickel.*] *Metal.* An alloy of copper and nickel; specif., the alloy, containing about 80 per cent copper and 20 per cent nickel, used esp. for making jackets for army-rifle bullets; also, the alloy (called also *nickel bronze*), containing three parts of copper to one of nickel, from which the United States 5-cent piece (or "nickel") is coined.

cu'rie' (ku'rē'), *n.* [After Mme. Marie *Curie*, chemist.] *Chem. & Physics.* A unit of mass of radium emanation, being the amount in equilibrium with one gram of radium.

Cu'rie's' law (kü'rēz'). *Physics.* The law, established by Pierre Curie (1859–1906), that magnetic susceptibility is inversely proportional to the absolute temperature.

curly dwarf. *Agric.* A form of degeneration disease of the potato; — so called from the appearance of the foliage.

curly top. *Agric.* A destructive disease of the sugar beet, causing stunted, curled leaves and a greatly diminished growth. It is transmitted through the beet leaf hopper (*Eutettix tenella*). Called also *curly leaf.*

cur-ric'u-lar*, *a.* Of or pert. to the regular courses of study, as in a school or university.

curtain fire, curtain of fire. See BARRAGE, above.

cush'y (ko͞osh'ĭ), *a.* [Perh. orig. Anglo-Indian; cf. Hind. and Pers. *khush* pleasant.] Easy; soft; pleasant; as, a *cushy* job. *Slang*

cut*, *v. t.* — **to cut a melon**, to divide unusually large profits or surplus among stockholders, esp. in declaring a dividend. *Slang, U. S.* — **to cut ice**, to have weight or influence; to be of importance. *Slang.* — **to cut out**, to stop doing, using, etc.; to cease; omit; as, *cut out* the slang. *Slang.*

cut*, *v. i.* — **to cut back**, in a photoplay, to return to a previous scene by repeating a picture of that scene, as for emphasis and sustained interest. — **cut'-back'**, *n.*

cut'-in', *n. Moving Pictures.* A subtitle, or portion of the dialogue of a photoplay, which is thrown on the screen during a scene instead of before it, thus "cutting into" the action; — called also *cut-in leader.*

cut velvet. See VELVET, *n.*, 1, in the *Dict.*, and YUZEN BIRODO, below.

C W, *or* **C. W.** *Abbr.* Continuous wave.

cy'an-am'ide* (sī'ăn-ăm'īd; sī-ăn'ā-mīd; -īd; 184), *n.* Short for CALCIUM CYANAMIDE (which see, above).

cyanamide process. See NITROGEN FIXATION, below.

cyanide process. See NITROGEN FIXATION, below.

cy'cle-car' (sī'k'l-kär'), *n.* [motor *cycle* + *car.*] A small, light, four-wheeled, motor-driven vehicle.

cy'clo-hex-an'ol (sī'klō-hĕk-săn'ōl; -ōl), *n.* [*cyclo-*, 2 + *hex-* + *anol.*] *Org. Chem.* A colorless liquid or easily fusible solid, $C_6H_{11}OH$, of camphorlike odor, made by the catalytic hydrogenation of phenol and used as a solvent; — called also, in commerce, *hexalin.*

cy'clo-stroph'ic (sī'klō-strŏf'ĭk), *a.* [*cyclo-* + Gr. στροφικός, fr. στρέφειν to twist, turn.] *Meteorol.* Of cyclic origin or compulsion; — used of that component of the deflective force of a wind which is due to the curvature of its path.

cy'per (sī'pẽr), *n.* [Cf. ME. *cipyrs.* See CYPRUS CAT, 1st CYPRESS.] *Furriery.* The fur of the domestic cat when variegated with black and some other color.

C. Z. *Abbr.* Canal Zone.

Czech'o-slo-vak', *or* **Czech'o—Slo-vak'** (chĕk'ō-slō-văk'; -slō'vȧk; chĕk'ō-), *n.* **a** A native or inhabitant of Czechoslovakia. The Czechoslovaks comprise two branches of the western Slavs: the Czechs (Bohemians, Moravians, and Silesians of the northern part of the former empire of Austria), and the Slovaks (of northwestern Hungary). During the World War they attained a separate national existence, establishing a republic in October, 1918. **b** The language of the Czechoslovaks, a branch of the western Slavonic group. It is akin to Polish, and uses Latin letters. — *a.* Of or pert to, or belonging to, the republic of Czechoslovakia or the Czechoslovaks or their language. — **Czech'o-slo-vak'i-an, — Slo-vak'i-an** (-slō-văk'i-ăn; -vä'kĭ-ăn), *a.*

dac'ty-lo-gram' (dăk'tĭ-lō-grăm'), *n.* [*dactylo-* + *-gram.*] An impression taken from a finger; a fingerprint.

dac'ty-log'ra-phy*, *n.* The scientific study of fingerprints as a means of identification. Cf. SIGNALMENT, in the *Dict.*

Da'da (dä'dä), *n.* = DADAISM (which see, below).

Da'da-ism (-ĭz'm), *n.* [F. *dadaisme*, fr. *dada*, adopted as meaningless, but cf. F. *dada* horse (a child's word), cockhorse, hobby.] *Art and Literature.* The cult of Dada, taken as a meaningless symbol, in vogue (c. 1917–20) in France and Switzerland. It represents an extreme negation, almost nihilism, toward the laws of beauty and social organization, with opposition to expressionism, but its tenets are intentionally obscure. — **Da'da-ist,** *n.*

Dail Eireann (däl ãr'ĭn; dôl). [Ir., Parliament (lit., assembly) of Ireland.] The lower house, or Chamber of Deputies, of the Legislature (*Oireachtas*) of the Irish Free State. The membership (153 in 1925) is fixed on a population basis, and a session continues for four years unless sooner dissolved. Deputies must be at least 21 years of age.

Da'kin meth'od (dā'kĭn). [After Henry Drysdale *Dakin*, chemist.] *Surg.* A method of treating wounds by irrigating and disinfecting them with Dakin's solution.

Da'kin's so-lu'tion (dā'kĭnz). [After Henry Drysdale *Dakin.*] *Pharm.* A solution of sodium carbonate in water, to which is added chlorinated lime and boric acid, used as an antiseptic, as in the treatment of wounds

dame*, *n.* [*cap.*] A title of the Order of the British Empire, corresponding to knight, conferred on women. There are two classes: **Dames Grand Cross** (*abbr., G. B. E.*; — for Grand, British Empire) and **Dames Commanders** (*abbr., D. B. E.*; — for Dames, British Empire).

damped (dămpt), *p. p. & p. a.* of DAMP, *v. t. Elec.* Progressively diminishing in amplitude; as, *damped* waves.

damp'ing*, *n. Elec.* The progressive diminution of amplitude in alternating current or waves.

damping factor. *Elec.* The product of the logarithmic decrement and the frequency of a logarithmically damped alternating current.

Dan'i-el'ic (dăn'ĭ-ĕl'ĭk), *a.* Of or pertaining to or in the manner of the book of Daniel, in the Old Testament.

‖ **dan'sant'** (dän'sän'), *n.* See THÉ DANSANT, below.

‖ **dan'seur'** (dän'sûr'), *n.* [F., fr. *danser* to dance.] A professional male dancer, as in a ballet.

dark*, *n.* — **dark of the moon.** See *dark moon*, under DARK, *a.*, in the *Dict.*

dark lightning, *n. Meteor.* A supposed peculiar kind of lightning giving black photographic streaks where white ones ordinarily occur. This result, known as the *Clayden effect* (which see, above), is owing to photographic reversal.

dash'een' (dăsh'ēn'), *n.* [Said to be from F. *de Chine* of or from China.] A tropical plant of the Arum family (genus *Caladium*, syn. *Colocasia*) whose edible farinaceous root may be cooked like the potato. It is related to the taro and to the tania but is much superior to the latter.

Dawes plan (dôz). A plan to insure German reparation payments to Allied countries by balancing the budget and stabilizing the currency of Germany, devised and put in force in 1924 and having as special features a five-year sliding scale of reparation payments (up to 2500 million marks) covered by a mortgage on German industries, an immediate foreign loan, a bank of issue, an international organization of control, withdrawal of France and Belgium from occupied territory, and use of a prosperity index to determine the sum of future (prob. not smaller) payments; — so called after Gen. Chas. G. Dawes, chairman of the Reparation Commission Committee which formulated it.

day degree, *n. Meteorol.* One degree, Fahrenheit or Centigrade as specified, above or below 42° F. (temperature at which vegetation commences) for a period of 24 hours, or its equivalent (as 2° for 12 hours, 4° for 6 hours, etc.).

day letter, day lettergram. See LETTERGRAM, below.

daylight saving. The saving or utilizing of daylight by moving ahead all timepieces, generally one hour (usually in March or April), and setting them back one hour to standard time (usually in September or October), thus causing the day's activities to begin earlier in summer than in winter. The first **daylight-saving acts** were passed as war measures in 1916. — **daylight-saving time.**

dazzle system. A system of painting ships, developed during the World War, by which a vessel's lines are given a distorted appearance and an erroneous idea is given of the course she is steering, so as to render attacks from submarines ineffectual.

D. C., *or* **d. c.** *Abbr.* Dental Corps; Direct Current.

D. C. M. *Abbr.* Distinguished Conduct Medal.

dead'—end' (dĕd'ĕnd'), *a. Radio.* Pertaining to the parts of a coil which are not connected into circuit.

dead load. *Aëronautics.* In an aircraft, the weight of the structure, power plant, and essential accessories, as the water in the radiator, thermometer, and hand starter; also, in the case of an aerostat, the ballast which must be carried to assure a safe landing. Cf. USEFUL LOAD, below.

dead spot. *Radio.* An area or region in which radio reception is markedly poorer than in adjacent regions.

de-am'i-na'tion (dē-ăm'ĭ-nā'shŭn), *n.* Also **de-am'i-ni-za'tion** (-nĭ-zā'shŭn). [See DE-; AMINE.] *Chem.* Removal of an amine group from a compound; specif., the alteration of ammonium salts in urea formation.

deb (dĕb), *n.* Short for DÉBUTANTE. *Colloq*

dec'a-hy'dro-naph'tha-lene (dĕk'ȧ-hī'drō-năf'thȧ-lēn), *n.* [*deca-* + *hydro-* + *naphthalene.*] See DECALIN, below.

dec'a-lin (dĕk'ȧ-lĭn), *n.* [*deca-* + *-yl* + *-in.*] *Chem.* Decahydronaphthalene, $C_{10}H_{18}$, a colorless liquid, used as a solvent, obtained by catalytic hydrogenation of naphthalene.

de-cath'lon (dē-kăth'lŏn), *n.* [See DECA-; PENTATHLON.] In the modern Olympian games, a composite contest consisting of ten events: a 400-meter run, a broad jump, putting the shot, a running high jump, a 100-meter run, throwing the discus, a 100-meter hurdle race, pole vaulting, throwing the javelin, and a 1500-meter run.

de-cel'er-ate (dē-sĕl'ẽr-āt), *v. t.* [*de-* + *accelerate.*] *Mech.* To retard; to apply negative acceleration to. — *v. i.* To move with decreasing velocity; to have negative acceleration. — **de-cel'er-a'tion** (-ā'shŭn), *n.*

de-cel'er-om'e-ter (dē-sĕl'ẽr-ŏm'ē-tẽr), *n.* [*de-* + L. *celer* swift + *-meter.*] An instrument for determining within how many feet a vehicle can be brought to a full stop from a speed of 20 miles an hour when the brakes are applied, no matter what the actual speed may be. One form may be held in the hand, another resembles a small pail. A dial shows within how many feet the vehicle will stop.

Declaration, *or* **Pact, of Corfu.** A pact which served as the basis of the modern state of Yugoslavia, signed on Corfu, July 20, 1917, by the exiled government of Serbia and the Yugoslav Committee, representing the Croats and Slovenes, then subjects of Austria-Hungary.

de-code' (dē-kōd'), *v. t.* [*de-* + *code.*] To translate (a message in code) into ordinary language.

de'con-trol' (dē'kŏn-trōl'), *v. t.* [*de-* + *control.*] To end control, esp. governmental control, of, as a trade or a commodity. — *n.* The ending of control, esp. governmental control over (a trade, or the like). *Colloq., Eng.*

dec're-ment*, *n. Radio.* A measure of the rapidity of damping out of damped waves; specif., logarithmic decrement.

de-crem'e-ter (dē-krĕm'ē-tẽr; dĕk'rē-mē'tẽr), *n.* [Prob. *decrement* + *-meter.*] *Elec.* An instrument for measuring the damping of electric waves or alternating currents or the logarithmic decrement of a circuit, particularly in radio.

de-dif'fer-en'ti-a'tion (dē-dĭf'ẽr-ĕn'shĭ-ā'shŭn), *n.* [*de-* + *differentiation.*] **a** *Biol.* Disintegration of structures produced by differentiation, preparatory to rejuvenescence and reproduction. **b** Disintegration of social or individual habits preparatory to the formation of new ones.

de-feat'ist (dē-fēt'ĭst), *n.* One who desires, or who admits or proclaims before the fact, the defeat of his own country, party, movement, or the like, on the ground that the continuation of a contest is impossible or impractical or that a greater ultimate good may redound to the country, party, etc., from defeat rather than victory. — **de-feat'ism,** *n.*

Defense, *or* **Defence, of the Realm Act.** *Eng.* An act of Parliament, passed Nov. 27, 1914, granting the government control over all means of communication. As amended, it gave the government control over any factory making, or capable of making, war material, and over the liquor trade in certain areas. The act terminated automatically with the legal termination of the War on August 31, 1921. *Abbr., D. O. R. A.*

deficiency disease. *Med.* A disease due to a diet lacking in certain elements (cf. VITAMIN), as scurvy or beriberi.

degeneration disease. *Agric.* Any disease of plants that causes a progressive deterioration in vigor and yield from crop to crop; — applied especially to the potato.

deg'ra-da'tion*, *n. Chem.* The reduction of a complex compound to one less complex, as by splitting off one or more groups.

‖ **dé'jà' vu'** (dā'zhà' vü'). [F.] Lit., already seen; specif., *Psychol.*, the mistaken impression that a present experience has been experienced before.

de-lin'e-a-tive (dē-lĭn'ē-ā-tĭv), *a.* [*delineate* + *-ive*] Pertaining to delineation; serving or tending to delineate.

de-log'a-rize (dē-lŏg'ȧ-rīz), *v. t.* [*de-* + *logarithm* + *-ize.*] *Math.* To transform (an equation or expression) so as to remove logarithms.

de-louse' (dē-louz'), *v. t.* [*de-* + *louse.*] To remove lice from.

‖ **de-men'ti-a præ'cox** (prē'kŏks). [L. *praecox* early ripe, precocious.] A form of insanity occurring esp. at puberty, often marked by double personality and melancholia.

de-mod'u-la'tion (dē-mŏd'ū-lā'shŭn), *n.* [*de-* + *modulation.*] *Radio.* = DETECTION **b**, below.

De Mo'lay' (dē mō'lā'). [After Jacques *de Molay*, last grand master of the Knights Templars (1250?–1314).] An American organization (**Order of De Molay for Boys**), sponsored by Masonic orders, founded in 1919 at Kansas City, Mo., to promote high ideals and character building for citizenship among boys from 16 to 21 years of age.

de-mount'a-ble (dē-moun'tȧ-b'l), *a.* [See DE-; MOUNT.] Capable of being dismounted; — said of a form of rim, for an automobile wheel, which can be removed with its tire.

de-port'ee' (dē-pōr'tē'), *n.* [See -EE; cf. F. *déporté* deported criminal.] A person who has been deported, or is under sentence of deportation

de-pre'ci-a-ble (dē-prē'shĭ-ȧ-b'l), *a. Accounting.* That can or may be depreciated in valuation.

de-pres'sion*, *n. Meteorol.* A region of low barometric pressure surrounded by higher pressures.

depth bomb *or* **charge.** A bomb, or a container filled with an explosive charge, so constructed that it may be set to explode at any predetermined depth below the surface of the water, as in attacking submarines by vessels or aircraft. ☞ In the U. S. Navy, *depth bomb* is used of such a bomb for use by aircraft, *depth charge* of one for use by surface craft.

Der'ma-cen'tor (dûr'mȧ-sĕn'tŏr), *n.* [NL., fr. *derma* + Gr. κέντωρ goader.] *Zool.* A genus of ticks belonging in the family Ixodidæ. *D. venustus*, in the western United States, transmits the so-called "spotted fever" of man.

‖ **der'nier' cri'** (dĕr'nyā' krē'). [F.] Lit., latest cry; the latest, or most authoritative, word

de-sex'u-al-ize (dē-sĕk'shū-ăl-īz), *v. t. & i.*; -IZED (-īzd); -IZ'ING (-īz'ĭng). [*de-* + *sexualize.*] *Psychoanalysis.* **a** To divest of sexual quality by diverting the libido to other goals, as in sublimation. **b** To withdraw (sexual libido) from the genital to other areas of the body, as in perversions. — **de-sex'u-al-i-za'tion** (-ī-zā'shŭn; ī-zā'shŭn), *n.*

de-tect'*, *v. t. Radio.* To rectify as in a detector.

de-tec'ta-graph (dē-tĕk'tȧ-grăf), *n.* = DETFCTAPHONE.

de-tec'ta-phone (-tȧ-fōn), *n. Elec.* A telephonic apparatus with an attached microphone transmitter, bearing the trade-mark *Detectaphone*, used esp. for listening secretly to private conversation, as to secure evidence for use in court.

de-tec'tion*, *n. Radio.* **a** Rectification, as in a detector. **b** The whole process of converting a modulated wave or current into the original signal wave or current.

de-tec'tor*, *n. Radio.* A device for rectifying high-frequency electric current, as to vibrate a telephone-receiver diaphragm, which of itself will not respond to such high frequencies. The chief detectors in use are the **three-electrode electron tube** and the **crystal detector.** The operation of the crystal detector depends on the rectifying action of the surface of contact between certain crystals, as of galena or molybdenite, and a metallic electrode.

de-tune' (dē-tūn'), *v. t.*; -TUNED' (-tūnd'); -TUN'ING (-tūn'ĭng). [*de-* + *tune.*] *Radio.* To put out of tune or resonance, as by varying capacity or inductance; — opposite of *tune.* — **de-tun'ing,** *p. pr. & vb. n.*

Devil Dog. A United States marine; — first so called by the Germans (G. *Teufelhund*) in the World War. *Nickname.*

D. F. C. *Abbr.* Distinguished Flying Cross. *Brit.*

D. F. M. *Abbr.* Distinguished Flying Medal. *Brit.*

di-at'o-nism (dī-ăt'ō-nĭz'm), *n.* [See DIATONIC.] *Music.* Use of the diatonic scale with little or no chromatic modification. Also, the quality of being diatonic. Cf. CHROMATICISM, above.

di'chlor-am'ine (dī'klōr-ăm'ĭn; *-ȧ-mēn'*), *n.* Also **-amin.** [*di-* + *chloro-* + *amine*] *Org. Chem.* A compound formed from a primary amine by the replacement of both atoms of ammoniacal hydrogen by chlorine.

dichloramine T. Also **dichloramine–T, dichloramin T.** *Pharm.* A yellowish crystalline powder, $C_7H_7O_2NSCl_2$, used as an antiseptic.

di'chlor-eth'yl sul'phide (dī'klōr-ĕth'ĭl sŭl'fīd; -fĭd). See MUSTARD GAS, below.

dic'ta-graph (dĭk'tȧ-grăf). Var. of DICTOGRAPH.

dic'ta-phone (-fōn), *n.* [*dictate* + *-phone* as in *telephone.* A phonographic instrument, bearing the trade-mark *Dictaphone*, combining a recorder and reproducer for use in dictating letters and other matter.

dictatorship of the proletariat. Among Marxian socialists, or communists, the domination of the proletariat, established by the use of dictatorial methods of repression against the capitalistic (bourgeois) classes.

dic'to-graph (-tō-grăf), *n.* [L. *dictum* a thing said + *-graph.*] A telephonic instrument, bearing the trademark *Dictograph*, having a sound-magnifying device enabling the ordinary mouthpiece to be dispensed with. Much use has been made of it for overhearing conversations in order to obtain evidence for use in litigation.

die'—hard'*, *n.* In politics, an irreconcilable opponent of a winning measure, usually a conservative; specif., in England, one of the extreme Unionist faction who fought in 1910 to maintain the veto power of the House of Lords.

Diesel (dē'zĕl), *a.* Pertaining to Rudolf Diesel, German inventor, or to the Diesel engine; equipped with a Diesel engine or engines; as, a *Diesel* liner.

Die'sel en'gine *or* **mo'tor** (dē'zĕl). [After Dr. Rudolf *Diesel*, of Munich, who invented it in 1900.] A type of internal-combustion engine in which the suction stroke draws in only air, which the compression stroke compresses so highly that the heat generated ignites the fuel (as crude oil), which is sprayed into the cylinder under high pressure

differential grasshopper. *Zoöl.* A rather large grasshopper (*Melanoplus differentialis*), destructive to vegetation in the western United States.

dig*, *v. i.* — **to dig in,** to excavate a trench or a system of trenches for occupancy in defense; as, the army *dug* itself *in. Mil. Cant.*

di'ga-met'ic (dī'gȧ-mĕt'ĭk), *a.* [*di-* + *gametic.*] *Biol.* Forming two kinds of germ cells one with, one without, the X chromosome (see X CHROMOSOME, below); — sometimes loosely defined as "heterozygous for sex."

di-he'dral* (dī-hē'drȧl), *a. Aëronautics.* **a** Of a kite or an airplane, having wings that make with one another a dihedral angle, esp. when the angle between the upper sides is less than 180°. **b** Of wing pairs, inclined at a dihedral angle to each other.

di-he'dral, *n., or* **di-he'dral an'gle***. *Aëronautics.* The angle included at the intersection of the imaginary surfaces containing the chords of the right and left wings. The main supporting surfaces of an airplane are said to have a dihedral angle when both right and left wings are upwardly or downwardly inclined to a horizontal transverse line. The angle is measured by the inclination of each wing to the horizontal. If the inclination is upward, the angle is *positive*; if downward, *negative.* The several main supporting surfaces of an airplane may have different amounts of dihedral. The dihedral is sometimes called *transverse* dihedral.

di-hy'drol (dī-hī'drōl; -drŏl), *n.* See HYDROL, below.

di-lu'tion*, *n.* The substitution of unskilled labor for skilled in such industrial operations as do not require skill, but which are sometimes, as under trade-union regulations, reserved for skilled labor.

di'na-mode (dī'nȧ-mōd), *n.* *Mech.* A practical unit of work equal to the work required to raise one ton one meter against the force of gravity.

di-ner'ic (dī-nĕr'ĭk), *a.* [1st *di-* + Gr. *νηρός* liquid.] *Physics.* Being, or of or pertaining to, the interface between two liquids, such as oil and water, contained in the same vessel, as distinguished from the boundary between a liquid and a gas or a liquid and a solid.

di-ni'tro-cel'lu-lose (dī-nī'trō-sĕl'ū-lōs), *n.* [*di-* + *nitro-* + *cellulose.*] Cellulose tetranitrate, a form of guncotton.

di-ni'tro-phe'nol (-fē'nōl; -nōl), *n.* [*di-* + *nitro-* + *phenol.*] *Org. Chem.* Any of six isomeric poisonous crystallized compounds, $C_6H_3(OH)(NO_2)_2$, certain of which are used in making picric acid and dyes.

din'kum (dĭŋ'kŭm), *a.* Honest; reliable; fair; square. *Slang, Australia.*

di'ode (dī'ōd), *n.* [2d *di-* + 2d *-ode.*] *Elec.* A form of electron tube having a cold anode and a heated cathode serving as a source of electrons. The *diode* serves as a rectifier of alternating currents.

dip*, *n.* *Aeronautics.* A sudden drop followed by a climb.

di-phos'gene (dī-fŏs'jēn), *n.* [*di-* + *phosgene*] *Chem.* A liquid compound, $ClCO_2CCl_3$, having the same percentage composition as phosgene but twice the molecular weight. It is very poisonous and was extensively used as a lethal "gas" in the World War.

di'plex re-cep'tion (dī'plĕks). *Radio.* Simultaneous reception of two independent signals by a single station.

di-rect'*, *a.* *Polit. Science.* Pertaining to, or affected immediately by, action of the people through their votes instead of through one or more representatives or delegates; as, *direct* nomination (see below), *direct* legislation.

direct action. Action that is direct, or without intervention; specif., action on the part of labor or its representatives designed to attain a desired end directly, as by means of demonstrations, strikes, sabotage, or other coercive acts; also, *Trade-Unionism*, action, such as a strike, initiated by a local union, or by part of its members, without reference to the provisions of the constitution of the national or international union with which the local union is affiliated. Cf. SYNDICALISM, below. — **di-rect'-ac'tion-ist,** *n.*

direct coupling. *Radio.* See COUPLING, above.

directional antenna. *Radio.* An antenna which receives or radiates better in some directions than in others. Cf. DIRECTIVE ANTENNA, below.

direction finder. *Radio.* A radio receiving device permitting determination of the direction from which received radio waves come to it. It commonly consists of a coil antenna mounted on a vertical axis so that it can be rotated freely.

directive antenna. *Radio.* An antenna which radiates better in some directions than in others. *Directive antenna* is rarer than *directional antenna*, the latter being used of either a radiating or a receiving antenna.

direct method. A method of teaching a foreign language, esp. a modern language, through conversation, discussion, and reading in the language itself without the use of the pupil's language, without translation, and without the study of formal grammar. The first words are taught by pointing to objects or pictures, and by performing actions

direct nomination. *Political Science.* The nomination of candidates for public office by direct popular vote rather than through the independent action of a convention or body of elected nominating representatives or delegates.

direct primary. *Political Science.* A primary at which direct nominations of candidates for office are made

dir'i-gi-ble*, *n.* See AIRSHIP, in the *Dictionary* and above.

dirt farmer. A farmer who himself works on the soil. *U. S.*

dis-charge'a-ble (dĭs-chär'jȧ-b'l), *a.* Capable of being discharged. — **dischargeable weight,** *Aëronautics*, in an airship, the gross buoyancy minus the fixed weight and the weight of the crew and such items of equipment (cf. DEAD LOAD, above) as are essential to enable the ship to fly and land safely. Cf. BUOYANCY, above.

dis-cov'er*, *v. t.* — **to be discovered**, originally, in drama, to be disclosed to the view of the audience when the curtains were drawn apart; hence, to be present as part of a dramatic representation at the opening of a scene; as, John is *discovered* seated before an open fire.

Discovery Day. = COLUMBUS DAY. See above.

dis'do-dec'a-he'droid (dĭs'dō-dĕk'ȧ-hē'droid), *n.* [2d *dis-* + Gr. *δώδεκα* twelve + *ἕδρα* seat, base + *-oid*] See FOURTH DIMENSION, below.

dis-hex'e-con'ta-he'droid (dĭs-hĕk'sē-kŏn'tȧ-hē'droid), *n.* [2d *dis-* + Gr. *ἑξήκοντα* sixty + *ἕδρα* seat, base + *-oid*] See FOURTH DIMENSION, below.

dispersed phase. *Phys. Chem.* That phase of a substance in which the material, in finely divided particles, is in a state of suspension in some medium, as distinguished from the solid, liquid, or gaseous phases. Colloidal solutions are in the dispersed phase.

disperse system. *Phys. Chem.* The form of dispersion of a substance in a solution, as crude or coarse dispersion, colloidal dispersion, and molecular dispersion; thus, clay in suspension in a solution takes the form of a certain *disperse system*, and the clay itself is the dispersoid.

dis-pers'oid (dĭs-pûr'soid), *n.* [*disperse* + *-oid.*] The substance dispersed in a disperse system (see above).

dis-place'ment*, *n.* *Psychoanalysis.* Transference of an affect from its originally associated element or condition to one relatively indifferent.

dis-solve' (dĭ-zŏlv'), *n.* *Moving Pictures.* The fading of one scene into another; a scene or a character which grows dim and is gradually replaced by another. The effect is produced by double exposure of the film in making the picture. Cf. DISSOLVING VIEW, in the *Dictionary*.

dissolved bone. A superphosphate fertilizer made by treating bone with sulphuric acid.

distance receptor. *Physiol.* A sense organ, as of vision or hearing, responsive to stimuli from a distant source.

Distinguished Service Cross. *Abbr., D. S. C.* **a** *U. S.* A cross of bronze for award to persons who, since April 6, 1917, have distinguished themselves by extraordinary heroism in connection with military operations against an armed enemy of the United States. **b** A British cross of silver (formerly the Conspicuous Service Cross, instituted in 1901 and renamed in 1915) for award to any officer in the Royal Navy below the rank of lieutenant commander for "distinguished service before the enemy."

Distinguished Service Medal. *Abbr., D. S. M.* **a** *U. S.* A bronze medal for award to persons who, since April 6, 1917, have distinguished themselves by meritorious service in a duty of great responsibility in time of war. **b** A British medal of bronze, instituted in 1914 for award to enlisted men in the Royal Navy and Marines for distinguished conduct in war

Distinguished Service Order. A British decoration, consisting of a gold cross and ribbon, instituted in 1886, for distinguished services performed by officers in the Army and Navy, and, later, the Royal Air Force *Abbr., D. S. O.*

dis-tor'tion*, *n.* **a** *Psychoanalysis.* The alteration of repressed impulses and phantasy products before they may appear to consciousness, being the resultant of opposing groups of psychic forces. **b** *Radio.* Change in wave form of an electric current or sound.

distributed capacity*. *Radio.* **a** The set of small capacities between various parts of a coil. **b** The effective capacity of the coil as a whole due thereto

dive*, *v. i.* *Aviation.* To descend or fall precipitately at an angle greater than the gliding angle, so that the descent is with increasing momentum. Cf. GLIDE. — *n.* *Aviation.* A steep glide.

diving rudder. *Aëronautics.* = ELEVATOR, below.

dix'ie (dĭk'sĭ), *n.* A kind of mess tin or oval pot, often used in camp for cooking or boiling something, as tea. *Slang.*

Do'ber-mann Pin'scher (dō'bĕr-mȧn pĭn'shĕr). A cross between the German shepherd dog and fox terrier (G. *Pinscher*); — named from the first breeder, Apoldaer A. Dobermann. The breed is lively and courageous.

dog robber. An officer's servant or personal attendant. — **dog robbing.** *Both Soldiers' Slang, U. S*

doll, *v. i. & t.* — **to doll up,** to dress with great care; array (one's self) in fine, or one's best, attire. *Slang.*

dollar diplomacy. **1.** Diplomacy used to promote the financial or commercial interests of a country abroad.

2. Diplomacy which seeks to use the country's commercial or financial interests to strengthen its power or effect its purposes in foreign relations.

dom'i-nance, *n.* *Biol.* A relation existing between a factor and its allelomorph such that in plants heterozygous for the factor in question the character expression is the same or essentially the same as that when the factor is homozygous. *Babcock & Clausen.*

domn (dŏm), *n.* [Roumanian *domnŭ*, fr. L. *dominus* master] Lord; — official title of the ruler of Roumania, Prince Carol I., from 1866 to 1881, when he was proclaimed king.

dope*, *n.* **1.** *Aeronautics.* **a** Any liquid preparation used to treat the cloth surface of airplane members to increase strength, produce tautness, or maintain air-tightness. **b** A liquid preparation applied to airship fabric to increase gas-tightness. It does not cause shrinking, as airplane dope does.

2. *Photography.* A liquid preparation or varnish used to facilitate retouching, block out portions of a negative, etc.

Dop'pler ef-fect' (dŏp'lĕr). The apparent change in the wave length of light or sound observed when the source and the observer are in motion relative to one another (see DOPPLER'S PRINCIPLE, in the *Dictionary*).

Do'ra (dō'rȧ), *n.* The British Defense of the Realm Act of 1914 (see above); — an acrostic. *Colloq.*

dos'age* (dōs'ȧj), *n.* In electrotherapeutics, radiotherapeutics, etc., the intensity of current, X rays, or the like, as adjusted for a patient, and the duration of application.

double cross. **a** The act or an instance of winning, or of doing one's best to win (a fight or a match of any kind), after engaging to lose *Sporting Slang.* **b** The act or an instance of betraying, swindling, cheating, or the like, a person with whom one is associated in an enterprise. Cf. CROSS, *n.*, 11, in the *Dict. Slang.*

dou'ble-cross', *v. t.* To work a double cross on (another). Cf. DOUBLE CROSS, above, and CROSS, *v. t.*, 12, in the *Dictionary.* — **dou'ble-cross'er,** *n.* *Both Slang.*

double detection. *Radio.* = SUPERHETERODYNE, below.

dou'ble-page' spread. An advertisement set across two full pages. *Advertising Cant.*

dou'ble-pole' switch (dŭb''l-pōl'). *Elec.* An electric switch which opens or closes two contacts simultaneously.

dou'ble-sur'faced (dŭb''l-sûr'fȧst), *a.* Having two finished surfaces; — said specif. of airplane wings or of aerocurves that are covered on both sides with fabric, etc.

dou'ble-throw' switch. *Elec.* An electric switch capable of being thrown in either direction, so that it opens or closes either of two contacts.

doup* (doup; dōōp), *n.* *Weaving.* A smooth strong thread used, with a skeleton harness frame in conjunction with the standard heddle, to produce a gauze effect by causing the thread to lie on alternate sides of the ground warp thread, in which position it is held by the filling; — so called because the thread is fastened to the lower end (see DOUP, in the *Dictionary*) of the skeleton harness frame.

down'—lead' (doun'lēd'), *n.* *Radio.* The part of an antenna which runs from the larger or main elevated portion to the transmitting or receiving set.

down'wash' an'gle (doun'wŏsh'). *Aëronautics.* The acute angle through which the air stream relative to an airplane is deflected by an airfoil. It is measured in a plane parallel to the plane of symmetry.

‖ **Dra'che** (drä'kĕ), *n.* [G.] See DRAGON BALLOON, below.

draft'ee' (drȧf'tē'), *n.* One who has been drafted, as for military service.

drag*, *n.* *Aëronautics.* The component parallel to the relative wind of the total force on an airfoil or aircraft due to the air through which it moves. In the case of an airplane, that part of the drag which is due to the wings is called *wing resistance;* that due to the rest of the airplane is called *structural,* or *parasite, resistance.*

dragon balloon. A kite balloon; — a misnomer due to mistranslation of Ger. *Drache* a dragon, also, a kite.

‖ **Drang nach O'sten** (drȧng näk ō'stĕn). [G.] Lit., pressure or thrust toward the East; — a phrase expressing the policy of the German expansionists, who urged pressure toward the East, both political and commercial.

draw step. *Dancing.* A step in which the foot is drawn back or aside, as before the dip in the one-step.

dread'nought'* (drĕd'nôt'), *n.* **a** [*cap.*] A British battleship, completed 1906–07, having an armament of ten 12-inch guns, and twenty-four 12-pound quick-fire guns for protection against torpedo boats. This was the first battleship of the type characterized by a main armament of big guns all of the same caliber She had a displacement of 17,900 tons at load draft, and a speed of 21 knots. **b** Hence, any battleship having its main armament entirely of big guns all of one caliber. Since the *Dreadnought* was built the caliber of the heaviest guns has increased from 12 in. to 13½ in., 14 in., 15 in., or more, and the displacement of the largest battleships from 18,000 to 35,000 tons and upwards. The term *superdreadnought* is popularly applied to battleships of the greater displacement and gun caliber

drift'*, *n.* *Aeronautics.* **a** The lateral velocity of an aircraft, due to air currents or other causes. **b** = DRIFT ANGLE. **c** Drag; — a former use.

drift angle. *Aeronautics.* The angular deviation from a set course due to cross currents of wind; leeway.

drift'er*, *n.* Specif., a boat engaged in, or of a type used in, drift fishing (see DRIFT, *n.*, 11 **b**, in the *Dict.*). Many drifters, and other fishing boats were used during the World War in the British coast defense, as against U-boats.

drift meter. *Aeronautics.* An instrument for measuring or indicating the drift angle.

drip band *or* **flap.** A strip of fabric attached by one edge to the envelope of a balloon or airship in such a way that rain will run off its free edge instead of dripping into the basket or car. The drip flap also helps to keep the ropes by which the car is suspended dry and nonconducting.

drive*, *n.* **1.** An attack, as in military operations, in which a push forward is made with very great force and violence.

2. A vigorous effort, as by a committee, to raise money within a limited time, as for a charitable or patriotic purpose, to enlist new members for an organization, or the like. *Colloq.* **3.** In an automobile vehicle, all the apparatus collectively by means of which the propulsion of the vehicle is controlled and directed; also, the place where the operator sits to drive; as, a left-hand *drive;* an inclosed *drive.*

drome (drōm), *n.* Short for AIRDROME. *Slang.*

Dro-soph'i-la (drō-sŏf'ĭ-lȧ), *n.* [NL, fr. Gr *δρόσος* dew, moisture, liquid + *φίλος* loving.] *Zoöl.* A genus containing the common fruit fly (*D. melanogaster*, syn. *D. ampelophila*), members of which inhabit chiefly fermenting fruits, and liquids, as wine, beer, and cider. The genus has been used extensively in breeding experiments for the study of inheritance of characters.

drum'fire', *n.* The firing of, or discharge of projectiles from, a machine gun or machine guns; — so called from the drumlike sound. Cf. DRUM, *n.*, 4 **j**, in the *Dictionary.*

dry farming. *Agric.* Production of crops without irrigation in regions of low or otherwise unfavorable rainfall, principally by tillage methods conserving soil moisture and by the use of drought-resistant crops. — **dry farm.**

dry weight. *Aëronautics.* The weight of an engine including carburetors, propeller-hub assembly, and ignition system, but excluding exhaust manifolds, oil, and water.

D. S. C. *Abbr.* Distinguished Service Cross. *U. S. & Eng.*

D. S. M. *Abbr.* Distinguished Service Medal *U. S. & Eng.*

Dual Alliance. **1.** An alliance between Austria-Hungary and Germany against Russia, entered upon Oct. 7, 1879.

2. Also **Dual Entente.** A friendly understanding entered into between France and Russia, 1890–1892, strengthened by a military convention in 1892–1893. It later became a part of the Triple Entente (which see, below).

duck'board' (dŭk'bōrd'), *n.* *Mil.* A plank used in covering impassable muddy areas or roads, or to floor trenches.

duck'pin' (dŭk'pĭn'), *n.* *Tenpins.* **a** A short, stout form of pin bowled at with small balls (5 inches in diameter). **b** *In the form* **duckpins,** *construed as a sing.* The game played with such pins.

dud* (dŭd), *n.* One that is without life or energy; a failure; specif., a bomb that fails to explode. — *a.* Without energy, life, or the like; lifeless; dead. *Both Slang, orig. Eng.*

dug'out'*, *n.* A cave or excavation made in a hillside, the side of a trench, etc., often roofed with logs and sod, for storage, protection from gunfire, and the like; an abri. Such dugouts were widely used during the World War.

dumb'—bell'* (dŭm'bĕl'), *n.* A dull and stupid person; a dolt. *Slang, U. S.*

dummy antenna. *Radio.* A device used in radio measurements to simulate an antenna, usually comprising capacity and inductance

dump*, *n.* A place where military supplies, as shells or other ammunition, are heaped or stacked for distribution, as in the World War.

dump'ing*, *n.* *Com.* The selling of goods in quantity at an abnormally low price, as to get rid of a surplus, to break down competition, or to reduce the general market price.

dumping duty. A duty imposed by an antidumping law.

du'o-graph (dū'ō-grăf), *n.* [*duo-* + *-graph.*] *Photo-engraving.* A picture printed from two half-tone plates made with the screen set at different angles, and usually printed in two shades of the same color or in black and one tint.

du'o-tone (-tōn), *n.* [*duo-* + *tone.*] *Photo-engraving.* Any picture printed in two shades of the same color, as duotypes and duographs are usually printed.

du'o-type (-tīp), *n.* [*duo-* + *-type.*] *Photo-engraving.* A print made from two half-tone plates that are made from the same negative, but etched differently.

du'plex*, *v. t.* *Metal.* To use in dual combination (as two furnaces) in a specific process, as in the duplex process.

duplex house. A two-family house so arranged that one family occupies all the first-floor rooms and two or more rooms on the second floor, which are reached by means of a private stairway and are cut off by partitions from the rest of the second floor, which, with the entire third floor, is occupied by the other family.

duplex iron. *Metal.* Cast iron that has been heated in an electric furnace after being melted in the usual manner in a cupola.

duplex process. *Metal.* A process for making steel in which the material is partially treated in a furnace of one type and then transferred without interruption to a furnace of another type in which the making of the steel is finished. In the original and true duplex process an acid-lined Bessemer converter is used for the first stage and a basic-lined open-hearth furnace for the finishing stage, but the term is now sometimes applied to other combinations of furnaces.

Cf. ACID PROCESS, BESSEMER PROCESS, in the *Dictionary*.

duplex signaling. *Radio.* Simultaneous transmission and reception of signals in both directions between two stations.

duplex steel. *Metal.* Steel made by the duplex process.

du-ral'u-min (dū-răl'ū-mĭn ; dū'rà-lū'mĭn), *n.* [*durable* + *aluminium*.] *Metal.* An alloy of aluminium, bearing the trade-mark *Duralumin*, comparable in strength and hardness to soft steel, consisting of 95.5 parts of aluminium to 3 parts of copper, 1 of manganese, and 0.5 of magnesium.

du've-tyn' (dōō'vĕ-tĕn'), *n.* Also spelled *duvetine* and *duvetyne*. [F. *duvet* down.] Any of several soft textile fabrics, as of wool or silk, having a long plushlike nap.

dy'arch-y* (dī'ar-kĭ), *n.* [Gr δύο two (cf. 1st DI-) + *-archy*.] A dual form of government in each of the nine major provinces of India, by which the provincial governor and his executive council (appointed by the king) control certain "reserved" subjects, or functions, as justice, police, land laws, famine relief, and irrigation; while the governor and ministers (chosen by him from the legislative council) control certain "transferred" subjects, as sanitation, public works, and education. — **dy-ar'chi-cal** (dī-ar'kĭ-kăl), *a.*

dynamic factor. *Aëronautics.* The ratio between the load carried by any part of an aircraft when accelerating, or when otherwise subjected to abnormal conditions, and the load carried in normal flight.

dys-gen'ic (dĭs-jĕn'ĭk), *a.* [*dys-* + *-genic*.] *Eugenics.* Detrimental to the race or tending to counteract racial improvement through the exertion of a degenerative influence in the propagation of offspring.

dys'pi-tu'i-ta-rism (dĭs'pĭ-tū'ĭ-tà-rĭz'm), *n.* [*dys-* + *pituitary* + *-ism*.] *Med.* A condition due to disordered functioning of the pituitary body (which see, in the *Dict.*).

ea'gle*, *n.* *Golf.* A score of two strokes less than par on any hole but a par 3 hole. *Slang or Cant.*

eagle boat. *Naut.* A special type of submarine chaser, used in the United States Navy, smaller than a destroyer, but larger than a subchaser and carrying a heavier battery.

East Coast fever. A serious form of piroplasmosis in cattle caused by *Piroplasma parvum*, which formerly existed in a latent form along the East African Coast, but which, since 1900, has spread into the interior.

ech'e-lon* (ĕsh'ē-lŏn), *v. t.* *Mil.* To give a special deflection to (each of the guns of a battery) so that the increments of deflection increase by successive and equal amounts.

economic blockade. A form of blockade whereby a country is subjected to the severance of all trade or financial relations with other countries. See LEAGUE OF NATIONS.

ec'phore, ek'phore (ĕk'fōr ; 201), *v. t.* [NL.; *ec-* + Gr. *-φόρος* (see -PHOROUS).] *Psychol.* = ECPHORIZE.

ec-pho'ri-a, ek-pho'ri-a (ĕk-fō'rĭ-à), *n.* ; *pl.* E. ECPHORIAS (-àz), L. -RIÆ (-ē). Also **ec'pho-ry, ek'pho-ry** (ĕk'fō-rĭ) ; *pl.* -RIES (-rĭz). [NL.; *ec-* + Gr. *-φόρος* (see -PHOROUS) + *-ia*.] *Psychol.* The rousing of an engram or system of engrams from a latent to an active state, as by repetition of the original stimulus or by mnemic excitation.

ec'pho-rize, ek'pho-rize (ĕk'fō-rīz), *v. t.* *Psychol.* To revive or rouse (an engram or system of engrams) from latency. — **ek'pho-ri-za'tion** (-rĭ-zā'shŭn ; -rĭ-zā'-), *n.*

edge*, *n.* In poker, the age ; — a corruption. See AGE, *n.*, 12, in the *Dictionary*. Hence, *Slang*, an advantage ; as, to have the *edge* on one.

Ed'i-son cell. [See EDISON EFFECT.] A type of storage battery with nickel-iron plates and alkaline electrolyte.

effective pitch. See PITCH, below.

ef-fec'tor*, *n.* *Physiol.* An organ, as a muscle or gland, which responds to sensory stimuli to keep the organism in relation to its environment and to regulate it internally.

Eg'nell's law (ĕg'nĕlz). [After Axel *Egnell* (1876–), Swedish scientist.] *Meteor.* The law, commonly approximately true, that between the altitudes of one mile and five miles, the velocity of the wind increases with altitude in the same proportion that the density of the air decreases.

e'go-cen'tric (ē'gō-sĕn'trĭk ; ĕg'ō-), *a.* [*ego* + *centric*.] Having one's attention centered on one's self and on one's own interests. — *n.* An egocentric person — **e'go-cen-tric'i-ty** (-sĕn-trĭs'ĭ-tĭ), *n.* — **e'go-cen'trism** (-sĕn'trĭz'm), *n.*

Ein-stein'i-an (īn-stīn'ĭ-ăn), *a.* Of or pertaining to Albert Einstein, German physicist, or the theory of relativity developed by him. See EINSTEIN THEORY, below.

Ein'stein the'o-ry (īn'stīn). The theory of relativity ; — often so called because first developed by Einstein. See RELATIVITY, below.

Eint'ho-ven gal'va-nom'e-ter (ĭnt'hō-vĕn). [Devised, in 1901, by Willem *Einthoven* (1860–), physiologist at Leiden, Holland.] *Elec.* A string galvanometer.

‖ **Ein'wohn'er-wehr'** (īn'vōn'ĕr-vār'), *n.* [G., lit., inhabitant, or citizen, defense.] Any of various bodies of civic guards organized locally in Germany in 1919 for service in aid of the civil power.

E-lec'tra com'plex (ē-lĕk'trà). *Psychoanalysis.* The Œdipus complex in females ; — so called from Electra's love of her father and hatred of her mother.

e-lec'tra-gist (-trà-jĭst), *n.* [*electro-* + Gr. *ἄγειν* to conduct + *-ist*.] One who installs electrical apparatus and sells electrical goods, and who is a member of the Association of Electragists — International. — **e-lec'tra-gy** (-jĭ), *n.* ☞ *Electragist* is a trade-mark word.

electric field intensity. = RADIO FIELD INTENSITY, below.

electric steel. *Metal.* Steel that has been produced or refined in an electric furnace.

e-lec'tro-car'di-o-graph' (ē-lĕk'trō-kär'dĭ-ō-grăf'), *n.* [*electro-* + *cardiograph*.] A string galvanometer used to record photographically the nervous impulses set up by heart action. — **e-lec'tro-car'di-o-graph'ic** (-grăf'ĭk), *a.*

e-lec'tro-car'di-og'ra-phy (ē-lĕk'trō-kar'dĭ-ŏg'rà-fĭ), *n.* *Med.* The science of recording the electrical activities of the heart. Active tissue is electrically negative to resting tissue.

e-lec-trom'er-ism (ē-lĕk-trŏm'ĕr-ĭz'm), *n.* [*electro-* + *mero-* + *-ism*.] The process of ionization in gases.

e-lec'tron*, *n.* — **K, L,** and **M electrons,** *Physics & Chem.*, the groups of electrons whose orbits are closest to the nucleus of an atom, the two K electrons being innermost. X rays are due to the passage of electrons from an outer orbit to an inner one.

electron tube. *Elec.* A special form of vacuum tube (see VACUUM TUBE, in the *Dict.*), consisting of a combination of a heated cathode, an anode, and a third electrode for controlling the current flowing between the other two electrodes, all contained within an inclosure evacuated to an exceedingly low pressure ; — called in full *three-electrode electron tube*. Its operation depends essentially on the flow of electrons emitted from the hot cathode. Common forms resemble in appearance small incandescent lamp bulbs. Called also *tube, vacuum tube, vacuum valve*, etc.

e-lec'tro-steel' (ē-lĕk'trō-stēl'), *n.* [*electro-* + *steel*.] *Metal.* Electric steel.

elephant bug. = ELEPHANT BEETLE, **b**, in the *Dict.*

el'e-va'tor*, *n.* *Aeronautics.* In an airplane, a movable auxiliary surface, usually attached to the tail plane, the function of which is to cause the craft to pitch, that is, to rotate about its lateral axis.

elk*, *n.* **1.** *Leather Trade.* A light, very flexible, chrome-tanned calf leather, used especially in sporting shoes

2. [*cap.*] A member of the Benevolent and Protective Order of Elks (B. P. O. E.), a fraternal association founded in 1868, and now having lodges throughout the United States (see FRATERNAL EMBLEMS, plate, p. 1192).

em-bus' (ĕm-bŭs'), *v. i.* [*em-* + *bus*.] To put (as troops) into a bus or busses (or a motor truck or trucks). — *v. t.* To get into a bus or busses. *Both Colloq.*

‖ **em'bus'qué'** (an'bus'kā'), *n.* [F., p p of *embusquer*. See AMBUSH, *v. t.*] One who in time of war seeks to avoid danger, as by remaining at home or obtaining some situation in the army far from the front ; a shirk ; slacker.

e-mis'sion*, *n.* *Radio.* **a** The flow of electrons out of the heated filament or cathode of an electron tube. **b** The amount of current constituting such flow, usually expressed in milliamperes.

Emk. *Abbr.*; *pl.* EMKS. Esthonian mark, a monetary unit of Esthonia equivalent at par to $0.193.

em-path'ic (ĕm-păth'ĭk), *a.* Of the nature of or characterized by empathy.

em'pa-thize (ĕm'pà-thīz), *v. t. & i.* ; -THIZED (-thīzd) ; -THIZ'ING (-thīz'ĭng). [See EMPATHY ; -IZE.] To project one's self into an imaginary situation, or the situation or feelings of another.

em'pa-thy (ĕm'pà-thĭ), *n.* [Gr. *ἐμπάθεια* ; *ἐν* in + *πάθος* suffering, passion. See 2d EN- ; PATHOS ; cf. SYMPATHY.] The projecting of one's self into an imaginary situation, or into the situation of another person or thing, and the undergoing of sensations believed to be connected with it

‖ **em'pen'nage'** (an'pĕ'nazh'), *n.* [F.] *Aëronautics.* The tail of an aircraft. See TAIL, below

empire cloth. *Elec.* Varnished cloth used for insulation.

emulsion colloid. An emulsoid.

e-mul'soid (ē-mŭl'soid), *n.* [*emulsion* + *-oid*.] *Physiol Chem.* A colloidal solution in which the particles of the solute are in the liquid state ; a true emulsion ; loosely, a colloid which assumes a gelatinous consistency ; — called also *emulsum colloid*.

‖ **en-ceph'a-li'tis le-thar'gi-ca** (ĕn-sĕf'à-lī'tĭs lē-thär'jĭ-kà). [NL. See ENCEPHALITIS, LETHARGY.] *Med.* Epidemic encephalitis ; specif., an epidemic inflammation of the brain, producing somnolence (whence it is popularly called "sleeping sickness") and giving rise to palsies of the cranial nerves and to asthenia.

en'do-crine (ĕn'dō-krĭn), *a.* [*endo-* + Gr. *κρίνειν* to separate.] *Med.* Secreting internally ; — applied esp. to organs whose only known function is to secrete into the blood or lymph a substance which acts chemically upon a specific organ or organs, as the thyroid and parathyroid glands, the suprarenal capsules, pituitary body, and pineal gland.

en'do-crine (-krĭn), **en'do-crin** (-krĭn), *n.* *Physiol.* Any of the internal secretions of the body.

en'do-crin'ic (-krĭn'ĭk), *a.* *Anat.* Endocrinous.

en'do-cri-nol'o-gy (-krĭ-nŏl'ō-jĭ), *n.* [*endocrin* + *-logy*.] *Med.* The science or study of the internal secretions (secretions of the ductless glands, as the thyroid gland, pituitary, suprarenals, etc.), their physiology and pathology as related to each other and to the organism as a whole.

en'do-cri-nop'a-thy (-nŏp'à-thĭ), *n.* [*endocrin* + *-pathy*.] *Pathol.* A disease due to disorder in action of one or more of the endocrine organs or ductless glands.

en-doc'ri-nous (ĕn-dŏk'rĭ-nŭs), *a.* *Anat.* Of or pert. to an internal secretion or to a gland producing such a secretion.

en'do-mix'is (ĕn'dō-mĭk'sĭs), *n.* [NL. ; *endo-* + Gr. *μίξις* a mixing.] *Zool.* Dissolution of the macronucleus of an infusorian and its reorganization from the micronuclei without intervention of conjugation.

en'do-psy'chic (ĕn'dō-sī'kĭk), *a.* [*endo-* + *psychic*.] *Psychol.* Arising or existing within the psyche.

en-flag'el-la'tion (ĕn-flăj'ĕ-lā'shŭn), *n.* [See 1st EN-.] *Biol.* = FLAGELLATION, below.

en'gram (ĕn'grăm), *n.* [2d *en-* + *-gram*.] *Psychol.* A lasting modification in an organism, produced by a psychic experience and forming the physiological record, usually latent, of that experience. — **en-gram'mic** (ĕn-grăm'ĭk), *a.*

engram complex. *Psychol.* The association of a number of engrams simultaneously formed.

en-graph'i-a (ĕn-grăf'ĭ-à), *n.* Also **en'gra-phy** (ĕn'grà-fĭ). [NL. See 2d EN- ; -GRAPHY.] *Psychol.* **a** The making of engrams. **b** The impressibility of organic substances which permits of the formation of engrams. — **en-graph'ic** (ĕn-grăf'ĭk), *a.* — **en-graph'i-cal-ly,** *adv.*

‖ **en'tente'*** (an'tänt'), *n.* — **the Entente,** the Triple Entente (which see, below) ; hence, by extension, the nations collectively which were included in the Entente ; — often used attributively ; as, the *Entente* allies.

‖ **En'tente' Cor'diale'*** (an'tänt' kôr'dyal'). Specifically, the alliance between France and Great Britain, signed April 8, 1904.

En-tent'o-phile (ĕn-tĕn'tō-fĭl ; -fīl) } *a.* [*Entente* + *o-* + **En-tent'o-phil** (ăn-tan'tō-fĭl) } *-phile, -phil*.] Approving or favoring the Entente or its policy. — *n.* One who favored or upheld or who favors the Entente.

entering edge. *Aeronautics.* See LEADING EDGE, below.

en've-lope*, *n.* *Aëronautics.* **a** The outer covering of a rigid airship. **b** In a balloon or a nonrigid or semirigid airship, the bag which contains the gas.

E'o-an-thro'pus (ē'ō-ăn-thrō'pŭs), *n.* [NL. ; Gr. *ἠώς* dawn (see EO-) + *ἄνθρωπος* man.] *Zoöl. & Ethnol.* The genus consisting of the Piltdown man. See PILTDOWN MAN, below.

ep'ac-ma'ic (ĕp'ăk-mā'ĭk), *a.* Of or pert. to the epacme.

ep'i-sode*, *n.* *Moving Pictures.* See SERIAL, below.

ep'i-stat'ic (ĕp'ĭ-stăt'ĭk), *a.* [See EPISTASIS.] *Biol.* Suppressing or controlling the action of another ; — said of certain factors or inherited characters. Cf. HYPOSTATIC, below.

e-qua'tion of Bou'guer' (bōō'gā'). [See BOUGUER'S HALO.] *Meteor.* An equation for computing the intensity of the solar radiation outside the atmosphere from its measured intensities at the surface of the earth.

e'qui-pluve (ē'kwĭ-plōōv ; 243), *n.* [*equi-* + L. *pluvia* rain.] *Meteor.* A line connecting places at all of which the same fraction of their several annual rainfalls occurs during any specified portion of the year, such as a given month.

e-quiv'a-lence*, *n.* — **principle of equivalence,** *Physics*, the assumption of the identity of gravitational and inertial mass ; the postulate that for any field of gravitational force there may be substituted, as exactly equivalent and experimentally indistinguishable, a field of accelerations introduced as a space deformation involved in a transformation of coordinates. *Albert Einstein.*

er'ga-toc'ra-cy (ûr'gà-tŏk'rà-sĭ), *n.* ; *pl.* -CIES (-sĭz). [Gr. *ἐργάτης* worker + *-cracy*.] The rule or dominion of the workers.

er'go-tox'ine (ûr'gō-tŏk'sĭn ; -sēn), *n.* Also **-in.** [*ergot* + *toxine*.] *Chem.* An amorphous alkaloid, $C_{35}H_{41}O_6N_5$, regarded as the active principle of ergot ; — called also *hydroergotinine*. It yields ergotinine by dehydration.

er'o-tism*, *n.* Also **e-rot'i-cism*.** *Psychoanalysis.* The love life in any or all of its physical or psychical manifestations, whether in partial, infantile form, in perversions, or, in complete adult love, toward persons or other objects, comprising all the sexual components and their sublimation.

‖ **Er-satz'** (ĕr-zàts'), *n.* [G.] Compensation ; reparation ; replacement ; — often used adjectively [*l. c.*], as *ersatz* coal.

Er-win'i-a (ĕr-wĭn'ĭ-à), *n.* [NL., after *Erwin* F. Smith (1854–), American bacteriologist.] *Bacteriol.* A genus of bacteria of the order Eubacteriales, pathogenic to plants, being motile rods with peritrichous flagella. *E. amylovora* is the causative agent of pear blight.

es'ca-drille' (ĕs'kà-drĭl' ; *F.* ĕs'kà'drē'y'), *n.* [F., dim. of *escadre* squadron, or fr. It. *squadriglia*.] **1.** *Naval.* A squadron of war vessels, usually eight.

2. *Mil.* In European air commands, esp. in the French army, a unit containing, usually, six airplanes ; as, the Lafayette *Escadrille* in the French army, during the World War.

Esch'–Cum'mins Transportation Act (ĕsh'kŭm'ĭnz). [After John Jacob *Esch*, representative from Wisconsin, and A. B. *Cummins*, senator from Iowa.] An act, passed Feb. 28, 1920 (66th Congress), providing for the return of the railroads to private owners ; authorizing loans to railroads ; creating a Railroad Labor Board to which all labor disputes must be presented before a strike ; and extending the powers of the Interstate Commerce Commission.

‖ **es-cu'do*** (ĕs-kōō'dō), *n.* [Pg.] A silver coin and gold monetary unit of Portugal, containing 100 centavos, equal in value to the former milreis, and equivalent at par to $1.08.

Es'pe-ran-ti'do (ĕs'pĕ-ràn-tē'dō), *n.* [*Esperanto* + *Ido*.] An artificial language, intended for universal use, which is a simplified form of Esperanto, but with less radical changes than those adopted in Ido. Cf. ESPERANTO, in the *Dict.* ; IDO, below. — **Es'pe-ran-ti'dist** (-dĭst), *n. & a.*

es'ter-ize (ĕs'tĕr-īz), *v. t. & i.* *Chem.* To convert, or be converted, into an ester ; to esterify. — **es'ter-i-za'tion** (-ĭ-zā'shŭn ; -ĭ-zā'shŭn), *n.*

et'a-lon post, *or* **et'a-lon** (ĕt'à-lŏn), *n.* [F. *étalon* standard (of weights and measures).] One of the rods of metal or other suitable material used to keep the plates of an interferometer at a fixed and known distance apart.

eth'yl gas. Gasoline containing a small amount of lead tetraethyl to prevent knocking of the engine.

‖ **é'toile'*** (ā'twàl'), *n.* [F., star.] A satin fabric with plain or changeable lustrous surface.

eu'ge-nism (ū'jĕ-nĭz'm), *n.* The combination of influences best suited to improve the inborn or native qualities of a race or breed, esp. the human race. Cf EUGENICS, in *Dict.*

eu'ge-nist (-nĭst), *n.* One versed in eugenics.

eu'sol (ū'sōl ; -sŏl), *n.* [*eu-* + *solution*.] *Med.* An antiseptic consisting of a 0.5 per cent solution of boric acid and hypochlorous acid, used esp. for treatment of war wounds.

eu-then'ics (ū-thĕn'ĭks), *n.* [From Gr. *εὐθηνεῖν* to thrive ; *εὖ* well + *τιθέναι* to place, make.] The science having to do with the betterment of living conditions, through conscious endeavor, in order to secure efficient human beings. *Euthenics* deals with race improvement through environment. *Ellen H. Richards.*

eu'the-nist (ū'thĕ-nĭst), *n.* One versed in euthenics.

ex-an'the-ma*, *n.* *Hort.* = DIE-BACK, in the *Dict.*

ex-cess'* (ĕk-sĕs'), *v. t.* To charge (a railway passenger a certain sum) by way of an excess fare or rate ; as, to *excess* a passenger a half fare. *Brit.*

ex-cess'–prof'its tax. A tax on business profits which are in excess of the average profits over a specified term of years ; specif. : a tax for revenue levied in various countries during the World War and after, as in the United States and Great Britain. In both countries excess-profit taxes terminated in 1921.

ex'hi-bi'tion-ist*, *n.* *Med.* One who practices or tends to exhibitionism.

exit pupil. *Optics.* The image of the stop, which limits the aperture of a telescope, formed by the eyepiece.

ex'o-tox'in (ĕk'sō-tŏk'sĭn), *n.* [*exo-* + *toxin*.] *Bacteriol.* A toxin excreted by a microörganism and afterwards obtainable by filtration without destruction of the microörganism.

expansion ammeter. *Elec.* A thermal ammeter in which the heat effect is indicated by expansion of the heated wire or strip.

ex-pres'sion-ism*, *n.* In any form of art, as literature, painting, etc., the theory or practice of expressing one's inner, or subjective, emotions and sensations ; postimpressionism (which see, below). — **ex-pres'sion-ist*,** *n.*

ex'tra-cur-ric'u-lar (ĕks'trà-kŭ-rĭk'ū-lär) } *a.* Of or **ex'tra-cur-ric'u-lum** (ĕks'trà-kŭ-rĭk'ū-lŭm) } pert. to those activities, as debating, dramatics, and athletics, which form part of the life of school or college students, but which are not part of the regular courses of study.

ex'tra-vert (ĕks'trà-vûrt) } *n.* *Psychol.* One whose emo-**ex'tro-vert** (ĕks'trō-vûrt) } tions pass readily into external expressions and action, the interest occupying itself upon external objects.

ex'tra-vert } *v. i.* [See EXTRAVERT, *v. t.*] *Psychol.* To **ex'tro-vert** } direct one's interest toward external objects ; — contrasted with *introvert*. — **-ver'sion** (-vûr'shŭn), *n.*

ex-trude'* (ĕks-trōōd'), *v. t. Metallurgy.* To shape or form by forcing metal heated to a semiplastic condition through dies by the use of hydraulic power; as, *extruded* rods.

fab'ri-cate*, *v. t.* Specif.: **a** To make, shape, or prepare (a part of anything, as of a ship, bridge, automobile, etc.) according to standardized specifications, so as to be interchangeable. **b** To construct or build up into a whole by uniting interchangeable or standardized parts, often made elsewhere; as, a *fabricated* ship, automobile, or the like.

fab'ri-koid (făb'rĭ-koid), *n.* [See FABRIC; -OID.] An impervious fabric, generally leatherlike in appearance, having a cloth foundation and a pyroxylin surface, bearing the trade-mark *Fabrikoid*. It is used in upholstery, for making traveling bags, bindings for books, etc.

fac'tor*, *n. Biol.* The assumed causative agent that is transmitted from parent to offspring and determines the development in the offspring of a certain character; a gene.

fade*, *v. t.* — **to fade in,** *Moving Pictures,* to cause (a picture) to come up (that is, become clear) gradually on the screen. Cf. INTERPOSE, below. — **to fade out,** *Moving Pictures,* to cause (a picture) gradually to disappear from the screen — **fade'-in'**, *n.* — **fade'-out'**, *n.*

fad'ing* (făd'ĭng), *n. Radio.* Fluctuation in intensity of received wave while the adjustments of sending and receiving apparatus remain unchanged.

fag*, *n.* A cigarette. *British Slang.*

fair'ing, *n. Engin.* A member or structure the primary function of which is to produce a smooth outline and to reduce head resistance or drag, as in an aircraft, and which does not in general bear any stress.

fal'con*, *n.* = SOKOL, below.

fall wind. See KATABATIC, below.

far'a-day (făr'ă-dā), *n.* [After Michael *Faraday,* Eng. physicist.] *Elec.* The amount of electricity required in electrolysis to liberate one gram equivalent (96,500 coulombs).

fard (fărd), *n.* [Corrupt. of Ar. *firdh* the fruit, esp., of the Theban palm, fr. *faradh* to separate.] A kind of small, dark-brown, shiny date, grown chiefly in and about Oman in eastern Arabia. The dates are not clustered.

far'mer-ette' (far'mĕr-ĕt'), *n.* [See -ETTE.] A woman who farms or works on a farm; farmeress. *Colloq.*

Farm'er—La'bor par'ty. *U. S. Politics.* A minor radical party formed in 1920 by the Committee of Forty-Eight, the Nonpartisan League, and other groups. Its platform demanded the election of Federal judges, the nationalization of railroads, mines, and banks, and Federal loans to farmers at a low rate of interest. In 1924 it broke up into factions

Farm Loan Act, Board. See FEDERAL LAND BANK, below.

‖ **Fa'scio** (fa'shō), *n.; pl.* -SCI (-shē). [It.] See FASCISTI.

Fas'cism (făs'ĭz'm), *n.* [It. *fascismo,* fr. *fascio* a (political) group, a club, lit. a bundle, fr. L *fascis* a bundle. Cf. FASCES.] The principles of the Fascisti.

‖ **Fa-scis'mo** (fa-shēs'mō), *n.* [It.] Fascism.

Fas'cist (făs'ĭst), *n.* Eng. form of FASCISTA.

‖ **Fa-sci'sti** (fă-shē'stē), *n. pl.; sing.* FASCISTA (-stă). [It. fr. *fascio* (see FASCISM), with ref. also to L. *fasces,* as if meaning "bearer of the fasces," because the *Fascisti* are supposed to typify obedience to the law as did the lictors in ancient Rome.] An Italian organization, strongly loyal and patriotic, formed for opposing all radical elements in the country, as Bolshevists, Communists, and the like. It was organized in 1919, and under the leadership of Benito Mussolini soon became very powerful and active. Each local branch is called a *Fascio,* and all the organizations collectively form the *Fasci.* Cf. BLACK SHIRT, above. Hence, elsewhere, as in Great Britain, Bavaria, Mexico, etc., a similar organization, usually strongly nationalistic and antisocialistic.

fea'ture*, *n. Newspapers & Periodicals.* **a** A distinctive or prominent article, story, or picture. **b** A special department or serial picture. *Both Cant.*

Federal Food and Drug Act. See PURE FOOD AND DRUG ACT, below.

Federal Land Bank. Any of twelve regional banks established under the **Federal Farm Loan,** or **Rural Credits, Act,** July 17, 1916, to facilitate the furnishing of capital for farms by long-time loans. Loans are made to farmers through subsidiary cooperative farm-loan associations on first mortgages only, not exceeding one-half the value of the farm.

Federal Reserve System. A banking system established in the United States by the **Federal Reserve Act** (called also **Owen-Glass Federal Reserve Act**) of December 23, 1913, to concentrate the banking resources of the country and to provide an elastic currency, with the gradual displacement of national bank notes. In each of the twelve districts into which the United States was divided for the purposes of this act a **Federal reserve bank** was organized to serve as a bank of reserve and rediscount for member banks which include all national banks and many State banks and trust companies. Federal reserve banks have also the power to issue currency (**Federal reserve notes** and **Federal reserve bank notes**). A **Federal Reserve Board** (organized Aug. 12, 1914) of seven members was created, with general supervisory power over the system.

Federal Trade Commission. *U. S. Govt.* A commission of five members (created by an act of 1914) appointed by the President, to prevent unfair methods of commerce, to aid in enforcing antitrust laws, and to investigate business practice and management.

feed'—back', *a. Radio.* See REGENERATIVE, below.

feed'—back' coil. *Elec.* A coil used, in regenerative amplification or in generation of alternating current by electron tubes, to provide mutual inductance between plate and grid circuits.

feed'stuff' (fēd'stŭf'), *n.* Any agricultural product, as oats or alfalfa, used to feed cattle or other live stock.

fem'i-nism*, *n.* The theory, cult, or practice of those who hold that present laws, conventions, and conditions of society prevent the free and full development of woman, and who advocate such changes as will do away with undue restrictions upon her political, social, and economic conduct and relations; also, the propaganda for securing these changes. — **fem'i-nist,** *n. & a.* — **-nis'tic** (-nĭs'tĭk), *a.*

fer'ber-ite (fĕr'bĕr-ĭt), *n.* [After Rudolph *Ferber,* of Gera, Germany.] *Min.* A ferrous tungstate, $FeWO_4$, with a little manganese, occurring in black granular masses.

fer'ro-ce'ri-um (fĕr'ō-sē'rĭ-ŭm), *n.* [*ferro-* + *cerium.*] A crude iron alloy containing a high percentage of cerium.

fer'ro-phos'phor-us (-fŏs'fŏr-ŭs), *n.* [*ferro-* + *phosphorus.*] *Metal.* A crude alloy of iron and phosphorus. It is added to the molten bath when it is desired to incorporate a little phosphorus in iron or steel.

fer'ro-zir-co'ni-um (-zĕr-kō'nĭ-ŭm), *n.* [*ferro-* + *zirconium.*] *Metal.* A crude iron alloy containing a high percentage of zirconium.

fer'ti-li'zin (fûr'tĭ-lī'zĭn), *n.* [*fertilize* + *-in.*] *Physiol.* A hypothetical substance, formed in an egg prior to fertilization, which initiates egg cleavage when acted upon either by a spermatozoon or by agencies which induce parthenogenesis

fet'e-ri'ta (fĕt'ĕ-rē'tă), *n.* An African sorghum of dwarf stature, related to durra and milo. It is grown in the United States as a dry-land crop. Called also *Sudan durra.*

fe'tish-ism*, **fe'tich-ism***, *n. Psychoanalysis.* Fixation of erotic interest upon some portion of the body or some article of clothing or other inanimate object — **-ist***, *n.*

fi'ber*, *or* **fibre, silk.** Artificial silk made from any of various solutions of cellulose by forcing the solution through minute openings and fixing the resulting filaments so that they can be twisted into yarn or thread.

fi'bril-la'tion* (fī'brĭ-lā'shŭn), *n.* [See FIBRIL; -ATION.] *Med.* A condition, found in organic diseases of the heart, in which the various groups of muscle cells of the auricles beat independently and without rhythm. The ventricles do not receive the normal impulses from the auricles and in turn beat rapidly and irregularly.

Fi'dac' (fē'dăk'), *n.* Also **F.I.D.A. C.,** *Abbr.* An organization of veterans of the World War from the various Allied nations; — so called from the initials of its name "*Fédération Interalliée des Anciens Combattants*"

field intensity *or* **strength.** *Elec.* Magnitude of the electric or magnetic or other potential gradient in a field of force; — a measure of the strength of the field of force. See RADIO FIELD INTENSITY, below.

figure skating. Skating in which the skater describes figures of various kinds on the ice or other surface.

fil'a-ment*, *n. Elec.* In an electron tube, the heated electrode which emits electrons. It is usually a metal wire.

filament battery. *Elec.* = A BATTERY, above

film*, *n.* The photographic film, in the form of a flexible strip, used in making a moving picture. It is about an inch wide, of sensitized translucent material resembling celluloid, and is used in making both negatives and positives (which latter are used for projection) of a series of small pictures about one inch wide and three fourths of an inch in height. Hence, such a negative or positive; also, a moving picture, or, fig., moving pictures collectively. There are sixteen of the small pictures (technically called *frames*) to a running foot of film, and they are taken at the rate of approximately 16 a second. Cf. MOVING PICTURE; REEL, below.

film*, *v. t. Moving Pictures.* To photograph on a film for use in the cinematograph.

film'dom (film'dŭm), *n.* See -DOM, in the *Dictionary.*

film'ize (fĭl'mīz), *v. t.*; -IZED; -IZ'ING. To make a moving-picture film of (as a play). *Cant.*

film play. A photoplay.

fil'ter*, *n. Elec.* An electric circuit or combination of circuits used to limit the flow of currents of certain frequencies or types while allowing other current to flow with relative freedom. A **band,** or **band-pass, filter** limits the flow of currents of frequencies below and above the limits of a certain frequency band. A **high-pass filter** limits the flow of currents below a certain frequency. A **low-pass filter** limits the flow of currents above a certain frequency.

fil'ter*, *v. i. Mil.* To pass by infiltration; — with *in, through,* or the like. See INFILTRATION, below.

fil'tra-ble (fĭl'tră-b'l), *a.* Capable of being filtered, or of passing through a filter.

fin*, *n. Aeronautics.* **a** Any of various small stationary surfaces, vertical or nearly so, attached to different parts of aircraft to secure stability, as a tail *fin,* skid *fin,* etc. **b** In a kite balloon, one of the air-inflated lobes intended to keep the balloon headed into the wind.

fi'nal-ist (fī'năl-ĭst), *n. Sports.* Any of the players who meet in the final round of a tournament in which the losers in any round do not play again.

fin'ger-print' (fĭn'gĕr-prĭnt'), *n* An impression made by a finger or thumb, esp. a print made by the inside of the first joint showing its characteristic lineation, or marking This lineation varies with the individual and is unchanged throughout life; hence, fingerprints are now widely used as a means of identification. Cf. DACTYLOGRAM, DACTYLOGRAPHY, above. — *v. t.* To make a fingerprint or fingerprints of. — **fin'ger-print'ing,** *n.*

fireless cooker. A cooking apparatus, having one or more compartments surrounded by heat-insulating material, in which no fire is used but the cooking is done by the heat of plates which are heated independently of the cooker, or by that of the previously heated food, this heat being kept from dissipation by the insulation.

fire maker. See CAMP-FIRE GIRL, above.

firing squad. *Mil.* **a** A number of soldiers detailed to fire a saluting volley over the grave of a dead soldier or officer. **b** A detail of soldiers whose duty it is to shoot to death persons so sentenced by a military tribunal.

first'—string', *a.* Picked, from among other possible contestants on the same side, to have the first chance to contest, as in a race, game, or the like, because considered superior; as, *first-string* men. *Sporting Cant or Slang.*

Fish'er, *n.* A treasury note bearing the signature of Sir Warren Fisher, replacing, since October, 1919, the earlier "Bradbury." *Slang, Eng.*

five hundred. *Card Playing.* = PREFERENCE, 5 **e,** in *Dict.*

five'—nine', *n.* = BLACK MARIA, above.

Five'—Pow'er Treat'y. **a** A treaty adopted at the final plenary session of the Washington Conference (which see, below), Feb. 6, 1922, by the United States, the British Empire, France, Italy, and Japan, limiting naval armament so that the United States retains 18 capital ships (which see, above), Great Britain, 22, and France, Italy, and Japan each 10. It also fixed the future capital-ship replacement tonnage of the United States and Great Britain at 525,000 tons each and of Japan at 315,000 tons (the "5-5-3" ratio). **b** A treaty between the same powers and of the same date, restricting the use of submarines to actual warfare and restricting the use of noxious gases.

fix-a'tion*, *n. Psychoanalysis.* The arrest of any partial impulse at an early stage of psychosexual development through attachment to a form or object of gratification associated with this period. Cf. REGRESSION, below.

fixation process. See NITROGEN FIXATION, below.

fixation reaction *or* **test.** *Physiol. Chem.* A reaction or test depending on complement fixation (which see, above).

fixed condenser. *Radio.* A condenser of which the capacity is not variable or adjustable.

fixed gap. *Radio.* A kind of spark gap consisting of two stationary electrodes.

fixed weight. *Aeronautics.* Of an aircraft, the weight of the structure and all the fittings and parts necessary for flight, including the ballast of an airship, but not fuel.

Flag Day. **a** In the United States, the 14th of June, the anniversary of the day, in 1777, on which the American Congress formally adopted the Stars and Stripes as the national flag. **b** [*l. c.*] In England, a day on which contributions are made as on a tag day in America, small flags being given to the contributors. Cf. TAG DAY, below

flag'el-la'tion* (flăj'ĕ-lā'shŭn), *n.* [L. *flagellum* a whip] *Biol.* The formation of flagella, or whiplike appendages, as in the Protozoa.

flag smut. *Agric.* A disease of wheat due to the fungus *Urocystis tritici,* originating in Australia; — so called from its occurrence on leaves and leaf sheaths, as distinguished from loose and stinking smuts that attack the grain.

flame projector *or* **thrower.** An apparatus for throwing a stream of flaming liquid, as an oil mixture, used in warfare, as in the World War.

‖ **Flam'men-wer'fer** (flăm'ĕn-vĕr'fĕr), *n.; G. pl.* -WERFER. [G.] A flame projector.

flap'per*, *n.* **a** *Colloq.* A young girl of about fifteen to eighteen years of age, esp. one who is not yet "out" socially; — probably so called with a double allusion, to "flapper," a young duck, and to the braid of hair worn hanging down the back of young girls. **b** *Slang or Colloq.* A girl or young woman whose behavior and costume are characterized by daring freedom or boldness. — **flap'per-dom** (-dŭm), *n.* — **flap'per-ism** (-ĭz'm), *n.*

flash*, *n. Moving Pictures.* A view thrown upon the screen momentarily, showing a scene or an object incidental to, or explanatory of, the main story.

flat'ten*, *v. i. & t.* — **to flatten out,** *Aëronautics,* to manipulate an airplane so as to bring its longitudinal axis parallel with the ground, as after a climb or a dive; of an airplane, to assume such a position.

fla'vine*, **fla'vin,** *n. Org. Chem.* By extension, any of several compounds derived from acridine and used as antiseptics or as yellow dyes. Specif., *Pharm.,* acriflavine, or a dilute solution of it. See ACRIFLAVINE, above.

fla'vo-nol (flā'vō-nōl; -nôl), *n.* [*flavone* + 1st *-ol.*] *Org. Chem.* A yellow crystalline compound, $C_{15}H_{10}O_3$, from which a number of natural dyes are derived. It is a hydroxy derivative of flavone.

‖ **flè'chette'** (flā'shĕt'), *n.; pl.* -CHETTES. [F., dim. of *flèche* arrow.] A small steel dart with a vane or fluted shaft, to be dropped from an airplane as a missile.

fleet*, *n.* A group of aircraft or vehicles or other objects that may be likened to a fleet of vessels; as, a *fleet* of ambulances. Cf. AIR FLEET, above.

fleet submarine. *Naval.* A type of large submarine whose size, radius of action, and speed enable it to accompany the main battle fleet.

Flem'ing valve (flĕm'ĭng). [After John A. *Fleming* (1849–), Eng. electrical engineer.] *Elec.* = DIODE, above.

flex'i-ble*, *a. Aeronautics.* = NONRIGID, below.

flight*, *n. Mil.* A unit of aero commands numbering, usually, four airplanes, to which is sometimes attached a fifth piloted by a **flight commander** or **flight leader,** but varying in number according to the purpose for which it is organized, as for pursuit, bombing, reconnoitering, etc. *Brit.*

flight path. *Aeronautics.* The path of the center of gravity of a moving aircraft with reference to the earth.

fliv'ver (flĭv'ĕr), *n.* **1.** A small and inexpensive automobile; hence, anything that is small of its kind and cheap or insignificant. *Slang.*

2. A fizzle; a failure; as, the show was a *flivver.* *Slang.*

float*, *n. Aëronautics.* A completely inclosed water-tight structure attached to an aircraft to give it buoyancy when in contact with water.

float'er*, *n.* A workman who habitually changes from one locality to another for the sake of variety, and not because of the seasonal nature of his trade. *Cant.*

float seaplane. *Aeronautics.* A form of seaplane in which the landing gear consists of one or more floats, or pontoons.

flood lighting. Artificial lighting in which the light is projected in such quantity and from such directions as to give uniformity in illumination, eliminating the dark shadows of ordinary illumination.

flo-ta'tion* (flō-tā'shŭn), *n. Ore Dressing.* The separation of the particles of a mass of finely pulverized ore according to their relative capacity for floating (by virtue of the surface tension) on a given liquid, instead of according to their specific gravities, this capacity often being increased by the selective adherence of oil, gas, etc. By flotation valuable slimes are recovered.

flotation gear. *Aëronautics.* An emergency landing gear attached to an airplane, to permit of safe landing on the water and provide buoyancy when resting on its surface.

flu (flōō), *n.* Short for INFLUENZA. *Colloq.*

flub'dub' (flŭb'dŭb'), *a.* Of or pert. to, or characterized by, flubdubbery. — *n.* Flubdubbery. *Both Slang.*

flub'dub'ber-y (flŭb'dŭb'ĕr-ĭ), *n.* Foolish argument; balderdash; "bunk." *Slang. The Nation.*

flush*, *v. i. Mining.* **a** To operate a placer mine, where the continuous supply of water is insufficient, by holding back the water and releasing it periodically in a flood. **b** To fill underground spaces, as in coal mines, with material carried by water, which, after drainage, forms a compact mass.

fly*, *v. t.* **a** To pass or journey over by flying; as, to *fly* the Atlantic. **b** *Aviation.* To manage in flight; as, to *fly* an airplane. — *v. i.* To fly in an aircraft.

flying boat. *Aëronautics.* A form of seaplane having a boatlike fuselage capable of floating upon the water. Cf. SEAPLANE, below.

flying circus. *Aëronautics.* A rotary echelon formation of airplanes in action.

Fok'ker (fŏk'ĕr), *n.* [After the Dutch inventor and manufacturer, A. H. G. *Fokker* (1890–).] An airplane, especially a military tractor monoplane, of a certain German make, usually seating but one person. The Fokker monoplane has great speed, can climb rapidly, and responds quickly to the controls; but, because of its instability, it requires expert management.

folk dance. A dance originating among and characteristic of the common people of a country, and transmitted from generation to generation like the folk song; also, the characteristic music for such a dance.

fol'low–up', *a.* **a** Of or pert. to renewed or repeated action; as, a *follow-up* visit. **b** Pertaining to a second or subsequent offer or proposal, as to a possible customer, as, a *follow-up* letter. *Business Cant.*

foot'age*, *n. Moving Pictures.* The total number of running feet of film used in photographing anything, as a scene or an entire play; as, a *footage* of 100 feet was required for the scene.

Ford'ney–McCum'ber Tar'iff Act (fôrd'nĭ-mă-kŭm'bĕr) [After Representative Joseph W. *Fordney* and Senator Porter J. *McCumber.*] An act of Congress, passed Sept. 21, 1922 (67th Congress), regulating the United States tariff. It increased many duties, and gave the president power to revise rates under certain conditions.

fore'con'scious (fōr'kŏn'shŭs), *n.* = PRECONSCIOUS.

Foreign Legion. *Mil.* A volunteer corps of foreign citizens in the military service of a state, as the "British Legion" which was in the Spanish service under Sir George de Lacy Evans (1787–1870), in the Carlist wars; esp., the "Régiments étrangers" in the French service, consisting of foreign volunteers. The Foreign Legion of France has been employed chiefly in colonial campaigns and, except during the World War, has consisted mostly of men who enlisted in a spirit of adventure.

fore'stage' (fōr'stāj'), *n. Theater.* The part of the stage nearest the audience, and usually projecting beyond the line of the curtain.

form-al'de-hyde-sulph'ox-yl'ic (fôr-măl'dē-hīd-sŭlf'ŏk-sĭl'ĭk), *a.* [*formaldehyde* + *sulphoxylic.*] *Org. Chem.* Pert. to, or designating, a hypothetical acid, HCHO. H_2SO_2 or $HOCH_2OSOH$. Its salts are called **form-al'de-hyde-sulph-ox'y-lates** (-sŭlf-ŏk'sĭ-lāts). Sodium formaldehyde-sulphoxylate is formed by the addition of formaldehyde to sodium hyposulphite in solution and is used as a reducing agent, esp. in calico printing as a discharge for cotton. Cf. SODIUM HYPOSULPHITE **b**, in the *Dict.*

for-mi'ca (fôr-mī'kă), *n. Elec.* A laminated phenolic insulating material, bearing the trade-mark *Formica.*

form letter. A letter on any subject of frequent recurrence, as in a business house, which can be sent to different persons without essential change other than in the address.

for'mo-sul (fôr'mō-sŭl), *n.* [*form*aldehyde + *sul*phoxylate.] See SODIUM HYPOSULPHITE, below.

For-syte' Sa'ga (fôr-sīt'). A trilogy of novels — "The Man of Property" (1906), "In Chancery" (1920), and "To Let" (1922) — with connecting short stories, by John Galsworthy, tracing in a middle-class Victorian family the disintegration and frustration of the possessive instinct.

fo'rum*, *n.* An organization which holds public meetings for the discussion of subjects of current interest by leader and audience.

fountain grass. *Bot.* A species of Pennisetum, *P. ruepelianum*, often grown in gardens.

four'–min'ute man. One of a body of more than 15,000 men who in America during the World War volunteered to make short speeches in the interests of various war measures, esp. the sale of Liberty bonds.

Four'–Pow'er, *or* **Four'–Pow'ers, Group.** Great Britain, France, Japan, and the United States, whose governments on Oct. 15, 1920, signed through banking representatives a consortium with regard to China.

Four'–Pow'er Treat'y. A treaty signed at the Washington Conference, Dec. 13, 1921, by the United States, the British Empire, France, and Japan, which pledges the parties to respect each other's rights in their insular possessions in the Pacific Ocean, to meet in conference with all signatories in case of controversy between signatories over any Pacific question, and to consult fully with one another if a nonsignatory power threatens the rights of a signatory.

‖ **four'ra'gère'** (fōō'rà'zhâr'), *n.* [F.] **a** An ornament of braid used in pairs, one on each side of a bodice, and connected by one or more long drooping cords. **b** A French military decoration, presented to a unit of troops for distinguished service or conspicuous gallantry in time of war, consisting of a braided cord worn about the left shoulder seam by all the men of the unit honored and borne on the colors of the organization decorated. Fourragères appear in three colors, red, green, and yellow. Combinations of these colors are used to form the *double fourragère.*

four striper. A captain in the U. S. Navy; — so called because of the four gold stripes worn on the sleeves of his uniform. *Naval Cant or Slang.* See STRIPER, below.

fourteen points, *or* **fourteen peace points.** Fourteen conditions or terms set forth by President Wilson in an address to Congress, January 8, 1918, as the basis of a world peace to follow the World War.

fourth arm. *Mil.* That branch of the military service which consists of the air service, or flying corps, as distinguished from infantry, cavalry, and artillery. *Colloq.*

fourth dimension. *Math.* The last of the four dimensions of a four-dimensional extent or aggregate (a 4-fold†), — commonly regarded as superadded to a three-dimensional (or 3-fold) to convert it into a 4-fold.

† NOTE. An *n*-space, *n*-extent, *n*-fold, or *n*-manifold is one that has *n* dimensions; hence, a line is called a 1-space, a surface a 2-space, a solid a 3-space, a hypersolid a 4-space, etc. Cf. N-DIMENSIONAL, in the *Dictionary.*

A *fourth dimension*, superadded to our ordinary three-dimensional space (3-space†), may be thought of as a straight line or fixed direction (with two opposite senses) making a fixed (say a right) angle with every line in the 3-space, that is, with the 3-space itself (which it meets in one point only, like a straight line piercing a plane). Any translation of any part (or all) of the rigid 3-space along this direction would displace the translated part completely out of the original 3-space (just as any translation of part of a plane (or 2-space) along a line not in the plane, displaces that from the plane completely). Any 3-space may be conceived as a section, or shadow, of 4-space just as 2-space (a plane) is a section of 3-space, and 1-space (a line) is a section of 2-space. See DIMENSION, 5, and SPACE, 2, in the *Dictionary.* If a segment (1-space) moves with its ends on two fixed (say parallel) lines, it will generate a surface (2-space), as, for instance, a square; if this latter moves straight in a fixed direction inclined to its own plane, it will trace out a solid (3-space), as a cube; so, if this latter moves out on a line or direction (a fourth axis or dimension) like-inclined to all lines of the solid, that is, to the solid itself, it will generate a hypersolid (4-space), as a hypercube (see below); — in all these motions of translation into higher dimensions, the mover at every stage of motion leaves all preceding stages completely behind, no two positions having any common point. To all forms in 2-space there are corresponding forms in 3-space (and many more besides); so to all forms in 3-space there are corresponding forms in 4-space (and many more besides); thus to cone, cylinder, prism, pyramid, sphere, volume, correspond hypercone, hypercylinder, hyperprism, hyperpyramid, hypersphere, hypervolume. A few special cases are the following (the lower-dimensional analogues being put in parentheses): **polyhedroid**, the analogue in 4-space of the polyhedron in 3-space. The regular polyhedroid (polyhedron) is formed by congruent regular polyhedrons (polygons) meeting in congruent regular polygons (edges), meeting in congruent edges (vertices), — these edges meeting in vertices. The term polyhedroid (polyhedron, polygon) may also denote the 4-space (3-space, 2-space) of which it is the border. The regular polyhedrons in 3-space are five: *tetrahedron*, formed by 4 equal regular triangles; *cube*, formed by 6 equal squares; *octahedron*, formed by 8 equal regular triangles; *dodecahedron*, formed by 12 equal regular pentagons; and *icosahedron*, formed by 20 equal regular triangles (see these terms in the *Dictionary*). The regular polyhedroids in 4-space are six: C_5, *pentahedroid;* C_8, *hypercube;* C_{16}, *hexadecahedroid;* C_{24}, *dsdodecahedroid*, formed by 24 octahedrons; C_{120}, *dishexecontahedroid*, formed by 120 dodecahedrons; C_{600}, *hexacosihedroid*, formed by 600 tetrahedrons. — **hexadecahedroid**, 16-hedroid, or C_{16}; the analogue in 4-space of the octahedron in 3-space. The regular 16-hedroid (octahedron) is formed by 16 (8) congruent regular tetrahedrons (triangles) meeting in pairs along 32 (12) congruent regular triangles (edges) meeting in 24 (6) equal edges (vertices), — these edges meeting in 8 vertices. Suppose 4 equal segments (A A′, B B′, C C′, D D′) all mutually perpendicular and bisecting at O, and complete the 16-hedroid determined in 4-space by the 8 vertices, A. . . . D′, just as the octahedron determined in 3-space by the 6 vertices A. . . . C′ is completed. — **hypercube**, a regular polyhedroid, the analogue in 4-space of the cube in 3-space; the tesseract. The hypercube (cube) is formed by 4 (3) pairs of parallel faces, cubes (squares), meeting perpendicularly in pairs on 24 (12) equal squares (segments) meeting in 32 (8) equal edges (vertices), — these edges meeting in 16 vertices. Suppose 4 equal lengths OA, OB, OC, OD laid off in 4-space on 4 axes mutually perpendicular at O, and complete the hypercube thereby determined, just as the cube determined at OA, OB, OC is completed. It is generated by a cube moving, in the fourth dimension, the length of its own edge. — **hyperdimensional**, having more dimensions than the ordinary, which for our familiar (point-) space are three (length, breadth, thickness); hence four- (or more) dimensional. — **hyperdimensionality**, the property or fact of being hyperdimensional. — **hypersphere**, the analogue in 4-space of the sphere in 3-space. A sphere may be conceived as generated in 3-space by a circle of latitude that arises at a pole and moves, expanding till it becomes an equator, and then contracts into the opposite pole; so the hypersphere may be conceived as generated in 4-space by a sphere that arises at a pole and moves (in 4-space), expanding till it reaches its equatorial maximum and then gradually collapsing into the opposite pole. — **hypertetrahedron.** See PENTAHEDROID, below. — **pentahedroid**, 5-hedroid; the analogue in 4-space of the tetrahedron in 3-space. The regular pentahedroid (tetrahedron) is formed by 5 (4) regular tetrahedrons (triangles) meeting in pairs along 10 (6) congruent regular triangles (edges) meeting in 10 (4) congruent edges (vertices), — these edges meeting (in sets of 4) in 5 vertices. Suppose 4 equal lengths CA, CB, CC, CD, drawn (in 4-space) from the vertices, A, B, C, D, of a regular tetrahedron, each equal to its edge, AB; they determine in 4-space, just as 3 equal lengths, DA, DB, DC, drawn (in 3-space) from the vertices of a regular triangle ABC, each equal to its side, as AB, determine a regular tetrahedron, ABCD, the simplest polyhedron (in 3-space), and as the regular triangle, ABC, is the simplest polygon in 2-space. — **tesseract.** See HYPERCUBE, above.

fourth'–di-men'sion-al, *a. Math.* Pertaining or referring to a fourth dimension. See FOURTH DIMENSION, above.

fox trot*. A dance, in four-four time, including slow walking steps, quick running (trotting) steps, etc. — **fox'–trot'**, *v. i.*

F. P. S*. *Abbr.* **a** Fellow of the Philharmonic Society. **b** Foot, pound, second (see FOOT-POUND-SECOND, *a.*, in *Dict.*).

frame*, *n.* **a** *Moving Pictures.* One of the series of small pictures on a film. See FILM, above. **b** A frame-up. *Slang.*

frame*, *v. t.* To make one the victim of a frame-up. *Slang.*

frame of reference. *Math.* A set of coordinates by means of which the movements of a body or group of bodies are described.

frame'–up', *n.* A conspiracy or plot, esp for an evil purpose, as to incriminate a person on false evidence. *Slang.*

free alternating current. *Radio.* Damped alternating current produced by an electric impulse in a circuit, there being no external electromotive force acting while the current is flowing.

free balloon. See BALLOON, above.

free oscillations. *Radio.* = FREE ALTERNATING CURRENT, above.

Free' Stat'er (stāt'ĕr). **a** A native or resident white of the former Orange Free State. **b** A native or inhabitant of the Irish Free State. Also, an adherent of the Irish Free State, esp. as opposed to an advocate of an Irish republic.

free verse. Vers libre (which see, in the *Dictionary*). —

free'–ver'si-fi'er, *n.*

French seal. See NEAR SEAL, below.

frequency curve. *Statistics.* A curve representing graphically the probabilities of different numbers of recurrences of an event.

frequency indicator. *Radio.* A one-point frequency meter, or wavemeter which measures one frequency only. It is used in transmitting stations as an aid in maintaining constant frequency.

frequency meter. *Elec.* An instrument for determining the frequency (in cycles per second) of an alternating current or a radio wave or, in general, of any oscillatory system. Cf FREQUENCY, *n.*, 5, in the *Dict.*

Freud'i-an (froid'ĭ-ăn), *a.* Of or pert. to, or according with, the theories or practices of Sigmund Freud, in regard esp. to the causes and treatment of hysteria and other psychopathic phenomena, and the interpretation of dreams and other mental products, as based upon a psychology of the unconscious. See PSYCHOANALYSIS, below. — **Freud'i-an-ism** (-ĭz'm), *n.*

Freudian mechanisms. *Psychoanalysis.* The modes of mental operation, as interpreted by Sigmund Freud, producing the formations due to compromise between consciousness and the unconscious, and manifest in dreams, psychotic and neurotic symptoms, and other phenomena which are consciously inexplicable.

fright'ful-ness*, *n.* Action or policy, esp. in warfare, intended to terrorize, as by threats, violence, or cruelty; — a translation of German *Schrecklichkeit.*

‖ **fri'go'** (frē'gō'), *n.* [F., for "viande *frigorifée.*"] Chilled or frozen meat. *French Soldiers' Slang.*

frisk*, *v. t.* **a** To search (a person), as for concealed weapons, stolen or contraband articles, etc., esp. after arrest, as by running the hand rapidly over the clothing, through the pockets, etc. **b** Hence, to take or steal from by going through the clothing in this way. *Both Slang.*

Fritz (frĭts), *n.* **a** A nickname for *Friedrich* (Eng. *Frederic*). **b** A German; German soldier; also, a German shell, airplane, submarine, or the like. *Slang.*

fro'zen (frō'z'n), *p. a. Finance.* Not liquid; not available for present use; as, *frozen* credit, that is, credit that has been extended on the basis of some security that is not immediately marketable to advantage, the loan, therefore, being temporarily uncollectible. *Cant.*

fruit pit. *Hort.* = BITTER PIT, above.

fruit spot. *Hort.* A disease of fruit, esp. of the Baldwin apple, caused by the parasitic fungus *Cylindrosporium pomi*, producing brown sunken spots, the underlying tissue being dry and brown.

fugue* (fūg), *n. Med.* A prolonged pathological condition, characterized by wandering and other unusual actions, of which, afterward, the individual is not conscious.

full'–fash'ioned*, *a.* Knitted so as to conform to the shape of the leg and foot by dropping stitches as the contour narrows; used of hosiery, underwear, etc.

full load. *Aeronautics.* The dead load plus the useful load.

fun'da-men'tal*, *n. Radio.* The principal component of a wave. It is the component of lowest frequency or greatest wave length.

fun'da-men'tal-ism (fŭn'dă-mĕn'tăl-ĭz'm), *n.* [*often cap.*] A recent movement in Episcopalian and certain Protestant churches, reemphasizing a number of historical beliefs, as the virgin birth and deity of Christ, and the infallibility of the Bible, which are maintained by adherents of the movement to be fundamental. Also, the beliefs so emphasized. Also, the state or fact of being an adherent of fundamentalism. — **fun'da-men'tal-ist**, *n.*

fun-da'trix (fŭn-dā'trĭks), *n.*; *pl.* -TRICES (fŭn'dà-trī'sēz). [L.] *Zool.* A female of any of several genera of aphides which produces a new colony by laying eggs, esp. one laying eggs in a leaf gall; — called also *stem mother.*

funk hole. A dugout; hence, any place of safety into which one can retreat. *Slang.*

fu'se-lage (fū'zĕ-lāj; *F.* fü'zĕ-làzh'), *n.* [F.] *Aëronautics.* The elongated structure, of approximately streamline form, to which are attached the wings and tail unit of an airplane and which is primarily designed to hold the passengers, power plant, cargo, etc.

fu'tur-ism (fū'tūr-ĭz'm), *n. Art.* A movement or phase of postimpressionism (which see, below). — **fu'tur-ist**, *n. & a.* — **fu'tur-is'tic** (-ĭs'tĭk), *a.*

gab'ar-dine'* (găb'ăr-dēn'; găb'ăr-dēn), *n.* A woolen fabric closely resembling serge, but twilled on one side only; also, a somewhat similar fabric of cotton.

Gad'a-rene' (găd'ă-rēn'), *a.* Of or pert. to the Gadarenes, or inhabitants of Gadara. — *v. i.*; -RENED' (-rēnd'); -REN'ING (-rēn'ĭng). To behave as did the swine in the miracle of the Gadarenes when the devils had entered into them. (*Matt.* viii, 28 ff., R. V.). *Nonce word.* *John Galsworthy.*

gain*, *n. Elec.* Amplification or raising of the power in a circuit by insertion of an amplifier.

gaine*, *n. Ordnance.* The metal casing or tube of a shell, containing the explosive.

gal'la-lith, *n.* Var. of GALALITH (in the *Dict.*).

gamma lines. *Physics.* Lines of very high frequency in the X-ray spectrum of an element, the wave lengths of which are definitely related to the atomic number of the element.

Gan'dhi-ism (gän'dĭ-ĭz'm), **Gan'dhism** (-dĭz'm), *n.* See SATYAGRAHA, below.

gang'ster (găng'stĕr), *n.* [*gang* + *-ster.*] A member of a gang of roughs, hireling criminals, thieves, or the like. *Colloq., U. S.*

gan'zie (găn'zĭ), *n.* [Prob. E. dial. *ganzey* a knitted woolen shirt; fr. *Guernsey* a Channel island.] Waste cotton cloth (usually discarded underwear) used as wiping material about machinery, or as rags for making paper.

gap*, *n. Aëronautics.* The shortest distance between the planes of the chords of the upper and lower wings of a biplane, measured along a line perpendicular to the chord of the upper wing at any designated point of its leading edge.

ga'rage'* (gà'razh'; găr'ăj), *n.* **1.** *Aëronautics.* A shed to house one or more airships or flying machines; a hangar. **2.** A siding in a canal.

ga'ram-bul'lo (gà'răm-bōōl'yō), *n.* [Mex. Sp., prob. fr. the native name.] *Bot.* A small oblong berry, the fruit of a common cactaceous plant (*Cereus geometrizans*) native to the table-land of western Mexico. Also, the plant.

Ga'ry school system (gā'rĭ; 115). *Pedagogy.* A system of school organization in which the school activities are di-

vided between the traditional school study, manual training or vocational work, and play, all under one management and with special teachers for special activities. The system by its division of activities enables one classroom to accommodate two classes. The system originated, under the direction of Dr. William A. Wirt, at Gary, Indiana.

gas*, *n.* **1.** Any substance, whether gaseous, liquid, or solid under ordinary conditions, used to produce a poisonous or irritant atmosphere, as in the World War. Gases in the usual sense, as chlorine, may be discharged from cylinders in which they have been compressed, but liquids and solids must be volatilized by heat or hurled in shells or bombs. If the substance is in the air in the form of fine solid particles instead of gas, it is called a *toxic smoke* War gases are classed, according to their effects, as *asphyxiating* (lethal), *lachrymatory* (tear-producing), *sternutatory* (sneeze-producing), *vesicatory* (blistering), etc. **2.** Gasoline. *Colloq.*

gas*, *v. t.* **1.** To replenish (a balloon or airship) with gas. **2.** To poison or asphyxiate with a gas. **3.** *Metal.* **a** To cause (as a metal) to absorb gas. **b** To injure or deteriorate by the action of a gas.

gas*, *v. i.* *Metal.* To give off gas, as a metal during cooling or solidification

gas'—ba-cil'lus in-fec'tion. *Med.* Infection of wounds, esp. war wounds, by one or more of several organisms, as *Bacillus aerogenes capsulatus*, which form gas, resulting in **gas gangrene**, by obstruction of the circulation.

gaseous tube. *Radio.* An electron tube having sufficient gas in it to prevent effective use of the tube. Cf. GAS TUBE.

gas helmet, gas mask. See MASK, below.

gas'o-gen'ic (gās'ō-jĕn'ĭk), *a.* [*gas* + *-genic.*] Producing gas, as the bacilli in gas gangrene.

gas shell. *Mil.* A shell containing a "gas" of some kind as filling, with enough explosive to burst the shell and disperse the contents. See GAS, above. — **gas bomb.**

gas'trin (găs'trĭn), *n.* [*gastric* + *-in.*] *Physiol. Chem.* A hormone causing secretion of the gastric juice.

gas, *or* gassy, tube. *Radio.* An electron tube containing sufficient gas to affect its electrical performance, but not to prevent its effective use. Such tubes are usually useful as detectors, but not as amplifiers. Cf. GASEOUS TUBE, above.

gat (găt), *n.* [Short for *Gatling gun*.] A revolver. *Slang.*

Gay'ley proc'ess (gā'lĭ). *Metal.* The removal of moisture from the blast of an iron blast furnace by reducing the temperature of the blast current so that the moisture is deposited as snow. The dehydrated blast diminishes fuel consumption and aids furnace control

gee'pound' (jē'pound'), *n.* *Engineering.* See SLUG, below.

gel (jĕl), *n.* [From *gelatine*.] *Chem.* A jellylike material formed by the coagulation of a colloidal liquid, or sol.

gel (jĕl), *v. i.*; GELLED (jĕld); GEL'LING. *Chem.* To take on the form of gel.

gene (jēn), *n.* *Biol.* A factor. See FACTOR, above.

general strike. A concerted strike by workmen of all or many trades within the area affected, or of all departments of one big industry.

gen'er-ate (jĕn'ĕr-āt), *v. i.* *Elec.* To produce alternating current. — **gen'er-a'tion***, *n.* — **gen'er-a'tor***, *n.*

gen'o-type (jĕn'ō-tīp), *n.* [*gene* + *-type.*] *Biol.* **a** The combination of hereditary characters possessed by an organism or race. **b** Hence, usually, a race or group of organisms having the same combinations of hereditary characters; a biotype. — **gen'o-typ'ic** (-tĭp'ĭk), *a.*

gentlemen's agreement*. Specif., a diplomatic agreement, never embodied in law or treaty, regarding the immigration of Japanese into the United States, made in 1907 (confirmed in 1911) between the Japanese government (which guaranteed not to issue passports to laborers) and the U. S. Department of State (which promised to make recommendations against legislation excluding Japanese).

ge'o-chem'is-try (jē'ō-kĕm'ĭs-trĭ), *n.* [*geo-* + *chemistry.*] The study of the chemical composition of, and of actual or possible chemical changes in, the crust of the earth. — **ge'o-chem'i-cal** (-ĭ-kăl), *a.* — **ge'o-chem'ist** (-ĭst), *n.*

ge'o-co-ro'ni-um (-kō-rō'nĭ-ŭm), *n.* [NL.; *geo-* + *coronium.*] *Meteor.* A supposed very light constituent of the earth's atmosphere, analogous to, if not identical with, the coronium in the sun's atmosphere.

geometrical pitch. See PITCH, below.

ge'o-phone (jē'ō-fōn), *n.* [*geo-* + *-phone* as in *telephone.*] An instrument for detecting sounds transmitted through the earth, as from the mining operations of an enemy.

Geor-gette' crêpe, *or* **geor-gette'** (jôr-jĕt'), *n.* [Named after Mme. *Georgette* de la Plante, a French modiste.] A thin, more or less transparent, silk crêpe of very fine texture.

ge'o-stroph'ic (jē'ō-strŏf'ĭk), *a.* [*geo-* + Gr. *στροφικός*, fr. *στρέφειν* to turn, twist.] *Meteor.* Designating or pertaining to that component of the deflective force of a wind which is due to the rotation of the earth. Cf. CYCLOSTROPHIC.

Ger'ma-no-phile (jûr'mă-nō-fīl; -fĭl), *a.* [*Germano-* + *-phile.*] Approving or favoring the German people and their institutions and customs. — *n.* One who upholds German policy and customs; a Germanophilist.

‖ **Ge-stalt'** (gĕ-shtält'), *n.*; *pl.* GESTALTEN (-shtäl'tĕn). [G.] Lit., form; shape; specif., *Psychol.*, a structure or system of phenomena, whether physical, biological, or psychological, so integrated as to constitute a functional unit with properties not derivable from its parts; as, in music, a chord or a melody; also, the pattern or figure assumed by such a system; — called also *configuration.*

Gestalt school. *Psychol.* A group of psychologists, primarily in Germany, who conceive of physiological, biological, and psychological events as occurring not through the summation of separate elements (sensations), but through the functioning of *Gestalten* as units or in interrelation.

get'—a-way'*, *n.* The act or fact of getting away; action of starting or getting under way; hence, *Slang*, escape.

ghost line, *or* **ghost***, *n.* *Metal.* Any of certain light bands alternating with dark ones, or running through a dark mass, appearing on a tooled or polished surface of steel and indicating zones of material made relatively harder by a difference in composition.

G. H. Q. *Abbr.* General Headquarters.

giant panda. A large and rare black-and-white bearlike mammal (*Ailuropoda*, syn. *Pandarctos, melanoleuca*) of Tibet. It is related to the panda and the raccoons.

gimp'er (gĭmp'ĕr), *n.* One who has "gimp," that is, spirit and vim; one who does things unusually well. *Slang.*

girl guide. A member of the "Girl Guides," an organization of girls in England with aims similar to those of the "Boy Scouts" (which see, above). During the World War, the "Girl Guides" did efficient service in nursing, hospital work, signaling, and telegraphy.

girl scout. A member of the "Girl Scouts," an American organization of girls, formed by Juliette Low in Savannah, Ga., in 1912, under the name of "Girl Guides." It became a national organization in 1913, the name being changed to "Girl Scouts." Any girl over ten is eligible, and in training she passes through the same three classes as do boys in the "Boy Scouts" (see BOY SCOUT, above).

glass-ine' (glăs-ēn'), *n.* [*glass* + 2d *-ine.*] A thin, transparent paper made, usually from sulphite pulp, by long-continued beating and supercalendering; — sometimes used attributively; as, *glassine* "windows" for envelopes.

glaze*, *n.* Specif., *Meteor.*, the coating of ice which forms when cold rain comes in contact with terrestrial objects that are below the freezing point; — in popular and engineering literature often called *sleet*, and by the British Meteorological Office called *glazed frost.*

glide, *v. i.* *Aviation.* To descend at a normal angle of attack without engine power sufficient for level flight, the propeller thrust being replaced by a component of gravity along the line of flight; to volplane.

glide*, *n.* *Aviation.* The act or action of gliding.

glid'er* (glīd'ĕr), *n.* **1.** *Aeronautics.* A form of aircraft similar to an airplane, but without any power plant **2.** *Naut.* A flat power boat of moderate size, very shallow draft, and high speed, based upon the principle of emergence, or tendency of the hull to rise out of the water and glide upon the surface as the speed increases.

gliding angle. *Aeronautics.* The angle between the plane of the horizon and the path of a gliding machine or airplane, esp. the least angle at which it will glide to earth.

glo'ry*, *n.* *Meteor.* The system of colored rings, red outermost, that surrounds the shadow of the observer's head on cloud or fog. It is caused by diffraction of reflected light.

glyc'er-o-gel'a-tin, -tine (glĭs'ĕr-ō-jĕl'ă-tĭn), *n.* = GLYCOGELATIN, in the *Dictionary.*

glyc'yl (glĭs'ĭl), *n.* [*glycine* + *-yl.*] *Chem.* The univalent acid radical, H_2NCH_2CO, derived from glycine or glycocoll.

go*, *v. i.* — **to go west,** to die; — prob. from the tradition, common in mythology, that the abode of the dead is in the region of the setting sun. *Soldiers' Slang.*

goat*, *n.* A scapegoat; one bearing blame or burdens for others; as, they made him the *goat.* *Slang.*

gob (gŏb), *n.* A sailor of the American navy; bluejacket. *Slang or Cant.*

‖ **go'det'** (gō'dĕt'), *n.* [F.] A piece of cloth, usually triangular, inserted or sewn on near the bottom of a skirt so as to hang in folds suggesting a flare.

go'—get'ter (gō'gĕt'ĕr), *n.* An enterprising, aggressive person who goes after and gets what he wants; a hustler. *Slang, U. S.*

Gol'gi ap'pa-ra'tus (gôl'jē). [After Camillo *Golgi*, It physician.] *Biol.* An intracellular organ or structure of unknown function, as large as, and sometimes even larger than, the nucleus, the presence of which is brought out only by special staining.

gon'ad-ec'to-my (gŏn'ăd-ĕk'tō-mĭ), *n.*; *pl.* -TOMIES (-mĭz). [*gonad* + *-ectomy.*] *Surg.* Excision of a gonad, or sexual gland. See GONAD, in the *Dictionary.*

Gon'court' lau're-ate, Gon'court' prize (gôN'kōōr'). See PRIX GONCOURT, below.

gon'do-la* (gŏn'dō-lă), *n.* An elongated car attached to the under side of a dirigible balloon.

gos'sy-pol (gŏs'ĭ-pōl; -pŏl), *n.* [*Gossypium* + 3d *-ol.*] *Chem.* The toxic principle of cottonseed, obtained as a yellow amorphous substance, $C_{30}H_{28}O_9$ or $C_{30}H_{30}O_9$, by extraction with gasoline and ether.

Go'tha (gō'tă), *n.* [From *Gotha*, a town in Germany.] A large airplane, of a certain German make, used esp. during the World War in long-distance bombing raids.

gra'di-ent*, *n.* *Meteor.* The rate of change of pressure, temperature, or other meteorological element, in the direction of its maximum rate, in a given plane, usually horizontal.

gradient velocity, *n.* *Meteor.* That velocity of the air which would cause it, if without friction, to move parallel to the current isobar.

gradient wind. = GRADIENT VELOCITY, above.

Gram method (grăm), *or* **Gram's method** (grămz). *Bacteriol.* A method of staining bacteria in which slides are stained with gentian violet and placed in Gram's solution (which see, below), after which they are treated with alcohol and washed with water; — so called from Hans C. J. Gram (1853–), Danish physician.

Gram'—neg'a-tive, *a.* *Bacteriol.* Resistent to or not taking the stain by the Gram method; — said of certain bacteria.

Gram'—pos'i-tive, *a.* *Bacteriol.* Yielding to or taking the stain by the Gram method; — said of certain bacteria.

Gram's solution *or* **stain.** *Bacteriol.* A solution of one part iodine, two parts potassium iodide, and 300 parts water, used in staining bacteria by the Gram method.

grand*, *n.* Thousand (dollars); as, a bungalow for six *grand.* *Slang, U. S.*

grape'vine'*, *n.*, *or* **grapevine step.** *Dancing.* A movement consisting of a cross step with a step back and a cross step with a step forward.

graph'al-loy' (grăf'ă-loĭ'), *n.* [*graphite* + *alloy.*] *Metal.* A substance consisting of graphite impregnated with molten metal under hydraulic pressure. It is made into bushings (often used without oil), electrical contacts, brushes, etc.

graph'i-ti-za'tion (grăf'ĭ-tĭ-zā'shŭn; -tī-zā'shŭn), *n.* Act or process of graphitizing.

graf'i-cule*, *n.* *Optics.* A ruled scale on glass, in the eyepiece of a telescope or other optical instrument, for the location of objects in the field of view.

gravity wind. See KATABATIC, below.

gray'fish'*, *n.* The common dogfish; — often so called since it has been found to be of value as food.

Great War. See WORLD WAR, below.

Great White Way. That portion of Broadway, in New York City, which centers about Times Square; — so called from its brilliant electric illumination, esp. of the theaters, at night.

green flash. *Meteor.* The momentary green appearance of the uppermost part of the sun's disk, due to atmospheric refraction, as it sinks below, or rises above, the horizon.

grid*, *n.* *Elec.* In a three-electrode electron tube, the electrode whose potential controls the current flowing between filament and plate. The grid usually consists of an assemblage of parallel lines.

grid battery. *Radio.* = C BATTERY, above.

grid circuit. *Radio.* The electric circuit including the grid and filament of an electron tube.

grid current. *Radio.* Current flowing between the grid and filament of an electron tube.

grid leak. *Elec.* A resistance forming a path from the grid to the filament of an electron tube used, generally in association with a capacity, to give the grid voltage some desired average value.

Gri'gnard' re-a'gent (grē'nyär'). [After Victor *Grignard* (1871–), French chemist.] *Org. Chem.* Any of the various compounds of magnesium with a hydrocarbon radical and a halogen, as ethyl magnesium iodide, C_2H_5MgI. They are made by treating organic halogen compounds with magnesium and undergo reactions (**Grignard's reaction**) with many kinds of substances, yielding important products.

grind'ers (grīn'dĕrz), *n. pl.* *Radio.* A common form of static; — so called from the noise in the headphones.

grizzly bear*. *Dancing.* See TURKEYTROT, below.

gro'ce-te'ri-a (grō'sē-tē'rĭ-ă), *n.* [*grocery* + *cafeteria.*] A grocery store in which the customers help themselves and pay the cashier as they leave.

☞ *Groceteria* is a trade-mark name.

ground*, *n.* *Radio.* The place on the ground, or on a metal structure (such as water piping) connected to ground, to which the ground wire is connected.

ground clamp. *Elec.* A metal strip for making electrical connection with a water pipe, or other ground.

ground lead (lēd). *Radio.* = GROUND WIRE, below.

ground school. *Aëronautics.* A school giving courses in aerodynamics, map making, photography, etc., for aviators.

ground speed. *Aëronautics.* The horizontal component of the velocity of an aircraft relative to the earth.

ground wire.* *Radio.* A conductive connection from a radio set to the ground.

guardian of the fire. See CAMP-FIRE GIRL, above.

Guatemala grass*. A tall perennial forage grass (*Tripsacum laxum*) native to Central America and Mexico, but grown in warm sections, as Florida and the Gulf coast.

‖ **gu-ber'ni-ya***, *n.* A provincial soviet (see SOVIET, below).

Guesd'ism (gĕd'ĭz'm), *n.* The Marxian socialism and program of reform through revolution as advocated by the French political leader Jules Basile Guesde (*pron.* gĕd) (1845–1922). — **Guesd'ist** (-ĭst), *n. & a.*

guide rope*. *Aeronautics.* A rope hung from a balloon or dirigible so as to trail along the ground for about half its length, used to preserve altitude automatically (by variation of the length dragging) without loss of ballast or gas.

gum shoe. A rubber overshoe; — often used attributively, *Slang*, of something carried on quietly or surreptitiously, as by one walking in gum shoes; as, a *gum-shoe* campaign.

gun*, *n.* Something suggestive of a gun, as in shape or function, as: **a** A syringe, or kind of small hand pump; as, a squirt*gun;* esp., a small hand pump for projecting oil, grease, or the like; as, a grease *gun.* **b** A larger apparatus for forcibly spraying or throwing on cement, concrete mixtures, etc.; as, a cement *gun.* Cf. MUD GUN, below.

gun'man*, *n.* Specif., a man who is ready to use a "gun," or pistol, in assault or assassination. *Recent.*

gun play. The firing of "guns," or pistols, as for the purpose of bullying or terrorizing, or for display. *Slang.*

gun power, *or* **gun'pow'er** (gŭn'pou'ĕr), *n.* *Naval.* The total weight of metal that can be thrown by the major, or big-gun, battery of a battleship in one broadside; — a term used in comparing the relative fighting ability of battleships Thus, a battleship mounting four 16-inch guns has greater gun power than one mounting five 14-inch guns, because the former can throw more metal to a greater range.

guy* (gī), *n.* A person; fellow; also, a chum; pal. *Slang.*

gyp (jĭp), *v. t.*; GYPPED (jĭpt); GYP'PING. [From GYP, *n.*] To swindle; cheat. *Slang, U. S.*

gy'ro (jī'rō), *n.*; *pl.* -ROS (-rōz). Short for GYROSCOPE (see in the *Dictionary*), GYROCOMPASS (see below), etc. *Colloq.*

gy'ro-com'pass (jī'rō-kŭm'păs), *n.* [*gyro-* + *compass.*] *Elec.* A form of continuously driven gyroscope which has such constraints that, whether its frame is at rest or is on a moving object, as a steamship, its axis will take a north-and-south direction; — called also *gyrostatic compass.*

ha'ba-ne'ra (hä'bä-nā'rä; *Sp.* ä'ba-), *n.* [Sp., fr. *Habana* Havana.] **a** A certain slow Cuban dance. **b** The music for this dance in triple time.

Ha'ber proc'ess (hä'bĕr). [After Fritz *Haber* (1868–), German chemist.] See NITROGEN FIXATION, below.

haf'ni-um (hăf'nĭ-ŭm), *n.* [NL., fr. *Hafnia*, L. name of Copenhagen.] *Chem.* An element discovered in 1922 in a Norwegian zircon. Symbol, *Hf;* atomic number, 72; at. wt., 178.6. Its spectrum had been observed and the element had been called *celtium.* It is a quadrivalent metal closely resembling zirconium. It is widely distributed and is estimated to constitute 0.001 per cent of the earth's crust.

hairy root. *Hort.* A disease of nursery stock, caused by *Bacterium tumefaciens*, producing clusters of fine roots, recently classified as a form of crown gall.

hal'i-to'sis (hăl'ĭ-tō'sĭs), *n.* [NL., fr. L. *halitus* breath + *-osis.*] *Med.* Foul or offensive breath.

Hall of Fame. A national institution established in March, 1900, by the Council of New York University as a permanent memorial for famous American men and women. In the colonnade of the Hall, in New York City, are places for 150 bronze commemorative tablets for names to be selected by a specially chosen electorate. Five new names may be chosen every five years.

Hal'phen test (hăl'fĕn; *F.* ăl'faN'). [After Georges *Halphen*, French chemist, who described the process in 1897.] A delicate test for cottonseed oil made by dissolving an oil or fat containing it in amyl alcohol and heating with carbon disulphide and flour of sulphur. If present, the cottonseed oil gives a red color. Kapok oil also gives the color.

ha-luk'kah (hä-lōōk'kä), *n.* [Heb. *haluqqah*, fr. *hālaq* to divide.] A fund recurrently collected from Jews for the systematic support of the needy of all classes, including the indigent learned, in Palestine.

‖ **ha'o-le** (hä'ō-lā), *n.* [Hawaiian.] A person of the white race. *Hawaii.*

hard*, *a.* *Elec.* Of or pertaining to an electron tube having a vacuum of extremely low pressure. Cf. SOFT, below.

hard'—boiled'*, *a.* **a** Fixed and unyielding in opinion or character; impervious to appeal or argument; callous; difficult to deal with; as, *a hard-boiled* official. *Colloq.*

har-mon'ic*, *n.* *Elec.* One of the component frequencies of a wave or alternating current which is an integral multiple of the fundamental frequency. The harmonic of twice the fundamental frequency is the second harmonic.

‖ **har-tal'** (hŭr-tal'), *n.* [Hind.] In India, concerted cessation of work and business, esp. as a protest against a political situation or an act of government. Cf. NONCOÖPERATION, below.

Ha'vas' a'gen-cy (ȧ'vȧ'). The oldest news agency in Europe, opened at Paris in 1835 by Charles Havas. It was reorganized in 1879 as a joint-stock company.

H. C. L., H. C. of L. *Abbr.* High cost of living. *Colloq*

head'phone' (hĕd'fōn'), *n.* *Elec.* A telephone receiver held over the ear by a band worn on the head.

head resistance. *Aëronautics.* Resistance to flight offered by the body, chassis, load, etc., of an aircraft, exclusive of *drag*, or resistance of the main supporting surface or surfaces; — called also *structural*, or *parasite, resistance*. Cf. DRAG, above.

head'set' (hĕd'sĕt'), *n.* *Elec.* A set of headphones.

heart block. *Med.* A condition in which there is rhythmic slowing of the ventricular beat of the heart, caused by any pathological process that interferes with the conductivity of the bundle of muscle fibers connecting the auricular and ventricular divisions of the heart.

heath'er* (hĕth'ẽr), *n.* A kind of fabric woven of heather wool (which see, in the *Dict.*), used esp. for suitings; — called also *heather mixture*.

Heav'i-side lay'er (hĕv'ĭ-sīd). [After A. W. *Heaviside* (1844–), Brit. physicist.] *Radio.* A stratum or surface of ionized air assumed to exist at some distance above the surface of the earth and to affect radio wave propagation; — called also *Heaviside surface* and *Kennelly-Heaviside surface*.

hec'tic*, *a.* Filled with excitement; feverish; restless; as, *hectic* days. — **hec'ti-cal-ly***, *adv.* *Both Slang.*

hec'to-am-pere' (hĕk'tō-ăm-pār'), *n.* [See HECTO-.] *Elec.* One hundred amperes.

hec'to-watt' (hĕk'tō-wŏt'), *n.* [See HECTO-.] *Physics.* One hundred watts.

he'do-nol (hē'dō-nōl; hĕd'ō-; -nŏl), *n.* [Gr *ἡδονή* pleasure.] *Pharm.* A white crystalline powder, $C_9H_{13}O_2N$, used as a mild hypnotic. Chemically, it is *a*-methyl-butyl carbamate.

‖ **Hei'li-gen-schein'** (hī'lĭ-gĕn-shīn'), *n.* [G., lit., halo; *heilig* (der *heilige*) holy (saint) + *schein* light. Cf. HOLY; SHINE, *v. i.*] *Meteor.* The bright light which one often sees around the shadow of one's head, as, for instance, on a sunlit bedewed lawn. It is due to diffraction.

Hei'nie (hī'nĭ), **Hei'ne** (hī'nĕ), *n.* Nickname for *Heinrich*, German form of *Henry*; hence, *Amer. & Canadian Slang*, a German; German soldier, airplane, or the like.

he'li-o-mi-crom'e-ter (hē'lĭ-ō-mī-krŏm'ē-tẽr), *n.* [*helio-* + *micrometer*.] *Astron.* An instrument for determining heliographic positions of spots and flocculi shown on direct photographs of the sun or on spectroheliograph plates.

Hep'burn Act (hĕp'bŭrn). [After Wm. P. *Hepburn*, representative from Iowa.] An act, passed June 29, 1906, (59th Congress), as an amendment to the Interstate Commerce Act of 1887. It gave the Interstate Commerce Commission power to prescribe reasonable rates for railroads and interstate carriers, which were declared to include pipe lines, express and sleeping-car lines, bridges, ferries, and railway terminals; to prohibit passes; and to prohibit the transportation of products mined and produced by the transporting line (by which coal chiefly is meant).

hes'i-ta'tion*, *n.* A form of the waltz in which the dancers intersperse at pleasure a certain "hesitating" or gliding movement; also, the movement.

het'er-o-chro'mo-some (hĕt'ẽr-ō-krō'mō-sōm), *n.* [*hetero-* + *chromosome*.] *Biol.* A specially differentiated chromosome having a function in determining sex, as an X chromosome (which see, below).

het'er-o-dyne (hĕt'ẽr-ō-dīn), *a.* [*hetero-* + *dyne*.] *Radio.* Pertaining to the production of a difference of frequency (beats) between two radio frequencies, one of them usually being that of a received signal-carrying current and the other that of an uninterrupted current introduced for the purpose into the apparatus. The beat frequency, being lower than the original frequency, is more readily subjected to the processes of amplification, and the like. Cf. SUPERHETERODYNE. — **het'er-o-dyne,** *v.*

het'er-o-dyne, *n.* *Radio.* An auxiliary generator of radio-frequency voltage used in heterodyne reception.

het'er-o-ga-met'ic (-gȧ-mĕt'ĭk), *a.* [*hetero-* + *gametic*.] *Biol.* = DIGAMETIC, above.

het'er-o-sex'u-al'i-ty (-sĕk'shŭ-ăl'ĭ-tĭ), *n.* [*hetero-* + *sexuality*.] *Psychol.* Sexual interest or inclination directed to the opposite sex. — **het'er-o-sex'u-al** (-sĕk'shŭ-ăl), *a.*

het'er-o'sis* (-ō'sĭs), *n.* *Biol.* The great size and growth capacity often characteristic of crossbred plants and animals, supposedly due to the stimulus of heterozygosis.

hex'a-cos'i-he'droid (hĕk'sȧ-kŏs'ĭ-hē'droid), *n.* [Gr. *ἑξακόσιοι* six hundred + *ἕδρα* seat, base + *-oid*.] See FOURTH DIMENSION, above.

hex'a-dec'a-he'droid (-dĕk'ȧ-hē'droid), *n.* [*hexa-* + *deca-* + Gr. *ἕδρα* seat, base + *-oid*.] See FOURTH DIMENSION, above.

hex'a-lin (hĕk'sȧ-lĭn), *n.* [*hexa-* + *-yl* + *-in*.] *Chem.* **a** A colorless liquid, $C_{10}H_{14}$; hexahydro-naphthalene. **b** Cyclohexanol (which see, above).

hex'a-meth'yl-ene-tet-ram'ine (-mĕth'ĭ-lēn-tĕt-răm'ĭn; -tĕt'rȧ-mēn'), *n.* [*hexa-* + *methylene* + *tetramine*.] *Chem.* See UROTROPINE, in the *Dict.*

hex-ath'lon (hĕk-săth'lŏn), *n.* [See HEXA-; PENTATHLON.] In the Y. M. C. A. indoor athletics, a composite contest consisting of six events: a standing broad jump, a fence vault, putting the shot, a running high jump, a 60-yard potato race, and a 160-yard potato race.

hex'o-san (hĕk'sō-săn), *n.* [*hexose* + 2d *-an*.] *Chem.* Any of a class of polysaccharides that yield hexoses on hydrolysis. Cf. PENTOSAN, in the *Dict.*

Hf. *Abbr. Chem.* [no period, *Hf*] Hafnium.

H. F. C. *Abbr. Elec.* High-frequency current.

H hour, *or* **H'—hour',** *n.* See ZERO, below.

high'brow' (hī'brou'), *n.* One who has a high brow, or forehead; hence, one who is intellectual or learned; esp., one who assumes, or appears to assume, an attitude of intellectual superiority. — **high'brow',** *a.* — **high'browed'** (-broud'), *a.* — **high'brow'ism** (-brou'ĭz'm), *n.* *All Slang.*

Higher Thought. See NEW THOUGHT, below.

high'er—up', *n.* A superior officer or official. *Slang.*

high'—fre'quen-cy ca'ble. *Radio.* = LITZ, below.

high'jack'er, hi'jack'er (hī'jăk'ẽr), *n.* **a** A holdup man. **b** Hence, esp., a highwayman who robs bootleggers and rumrunners of their stock in trade; one who steals alcoholic liquors. — **hi'jack'ing,** *n.* *Both Slang, U. S.*

high'—pass' fil'ter. *Radio.* See FILTER, above.

high'way'*, *n.* An improved main road, forming a continuous route for long-distance automobile traffic, generally passing through several States, and usually bearing a distinctive name; as, the *Lincoln Highway* from New York to San Francisco, *Dixie Highway* from Miami, Fla., to Mackinaw City, Mich., and *Jefferson Highway* from New Orleans to Winnipeg, Man.; — *trail, road*, and *pike* are used with the same meaning; as, the *Yellowstone Trail* from Boston to Seattle, *National Old Trails Road* from Washington, D. C., to Los Angeles, Calif., and the *West Michigan Pike* from Chicago to Mackinaw City, Mich.

Hin'den-burg line (hĭn'dĕn-bōōrg). [After Paul von *Hindenburg*, German general.] In the World War a strongly entrenched line of defense established by the Germans in 1916 across northeastern France from Lille south through St.-Gobain, and thence east to Rethel, later extended to Vouziers and Metz.

his'ta-mine (hĭs'tȧ-mĭn; -mēn), *n.* Also **his'ta-min.** [*histidine* + *amine*.] *Physiol. Chem.* A ptomaine, $C_5H_9N_3$, formed by bacterial decomposition of histidine, and also made synthetically. It is an amino-ethyl derivative of glyoxaline. It produces dilation of the blood vessels and lowers the coagulability of the blood.

hit*, *v. i.* To function by the explosion of gas; — said of an explosion engine or motor, or of a single cylinder of such an engine. *Slang or Cant.*

hoar'frost'*, *n.* *Meteor.* A silvery white deposit of ice needles formed by direct condensation at temperatures below freezing, due to nocturnal radiation. Hoarfrost forms during still, clear nights, is small in amount, needlelike in texture, the "needles" approximately perpendicular to the objects on which they occur, and most abundant along their edges. It is confused by some with *rime*. See RIME, below.

hobble skirt. A woman's skirt so scant at the bottom as to restrain freedom of movement as a hobble does.

hog*, *n.* A distortion of an airship, in which the longitudinal axis becomes convex upward or both ends droop.

hog millet. See PROSO, below.

ho'kum (hō'kŭm), *n.* Anything said or done by an actor merely to get a laugh or win applause from the audience; hence, farce; nonsense; "bunk." *Slang.*

hole in the air. *Aeronautics.* = AIR HOLE, above.

Holy Jumper. See JUMPER, 1 **b**, in the *Dictionary*.

Holy Roller. One of a minor religious sect in the United States and Canada, largely Methodist in origin, whose members, when under the influence of religious fervor, often exhibit great emotional excitement. *Colloq.*

ho'mo-dyne (hō'mō-dīn; hŏm'ō-), *a.* [*homo-* + *dyne*.] *Radio.* Of or pertaining to the process of detecting a wave by the aid of a locally generated current or wave of exactly the same frequency as that of the incoming wave; as *homodyne* reception. See ZERO BEAT, below.

ho'mo-er'o-tism (-ĕr'ō-tĭz'm), *n.* [*homo-* + *erotism*.] *Psychoanalysis.* Erotism directed toward members of one's own sex; homosexuality. — **ho'mo-e-rot'ic** (-ē-rŏt'ĭk), *a.*

ho-mog'e-niz'er (hō-mŏj'ē-nīz'ẽr), *n.* One that homogenizes; specif., an emulsifying agent for producing homogenized, or remade, milk from its constituents (as from skim-milk powder, butter fat, and water)

hon'ey-comb'* (hŭn'ĭ-kōm'), *a.* *Radio.* Pertaining to a type of basket-weave coil winding in which spaces are left which suggest cells of a honeycomb; as, *honeycomb* coil.

honeydew melon. A horticultural variety of the winter melon, with a smooth yellow rind and sweet, greenish flesh.

hooch (hōōch), *n.* Short for HOOCHINOO (in the *Dict.*); hence, any ardent spirits; now esp., in the United States, alcoholic liquor surreptitiously made or obtained. *Slang.*

hood*, *n.* *Automobiles.* The removable metal covering over the engine; the bonnet.

hook'—up' (hŏŏk'ŭp'), *n.* *Radio.* An assemblage of apparatus used in radio transmission or reception, or the general scheme or plan of such an assemblage; also, the set of electric circuits entering into such an assemblage. *Cant.*

hoose'gow, hoos'gow (hōōs'gou; -gō), *n.* Also **hoose'-gaw.** [Perh. fr. Sp. *juzgado* a court, fr. *juzgar* to judge, fr. L. *judicare* to judge, fr. *judex* judge. See JUDGE, *n.*] A jail; lockup; guardhouse; prison. *Slang, U. S.*

Hoo'ver-ize (hōō'vẽr-īz), *v. t. & i.*; -IZED (-īzd); -IZ'ING (-īz'ĭng). [After Herbert Clark *Hoover*, U. S. food commissioner (1917–1919).] To save; economize, esp in the use of food. — **-ism** (-īz'm), *n.* *Both Slang or Colloq.*

hop*, *v. i.* — **to hop off,** to start a flight; rise from the ground in flight; — of an airplane or aviator. *Slang.*

hop*, *v. t.* To start (an airplane) in flight. *Slang.*

hop*, *n.* A flight in an aircraft. *Slang.*

hope chest. A chest or box in which a young woman accumulates a personal outfit of clothing, linen, etc., in hopeful anticipation of marriage; — called also *hope box*. *Bottom drawer* is used in England of a drawer, as in a dresser, used for the same purpose. *Colloq.*

hop'per-burn' (hŏp'ẽr-bûrn'), *n.* *Agric.* A disease of the potato producing a withering of the leaves, associated with the presence of a leaf hopper, *Empoasca mali*; — called also TIPBURN, which see in the *Dict.*

hor'me (hôr'mē), *n.* [Gr. *ὁρμή* impulse. Cf. HORMONE, below.] *Psychol.* The biopsychic energy conceived as constituting the urge, or drive, in human and animal behavior. Cf. LIBIDO **b**, below. — **hor'mic** (-mĭk), *a.*

hor'mone (hôr'mōn), *n.* [From Gr. *ὁρμών*, p. pr. of *ὁρμάειν* to excite.] *Physiol. Chem.* A substance formed in one organ and carried in the circulation to another organ on which it exerts a stimulating effect; thus, according to E. H. Starling (1866–), the gastric glands are stimulated by a *hormone* from the pyloric mucous membrane.

horn*, *n.* *Aëronautics.* The operating lever of a control surface of an aircraft; as, an aileron *horn*, rudder *horn*.

horse—power year. *Mech.* A unit of work equivalent to one horse power acting continuously for one year.

hot bulb, hot pot. See SEMI-DIESEL, below.

hot'foot' (hŏt'fo͝ot'), *v. i.* To hasten; go hotfoot; — with *it*. — *v. t.* To pursue or follow in hot haste. *Both Colloq.*

hot plate*. A simple portable gas heater consisting of one or more flat radial burners mounted on a low frame. *Colloq.*

hot pursuit. [Cf. HOT, *a.*, 7.] *Internat. Law.* The doctrine, denied by some authorities, that the "littoral state has the right to continue on the high seas a pursuit commenced in the terntorial sea, and to arrest and judge a ship which has broken its laws within its waters," such right to pursuit terminating, however, as soon as the ship has entered a part of its own country or of a third power; hence, a similar right of pursuit on land, across the border of one state into another, of any semipolitical band making a lawless incursion. as on the Mexican border in 1916.

hot'—wire' am'me'ter. = THERMAL AMMETER, below.

house'man (hous'mȧn), *n.* A male servant employed to do the heavier kinds of housework, as in a hotel.

house organ. A publication issued by a business concern, containing articles and items of special interest to its employees and customers.

howl'er*, *n.* A glaringly stupid and ridiculous blunder. *Slang.*

howl'ing*, *n.* *Radio.* In an electron-tube apparatus, the audible result of unintentionally introduced regeneration of so great an amount that the tube or apparatus generates alternating current of audio frequency or with audio-frequency components; — called also *squealing*.

Hudson seal. The fur of the muskrat dyed the color of seal.

hull*, *n.* *Aeronautics.* **a** The portion of a boat seaplane which furnishes buoyancy when in contact with the water, and to which the main supporting surfaces and other parts are attached. It contains accommodations for the crew and passengers. **b** The main structure of a rigid airship, consisting of a covered elongated framework which incloses the gas bags and supports the cars and equipment.

human document. A written or printed record revealing implicitly or explicitly the intimate qualities of the writer.

hu'mo-gen (hū'mō-jĕn), *n.* [L *humus* earth + *-gen*.] A kind of fertilizer consisting of bacterized peat.

Hun*, *n.* A German soldier; hence, a German; — said to be in allusion to a speech of the former Kaiser William II. on the eve of departure of the German army for China in 1900, in which he urged his soldiers to make themselves as dreaded as were the Huns under Attila.

hun'dred—per-cent'er (hŭn'drĕd-pẽr-sĕn'tẽr), *n.* A person of extreme and unquestionable patriotism; one with no alien sympathies or subversive principles. *Colloq., U. S.*

hunger strike. The action of one, esp. a prisoner, who refuses to eat anything, or enough to sustain life, in order to induce another to comply with his demands, as for release. Cf. (in the *Dictionary*) DHARNA, and *to fast against*, under FAST. See CAT-AND-MOUSE ACT, above. — **hunger striker.**

hunk'y (hŭng'kĭ), *n.*; *pl.* HUNKIES (-kĭz). Also **hunks** (hŭngks). [Cf. BOHUNK.] A foreign-born laborer, usually unskilled, esp. a Hungarian or South Slav. *Slang, U. S.*

hush boat, hush ship. = MYSTERY SHIP, below. *Colloq.*

hut*, *n.* *Mil.* A structure, more or less rough in its details, often of considerable size, for the housing of troops.

hy'dro (hī'drō), *n.*; *pl.* -DROS (-drōz). **1.** Short for HYDROPATHIC, below. *Colloq., Gr. Brit.*

2. Short for HYDRO-AIRPLANE, below. *Colloq.*

hy'dro—air'plane', —a'ër-o-plane', *n.* A seaplane.

hy'dro-bi'plane' (hī'drō-bī'plān'), *n.* [1st *hydro-* + *biplane*.] *Aeronautics.* A hydro-airplane having two main supporting planes, one above the other.

hy'dro-er-got'i-nine (-ĕr-gŏt'ĭ-nĭn; -nēn), *n.* Also **-nin.** [1st *hydro-* + *ergotinine*.] = ERGOTOXINE, above.

hy'dro-foil (hī'drō-foil), *n.* [1st *hydro-* + *foil*.] A wing-like structure, flat or curved, as on a hydroplane, designed to obtain reaction upon its surfaces from the water through which it moves. Cf. AIRFOIL, above.

hy'drol (hī'drōl; -drŏl), *n.* [1st *hydro-* + 1st *-ol*.] **1.** *Phys. Chem.* The simple water molecule, H_2O. The molecule $(H_2O)_2$ is called *dihydrol* and $(H_2O)_3$ is called *trihydrol*. Liquid water is considered to be a mixture of these and probably other still more complex molecules.

2. *Org. Chem.* A substituted carbinol of the formula RR'CHOH, as benzohydrol, or benzhydrol, $(C_6H_5)_2CHOH$.

hy'dro-mon'o-plane' (hī'drō-mŏn'ō-plān'), *n.* [1st *hydro-* + *monoplane*.] *Aeronautics.* A hydro-airplane, or seaplane, having but one main supporting plane.

hy'dro-path'ic (-păth'ĭk), *n.* An institution or resort at which guests can have hydropathic treatment. *Gr. Brit.*

hy'dro-phone* (hī'drō-fōn), *n.* An instrument of various forms for listening to sound transmitted through the water, as in detecting submarines from the noise made by their propellers.

hy'dro-sul'phite*, *n.* [1st *hydro-* + *sulphite*.] = SODIUM HYPOSULPHITE, below.

hy'dro-vane (hī'drō-vān), *n.* [1st *hydro-* + *vane*.] *Naut.* A rudder, hung horizontally, on a submarine for steering it in an upward or a downward direction.

hy'e-to-graph'*, *n.* A kind of self-registering rain gauge.

hy'per-* (hī'pẽr-). A prefix common in terms relating to fourth-dimensional space; as, *hyper*cone, *hyper*cube, *hyper*cylinder, *hyper*dimensional, *hyper*prism, *hyper*pyramid, *hyper*sphere, *hyper*tetrahedron, *hyper*volume. See HYPER-, 1, in the *Dict.*, and FOURTH DIMENSION, above.

hy'per-im-mune' (hī'pẽr-ĭ-mūn'), *a.* [*hyper-* + *immune*.] Hyperimmunized. — *n.* An animal that has been hyperimmunized. — **hy'per-im-mu'ni-ty** (-ĭ-mū'nĭ-tĭ), *n.*

hy'per-im-mun'ize (-ĭ-mūn'īz; -ĭm'ŭ-nīz), *v. t.* To increase the immune substances, or amboceptors, in the blood of (an immune) through the injection of increasing doses of the virulent organism. — **hy'per-im-mun'i-za'tion** (-ĭ-mūn'ĭ-zā'shŭn; -ĭ-zā'shŭn), *n.*

hy'per-thy'roid-ism (-thī'roid-ĭz'm), *n.* [*hyper-* + *thyroid* + *-ism*.] *Med.* A morbid state resulting from abnormal functional activity of the thyroid gland.

hy'phen*, *n.* The hyphen with reference to its use in certain hyphenated designations. See HYPHENATED, below. *Recent.*

hy'phen-ate (hī'fĕn-āt), *n.* A hyphenated American. *Recent.*

hy'phen-at'ed (-āt'ĕd), *a.* Pertaining to citizens of the United States (America) of foreign birth whose origin is

designated by hyphenated words, as in German-American, Anglo-American, etc.; — chiefly used opprobriously as implying a withholding of full allegiance to the adopted country

hy'phen-ism (hī'fĕn-ĭz'm), *n.* State or fact of being a hyphenate; conduct of, or such as is ascribed to, hyphenates. *Recent.*

hy'po-stat'ic* (hī'pō-stăt'ĭk; hĭp'ō-), *a. Biol.* Liable to be controlled or suppressed by another; — said of certain factors or inherited characters. Cf. EPISTATIC, above.

hy'po-ton'ic (-tŏn'ĭk), *a.* [*hypo-* + *tonic.*] *Physiol.* Having less than normal strength or density.

hy'zone (hī'zōn), *n.* [*hydrogen* + *ozone.*] *Chem.* An unstable, gaseous, triatomic form of hydrogen, H_3, obtained from ordinary hydrogen (H_2) by gaseous ionization, as by the alpha rays from radium. It is more reactive than ordinary hydrogen, but less so than nascent hydrogen. Cf. OZONE, in the *Dictionary.*

I.C.C. *Abbr.* Interstate Commerce Commission (which see, in the *Dictionary*).

I. C. W. *Abbr. Elec.* Interrupted continuous waves.

i-den'ti-fi-ca'tion* (ī-dĕn'tĭ-fĭ-kā'shŭn), *n. Psychoanalysis.* **a** The (unconscious) adoption of the characteristics, situation, activities, etc., of a desired object as a means of, or a substitute for, union with the object. **b** The concentration into a unity of various elements in the material of dreams, myths, etc., thereby intensifying the result with economy of expression.

I'do (ē'dō), *n.* An artificial language, intended for universal use, first made public in France in 1907. Cf. ESPERANTIDO, above. — **I'dism** (ē'dĭz'm), *n.* — **I'dist** (ē'dĭst), *n.* — **I-dis'tic** (ē-dĭs'tĭk), *a.*

ig-ni'tion* (ĭg-nĭsh'ŭn), *n.* In internal-combustion engines, the means of igniting the mixture, as an electric spark from a magneto or a battery, or, in a Diesel engine (which see, above), the heat caused by compression.

il-lin'i-um (ĭ-lĭn'ĭ-ŭm), *n.* [NL.; *Illinois* + *-ium.*] *Chem.* A supposed new element of atomic number 61, discovered in 1926 at the University of Illinois.

‖ **ils' ne passe'ront' pas'** (ēl' nĕ pàs'rôn' pa'). [F.] They shall not pass! — the French war cry at Verdun, 1916.

im'ag-ist (ĭm'ă-jĭst), *n.* Any of a group of modern poets who compose chiefly in vers libre and declare for absolute liberty as to choice of subject matter, but, unlike the symbolists, eschew the mystical and the vague and endeavor to express their ideas and emotions through a unified succession of clear, precise images. — **im'ag-ism** (-jĭz'm), *n.*

i-ma'go* (ĭ-mā'gō), *n. Psychoanalysis.* The conception of the parent retained in the unconscious, elaborated by infantile phantasies and bound with the affect pertaining to the infantile period.

Im'mel-mann turn (ĭm'ĕl-mân). [After Max *Immelmann* (1890–1916), German aviator.] *Aviation.* A maneuver in which an airplane is first made to complete half of a loop and is then rolled half of a complete turn; reverse turn.

im'mu-nol'o-gy (ĭm'ū-nŏl'ō-jĭ), *n.* [*immune* + *-logy*] *Med.* The science treating of the phenomena and causes of immunity. — **im-mu'no-log'i-cal** (ĭ-mū'nō-lŏj'ĭ-kăl), *a.*

im-mu'no-re-ac'tion (ĭ-mū'nō-rē-ăk'shŭn), *n. Physiol. Chem.* A reaction, the nature of which is not yet understood, between antigen and antibody, in the blood, which is of diagnostic value because antibodies will combine with the antigens which induced their formation and with no others

impact excitation. *Radio.* = IMPULSE EXCITATION, below.

im-pac'tion-ize (ĭm-păk'shŭn-ĭz), *v. t.*; **-IZED** (-ĭzd); **-IZ'ING** (-ĭz'ĭng). To impact; pack closely together.

impedance component. *Elec.* One of the three types of quantities (resistance, capacitive reactance, and inductive reactance) of which impedance can be made up.

im-pres'sion-ism*, *n. Mus.* A style designed to create descriptive impressions by evoking moods through rich harmonies and timbres rather than through conventional thematic invention and development.

impulse excitation. *Radio.* A method of producing damped alternating current in which the duration of the impressed voltage is short compared with the duration of the current produced. See QUENCHED GAP, below.

in-ac'ti-va'tion (ĭn-ăk'tĭ-vā'shŭn), *n.* A rendering inactive.

in'cen-div'i-ty (ĭn'sĕn-dĭv'ĭ-tĭ), *n.* [L. *incendere* to set on fire.] The property of an electric spark which determines its tendency to set fire to the gas in which it occurs or to near-by objects.

incidence wires. See STAGGER WIRES, below.

in'cli-nom'e-ter*, *n.* An instrument or device for indicating the inclination to the horizontal of an axis (esp. the fore-and-aft axis) of an aircraft, as: **a** An instrument giving the attitude of an aircraft with reference to apparent gravity (*relative inclinometer*). Such instruments are sometimes incorrectly called *banking indicators.* **b** An instrument (*absolute inclinometer*) giving the attitude of an aircraft with reference to true gravity, or the vertical.

in'com-mu'ni-ca'do (ĭn'kŏ-mū'nĭ-ka'dō), *a.* [Sp. *incomunicado.*] Without means of communication; in solitary confinement; as, to hold a prisoner *incommunicado.*

in'di-goid (ĭn'dĭ-goid), *a.* [*indigo* + *-oid.*] *Chem.* Designating, or belonging to, a class of dyes resembling indigo and characterized by the same color-producing group. The group is commonly represented as -CO.C:C.CO-.

in-duc'tance*, *n. Elec.* A source of inductance; esp., an inductance coil, or choke coil (which see, in the *Dict.*).

in-duc'tive*, *a. Elec.* Pertaining to inductance; — often restricted to mutual inductance.

inductive coupler. *Radio.* A mutual inductor used in radio apparatus to provide coupling between two circuits.

inductive coupling. See COUPLING, above.

inductive reactance. *Elec.* The reactance due to inductance. Its value is proportional to the product of frequency and inductance.

in-duc'tor*, *n. Elec.* A device, usually a coil of wire, which provides or has inductance.

Industrial Workers of the World. A labor organization formed at Chicago in 1905 to include workers in all occupations, skilled or unskilled, irrespective of trade or craft. It demands the abolition of the wage system and has declared itself in favor of international Socialism. *Abbr., I. W. W.*

infantile scurvy. *Med.* A disease of children marked by mental apathy, spongy gums, interstitial hemorrhages and progressive anæmia; Barlow's disease.

inferiority complex. *Psychol.* A morbid sense of personal inferiority, sometimes manifested in timidity, sometimes in exaggerated boldness. Cf. COMPLEX, above.

in-fil'trate*, *v. t. & i. Mil.* To advance (troops) into or nearer to hostile territory by sending forward single men or small groups of men at widely separated intervals.

in'fil-tra'tion*, *n.* The act or process of infiltrating a hostile position, as a trench or wood.

in-i'ti-a-tive* (ĭn-ĭsh'ĭ-ă-tĭv), *n. Political Science.* The right or procedure by which legislation may be introduced or enacted directly by the people, as in the Swiss Confederation and in many of the States of the United States; — chiefly used with *the.* The procedure is usually as follows: A petition, signed by a required number of voters, must be filed, the proposed measure must be submitted to a popular vote, and if it receives the required majority it becomes a law.

ink disease. See BLACK CANKER, above.

in'—law' (ĭn'lô'), *n.* A person connected by marriage; — usually in the plural; as, she likes her *in-laws. Colloq.*

in'phase' (ĭn'fāz'), *a. Elec.* Being of the same phase; as, the *inphase* component of an alternating current is the component of current having the same phase as the electromotive force, that is, the two have the maximum value at the same instant. See PHASE, *n.*, 3, in the *Dict.*

in'sert*, *n. Moving Pictures.* A close-up or a flash of some object that figures in the play, as a telegram, a letter, a locket, or the like, emphasizing or elucidating some point.

inside play. *Sports.* Play according to a preconcerted secret plan among members of a team, often carried on with the aid of secret signs or signals. *Cant.*

in'sight'ful (ĭn'sīt'fo͝ol), *a.* Full of or characterized by insight, or intuition.

in'so-far' (-sō-far'), *adv.* In so far; in such measure or degree; — followed by *as,* and usually written as three words.

in'so-la'tion*, *n. Meteorol.* **a** Received solar radiation, as by the earth or other planet. **b** The rate of delivery of all solar energy, direct and diffused, per unit of horizontal surface; — an important climatic factor, esp. in respect to plant growth.

in'stru-men'tal-ism (ĭn'strōō-mĕn'tăl-ĭz'm), *n. Philos.* The view that the sanction of truth is its utility, or that truth is genuine only in so far as it is a valuable instrument. Cf. PRAGMATISM, 2, in the *Dict.* — **in'stru-men'tal-ist*,** *n.*

in'su-lin (ĭn'sŭ-lĭn), *n.* [L. *insula* island + *-in*] **a** *Physiol. Chem.* The active principle of the islands (or bodies) of Langerhans in the pancreas, which promotes the utilization of sugar in the organism. **b** A solution of this, made from the pancreas of sheep or oxen, and used hypodermically as a specific for diabetes. Insulin was discovered in Toronto in 1923 by Dr. F. G. Banting (1891–) and Dr. J. J. R. MacLeod (1876–).

in-sur'gent*, *n. U. S. Pol.* A member of a political party, esp. a member holding a legislative position, who acts contrary to the policies and decisions of his party; specif., one of an antiadministration group in the Republican party since about 1920.

in'swept' (ĭn'swĕpt'), *a.* Narrowed at the forward end; — said of an automobile frame when the side members are closer together at the forward end than at the rear.

intelligence quotient. A number denoting the intelligence of a person, determined by dividing his mental age by his chronological age. Chronological years above 14 (or, by some, above 16) are disregarded. Usually expressed without a decimal point. *Abbr., I. Q.* or *IQ.*

> The six-year-old of eight-year mental age has an IQ of 8/6 or 133. *Terman.*

intelligence test. Any of several tests, as the Binet, alpha, or beta test, consisting of standardized questions and tasks, designed to determine the mental age or the relative mental capacity of the persons examined.

in-tel'li-gent'si-a (ĭn-tĕl'ĭ-jĕnt'sĭ-ă), *n.; collective pl.*, often with *the.* [Russ. *intelligentsiya,* fr. It. *intelligenzia,* See INTELLIGENT.] Educated or learned people collectively; the intellectual or professional group, class, or party.

in'ter-*. Many recent words are formed on this prefix, the meaning of most of which can readily be gathered from the definitions of the prefix (in the *Dict.*) and the root word; as: — **in'ter—A-mer'i-can,** *a.* — **in'ter-ar'my** (ĭn'tĕr-är'mĭ), *a.* — **in'ter-de'part-men'tal** (-dē'part-mĕn'tăl), *a.* — **in'ter-fac'tion-al,** *a*

☞ See also the several words beginning with *inter-,* below.

in'ter-al-lied' (ĭn'tĕr-ă-līd'), *a.* Of or pertaining to a number of allies; specif., of or pert. to the Allies in the World War, in which sense it is generally written **In'ter-al-lied',** or **in'ter—Al-lied'.**

in'ter-bor'ough (ĭn'tĕr-bŭr'ō), *a.* Pertaining to, situated in, or operating between, two or more boroughs; as, an *interborough* railway.

in'ter-church' (-chûrch'), *a.* Pertaining or common to, or shared in by, a number of churches or all the churches.

interest*, *n.* — **the interests,** large and powerful financial, commercial, and industrial organizations; — often used in a sinister sense because they are popularly supposed to control or influence economic or political activities.

in'ter-fer'ence*, *n. Radio.* **a** Confusion of a received signal due to strays, undesired signals, or other causes. **b** That which produces such confusion.

interlocking directorates. Directorates, as of different business corporations, that are composed at least in part of the same persons, so that the businesses managed by them are more or less under the same control.

in'ter-me'di-ate*, *n. Chem.* A compound obtained as an intermediate step between the initial material and the final product, esp. in dye manufacture. Some important dye intermediates are aniline, the naphthols, toluidine, phenylene diamine, and phthalic acid.

intermediate frequency. *Radio.* A frequency, intermediate between that of carrier and signal, to which the carrier frequency is converted in superheterodyne reception.

in'ter-moun'tain (ĭn'tĕr-moun'tăn), *a.* Among, between, or amid mountains.

international*, *n.* **1.** [cap.] Any of several working-class Socialist organizations of international scope: **a Amsterdam International,** = INTERNATIONAL FEDERATION OF TRADE-UNIONS. **b Communist International,** = THIRD INTERNATIONAL, below. **c First International,** = INTERNATIONAL, *a.*, 2, in the *Dictionary.* **d Labor and Socialist International,** an organization formed at Hamburg, Germany, in May, 1923, by the merging of the Second International and the Vienna International. Its headquarters are at London. **e Moscow International, Red International,** = THIRD INTERNATIONAL, below. **f Red International of Labor Unions,** an industrial organization, chiefly Russian, formed in 1921 under the auspices of the Third International as a "militant international committee for the reorganization of the trade-union movement." Its headquarters are at Moscow. *Abbr., R. I. L. U.* **g Second International,** an organization founded by delegates from many countries at Paris in 1889 to celebrate the hundredth anniversary of the French Revolution. It became merged in the Labor and Socialist International. **h Third International,** called also *Communist International* and *Moscow International,* an organization, founded at Moscow in March, 1919, by delegates from twelve different countries, as a protest against the inactivity and bourgeois character of the Second International and as a call to communists all over the world to support the Russian Revolution and inaugurate similar movements in other countries. It is still predominantly Russian. Called also *Red International.* **i Vienna International,** an organization formed at Vienna in Feb.. 1921, by various socialist parties of Central European countries. It soon merged with the Labor and Socialist International. Called also the *Two-and-a-half International.*

2. A rallying song of communism, revolutionary in spirit, intended to unite the workers of all nations. It was composed in French by Eugène Pottier in 1871 and set to music by Adolphe Degeyter.

3. *pl.* Short for INTERNATIONAL STOCKS. *Stock Exchange.*

International Bureau. *Radio.* = BERNE BUREAU, above.

international code. *Radio.* = CONTINENTAL CODE, above.

International Court of Justice. See PERMANENT COURT OF INTERNATIONAL JUSTICE, below.

‖ **In'ter'na'tio'nale'** (ăn'tĕr'nà'syō'nàl'), *n.* [F.] = INTERNATIONAL, *n.*, 1 & 2, above

International Federation of Trade—Unions. An organization of trade-unions of various countries, founded in 1901 and reorganized at Amsterdam in July, 1921. In 1923 it represented 23 countries and 17,266,191 members. Called also *Amsterdam International. Abbr. I. F. T. U.*

in'ter-na'tion-al-ism*, *n* The doctrine or belief that world peace may be attained by the friendly association of all nations, on a basis of equality and without sacrifice of national character (*nationalism*), for the securing of international justice and for cooperation in all matters of world-wide interest.

International Labor Conference. One of the two principal organs (see also INTERNATIONAL LABOR OFFICE, below) provided for by the Treaty of Versailles (Part XIII.) to advance the cause of labor internationally. It meets at least once each year and is composed of four representatives from each member of the League of Nations. Its main duty is to recommend labor policies and legislation to member nations.

International Labor Office. One of the two principal organs (see also INTERNATIONAL LABOR CONFERENCE, above) provided for by the Treaty of Versailles (Part XIII.) to advance the cause of labor. It collects and distributes information about labor conditions and prepares the agenda for the meetings of the International Labor Conference.

international reply coupon. A coupon, issued by post offices in most countries, exchangeable for stamps for reply postage by a correspondent in a foreign country.

international stocks. *Com.* Bonds or stocks marketable, or whose dividends are payable, at financial centers outside, as well as within, the country of issue.

in'ter-phone (ĭn'tĕr-fōn), *n.* [*inter-* + *-phone* as in *telephone.*] A form of automatic telephone used for inside communication in offices, dwellings, airplanes, etc.

in'ter-plane' (ĭn'tĕr-plān'), *a.* [*inter-* + *plane*] Situated or extending between planes, esp. the planes of an airplane; as, *interplane* struts, wiring, etc.

in'ter-pose'* (-pōz'), *v. t. Moving Pictures.* To cause (a picture) gradually to take the place of another which simultaneously grows dim, or fades out, so that there is no momentary period between the pictures when the screen is blank, as there is in the case of the fade-in and fade-out. Cf. FADE IN, above. — **in'ter-pose'*,** *n.*

interrupted continuous waves. *Radio.* Waves which are continuous except for periodic interruptions at a materially lower frequency. See CHOPPER, above.

in'ter-scho-las'tic (-skō-lăs'tĭk), *a.* [*inter-* + *scholastic.*] Existing, or carried on, between schools, esp. secondary schools.

in'ter-stage' (ĭn'tĕr-stāj'), *a. Radio.* Between the stages (of an amplifier).

in'tra—a-tom'ic (ĭn'trà-ă-tŏm'ĭk), *a.* [*intra-* + *atomic.*] Within an atom or atoms.

in'tra-coast'al (-kōs'tăl), *a.* Within or pert. to the waters near the coast; as, an *intracoastal* waterway.

in'tra-col-le'gi-ate (ĭn'trà-kŏ-lē'jĭ-ăt), *a.* Existing, or carried on, within one college or university; — opp. to INTERCOLLEGIATE; as, *intracollegiate* sports.

in'tra-group' (-grōōp'), *a.* Intragroupal.

in-trigue'* (ĭn-trēg'), *v. t.* **a** To puzzle; perplex. **b** To arouse the interest, desire, or curiosity of, as by an engaging, beguiling, or baffling quality; beguile; as, a tale that *intrigues* the reader; an *intriguing* smile.

in'tro-jec'tion* (ĭn'trō-jĕk'shŭn), *n. Psychol.* The appropriation by the ego of some portion of the environment, either a quality to become a part of the ego or an object upon which to expend emotion and interest, even to the extent of identification with it.

in'tro-vert*, *n. Psychol.* A person of a brooding, reflective type, tending to withdraw his psychic activity into himself.

in'tro-vert' (ĭn'trō-vûrt'), *v. t. Psychol.* To direct psychic activity and interest within the self; — contrasted with *extravert.* — **in'tro-ver'sion*** (-vûr'shŭn), *n.* — **in'tro-ver'tive*,** *a.*

inverse reflex. *Radio.* See REFLEX, below.

in-ver'sion*, *n. Psychoanalysis.* **a** The turning of a thought or affect to its opposite, as in dreams and wit. **b** Homoerotism.

in'vert*, *n.* One whose erotic interest turns to one's own sex.

Invisible Empire, The. The Ku Klux Klan.

in'vo-lu'tion*, *n. Med.* The retrograde development during, or subsequent to, middle life.

I. O. B. B. *Abbr.* Independent Order of B'nai B'rith.

i'o-de'o-sin (ī'ō-dē'ō-sĭn), *n.* Also **-sine** (-sīn; -sēn). [*iodine* + *eosin*.] *Chem.* A dye, $C_{20}H_8O_5I_4$, like eosin in composition, but containing iodine instead of bromine, and similarly used. Called also *erythrosin J*.

i'o-di-nate (ī'ō-dĭ-nāt), *v. t.* *Chem.* To treat or combine with iodine. — **i'o-di-na'tion** (-nā'shŭn), *n.*

ionization current. *Physics.* The electric current produced in an ionized gas when the gas is subjected to an electric field. It is, usually, the current between metallic terminals within the gas, one of which is maintained at a positive potential.

I. Q. *or* **IQ.** *Abbr.* Intelligence quotient.

I-ra'ki, *or* **I-ra'qi** (ē-ra'kē), *n.*; *pl.* IRAKIS, -QIS (-kēz). The natives of the kingdom of Irak (or Iraq), chiefly of Arabic race. They constitute over nine-tenths of the population. — **I-ra'ki-an, -qi-an** (-kĭ-ăn), *a.*

Irish blight. *Agric.* = POTATO BLIGHT, in the *Dict.*

Irish Renaissance. A late nineteenth-century literary movement in Ireland, associated with the effort to revive the use of Gaelic, and exemplified esp. in the poetry or dramas of Yeats, G. W. Russell, Synge, and Lady Gregory.

iron-core transformer. *Elec.* A transformer in which the windings are placed on a frame or core of iron, use being made of the magnetic properties of the iron.

iron ration. = EMERGENCY RATION (which see, in the *Dict.*). *Soldiers' Slang.*

i'ron-wood'*, *n.* *Bot.* = OCEAN SPRAY, below.

ir're-den'ta (ĭr'ē-dĕn'tȧ; *It.* ēr'rā-dĕn'ta), *a.* [It. See IRREDENTIST.] Unredeemed; — used in English esp. of certain regions, called *Italia irredenta* (unredeemed Italy), which although largely Italian in population were subject to other governments (see IRREDENTIST, in the *Dictionary*) and hence, in recent use, also of other regions similarly situated politically with regard to other states. — *n.* A region or section having a political relation to a state like that of "Italia irredenta" to Italy; as, the Yugoslav *irredenta* in Austria before the World War.

Ir're-den'tism*, *n.* The principles, policy, or practice of a party, or of persons, who seek to reincorporate within their national boundary territory of which their nation has been deprived; — formerly used only with reference to Italy, but now with reference to other countries, as Hungary, Germany, and Turkey.

i-sal'lo-bar (ī-săl'ō-bär), *n.* [*iso-* + *allo-* + Gr. *βάρος* weight.] *Meteorol.* A line connecting the places of equal change of atmospheric pressure within a specified time.

i-sal'lo-therm (-thûrm), *n.* [*iso-* + *allo-* + *therm.*] *Meteorol.* A line connecting the places of equal change of temperature within a specified time.

islands of Langerhans. = BODIES OF LANGERHANS, in the *Dict.* Cf. INSULIN, above.

i'so-bar*, *n.* *Chem.* One of two atoms which have identical atomic weights but different atomic numbers and consequently different chemical properties.

i'so-eu'ge-nol (ī'sō-ū'jē-nōl; -nŏl), *n.* [*iso-* + *eugenol*, with which *isoeugenol* is isomeric.] *Org. Chem.* A propenyl derivative of guaiacol, $C_{10}H_{12}O_2$, occurring as a colorless liquid in ylang-ylang and nutmeg oils, and used to make vanillin by oxidation.

i'so-hel (ī'sō-hĕl), *n.* [*iso-* + Gr. *ἥλιος* sun.] *Meteorol.* A line connecting places having equal duration of sunshine.

i'so-lant'ite (-lăn'tīt), *n.* [F. *isolant* insulating + *-ite.*] *Elec.* An electrical insulating material of porcelain type.

i'so-phane (-fān), *or* **i'so-phene** (-fēn), *n.* [*iso-* + Gr. *φαίνειν* to show.] *Biol.* A line connecting all places within a given region at which some phenological phenomenon, as the flowering of a certain plant, occurs at the same time.

i'so-pleth (-plĕth), *n.* [Gr *ἰσοπληθής* equal in quantity or number; *ἴσος* equal + *πλῆθος* quantity, number.] *Meteorol.* **a** A line showing the relation of an element (temperature, pressure, etc.) to both the time of year and time of day. **b** A line showing the relation of a meteorological element to time of year, or day, and altitude.

isothermal region. See STRATOSPHERE, below.

i'so-tope (ī'sō-tōp), *n.* [*iso-* + Gr. *τόπος* place.] *Chem.* One of two or more elements occupying the same position in the periodic table, practically identical in chemical behavior and distinguishable only by radioactive transformations and small differences in atomic weight. Thus, radium B, radium D, thorium B, and actinium B are all *isotopes* of lead and of one another. A group of isotopes is sometimes called a *pleiad*. Many of the common elements may be mixtures of isotopes. — **i'so-top'ic** (-tŏp'ĭk), *a.*

I'to (ē'tō), *n.* Short for, and formed from the initials (see J, in the *Dictionary*) of, *Jewish Territorial Organization*, a Jewish organization founded, under the leadership of Israel Zangwill, to further the aims of Territorialism (which see, below). Hence, **I'to-ism** (-ĭz'm), *n.* (= TERRITORIALISM, below), **I'to-ist** (-ĭst), *n.*, **I'to-land'** (-lănd'), *n.*

I. W. W. *Abbr.* Industrial Workers of the World (which see, above); also, a member of this organization. — **I. W. W. ism,** *or* **I. W. W.-ism** (-ĭz'm), *n.*

jack,* *n.* A small coin (see JACK, 3d *n.*, 9, in the *Dict.*); hence, coin; money; as, a pocket full of *jack*. *Slang.*

jack'et*, *n.* A hard metal covering, as of cupronickel, surrounding the lead core of a rifle bullet to give it greater stability in flight and prevent it from spreading when it strikes.

Jack Johnson. See BLACK MARIA, above. *Slang.*

jack'stay'*, *n.* *Aeronautics.* A longitudinal rigging provided to maintain the correct distance between the heads of various riggings on an airship.

jak'ey (jāk'ĭ), *n.* [From the name *Jamaica.*] Essence of Jamaica ginger, sometimes used as a beverage. *Slang, U. S.*

jam*, *v. t.* *Radio.* To cause interference in (radio signals); to render (radio signals) unintelligible by sending out other signals or messages in an interfering manner.

James'—Lang'e the'o-ry (lăng'ē). *Psychol.* The theory that an emotion is the felt result and not the cause of the bodily activities which arise in response to exciting stimuli; — set forth chiefly by William James and Carl Georg Lange (1834–1900), Danish physician.

Japanese beetle. *Zoöl.* A small green-and-brown leaf chafer (*Popillia Japonica*) introduced into America from Japan. The adults are very destructive to foliage and fruits, and the grubs generally feed on the roots of grasses.

Japanese cane. A variety of sugar cane (*Saccharum officinarum*; syn. *S. sinensis*) widely grown for forage, characterized by its slender stalks and great hardiness.

jay'walk'er (jā'wôk'ẽr), *n.* One who walks like a "jay," or gawky person; esp., one who crosses streets carelessly or at unusual or inappropriate places, or in a dangerous, or illegal, direction, so as to be endangered by the traffic.

jazz (jăz), *n.* **a** *Music.* A recent type of American music, esp. for dances, developed from ragtime by introduction of eccentric noises and negro melodies, and now characterized by melodious themes, dance rhythms, and orchestral coloring. **b** A dance to jazz music **c** A quality or manner suggestive of jazz music, esp. in literary or journalistic style, as in Vachel Lindsay's "The Congo."

jazz, *v. t.* To transform into, or infuse with, jazz; — often with *up*. *Slang.*

jazz, *v. i.* To dance or perform jazz; to do (anything) in a manner suggestive of jazz. *Slang.* — **jazz'er,** *n.* *Slang.*

jazz, *a.* Of, pertaining to, or characterized by jazz.

jazz band. *Music.* A band, usually playing jazz, having instruments for varied tonal effects, as the piano, violin, and banjo, along with saxophones, trumpets, trombone, tuba, drums, etc.; — formerly *jass band.*

jazz'y (jăz'ĭ), *a.* Containing, or characterized by, jazz. — **jazz'i-ly,** *adv.* — **jazz'i-ness,** *n.* *All Slang.*

Jer'ry*, *n.* A German; German soldier. *Soldiers' Slang.*

jinx (jĭŋks), *n.* A person, object, influence, or supernatural being that is supposed to bring bad luck or to cause things to go wrong. Cf. HOODOO, in the *Dictionary.* *Slang.*

jit-neur' (jĭt-nûr'), *n.*, **jit-neuse'** (-nûz'), *n. fem.* [*jitney* + *chauffeur, chauffeuse.*] A jitney driver.

jit'ney (jĭt'nĭ), *n.*; *pl.* -NEYS. **a** Five cents; a nickel. *Slang.* **b** An automobile vehicle, other than a street car, which carries passengers for a small, originally a five-cent, fare, commonly over a regular route. — **jit'ney-man,** *n.*

joy ride. A pleasure ride in a motor car; esp., a surreptitious ride with companions during which the machine is driven heedlessly and often at excessive speed. — **joy rider.** — **joy riding.** *All Slang.*

joy stick. The control stick of an airplane. See CONTROL STICK, above. *Slang.*

Ju'go-slav', *or* **Ju'go—Slav'** (yōō'gō-slȧv'), *n.* & *a.* See YUGOSLAV, below.

Ju'go-slav'i-an, *or* **Ju'go—Slav'i-an** (-slȧv'ĭ-ăn), *a.*, **Ju'go-slav'ic,** *or* **Ju'go—Slav'ic** (-slav'ĭk; -slȧv'ĭk), *a.* See YUGOSLAVIAN, YUGOSLAVIC, below.

June drop. *Hort.* The dropping of immature fruits, due to a lack of fertilization or other causes.

junior college. A college (usually connected with a secondary school) which gives not more than two years of college work. Cf. STANDARD COLLEGE, below.

junior high school. A school organization formed by the union of the seventh and eighth grades of the grammar school with the first year of the high school, organized on the departmental plan with a limited amount of election of studies, to provide for individual differences among students by an earlier introduction of prevocational work and of some of the subjects usually taught in high school.

juvenile court. *Law.* A court having special jurisdiction over delinquent and dependent children, usually up to the age of 18. The distinguishing practices are private hearings for offenders, personal relations with the judge, periods of probation, the prohibition of imprisonment with adults, and jurisdiction over parents contributory to delinquency.

K. *Abbr.* Lit., Kelvin; — used to designate degrees on the Kelvin scale (which see, below); as, 273.1° K. = 0° C.

kaf'ir-in (kăf'ẽr-ĭn), *n.* [See KAFIR; 2d -INE.] *Physiol. Chem.* A protein found in the seeds of Kafir corn.

kai'ser-dom (kī'zẽr-dŭm), *n.* [See -DOM.] The office, dominion, or jurisdiction of a kaiser; also, kaiserism.

kai'ser-ism (-ĭz'm), *n.* Autocratic or arbitrary rule, conduct, or policy of, or like that of, a kaiser, esp. William II. of Germany.

‖ **Ka'me-rad** (kȧ'mē-rat), *n.* [G.] Comrade; — used as an appeal for quarter by German soldiers.

ka'me-rad (-rȧd), *v. i.* To surrender. *Colloq.*

ka-nal' rays. *Physics.* Same as CANAL RAYS, in the *Dict.*

kangaroo closure. A parliamentary procedure by means of which a chairman or speaker shortens discussion, as of a series of amendments, by selecting only those which he considers worth debating. *Cant or Slang, Eng.*

ka'o-li-ang' (ka'ō-lē-ăng'), *n.* [Chin.] *Agric.* Any of a group of grain-producing sorghums of eastern Asia, with spreading or compact panicles and a dry pith. Some have recently been used in the United States as dry-land crops.

‖ **Kar-tell'** (kar-tĕl'), *n.* [G.] Also **kartel.** See CARTEL.

kat'a-bat'ic (kăt'ȧ-băt'ĭk), *a.* [Gr. *καταβατικός*, adj. fr. *καταβαίνειν* to go down] *Meteor.* Of or pertaining to the downward motion of air, as in air drainage induced by surface cooling. Winds thus formed a e called, generically, *fall winds, gravity winds,* or *katabatic winds.*

K. C., *or* **K. of C.** *Abbr.* Knights of Columbus.

keek* (kēk), *n.* A peeper; specif., in the clothing trade, one employed by a manufacturer to get by spying the latest designs from rivals for imitation. *Slang or Cant.*

keel*, *n.* *Aeronautics.* A structural member or assembly of members which contributes longitudinal strength to an airship of rigid or semirigid type. The keel is a trussed rder, inclosed within the envelope or projecting beyond the regular cross-sectional form of the envelope.

Kel'vin scale (kĕl'vĭn), *or* **Kel'vin,** *n.* [Named after Baron W. T. *Kelvin* (1824–1907).] *Physics.* The absolute scale of temperature. See ABSOLUTE SCALE, above.

Ke-mal'ist (kĕ-mäl'ĭst), *n.* A follower or adherent of Mustafa Kemal Pasha, Turkish Nationalist leader and first president of the Turkish republic.

Ken-nel'ly—Heav'i-side lay'er *or* **sur'face** (kĕ-nĕl'ĭ-hĕv'ĭ-sīd). *Radio.* = HEAVISIDE LAYER, above.

ken'o-tron (kĕn'ō-trŏn), *n.* [Gr. *κενός* empty + *-tron* as in elec*tron.*] *Elec.* A discharge tube exhausted to a high vacuum, with an incandescent filament as cathode and an anode usually of tungsten or molybdenum. Such a tube acts as a rectifier (of alternating current) because the conductivity in it is entirely unidirectional.

ke'ta-zine* (kē'tȧ-zĭn; -tȧ-zēn), *n.* Also **-zin.** [*ketone* + *azine.*] *Chem.* See AZINE, above.

ke-to'sis (kē-tō'sĭs), *n.* [NL.; *ketone* + *-osis.*] *Med.* Excess of acetone or other ketones in the organism.

key'—mod'u-lat'ed con-tin'u-ous waves (kē'mŏd'ū-lāt'ĕd). *Radio.* Continuous waves of which the intensity is varied by the operation of a signaling key.

key'not'er (kē'nōt'ẽr), *n.* *U. S. Politics.* The person who makes the speech presenting the fundamental issues of a campaign or movement.

Kha'li-fat* (ka'lĭ-făt), **Khi'la-fat** (kē'lȧ-făt), *n.* The spiritual headship of Islam, as formerly residing in the person of the Turkish Sultan at Constantinople.

kick*, *n.* Any quick and forcible effect suggestive of a kick with the foot or the kick of a gun; as: **a** The characteristic effect of a good gasoline mixture when exploded. **b** Strongly stimulating effect, as of liquor. *All Slang.*

kick'—back', *n.* *Radio.* High voltage produced by a radio transmitting set or alternating-current generator in the circuit or apparatus supplying it with relatively low voltage.

kike (kīk), *n.* *Slang.* **a** = KEEK, above. **b** A Jew; Yid.

kil'o-cy'cle (kĭl'ō-sī'k'l), *n.* [*kilo-* + *cycle.*] *Radio.* Unit of frequency equal to 1000 cycles per second.

kilt'ie (kĭl'tĭ), *n.* One who wears a kilt; specif., a Scottish Highland soldier. *Chiefly Scot.*

kin'e-ma (kĭn'ē-mȧ), *n.* Var. of CINEMA, above.

kin'e-ma-col'or, kin'e-ma-col'our (kĭn'ē-mȧ-kŭl'ẽr), *n.* [A trade name.] A patented process for producing moving pictures in approximately natural colors by means of two-color photography and the projection of the positives alternately through red and green filters.

ki-ne'to-phone (kĭ-nē'tō-fōn; kī-), *n.* A machine combining a kinetoscope and a phonograph synchronized so as to reproduce a scene with its accompanying sounds.

kitch'en-ette' (kĭch'ĕn-ĕt'), *n.* Also **kitch'en-et'.** [*kitchen* + *-ette.*] A very small room or an alcove combining kitchen and pantry, with the conveniences compactly arranged.

kitchen police. *Mil.* Enlisted men detailed to help the cook, wash dishes, wait on table, etc. Cf. POLICE, *n.*, 4, in the *Dictionary.* *Abbr., K. P.*

kite*, *n.* **1.** *Aëronautics.* A form of aircraft, heavier than air, without other propelling means than the towline pull, whose support is derived from the force of the wind moving past its surfaces. **2.** *Naval.* A specially shaped form or weight attached to a submerged line towed by a vessel (mine sweeper) or between two vessels, so as to make the line tow at a predetermined depth, for clearing mined areas.

kite balloon*. *Aeronautics.* An elongated form of captive balloon, fitted with tail appendages to keep it headed into the wind, and usually having increased lift due to its axis being inclined to the wind.

kite sausage. *Aëronautics.* See KITE BALLOON, above.

Ki-wa'ni-an (kē-wä'nĭ-ăn), *n.* A member of any of a large number of clubs [**Ki-wa'nis** (-nĭs) **Clubs**], in the United States and Canada, having the same constitution, the first organized in 1915 at Detroit. The Kiwanian principles are fair dealing and the observance of the golden rule.

ki'wi* (kē'wĭ), *n.* = PENGUIN **b**, below. *Nickname.*

Klan (klăn), *n.* The Ku Klux Klan, or one of its local units. — **Klans'man** (klănz'măn), *n* — **Klans'wom'an,** *n.*

klieg light (klēg). [After *Kliegl* brothers, the inventors.] A kind of arc light, used in taking motion pictures, with carbons that emit a light rich in actinic rays.

K line, *or* **K'—line',** *n.* *Physics.* One of the lines of definite wave length in the X-ray spectrum of an element. The wave lengths of the K lines are determined by the atomic weight of the element from which they come, being less for elements of high atomic weight.

knäck'e-bröd' (k'năk'ē-brōd'), *n.* [Sw. *knäcka* to break + *brod* bread]. A kind of Swedish rye bread or hard-tack, very crisp and brittle, rolled in flat, circular, or square pieces about 18 inches in diameter, with a hole in the center, and dried by stringing on a long pole.

Knights of Columbus. A fraternal and benevolent society of Roman Catholic men, founded at New Haven, Conn., in 1882, the purposes of which are to promote social and intellectual intercourse among its members, to aid its members and beneficiaries, to protect and promote Catholic interests, and to foster a spirit of fraternity among citizens of all races and creeds. *Abbr., K. C., K. of C.* See FRATERNAL EMBLEMS, plate facing p. 1192, in *Dict.*

‖ **ko'mi-ta'ji,** *or* **-ta'dji** (kō'mē-tȧ'jē), *n.* [Turk. *qomitaji* guerrilla, bandit, lit. committee man, fr. *qomita* committee (esp. of insurgents). See 2d COUNT, *n.*] Formerly, a member of the Bulgarian Revolutionary Committee in Macedonia; in recent years, a member of any Balkan guerrilla band.

K. P. *Abbr.* Kitchen police.

kraft (krȧft), *n.* [G. *kraft* strength.] A kind of strong wrapping paper, usually dark brown in color, made wholly from sulphate pulp or partly mixed with sulphite pulp; — called also *kraft paper.*

kraft pulp. = SULPHATE PULP, below.

K tube, *or* **K'—tube',** *n.* A hydrophone, or underwater listening device, used to detect submerged submarines.

Ku Klux Klan. A fraternal order, with secret membership and rites, ostensibly reviving the Ku-Klux, incorporated in Georgia in 1915 as the Invisible Empire, Knights of the Ku Klux Klan. Its membership is said to be confined to American-born Protestant whites. — **Ku Klux Klanner.**

kul'ti (kōōl'tĭ), *n.* [Tamil.] An annual leguminous food and forage plant (*Dolichos biflorus*), native to India.

‖ **Kul-tur'** (kōōl-tōōr'), *n.* [G.] Lit, culture; culture regarded as an evolutionary force developing advanced stages of social organization; hence, a particular stage or type of such organization; a distinctive national culture or civilization; as, Spartan *Kultur.*

kv. *Abbr. Elec.* Kilovolt.

ky'ack (kī'ăk), *n.* A pack sack to be swung on either side of a packsaddle. *Western U. S.*

kyke* (kīk), *n.* Var. of KEEK, above. *Slang.*

ky'mo-graph* (kī'mō-grȧf), *n.* *Physics.* An instrument for recording the rotary motions of an airplane in flight. In general, its action depends upon a gyroscope, or on the actinic effect of a beam of sunlight focused on a moving film.

labor bank. A bank whose stock is wholly or largely owned by trade-unions or their members, and which is conducted in the interest of union labor. The officers are mainly trade-union officials, the dividends are limited, and the depositors share in the profits.

labor turnover. See TURNOVER, below.

lach'ry-ma'tor (lăk'rĭ-mā'tẽr), *n.* A lachrymatory or tear-producing substance. Cf. TEAR SHELL, below.

lachrymatory gas. See GAS, *n.*, 1, above.

lachrymatory shell. = TEAR SHELL, below.

La'lique' glass (lȧ'lēk'). [After René *Lalique* (1860–), French jeweler, the inventor.] A kind of decorative glassware ornamented with flowers, birds, or animals in relief.

lam'bert (lăm'bĕrt), *n. Photometry.* The C. G. S. unit of brightness, being the brightness of a perfectly mat surface which radiates or reflects one lumen per square centimeter; that is, the brightness of a perfectly diffusing surface having a coefficient of reflection equal to unity and subjected to unit illumination.

lame duck*. An officeholder, as a senator or congressman, who has failed of reelection, esp. one whose term has not expired; — often used attributively; as, a *lame-duck* Congress. *U. S. Political Cant.*

lam'el* (lăm'ĕl), *or* **la-mel'la***, *n.* A minute disk of glycogelatin medicated for use in the eyes or hypodermically.

lan'dau-let'* (lăn'dô-lĕt'; *in this sense often* lăn'dô-lā'), *n.* An automobile having a body similar to that of the brougham, except that the inclosed section is shorter, and the roof is collapsible. See AUTOMOBILE, *Illust.*, in the *Dictionary*.

land battleship, cruiser, *or* ship. See TANK, below.

land'fall'*, *n. Aëronautics.* A coming to land; landing.

landing angle. *Aëronautics.* The angle of attack of the main supporting surfaces of an airplane at the instant of touching the ground in a three-point landing; that is, the angle between the wing chord and the horizontal when the machine is resting on the ground in its normal position.

landing gear. The under structure of an aircraft, designed to carry the load when in contact with the land or water.

land'plane' (lănd'plān'), *n.* An airplane designed to rise from and alight on the land.

lands'maal, lands'mal' (lăns'môl'), *n.* [Norw.] A popular language or composite dialect, proposed about 1850 by Ivar Aasen (1813–1896), a Norwegian philologist, based on the spoken dialects of Norway. It has been used to a certain extent in poetry, novels, and the drama, but has not displaced the official Dano-Norwegian *rigsmaal* ("language of the realm").

lap'pet*, *n. Weaving.* An attachment for lappet weaving (which see, in the *Dictionary*), consisting of one or more needle bars with depending needles carrying a series of floating warp threads so that they can be introduced zigzag into the body of the fabric. Also, the fabric so woven, mainly used as a curtain material.

lapse*, *n. Meteorol.* Decrease of temperature, pressure, or value of other meteorological element, as the height, or elevation, increases; vertical gradient.

lar'vi-pos'it (lar'vĭ-pŏz'ĭt), *v. i.* [*larva* + *posit.*] To deposit living larvæ, instead of eggs. Cf. LARVIPAROUS and OVIPOSIT, in the *Dictionary*.

Lat'vi-an (lăt'vĭ-ăn), *a.* Of or pert. to Latvia, the country of the Letts, or to the Letts; Lettish.

lav'a-liere', *or* **lav'a-lier'** (lăv'ȧ-lēr'), *n.* Also ‖ **la/val'-lière'** (*F.* lȧ'vȧl'yâr') *n.* [F. *la vallière, lavallière*, a sort of necktie, perh. from Louise de *La Vallière*, mistress of Louis XIV.] A neck ornament consisting of a chain and single pendant, or drop.

l. c. l. *Abbr. Railroads.* Less than carload lot.

lead'er*, *n. Moving Pictures.* A subtitle.

lead'—in' (lēd'ĭn'), *a.* That leads in; — used esp. of an electrical conductor; as, a *lead-in* wire.

lead'—in' (lēd'ĭn'), *n. Radio.* = DOWN-LEAD, above.

leading edge. *Aëronautics.* The foremost edge of an airfoil or propeller blade; — called also *entering edge*.

leaf roll. *Agric.* A degeneration disease of the potato, characterized by the upward rolling of the leaves, apparently transmitted through the tubers, and producing a reduction in their size and number.

league*, *n.* — **The League***, the League of Nations.

League of Nations. An association of nations, created in accordance with a Covenant of the Peace Conference at Paris, adopted April 28, 1919, for lessening the likelihood of war by the limitation of armaments and the adoption of the principle of arbitration, for the administration of conquered or surrendered colonies (mandates), and for united action on other world problems. It came into existence January 10, 1920. The Covenant of the League provides for an Assembly, in which each state has one vote; a Council, to consist of the four chief powers (France, Great Britain, Italy, and Japan) and representatives of six other members, selected by the Assembly; and a permanent secretariat.

leak'ance (lēk'ăns), *n. Elec.* = LEAKAGE CONDUCTANCE, in the *Dictionary*. *Linear leakance* is leakance per unit length (of conductor).

Leb'a-nese' (lĕb'ȧ-nēz'; -nēs'), *n. sing. & pl.* One of the people of Syria inhabiting Mt. Lebanon or the surrounding region. — **Leb'a-nese'**, *a.*

Lech'er wires (lĕk'ĕr). *Radio.* [After Ernst *Lecher* (1856–), Austrian physicist.] A pair of long parallel wires on which standing waves are produced. The term is frequently used incorrectly for *parallel-wire system*.

Le-duc' ef-fect' (lē-dük'). [After Professor Sylvestre Anatole *Leduc*, of Paris.] *Physics.* A transverse temperature gradient observed in a metal, through which a flow of heat occurs, when the metal is in a magnetic field the lines of force of which are perpendicular to the heat flux; — called also *Righi effect*. The Leduc effect is the thermal analogue of the Hall effect (which see, in the *Dictionary*).

lee'way'*, *n. Aëronautics.* The angular deviation of an aircraft from a set course over the earth, due to cross currents of wind; — called also *drift*.

left wing. The more liberal or radical element of a political party. — **left'—wing'er,** *n. Both Political Cant.*

le'gion-er (lē'jŭn-ĕr), *n.* A legionary.

le'gion-naire' (lē'jŭn-ârʹ), *n.* [F. *légionnaire.*] A member of a legion; legioner; legionary.

‖ **le'i** (lā'ē), *n.; pl.* LEIS (-ēz). [Hawaiian.] A wreath, as of leaves and flowers, esp. as an ornamental dress for the head.

Leish-ma'ni-a (lēsh-mā'nĭ-ȧ), *n.* [NL., after Gen. Sir William Boog *Leishman* (1865–), British army surgeon.] *Zoöl.* A genus of minute, usually pear-shaped or ovoid, protozoans found in the cells of the spleen and other viscera of mammals. These protozoans are associated with, and are believed to cause certain tropical diseases, as leishmaniosis and kala azar.

leish-ma'ni-o'sis (-ō'sĭs), *n.* Any of certain diseases caused by species of Leishmania.

lem'on-wood'*, *n.* In South Africa, a small evergreen tree (*Psychotria capensis*), belonging to the Rubiaceæ, the hard, tough, elastic wood of which is used in making bows.

Len'in-ism (lĕn'ĭn-ĭz'm), *n.* The tenets or the political system of Nikolay Lenin (real name Vladimir Ilich Ulianov, 1870–1924), Bolshevist leader.

Len'in-ite (-ĭt), *n.* A follower of Nikolay Lenin (see LENINISM, above). — **Len'in-ist,** *n* — **Len'in-ite,** *a.*

le'no* (lē'nō), *n.; pl.* LENOS (-nōz). A kind of dress fabric in which some of the warp ends are twisted partly or wholly around adjoining warp ends, giving an openwork gauze effect.

lep'ro-sa'ri-um (lĕp'rō-sā'rĭ-ŭm; 115), *n.; pl.* E. -RIUMS (-ŭmz), L. -RIA (-ȧ). [NL.; *leprosy* + *sanitarium*] A retreat or asylum for lepers; a leprosery.

leth'al (lēth'ȧl; lē'thȧl), *n.* [*lauric* + *ethal*] *Chem.* A waxy alcohol, $C_{12}H_{25}OH$, supposed to exist in spermaceti in the form of esters.

le'thal (lē'thȧl), *n.* A lethal substance. See LETHAL, *a.*

let'ter-gram (lĕt'ĕr-grăm), *n. Teleg.* A telegram, longer than an ordinary message, sent at rates lower than the standard message rate in consideration of its being sent and delivered subject to priority in service of regular messages; — called also *day letter*, or *night letter*.

lev'el*, *v. i.* — **to level off,** *Aviation*, to prepare to land by flying the airplane nearly horizontally with the wings at such an angle of attack as to give very little lift.

lev'y en' masse' (lĕv'ĭ ȧn' măs'). [See 2d LEVY, *n.; EN MASSE.*] *Internat. Law.* The spontaneous act of the people of a territory not yet occupied by an enemy force of taking up arms for self-defense upon the approach of an enemy, without having had time to organize in accordance with recognized rules of warfare. Such a force is considered as belligerent if it respects the laws and customs of war. Written also as French, ‖ **le-vée' en' masse'** (lē-vā').

Lew'is automatic rifle (lū'ĭs). A light gas-operated and air-cooled automatic rifle or machine gun of simple construction, fed from circular magazines and firing normally 400 rounds a minute, invented by Col. I. N. Lewis, United States Army, retired; — called also *Lewis (machine) gun*.

lew'is-ite (lū'ĭs-īt), *n. Mil.* A colorless, irritant and poisonous arsenical liquid discovered by an American chemist, W. Lee Lewis, and his coworkers. When the World War ended it was being made on a large scale by the United States government in the belief that it would prove more effective than mustard gas. Chemically it is dichloro-β-chloro-vinyl-arsine, ClCH:CHAsCl$_2$. It is made by the reaction of acetylene with arsenic trichloride.

L. F. C. *Abbr. Elec.* Low-frequency current.

‖ **li'ai'son'*** (lē'ā'zôN'; 277), *n.* Connection; established working relation; specif., *Mil.*, intercommunication established and maintained between a commander and subordinates or between units acting as neighbors or in conjunction; — often used attributively; as, *liaison* officer.

Lib'er-ty*, *n.* A liberty bond. *Collog., U. S.*

Liberty bond. A United States government gold bond of any of the five issues authorized by acts of Congress between April 24, 1917 (First Bond Issue Act) and March 3, 1919 (Fifth, or Victory, Liberty Loan Act). The first issue, called the "**Liberty Loan,**" gave its name to succeeding issues. Liberty bonds were issued in denominations ranging from $50 to $100,000, bearing interest from 3½ to 4¼%. The quotas for the five loans in billions of dollars were; (First) 2, (Second) 3, (Third) 3, (Fourth) 6, and (Victory) 4½; all were oversubscribed, the total allotted being $21,435,370,600, to about 64,324,000 subscribers.

‖ **li-bi'do** (lĭ-bī'dō), *n.; pl.* LIBIDINES (lĭ-bĭd'ĭ-nēz). [L.] *Psychoanalysis.* **a** The dynamic expression of the sexual impulses, psychical as well as physical, manifested as *object libido* in direction to external objects or as *ego libido* in direction toward one's self (Freud). **b** The original energy or fundamental striving of the psyche, capable of being sexualized or desexualized (Jung). — **li-bid'i-nal** (-bĭd'ĭ-năl), **li-bid'i-nous*** (-nŭs), *a.*

lift*, *n. Aëronautics.* That component of the total air force which is perpendicular to the relative wind and in the plane of symmetry; — used with reference to a complete aircraft or to a part or parts of it.

lightning arrester*. *Radio.* A protective device used, usually in parallel with a radio set, to carry accumulations of static electricity and lightning discharges to the ground without going through the radio set.

lightning switch. *Radio.* A switch used in an antenna circuit, as during lightning storms, to connect the antenna to the ground instead of to the receiving set.

lim'ber-neck' (lĭm'bĕr-nĕk'), *n.* [*limber, a.* + *neck.*] An affection of poultry caused by the ingestion of a toxin in the food, as by botulism, and characterized by the peculiar turning and holding of the head.

lime nitrogen. See CALCIUM CYANAMIDE, above.

lime roasting. See BLAST ROASTING, above.

line'age* (līn'ĕj), *n.* A space measured in agate lines one column (usually about 2¼ in.) in width; — used esp. of advertising or publicity in newspapers or magazines.

li-nene' (lī-nēn'), *n.* [*Lin-* (fr. L. *linum* flax) + *-ene* (= 2d -NE **b**).] A coarse, heavy fabric of plain weave, usually of cotton, resembling linen crash, and bearing the trade-mark *Linene*. It is used for skirts, middies, aprons, etc.

lin'er* (līn'ĕr), *n.* An airship belonging to a regular line, that is, one of a number of airships under one management, plying regularly over a certain route.

line radio. Communication over wires with the methods and instrumentalities of radio, esp. with modulated high-frequency currents; — called also *Squier system, wired radio, wire wave communication*, etc.

link'age*, *n. Biol.* The state or quality of being linked.

linked, *a. Biol.* **a** So united in the physical mechanism of inheritance as to be inherited together; as, *linked* characters. **b** Consisting of linked characters; as, a *linked* group.

li'on*, *n.* [*cap.*] A member of any one of an association of civic clubs (**International Association of Lions Clubs**), founded in 1918 and affiliated internationally. The objects are good government and good citizenship, community welfare, and good fellowship.

li'pin (lī'pĭn), *n.* [Gr. λίπος fat + *-in.*] *Physiol. Chem.* Any of a large class of substances which are insoluble in water, soluble in chloroform and other solvents for fat, and which are greasy to the touch. They include the fats and fatty oils, essential oils, fatty acids, waxes and higher alcohols, and also various complex compounds.

lip'o-vac'cine (lĭp'ō-văk'sĭn; -sēn), *n.* [1st *lipo-* + *vaccine.*] A vaccine whose menstruum is a vegetable oil.

lip stick. a A kind of pomade, or perfumed ointment, for the lips, put up in stick form. **b** Rouge for the lips compressed into the form of a stick.

lis'ten* (lĭs'n), *v. i.* — **to listen in,** to put one's self in a position to hear a telephonic, telegraphic, or radio communication intended for some one else or for many. *Cant.* — **lis'ten—er—in',** *n.; pl.* LIS'TEN-ERS—IN'.

listening post. *Mil.* A sheltered position in advance of the first-line trenches, in which is stationed at night a small detail of soldiers to listen for any sound of enemy activity.

‖ **li'tas** (lē'tas), *n. sing. & pl.*; Angl. **lit** (lĭt), *pl.* LITS. The gold monetary unit of Lithuania, equivalent at par to $0.10, U. S. currency. It equals 100 Lithuanian cents.

Lit'tle En'tente' (ăN'tăNt'). An alliance between Czechoslovakia, Yugoslavia, and Roumania, based on a series of dual understandings and treaties, the first being a convention between Czechoslovakia and Yugoslavia, signed Sept. 14, 1920. Roumania later (Apr. 23, 1921) joined in a treaty with the other two. The alliance is not merely defensive, but is also a union to facilitate and maintain normal economic conditions. Poland and Austria, although not officially members of the Little Entente, have understandings with it, and it has had the strong support of France. Also, the states included in the alliance.

little leaf. *Hort.* A disease of grapes in California, characterized by reduced size of leaves and loss of vigor of vines.

little theater *or* **theatre.** A small theater, often seating fewer than 100 persons; esp. a small theater in which a company of actors, usually amateur, produce serious or experimental dramas.

litz (lĭts), *n.* [G. *litzendraht*, braided wire.] *Radio.* A kind of wire composed of fine copper strands, each enameled, braided together.

load draft. = LOAD DISPLACEMENT, in the *Dictionary*.

load factor.* *Aeronautics.* The ratio of the force required to break any part of an airplane to the force which this part experiences when in normal horizontal rectilinear flight.

load'ing*, *vb. n.* **a** *Aeronautics.* = WING LOADING, below. **b** *Radio.* The changing of the resonance frequency or wave length of a radio communication set, as by introducing a loading coil or coils. As the inductance is increased, the wave length is increased; conversely, a condenser introduced in the circuit shortens the wave length.

loading coil. a *Radio.* An inductance coil used in a circuit to lower the resonance frequency (increase wave length). **b** A Pupin coil. See PUPIN SYSTEM, in the *Dictionary*.

loading inductance. *Radio.* Inductance of a loading coil

lobe*, *n. Aëronautics.* **a** One of the inflated bags at the stern of a kite balloon, designed to give it directional stability and acting either as a fin or a stabilizer. **b** One of the sections into which the envelope of a balloon is sometimes divided by the tension of the internal rigging.

lob'stick' (lŏb'stĭk'), *n.* A tree having the lower branches trimmed out so that it may serve as a landmark, memorial, or the like. *Canada.*

Locarno Pact *or* **Treaty.** A series of five treaties and arbitration conventions between Germany and Belgium, France, Great Britain, Italy, Poland, and Czechoslovakia, negotiated at Locarno, Switzerland, in October, 1925. The main treaty guarantees the inviolability of the Franco-German and German-Belgian boundaries, the territorial *status quo*, and the maintenance of the demilitarized zone on the Rhine according to the Treaty of Versailles, Great Britain and Italy being guarantors. In supplementary treaties Germany on the one hand, and France, Belgium, Poland, and Czechoslovakia on the other, undertake not to make war with one another save under narrowly restricted conditions, but to submit all disputes to judicial decision or to a permanent conciliation commission.

L. O. M. *Abbr.* Loyal Order of Moose.

‖ **lon'gé'ron'** (lôN'zhā'rôN'), *n.* [F.] *Aëronautics.* A fore-and-aft member of the framing of an airplane fuselage or nacelle, usually continuous across a number of points of support.

lon'gi-tu'di-nal*, *n. Aëronautics.* A longéron.

loop*, *n. Aviation.* An aërial maneuver in which the airplane describes an approximately circular path in the plane of the longitudinal and normal axes, the lateral axis remaining horizontal and the upper side of the airplane remaining on the inside of the circle.

loop*, *n. Radio.* = LOOP ANTENNA, below. *Cant.*

loop*, *v. t.* — **to loop the loop***, to perform a loop in an airplane.

loop antenna. *Radio.* A coil antenna consisting of a single turn.

loose'—coup'ler, *n. Radio.* A form of inductive coupler consisting of a larger tube on which are wound many turns of wire (the primary) and a smaller tube, also wound with wire, which slides in and out of the larger. *Obsolescent.*

loose coupling. *Elec.* Coupling such that currents flowing in the two circuits have little effect on each other, the coupling coefficient being nearly zero.

lop'stick' (lŏp'stĭk'), *n.* Same as LOBSTICK, above.

loss*, *n. Elec.* **a** The power factor or power diminution of a circuit element, corresponding to conversion of electric power into heat by some form of resistance. **b** = ATTENUATION, above.

loud'—speak'er, *n. Radio.* A form of telephone receiver for producing sounds loud enough to be readily heard without holding it close to the ear. The two chief types are the horn speaker and the cone speaker.

lou'ver* (lōō'vĕr), *n. Automobiles.* Any of a row of elongated, more or less vertical, vents in the side of a hood, facilitating the escape of heated air from within.

low'brow' (lō'brou'), *n.* One having a low brow, or forehead; hence, one who is not intellectual or who is not interested in intellectual pursuits; — opp. to *highbrow*. — **low'brow', low'browed'***, *a. All Slang.*

low'—loss', *a. Radio.* Having low resistance and power loss; as, a *low-loss* condenser.

low'—pass' fil'ter. *Radio.* See FILTER, above.

Loyal Order of Moose. See MOOSE, 2, below.

lub'ber's point (lŭb'ĕrz). = LUBBER'S LINE, in the *Dict.*

lu'e-tin (lū'ē-tĭn), *n.* [See LUETIC.] *Med.* A sterile emulsion of a killed culture of *Treponema pallidum*, the microorganism of syphilis. It is used in the Noguchi cutaneous test (which see, below).

lu'mi-nal (lū'mĭ-năl), *n. Pharm.* = PHENOBARBITAL, below, bearing the trade-mark *Luminal*.

lu'mi-nism (lū'mĭ-nĭz'm), *n.* *Painting.* The theory and practice of the luminists or plein-airists. See LUMINIST and IMPRESSIONISM, in the *Dict.*

lung'mo'tor (lŭng'mō'tẽr), *n.* A pulmotor.

Lu'si-ta'ni-a (lū'sĭ-tā'nĭ-ȧ), *n.* **a** Latin name of an ancient country in the western part of Hispania, coinciding with part of modern Portugal; sometimes used for Portugal. **b** A British passenger steamer sunk by a German submarine off the Irish coast, May 7, 1915, with a loss of 1,153 persons, including 114 Americans.

ly-ce'um* (lī-sē'ŭm), *n.* The field of educational and inspirational lectures, concerts, entertainments, etc., which are generally given at intervals in a *lyceum course.*

Ly'man re'gion (lī'mȧn). *Physics.* That portion of the ultra-violet spectrum which lies approximately between .1200 μ and the extreme boundary as at present known (0900 μ); — so called after Theodore Lyman (1874–), American physicist, who first studied this region.

Ly'on bean (lī'ŏn). A Philippine leguminous forage plant (*Stizolobium niveum*), related to the velvet bean.

ly'o-phile (lī'ō-fīl; -fĭl), *a.* Also **ly'o-phil** (-fĭl), **ly'o-phil'ic** (-fĭl'ĭk). [Gr. λύειν to loose + φίλος loving.] *Chem.* Denoting strong affinity between a colloid and the liquid in which it is dispersed.

ly'o-phobe (lī'ō-fōb), *a.* Also **ly'o-pho'bic** (-fō'bĭk; -fŏb'-ĭk). [Gr. λύειν to loose + φόβος fear.] *Chem.* Denoting lack of strong affinity between a colloid and the liquid in which it is dispersed.

lyx'ose (lĭk'sōs), *n.* [Anagram of *xylose.*] *Org. Chem.* An artificially obtained sugar, $C_5H_{10}O_5$, closely related to xylose.

ma'co (mä'kō), *n.* Also, esp formerly, **ma'ko** (mä'kō), **ma'ho** (ma'hō). [After *Maho* or *Mako* Bey, a Turkish officer in whose garden at Cairo, Egypt, the plant was discovered about 1820.] A kind of tree cotton (prob. *Gossypium vitifolium*) cultivated in Egypt from 1820, which by hybridization with sea-island cotton (*G. barbadense*) and perhaps with other forms gave rise to the varieties included under the term *Egyptian cotton.* Now, specif., a kind of fine long-staple cotton, used esp. in the manufacture of hosiery and underwear. Cf. COTTON, *n*, 2, in *Dict.*

Ma-con'o-chie ra'tion (mȧ-kŏn'ō-kĭ). [After *Maconochie* Brothers (Ltd.), dealers in preserved provisions, London.] *Mil.* A substitute ration for use in emergency. *Cant.*

mac'ro-graph (măk'rō-grȧf), *n.* [*macro-* + *-graph.*] A picture of an object as seen by the naked eye (that is, unmagnified); as, a *macrograph* of a metallic fracture.

ma-crog'ra-phy* (mȧ-krŏg'rȧ-fĭ), *n.* Examination or study with the naked eye, as distinguished from *micrography.*

mac'ro-phys'ics (măk'rō-fĭz'ĭks), *n.* [*macro-* + *physics.*] That part of physics which deals with the larger aggregations of matter, that is, with bodies large enough to be directly and individually observed and measured.

Ma'gle-mo'si-an (mȧ'glȧ-mō'zĭ-ȧn), *a.* *Ethnol* Of, belonging to, or pertaining to, a phase of the paleolithic culture of Europe represented by remains of bone and stone implements found in the basin of an ancient lake at Maglemose, near Mullerup, on west coast of Zealand, Denmark.

magnetic amplifier. *Radio.* An amplifier which amplifies by virtue of the magnetic properties of iron. It is used for modulation in transmitting sets.

magnetic detector. See DETECTOR, above.

magnetite arc. *Elec.* A flaming arc in which the light-giving vapors, chiefly of titanium and iron, are derived from volatilization of a terminal made of magnetite.

mag'net-o-chem'is-try (măg'nĕt-ō-kĕm'ĭs-trĭ; măg-nē'tō-), *n.* [*magneto-* + *chemistry.*] That branch of science which deals with the relation of magnetism to chemical phenomena. — **mag'net-o-chem'i-cal** (-kĕm'ĭ-kȧl), *a.*

mag'ne-ton (măg'nē-tŏn), *n.* [NL. See MAGNETIC.] *Physics.* A postulated unit of magnetic moment of the molecules of ferromagnetic substances, having the value of 18.54×10^{-22} C. G. S. electromagnetic units.

mah' jong' (mȧ'jŏng'), *or* **mah'-jongg'**, *n.* [Chinese, sparrow.] A complicated Chinese game, said to be of ancient origin, played, usually, by four persons with 136 "tiles," similar to dominoes. By drawing and discarding the tiles, each player endeavors to secure four complete combinations, or sets, of three tiles each, together with one pair.

Main Street. **a** In many American cities and towns, the name of the most important street. **b** The title of a novel (1920) by Sinclair Lewis portraying materialistic provincialism as a characteristic of American life in a small town. **c** Hence, any place or class characterized by materialistic provincialism or Philistinism.

main supporting surface. *Aëronautics.* A pair of wings extending on the same level from tip to tip of an airplane. Thus, a biplane has two, and a triplane three, main supporting surfaces. The main supporting surfaces include the ailerons but no other surfaces intended primarily for control or for stabilizing purposes.

ma'jor (mā'jẽr), *v. i.* In a college, school, or the like, to take a certain subject as one's chief object of study; to specialize in a particular subject; — used with *in;* as, to *major* in mathematics. *Cant.*

makh'zan (măk'zȧn), *or* **makh'zen** (-zĕn), *n.* Also **magh'zen.** [Ar. *makhzan.* See MAGAZINE.] **a** The native Moroccan government; also, the sultan and certain of his viziers, forming the administrative body. **b** Collectively, certain privileged tribes from whose ranks the Moroccan state officials are recruited.

mam'ba (mȧm'bȧ), *n.* [Kafir *im mamba* large snake.] *Zoöl.* A highly venomous cobra of South Africa (*Dendraspis angusticeps*), attaining ten feet in length, dangerous from its quickness and its habit of attacking.

man'bar-klak' (măn'bar-klăk'), *n.* [Native name in Dutch Guiana.] *Bot.* A large timber tree (*Eschweilera corrugata*) of Dutch Guiana, included by some botanists in *Lecythis.* The wood is hard, strong, and very heavy. On account of its resistance to shipworms it is valuable for maritime construction.

man'date*, *n.* An order or commission, granted by the League of Nations as mandator to a member nation as its mandatary, for the establishment of a responsible government over former German colonies, or other conquered territory inhabited by backward races, and for the reasonable economic development thereof.

man'date* (măn'dāt), *v. t.*; MAN'DAT-ED (-dāt-ĕd); -DAT-ING. To assign under a mandate, as of the **League of Nations**; as, Irak is a *mandated* territory in Asia.

ma-neu'ver-a-ble, ma-nœu'vre-a-ble (mȧ-nōō'vẽr-ȧ-b'l; mȧ-nū'-), *a.* Capable of being maneuvered. — **ma-neu'ver-a-bil'i-ty, ma-nœu'vre-a-bil'i-ty** (-bĭl'ĭ-tĭ), *n.*

Man'gum ter'race (măn'gŭm). A low rounded retaining bank of earth, as in the hilly or sloping fields of Georgia. It prevents soil washing by making the drainage gradual and does not interfere with cultivation.

man'ic—de-pres'sive psy-cho'sis. [Gr. μανικός insane.] *Med.* A psychosis of widely varying manifestation, but distinguished either by affective excitement or depression, or by a mixture or alternation of these.

man'i-kin-ism (măn'ĭ-kĭn-ĭz'm), *n.* Also **man'ni-kin-ism.** Action or conduct characteristic of, or suggestive of, a manikin; petty act or action. *John Galsworthy.*

Mann Act (măn). White-slave-traffic Act (see below).

Mann'—El'kins Act. [After James R. *Mann,* representative from Illinois, and Stephen B. *Elkins,* senator from West Virginia.] An act, passed June 18, 1910 (61st Congress), bringing telephone, telegraph, and cable companies under the control of the Interstate Commerce Commission, providing for a new Commerce Court, prohibiting greater charges for a short than for a long haul on railroads, and permitting the commission to suspend increases in rates pending investigation. Cf. HEPBURN ACT, above.

manure salts. *Agric.* An impure muriate of potash, containing from 20 to 40 per cent of potash. — **double manure salts,** a double sulphate of potash and magnesia, generally containing from 48 to 50 per cent of sulphate of potash and from 32 to 36 per cent of sulphate of magnesia.

‖ **man'za-nil'la** (man'tha-nēl'yä; *E.* măn'zȧ-nĭl'ȧ), *n.* [Sp.] *Olive Trade.* A kind of small roundish olive with a small freestone pit, fine skin, and bitterish flavor. Manzanillas are commonly pitted and stuffed with pimientos.

Mar'cel' (mär'sĕl'), *n.* [After Marcel (1852–), French hairdresser.] *Hairdressing.* A Marcel wave. — *v. t.*; -CELLED' (-sĕld'); -CEL'LING. To dress (the hair) with a Marcel wave.

marginal points. = ANAPLASMA, above.

ma-rim'ba*, *n.* *Music.* A refined and improved form of the native marimba (see in *Dict.*), having two rows of wooden bars with metal resonators below them, first designed and manufactured by J. C. Deagan, American musician and manufacturer. It is played similarly to the xylophone, but with less rapid execution because of its sustained tones. The *steel marimba* has bars of steel.

‖ **mar'mite'** (mär'mĕt'), *n.* [F.] A pot; kettle; also, *Slang,* an explosive shell. Cf. BLACK MARIA, above.

mar'qui-sette' (mär'kē-zĕt'), *n.* [Dim. of F. *marquise* awning, marquise.] A sheer, somewhat lustrous cotton fabric, often dotted, of firm texture, woven from a twisted mercerized thread of two strands; also, a sheer light silk fabric used chiefly for overdresses.

mask*, *n.* A face covering which constitutes or forms part of a respirator for protecting against poisonous or irritating atmospheres; also, the respirator as a whole; — called specifically *gas mask.* The modern gas mask, while originally designed for use in war, is also of value in mines, factories, gun turrets, etc., and for use by firemen in buildings filled with noxious gases.

Mas'sa-chu'setts bal'lot (mȧs'ȧ-chōō'sĕts). A form of the Australian ballot, first used in Massachusetts in 1888, upon which the names of all candidates for each office are arranged alphabetically with the name of the party following that of the nominee

master oscillator. *Radio.* A low-power generator of alternating current, usually an electron-tube apparatus, the output of which is fed into an amplifier.

master vibrator. *Mach.* In some internal-combustion engines an induction coil and vibrator (trembler) placed in the circuit between the battery or magneto and the coils for the different cylinders, which are used without vibrators of their own.

mast'head'*, *n.* The matter printed in every issue of a newspaper or journal, stating, usually, the title, ownership, and management, subscription and, often, advertising rates, and sometimes a motto; — so called because printed at the top of a column, usually the first on the editorial page.

match bullet. A bullet for use in a match, or competition; specif., in the United States army, a bullet, weighing 180 grains, used in competitions because less subject to deviation than the regular service bullet weighing 150 grains.

match'mark' (măch'märk'), *n.* *Mach.* A mark placed on the adjacent separable parts of any device to aid in the proper reassembling of any of those parts.

match'mark', *v. t.* To place a matchmark on.

ma'tri-lin'e-al (mā'trĭ-lĭn'ē-ȧl; măt'rĭ-), *a.* [L. *mater, matris,* mother + E. *lineal.*] Relating to descent through the female line, that is, through the mother and maternal ancestors; — contrasted with *patrilineal.*

mat'ro-cli'nous (măt'rō-klī'nŭs; măt'rō-klĭ'nŭs), *a.* [L. *mater,* or Doric Gr. μάτηρ, mother + κλίνειν to lean, incline.] *Biol.* Designating or having certain characters inherited from the mother. — **mat'ro-cli'ny** (măt'rō-klī'nĭ), *n.*

mat-zoon' (mät-sōōn'), *n.* [Armen. *matsoun* curd, fr *mats* dense.] A kind of fermented milk used as a food drink or beverage in Armenia, Turkey, etc., and in America as a medicinal food drink in cases of digestive disorder.

Mau-ri'tius bean (mô-rĭsh'ĭ-ŭs; -rĭsh'ŭs). [From MAURITIUS, island in Indian Ocean.] The Bengal bean.

Max'i-mal-ist (măk'sĭ-mȧl-ĭst), *n.* [*maximal* + *-ist.*] A member of the extreme radical group of the former Russian Social Revolutionary party. Cf. MINIMALIST.

To translate Bolshevik *"Maximalist,"* as was the practice of most newspaper correspondents in Russia in 1917, is to confound this group with a small extreme-Left group of the Social Revolutionary party. *E. A. Ross.*

‖ **ma-xi'xe** (mȧ-shē'shȧ; măk'sēks'), *n.* [Pg.] A round dance resembling the two-step in action, rhythm, etc., but characterized by a variety of steps and figures.

ma-zoot', ma-zut', ma-zute' (mȧ-zōōt'), *n.* Vars. of MAZOUT, in the *Dictionary.*

mean spherical candle power. *Illumination.* A measure of average candle power in all directions of space, numerically equal to the total light flux divided by 4π.

Mediterranean fruit fly. A two-winged fly (*Ceratitis capitata*) with black and white markings, a native of the Mediterranean countries, but now widely distributed. Its larva lives in ripening oranges, peaches, and other fruits, causing them to decay and fall.

meg'a-bar (mĕg'ȧ-bär), *n.* [*mega-* + Gr. βάρος weight.] A unit of atmospheric pressure; one megadyne per square centimeter; — now generally called *bar.* See BAR, above.

meg'ger (mĕg'ẽr), *n.* *Elec.* An instrument, bearing the trade-mark *Megger,* resembling an ohmmeter but containing a generator, used for approximate estimates, as of insulation resistances; — so called because it indicates megohms.

‖ **me-ha'ri** (mĕ-hä'rē), *n.*; *pl.* -RIS (-rēz). [Ar. *mahāri,* fr. *Mahra,* a tribe and region in southern Arabia.] A kind of swift camel. It is used in the French army in Algeria.

me-ha'rist (-rĭst), *n.* One mounted on a mehari.

mei'o-bar (mī'ō-bär), *n.* [Gr. μείων less + βάρος weight.] *Meteorol.* **a** A region of low barometric pressure. **b** An isobar of low pressure.

mei-o'sis* (mī-ō'sĭs), *n.* *Biol.* = REDUCTION, 2 **b**, in *Dict.*

mel'a-nose* (mĕl'ȧ-nōs), *n.* *Agric.* A disease of citrus trees and fruits, due to attacks of *Phomopsis citri,* characterized by minute brown or black spots on leaves, stems, and fruits. The same fungus also causes the stem-end rot.

Mélisande. See PELLÉAS ET MÉLISANDE, below.

Menorah (mĕ-nō'rȧ), *n.* [Heb.] The holy candelabrum (*Exodus* xxxvii. 17–24) of the Jewish temple, with seven candlesticks taken to symbolize the seven days of creation, seven continents, and seven planets.

Men'she-vik' *or, often,* **men'she-vik'** (mĕn'shĕ-vĕk'), *n.*; *pl.* MENSHEVIKI, MEN- (mĕn'shĕ-vē-kē'; *commonly, in English,* -vĕ'kĕ), -SHEVIKS (-vĕks'). [Russ., lit., the littler; — so called because orig. the minority group of the party.] In Russian politics, a member or adherent of the less radical wing of the Social Democratic party (which see, below). Since 1921 they have ceased to be active in Russia. Cf. BOLSHEVIK, above.

Men'she-vism *or, often,* **men'-** (mĕn'shĕ-vĭz'm), *n.* Doctrines, tactics, or practices of, or like those of, the Menshevik. — **Men'she-vist** *or, often,* **men'-** (-vĭst), *a.*

mental age. The age at which the average, or normal, person can pass one of a series of graded intelligence tests (which see, above) of the Binet-Simon or Stanford-Binet type. A child whose chronological age is eight, but who can pass the same test as the average 10-year old, is said to have a mental age of ten. Since the average, or normal, person shows no increase of intelligence after the age of 14 (or, according to some, 16), and since the mental age is computed by equation with the average chronological age, it is not possible to express mental ages above 14 (16), although many individuals, of course, possess higher levels of intelligence. Cf. BINET AGE, above.

men-tim'e-ter (mĕn-tĭm'ĕ-tẽr), *n.* [L. *mens, mentis,* mind + *-meter.*] A method of measuring mental capacities, esp. a series of intelligence tests for such a purpose devised by psychologists and used in the Army, and in industry, education, etc. Cf. ALPHA TEST and BETA TEST, above.

mer'cu-rate (mûr'kū-rāt), *v. t.* [*mercury* + *-ate.*] *Org. Chem.* To introduce mercury into; to mercurize. — **mer'cu-ra'tion** (-rā'shŭn), *n.*

mer'cu-ride (-rĭd; -rĭd), *n.* Also **mer'cu-rid** (-rĭd). [*mercury* + *-ide.*] *Chem.* A binary compound of mercury with another element.

mer'cu-rize (mûr'kū-rīz), *v. t.*; -RIZED (-rīzd); -RIZ'ING (-rīz'ĭng). *Chem.* To combine or treat with mercury.

mercury arc. *Elec.* An electric discharge through mercury vapor, in a vacuum tube, emitting a blue-green light rich in actinic and ultra-violet rays. The mercury arc is variously used, as for water sterilization, in photography, and for the rectification of alternating currents.

Mer'ker grass (mûr'kẽr). *Agric.* A tall, perennial green forage grass (*Pennisetum merkeri*), closely resembling Napier grass, but of more slender growth, native to Africa, but now widely grown in warm countries.

mes'o-bar (mĕs'ō-bar), *n.* [*meso-* + Gr. βάρος weight.] *Meteorol.* **a** A region of normal, or approximately normal, barometric pressure. **b** An isobar of normal pressure.

mes'o-tho'ri-um (mĕs'ō-thō'rĭ-ŭm), *n.* [NL.; *meso-* + *thorium.*] *Chem.* See THORIUM, in *Dict.*

mess'tin' (mĕs'tĭn'), *n.* *Mil.* An oval-shaped metal vessel having a bail which is hinged to its sides and which serves both as a handle and to hold down the cover of the vessel. Each soldier carries his own messtin, which is part of his mess equipment and in which his food is served to him.

met'a-cryst (mĕt'ȧ-krĭst), *n.* [*meta-* + *-cryst,* fr. Gr. κρύσταλλος crystal.] *Geol.* A pseudophenocryst of a secondary mineral in metamorphic rock.

met'a-sta-bil'i-ty (mĕt'ȧ-stȧ-bĭl'ĭ-tĭ), *n.* *Phys. Chem.* Metastable condition or phase.

methyl cyanide. Acetic nitrile. See NITRILE, in the *Dict.*

mi-car'ta (mĭ-kär'tȧ), *n.* See BAKELITE MICARTA, above.

mi'cro-cen'trum (mī'krō-sĕn'trŭm), *n.*; *pl.* E. -TRUMS (-trŭmz); L. -TRA (-trȧ). [NL.; *micro-* + *centrum.*] *Biol.* A group of centrioles forming the center of the aster of dividing cells.

mi'cro-cin'e-mat'o-graph (mī'krō-sĭn'ē-măt'ō-grȧf), *n.* [*micro-* + *cinematograph.*] **a** A cinematograph for taking moving pictures of microscopic objects, or one for projecting such pictures. **b** A moving-picture film on which the movements of microscopic objects have been recorded. — **mi'cro-cin'e-ma-tog'ra-phy** (-mȧ-tŏg'rȧ-fĭ), *n.* — **mi'cro-cin'e-mat'o-graph'ic** (-măt'ō-grăf'ĭk), *a.*

mi'cro-graph*, *n.* *Physics.* An instrument for measuring minute movements by the magnified record of the movements of a diaphragm.

mi-crog'ra-phy* (mī-krŏg'rȧ-fĭ), *n.* Examination or study with the microscope, as of an etched surface of metal.

mi'cro-mi'cro-far'ad (mī'krō-mī'krō-făr'ăd), *n.* [*micro-* + *microfarad.*] *Elec.* A millionth of a millionth of a farad; — used chiefly in radio.

mi'cro-mi'cron (-mī'krŏn; -mĭk'rŏn), *n.* [*micro-* + *micron.*] One millionth of a micron, or 10^{-12} meter. Its symbol is $\mu\mu$.

mi'cro-mo'tion (mī'krō-mō'shŭn), *a.* Designating, or pertaining to, the study of small or microscopic motions or movements, as the movements made in doing some kinds of work, the motion of the blood in circulation, etc.; specif., the study and recording of such minute forms of motion by means of moving pictures.

mi'cro-phone*, *n.* *Radio.* The microphone as developed for use in radio broadcasting to receive and transmit sound at the sending station. See MICROPHONE, in the *Dict.*

mi'cro-phys'ics (mī'krō-fĭz'ĭks), *n.* [*micro-* + *physics.*] The science of the ultimate structure of matter, that is, of bodies such as molecules, atoms, and electrons, which are too small for direct observation.

mi'cro-py-rom'e-ter (-pī-rŏm'ē-tĕr), *n.* [*micro-* + *pyrometer.*] *Physics.* An instrument for the optical determination of the temperature or emissivity of microscopic glowing bodies. It has a minute glow lamp mounted in the eyepiece of a microscope so that the image of the filament is superimposed upon that of the observed glowing surface.

Mi'cro-spo-rid'i-a (mī'krō-spō-rĭd'ĭ-ȧ), *n. pl.* [*micro-* + *sporidium.*] *Zoöl.* An order of Protozoa, of the subphylum Sporozoa, whose members are typically parasites of invertebrates and usually of Crustacea and other arthropods.

Middle East. The countries of southwestern Asia lying between Asia Minor and Afghanistan: Armenia, Georgia, Azerbaijan, Kurdistan, Syria, Palestine, Hejaz, Arabia, Irak, and Persia. The term *Near East* is also commonly used, esp. in the United States, to include this region, but is by some restricted to Turkey in Asia (Asia Minor), Turkey in Europe, and the Balkan States. Loosely, *Middle East* is also used to include India, Burma, and the Malay Peninsula, that is, all the countries between the Near East and the Far East.

middy blouse. A loose blouse with sailor collar, worn by women and children; — often called simply *middy.*

Mid'—Eu'rope, *n.* = MITTELEUROPA, below.

‖ **mi'di'nette'** (mē'dē'nĕt'), *n.* [F., fr. *midi* noon.] A Parisian shopgirl; — so called because these girls come out of the shops in great numbers at noon; hence, sometimes, a girl of the same class elsewhere. *Colloq.*

mile'age*, *n. Railroad Accounting.* That part of a freight rate which is intended to cover movement expenses and is usually made proportionate to the distance. Cf. TERMINAL, *n.*, 3 **c**, in the *Dictionary.*

military heel. *Shoes.* A straight heel like the Cuban heel, but not so high

mill'age (mĭl'ĕj), *n.* A rate (as of taxation) expressed in mills per dollar.

mil'let*, *n.* See PROSO, below.

mil'li-amp' (mĭl'ĭ-ămp'), *n.* Short for milliampere. *Cant.*

mil'li-bar' (mĭl'ĭ-bar'), *n.* [*milli-* + Gr. *βάρος* weight.] *Physics.* The thousandth part of a bar. Cf. BAR, above.

mil'li-cu'rie' (-ku'rē'), *n.* [*milli-* + *curie.*] A unit of radium emanation equal to one thousandth of a curie.

mil'li-lam'bert (mĭl'ĭ-lăm'bĕrt), *n.* [*milli-* + *lambert.*] *Photometry.* A practical unit of brightness equal to one thousandth of the C. G. S. unit. See LAMBERT, above.

mil'line' (mĭl'līn'), *n.* [*million* + *line.*] A unit of space and circulation sometimes used in calculating advertising rates. It is one agate line, a column wide (about 2½ inches), appearing in one million copies of a publication.

mil'lionth*, *a.* Constructed or drawn on a scale of one millionth of the natural size; as, a *millionth* map or globe.

mil'li-phot' (mĭl'ĭ-fŏt'; -fōt'), *n.* [*milli-* + *phot.*] *Physics.* See PHOT, below.

mi'lo (mī'lō), *n. Agric.* A yellow-seeded grain sorghum of the durra group, probably of African origin, grown in the United States and elsewhere as a dry-land crop; — called also *milo maize.*

mim'o-dra'ma (mĭm'ō-drä'mȧ; mĭm'ō-drä'mȧ), *n.* [NL.; Gr. *μιμεῖσθαι* imitate + *drama.*] Drama in pantomime, with an accompaniment of music and dancing, sometimes with the satiric character of the ancient mime.

mine layer. *Naval.* A vessel especially equipped for or engaged in the laying of underwater mines.

‖ **Mi'nen-wer'fer** (mē'nĕn-vĕr'fĕr), *n.* [G., lit., mine thrower.] *Mil.* **a** A German muzzle-loading rifled trench gun, of three types, light, medium, and heavy, with calibers respectively of 2.9, 6.7, and 9.8 inches, and maximum ranges of about 1420, 1250, and 1000 yards. They combined the properties of high-angled and flat-trajectoried fire, and were designed esp. to accompany infantry in the advance, for use in destroying machine-gun strong points. The Minenwerfer was mounted on wheels and was provided with oil-filled recoil cylinders. **b** Loosely, any mine thrower.

min'er-al-ize*, *v. t.* To charge or impregnate with ore.

mine thrower. *Mil.* **a** A Minenwerfer (which see, above). **b** Any of the numerous small trench mortars which accompanied the front-line infantry during the World War (1914–1918); also, any device used to throw projectiles containing a high explosive to a distance of from 400 to 600 yards, by a catapultic device, gunpowder, or other means.

Min'i-mal-ist (mĭn'ĭ-mȧl-ĭst), *n.* [*minimal* + *-ist.*] *Russian Politics.* A member of the less radical wing of the former Social Revolutionary party; — opposed to *Maximalist* (which see, above).

min'nie (mĭn'ĭ), *n.* A Minenwerfer; also, a shell thrown by a Minenwerfer. *Slang.*

‖ **min'yan** (mĭn'yȧn), *n.* [Heb., lit., count.] *Jewish Relig.* A quorum, or number necessary, for conducting public worship, consisting, by the rules of Mishna, of not less than ten males above the age of thirteen.

mir'ror-scope (mĭr'ẽr-skōp), *n.* [*mirror* + *-scope.*] See PROJECTOR, below.

misch metal (mĭsh). [G. *misch-* (*mischen* to mix) + E. *metal.*] *Metal.* A crude mixture of the rare-earth metals cerium, lanthanum, didymium, etc., with or without iron, resulting from the reduction of compounds formed in the thorium industry.

mit'o-chon'dri-a (mīt'ō-kŏn'drĭ-ȧ), *n. pl.; sing.* MITOCHONDRIUM (-ŭm). [NL., fr. Gr. *μίτος* thread + *χόνδρος* grits, cartilage.] *Biol.* Minute bodies in the cytoplasm of many cells, supposed by some to transmit hereditary characters or to function in differentiating the various tissues; — called also *chondriosomes* and *plastosomes.* In plant cells mitochondria are associated with the formation of starch and chloroplasts. — **mit'o-chon'dri-al** (-ăl), *a.*

Mit'tel-eu-ro'pa (mĭt'ĕl-oi-rō'pȧ), *n.* [G. Central Europe.] That portion of Central Europe which the advocates of Pan-Germanism purposed to form into one great empire. It comprised all of Germany, Austria-Hungary, Belgium, the Balkan States, and Turkey, with a strip of northern France and all of western Russia, and involved virtual control over Denmark, Netherlands, Switzerland, and Greece.

mne'me (nē'mē), *n.* [NL., fr. Gr. *μνήμη* memory.] The total potential engram store of an organism, as conceived and described by Richard Semon (1859–1918), German scientist, as the basis for the study and explanation of the memory. — **mne'mic** (nē'mĭk; nĕm'ĭk), **mne-mon'ic*** (nē-mŏn'ĭk), *a.*

mode*, *n. Statistics.* That value in a series of like observations or items that occurs most frequently. It corresponds to the maximum ordinate of a frequency curve.

model school. A graded school, usually connected with a normal school, or teachers' training college, serving as a model in organization and methods of teaching.

mod'ern-ism*, *n.* [*often cap.*] A movement in Episcopalian and Protestant churches, emphasizing the spiritual and ethical side of Christianity, and tending to disregard dogmas and creeds. Cf. FUNDAMENTALISM, above. — **mod'ern-ist*,** *n.*

mod'u-late*, *v. t. Elec.* To change the frequency of (as electrical oscillations or waves) by imposing upon them others of another, usually a lower, frequency.

mod'u-late*, *v. i. Radio.* To produce modulation.

mod'u-la'tion*, *n. Radio.* Alteration of the amplitude or frequency of a wave in accordance with speech or some other signal. The result of *modulation* is that the wave carries the speech or signal.

Mo'hawk*, *n.* In figure skating, a figure consisting of a combination of a stroke forward on either edge of either skate, followed by a stroke backward on the corresponding edge of the skate on the opposite foot.

mo'lal (mō'lăl), *a. Chem.* = 1st MOLAR, *a.*, 2, in the *Dict.*

molasses grass. *Agric.* A perennial pasture grass (*Melinis minutiflora*), native to tropical Africa, cultivated in Brazil, Australia, West Indies, southern Florida, Texas, and elsewhere. The plant is covered with hairs which secrete a sweet substance with the odor of molasses.

mon'i-ker (mŏn'ĭ-kẽr), *n.* [The same as *monica.*] A name; a nickname; — spelt also *monaker, moneker, monicker, monniker, monarcher,* etc. *Slang.*

mon'i-tor (mŏn'ĭ-tẽr), *v. i. Radio.* To listen to signals by means of receiving apparatus, as a check on the operation of transmitting equipment.

mon'o-chro'ma-tor (mŏn'ō-krō'mȧ-tẽr), *n.* [*mono-* + *chromat-* + *-or.*] *Physics.* A modification of a spectroscope designed to isolate for use a narrow portion of the spectrum, the eyepiece of the spectroscope being replaced by a narrow slit parallel to the original slit of the instrument

‖ **mo'no'coque'** (mō'nō'kōk'), *n.* [F., lit., single shell.] *Aëronautics.* A type of fuselage constructed by wrapping strips of veneer around formers, in which the veneer is primarily depended on to carry stresses arising in the fuselage; also, an airplane having such a fuselage.

mon'o-cy-an'o-gen (mŏn'ō-sī-ăn'ō-jĕn), *n.* = CYANOGEN, **a**, in the *Dictionary.*

Mon'tes-so'ri meth'od (mŏn'tĕs-sō'rē). *Pedagogy.* A system of training and instruction for children aged from three to six years, devised by Dr. Maria Montessori (1870–), of Rome, Italy. Leading features are free physical activity, informal and individual instruction, the early development of writing, and an extended sensory and motor training. — **Mon'tes-so'ri-an** (-ȧn), *a.* — **Mon'tes-so'ri-an-ism** (-ĭz'm), *n.*

mon'u-ment*, *n.* Any natural feature, as a mountain, cañon, natural bridge, etc., together with the land about it, which has been reserved by a government as public property. See NATIONAL MONUMENT, below.

moonlight school. An evening school conducted in a country school district to teach adult illiterates to read and write; — a term originating in Kentucky, where such schools were first opened during the lighter quarters of the moon, when the mountaineers could see their way to and from the schools. *U. S. Bureau of Education.*

mooring band. One of the bands of tape over the top of a balloon, to which are attached the mooring ropes.

mooring harness. The system of bands of tape over the top of a balloon, to which are attached the mooring ropes.

mooring mast. *Aëronautics.* A tall vertical column, properly supported by wire stays, to the upper end of which an airship may be moored. The mooring mast is generally provided with steps, a platform at the top, lights, etc.

Moose* (mōōs), *n.* **1.** [*often l. c.*] A member of the Progressive party (which see, below); a Bull Moose. *Cant.* **2.** A member of a secret fraternal and beneficiary society (**Loyal Order of Moose**), founded in 1888 at Louisville, Ky., and now having many lodges throughout the United States, and a home and school at Mooseheart, Ill.

mop*, *v. t.* — **to mop up,** *Mil.*, to clean up, or complete the work of destroying such of the enemy as remain alive in a system of hostile trenches which have been swept over by a first attacking line. — **mop'per—up',** *n.*

‖ **mo'res** (mō'rēz), *n. pl.; sing.* MOS (mŏs). [L.] Customs; esp., customs more or less obligatory; customary laws.

mo'ron (mō'rŏn), *n.* [Gr. *μωρός* foolish.] *Psychol.* A person belonging to that group of the feeble-minded whose mental level is that of the normal child of from eight to twelve years of age, inclusive. *Henry H. Goddard.*

‖ **mo-rón'** (mō-rōn'), *n.; pl.* -RONES (-rō'nās). [Sp.] *Olive Trade.* A small, inferior olive with woody pulp and a large pit adherent to the pulp, growing in the mountainous and high-valley districts around the town of Morón, Spain.

mor-ti'cian (mŏr-tĭsh'ăn), *n.* [L. *mors, mortis,* death + *-ician* as in *physician,* etc.] An undertaker who is a member of the National Selected *Morticians. Recent.*

‖ **mos** (mŏs), *n., sing.* of MORES.

mo-sa'ic*, *n., or* **mosaic disease.** *Agric.* A destructive disease, or class of diseases, of tobacco, potatoes, cucurbits, sugar cane, and other plants, characterized by a spotted or mottled appearance of the leaves, portions of which are lighter green than normal. Mosaic diseases are infectious, are transmitted through seeds and cuttings, and are carried from plant to plant by insects. The causal agent is believed to be a virus or an ultramicroscopical organism.

Mother's Day. A day appointed for the honoring of motherhood and the loving remembrance by each person of his mother, to be shown by some act of appreciative regard. The second Sunday in May, or in schools the preceding Friday, was designated by the founder (Anna Jarvis, of Philadelphia) for the day, and a white carnation as the badge.

motion picture. A moving picture.

mo'to-graph* (mō'tō-grăf), *n.* A moving picture; chronophotograph.

mo-tog'ra-phy (mō-tŏg'rȧ-fĭ), *n.* Art or process of making motographs. — **mo'to-graph'ic*** (mō'tō-grăf'ĭk), *a.*

motor bus, *or* **mo'tor—bus',** *n.* An automobile bus.

mo'tor-cade' (mō'tẽr-kād'), *n* [*motor* + cav*alcade*] A procession of motor vehicles, often one proceeding on a trip of some length or duration.

mo'tor-drome' (mō'tẽr-drōm'), *n.* [*motor* + *-drome*] A track or course, usually inclosed and with seats for spectators, for races, tests, etc., of automobile vehicles.

mo'tor-ize (mō'tẽr-īz), *v. t.* [*motor* + *-ize.*] To substitute (motor-driven vehicles) for those which are horse-drawn, or propelled by steam or electricity, as in a fire department, on a railway, or the like. — **mo'tor-i-za'tion** (-ĭ-zā'shŭn; -ī-zā'shŭn), *n.*

motor spirit*. Any volatile liquid used as a fuel in internal-combustion engines; specif., gasoline or petrol.

motor truck, *or* **mo'tor—truck',** *n.* An automobile truck.

mov'ie (mōōv'ĭ), *n.* A moving picture or a moving-picture show; also, in *pl.*, with *the,* moving pictures or moving picture shows as a class. *Slang or Colloq.*

moving picture. A series of pictures, usually photographs taken with a special machine, presented to the eye in very rapid succession, with some or all of the objects in the picture represented in successive positions slightly changed, and producing, because of the persistence of vision, the optical effect of a continuous picture in which the objects move. Cf. CINEMATOGRAPH, in the *Dict.*; FILM and FRAME, above.

mpret (m'prĕt), *n* [Albanian *mbret* king, fr. L. *imperator.* See EMPEROR.] Formerly, the title of the ruler of Albania.

M. S. C. P., *or* **m. s. c. p.** *Abbr. Physics.* Mean spherical candle power.

mud gun. *Metal.* A device for forcibly applying stiff mud or clay, as to the tap hole of a blast furnace for closing it, consisting of two cylinders, a large one for the steam or compressed air by which it is operated, and a smaller one, in front, into which balls of clay are fed Cf. GUN, above.

muf'fler* (mŭf'lẽr), *a. Radio* Pertaining to a device, or a stage of amplification, used with a radiating receiving set, to suppress the radiation.

mul'ti-graph (mŭl'tĭ-grăf), *n.* [*multi-* + *-graph.*] A combined rotary typesetting and printing machine, bearing the trade-mark *Multigraph.*

mul'ti-plane' (-plān'), *n.* [*multi-* + *plane.*] *Aëronautics.* An airplane with three or more main supporting surfaces placed one above another

mul'ti-ple—tuned', *a. Radio.* Grounded through inductors at more than one point; — used of antennas.

mul'ti-plex*, *a. Elec.* Pertaining to or designating a system of transmitting several simultaneous messages on the same carrier wave.

mul'ti-tube' (mŭl'tĭ-tūb'), *a. Radio.* Having two or more electron tubes; as, a *multitube* amplifier.

mul'ti-verse (-vûrs), *n.* [*multi-* + *-verse,* as in *universe.*] The totality of things and forces viewed as constituting an aggregate the parts of which are incoherent and unrelated

mush*, *n. Radio.* A noise, resembling that of frying, heard when a receiving apparatus is tuned to waves from an arc transmitting station. It is due to irregularities in operation of the arc.

mustard gas. An oily liquid used extensively as a shell filling in the World War because of its violent irritant and blistering properties; — so named by the British troops from its odor. Called also *yperite* and, from the German shell marking, *yellow-cross liquid.* Chemically, mustard gas is *dichlorethyl sulphide* ($ClCH_2CH_2)_2S$.

mu'ta-ro-ta'tion (mū'tȧ-rō-tā'shŭn), *n.* [L. *mutare* to change + *rotation.*] *Physics & Chem.* A change in optical rotation shown by certain solutions (as those of dextrose, fructose, lactose) on standing.

mutt (mŭt), *n.* Also **mut. a** An insignificant, commonplace, or stupid person. **b** A mongrel dog; cur. *Both Slang.*

mutual conductance. *Elec.* In an electron tube, the quotient of the charge in plate current by the charge in grid voltage producing it, the plate voltage remaining unchanged.

mutual inductor. *Elec.* A device providing mutual inductance, usually consisting of two inductance coils not connected by conductors.

my'e-lin-at'ed (mī'ē-lĭn-āt'ĕd), *a.* [See MYELIN.] Same as MEDULLATED, in the *Dict.*; as, *myelinated* fibers.

mystery ship. One of a class of vessels built in England during the World War to represent inoffensive and unprotected merchantmen, but in reality having heavy armament concealed behind collapsible sides, bulkheads, or superstructure, which were intended to decoy submarines into close and unguarded surface attacks; — called also *mystery boat, hush boat, Q-ship,* etc.

na-celle'* (nȧ-sĕl'), *n.* [F., fr. L. *naucella, navicella,* dim. of *navis* ship.] The inclosed shelter provided in some types of airships and airplanes for the pilot and passengers, or for a power plant, or for both. A nacelle is usually shorter than a fuselage, and does not carry the tail unit. Cf. FUSELAGE.

nak (năk), *n.* [Perh. Hind. *nāk* nose.] *Bot.* The stigmatic point of the fruit of the mango (*Mangifera indica*).

Na'pi-er grass (nā'pĭ-ẽr). *Agric.* A tall, stout perennial grass (*Pennisetum purpureum*), resembling sugar cane in its habit of growth, first cultivated in Rhodesia, but now widely grown in warm countries; — called also *elephant grass.*

na-po'le-on*, *n.* An oblong portion of rich iced cake consisting of several layers of puff paste with a cream filling.

na-poo', na-pooh' (nȧ-pōō'), *interj.* [Corrupt. of F. *il n'y a plus* there is no more, it is finished.] No more; all gone; all over; "nothing doing"; finished; dead. — *a.* No; no good; dead. — *v. t.* To be done for; die. — *v. t.* To do for; put an end to; kill. *All Brit. Soldiers' Slang.*

na-prap'a-thy (nȧ-prăp'ȧ-thĭ), *n.* [Bohemian *naprava* correction + *-pathy.*] A therapeutic system of drugless healing by manipulation, depending on the theory that disease symptoms result from strained or contracted ligaments in pelvis, spine, or thorax. — **nap'ra-path** (năp'rȧ-păth), *n.*

nar'cism (när'sĭz'm) } *n.* [See NARCISSUS, 3; -ISM.]
nar-cis'sism (när-sĭs'ĭz'm) } *Psychoanalysis.* The finding of the libido object within one's self; — a phase of psychosexual development prior to adult alloerotism; pathologically, fixation at, or regression to, this stage. — **nar'cist** (när'sĭst), *n.* — **nar-cis'tic** (när-sĭs'tĭk), **nar'cis-sis'tic** (när'sĭ-sĭs'tĭk), *a.*

Na-tal' grass (nȧ-tăl'). *Bot.* An important forage grass (*Tricholæna rosea*) of southern Africa, now cultivated also in many tropical and subtropical regions.

National Army. *Mil.* That part of the army of the United States consisting of drafted men, in distinction from the Regular Army and the National Guard.
national forest. *U. S.* A forested area, usually about a watershed or the sources of a river, reserved from private settlement by the Federal government. In 1924 there were 146 *national forests*, chiefly in the West and South and in Alaska, embracing over 157,500,000 acres.
na'tion-al-ist*, *n.* [*cap.*] An advocate of national unity and independence, as in Turkey, Egypt, and India.
na'tion-al-i-za'tion*, *n.* Act of nationalizing (see NATIONALIZE, *v. t.*, 2, in the *Dict.*); specif., as a doctrine of communism, the taking over by the state of private property, as mines, factories, banks, etc., or industrial, trade, or financial organizations, or the control of any class of labor or service in the interests of the state.
national monument. *U. S.* A monument (which see, above) reserved by the government as public property. Several national monuments, as the Grand Canyon of Arizona, have become national parks through acts of Congress.
national park. *U. S.* An area of land (see PARK, *n.*, 4, in the *Dict.*) set aside as public property by act of Congress.
National Prohibition Act. See VOLSTEAD ACT, below.
natural frequency *or* **wave length.** *Radio.* The frequency (or wave length) with which a circuit, or part of a circuit, is in tune.
na'tur-op'a-thy (nā'tŭr-ŏp'ă-thĭ), *n.* [L. *natura* nature + *-pathy.*] An eclectic system of treatment of disease without drugs which employs various methods that are supposed to assist nature in repelling the disease. — **na'tur-o-path** (nā'tŭr-ō-păth), *n.* — **na'tur-op'a-thist** (-thĭst), *n.*
N C [without periods.] *Abbr.* of *Navy-Curtiss*; — used to designate a type of seaplane jointly produced by the United States Navy and the Curtiss Engineering Corporation.
N. E. A. *Abbr.* National Education Association.
near*, *a.* Almost being; closely resembling; almost; as, "*near* silk," a *near* accident. *Cant or Colloq.*
near beer. Any of various malt liquors (see *Citation*).
Near beer is a term of common currency used to designate all that class of malt liquors which contain so little alcohol that they will not produce intoxication, though drunk to excess, and includes in its meaning all malt liquors which are not within the purview of the general prohibition law. *Cambell* v. *City of Thomasville, Georgia Appeal Records*, 6 212.
near seal. *Furriery.* Any of several furs prepared to imitate the true seal, esp. the skin or fur of the European cony (rabbit) plucked and dyed the color of seal. French dyed conies are sometimes called *French seal.*
neck rot. *Bot.* A disease of onions, esp. of the white varieties, characterized by a rotting of the bulbs from the top downward, caused by the fungus *Sclerotium cepivorum.*
nec'ro-bac'il-lo'sis (nĕk'rō-băs'ĭ-lō'sĭs), *n.*; *pl.* -SES (-sēz). [NL.; *necro-* + *bacillus* + *-osis.*] Any of several diseased conditions in domestic animals, esp. hogs and sheep, caused by the necrosis bacillus *Actinomyces necrophorus* (syn. *Bacillus necrophorus*).
Nec'tri-a (nĕk'trĭ-ă), *n.* [NL., fr. Gr. *νηκτρίς*, fem. of *νηκτήρ* swimmer.] *Bot.* A genus of ascomycetous fungi of the order Hypocreales, characterized by bright-colored perithecia. Its conidial forms have been referred to several genera, as *Fusarium, Cephalosporium*, and *Tuberculariа*. Most of its species are saprophytic, but others occur as parasites, as *N. cinnabarina* on currants, and the cherry, maple, and birch, *N. galligena* on apple trees, and *N. cucurbitula* on the spruce, fir, and other coniferous trees.
neg'a-tiv-ism* (nĕg'ă-tĭv-ĭz'm), *n.* *Psychopath.* The condition in which an individual refrains from doing what is expected of him (**passive negativism**) or does the exact opposite (**active negativism**). — **neg'a-tiv-is'tic** (-ĭs'tĭk), *a.*
Ne'gri bod'ies (nā'grē). Certain round or oval parasitic bodies found in the large ganglia cells of the hippocampus major and in other parts of the central nervous system and believed to be the specific inciting factors in rabies; — so called after the Italian physician Adelchi Negri (1876–1912), who demonstrated their occurrence.
ne'o-ars'phen-am'ine (nē'ō-ärs'fĕn-ăm'ĭn; *-ă-mēn'*), *n.* Also **-in.** [*neo-* + *arsphenamine.*] *Pharm.* Neosalvarsan.
ne-og'a-my (nē-ŏg'ă-mĭ), *n.* [*neo-* + *-gamy.*] *Zoöl.* In certain gregarines, association occurring prior to the adult stage of the life cycle. — **ne-og'a-mous** (-mŭs), *a.*
ne'o-im-pres'sion-ism (nē'ō-ĭm-prĕsh'ŭn-ĭz'm), *n. Painting.* A development, on more rigorously scientific lines, of impressionism (which see, in the *Dictionary*), originated by George Seurat (1859–91), and carried on by Paul Signac (1863–) and others. Its method is marked by the laying of pure primary colors in minute dots upon a white ground, any given line being produced by a variation in the proportionate quantity of the primary colors; — called also *pointillism* (stippling). — **ne'o-im-pres'sion-ist**, *n. & a.*
ne'o-sal'var-san (nē'ō-săl'vär-săn), *n.* [*neo-* + *salvarsan.*] *Chem.* A synthetic compound of arsenic, essentially $C_{12}H_{11}N_2O_2As_2{\cdot}CH_2O{\cdot}SONa$, derived from salvarsan, bearing the trade-mark *Neosalvarsan.* It is a yellowish powder, readily soluble in water. Neosalvarsan is less toxic than salvarsan, but also less active.
Nep, *or* **NEP** (nĕp), *n.* Short for New Economic Policy (which see, below); — so called from the initial letters.
neph'e-lom'e-try (nĕf'ĕ-lŏm'ē-trĭ), *n.* The use of the nephelometer.
nep'man (nĕp'măn), *n.*; *pl.* -MEN. One who takes advantage of the Nep and engages in private trade. *Russia.*
Nernst' ef-fect' (nĕrnst). [After Prof. Walter *Nernst* (1864–), German physicist.] *Elec.* A transverse electromotive force, analogous to the Hall effect, produced when a metal through which a flow of heat occurs is placed in a magnetic field. The effect is observed when the magnetic lines of force are perpendicular to the thermal flux.
net*, *n.* *Aeronautics.* **a** A rigging of ropes and twine, on free balloons, which supports the weight of the basket, etc., distributing the load over the entire upper surface of the envelope. **b** A rectangular net of cordage used to restrain the envelope of a kite balloon or airship during inflation and before the car is attached.
‖ **Ne Te'me-re** (nē tĕm'ĕ-rē). [So named from L. *ne temere* not rashly, the first two words in the decree.] *R. C. Ch.* A decree of the Congregation of the Council declaring invalid any marriage of a Roman Catholic, or of a person who has ever been a Roman Catholic, if not contracted before a duly qualified priest (or the bishop of the diocese) and at least two witnesses. The decree was issued August 2, 1907, and took effect on Easter, April 19, 1908.
neu'ro-fi'bril (nū'rō-fī'brĭl), *n.* [*neuro-* + *fibril.*] *Biol.* The conducting element of a nerve cell.
neu'ro-gram (nū'rō-grăm), *n.* [*neuro-* + *-gram.*] *Psychol.* A residuum of a past cerebral activity.
neu'ro-psy-cho'sis* (-sī-kō'sĭs), *n.* See PSYCHONEUROSIS, below.
neu'tral-ize (nū'trăl-īz), *v. i.* [See NEUTRALIZE, *v. t.*] *Radio.* To provide means for reducing regeneration, particularly that caused by capacity between grid and plate.
neu'tro-dyne (nū'trō-dīn), *a.* [L. *neuter* + *dyne.*] *Radio.* Pertaining to a type of radio receiving apparatus, bearing the trade-mark *Neutrodyne*, in which the effect of capacity between grid and plate in causing regeneration is prevented or controlled by an auxiliary balancing capacity.
New Economic Policy. The policy of the Russian Soviet government, officially announced in May, 1921, by which the smaller industrial plants (about 70% of the total), confiscated in 1918, were returned to private ownership; state control of agriculture was abandoned; private trading was legitimized, and the wage system was restored. The state retains control of the larger plants and mines, maintains a monopoly of foreign trade, and imposes heavy taxes on the nepman; — often called *Nep.* See NEPMAN, above.
news'pa'per-man (nūz'pā'pĕr-măn), *n.*; *pl.* -MEN (-mĕn). One who writes for a newspaper; also, one who owns or conducts a newspaper.
news'print' (nūz'prĭnt'), *n.* Also **news print.** A kind of thin machine-finished paper made from wood pulp, and used mostly for newspapers; — called also *print.*
New Thought. Any form of belief in mental healing other than (1) Christian Science and (2) hypnotism or psychotherapy; — essentially equivalent to *Higher Thought.* Its central principle is the conviction that all diseases are mental in origin, and that man produces changes in his health, finances, and life by his mental attitude.
nich'rome (nĭk'rōm), *n.* An alloy of nickel and chromium, resistant to oxidation and acids, and used for chemical apparatus, electrical-resistance appliances, etc., bearing the trade-mark *Nichrome.*
nickel bronze. *Metal.* = CUPRONICKEL, above.
Nie'tzsche-i.m (nē'chĕ-ĭz'm), *n.* The philosophical egoism of Friedrich Wilhelm Nietzsche (German philosopher, 1844–1900) and his followers. Nietzsche's characteristic theory is of the perfectibility of man through forcible self-assertion, leading to criticism of Christian ethics as servile and to glorification of the overman (see OVERMAN, 3, in *Dict.*). — **Nie'tzsche-an** (nē'chĕ-ăn), *n. & a.* — **Nie'tzsche-an-ism** (-ĭz'm), *n.*
night letter, night lettergram. See LETTERGRAM, above
nik-al'gin (nĭk-ăl'jĭn), *n.* [Gr. *νικᾶν* to conquer + *ἄλγος* pain + *-in.*] *Med.* A local anæsthetic composed of hydrochloric acid, quinine, and urea.
Nine'—Pow'er Trea'ty. **a** A treaty concerning the status of China signed at the Washington Conference, Feb. 6, 1922, by the United States, Belgium, the British Empire, China, France, Italy, Japan, the Netherlands, and Portugal. The treaty pledges respect for the sovereignty and territorial integrity of China, provision for self-development, equality for all nations in commercial opportunities, prohibition of discrimination on railways, etc. **b** A treaty signed by the same powers and of the same date as **a,** allowing China to increase her customs tariff.
nin-hy'drin (nĭn-hī'drĭn), *n.* *Chem.* A colorless crystalline compound, $C_9H_6O_4$, made artificially, and bearing the trade-mark *Ninhydrin.* It is a sensitive reagent for proteins, peptones, and most amino acids, giving with them a blue coloration in boiling solution. Ninhydrin is a hydrate of triketo-hydrindene.
ni'non' (nē'nôn'), *n.* [Cf. F. *Ninon* Ann, — fem. prop. name.] A kind of silk voile similar to Georgette crêpe.
Nip'pon-ese' (nĭp'ŏ-nēz'; -nēs'), *n*; *sing. & pl.* [From *Nippon*, the Japanese name for Japan.] A Japanese; the Japanese. — *a.* Japanese.
Nip'pon-ism (nĭp'ŏn-ĭz'm), *n.* A characteristic or peculiarity of the Nipponese, or Japanese; Japanese idiom or expression; Japanism.
Nip'pon-ize (-īz), *v. t.* To make Nipponese, or Japanese.
ni'tra-gin (nī'tră-jĭn), *n.* [Perh. *nitrogen* + *agriculture* + *-in.*] *Agric.* A preparation of nitrogen-fixing bacteria; — a trade name. See NITROGEN-FIXING, in the *Dict.*
ni-tra'to- (nī-trā'tō-). [See NITRATE.] *Chem.* A combining form denoting the presence of the nitrate group, NO_3, esp. in the ammino compounds.
nitride process. See NITROGEN FIXATION, below.
ni-tri'to- (nī-trī'tō-). [See NITRITE.] *Chem.* A combining form denoting the presence of the nitrite group, NO_2, esp. in the ammino compounds.
ni'tro-cot'ton (nī'trō-kŏt'n), *n.* [*nitro-* + *cotton.*] Guncotton (which see, in the *Dictionary*).
nitrogen fixation. The conversion of free nitrogen, of which there is an inexhaustible supply in the air, into combined form so as to render it useful for fertilizers, explosives, etc. The industrial *fixation processes* for nitrogen are: (1) the *arc process*, in which electric sparking causes direct union of the nitrogen and oxygen of the air; (2) the *cyanamide process*, in which calcium cyanamide is formed by union of calcium carbide and nitrogen at red heat; (3) the *nitride process*, which depends on the formation of a metallic nitride, e. g. by heating alumina, coke, and nitrogen in an electric furnace; (4) the *cyanide process*, which depends on the formation of a cyanide, e. g. by heating sodium carbonate, coke, and iron in a stream of nitrogen; (5) the *synthetic ammonia process*, or *Haber process*, according to which nitrogen and hydrogen combine, in the presence of a catalyzer, to form ammonia.
ni'tro-hy'dro-car'bon (nī'trō-hī'drō-kär'bŏn), *n.* [*nitro-* + *hydrocarbon.*] *Org. Chem.* Any nitro derivative of a hydrocarbon (as nitrobenzene).
ni'tro-lim (nī'trō-lĭm), **ni'tro-lime** (-līm), *n.* [*nitro-* + *lime.*] = CALCIUM CYANAMIDE, above.
ni'tro-starch' (-stärch'), *n.* [*nitro-* + *starch.*] An explosive made by treating starch with nitric and sulphuric acids.
noble gases. *Chem.* The inert gases, argon, helium, krypton, neon, and xenon. Cf. NOBLE METALS, in the *Dict.*
no'ci-as-so'ci-a'tion (nō'sĭ-ă-sō'sĭ-ā'shŭn; -shĭ-ā'shŭn), *n.* [L. *nocere* to hurt + E. *association.*] *Med.* Nervous energy discharge; shock; exhaustion consequent upon surgical operation, trauma, etc.
No'gu'chi' cu'ta-neous, *or* **luetin, test** (nō'gōō'chē'). [After Hideyo *Noguchi*, Japanese physician in America.] A test for syphilis, in which the cutaneous injection of luetin causes, in a syphilitic patient, an indurated papule, or a pustule, at the point of injection.
no'ib-wood' (nō'ĭb-wŏŏd'), *n.* The timber of *Tecoma leucoxylon*, a large bignoniaceous tree of Guiana; — a trade name. The brown or reddish brown wood is hard, heavy, strong, and very durable. Called also *bethabara.*
noise field intensity. *Radio* The electromagnetic field intensity produced by waves of an interfering character, in radio reception; — sometimes called *noise*, or *radio noise, strength.* It constitutes the background of electrical and atmospheric disturbances.
no man's land*. In modern warfare, the belt of ground between the most advanced trenches of opposing armies.
nom'o-gram (nŏm'ō-grăm), *n.* Same as NOMOGRAPH.
nom'o-graph (nŏm'ō-graf), *n.* [Gr. *νόμος* law + *-graph.*] **a** A graph that shows, by the aid of a straightedge, the relation between interdependent variables. **b** A graphic representation of numerical relations by any of various systems.
no-mog'ra-phy*, *n.* Art of constructing nomographs, or nomograms. — **nom'o-graph'ic** (nŏm'ō-grăf'ĭk), *a.*
non-bev'er-age (nŏn-bĕv'ĕr-ăj), *a.* Not used as a beverage; not suitable for use as a beverage.
non—Bol'she-vik' (*or* **non-bol'-**), *a. & n.*, **non—Ger'man,** *a. & n.*, **non'in-tox'i-cant,** *n.*, **non'in-tox'i-cat'ing,** *a.* See NON-, in the *Dict.*
non'co-ŏp'er-a'tion*, *n.* Refusal, through civil disobedience, of a people to coöperate with the government of a country, esp. by nonpayment of taxes, and, sometimes, by boycotting the courts, legislative councils, educational institutions, etc; — used esp of the policy of Gandhi and his followers in India. See SATYAGRAHA, below. — **-a'tion-ist,** *n.* — **non'co-ŏp'er-a'tor,** *n.*
Nonpartisan League. An organization formed in North Dakota in 1915 as a nonpartisan body to reform the system of marketing farm products in agricultural States, and to promote the public ownership of public necessities.
non-rig'id (nŏn-rĭj'ĭd), *a.* Not rigid. See AIRSHIP, above.
non-rust'a-ble, *a.*, **non-sink'a-ble,** *a.* See NON-, in *Dict.*
non-sym'bi-ot'ic (nŏn-sĭm'bī-ŏt'ĭk; -bĭ-ŏt'ĭk), *a. Biol.* Not living in a state of mutualism or symbiosis, as azotobacters.
non'trans-fer'a-ble (-trăns-fûr'ă-b'l), *a.* See NON-, in *Dict.*
nonunion shop. *Trade-Unionism.* **a** A shop in which union members are not employed; — sometimes called a *closed nonunion shop*, because closed to union members. **b** A shop in which a labor union forbids its members to accept employment.
nor-. [Prob. fr. *normal.*] *Org. Chem.* A prefix denoting the parent compound from which another may be regarded as derived; as, *nor*camphane, C_8H_{14} (of which camphane is the dimethyl derivative; see CAMPHANE, in the *Dict.*).
nose*, *n.* *Aëronautics.* The forward end of an aircraft; specif., the part of a fuselage or nacelle projecting in front of the main supporting plane or planes.
nose dive. A steep descent in an airplane, head-on.
nose'—heav'y, *a.* *Aëronautics.* Designating an aircraft in which, in any given condition of normal flight, the nose tends to drop if the longitudinal control is released, as, for instance, when the pilot has to exert a pull on the control stick or column to maintain the given condition.
No-se'ma (nō-sē'mă), *n.* [NL., fr. Gr. *νόσημα* a disease.] *Zoöl.* A genus of Protozoa, the members of which are parasitic in arthropods, worms, and fish. *N. apis* is the cause of a serious dysentery in the adult honeybee, and *N. bombycis*, the cause of pebrine in the silkworm.
nose spin. *Aviation.* The movement of an aircraft when it spins about an axis which passes through the forward end of the craft but is not in line with the body.
nose stiffener. *Aëronautics.* A bow stiffener.
nov-as'pi-rin (nō-văs'pĭ-rĭn), *n.* [L. *novus* new + E. *aspirin.*] *Pharm.* A white crystalline compound, $C_{21}H_{18}O_{11}$, a derivative of salicylic and citric acids, bearing the trade-mark *Novaspirin*, used as an antipyretic, antirheumatic, and antiseptic.
no'vo-ca'in (nō'vō-kā'ĭn; -kān'), *n.* *Pharm.* = NOVOCAINE, bearing the trade-mark *Novocain.*
no'vo-ca'ine (nō'vō-kā'ĭn; -ēn; -kān'), *n* [L. *novus* new + E. *cocaine.*] *Pharm.* An alkaloid, $C_{13}H_{20}O_2N_2HCl$, prepared synthetically. It is used as a local anæsthetic, and is much less toxic than cocaine.
Nt. *Abbr. Chem.* [no period, *Nt*] Niton.
nuclear complex. *Psychoanalysis.* The Œdipus complex, regarded as the nucleus of the neuroses and other mental products.
nu'cle-us*, *n.* *Chem.* **a** A characteristic and stable complex of atoms to which other atoms may be variously attached. See BENZENE NUCLEUS, in the *Dict.* **b** According to modern theories of the atom, a positively charged central part surrounded by revolving electrons.
‖ **nunc' pro' tunc'** (nŭnk' prō' tŭnk'). [L.] *Law.* Lit., now for then; — said of a thing done at one time that ought to have been done at another; as, a *nunc pro tunc* entry, an entry, as in a record, made at the present time of something done at a previous time and that ought to have been recorded at that time, to have effect as of the earlier date.
nurse balloon. A small balloon made of heavy fabric, employed as a portable means for storing gas. Sometimes one is so connected as automatically to allow for the expansion or contraction of the gas in an aërostat when on the ground.
nut*, *n.* **a** One whose thinking or conduct is odd or eccentric; one who is, or seems to be, mentally unbalanced. **b** One who is overenthusiastic about a particular matter, esp. a hobby; a crank; a monomaniac.
‖ **ob'last** (ŏb'lăst). See SOVIET, below.
occupational disease. *Med.* A disease brought on by, or arising from, the occupation of the patient, as ragpicker's disease, matchmaker's disease, etc.
ocean spray. *Bot.* A rosaceous shrub (*Holodiscus discolor*), a native of the northwestern United States; — called also *arrowwood* and *ironwood.*
Œd'i-pus com'plex (ĕd'ĭ-pŭs; ē'dĭ-). *Psychoanalysis.* A complex arising in early childhood and involving a primary attachment to the parent of opposite sex, with rivalry of and

hostility to the other; — sometimes used to mean its appearance in males only. See ELECTRA COMPLEX, above, ŒDIPUS, in the *Dict.*

o'keh' (ō'kā'), *adv. & interj.* [*Choctaw*, it is so and not otherwise] All right; "O. K." — *v. t.*; O'KEHED' (ō'kād'); O'KEH'ING. To O.K. *Both Cant.*

Old Guard*. Specif., the conservative, or "stand-pat," element in the Republican party. *Polit. Cant, U. S.*

olive drab. Drab with a tinge of olive. *Abbr., O. D.*

olive fly. A small acalyptrate fly (*Dacus oleæ*) whose larva is a pest of the olive in Mediterranean regions.

o'lo-na' (ō'lō-nä'), *n.* [Hawaiian.] A Hawaiian shrub (*Touchardia latifolia*); also, the fiber from its bark, formerly used for making fish nets.

O-lym'pi-ad* (ō-lĭm'pĭ-ăd), *n.* The quadrennial celebration of the modern Olympian games.

on*, *prep* — **on one's own,** on one's own resources or initiative; for or by one's self. *Colloq.*

once'—o'ver, *n.* A single, swift, and complete view or examination; as, to give a car a *once-over. Slang, U. S.*

on'cost'* (ŏn'kōst'), *n. Accounting.* = OVERHEAD. *Brit.*

one'—step', *n.* A lively round dance, in two-four time, the successive steps in a figure being the coupee, grapevine, whirl, or turning step, draw step, dip, and a variety of walking steps; also, music for this dance. — **one'—step',** *v. i.*

one striper. See STRIPER, below.

one'—way', *a.* Reserved for anything, as traffic, moving in one direction; as, a *one-way* street.

o'pen*, *a.* Of automobiles, not covered over by a permanent top; also, of a sedan or limousine, having a permanent roof but disappearing or removable sides. Cf. SEDAN, below.

open spark gap. *Radio.* = FIXED GAP, above.

op-son'i-fi-ca'tion (ŏp-sŏn'ĭ-fĭ-kā'shŭn), *n. Physiol. Chem.* The effect of opsonin in rendering bacteria susceptible to phagocytosis.

op-son'i-fy (-sŏn'ĭ-fī), *v. t.*; -FIED (-fīd); -FY'ING. [*opsonin* + *-fy.*] *Physiol Chem* To subject to opsonification.

opt* (ŏpt), *v. i.* To choose citizenship after transfer of territory to another sovereignty; as, according to the Treaty of Versailles, natives of that part of Schleswig restored to Denmark, not habitually resident, and of German nationality, were entitled to *opt* for Denmark; persons resident were entitled to *opt* for Germany.

optical rotation. *Optics.* Rotation of the plane of polarized light. See *rotatory polarization*, under POLARIZATION, 2, in the *Dictionary.*

op'ti-ence (ŏp'tĭ-ĕns), *n.* [See OPTIC, *a.*] A body of spectators, as at a moving-picture show. See AUDIENCE, above. *Rare.*

op'to-phone (ŏp'tō-fōn), *n.* [*opto-* + *-phone.*] An instrument, consisting essentially of a selenium cell and telephonic apparatus in combination, by means of which light energy is converted into sound energy, so that a blind person is enabled by its use to locate and estimate varying degrees of light through the ear and thus even to read ordinary printed matter.

orange book. A book, esp. an official government publication, having an orange-colored cover; as, the Russian *Orange Book* of 1914, containing various diplomatic documents relating to Russia's participation in the World War.

orchestra bells. = GLOCKENSPIEL, in the *Dictionary.*

or'ga-no-trop'ic (ôr'gă-nō-trŏp'ĭk), *a.* [*organo-* + *-tropic.*] *Biol.* Having affinity for the tissues; pertaining to substances that act on the organs of the body.

Oriental peach moth. *Zoöl.* A small tortricid moth (*Laspeyresia molesta*) whose larva is injurious to the twigs and fruit of orchard trees, especially the peach.

os'cil-late*, *v. i. Elec.* = GENERATE, above. *Cant.*

os'cil-la'tion*, *n. Elec.* **a** *pl.* Damped alternating current. **b** *pl.* High-frequency alternating current of constant amplitude.

os'cil-la'tor* (ŏs'ĭ-lā'tẽr), *n. Radio.* A generator; specif., a radio-frequency generator, esp. one of a nonrotating type. *Oscillators* include spark generators, arc generators, and electron-tube generators, but not radio-frequency alternators.

oscillatory circuit. *Radio.* A circuit containing capacity and inductance such that a single voltage impulse would give rise to a damped alternating current.

ot'ter*, *n. Naval.* A device for clearing a ship's path of underwater mines; a paravane. See PARAVANE, below.

out-breed', *v. t.* To breed with each other (animals unrelated as far as possible). Cf. INBREED. — **out'breed'ing,** *n.*

out'law' (out'lô'), *a.* Of or pertaining to outlaws; composed of outlaws; proscribed or interdicted by law or by the rules of an organization; as, an *outlaw* band; an *outlaw* labor union; an *outlaw* strike; an *outlaw* ball player.

out'line'*, *n.* **a** A short summary, or compendium, often in the form of heads and subheads. **b** Hence, specifically, a compendious presentation, sometimes extending to several volumes, of the most significant features of a general subject; as, an *outline* of history; an *outline* of science; an *outline* of literature. — **out'lin'er,** *n.*

o'ver-hang'*, *n. Aëronautics.* One half the difference in the span of any two main supporting surfaces of an airplane. The overhang is positive when the upper of the two main supporting surfaces has the larger span.

o'ver-head', *n. Accounting.* Those general charges or expenses, collectively, in any business which cannot be charged up as belonging exclusively to any particular part of the work or product, as rent, taxes, insurance, lighting, heating, accounting and other office expenses, and depreciation. Called also, in manufacturing businesses, *factory overhead, burden,* and, esp. in British use, *oncost.*

overhead railway. An elevated railroad or railway. *Brit.*

o'ver-mod'u-la'tion, *n. Radio.* Defective modulation in which the modulating signal is made too strong, so that it distorts the resultant wave.

Owen—Glass Federal Reserve Act. See FEDERAL RESERVE SYSTEM, above.

ox'an (ŏk'săn), *n.* Also **ox'ane.** [2d *oxy-* **a** + 2d *-an.*] *Chem.* A colorless gas, CNO, formed by the action of nitrogen oxides on heated charcoal and in other ways. It is described by Lidov as existing in two varieties: *α*-**oxan**, O-C≡N, and *β*-**oxan**, O-N≡C, the latter being the less stable. Both resemble carbon dioxide, but show a tendency to polymerize. Each variety forms a series of unstable salts (**ox'an-ates**) corresponding to the acid H_2CNO_2 (**ox-an'ic ac'id**, *α*- and *β*-).

ox'o-zone (ŏk'sō-zōn), *n.* [2d *oxy-* **a** + *ozone.*] *Chem.* An allotropic form of oxygen, O_4, which is believed to be formed with, and to exist in solution in, ozone. Organic oxidation products, $C_nH_{2n}O_4$, corresponding to it have been prepared from unsaturated hydrocarbons. These products, called **ox'o-zon'ides** (-zōn'ĭdz; -ĭdz), are highly explosive oils.

ox'y-a-cet'y-lene (ŏk'sĭ-ă-sĕt'ĭ-lēn), *a.* Of, pertaining to, or consisting of, a mixture of oxygen and acetylene.

oxyacetylene blowpipe. A blowpipe of special construction producing the oxyacetylene flame, which is far hotter than the oxyhydrogen flame, and is used for the direct and autogenous welding of steel and many minor metallurgical processes. Cf. OXYHYDROGEN, in the *Dict.*

ox'y-lu-cif'er-in (ŏk'sĭ-lū-sĭf'ẽr-ĭn), *n.* Also **-ine.** [*oxy-* + *luciferin.*] *Chem.* The oxidation product of luciferin, resulting from the light-giving reaction in the so-called phosphorescent organisms

o'zon-ate (ō'zō-nāt), *n.* [*ozone* + *-ate*, 3 **b.**] *Chem* One of a series of yellow or orange salts, formed by the action of oxygen containing ozone on alkalies. On standing, they change slowly into the corresponding tetroxides A suggested formula for potassium *ozonate* is $(KOH)_2O_2$.

Pa-chu'ca tank (pä-chōō'kä). *Metallurgy.* A high and narrow tank, with a central cylinder for the introduction of compressed air, used in the agitation and settling of pulp (pulverized ore and water) during treatment by the cyanide process Though originally devised in New Zealand, it was first practically introduced in Pachuca, Mexico.

pach'y-tene (păk'ĭ-tēn), *n.* [Cf. PACHY-, Gr. *παχύτης* thickness.] *Biol.* In chromosome reduction, a stage following synizesis in which the paired threads become much thickened.

pa-cif'i-cism (pă-sĭf'ĭ-sĭz'm), *n.*, **pa-cif'i-cist** (-sĭst), *n.* See PACIFISM, PACIFIST, below.

pac'i-fism (păs'ĭ-fĭz'm), *n.* The spirit or temper which opposes military ideals, emphasizes the defects of military training and the cost of war and preparation for it, and advocates the settlement of international disputes entirely by arbitration. See PACIFIST.

pac'i-fist (-fĭst), *n.* One who is imbued with pacifism; one who favors, advocates, or supports pacifism; a pacificist.

pac'i-fis'tic (-fĭs'tĭk), *a.* Of or pertaining to or characteristic of pacifists or pacifism.

packing effect. *Physics & Chem.* The loss of mass resulting from the loss of energy in the combination of hydrogen nuclei to form a nucleus of a more complex atom.

page*, *v. t.* To seek out, as by calling the name of, in order to give a message to, as pages or bell boys do in a hotel.

pah'mi (pä'mē), *n.* The bobac, or its fur.

pa'le-o-psy-chol'o-gy (pā'lē-ō-sī-kŏl'ō-jĭ; păl'ē-ō-sī-), *n.* [*paleo-* + *psychology.*] *Psychoanalysis.* That branch of psychology which deals with the mind as an evolutionary product containing deposits of all former modes of thought and feeling, which participate in or interfere with psychic adaptation and progress. — **pa'le-o-psy'cho-log'i-cal** (-sĭ'kō-lŏj'ĭ-kăl), *a.*

Pan-*. *Pan-Arab, Pan-Arabism, Pan-Asiaticism, Pan-China, Pan-Croat, Pan-Mongolian, Pan-Prussianism, Pan-Russian, Pan-Serb, Pan-Syrian, Pan-Turanian,* etc. See PAN-, in the *Dictionary.*

Pan'a-ma' (păn'ă-mä'), *n.* **a** A kind of closely woven, elastic cotton fabric, wiry in appearance, of basket weave, bearing the trade-mark *Panama.* It is used esp. for hat brims and crowns. **b** A kind of firm, smooth worsted, of plain weave, made of hard-twisted yarn, bearing the trademark *Panama.* It is used esp. for dresses, skirts, and suits. **c** [*l. c.*] A large, handsome tree (*Sterculia carthaginiensis*) of tropical America, having oily, edible seeds.

Pan—American Union. An international organization (established in 1890 as the *International Bureau of American Republics;* renamed in 1910), with its headquarters in Washington, D. C., for the development of closer relations of friendship and commerce among the 21 republics of the American continent.

pan'cake'*, *n. Aviation.* A landing made abruptly and with little or no forward movement. *Cant.*

pan'cake', *v. i. Aviation.* To "level off" an airplane higher than for a normal landing, causing it to stall and descend with the wings at a very large angle of attack and approximately without bank, on a steeply inclined path

pan'cake', *a. Radio.* Of flat spiral form; as, a *pancake* coil.

pan'el*, *n. Aëronautics.* **a** One of the uniform pieces of fabric of which the envelope of a balloon is made up. **b** A portion of an airplane wing which is constructed entirely separately from the rest of the wing, to which it is attached by bolts and fittings.

Pan'—Ger'man-ism*, *n.* [See PAN-.] Orig., the principle of the union of all German peoples in one political organization; later, the imperialistic doctrine of German world domination (G. *Weltherrschaft*).

pan'han'dle (păn'hăn'd'l), *v. i.* [Prob. with reference to the outstretched arm.] To accost on the street and beg from. — *v. i* To accost people on the streets and beg from them. — **pan'han'dler*,** *n. All Slang or Cant.*

panic party. An extra crew carried on one of the so-called "mystery ships" for the purpose of quitting it when attacked and thus leaving it apparently abandoned. See MYSTERY SHIP, above.

pan'mer-ism (păn'mẽr-ĭz'm), *n.* [*pan-* + *merism.*] *Biol.* The doctrine or theory of the existence of a protoplasmic unit capable of adaptation to any form of growth. — **pan'mer-is'tic** (-ĭs'tĭk), *a.*

pan'—na'tion-al-ism (păn'năsh'ŭn-ăl-ĭz'm), *n.* = INTERNATIONALISM, above.

pan'to-graph* (păn'tō-grăf'), *n. Elec. Railroads.* A jointed framework mounted on the roof of a trolley car and carrying a conductor for taking current from the trolley wire.

par'a-bel'lum gun (păr'ă-bĕl'ŭm). [See PARABELLUM PISTOL.] *Mil.* A German air-cooled machine gun designed for use on airplanes.

par'a-ca'se-in-ate (-kā'sē-ĭn-āt), *n. Chem.* A salt of paracasein.

Pa-ra' grass (pä-rä'). [From *Pará*, Brazil.] *Agric.* A perennial pasture and green forage grass (*Panicum barbinode*), grown in tropical countries. It grows well in soils too wet for other crops.

parallel resonance. *Elec.* A condition of minimum current in a circuit in which there is inserted a parallel combination of capacity and inductance.

par'al-lel—wire' sys'tem. *Radio.* A pair of long parallel wires, on which standing waves of ultra-high radio frequency are produced by a generator. Cf. LECHER WIRES, above.

par'a-ni-tran'i-line (păr'ă-nī-trăn'ĭ-lĭn; -lēn; 184), *n.* Also **-lin.** [*para-* + *nitraniline.*] *Chem.* See NITRANILINE, in the *Dictionary.*

par'a red (păr'ă). *Chem.* Any of a group of red azo dyes prepared from paranitraniline and other para compounds; also, any of a group of lakes made from these dyes.

parasite resistance. See DRAG, HEAD RESISTANCE, above.

par'a-si'to-trop'ic (păr'ă-sī'tō-trŏp'ĭk), *a.* [*parasite* + *-tropic.*] *Physiol.* Acting on parasitic invaders of the body exclusively; having affinity for parasites. — *n.* A parasitotropic substance, as in the blood.

par'a-sol'* (păr'ă-sŏl'; păr'ă-sōl'; 277), *n. Aëronautics.* A monoplane with parasol wings

par'a-sol', *a. Aëronautics.* Of the wings of a monoplane, raised above the pilot's head to permit of downward vision.

par'a-syn-ap'sis (-sĭ-năp'sĭs), *n.* [NL.; *para-* + *synapsis.*] *Biol.* Side-by-side pairing of chromosomes at synapsis prior to the first maturation division of the germ cells.

par'a-vane (păr'ă-vān), *n.* [*para-* + *vane.*] *Naval.* **a** A torpedo-shaped underwater protective device with sawlike teeth in its forward end, for use by seagoing vessels when cruising in mined areas. Paravanes are towed one on each side of, and at some distance from, the bow of the vessel by means of lines made fast to the lowest point of her stem for the purpose of severing the moorings of submerged mines in her path. Called also *protector paravane* and, esp. when used on merchant vessels, *otter.* **b** A similar device, carrying a large charge (sometimes 300 pounds or more) of trinitrotoluene (T. N. T.), detonated by means of an electric current passed through a core in the towing wire, for use against submarines; — called specifically *explosive paravane.*

parcel post*. A general parcel post was established in the United States by Act of August 24, 1912, which took effect January 1, 1913. By the present regulations (1926), parcels must not exceed 84 inches in length and girth combined, and must not exceed 70 pounds in weight if to be delivered within the first three zones or 50 pounds if to be delivered in any zone beyond the third. Provision is made for insuring parcels up to $100.00, for special handling, for special delivery, and for sending parcels C.O.D. See ZONE, below.

parent complex. *Psychoanalysis.* The Œdipus complex.

‖ **pa'ri'—mu'tuel'** (pä'rē'-mū'twĕl'), *n.* [*F. pari mutuel.*] = TOTALIZATOR, in the *Dict.*

park*, *v. t.* **a** To halt (a vehicle, esp. a motor vehicle) and to leave or keep standing anywhere out of doors; — rarely, restricted to placing a vehicle parallel with others, at an angle to the curb. Cf. RANK, below. **b** To place or leave (something) anywhere; as, he *parked* his feet on a chair. *Slang, U. S.* — *v. i.* **a** To stop (while in a vehicle) and remain standing; to leave a vehicle standing. **b** To remain stationary. *Slang, U. S.*

par'lia-men'ta-rism (păr'lĭ-mĕn'tă-rĭz'm), *n.* Parliamentary government; the parliamentary system of government.

parlor Bolshevist *or* **Bolshevik.** A person who professes Bolshevism or radical socialism and encourages the movement, but without actually joining in the practical struggle to bring about its fulfillment; — used derogatorily. — **par'lor—Bol'she-vist,** *a.* — **parlor Bolshevism.**

parlor Red. A parlor Bolshevist (which see, above). *Slang.*

par'sec' (par'sĕk'), *n.* [*parallax* + *second*] *Astron.* A unit of measure for interstellar space equal to a distance having a heliocentric parallax of one second, equal to about 200,000 times the radius of the earth's orbit.

Par'se-val (par'sĕ-val), *n.* A kind of medium-sized dirigible balloon or airship of the nonrigid type consisting of a single large gas bag from which a car is suspended by wire ropes. The original was designed by August von Parseval (1861–), German engineer. Cf. ZEPPELIN, below.

par'the-no-car'py (par'thĕ-nō-kär'pĭ), *n.* [*partheno-* + *-carp* + 1st *-y.*] *Bot.* The production of fruits without pollination — **par'the-no-car'pic** (-kär'pĭk), *a.*

participating policy. *Life Insurance.* A policy that entitles the holder to a share in the surplus.

participating stock. A kind of preferred capital stock which besides being entitled to dividends at a fixed rate is further entitled to share in any surplus earnings after dividends at a certain rate have been paid on the common stock.

pass*, *v. t.* — **to pass the buck,** to shift a responsibility over to someone else; — from the use, in some games of poker, of a "buck," or marker (any small object), which is put in the first pot and goes to the player taking that pot, before whom it lies until the deal comes round to him, when the game may be changed in some way, as by the declaration of a jack pot for that deal and the buck is again placed in the pot, or the player may, under certain conditions, pass the deal, together with the "buck," on to the next player. See BUCK, *n.*, 6, in the *Dictionary.*

pas'sive* (păs'ĭv), *a.* Not self-active; not moving or acting of itself. — **passive balloon** *or* **airplane,** one unprovided with motive power. — **passive flight,** flight, such as gliding and soaring, accomplished without motive power.

Pas'teu-rel'la (pás'tē-rĕl'ă), *n.* [NL., after Louis *Pasteur*, French chemist.] *Bact.* A genus of bacteria, parasitic on, or pathogenic to, man and animals, characterized by rods showing bipolar staining. *P. pestis* is the cause of plague in man, and *P. boviseptica*, of hemorrhagic septicæmia in ruminants and swine.

pas-to'ri-um (păs-tō'rĭ-ŭm), *n.* [See PASTOR; cf. AUDITORIUM.] A parsonage; — so called in some Baptist churches. *Southern U. S.*

patch*, *n.* In some airships, a reënforced flap of fabric cemented to the envelope and forming an anchor by which some portion of the structure is attached to the envelope.

pa'tri-lin'e-al (pā'trĭ-lĭn'ē-ăl; păt'rĭ-), *a.* [*L. pater, patris*, father + E. *lineal*] Relating to descent through the male line, that is, through the father and the paternal ancestors; — contrasted with *matrilineal.*

pa'tri-ot-eer' (-ŏt-ēr'), *n.* One who makes an ostentatious display of his patriotism, or who endeavors to make capital of it. — **-eer',** *v. i.* — **-eer'ing,** *p. pr. & vb. n. All Colloq.*

pat'ro-cli'nous (păt'rō-klī'nŭs; păt'rō-klĭ'nŭs), *a.* [Gr. *πατήρ, πατρός*, father + *κλίνειν* to lean, incline.] *Biol.*

Designating or having certain characters inherited from the father. — **pat'ro-cli'ny** (păt'rō-klī'nĭ), *n.*

pat'ro-gen'e-sis (păt'rō-jĕn'ē-sĭs), *n.* [NL., fr. L. *pater, patris*, father + *-genesis*.] *Biol.* A type of reproduction in which the chromatin of the developing embryo is derived exclusively from the sperm or pollen cell. Individuals produced in this way show only the hereditary characteristics of the male parent. Cf. PARTHENOGENESIS, in the *Dict.*

pa-trol'* (pă-trōl'), *n.* See BOY SCOUT, above.

peak*, *n.* *Elec.* The maximum value of an alternating quantity during a cycle.

‖ **pe'chay'** (pā'chī'), *n.* [Tagalog.] Var. of PE-TSAI, in *Dict.*

pe-dol'o-gy (pē-dŏl'ō-jĭ), *n.* [Gr. *πέδον* ground + *-logy*.] The science which treats of the soil.

peeve (pēv), *v. t. & i.* [Prob. fr. *peevish*.] To make or become peevish or ill-tempered. *Slang.*

Pel'lé'as' et Mé'li'sande' (pĕ'lā'as' ā mā'lē'zänd'). A drama by Maeterlinck (1892) and an opera from it by Debussy (1902), masterpieces respectively of symbolism and of musical impressionism, representing a medieval story similar to that of Paolo and Francesca. Cf. FRANCESCA DA RIMINI, in the *Dict.*

pen'e-trom'e-ter (pĕn'ē-trŏm'ē-tĕr), *n.* [L. *penetrare* to penetrate + *-meter*.] *Physics.* An instrument for estimating the hardness of X rays, usually an instrument (called a *Benoist penetrometer*) which determines the hardness by the Benoist scale (which see, above).

pen'guin*, *n.* **a** *Aëronautics.* A low-powered, small-winged airplane incapable of leaving the ground. Penguins are used in aviation training schools **b** A member of the Women's Royal Air Force of Great Britain; — a nickname given because the members of this corps did not fly (see PENGUIN, *n.*, 2, in the *Dict.*). Cf. WRAF.

pen'script (pĕn'skrĭpt), *n.* [*pen* + *script*.] Handwriting; a piece of handwriting; matter written with a pen. Cf. TYPESCRIPT, below.

pen'ta-he'droid (pĕn'tă-hē'droid), *n.* [*penta-* + Gr. *ἕδρα* seat, base + *-oid*.] See FOURTH DIMENSION, above.

pen-tath'lon* (pĕn-tăth'lŏn), *n.* In the modern Olympian games, a composite contest consisting of five events: a running broad jump, throwing the javelin, a 200-meter run, throwing the discus, and a 1500-meter run.

pep (pĕp), *n.* [Short for *pepper*.] Effective energy or power; vigor; dash; spirit. *Slang.*

pep'tide (pĕp'tīd; -tĭd), *n.* Also **-tid** (-tĭd). [*pep*tone + *-ide*.] *Physiol. Chem.* A compound resulting from the condensation of amino acids and yielding these acids again on hydrolysis. Peptides are classed as *dipeptides, tripeptides*, etc., and *polypeptides*, according to the number of amino-acid molecules from which they are derived; thus glycylglycine, $NH_2CH_2CO.NHCH_2CO_2H$, is a dipeptide. Peptides can be obtained by decomposition of proteins. The more complex resemble proteins in certain properties.

per'ac'id (pûr'ăs'ĭd), *n.* [*per-* + *acid*.] *Chem.* An acid which contains a large proportion of oxygen compared with the acid from which it is named. Thus, perboric acid, HBO_3, is the *peracid* corresponding to boric acid, H_3BO_3. Organic peracids are formed by the action of hydrogen peroxide on organic acids. As a class the peracids and their salts are energetic oxidizing agents.

per-hy'drol (pĕr-hī'drōl; -drŏl), *n.* [peroxide + *hydro-* + *-ol*.] An aqueous solution of hydrogen peroxide, bearing the trade-mark *Perhydrol*.

per'i-kon (pĕr'ĭ-kŏn), *n.* *Radio.* A form of crystal detector consisting of chalcopyrite in contact with zincite, bearing the trade-mark *Perikon*. See DETECTOR, above.

pe-rip'ter-y* (pĕ-rĭp'tĕr-ĭ), *n.* [Gr. *περίπτερος* flying round about.] *Physics.* The region surrounding a moving body, as the wing of a bird or a gliding airplane, within which cyclic or vortical motions of the air occur.

per'i-scope*, *n.* An optical instrument used on submarines when submerged to a small depth, in battlefield trenches, etc., to enable an observer to obtain a field of view that otherwise would be impossible to get, as because of an intervening object, or the like. It consists of a tube containing a system of lenses and provided at each end with reflecting surfaces, either mirrors or totally reflecting prisms, inclined at 45° to the axis of the tube, so that the observer looking into one mirror, generally through an eyepiece, can see the objects reflected by the other mirror.

perm'al-loy' (pûrm'ă-loi'), *n.* [(magnetic) *perm*eability + *alloy*.] *Metal. & Elec.* An alloy composed of about 80 per cent nickel and 20 per cent iron, bearing the trade-mark *Permalloy*. It is more easily magnetized and de magnetized than any other known material, and is largely used for submarine telegraph cables.

Permanent Court of International Justice. A court of justice, provided for by Article XIV. of the Covenant of the League of Nations, which has a limited jurisdiction in suits between states that are members of the League, and which shall be open to other states. The bench consists of eleven judges, who elect their own chief justice. Unless otherwise agreed upon by the states concerned, no dispute shall come under the Court's jurisdiction unless it has been found impossible to settle it by diplomatic means. The Court shall also give advisory opinion upon any matter referred to it by the Assembly or Council. See LEAGUE OF NATIONS, above.

per'me-a-bil'i-ty*, *n.* *Aëronautics.* The measure of the rate of diffusion of gas through intact balloon fabric; usually expressed in liters per square meter of fabric per 24 hours, under standard conditions

per-ox'i-dase (pĕr-ŏk'sĭ-dās; -dāz), *n.* [*peroxide* + *-ase*.] *Physiol. Chem.* An enzyme that promotes oxidation by peroxides, esp. hydrogen peroxide.

per'salt'*, *n.* *Chem.* A salt of a peracid.] Various persalts, as sodium perborate and potassium persulphate, are used in bleaching, as antiseptics, and the like.

Persian lamb. **a** The young of certain Asiatic sheep, esp. of Bokhara and other parts of central Asia, which furnish the karakul or astrakhan skins used in furriery. Cf. BROADTAIL. **b** *Furriery.* The finest grade of astrakhan, or karakul.

Per'sism* (pûr'sĭz'm), *n.* Ancient Persian religion, esp. as represented by the Magi. See MAGI, in the *Dictionary*.

per'son'nel'*, *n.* The body of persons collectively engaged in any employment or service; as, the *personnel* of an airship.

pet'ro-gen'ic (pĕt'rō-jĕn'ĭk), *a.* [*petro-* + *-genic*.] Pertaining to the formation of rocks; rock-forming.

Pfeif'fer's (p'fīf'ĕrz), *or* **Pfeif'fer** (-ĕr), **ba-cil'lus.** [After Richard *Pfeiffer* (1858–), German bacteriologist.] The bacillus (*Bacillus influenzæ*) which is the causative agent in influenza. It was discovered by Pfeiffer in 1892.

PH. *Abbr.* See SORENSEN SCALE, below.

phantom antenna. *Radio.* = DUMMY ANTENNA, above.

phase difference. **a** See under PHASE, *n.*, 3, in the *Dict.* **b** The complement of the phase angle, i.e., angle between applied voltage and current. It is used as a measure of quality of condensers and insulating materials, although this usage is giving way to power factor for this purpose, power factor being the cosine of the phase angle.

pha'se-o-lu-na'tin (fā'zē-ō-lū-nā'tĭn), *n.* [*Phaseolus* + *lunatus* + *-in*.] *Chem.* A bitter crystalline glucoside, $C_{10}H_{17}O_6N$, found in the Lima bean (*Phaseolus lunatus*), and in flax; — called also *linamarin*.

phe'no-bar'bi-tal (fē'nō-bär'bĭ-tăl), *n.* [*phenyl* + *barbital*.] *Pharm.* A white crystalline powder, used as a soporific and sedative; — called also *luminal*. Chemically it is ethyl-phenyl-barbituric acid, $C_{12}H_{12}O_3N_2$.

phe-nol'ic insulating material (fē-nŏl'ĭk). *Elec.* An electrical insulating material consisting wholly or in part of a synthetic phenolic varnish which is generally the result of the chemical reaction of a hydroxyl aromatic compound such as phenol or its homologues and hexamethylenetetramine or an equivalent active methylene body.

phe'nol-sul-phon'ic (fē'nōl-sŭl-fŏn'ĭk), *a.* Also **-sul-fon'-ic.** [*phenol* + *sulphonic*.] *Org. Chem.* Designating, or pertaining to, any of three isomeric crystalline acids $HO.C_6H_4.SO_3H$. The ortho and para varieties are obtained directly, the meta variety indirectly, by the action of sulphuric acid on phenol. They are used in organic synthesis.

phe'no-sper'my (fē'nō-spûr'mĭ), *n.* [Gr. *φαίνεσθαι* to appear + *-sperm* + 1st *-y*.] The production, with or without pollination, of empty or abortive seeds.

phe'no-type (fē'nō-tīp), *n.* [Gr. *φαίνειν* to show + *-type*.] *Biol.* **a** The visible characters common to a group of organisms, as distinguished from their hereditary characters, which latter may be invisible or latent. **b** Hence, usually, a group of organisms alike in appearance, but of different hereditary constitution. — **phe'no-typ'ic** (-tĭp'ĭk), *a.* — **phe'no-typ'i-cal-ly**, *adv.*

Phi-la'the-a (fī-lā'thē-ä), *n.* [Gr. *φίλος* loving + *ἀλήθεια* truth.] An international, interdenominational organization of Bible classes of young women. Cf BARACA, above.

Phil'lips code (fĭl'ĭps). [After W. P. *Phillips*, inventor of the code.] A code of spelling for telegraphic messages, etc., which permits of great condensation. It is widely used for newspaper dispatches and the like.

Pho'li-o'ta (fō'lĭ-ō'tä), *n.* [NL., fr. Gr *φολίς* scale (with reference to its scaly top) + *οὖς, ὠτός*, the ear.] A genus of brown-spored agarics of Europe and North America containing upwards of 120 species, of which some grow on open ground, as in pastures, and some on decaying wood.

phone*, *n.* A telephone receiver, or one of a pair, used in radiotelephony. See RECEIVER, *n.*, 4 **d**, in the *Dict.*

phone*, *n.* A telephone receiver. *Colloq., U. S.*

phones (fōnz), *n. pl.* *Radio.* = HEADPHONES, above.

phos'pho-li'pin (fŏs'fō-lī'pĭn), *n.* [*phospho-* + *lipin*.] *Physiol. Chem.* Any of an important class of compounds which yield phosphoric acid and fatty acid on hydrolysis Typical ones also contain glycerol and an organic base, such as choline, in combination. As ordinarily prepared, phospholipins are light yellow or brown, waxy solids, though some have been crystallized. They are found in all cells and, with cholesterol, constitute most of the so-called fat of tissues. Lecithin is the best known phospholipin.

phot (fŏt; fōt), *n.* [Gr. *φῶς, φωτός*, light.] *Physics* The C. G. S. unit of illumination, equal to an illumination of one lumen per square centimeter. The practical unit, one milliphot (0.01 phot), is approximately one foot candle (which equals 1.0764 milliphots).

pho'to-com-bus'tion (fō'tō-kŏm-bŭs'chŭn), *n.* [*photo-* + *combustion*.] *Phys. Chem.* Combustion induced by the action of light.

pho'to-dra'ma (fō'tō-drä'mä; fō'tō-drä'mä), *n.* [*photo-* + *drama*.] A photoplay, esp. one based upon a tragic, melodramatic, or otherwise serious plot, and characterized by sustained action and, often, thrilling incident. — **pho'-to-dra-mat'ic** (-drä-măt'ĭk), *a.* — **-mat'ics** (-ĭks), *n.*

pho'to-dram'a-tist (fō'tō-drăm'ä-tĭst), *n.* A writer or composer of photodramas; photoplaywright.

pho'to—e-lec'tric cur'rent. *Physics.* An electric current carried by the ions given out as the result of photo-electric action.

pho'to—e-lec'tric ef-fect'. *Physics.* The effect of light falling upon metal surfaces causing them to give out electrons and become positively charged.

pho'to—e-lec'tron (-ē-lĕk'trŏn), *n.* [*photo-* + *electron*.] *Physics.* An electron emitted from the surface of a metal when the metal is illuminated. It is not held that photoelectrons differ from other electrons in any way, the term serving merely to indicate the mode of production.

pho-tol'y-sis (fō-tŏl'ĭ-sĭs), *n.* [NL.; *photo-* + *-lysis*.] Chemical decomposition by the action of light.

pho'to-play' (fō'tō-plā'), *n.* [*photo-* + *play*.] A play for representation or exhibition by moving pictures; also, the moving-picture representation of a play.

pho'to-play'er (-ĕr), *n.* A moving-picture actor or actress.

pho'to-play'wright' (-plā'rīt'), *n.* A person who composes photoplays.

pho'to-sen'si-tize (-sĕn'sĭ-tīz), *v. t.* [*photo-* + *sensitize*.] To render sensitive to light, esp. that of the longer wave lengths, *i. e.* the red, orange, and yellow rays. — **pho'to-sen'si-ti-za'tion** (-tĭ-zā'shŭn; -tī-zā'shŭn), *n.*

pho'to-sen'si-tiz'er (-tīz'ĕr), *n.* *Photog.* A substance capable of sensitizing the photographic plate to the red, orange, and yellow rays. See SPECTRUM, 2, in the *Dict.*

pho'to-stat (fō'tō-stăt), *n.* [*photo-* + Gr. *στατός* placed, fr. *ἱστάναι* to cause to stand.] A device, bearing the trademark *Photostat*, for making photographic copies of drawings, manuscripts, maps, records, etc., directly upon the surface of prepared paper with the image in correct position and not reversed as in a negative. Also, a photostatic copy so made. — **pho'to-stat**, *v. t.* — **pho'to-stat'ic** (-stăt'ĭk), *a.* — **pho'to-stat'i-cal-ly**, *adv.*

pho'to-syn'the-sis* (-sĭn'thē-sĭs), *n.* [*photo-* + *synthesis*.] *Chem.* Any synthesis of a chemical compound effected with the aid of light.

phu'goid os'cil-la'tion (fū'goid). [Gr. *φυγή* flight + *-oid*.] *Aeronautics.* A long-period oscillation characteristic of the disturbed longitudinal motion of an airplane.

phugoid theory. *Aëronautics.* The theory which deals with the longitudinal stability and the form and equations of the flight path of a glider.

physiological psychology. That branch of psychology which deals with the sense organs and the nervous system in their relation to mental processes.

phy'so-der'ma dis-ease' (fī'sō-dûr'mä). [NL.; *physo-* + Gr. *δέρμα* skin.] A disease of maize, or Indian corn, due to the fungus *Physoderma zeæ maydis*. It is widely distributed in the southern United States and elsewhere.

Phy-tom'o-nas (fī-tŏm'ō-năs), *n.* [NL.; *phyto-* + Gr. *μονάς* unit. See MONAD.] *Bact.* A genus of bacteria pathogenic to plants. They are motile or nonmotile yellow or white rods, the motile having polar flagella. *P. campestre* is the cause of black rot of cruciferous plants, *P. malvacearum* of angular leaf spot of cotton, *P. citri* of citrus canker, and *P. solanaceana* of brown rot of solanaceous plants.

phy-tos'ter-ol (fī-tŏs'tĕr-ōl; -ŏl), *n.* *Chem.* = PHYTOSTERIN, in the *Dictionary*.

phy'to-tox'in (fī'tō-tŏk'sĭn), *n.* Also **-ine.** [*phyto-* + *toxin*.] *Chem.* Any poisonous protein found in plants, as abrin and ricin. See TOXIN, **a**, in the *Dictionary*.

pi-blok'to (pĭ-blŏk'tō), *n* **a** A fatal form of rabies among Eskimo dogs. **b** A form of hysteria among Eskimos, characterized by depression and sometimes homicidal mania.

pick*, *v. t* — **to pick up***, to receive or get (as a sound, an electric wave, or a radio message) so that it may be distinguished.

pick*, *v. i.* — **to pick up**, to increase in speed, as an engine.

pic'ture*, *n.* Specif., a moving picture; *pl* (often with *the*), *Colloq.*, moving pictures or the business or art of making moving pictures; the "movies." Also used attributively; as, a *picture* palace

picture bride. A bride from Japan whose formal engagement followed an exchange of photographs with a Japanese bridegroom resident in America. After a marriage ceremony at her home, the groom being, of course, absent, the bride was permitted to enter the United States. Since 1920 Japan has refused to issue passports to picture brides.

pic'ture-drome (pĭk'tūr-drōm), *n.* A theater specially fitted or equipped for exhibition of moving pictures. *Brit.*

picture play. = PHOTOPLAY, above.

pic'tur-ize* (pĭk'tūr-īz); **-IZED** (-īzed); **-IZ'ING**, *v. t.* To make a picture or pictures of; esp, to represent by means of moving pictures; as, to *picturize* a novel. — **pic'tur-i-za'tion** (-ĭ-zā'shŭn; -ī-zā'shŭn), *n.*

pi'e-zo-chem'is-try (pī'ē-zō-kĕm'ĭs-trĭ), *n.* [Gr. *πιέζειν* to press + *chemistry*.] The science which deals with the effect of pressure on chemical phenomena.

pi'e-zo os'cil-la'tor (pī'ē-zō). [Gr. *πιέζειν* to press.] *Elec.* A combination of a quartz plate or other piece of piezo-electric material with electron-tube apparatus to form a generator of alternating current whose frequency is determined by the frequency of mechanical vibration of the piezo-electric material; — called also *piezo-electric oscillator*.

pi'e-zo res'o-na'tor. *Elec.* A quartz plate or other piece of piezo-electric material used in alternating-current circuits to produce certain effects by resonance of its mechanical frequency of vibration with the current frequency; — called also *piezo-electric resonator*.

pig'eon-eer' (pĭj'ŭn-ēr'), *n.* [See -EER.] A man who cares for and manages pigeons, esp. homing pigeons.

pike*, *n.* See HIGHWAY, above.

pill box*. A low cylindrical concrete-and-steel fortification or shelter, containing one or more machine guns, used to strengthen a defensive line. *Mil. Slang.*

pi'lot* (pī'lŭt), *n.* **1.** *Aëronautics.* One who flies, or is qualified to fly, a balloon, an airship, or an airplane. **2.** *Mining.* The relatively small heading or excavation first made in the driving of a larger tunnel.

pi'lot*, *v. t.* To fly or act as pilot of (an aircraft).

pi'lo-tax-it'ic (pī'lō-tăk-sĭt'ĭk), *a.* [Gr. *πῖλος* felt + *τάξις* arrangement.] *Petrog.* Having the form of, or characterized by, a rock structure composed of a felted mesh of slender plagioclase strips between which are inclosed the other constituent minerals in minute grains; as, a *pilotaxitic* groundmass. Pilotaxitic structure is commonly observed in finely crystallized andesites and basalts.

pilot balloon. *Aëronautics.* A small, unmanned balloon sent up to show the direction and speed of the wind.

Pilt'down man *or* **race** (pĭlt'doun'). *Ethnol.* A primitive man, or race of human beings (*Eoanthropus dawsoni*), named from Piltdown, Sussex, England, where parts of a skull were found, in 1911, in strata apparently of the early Pleistocene age. See PLEISTOCENE, in the *Dictionary*.

‖ **pi-mien'to** (pē-myĕn'tō), *n.*; *pl.* -TOS (-tōz). [Sp.] The Spanish sweet pepper, the fruit of which is used as a vegetable, to stuff olives, etc.

pin'a-cy'an-ol (pĭn'ä-sī'ăn-ōl; -ŏl), *n.* [Gr. *πίναξ, -ακος*, a tablet + *cyano-* + *-ol*.] An artificial blue dye derived from quinoline; — called also *sensitol red*. It is used as a photosensitizer.

pin'a-ver'dol (-vûr'dōl; -dŏl), *n.* [Gr. *πίναξ, -ακος*, a tablet + F. *verd* green + *-ol*.] An artificial green dye derived from quinoline; — called also *sensitol green*. It is used as a photosensitizer.

pinch hitter. A player who is sent in to bat in the place of another in a pinch, or emergency, as when a hit is particularly needed. — **pinch hit.** *Both Baseball Cant.*

pine'—shoot' moth. A small gayly colored tortricid moth (*Rhyacionia buoliana*) whose larva feeds in the young buds and shoots of pine, to which it is very injurious.

pink disease. *Agric.* A serious bark disease of rubber, cacao, coffee, and many other trees, caused by the fungus *Corticium salmonicolor*, producing a pink covering of hyphæ on the stems and branches.

pink rot. *Agric.* A destructive disease of the potato tuber caused by the parasitic fungus *Phytophthora erythroseptica*, producing a rapid decay characterized by a wet rot. Cut surfaces of tubers turn pink when exposed to air.

‖ **piou'piou'** (pyōō'pyōō'), *n.* [F.] An infantryman. *Slang.*

pip'—squeak' (pĭp'-skwēk'), *n.* A kind of small high-velocity shell used by the Germans in the World War, which made a sound in flight of which the words *pip* followed by *squeak* are suggestive. *Soldiers' Slang.*

pique* (pēk), *v. i.* *Aëronautics.* To dive vertically downward in an airplane. — *v. t.* *Aeronautics.* To charge at or attack in an airplane, as by diving downward at.

pit*, *v. t.* To remove the pit, or stone, from, as a cherry. *U.S.*

pitch*, *n.* *Aëronautics.* See 5th PITCH, *n.*, 11 **b**, in the *Dict.* — **aërodynamic pitch**, the distance that a propeller would have to advance in one revolution in order that the torque might be zero. — **effective pitch**, the distance an aircraft advances along its flight path for one revolution of the propeller. — **geometrical pitch**, the distance an element of a propeller would advance in one revolution if it were turning in a solid nut; that is, if it were moving along a helix of a slope equal to the angle between the chord of the element and a plane perpendicular to the propeller axis — **standard pitch**, or **pitch of a propeller**, usually, the geometrical pitch taken at two thirds of the radius. — **virtual pitch**, the distance a propeller would have to advance in one revolution so that there might be no thrust.

pi-tu'i-trin (pĭ-tū'ĭ-trĭn), *n.* *Biol. Chem.* A substance or extract from the pituitary body.

plain'-clothes' man (plān'klōthz'). A police detective or policeman who wears citizen's clothes while on duty.

Planck's constant (plăŋks). *Physics.* The proportionality factor h (= 6 547 x 10^{-27}) in the equation defining an elemental unit of energy, or quantum; — after Max Planck (1858–), a German physicist. See QUANTUM, below.

plane* (plān), *n.* **a** An airplane. *Colloq.* **b** One of the main supporting surfaces of an airplane or of a wing; — a use now discarded in scientific terminology, except in bi*plane*, tri*plane*, etc. Cf MAIN SUPPORTING SURFACE, above.

plane*, *v. i.* **a** Of a boat, to lift more or less out of the water while in motion, as a hydroplane does **b** = VOLPLANE, below. *Colloq* **c** To travel in an airplane. *Colloq.*

plan'o-some (plăn'ō-sōm), *n.* [Gr. *πλάνος* wandering + *-some.*] *Biol.* One of a group of supernumerary chromosomes, observed in the spermatogenesis of spiders, which divide independently of the heterochromosomes and are distributed irregularly and in unequal numbers to the germ cells. Cf. CETOSOME, above.

plan'sift'er (plăn'sĭf'tĕr), *n.* [Adap. fr. G. *plansichter* · *plan* plane + *sichter* sifter.] *Mach.* A kind of sorting machine used in manufacturing flour, Portland cement, etc., bearing the trade-mark *Plansifter*. It consists essentially of a set of superimposed flat sieves in a box.

plas'ma-phær'e-sis (plăz'mă-fĕr'ĕ-sĭs), *n.* [NL ; *plasma* + Gr. *αφαίρεσις* a taking away.] *Med.* Removal of blood plasma; act or operation of removing blood from the body by venesection, replacing the plasma by a saline solution, and reinjecting this together with the centrifugalized cells into the body.

plas'mon (plăz'mŏn), *n.* [Cf. PLASMA.] A flourlike food preparation made from skim milk, and consisting essentially of the unaltered protein of milk. A mixture of this with butter, water, and salt is called **plasmon butter**.

plas'to-some (plăs'tō-sōm), *n.* See MITOCHONDRIA, above

plate*, *n.* *Elec.* In an electron tube, the anode or electrode to which the electrons flow. It is usually a thin metal plate.

plate battery. *Elec.* = B BATTERY, above.

plate circuit. *Radio.* The electric circuit including the plate and filament of an electron tube.

plate current. *Radio.* The current flowing between filament and plate of an electron tube.

plate voltage. *Radio.* The voltage of a B battery.

plat'i-nite (plăt'ĭ-nīt), *n.* [*platinum* + *-ite*, 2 **a**.] *Metal.* A high-nickel steel (containing about 46 per cent of nickel) having practically the same amount of thermal expansion and contraction as platinum and ordinary glass, and hence useful as a substitute for platinum, for wire to be rolled into window glass to make it fire resisting, etc.

pla-toon'*, *n.* One of the major divisions of a platoon school.

platoon school. An elementary school organized in two major divisions, with a program of studies so arranged that the divisions alternate in using the two kinds of schoolrooms, as class and study rooms on the one hand, and shops, laboratories, auditorium, and gymnasium on the other, and thus utilize fully the physical resources of the school plant.

player piano. A piano containing within its case a mechanism (usually pneumatic and governed by a perforated strip of paper) by means of which the instrument may be played without manipulation of the keys; an automatic, or self-playing, piano: — called also *player*. Cf. PLAYER, *n.*, **h**, in *Dict.*

ple'iad* (plē'yăd), *n.* *Chem.* See ISOTOPE, above.

plei'o-bar (plī'ō-bar), *n.* [*pleio-* + Gr. *βάρος* weight] *Meteorol.* **a** An area of high barometric pressure. **b** An isobar of high pressure.

plei'on (plī'ŏn), *n.* [Gr. *πλείων* more, greater.] *Meteorol* A region of positive departure (increase) from the normal of any element, as pressure, temperature, rainfall, etc.

plei-o'ni-an (plī-ō'nĭ-ăn), *a.* Of, or pertaining to, a pleion

pli'o-tron (plī'ō-trŏn), *n.* [*plio-* + *-tron* as in *electron.*] *Elec.* A kind of electron tube, esp. one in which the vacuum is nearly perfect, bearing the trade-mark *Pliotron*.

plow, *or* plough, sole. *Agric.* A compacted layer of earth formed at the bottom of the furrow by the passage of the plow, especially when the plowing is done continually at the same depth; — called also *plow pan*.

pluck*, *v. t.* *Furriery.* To free (furs) from the overhair, as by pulling it out.

plum'cot (plŭm'kŏt), *n.* [*plum* + apri*cot*.] *Hort.* A cross between the plum and the apricot.

plu'ri-glan'du-lar (plōō'rĭ-glăn'-dū-lär), *a* [*pluri-* + *glandular.*] *Med.* Relating to several glands; as, **pluriglandular syndrome**, the syndrome, or group of symptoms, arising from simultaneous disorder in several glands.

plus*, *a.* Having something more; possessing in a greater degree the characteristics implied in the noun; superexcellent; as, truth *plus*, style *plus*; — used after the noun.

plus fours. A style of loose knickerbockers, very long and baggy at the knees, worn esp. in sports, as golf; — so called because four inches longer than ordinary knickerbockers.

ply'wood' (plī'wŏod'), *n.* A material, consisting of two or more layers of wood glued together, the grains of the layers, or plies, being usually at right angles to each other, but sometimes parallel.

P. M.* *Abbr.* Pacific Mail; Paymaster; Provost Marshal.

Po'a-le Zi'on (pō'ä-lĕ tsē'ŏn; *Eng.* zī'ŏn). [Hebr., lit., workmen of Zion.] The Jewish Socialist Labor party, which has branches in America, Russia, Austria, England, and Palestine. Its program emphasizes assistance to labor in Palestine and the development of that country as a Jewish Socialist commonwealth.

pock'et*, *n.* = AIR POCKET, above.

po-di'a-trist (pō-dī'ä-trĭst), *n.* A student of podiatry; one who cares for the feet in health and disease.

po-di'a-try (-trĭ), *n.* [Gr. *πούς, ποδός*, foot + *-iatry*] *Med.* The pathology and treatment of disorders of the foot.

po'go (pō'gō), *n.* [A trade name.] A stout stick or pole, like a single stilt, having a strong spring at the bottom and a step on each side on which a person stands and hops or jumps along by way of sport. — **po'go,** *v. i.*

pog'o-nip (pŏg'ō-nĭp), *n* [Shoshonean.] A dense winter fog containing frozen particles, formed in the deep valleys of the Sierra Nevadas. *Western U. S.*

‖ **poi'lu'** (pwa'lu'), *n.* [F., lit., hairy, fr. *poil* hair, L. *pilus*] A French private soldier; — orig. slang (prob. from the uncut hair and unshaved beards of many of those who had been at the front), but later the popular and international name for the French soldier.

pointed fox. *Furriery* The fur of the common red fox dyed to imitate the color of the silver fox (which see, in the *Dict.*) and having white hairs inserted by means of a needle

poi'ret' twill, *or* **poi'ret'** (pwä'rĕ'), *n.* A kind of fine woolen dress goods of a diagonal weave.

polar front, *n.* *Meteor.* The boundary between the cold air of a polar region and the warmer air of lower latitudes

police dog. A dog of wolflike appearance, several breeds of which have been developed in European countries from crosses between the domestic dog and the wolf and have been trained to assist the police and military forces.

po-lice'wom'an (pō-lēs'wŏŏm'ăn), *n* A woman who is a member of the police; a woman doing police duty.

Pol'ly-an'na (pŏl'ĭ-ăn'ä), *n.* A girl of sunny disposition and irrepressible optimism who finds good in everything, the heroine of stories by Mrs. John Lyman (Eleanor Hodgman) Porter (1868–1920); — often used attributively; as, *Pollyanna* optimism; *Pollyanna* philosophy.

pol'y-he'droid (pŏl'ĭ-hē'droid), *n.* [*poly-* + Gr. *ἕδρα* seat, base + *-oid*] See FOURTH DIMENSION, above.

polyphonic prose. A flexible, poetic form of expression, which, while printed as prose, embodies rhythm, rime, assonance, alliteration, etc., with many changes from one form to another.

The chief [principle of *polyphonic prose*] is an insistence on the absolute adequacy of the manner of a passage to the thought it embodies. *Amy Lowell.*

pol'y-to-nal'i-ty (pŏl'ĭ-tō-năl'ĭ-tĭ), *n.* [*poly-* + *tonality.*] *Music.* The simultaneous movement in different keys of several voices, parts, or streams of harmony; loosely, the effect produced by the simultaneous use of two or more keys. — **pol'y-to'ny** (pŏl'ĭ-tō'nĭ), *n.*

pom (pŏm). Short for POMERANIAN [dog]. *Colloq.*

po-ma'to (pō-mā'tō; -mă'tō), *n.*; *pl.* -TOES (-tōz). [*potato* + *tomato.*] A fragrant, succulent, tomatolike fruit produced by grafting tomato scions on potato plants. It is eaten raw as a salad, or cooked.

pon-toon'*, *n.* A float of an aircraft. See FLOAT, above.

pork*, *n.* Money, position, or the like, obtained from the government, usually the Federal government, as a result of political patronage, rather than as a due reward or as payment for merit or for services rendered. Cf. PORK BARREL. *U. S. Political Slang.*

pork barrel. A fund of money appropriated from the Federal treasury, as for improving rivers and harbors, erecting public buildings, etc., regarded as appropriated more for local patronage than to make needed improvements. *U. S. Political Slang.*

‖ **poste' de se-cours'** (pōst dĕ sĕ-kōōr'). [F., lit., aid station], A station, generally a dugout, near the front line of an army, where wounds are dressed and from which the wounded are sent to hospitals farther back.

post'im-pres'sion-ism (pōst'ĭm-prĕsh'ŭn-ĭz'm), *n. Art.* The theory or practice of certain recent artists in reaction against the scientific and naturalistic character of impressionism and neo-impressionism; strictly, in painting and sculpture, the effort at self-expression, rather than representation, shown in the work of Cézanne, Matisse, and others. Broadly, it includes: **cubism**, which attempts to depict a totality, that is, not only the physical contours of an object, but everything associated significantly with one's mental conception of it — frequently as a series of geometrical figures or interlocking, superimposed, and often transparent planes; and **futurism**, which attempts to place the observer within the picture and to represent simultaneously a number of consecutive movements and impressions. In music, futurism seeks self-expression in entirely original forms, and the establishment of relations between music and colors and odors. — **post'im-pres'sion-ist,** *n. & a.* — **post'im-pres'sion-is'tic,** *a.*

post-op'er-a-tive (pōst-ŏp'ĕr-ă-tĭv), *a. Surg.* Occurring after an operation.

post'war' (-wôr'), *a.* After the war, esp the World War.

potato wart. = WART DISEASE, below.

po-ten'ti-om'e-ter* (pō-tĕn'shĭ-ŏm'ē-tĕr), *n. Radio.* = VOLTAGE DIVIDER. *Cant.*

pot roasting. See BLAST ROASTING, above.

power amplifier. *Radio.* An amplifier, usually in a transmitting apparatus, capable of producing relatively large power.

power boat, *or* **pow'er-boat',** *n.* A boat propelled by an engine or motor, esp. one propelled by a gasoline engine; a motor boat.

power loading. *Aëronautics.* Of an aircraft, the weight per horse power, computed on a basis of full load and of power in air of standard density, unless otherwise stated.

power plant. **a** Any industrial plant used in generating power. **b** The assemblage of parts, including engine or engines, carburetion system, ignition apparatus, lubrication system, etc., that generates the motive power of a self-propelled vehicle or machine, as an automobile or aircraft.

power transformer. *Radio.* An electrical transformer used to furnish a substantial amount of electrical power; — distinguished from the *audio-frequency transformers* and *radio-frequency transformers* used in receiving sets.

power tube. *Elec.* An electron tube designed for use as a generator of alternating current.

præ-sid'i-um (prē-sĭd'ĭ-ŭm), *n.* Var. of PRESIDIUM, below.

pre-*. A prefix (see PRE-, in the *Dict.*) denoting *priority of time*, in the sense *prerequisite*; — used of a preparatory course of study; as, *predental*, *prelaw*, *premedical*.

pre-can'cel (prē-kăn'sĕl), *v. t.* [*pre-* + *cancel*] To cancel (postage stamps) in advance of use.

pre-con'scious (prē-kŏn'shŭs), *n. Psychoanalysis.* [With *the.*] That part of the unconscious which may be brought readily to consciousness and in which censorship is exercised; — called also *the foreconscious*. See CENSOR, above.

pre-cool' (prē-kōōl'), *v. t.* [*pre-* + *cool*] To cool beforehand; esp., to subject to a process by which the temperature of (fruit or the like) is reduced to a certain temperature before shipment. — **pre-cool'er** (-ĕr), *n.*

pre-dread'nought' (prē-drĕd'nôt'), *n. Naval.* The heaviest type of battleship carrying mixed-caliber batteries, preceding the dreadnought, or all-big-gun ship. See DREADNOUGHT, above.

preferential ballot. A ballot used in preferential voting.

preferential voting. *Political Science.* A system of voting, as at primaries or in municipal elections, in which the voters indicate their preference between two or more candidates for an office, so that if no candidate receives a majority of first choices the one receiving the greatest number of first and second choices together is nominated or elected.

pre-par'ed-ness* (prē-pâr'ĕd-nĕs; prē-pârd'-), *n.* State of being prepared; readiness; specif., a state of military and naval preparation for defense in case of possible hostilities.

pre'school', *n.* An institution where children of preschool age are assembled, mainly in age groups, for observation and social and educational training.

pre'school' (prē'skōōl'), *a.* [See PRE-] Of or pertaining to the period in a child's life preceding attendance at school, normally from infancy to the age of five.

pre-sid'i-um (prē-sĭd'ĭ-ŭm), *n.* Also **præ-sid'i-um.** [Cf L. *præsidium*, lit., a presiding over; hence, defense, aid] **a** [*sometimes cap*] In the government of the Russian Union of Socialist Soviet Republics, any one of a number of permanent administrative committees, meeting daily and acting with supreme power for a larger body in the intervals between its sessions. In the U. S. S. R. each of the two bodies of the *Union Central Executive Committee* (which see) elects its presidium of seven members and jointly the two bodies elect seven others, the group of 21 men serving as the presidium of the Union. The Central Executive Committee of each republic has its presidium. **b** A similar standing committee of any other organization, as of the Communist party. *Russian.*

pressure cooker. A cooker which can be tightly closed, so that, as a result of the tension of accumulated steam, the food is subjected to a temperature much higher than is possible in an open or loosely covered vessel.

pressure nozzle. *Aeronautics.* An apparatus which, in combination with a pressure gauge, is used to measure the pressure due to speed through the air. It is a combination of a Pitot tube or a Venturi tube with a tube to give static pressure, or of a Pitot tube and a Venturi tube.

pressure tube. **1.** *Chem.* A heavy test tube which, after the introduction of liquid reagents, is hermetically closed at the open end, so that interaction of the contents can be brought about at a much higher pressure than would be possible in an open tube.

2. *Physics.* A Bourdon tube (which see, above).

pre'ven-to'ri-um (prē'vĕn-tō'rĭ-ŭm), *n.*; *pl.* L. -RIA (-ä), E. -RIUMS (-ŭmz). [NL ; *prevent* + *-orium*] An establishment where persons, esp children, exposed to disease, as tuberculosis, receive prophylactic treatment.

pre'vo-ca'tion-al (prē'vō-kā'shŭn-ăl), *a. Pedagogy.* Pertaining to, or consisting in, instruction or work in manual training or the useful arts as it is given or required in the schools below the vocational schools.

pre-war' (-wôr'), *a.* Before the war, esp. the World War.

print*, *n.* = NEWSPRINT (which see, above)

Prix' Gon'court' (prē' gôN'kōōr'); *pl* PRIX GONCOURT. [F., Goncourt prize; see GONCOURT, Edmond and Jules, in the *Biog*] A prize of 5,000 francs awarded annually since 1903 by the French *Académie des Goncourt* for the most remarkable imaginative work (preferably a novel) composed during the year by a young French writer. The winner is known as the *Goncourt laureate*.

pro-ca'ine (prō-kā'ĭn; -ēn; -kăn'), *n.* [*pro-* + *cocaine*] *Pharm.* = NOVOCAINE, above.

prof'it-eer' (prŏf'ĭ-tēr'), *n.* [*profit* + *-eer.*] One who makes what is considered an unreasonable profit, as by taking advantage of a public or national need in time of war. — **prof'it-eer',** *v. i.* — **prof'it-eer'ing,** *n.*

pro-fla'vine (prō-flā'vĭn; -vēn), *n.* Also **-vin.** [Prob. *pro-*, 1 **b** + L. *flavus* yellow] *Pharm.* A reddish-brown, crystalline powder (diamino-acridinium acid sulphate, $C_{13}H_{12}N_3HSO_4.H_2O$), used as an antiseptic, esp. for wounds. Cf. ACRIFLAVINE, above.

Pro-gres'sive* (prō-grĕs'ĭv), *a. U. S. Politics.* Of or pertaining to the Progressive party. — *n.* A member of the Progressive party

Progressive party. *U. S. Politics.* The political party organized, chiefly out of the Republican party, by the adherents of Theodore Roosevelt in the presidential campaign of 1912. The name *Progressive party* was chosen at the meeting, held on August 7, 1912, when the candidates were nominated and the platform adopted. Among the chief articles in the platform were those demanding direct primaries, preferential primaries for presidential nominations, direct election of United States senators, female suffrage, and recall of judicial decisions in certain cases.

Pro-gres'siv-ism (prō-grĕs'ĭv-ĭz'm), *n. U. S. Politics.* The political doctrines advocated by the Progressive party.

Prohibition Enforcement Act. See VOLSTEAD ACT.

proj'ect*, *n.* *Education.* A task or problem, usually calling for constructive thought or action, or both, by the student, and involving the learning of a part or phase of school work; as, the *project* of illustrating "Hiawatha" from magazine material; — often used attributively; as, *project* method.

pro-jec'tion*, *n.* *Psychoanalysis.* The displacement upon external objects of unconscious wish fulfillments so that the ideas and affects belonging to these appear to arise in the external objects.

pro-jec'tion-ist (prō-jĕk'shŭn-ĭst), *n.* *Cartography.* One skilled in the process of making projections (see PROJECT, *v. t.*, 3, in the *Dict.*); — used esp of makers of world maps.

pro-jec'tor* (prō-jĕk'tĕr), *n.* An optical instrument for projecting a picture upon a screen, as a magic lantern or cinematograph, or an instrument for projecting (by reflection instead of transmission of light) a picture of an opaque object, as a photograph, picture post card, insect, etc., in the colors of the object itself. Various forms of projectors have been called specifically *radiopticon, mirrorscope, reflectoscope, balopticon*, etc.

pro-mo'tion-al (prō-mō'shŭn-ăl), *a.* Pertaining to promotion; as, *promotional* examinations.

proof'ing (prōōf'ĭng), *n.* [From PROOF, *a.*] *Aëronautics.* A preparation applied to fabric or incorporated in it at the time of manufacture to make it proof against weather or to prevent the passage of gas. Cf. DOPE, above.

prop'a-gan'dize (prŏp'ă-găn'dīz), *v. t.* To propagate or disseminate (as principles or ideas) by organized effort; to subject to a propaganda; as, to *propagandize* monarchical principles; to *propagandize* a country. — *v. i.* To carry on a propaganda.

propeller race. See SLIP STREAM, below.

pro-ra'tion (prō-rā'shŭn), *n.* The act or an instance of prorating.

pro'so (prō'sō), *n., or* **proso millet.** [Russ., Pol., Bohem., Serb *proso* millet] *Agric.* The common millet of the Old World, *Panicum miliaceum*, probably first introduced into the United States by Russian immigrants. Bread made from it is sometimes used for food, chiefly in eastern Europe. Called also, in America, *hog millet*, because of its frequent use as a hog feed, and *broom-corn millet*, from the shape of the head or panicle, which somewhat resembles that of the broom corn.

pro-tec'to-graph (prō-tĕk'tō-grăf), *n.* [*protecto-*, fr. L. *protectus*, p. p. + *-graph*] A machine, bearing the trademark *Protectograph*, which prevents alteration of the amount of a check or draft by grilling or roughening that part of the paper on which it prints the figures or the spelled-out amount.

pro-throm'bin (prō-thrŏm'bĭn), *n.* [*pro-*, 1 b + *thrombin.*] = THROMBOGEN, below.

pro'to-ac-tin'i-um (prō'tō-ăk-tĭn'ĭ-ŭm), *n.* [*proto-*, 2 + *actinium.*] *Chem.* A radioelement which by disintegration yields actinium. At. wt., 230.

pro'ton* (prō'tŏn), *n.* *Physics.* The positively charged nucleus of a hydrogen atom, complementary to its electron, and forming the smallest unit of positive electricity.

‖ **pro'vo'ca'teur'** (prō'vō'kà'tûr'), *n.* [F.] See AGENT PROVOCATEUR, above.

Prus'sian-ism (prŭsh'ăn-ĭz'm), *n.* Policy, practice, or behavior of, or like that of, the Prussians; esp., Prussian militarism with the ideals of conquest and despotism and the ruthless practices commonly ascribed to it; also, advocacy of Prussian aims, ideas, or the like.

pseu'do-ad'i-a-bat'ic (sū'dō-ăd'ĭ-ă-băt'ĭk), *a.* [*pseudo-* + *adiabatic*] *Meteorol.* Pertaining to or designating variations in volume or pressure not accompanied by gain of heat, but with that loss of heat, and no more, which is due to the immediate dropping out of all condensed material as soon as formed; — used with reference to the cooling of rising air in which precipitation occurs.

pso-ro'sis (sō-rō'sĭs; psō-), *n.* [NL., fr. Gr. *ψώρα* the itch + *-osis.*] *Agric.* A disease of citrus trees characterized by flaking and scaling of the bark.

psy'cha-nal'y-sis (sī'kă-năl'ĭ-sĭs; psī-), *n.* Same as PSYCHOANALYSIS, below. — **psy-chan'a-lyt'ic** (sī-kăn'ă-lĭt'ĭk; psī-), *a.* — **psy'cha-nal'y-sist** (-kă-năl'ĭ-sĭst), *n.*

psy'chas-then'ic (sī'kăs-thĕn'ĭk; psī'-), *a.* Pertaining to or affected with psychasthenia; suffering from a hysterical condition characterized by phobia, obsession, or persistent doubt. — *n.* One who is psychasthenic.

psy'che* (sī'kē; psī'kē), *n.* *Psychol.* The mental aspect of an individual, including all impulsive, emotional, and intellectual experience and activity; the mind.

psy'cho-a-nal'y-sis (sī'kō-ă-năl'ĭ-sĭs; psī'-), *n.* [*psycho-* + *analysis.*] **a** The method developed by Sigmund Freud, primarily as psychotherapy, for analyzing the content and mechanisms of the mental life. It consists in aiding the patient to discover his unconscious affects, especially through dream manifestations, and bring them to conscious discharge chiefly through transference of their force upon the physician. **b** The body of theories resulting from such analysis, including esp. the repression of desires or affects with resulting unconsciousness of them, the importance of the sexual life, including infantile sexuality, and the conflict between direction of libido to egotistic ends or other objects, resulting in morbid symptoms, substituted gratifications, or sublimation. — **psy'cho-an'a-lyt'ic** (-ăn'ă-lĭt'ĭk), *a.* — **psy'cho-an'a-lyt'i-cal-ly,** *adv.* — **psy'cho-a-nal'y-sist** (-ă-năl'ĭ-sĭst), *n.*

psy'cho-an'a-lyze, *or* **-lyse** (-ăn'ă-līz), *v. t.* To subject to psychoanalysis. — **psy'cho-an'a-lyz'er,** *or* **psy'cho-an'a-lys'er** (-līz'ĕr), *n.* — **psy'cho-an'a-lyst** (-lĭst), *n.*

psy'cho-gen'e-sis* (sī'kō-jĕn'ĕ-sĭs), *n.* Mental origin, as of a disease.

psy'cho-ki-ne'si-a (-kĭ-nē'sĭ-ă; -zhĭ-ă), *n.* [NL. See PSYCHO-; KINESIS.] *Psychol.* A fit of violent temporary insanity or maniacal action, due to defective inhibition.

psy'cho-ki-ne'sis (-kĭ-nē'sĭs), *n.* [NL.] = PSYCHOKINESIA.

psy-chol'o-gism* (sī-kŏl'ō-jĭz'm), *n.* An expression or term used in psychology.

psy-chom'e-ter* (-kŏm'ĕ-tĕr), *n.* A timing and measuring instrument used in psychometry (which see, in the *Dict.*).

psy-chom'e-try* (-trĭ), *n.* Divination of facts concerning an object or its owner through contact with, or proximity to, the object, the facts being otherwise unknown to the psychometrist. — **psy-chom'e-trist*** (-trĭst), *n.*

psy'cho-neu-ro'sis* (sī'kō-nū-rō'sĭs), *n.* *Med.* A reaction representing maladaptation to the conditions of life, which gives rise to a variety of manifestations due to the internal conflict (therefore psychogenic) and grouped under various clinical concepts (hysteria, compulsion neurosis, etc.); neurosis.

psy'cho-neu-rot'ic (-rŏt'ĭk), *a.* Of, pert. to, or affected with, psychoneurosis. — *n.* A psychoneurotic person.

psy'cho-pa-thol'o-gist (-pă-thŏl'ō-jĭst), *n.* One skilled in psychopathology; a student of psychopathology.

psy'cho-sex'u-al (sī'kō-sĕk'shû-ăl), *a.* [*psycho-* + *sexual.*] *Psychoanalysis.* Pertaining to the sexual life in its relation to psychical as well as physical development and activity. — **psy'cho-sex'u-al'i-ty** (-ăl'ĭ-tĭ), *n.*

psy-chot'ic (sī-kŏt'ĭk), *a.* [NL. See PSYCHO-; -OTIC] *Med.* Of or pert. to psychosis; caused by psychosis; affected by psychosis. — *n.* One morbidly affected by psychosis.

pub-lic'i-ty* (pŭb-lĭs'ĭ-tĭ), *n.* **a** Advertising of any kind. **b** Information with a news value, designed to advance the interests of a place, person, cause, or institution, usually appearing in public print; as, the *publicity* was carefully prepared for the campaign; — often used attributively; as, a *publicity* bureau, a *publicity* man. **c** Any action, or any matter spoken, written, or printed, which secures public attention. Also, the attention so gained.

public utility. See UTILITY, below.

Pu'litz-er priz'es (pū'lĭt-sĕr). A number of prizes in recognition of literary and newspaper work of outstanding merit and influence for public good, established by the will of Joseph Pulitzer (1847–1911), American newspaper publisher. The prizes are awarded annually for public service by a newspaper, for the best work of a reporter, and for the best and most wholesome novel, play, verse, editorial, cartoon, biography, and history of the year. The prizes were first awarded in 1918.

pul'mo'tor (pŭl'mō'tĕr), *n.* [L. *pulmo* lung + E. *motor.*] An apparatus for producing artificial respiration by pumping oxygen or air, or a mixture of the two, into and out of the lungs, as of a person who has been asphyxiated by drowning, breathing a poisonous gas, or the like, or of one who has been made unconscious by an electric shock.

pulp'stone' (pŭlp'stōn'), *n.* A massive grindstone used in the mechanical reduction of wood to pulp in paper making.

pulp'wood' (-wōōd'), *n.* Wood used for making wood pulp. See WOOD PULP, in the *Dictionary*.

punch*, *n.* Power to produce a striking effect; a vivid, forcible effect suggesting, figuratively, a blow; esp., the effect of a feature or climax of a dramatic performance or a piece of writing; as, a comic scene with a *punch;* a novel that lacks *punch*. *Slang, U. S.*

punk (pŭnk), *a.* Very poor; of little or no worth or merit. *Slang, U. S.*

pup'pet-eer' (pŭp'ĕt-ēr'), *n.* [*puppet* + *-eer.*] One who manipulates puppets, as in a puppet show.

pup'pet-ry*, *n.* The art of manipulating puppets, or marionettes, or of producing puppet shows.

pup tent. A shelter tent, or dog tent. See 4th TENT, *n.*, 1 (1), in the *Dictionary*. *Soldiers' Slang, U. S.*

pure'bred' (pūr'brĕd'), *a.* Bred from pure blood; of a breed kept pure for many generations; — with reference chiefly to live stock, sometimes to plants or seed.

Pure Food and Drug Act. An act, officially known as the **Federal Food and Drug Act**, passed June 30, 1906 (59th Congress), and in effect January 1, 1907. It prohibits the manufacture of misbranded or adulterated foods or drugs in the territories, and the interstate or foreign transportation of such articles

pure waves. *Radio.* Waves produced by a transmitting set which are substantially free from harmonics or any frequency except the fundamental.

push'ball' (pōōsh'bôl'), *n.* A game played by two sides numbering, usually, eleven each with a large inflated ball, six feet in diameter, the object being to push the ball toward the goals at opposite ends of the playing field, and then under or over the crossbar of the goal.

push'er*, *n.* An airplane, generally one with a single engine, having the propeller in the rear of the main supporting surfaces; — called in full *pusher airplane.*

push'—pull', *a.* *Elec.* Pertaining to a modification of parallel connection of two electrical devices such that at any instant current is in opposite directions in the two; as, *push-pull* connection of electron tubes.

puss'y-foot' (pŏŏs'ĭ-fōōt'), *v. i.* To tread or move softly, warily, or stealthily, as a cat, or "pussy," does; — sometimes with *it;* as, to *pussyfoot it.* Often used figuratively with reference to the carrying out of plans or measures stealthily or in such a way as to conceal one's real purpose or to avoid responsibility. — **puss'y-foot'ed,** *a.* — **-foot'er,** *n. & a.* — **-foot'ism** (-ĭz'm), *n. All Slang or Colloq.*

puss'y-foot', *a.* Of or pertaining to, or advocating, Prohibitionism; as, a *pussyfoot* candidate; — from the nickname *Pussyfoot* of Wm. E. Johnson (1862–), American Prohibitionist, given him before he began to campaign for prohibition. — **puss'y-foot',** *n. Both Slang or Colloq.*

puss'y-foot'er (-fōōt'ĕr), *n. Slang or Colloq.* **a** One who pussyfoots. **b** An advocate or adherent of Prohibitionism.

put*, *v. t.* — **to put over*,** to succeed in getting (something) done, generally with the implication of opposition. *Slang.*

‖ **Putsch** (pōōch), *n.* [G., fr. Swiss dialect.] A petty rebellion, or popular uprising.

py'lon* (pī'lŏn), *n.* *Aëronautics.* A post, tower, or the like, as on a flying ground, marking a prescribed course of flight. **b** A structure supporting the propeller on the side of a rigid airship, the propeller being driven by shafting and gearing.

py'ra-nom'e-ter (pī'ră-nŏm'ĕ-tĕr; pĭr'ă-), *n.* [*pyro-* + *ana-* + *-meter.*] *Physics.* An instrument for measuring radiation from the sky by comparing the heating effect of such radiation upon two blackened metallic strips with that produced in the same strips when heated by means of an electric current.

pyr'ge-om'e-ter (pĭr'jĕ-ŏm'ĕ-tĕr; pĭr'-), *n.* [*pyro-* + *geo-* + *-meter.*] *Physics.* An instrument for determining the radiation from the earth's surface into space. It is based upon the pyrheliometer of K. Ångström. The heat loss by radiation from blackened strips of manganin is replaced by heat electrically applied and electrically measured.

py'ro-nine*, *n.* Also **-nin.** By extension, any of several dyes of a structure related to the red dye pyronine (in *Dict.*).

py'ro-phor'ic al-loy' (pī'rō-fŏr'ĭk; pĭr'ō-). *Metal.* An alloy, as ferrocerium, having the property of emitting sparks when scratched or struck with steel. Such alloys are used for automatic gas and cigar lighters. See PYROPHORIC.

Q'—ship', *or* **Q'—boat',** *n.* [From the classificatory letter *Q* used for these ships by the British navy.] A mystery ship.

Q signals. *Radio.* Conventional code signals employed in radiotelegraphy, each being a combination of three letters, the first of which is Q; as, QRS = "Send slower"; QSC = "Your spacing is bad."

quad'ded (kwŏd'ĕd), *a.* *Teleg.* Made with four conductors; — used in *quadded cable. Cant.*

quad'ra-ture*, *n.* *Elec.* The state of having a phase difference of a quarter of a cycle; as, an alternating current flowing in a condenser is in *quadrature* with the alternating potential difference at its terminals.

quad'ru-plane' (kwŏd'rōō-plān'), *n.* [L. *quadru-* in comp. (see QUADRI-) + *plane.*] An airplane with four main supporting surfaces, one above another.

Quadruple Alliance*. In the World War: (1) the alliance between Germany, Austria-Hungary, Turkey, and Bulgaria; (2) between Great Britain, France, Russia, and Italy.

Quai' d'Or'say' (kā' dôr'sā'). [F., lit., quay of Orsay, a French general.] A quay on the south bank of the Seine in central Paris, fronting on which are the offices of the French Ministry of Foreign Affairs and other government departments; hence, figuratively, the French Foreign Office or its policies, or, sometimes, the French government or administration.

qual'i-ty*, *n.* *Radio.* In broadcasting, the degree to which sound is faithfully reproduced.

quan'tum* (kwŏn'tŭm), *n ; pl.* QUANTA (-tă). *Physics.* An elemental unit of energy according to the quantum theory, designated by the symbol E, and defined by the equation $E = h\nu$, in which h is Planck's constant (6.547×10^{-27}) and ν is the frequency of the radiating system.

quantum theory. *Physics.* The theory that radiation from a body is emitted only in discrete units (called *quanta*) and, according to some forms of the theory, that absorption occurs in the same discontinuous manner.

quar'an-tine* (kwŏr'ăn-tēn), *n.* A restraint or interdiction placed upon the transportation of animals, plants, or goods, suspected of being carriers of disease or other pest.

quartz plate. *Elec.* A piece of quartz crystal cut in such a way as to be active piezo-electrically; specif., such a plate mounted with metal electrodes applied to its surfaces, so that the combination is, or resembles, a condenser. Cf. PIEZO OSCILLATOR, PIEZO RESONATOR, above.

queen olive. [Cf. Sp. *aceituna de la Reina* olive of the Queen.] *Olive Trade.* Properly, a large, oblong olive with a small but long pit, grown in the region of Seville, Spain It is cured when green, keeps well, and has a delicate flavor. Loosely, any olive of similar character.

quenched gap. *Radio.* A kind of spark gap, used in radio sending apparatus, so designed as to extinguish the spark quickly after it starts, and thus to open the primary, or spark, circuit, leaving the secondary circuit free to produce free alternating current.

ques'tion-a-ry* (kwĕs'chŭn-ă-rĭ), *n. ; pl.* -ARIES (-ă-rĭz). = QUESTIONNAIRE, below.

ques'tion-naire' (kwĕs'chŭn-ăr'; *F.* kĕs'tyŏ'nâr'), *n.* [F.] A set of questions for submission to a number of persons in order to get information on a certain subject by bringing out resemblances and differences, or to secure statistics from which deductions may be drawn, as in a psychological investigation or for an industrial report.

race*, *n.* *Aëronautics.* Of a propeller, the slip stream. See SLIP STREAM, below.

race suicide. The gradual extinction of a race through the voluntary failure of its members to have a number of children sufficient to keep the birth rate equal to the death rate.

ra'da (ra'dä), *n.* [Little Russ. (Ukrainian) *rada*, fr. OHG. *rāt*, G. *rat* counsel, council.] [Often *cap.*] In Ukraine, any deliberative or legislative body for conducting the business of the state or of a division of the state; esp., in recent history, the Central Rada, a body established after the Russian revolution of 1917, and dissolved in April, 1918.

radial engine. *Mach.* An engine, usually an internal-combustion engine, having cylinders arranged radially like the spokes of a wheel. The *semiradial*, or *radiant, engine* has radiating cylinders on only one side of the crank shaft.

radiant engine. *Mach.* See RADIAL ENGINE, above.

ra'di-o (rā'dĭ-ō), *a.* **a** Of or pertaining to, employing, or operated by, radiant energy, specifically that of electric waves; hence, pertaining to, or employed in, radiotelegraphy or radiotelephony or other applications of radio waves. **b** Of or pertaining to electric currents or phenomena of frequencies between about 15,000 and $(10)^{11}$ per second. — *n.; pl.* -DIOS (-ōz). **a** Radiotelegraphy, radiotelephony, or other system employing radio waves. **b** A radio message; radiogram. *Colloq.* **c** A radio receiving set. *Colloq.* — *v. t. & i.;* RA'DI-OED (-ōd); RA'DI-O-ING. To send or communicate by radio; also, to send a radio message to (a person). *Colloq.*

ra'di-o-am'pli-fi'er (ra'dĭ-ō-ăm'plĭ-fī'ĕr), *n.* = AMPLIFIER, above.

radio beacon. A radio transmitting station which transmits special radio signals for use in determining the direction or position of those receiving them.

ra'di-o-broad'cast', *v. t.* = BROADCAST, above.

ra'di-o-cast' (rā'dĭ-ō-kăst'), *v. t. & i.; pret. & p. p.* RA'DIOCAST'; *p. pr. & vb. n.* -CAST'ING. = BROADCAST, above.

radio channel. = CHANNEL, above.

ra'di-o-chem'is-try (-ō-kĕm'ĭs-trĭ), *n.* [*radio-* + *chemistry.*] *Chem.* The chemistry of radioactive phenomena.

ra'di-o-chrom'e-ter (-krōm'ĕ-tĕr), *n.* [*radio-* + Gr. χρόα color + *-meter.*] *Physics.* A Benoist penetrometer. See PENETROMETER, above.

radio compass. *Radio.* A direction finder.

radio control. Control of mechanisms, other than signalling apparatus, at a distance by radio waves.

ra'di-o-de-tec'tor, *n.* = DETECTOR, above.

ra'di-o-dy-nam'ic (-dī-năm'ĭk), *a.* Of or pertaining to the phenomena due to the radiant energy of electric waves.

ra'di-o-dy-nam'ics (-dī-năm'ĭks), *n.* = RADIO CONTROL, above.

radio field intensity *or* **strength.** *Radio.* The electromagnetic field intensity, consisting of an electric and a magnetic field intensity, produced by a radio wave. It is commonly expressed in millivolts per meter or microvolts per meter of height of the antenna.

ra'di-o—fre'quen-cy (-frē'kwĕn-sĭ), *a.* Of or pertaining to a radio frequency or frequencies. Thus, *radio-frequency amplifier* or *radio-frequency stage* refers to an apparatus or part through which passes current of radio frequency.

radio—frequency amplification. See AMPLIFICATION, above.

ra'di-o-go'ni-om'e-ter (rā'dĭ-ō-gō'nĭ-ŏm'ĕ-tĕr), *n.* [*radio-* + *goniometer.*] *Radio.* A direction finder.

ra'di-o-gram'*, *n.* A message transmitted by radio.

radio link. A radiotelephone circuit connecting two sections of ordinary wire circuit.

ra'di-ol'o-gist (rā'dĭ-ŏl'ō-jĭst), *n.* One who practices or is versed in radiology.
ra'di-ol'o-gy*, *n.* The science or art of applying Röntgen, or X, rays, and the radiation from radioactive materials to the diagnosis and cure of disease.
radio noise strength. = NOISE FIELD INTENSITY, above.
ra'di-o-phare' (rā'dĭ-ō-fâr'), *n.* [*radio-* + *phare.*] A radiotelegraphic station serving solely for determining the position of ships. *Obsolete.*
ra'di-o-phone'*, *n.* *Radio.* **a** A transmitting set for radiotelephony. **b** A receiving set for radiotelephony. — **ra'di-o-phon'ic*** (-fŏn'ĭk), *a.*
ra'di-oph'o-ny*, *n.* Radiotelephony. *Rare.*
ra'di-o-pho-tog'ra-phy (-fō-tŏg'rā-fĭ), *n.* Transmission of photographs by radio.
ra'di-op'ti-con (-ŏp'tĭ-kŏn), *n.* [*radio-* + stereo*pticon*] A form of projector (see PROJECTOR, above) bearing the trade-mark *Radiopticon.*
ra'di-o-scope' (rā'dĭ-ō-skōp'), *n.* [*radio-* + *-scope.*] A device for detecting the presence of a radioactive substance.
radio set. **a** A radio receiving set. **b** A radio transmitting set.
ra'di-o-tel'e-graph'ic* (-tĕl'ē-grăf'ĭk), *a.* Of or pert. to, using, or used in, radiotelegraphy.
ra'di-o-te-leg'ra-phy* (-tē-lĕg'rā-fĭ), *n.* [*radio-* + *telegraphy.*] Telegraphy using the radiant energy of electrical waves; wireless telegraphy.
ra'di-o-tel'e-phone* (-tĕl'ē-fōn), *n.* = RADIOPHONE, above.
ra'di-o-tel'e-phon'ic (-tĕl'ē-fŏn'ĭk), *a.* Of or pertaining to the radiotelephone or radiotelephony; radiophonic.
ra'di-o-ther'a-peu'tics (-thĕr'ā-pū'tĭks), *n.* [*radio-* + *therapeutics*] Radiotherapy. — **ra'di-o-ther'a-peu'tic,** *a.*
ra'di-o-tri'cian (-trĭsh'ăn), *n.* [*radio-* + electri*cian.*] An electrician specializing in radio work. *Cant.*
ra'di-o-tron (rā'dĭ-ō-trŏn), *n.* [*radio-* + *-tron* as in electron.] *Elec.* An electron tube bearing the trade-mark *Radiotron.*
radio tube. = ELECTRON TUBE, above.
ra'di-o-vi'sion (-vĭzh'ăn), *n.* Transmission of motion pictures by radio, making motion at the transmitting station visible at the receiving station.
radium G. *Chem.* The end product of radium disintegration. It is an isotope of lead, of at. wt. 206. Cf. RADIUM, in the *Dict.*
ra'don (rā'dŏn), *n.* [radium + *-on,* as in *argon, neon,* etc.] *Chem.* A heavy, colorless, gaseous element resembling argon; radium emanation. See RADIUM, in *Dict.* Symbol, *Rn;* atomic number, 86; at. wt., 222. Formerly called *niton.*
R. A. F. *Abbr.* Royal Air Force.
‖ **ra'fale'** (rà'fàl'), *n.* [F., lit., a gust, a squall.] *Mil.* A burst of artillery fire consisting of several rounds, discharged as rapidly as possible, from each gun of a battery.
rag*, *v. t.* **1.** *Music.* To play or compose (a piece, melody, etc.) in syncopated time. *Colloq.*
2. To dance to ragtime music; — often used with an implication of indecorum. *Colloq. or Slang.*
rail'head'*, *n.* *Mil.* A point on a railroad, as near the front as possible, which serves as a base of supplies.
Rainbow Division. The 42d division of the United States National Army in the World War; — so called, as a nickname, because it was composed of National Guard units from various parts of the United States.
rake*, *n.* *Aëronautics.* The cutting away of the wing tip of an airplane at an angle so that the main supporting surfaces, seen from above, will appear of trapezoidal form. The amount of rake is measured by the angle between the straight portion of the wing-tip outline and the plane of symmetry. The rake is positive when the trailing edge is longer than the leading edge. — **rake***, *v. t.*
rank*, *v. t.* To place (vehicles, esp. motor vehicles) one behind the other, parallel to the curb. *Rare.*
rasp'ber-ry* (răz'bĕr-ĭ; răz'-), *n.* A sharp, hostile comment; a harsh or censorious rebuke. *Slang, U. S.*
rate of climb. *Aëronautics.* **a** In tests, the vertical component of the air speed of an aircraft in a standard atmosphere. **b** In general flying, the rate of ascent from the earth's surface.
rat'ing* (rāt'ĭng), *n.* An enlisted man in the British navy.
ra'tion-al-ize* (răsh'ŭn-dl-īz), *v. t.* *Psychol.* To justify or conceal the affective cause or motive by a reason, accepted by consciousness, which is not in accord with the actual (unconscious) determining facts.
ray'on*, *n.* A glossy fiber, resembling silk, made by forcing cellulose through minute holes and drying the filaments in air or chemicals; also, a fabric woven from this material.
razz (răz), *n.* = RASPBERRY, above. *Slang, U. S.*
razz, *v. t.* To rebuke harshly or censoriously. *Slang, U. S.*
Rd. *Abbr. Chem.* [no period, *Rd*]. Radium.
reactance coil*. *Elec.* = INDUCTOR, in the *Dict.*
re-ac'tion-a-ry-ism (rē-ăk'shŭn-ă-rĭ-ĭz'm), *n.* = REACTIONISM, in the *Dictionary*
reactive component. *Elec.* The component of an alternating current that is in quadrature with the electromotive force. Cf. ACTIVE COMPONENT, above.
re-ac'tor*, *n.* *Elec.* = INDUCTOR, in the *Dict.*
‖ **Re-al'po'li-tik'** (rā-äl'pō'lē-tēk'), *n.* [G.] Practical politics. — **Re-al'po-li'ti-ker** (-pō-lē'tē-kĕr), *n. sing. & pl.*
re'al-tor (rē'ăl-tŏr), *n.* [Cf. 2d REALTY.] A real-estate broker who is a member of a local board having membership in the National Association of Real Estate Boards, an organization, incorporated in 1908, for the advancement of the interests of real-estate brokers and the protection of the public from unprincipled agents or brokers. *Cant.*
re-broad'cast' (rē-brôd'kăst'), *v. t. & i.* [See RE-, 2.] *Radio.* To broadcast (signals, programs, or other material) while receiving the same from another source.
re-call'*, *n.* *Political Science.* **a** The right or procedure by which a public official, commonly a legislative or executive official, may be removed from office, before the end of his term of office, by a vote of the people to be taken on the filing of a petition signed by the required number of qualified voters. **b** Short for **recall of judicial decisions,** the right or procedure by which court decisions may be directly reversed or annulled by popular vote, as was advocated, in 1912, in the platform of the Progressive party for certain cases involving the police power of a State.
re-ceive'*, *v. i.* *Radio.* To convert incoming radio waves into perceptible signals.
re-ceiv'er*, *n.* *Radio.* **a** A receiving set. **b** A receiving station. **c** A person operating a receiving station.
receiving set. *Radio.* A set of apparatus for receiving radio signals; specif., the portion of a complete receiving station which receives a radio-frequency current from the antenna and converts it into an audio-frequency current which is then made audible by the telephone receiver. It includes tuner and detector and may include an amplifier.
receiving station. *Radio.* An assemblage of equipment to receive radio waves, including an antenna, receiving set, and telephone receiver.
re-cep'tion*, *n.* *Radio.* Act or process of receiving.
re-cep'tor* (rē-sĕp'tŏr), *n.* *Anat.* Any physical structure that receives sensory stimuli.
re'con-di'tion (rē'kŏn-dish'ŭn), *v. t.* To restore (something worn) to sound condition by readjustments and replacement of parts; as, a *reconditioned* automobile.
rec'ti-fi'er*, *n.* *Radio.* = DETECTOR, above.
red*, *a.* [*cap.*] Revolutionary or anarchistic; esp., practicing or favoring revolutionary socialism. See RED, *n.*, 4 **b,** in the *Dict. Cant.*
Red Army, in Russia, the army of the revolutionaries, represented by the Bolsheviki, or Communist party. Hence, also, any of similar armed radical forces in Germany, Hungary, Finland, etc. — **Red Guard,** in Russia, Hungary, Finland, etc., the Red Army; esp., the forces of the revolutionary party, as contrasted with the *White Guard* (which see, below). — **Red International.** See INTERNATIONAL, *n.,* **I** and **II,** above — **Red Terror.** See TERROR, below
red'-light' dis'trict. A district in which disorderly resorts are frequent; — so called in allusion to the red light in front of many such resorts.
re-dress'*, *v. t.* *Aëronautics.* To restore (an airplane) to normal flying attitude; to flatten out.
Red Star. An international organization for the succor of animals. It originated in Switzerland and has engaged in campaigning against the neglect and abuse of live stock, and against bullfighting, cruel methods of trapping, etc.
red'tab' (rĕd'tăb'), *n.* An officer wearing a red tab on his uniform, as in the British army, the staff officers of which wear a bright red tab on either side of the collar. *Slang.*
reel*, *n.* A spool on which a photographic film is wound; hence, a strip of moving-picture film, usually 1,000 feet in length (**full reel**), wound on a spool. A **split reel** is a full reel devoted to two (or more) separate short plays, which may be of the same length or of different lengths.
reference frame. *Math.* = FRAME OF REFERENCE, above.
re-flec'to-scope (rē-flĕk'tō-skōp), *n.* See PROJECTOR, above.
re'flex*, *a.* *Radio.* Of or pertaining to a type (of receiving set) with an amplifier tube or tubes functioning simultaneously as both a radio-frequency and an audio-frequency amplifier. The current is led through a tube or tubes both before and after detection. When two or more tubes are thus used, the opposite order of use of the tubes for radio and audio amplification is called *inverse reflex.*
re-gen'er-a-tive*, *a.* *Elec.* Pertaining to a method of amplification with electron tubes in which a part of the power in the output circuit acts upon the input circuit, thereby increasing the amplification. — **re-gen'er-a'tion***, *n.*
reg'is-ter* (rĕj'ĭs-tĕr), *v. t.* To record photographically; hence, *Moving Pictures,* of an actor, to show, as an emotion, by facial expression, bodily movement, etc.; also, to indicate, in a similar manner, consciousness of, or emotional response to (a sound or circumstance).
re-gres'sion*, *n.* **1.** *Biol.* The correlation between parents and offspring when used as a measure of inheritance.
2. *Psychoanalysis.* The return of the libido, upon encountering difficulties, to earlier stages of development or to infantile objects of attachment. Cf. FIXATION, above.
‖ **Reich** (rīk), *n.* [G.] **a** Formerly, the German Empire (1871–1919). **b** Since 1919, Germany, a federated republic.
Reich'en-bach phenomena (rīk'ĕn-bak). See OD, in *Dict.*
‖ **Reichs'mark'** (rīks'mark'), *n.* [G.] **a** =1st MARK, 2 **b,** in the *Dict.* **b** The monetary unit of Germany (Deutsches *Reich*), the republic, equal at par to 23.8 cents.
‖ **Reichs'wehr'** (rīks'vār'), *n.* [G.] A military force organized in Germany in 1919 out of voluntary units for the defense of the realm. At first it numbered 500,000, but by 1921 it had been reduced to 100,000, the number allowed by the Treaty of Versailles for the German army.
re'in-ject' (rē'ĭn-jĕkt'), *v. t.* To inject again.
re-jec'tor*, *n.* *Radio.* A combination of capacity and inductance which permits ready reception of all frequencies except those close to a particular one. Cf. ACCEPTOR, FILTER, above, and WAVE TRAP, below.
relative wind. *Aeronautics.* The motion of the air with reference to a moving body. Its direction and velocity are found by adding two vectors, one being the velocity of the air with reference to the earth, the other being equal and opposite to the velocity of the body with reference to the earth.
rel'a-tiv-ist* (rĕl'ā-tĭv-ĭst), *n.* A believer in relativity.
rel'a-tiv'i-ty (-tĭv'ĭ-tĭ), *n.* *Physics.* A principle or doctrine based on the postulate that our knowledge of velocity is necessarily and fundamentally relative, and leading to certain conclusions at variance with previously accepted principles of mechanics, as that: (1) the velocity of light is independent of the relative velocity of the source and of the observer; (2) the velocity of light is a maximum, which the velocity of a material body can never reach; (3) the mass of a body depends on its velocity. Often called *Einstein theory,* from Albert Einstein, who developed it.
relay broadcast. *Radio.* = REBROADCAST, above.
re-lease'*, *v. t.* To permit, at a specified date, but not before, the public performance, exhibition, publication, or sale of (as a copyrighted play, photoplay, newspaper feature, phonograph record, or the like, which has been previously distributed). — *n.* **a** A play, record, or the like, that has been designated for release. **b** A releasing, as of a play, record, or the like; as, "For *release* Monday."
Re-nault' tank (rē-nō'). See WHIPPET, below.
‖ **Ren'ten-mark'** (rĕn'tĕn-mark'), *n.* [G.] Any note for one gold mark issued by the German **Rentenbank** (established 1923) and secured by mortgages on German industries and landed property. In 1924 the new Imperial Bank of Germany assumed the obligations of the Rentenbank, and undertook the withdrawal of Rentenmarks.
re-pressed' (rē-prĕst'), *a.* *Psychoanalysis.* Affected by psychoanalytic repression.
re-pres'sion* (rē-prĕsh'ŭn), *n.* *Psychoanalysis.* A process whereby impulses that are in opposition to one's ethical and æsthetic ideals are forced into the unconscious.
reserve bank. Any of the twelve banks organized under the Federal Reserve Act of 1913 to serve as banks of reserve and rediscount for member banks of the system in their Federal Reserve district; also, any bank designated by a State Banking Department to serve in a similar capacity for banks not members of the Federal Reserve System. See FEDERAL RESERVE SYSTEM, above.
re-sist'ance*, *n.* *Psychoanalysis.* The opposition of the censorship to the practitioner's analysis, esp. as shown in unconscious reticence or in transference.
resistance coupling. *Radio.* = RESISTIVE COUPLING, under COUPLING, above.
resistance derivatives. *Aëronautics.* Quantities expressing the variation of the forces and moments on aircraft due to disturbance of steady motion.
re-sis'tive*, *a.* *Elec.* Pertaining to resistance. — **resistive coupling.** See COUPLING, above.
res'o-nance*, *n.* *Elec.* The state of adjustment of an electric circuit permitting a maximum flow of current when an electromotive force of a particular frequency is impressed.
resonance coil antenna. = RESONANCE WAVE COIL, below.
resonance spectrum. *Physics.* A fluorescence spectrum of the type, observed in the case of certain vapors, in which the emitted light is identical in wave length with the light by which the fluorescence is excited.
resonance wave coil. *Radio.* A long coil used as an antenna, wound in the form of a helix, usually with provision for tuning to resonance by sliding a contact along the coil.
re-treat'*, *v. i.* *Aeronautics.* To slope backward; — said of a plane, wing tip, etc. — *n.* *Aeronautics.* The extent to which a plane, wing tip, or the like, retreats.
return game, return match. A second game or match played by the same contestants, in order to give the losers of the first a chance to recoup their loss.
Reu'ter's News Agency (roi'tĕrz). A news agency founded at London, England, about 1851, by Baron Paul J. von Reuter (1821–1899). Hence, **Reuter message, telegram,** etc.
‖ **re-vanche'** (rē-vansh'), *n.* [F. Cf. REVENGE, *v. t.*] Revenge; retaliation; return; return game.
reverse turn. *Aviation.* A rapid maneuver to reverse the direction of flight of an airplane, performed by making a half loop and half roll.
revolving fund. A contingent fund created by the government from which loans may be made for some specific period and purpose, as for the purchase of wheat, or to meet the deficiencies of the railroads; — so called because the fund "revolves," or completes in the course of time the circuit between loans and repayments. *U. S.*
revs. *Abbr. Mech.* Revolutions; that is, R. P. M., in *Dict.*
‖ **re-vue'** (rē-vū'; *Angl.* rē-vū'), *n.* [F.] A kind of burlesque or musical comedy in which recent events, esp. plays of the past year, are reviewed by imitations of their salient features and chief actors.
R. F., *or* **r. f.** *Abbr.* Radio frequency.
R. F. C. *Abbr.* Royal Flying Corps.
rhi'a (rē'ă), *n.* *Bot.* Var. of RHEA, in the *Dict.*
Rhodes grass (rōdz). [After Cecil J. *Rhodes.*] *Bot.* A perennial grass (*Chloris gayana*) native to South Africa, cultivated as a forage grass, esp. in dry regions.
Rhodes scholarship. Any of a large number of scholarships, each tenable for three years, founded at Oxford University, England, under the will of Cecil J. Rhodes, 90 being open to candidates from certain British dominions and colonies, 96 to candidates from the United States (2 to each State), and, formerly, 15 to students of Germany. Hence, **Rhodes scholar.**
rib*, *n.* *Aëronautics.* In the wing of an airplane, any of several light fore-and-aft members that support the fabric covering and determine the form of the wing section.
rig*, *v. t.* *Aëronautics.* To assemble, adjust, or align (the parts of an airplane); to attach or adjust (the car, rudder, valves, controls, etc., of an airship).
rig'ger* (rĭg'ẽr), *n.* **1.** *Painting.* A long, slender, and pointed sable brush; — said to be so called from its use by marine painters for drawing the lines of the rigging.
2. *Aeronautics.* One employed in assembling and aligning aircraft.
Ri'ghi ef-fect' (rē'gē). *Physics.* See LEDUC EFFECT, above.
righting moment, *or* **restoring moment.** *Aëronautics.* A moment which tends to restore an aircraft to its previous attitude after any small rotational displacement.
right of way*. The customary or legal right of traffic to take precedence over any other traffic, as from a certain direction. Usually, in the United States, street or road traffic has precedence over all intercepting traffic except that approaching on the right-hand side, and over all following traffic.
right wing. *Political Cant.* The conservative, or, in Europe, often, the monarchist, element in a political party, legislature, etc. Cf. RIGHT, *n.,* 3 **b.** — **right'-wing'er,** *n.*
rig'id* (rĭj'ĭd), *a.* *Aëronautics.* Of an airship, having the gas containers inclosed within compartments of a rigid, fabric-covered framework, or hull, as of metal or metal and wood, which carries the cabins, gondolas, motors, etc., as in the Zeppelin. Cf. AIRSHIP, above.
rigs'maal' (rĭgz'mäl'; rĭks'-), *n.* Also **riks'maal'.** See LANDSMAAL, above.
Riks'dag' (rĭks'dàg'), *n.* [Sw Cf. REICHSTAG.] **a** The Swedish legislature, or parliament; — called specifically *Diet* in English. **b** The legislature, or parliament, of the Republic of Finland (since 1919).
rime*, *n.* *Meteorol.* An accumulation of granular ice tufts on the windward sides of exposed objects, slightly resembling hoarfrost (which see, above), but formed only from undercooled fog or cloud and always built out directly against the wind. The international symbol for rime is the figure **V.**
ring'hals' (rĭng'hàls'), *n., or* **ring'hals' co'bra.** [S. Afr. D., fr. D. *ring* ring + *hals* neck. See HALS.] *Zoöl.* The spitting snake, which see, under SPITTING, in the *Dict.*
rip panel. *Aëronautics.* A strip in the upper part of the fabric of a balloon or semirigid or nonrigid airship, which is torn off when immediate deflation is desired.
ripping cord. *Aëronautics.* = RIP CORD, in the *Dict.*
ripping panel *or* **strip.** *Aëronautics.* A rip panel.
Ro (rō), *n.* An artificial language, intended to be universal, devised by Rev. Edward P. Foster, of Marietta, Ohio, about 1906. Ro rejects all existing word roots and is based "on the analysis and classification of ideas." — **Ro'ist,** *n.*

road*, *n.* See HIGHWAY, above.
ro'bot (rō'bŏt), *n.* In Karel Capek's play "R.U.R." (Rossum's Universal Robots), one of a large number of artificially manufactured persons, mechanically efficient, but devoid of sensibility; hence, a brutal, efficient, insensitive person; an automaton.
Rocky Mountain spotted fever. *Med.* An acute infection marked by arthritis, muscular pains, constipation, fever, and eruption of livid spots. It is transmitted to man by the bite of a certain wood tick.
ro'de-o* (rō'dĕ-ō; *Sp.* rō-dā'ō; 146), *n.* **a** A place where cattle are collected, esp. a market place. **b** An entertainment or public performance presenting the chief features of a round-up, as lariat throwing, horse breaking, etc.
Roent'gen-ol'o-gist *or, often,* **roent'gen-ol'o-gist** (rŭnt'gĕn-ŏl'ō-jĭst; rĕnt'-), *n.* = RÖNTGENOLOGIST, below.
roll'er*, *n.* A canary having a special rolling or trilling type of song. Rollers are produced by selective breeding and training with expert songsters.
rolling kitchen. *Mil.* A large metal vessel, mounted on two wheels, under which fires can be maintained while in transit so as to keep the soup or other food hot to be served to troops while on the march; — popularly called *soup kitchen.* It was first used by the German army.
roll'mop' (rōl'mŏp'), *n.* A salted herring freshened by placing in fresh water, then cut open, cleaned, and boned, and the inside filled with pepper, sliced onion, and salted cucumber, after which it is rolled up and skewered.
Roman cheese. A kind of hard Italian cheese, somewhat similar to Parmesan cheese, but made of the milk of ewes.
ron'ga-lite (rŏng'gă-līt), *n.* See SODIUM HYPOSULPHITE, below. ☞ *Rongalite* is a trade-mark name.
Rönt'gen-o-gram' *or, often,* **rönt'gen-o-gram'** (rŭnt'gĕn-ō-grăm'; rĕnt-), *n.* [See -GRAM.] A photograph made with Röntgen rays.
Rönt'gen-o-graph' *or, often,* **rönt'gen-o-graph'** (-grăf'), *n.* A Röntgenogram. — **rönt'gen-og'ra-phy** (-ŏg'rà-fĭ), *n.*
Rönt'gen-ol'o-gist *or, often,* **rönt'gen-ol'o-gist** (rŭnt'gĕn-ŏl'ō-jĭst; rĕnt'-), *n.* A specialist in the theory and use of Röntgen, or X, rays. — **Rönt'gen-ol'o-gy,** *or* **rönt'-** (-jĭ), *n.*
Ros'a-lie* (rŏz'ă-lĭ; *F.* rō'zà'lē'), *n.* [F. & G., fr. L. *rosa* rose.] **1.** Feminine proper name.
2. [From the name *Rosalve.*] A bayonet; — first used in a song (1914) by Théodore Botrel. *Soldiers' Slang.*
Ro-ta'ri-an (rō-tā'rĭ-ăn), *n.* A member of any of a large number of clubs (**Rotary Clubs**) having the same constitution and affiliated under an International Association of Rotary Clubs (**Rotary International**). The Rotary Clubs, which exist in many countries, have as their motto or slogan, "Service." — **Ro-ta'ri-an-ism** (-ĭz'm), *n.*
rotary engine*. A kind of radial engine (which see, above) in which the radially arranged cylinders rotate around a fixed crank shaft.
rotary gap. *Radio.* A kind of spark gap in which one of the electrodes is a rotating element, causing a regular change in gap length and thereby timing the condenser discharge.
R.O.T.C. *Abbr.* Reserve Officers' Training Corps, or Camp
‖ **rō'tis'se-rie'** (rō'tē's'-rē'), *n.* [F., fr. *rôtir.* Cf. ROAST.] A cookshop where roast meats are prepared or sold; also, in the United States [usually *rotisserie*], a restaurant or grill-room where patrons may select meats, have them roasted within their view, and then served to them.
ro'to-graph (rō'tō-grăf), *n.* [L. *rota* wheel + *-graph. Oxf. E. D.*] **a** A photograph printed by a process in which a strip or roll of sensitized paper is automatically fed over the negative so that a series of prints is made. **b** A photographic print, as of a manuscript, book, or the like, made directly on bromide paper by the use of a reversing prism, without a negative. Letters or lines appear white on a black background — *v. t.* To make a rotograph.
ro'to-gra-vure' (-grà-vūr'; -grā'vûr), *n.* [L. *rota* wheel + *gravure.* See ROTARY.] A process of photogravure in which etched cylindrical plates, affixed to the rollers of a rotary machine, print illustrations and text; hence, an illustration so printed. See PHOTOGRAVURE, in the *Dict.*
rotor ship. A ship propelled by the pressure and suction of the wind acting on one or more revolving vertical cylinders. A vertical cylinder, with a height about five times the diameter, and mounted on a standard, is revolved by a small engine at a circumferential speed of about 3½ times the velocity of the wind. The effect is pressure on the side moving toward the wind, and suction on that moving from the wind. The pressure and suction may give the ship a speed of as much as 9 miles an hour.
rough'neck' (rŭf'nĕk'), *n.* One who is rough or uncouth, esp. in manners; a boor; also, a rowdy; tough. *Slang.*
round*, *a.* Issued or good for a round trip; — said of a railway ticket or the like. *Australia.*
Royal Air Force. *Brit.* An organization for defense in the air, formed in April, 1918, by amalgamation of the *Royal Naval Air Service* and the *Royal Flying Corps.* It is represented in the government by the *Air Ministry,* formed in January, 1918. The control of the Royal Air Force is vested in an *Air Council,* presided over by the Secretary of State for Air (Air Minister).
Royal Flying Corps. *Brit.* An organization formed in 1912 under the administration of the War Office; it was later amalgamated with the Royal Naval Air Service (see ROYAL AIR FORCE, above).
R.S.F.S.R. [*also, without periods,* **RSFSR**] *Abbr.* Russian Socialist Federal Soviet Republic.
rub'ber-stamp', *v. t.* **a** To sign with a rubber stamp. **b** Hence, fig., to approve, indorse, or dispose of (as a document or policy) as a matter of routine, usually without the exercise of one's judgment. *Colloq., U. S.*
ruck'sack' (rŭk'săk'; *G.* rŏŏk'zàk'), *n.* [G.] A kind of flexible knapsack or pack bag made of canvas or like material, and carried on the back, passing over the shoulders.
rud'der*, *n.* In an aircraft, a hinged or pivoted surface, usually attached at the rear end, serving to control its direction of flight by impressing yawing moments on the craft.
rudder bar. In an aircraft, the foot bar by means of which the central cables leading to the rudder are operated.
rudder torque. The twisting effect exerted by the rudder of an aircraft on the fuselage, due to the relative displacement of the center of pressure of the rudder.
rum row. A fleet or line of vessels stationed along the United States coast, as near New York City, carrying supplies of alcoholic liquor for sale. *Cant, U. S.*
rum'run'ner (rŭm'rŭn'ĕr), *n.* One engaged in bringing prohibited alcoholic liquor ashore or across the border; one transporting alcoholic liquor. — **rum'run'ning,** *n. Both Cant, U. S.*
Rural Credits Act. See FEDERAL LAND BANK, above.
rural free delivery. *U. S.* The free delivery of mail by carrier on designated routes in rural districts. *Abbr., R. F. D.*
Ru'ri-ta'ni-an (rōō'rĭ-tā'nĭ-ăn), *a.* Of or pertaining to or characteristic of the imaginary kingdom of "Ruritania" in "Anthony Hope's" *Prisoner of Zenda,* a princess of which was wooed by an impersonator of the king, her cousin.
Rus'sell-ite (rŭs'ĕl-īt), *n.* One of a sect founded by Charles T. ("Pastor") Russell (1852–1916), whose preaching and writings (esp. *Millennial Dawn*) sought to establish the doctrine of the second (spiritual) coming of Christ. The Russellites constitute a society called the International Bible Students' Association.
Ru-thene' (rōō-thēn'), *n.* Also **Rus-sene'** (rōō-sēn'). A Ruthenian, or Little Russian.
Ruth'er-ford at'om (rŭth'ĕr-fĕrd). *Physics & Chem.* The atom (of any element) regarded as having a minute nucleus, carrying a positive charge, and a number of orbital electrons equal to the atomic number of the element; — so called after Sir Ernest Rutherford, who proposed such a model of an atom.

sa'ble-fish' (sā'b'l-fĭsh'), *n.* [*sable* + *fish.*] The beshow (which see, in the *Dict.*).
sa'bo-tage'* (sà'bō-tazh'), *n.* [F.; cf. F. *saboter* to work hastily and carelessly, fr. *sabot* a clumsy wooden shoe.] Malicious waste or destruction of an employer's property by workmen, as during labor troubles; also, the refusal to perform work assigned and the obstructing in all possible ways of the regular process of production.
sa'bo-tage', *v. t. & i.* SA'BO-TAGED' (-tăzhd'); SA'BO-TAG'-ING (-tăzh'ĭng). To practice sabotage.
‖ **sa'bo'teur'** (sà'bō'tûr'), *n.* [F. Cf. SABOTAGE.] One who resorts to sabotage.
sab'u-lite (săb'ū-līt), *n.* [Prob. L. *sabulum* sand + *-ite,* 2 **d.**] A high-explosive powder having nearly three times the explosive force of dynamite. It is very stable, and is not readily affected by changes of temperature.
sac'cha-ro-gen'ic (săk'ă-rō-jĕn'ĭk), *a.* [L. *saccharon* sugar + *-genic.*] Producing sugar.
S. A. E. *Abbr.* Society of Automotive Engineers.
safety island. A narrow platform, usually of concrete, raised above the level of the roadway, or a space marked out by painted lines or movable iron standards, located near the center of a street where traffic is heavy, as a protection for pedestrians and to help control traffic.
sa-la'ri-at (sà-lā'rĭ-ăt; 115), *n.* [*salary* + *-riat* as in proletar*iat.*] The class or body of those who receive a salary, in contradistinction to the proletariat. *Recent.*
sa'li-ent*, *n.* A projecting part; specif., *Mil.*, a projecting part of a trench system or line of defense.
sal'var-san (săl'vär-săn; *G. pron.* zal'vär-zàn'), *n.* [L. *salvare* to save + G. *arsenik* arsenic.] *Chem.* A synthetic compound of arsenic, essentially $C_{12}H_{12}N_2O_2As_2 2HCl + 2H_2O$, a yellowish powder readily soluble in a weak aqueous solution of sodium hydroxide, bearing the trade-mark *Salvarsan.* Salvarsan, given intravenously or intramuscularly, is used in the treatment of syphilis, and is used also for frambœsia and relapsing fever. Called also "606."
Sam Browne belt. *Mil.* A leather waist belt supported by a light strap passing over the right shoulder; — so called from its originator, Gen. Sir Samuel James Browne (1824–1901) of the British army in India.
Sam'my (săm'ĭ), *n.; pl.* -MIES (-ĭz). [From Uncle *Sam.*] A soldier of the United States. *Slang, obsolescent.*
‖ **sa'mo-gon'** (sà'mō-gŏn'), *n.* Also ‖ **sa'mo-gon'ka** (-gŏn'kà). [Russ. *samo-* self + *gon-,* fr. *gon'at'* to distill.] In Russia, liquor, usually of high alcoholic content, distilled and sold illegally; "moonshine."
‖ **Saor'stat** (sûr'stŏt; sār'stŏt), *n.* [Ir.] Free state; — used in the name, *Saorstat Eireann,* Irish Free State.
Sa-per'da (sà-pûr'dà), *n.* [NL., fr. Gr. *σαπέρδης* a kind of fish.] *Zool.* A genus of long-horned beetles containing several species, as the apple-tree borer and linden borer, whose larvæ bore in trees.
Sask. *Abbr.* Saskatchewan, Canada.
‖ **sas-tru'gi** (sàs-trōō'gĭ), *n. pl.; sing.* -GA (-gà). Also **zas-tru'gi** (zàs-). [Cf. Russ. *zastrukha* a projecting roof.] Wavelike ridges of hard snow formed on a level surface by the action of the wind, and with axes at right angles to the wind; — a formation often observed by arctic and antarctic explorers. The ridges frequently terminate in a perpendicular wall with overhanging crest caused by erosion, and have a long even slope to windward.
‖ **sa-tang'** (sà-tăng'), *n.* [Siamese.] A Siamese bronze coin, first issued in 1908, worth one hundredth of a tical. The value is approximately $0.0027, U. S. currency.
sat'u-ra'tion*, *n.* *Radio.* In an electron tube, the condition in which all the electrons flow to the plate as fast as they are emitted by the filament, an increase of plate or grid voltage producing no increase of current.
‖ **Sat'ya-gra'ha** (sŭt'yà-grā'hà), *n.* [Skr. *satya* true + *graha* assumption, view, fr. *grah* to seize, take.] *India.* A politico-religious doctrine or belief formulated and preached by Mohandas K. Gandhi, Hindu reformer. It emphasizes the efficacy of passive resistance and noncoöperation in opposing abuses.
sausage balloon, *or* **sausage*,** *n.* See KITE BALLOON.
Sa'vels-berg proc'ess (sà'vĕlz-bûrg). See BLAST ROASTING, above.
saving daylight. = DAYLIGHT SAVING, above.
‖ **sbir'ro** (sbĕr'rō), *n.; pl.* SBIRRI (-rē). [It.] A police officer.
scac'chite (skăk'īt), *n.* [After A. *Scacchi,* Italian mineralogist.] *Min.* Native manganese chloride, $MnCl_2$, found in volcanic regions.
scamp'ing (skămp'ĭng), *n.* *Trade-Unionism.* **a** Intentional failure of an employee to perform his task properly. **b** Act or practice of an employee in exceeding his usual rate of output for the purpose of gaining a personal advantage over his fellows or contrary to their mutual understanding of a proper rate of production. **c** Act or practice of an employer in attracting labor from competitors underhandedly.
Scar'borough warn'ing (skär'b'rō; -bŭr-ō). [From *Scarborough,* a seaport town of England.] Very short notice or warning, or none at all; hence, a surprise. *Eng.*
scarf cloud. *Meteor.* A thin wispy cloud that sometimes forms just above a rising cumulus, and that later mantles the shoulders or drapes the sides of the cumulus.
scav'enge* (skăv'ĕnj), *v. i.* *Internal-Combustion Engines.* To remove the burned gases from the cylinder after a working stroke. — *v. t.* To remove (burned gases) from the cylinder after a working stroke.
sce-na'ri-o* (*now often Anglicized, esp. in this sense,* sē-nä'rĭ-ō; -nā'rĭ-ō; 115), *n.; pl.,* in this sense commonly SCENARIOS (-ōz). *Moving Pictures.* The complete story of the plot of a photoplay, showing its development scene by scene and situation by situation, giving the cast of characters and all essential details for acting the play.
sce-na'ri-o-ize (-ĭz), *v. t.;* -IZED (-ĭzd); -IZ'ING (-ĭz'ĭng). *Moving Pictures.* To make a scenario of (as a story, book, or the like). — **sce-na'ri-o-ist,** *n. Both Cant.*
scene*, *n.* *Moving Pictures.* As much of the action of a photoplay as is taken in one place at one time without stopping the camera.
sce'nic (sē'nĭk; sĕn'ĭk), *n.* A moving picture the chief interest of which is in the natural scenery depicted. *Cant.*
Schick test (shĭk) [After Dr. Bela *Schick,* of Vienna.] *Med.* A test in which the cutaneous injection of a highly diluted diphtheria toxin causes, in a subject susceptible to diphtheria, an area of reddening and induration at the point of injection.
schiz'o-phre'ni-a (skĭz'ō-frē'nĭ-ă), *n.* [NL.; *schizo-* + *phren-* + *-ia.*] *Med.* A psychopathic condition, as in dementia præcox, characterized by severe splitting of the personality with extreme autism. — **-phren'ic** (-frĕn'ĭk), *n. & a.*
Schnei'der gun (shnī'dĕr). Any gun made by the French firm of Schneider & Co., as at Le Creusot and at Canet. Cf. CREUSOT GUN, in the *Dictionary.*
‖ **Schreck'lich-keit** (shrĕk'lĭk-kīt), *n.* [G.] Frightfulness; atrociousness. See FRIGHTFULNESS, above.
Schu'mann re'gion (shōō'màn). *Optics.* That portion of the ultra-violet spectrum lying approximately between .1850μ and .1200μ; — so called after Victor Schumann (1841–1913), German physicist.
scientific stone. A ruby or sapphire, artificially made of corundum.
scoff'law' (skôf'lô'), *n.* One who scoffs at, or violates, the law, esp. a prohibition-enforcement law. *Recent, U. S.*
scoot'er*, *n.* **1.** A kind of plough with a single handle, used for marking furrows. *Local, U. S.*
2. A child's vehicle consisting commonly of a narrow board mounted on two wheels tandem, and guided by means of a handle attached to the front wheel. The child stands with one foot on the board and pushes with the other foot.
3. *Naut.* A glider. See GLIDER, *n.*, 2, above.
scout* (skout), *n.* **1.** A boy scout or a girl scout.
2. *Aeronautics.* An airplane used for scouting purposes, generally for reconnaissance or for pursuit. The scout, as a rule, carries only one machine gun.
scout*, *v. i.* To serve as a boy scout or a girl scout.
scout commissioner. See BOY SCOUT, above.
scout'craft' (skout'krăft'), *n.* The craft, skill, or practice of a scout.
scout cruiser. *Naval.* A vessel of moderate displacement and the highest speed and having an armament heavier than that of the destroyer or light cruiser.
scout executive. See BOY SCOUT, above.
scout'hood (skout'hŏŏd), *n.* [*scout* + *-hood.*] State or condition of being a scout; the period during which one is a scout; also, the character of a scout; the qualities befitting a scout or scouts as a class.
scout'ing, *p. pr. & vb. n.* of SCOUT. Hence: *n.* **a** Act of one that scouts. **b** Action or conduct of one who serves as a scout.
scouting plane. *Aëronautics.* = SCOUT, *n.*, 2, above.
scout'mas'ter, *n.* See BOY SCOUT, above.
screen*, *n.* **1.** *Naval.* See SMOKE SCREEN, below.
2. Specif., a screen on which moving pictures are projected; hence, fig., a moving picture, or moving pictures collectively.
3. *Elec.* = SHIELD, below.
screen*, *v. t.* To project (as a picture) upon a screen, as with a magic lantern or cinematograph.
scrim'shank' (skrĭm'shăngk'), *v. i.* [Cf. SCRIMP, *v. t.* and E. dial. *shankle* to loiter, neglect work.] To shirk one's duty. — **scrim'shank'er,** *n. Both Slang, Eng.*
script*, *n.* A typescript; specif., *Moving Pictures,* a typescript of a photoplay, including synopsis, cast of characters, scenario, and, sometimes, a scene plot.
scrounge (skrounj; *dial.* skrŏnj), *v. t. & i.* [Prob. Eng dial. *scrunge, scrounge,* to squeeze. Cf. PINCH, *v. t.*, 9.] To steal slyly; pilfer; cadge; sponge. — **scroung'er,** *n. Both Slang, Eng.*
scroung'ing (skroun'jĭng; *dial.* skrŏŏn'jĭng), *a.* Sharp; mean; calculating. *Slang, Eng.*
seal'ine' (sēl'ēn'), *n.* [A trade name; *seal* + 1st *-ine,* 1] *Furriery.* A kind of near seal made from the fur of the New Zealand rabbit.
‖ **Sean'ad Eir'eann** (shăn'ăd âr'ĭn). [Ir., senate of Ireland.] The upper house, or Senate, of the legislature (Oireachtas) of the Irish Free State, consisting of 60 members.
sea'plane' (sē'plān'), *n. Aëronautics.* An airplane designed to rise from and land on the water. See AIRPLANE, above.
seaplane carrier. See AIRCRAFT CARRIER, above.
sec'par' (sĕk'pär'), *n. Astron.* = PARSEC, above.
sec're-ta'ri-at*, *n.* **a** The entire body of secretaries in an office; the secretarial force and assistants of a secretary-general. **b** The place where a secretary transacts business, keeps records, etc.
sec're-ta-ry—gen'er-al, *n.* A chief or superior secretary. See GENERAL, *a., Note,* in the *Dict.*
Secretary of State for Air. A minister of the government of Great Britain, not in the cabinet, first appointed in April, 1921, to have control of the Air Ministry (see above).
sec'tor* (sĕk'tŏr), *n.* [Cf. F. *secteur.*] *Mil.* That portion of the front which is assigned to a unit to be covered by its fire, corresponding in general to a truncated sector of a circle. Sectors overlap at their edges. There are company sectors, regimental sectors, and corps sectors.
se-dan'*, *n.* An automobile having an inclosed body of one compartment seating four to seven persons, including the driver. A car of this type with permanent top but disappearing or removable sides is variously called an *open, touring,* or *convertible, sedan.* Cf. COACH, above; see AUTOMOBILE, *Illust.*, in the *Dictionary.*

see*, *v. t.* — **to see red**, to be filled with rage. *Colloq.*
seg're-ga'tion-ist (sĕg'rē-gā'shŭn-ĭst), *n.* One who believes in a policy of segregation, as of races in a city.
‖ **Seim** (sām), *n.* Also **Sejm, Seym** (sām). [Pol. *sejm* assembly.] Assembly, or Diet; specif: **a** The Constituent Assembly of the Polish Republic (1918–1922), and later the lower house of the Polish Parliament. **b** The Assembly of Lithuania **c** The Diet of Transcaucasia, lasting from October, 1917, to May, 1918, when the federation dissolved into three republics, Georgia, Armenia, and Azerbaijan.
‖ **Sei'yu'kai'** (sā'yōō'kī'), *n.* [Jap.] In recent Japanese politics, the moderate party, usually supporting the government ministry.
‖ **Sejm.** Var. of SEIM, above.
se-lec'tance (sē-lĕk'tăns), *n. Elec.* The measure of selectivity; the quotient of the inductance of the circuit divided by the product of the capacity into the square of the resistance.
se'lec-tiv'i-ty*, *n. Radio.* The degree of ability of a circuit or apparatus to respond to impulses of the frequency to which it is tuned, and not to others. Its mathematical specification is in terms of sharpness of resonance, reciprocal of power factor, etc. — **se-lec'tive***, *a.*
self (sĕlf), *v. t. & i. Biol.* **a** To cause individuals of the same race or strain to breed together; to inbreed. **b** To fertilize with pollen from the same flower or plant.
self'—de-ter'mi-na'tion*, *n. Intern. Law.* Decision by the population of a territorial unit as to its future political status, esp. as regards form of government, independence, or choice between nations with one of which it shall be merged.
self'—het'er-o-dyne, *a. Radio.* = AUTODYNE, above.
self'—op'er-a-tive, *a.* See SELF-, **b**, in the *Dict.*
self'—os'cil-la'tion, *n. Radio.* = GENERATION, above. *Cant.*
self'—play'ing, *a.* See SELF-, **b**, in the *Dict.*
self'—ser'vice, *a.* Designating a type of restaurant or café, or a store, where the patrons help themselves, wholly or in part, to food or goods to be paid for before leaving.
sell*, *v. t.* To convince of the truth or desirability of; as, to *sell* one an idea. *Slang.*
sem'i-car'ba-zine (sĕm'ĭ-kar'bȧ-zĭn; -zēn), *n.* Also **-zin.** Semicarbazide. See CARBAZIDE, in the *Dictionary.*
sem'i-car'ba-zone (sĕm'ĭ-kar'bȧ-zōn), *n.* [*semicarbazide* + *ketone.*] *Org. Chem.* A compound of the general formula $RR'C:NNHCONH_2$, formed by the action of semicarbazide on an aldehyde or ketone. The semicarbazones are used for the characterization of aldehydes and ketones.
sem'i—Die'sel (sĕm'ĭ-dē'zĕl), *a.* Designating an internal-combustion engine of a type resembling the Diesel engine in using heavy oil as fuel, but employing a lower compression pressure, and igniting the charge by spraying it, under compression, into an iron box (called the *hot bulb* or *hot pot*) opening into the combustion chamber and heated for ignition by a blast lamp until the hot bulb is kept red hot by the heat of combustion.
sem'i-fi'nal-ist (-fī'nȧl-ĭst), *n. Sports.* Any of the players who meet in the semifinal round, the losers in preceding rounds dropping out and not playing again.
sem'i-man'u-fac'tured (-măn'ū-făk'tŭrd), *a* Worked into a form that is valuable for further manufacture; partially manufactured.
sem'i-po-lit'i-cal (-pō-lĭt'ĭ-kȧl), *a.* Partly political.
sem'i-pro' (-prō'), *a.* Short for SEMIPROFESSIONAL; of or pertaining to those who engage in any sport for pay or gain but who are not engaged in it regularly or as their main calling or profession. — **sem'i-pro',** *n. Both Sporting Cant.*
sem'i-ra'di-al (sĕm'ĭ-rā'dĭ-ȧl), *a.* Half-radial.
semiradial engine. *Mach.* See RADIAL ENGINE, above.
sem'i-rig'id (sĕm'ĭ-rĭj'ĭd), *a.* [*semi-* + *rigid*] *Aëronautics.* Of an airship, having a flexible cylindrical gas container with an attached stiffening keel that carries the load. Cf. AIRSHIP, above.
send*, *v. t. & i. Radio.* = TRANSMIT, below.
sen'si-tiv'i-ty*, *n. Radio.* The degree to which a receiving set responds to incoming waves; specif., the ratio between the power or other function of output of the set to power or other function of its input.
sen'si-tol green (sĕn'sĭ-tōl; -tŏl). [*sensitize* + *-ol.*] = PINAVERDOL, above.
sen'si-tol red. = PINACYANOL, above
Ser'bo—Cro-a'tian (sûr'bō-krō-ā'shăn), *n.* Servo-Croatian. ☞ The form *Serbo-* is now preferred.
Ser'bo-phobe (sûr'bō-fōb), *n.* [*Serbo-* (see SERVO-) + *-phobe.*] One who has a morbid dislike or fear of the Serbs.
se'ri-al*, *n. Moving Pictures.* A photoplay depicting a long, continued story of which two parts, comprising an "episode" and consisting of two reels (2,000 feet of film), are shown at each of several performances.
series resonance. *Elec.* The condition of maximum current in a circuit having capacity and inductance in series.
se-rol'o-gy (sē-rŏl'ō-jĭ), *n.* [*sero-* + *-logy.*] *Med.* The science treating of the reactions, preparation, use, etc., of serums. — **se'ro-log'i-cal** (sē'rō-lŏj'ĭ-kȧl), *a.*
Se-root' fly (sē-rōōt'). *Zool.* A bloodsucking fly, of the horsefly family and genus *Pangonia*, remarkable for its very long proboscis. It is very troublesome to men and animals in Nubia and Sudan.
ser'pent*, *n. Aëronautics.* A short, heavy trail rope.
serum sickness. *Med.* The anaphylactic manifestations sometimes following an injection of serum, as that containing diphtheria antitoxin. Fever, swelling of the joints, and a skin eruption are common symptoms.
service flag. In the United States during the World War, a kind of flag displayed from houses, places of business, clubrooms, churches, schools, etc., to indicate the number of members of the family or the organization who were serving in the armed forces, or who had died in the service. Service flags had a deep-red border and a white field on which was placed a blue star for each living member in the service and a gold star for each member who had died.
service stripe. *Mil.* **a** Formerly, in the United States service, a stripe, or one of several stripes each indicating one enlistment, of colored cloth worn on the left sleeve of the dress uniform, near the cuff. They disappeared with the abolition of the dress uniform in 1919, except as in **b**, below. **b** A stripe of narrow black soutache braid, worn on each sleeve of the dress uniform, one half inch above the braid of the cuff and parallel to it, by cadets at the United States Military Academy; also, a similar stripe of gold braid worn on each sleeve of the cadet full-dress coat. Gold service stripes are also worn by midshipmen at the Naval Academy.
set*, *n. Moving Pictures.* Any artificial and formal setting for a scene of a photoplay, such as a room in a house, a hotel lobby, or the like.
set'ting*, *n. Moving Pictures.* The scenic environment, either indoors or out, including all the physical surroundings, properties, furniture, buildings, etc., within which a scene is enacted.
Seven Seas. [Also *l. c.*] All the oceans of the world; specif., the North and South Atlantic, the North and South Pacific, the Arctic, Antarctic, and Indian Oceans. *Poetic.*
sev'en-ty—five', *n.* The semiautomatic fieldpiece of the French army, the diameter of the bore of which is 75 millimeters; — commonly written 75; *pl.*, 75's *or* 75s.
sex'—lim'it-ed, *a. Biol.* Restricted to appearing in one sex only; — said of characters in genetics
sex'—linked' (sĕks'lĭŋkt'), *a. Biol.* Pertaining to or designating any factor located in the sex chromosomes of either sex, or any character dependent on them.
‖ **Seym.** Var. of SEIM, above.
sharp waves. *Radio.* Waves produced by a transmitting set which are of low decrement. Cf. BROAD WAVES, above.
shave'tail' (shāv'tāl'), *n.* A recently graduated second lieutenant; — humorously so called with allusion to the young, unbroken army mules. *Soldiers' Slang.*
shed*, *n.* A covered structure for housing airships.
shell'fire' (shĕl'fīr'), *n. Mil.* Firing or shooting of shells.
shell shock. *Med.* Any of numerous nervous or mental affections resulting from the violent conditions of battle. They may be due to trauma, to concussion of exploding shells, or to excessive psychic strain. — **shell'—shock',** *v. t.*
shenk beer. = SCHENK BEER, in the *Dict.*
Shep'pard—Town'er Act (shĕp'ȧrd-toun'ẽr). [After Senator Morris *Sheppard* and Representative Horace M *Towner.*] An act of Congress, passed in 1921, providing for Federal coöperation with the States for the promotion of the welfare and hygiene of maternity and infancy.
Sherman Antitrust Act. [After John *Sherman*, senator from Ohio.] An Act, passed July 2, 1890 (51st Congress), making combinations in restraint of interstate or foreign commerce illegal. It applies the general principle of interstate commerce to transportation and other corporations, but the Supreme Court has held that it does not apply to monopolies in manufacturing. The Clayton Antitrust Act (which see, above) supplements the Sherman Act.
shield*, *n. Elec.* A grounded barrier or inclosure, usually of metal, surrounding electrical apparatus and protecting it from the effects of undesired electric or magnetic fields.
shin'ner-y (shĭn'ẽr-ĭ), *n.; pl.* **-eries** (-ĭz). A dense thicket composed mainly of shin oaks. *Southwestern U. S.*
shin oak. Any of several species of oak of low growth, as *Quercus gambelii, Q. undulata, Q. harvardii*, etc. *Southwestern U. S.*
ship*, *n.* An airship.
ship'—plane' (shĭp'plān'), *n. Aëronautics.* A landplane designed to rise from and alight on the deck of a ship
shock absorber. **a** *Automobiles.* Any of various spring, pneumatic, or hydraulic, devices used on automobiles in addition to the regular springs to lessen the shocks due to unevennesses of the road. **b** *Aeronautics.* In an airplane, a device, esp any of a number of springs or elastic members usually interposed between the wheels, floats, or tail skid and the rest of the airplane, to secure resiliency in landing and taxiing.
shock troops. *Mil.* Troops specially suited and chosen for offensive work because of their high morale, training, and discipline. Cf. SHOCK ACTION, in the *Dictionary.* Hence, **shock battalion, shock corps, shock soldier,** etc.
sho'ful (shō'fo͝ol), *n.* [Judæo-G. (and mod. G.) *schofel*, adj. and n, trashy, trash, fr. Heb. *shāphēl* low] **a** A counterfeit coin; counterfeit money; — also used attributively; as, *shoful* man, that is, one who passes counterfeit money. *Slang, Eng.* **b** A hansom cab. *Slang, Eng.*
sho-neen' (shō-nēn'), *n.* [Ir. *seōinín*, dim. of *Seōn* John, fr. E. *John.*] A would-be gentleman who puts on superior airs. *Anglo-Irish.*
shop chairman. *Trade-Unionism.* A shop deputy.
shop committee. *Trade-Unionism.* A committee of employees in a plant chosen to confer and bargain with the employer or his representatives for the adjustment of conditions of labor and the settlement of disputes in the plant.
shop deputy. *Trade-Unionism.* A member of a trade-union delegated to represent the union in the adjustment of disputes that occur in the plant where he is employed; — called also *shop chairman* and *shop steward.*
shop steward. *Trade-Unionism.* A shop deputy.
short ballot. A ballot for voting in public elections on which the number of elective offices is reduced to a minimum, and only a few offices are filled by election at any one time, leaving minor positions to be filled by appointment.
short'change' (shôrt'chānj'), *v. t.*; **-changed'** (-chānjd'); **-chang'ing** (chān'jĭng). To give (one) less than the correct change, esp. after a sale. — **short'chang'er** (-chān'jẽr), *n Both Colloq., U. S.*
short story, *or* **short'—sto'ry,** *n.* In narrative literature, a relatively brief prose story characterized by singleness of effect, uniformity of tone, and dramatic intensity, usually having as a plot a single action represented at the crisis.
shot samples. *Metal.* Samples taken for assay from molten metal by pouring a portion into water, to granulate it.
‖ **Sich'er-heits-po'li-zei'** (zĭK'ẽr-hīts-pō'lē-tsī'), *n.* [G. lit., safety police.] A body of military police, of about 50,000, created in 1919 by the government in several of the large cities of Germany.
side band. *Radio.* The band of frequencies on either side of the carrier frequency, produced by the process of modulation.
side car. A car attached to a motor cycle for the accommodation of a passenger seated abreast of the cyclist. The side car usually has but a single wheel of its own, being supported on one side by the frame of the motor cycle.
side frequency. *Radio.* The frequency on either side of the carrier frequency, produced when modulating with a single frequency.
side'slip'*, *v. i. Aëronautics.* Of an airplane, to slide with a component of velocity along the lateral axis which is inclined to and in the direction of the lower end of that axis. When sideslipping occurs in connection with a turn it is the opposite of skidding. See SKID, below.
sidhe (shē), *n.* [Ir. *sídh.* Cf. BANSHEE.] Fairy; spnte *Irish.*
sign*, *v. i.* — **to sign off**, *Radio*, to announce the end (of a message, program, etc.), and discontinue transmitting.
sig'nal*, *n Elec* The intelligence, message, or effect conveyed in telegraphy or telephony.
signal noise ratio. *Radio.* The ratio of radio field intensity to noise field intensity.
si-lun'dum (sĭ-lŭn'dŭm), *n.* [A trade name] An extremely hard, refractory substance formed in the electric furnace and used for electric resistors and for other purposes. A gray variety consists of silicon carbide, SiC, while a slate-green variety formed at a somewhat lower temperature contains oxygen in addition (Si_4C_4O)
sim'sim (sĭm'sĭm), *n.* Sesame; — an African trade name.
sin'gle—side'—band' trans-mis'sion. *Elec.* A method of signal transmission in which the power associated essentially with one side band is not transmitted. In this method the carrier frequency may or may not be transmitted also See CARRIER SUPPRESSION, above.
sin'gle—sur'faced (-sûr'fȧst), *a.* Having one finished surface; — said specif. of airplane wings or aërocurves that are covered with fabric, etc., on one side only.
sink'er*, *n* **a** A doughboy, or dumpling. *Soldiers' Slang.* **b** A doughnut *Slang.*
Sinn Fein* (shĭn fān). A political policy or movement aiming at independence and self-government, or home rule, first advocated in Ireland under this name about 1905. It was based on noncoöperation with the "foreign" (British) government (see NONCOÖPERATION, above), and has been accompanied by a revival of the national language, literature, art, customs, etc. Also, the body of Irish collectively (not formally organized as a political party under this name) adhering to the policy of Sinn Fein — **Sinn Fein'er.** — **Sinn Fein'ism.**
Si'no- (sī'nō-; sĭn'ō-). [See SINOLOGUE.] A combining form used to denote *connection with*, or *relation to, China*, or *the Chinese;* as, *Sino*-American, *Sino*-German, *Sino*-Japanese, *Sino*-Mongol, *Sino*-Russian. See CHINO-, in *Dict.*
Sin'o-phile (sĭn'ō-fīl; -fĭl), **Sin'o-phil** (-fĭl), *a.* [*Sino-* + *-phile, -phil.*] Approving or favoring the Chinese, or their policy or characteristics. — *n.* One who, not being Chinese, upholds Chinese policy or characteristics.
Si-noph'i-lism (sī-nŏf'ĭ-lĭz'm), *n.* Admiration of or friendliness to the Chinese people, institutions, and customs.
sip'pi-o (sĭp'ĭ-ō), *n.* A game of the bagatelle kind, played with eight balls and a cue and cue ball.
si-tos'ter-ol (sī-tŏs'tẽr-ōl; -ŏl), *n.* [Gr. *σῖτος* food + *cholesterol.*] *Org. Chem.* A white, fatty higher alcohol, $C_{26}H_{43}OH$ or $C_{27}H_{45}OH$ H_2O, resembling cholesterol, found in wheat embryos, maize, and cocoa beans; — called also *sitosterin.*
si'wash (sī'wŏsh), *v. i.;* SI'WASHED (-wŏsht); SI'WASH-ING. To camp, live, or do things after the manner of a (Salishan) Indian. *Northwestern U. S.*
six*, *n.* — **606**, *or* **Ehrlich's 606** (ār'lĭks), same as SALVARSAN, above. *Colloq.*
skads (skădz), *n. pl.* A large number or quantity. *Slang.*
skel'e-ton-ize*, *v. t. Mil.* To reduce (as a regiment) to its skeleton, that is, to a number of men and officers far below its complement.
skid*, *n. Aeronautics.* A wooden or metal runner; esp., either of two sledlike runners used as members of the landing gear of an airplane to aid in landing and taxiing.
skid*, *v. i. Aëronautics.* To slide sidewise away from the center of curvature when turning. Skidding is generally caused by banking insufficiently and is the opposite of *sideslipping.* See SIDESLIP, above.
skid fin. *Aeronautics.* One of the fore-and-aft vertical surfaces, usually placed above the upper wings, designed to provide the vertical keel surface required for stability.
Sko'da gun (skō'da). *Mil.* An automatic rapid-fire gun operated on the recoil principle, in which the recoiling parts are returned to firing position by the action of a flywheel which is set in motion by the recoil; — from the Skoda Works, formerly in Austria-Hungary, later in Czechoslovakia, founded by Emil von Skoda (1839–1900).
skoo'kum (skōō'kŭm), *a.* [Chinook Indian] First-rate; "mighty good"; of the right sort. *Colloq., U. S.*
sky'man (skī'măn), *n.* An aeronaut. *Slang.*
sky pilot*. *Aëronautics.* A licensed pilot. *Slang.*
slack'er*, *n.* One who avoids exertion or neglects duty or responsibility; specif., a person who shirks a duty or obligation to his country, esp. in time of war, as by attempting to evade military service. — **slack'ing,** *n.*
slam'mock-ing (slăm'ŭk-ĭn), *a* = SLAMMOCKY, in the *Dict.*; — written also *slammerkin, slammakin*, etc. *Dial.*
slap'stick' (slăp'stĭk'), *n.* A device made of two flat pieces of wood fastened together at one end, but loose at the other, sometimes used in farce or low comedy by one actor in striking another in such a way as from the loud noise to make it appear that the blow was a severe one. Often used attributively; as, *slapstick* comedy.
sleeping bag. A kind of large baglike receptacle, of peltry, duck, blanketing, or the like, used by explorers, prospectors, hunters, and others for sleeping in outdoors.
sleeping sickness*. See ENCEPHALITIS LETHARGICA, above.
sleet*, *n.* Specif., *Meteor.* **a** Precipitation in the form of frozen or partly frozen rain. *U. S. Weather Bureau.* **b** Glaze (which see, above); — often popularly so called.
slip*, *n. Aëronautics.* The difference between the effective pitch of a propeller and its mean geometrical pitch, generally expressed as a percentage of the latter.
slip stream. *Aëronautics.* The stream of air driven aft by the propeller of an aircraft, having a velocity relative to the engine greater than that of the surrounding body of still air; — called also *propeller race*, or *race of the propeller.* The indraft is sometimes considered as part of the slip stream, also.
slug*, *n. Engineering.* A proposed unit of mass, equal to 32.1912 pounds, or the product of one pound into the gravitational constant at sea level. The name *geepound* has also been suggested for this unit.
slum (slŭm), *n.* Short for *slumgullion*, a kind of stew made of meat, potatoes, and onions, or of potatoes and onions. *Soldiers' Slang.*
slum'dom (slŭm'dŭm), *n.* Slums collectively; the world of the slums.
slum-gul'lion*, *n.* See SLUM, above.
slum'gum' (slŭm'gŭm'), *n.* The impure residue, consist-

ing of cocoons, propolis, etc., remaining after the wax is extracted from honeycombs.

slush fund*. A fund for use in bribery, corruption, or for carrying on a corruptive propaganda. *Slang, U. S.*

S. M.* *Abbr.* Scientiæ Magister (L., Master of Science).

smile'age book (smil'ăj) [*smile* + *-age* as in mile*age*.] A small book of coupon tickets, each coupon, valued at five cents, giving admission to one of the temporary theaters erected by the government in American training camps during the World War. Smileage books were purchased by the public for gratuitous distribution to the soldiers.

smock*, *n.* A woman's overgarment somewhat resembling the smock frock, but often made of fine material.

smoke bomb. *Mil.* **a** A kind of shell which on explosion emits a thick cloud of whitish smoke, used to conceal the movements of advancing troops **b** A kind of bomb, to be dropped from an airplane, which emits a black, white, or colored smoke, used for signaling.

smoke helmet. = GAS MASK. See MASK, above.

smoke screen. *Naval.* A screen or curtain of heavy smoke, produced by special chemicals dropped overboard, or by incomplete combustion of fuel, used as a cloak to the vessel employing it, or to a fleet.

smous*, *or* **smouse***, *n.* Also **smous'er** (smouz'ĕr). An itinerant peddler. *S. Afr.*

sneeze gas. See GAS, above.

snip'er-scope (snīp'ĕr-skōp), *n.* [*sniper* + *-scope.*] A device, made in several forms, all utilizing the principle of the periscope, attached to a rifle near the rear sight and projecting downward into a trench, by means of which a soldier can aim and fire his rifle without exposing himself.

snitch (snĭch), *v. t.* [Cf. SNICK to take hastily, SNECK, *v. t.*, SNATCH, *v. t.*] **a** To catch in a noose or loop. *Eng.* **b** To snatch; pilfer; "pinch." *Dial. Eng. & Slang, U. S.*

snow banner. A bannerlike stream of snow blown into the air from a mountain peak, often having a pinkish color and extending horizontally for several miles across the sky.

snub'ber*, *n.* A snubbing device which prevents the too rapid recoil of the body springs of an automobile.

scar*, *v. i. Aëronautics.* To fly without engine power and without loss of altitude, as in a glider.

soaring machine. *Aëronautics.* A glider.

‖ **so'bor** (sō'bŏr), *n.* [Russ.] [*often cap.*] **a** = ZEMSKI SOBOR, in the *Dict.* **b** In recent years, a synod or conclave of the Russian church. **c** A cathedral.

sob sister. A woman writer, esp. on newspapers, who writes sentimental news articles. *Slang, U. S.*

Social Democratic party*. In Russian politics, one of the two chief socialistic parties, representing esp. the working class (artisans, mechanics, etc.), and, since the convention of 1903, divided into two groups, the Bolsheviki and the Mensheviki (which see, above). Its members (the **Social Democrats**) follow Marxian theories of socialism. Cf. SOCIAL REVOLUTIONARY PARTY, below.

social insurance. Insurance, under the auspices of the state or through voluntary mutual organizations, covering general masses of persons, as wage earners, soldiers, and sailors, against sickness or ill health, against accident while employed (**employer's liability insurance**; see also WORKMEN'S COMPENSATION ACT, in the *Dict.*), against old age, unemployment, and the like, or against death.

Social Revolutionary party. In Russian politics, one of the two chief socialistic parties, representing esp. the peasant class. Its members (the **Social Revolutionaries** or **Social Revolutionists**) follow theories of socialism opposed to the Marxian theories. Cf. MAXIMALIST, MINIMALIST, and SOCIAL DEMOCRATIC PARTY, above.

social service. Systematic assistance given the destitute or unfortunate, esp. by organized charity, as help in securing a position, loans, or medical care.

social worker. A person engaged in social service.

sodium bisulphite. *Chem.* A salt, $NaHSO_3$, occurring in opaque prisms or granular powder of disagreeable taste. It is used as an antiseptic and antipyretic.

sodium chlorate. *Chem.* A salt, $NaClO_3$, resembling potassium chlorate, but more soluble and therefore useful when strong solutions are desired.

sodium hydrosulphite. = SODIUM HYPOSULPHITE, below.

sodium hypochlorite. *Chem.* A salt, NaOCl, of hypochlorous acid extensively used for bleaching purposes, disinfecting, etc. Cf. EAU DE JAVELLE, in the *Dict.*

sodium hyposulphite*. A water-soluble salt, $Na_2S_2O_4$, obtained as a yellowish-white powder from sodium bisulphite by the action of zinc and milk of lime. It is a strong reducing agent. With formaldehyde it forms compounds which are used as discharges for dyes under various trade names, as *rongalite, hydrosulphite, formosul.*

sodium silicate. The silicate of soda, made in several forms. The form commonly known as water glass usually corresponds to the formula Na_2O2SiO_2. See WATERGLASS, in *Dict.*

soft*, *a. Elec.* **a** Having low penetrating power; — said of some X rays. Cf. HARD, in the *Dictionary.* **b** Of or pertaining to an electron tube having a relatively inferior vacuum. Cf. HARD, above.

soi'sette' (swȧ'zĕt'), *n.* [Perh. F. *soie* silk + *-s-* + *-ette*] A highly mercerized cotton fabric of plain weave, used for dresses, shirts, curtains, etc.; — a trade name.

‖ **So'kol** (sō'kōl), *n.* [Bohem. *sokol* a falcon.] Any of certain Slavic gymnastic societies in Europe and the United States which aim to inculcate in their members the qualities of the falcon, as strength and elegance of body, courage, and keenness. The first Sokol was organized in Prague in 1862. Also, a member of any of these societies.

so-lan'der box, *or* **so-lan'der** (sō-lăn'dĕr), *n.* [After Daniel Charles *Solander*, Swedish botanist.] A kind of box, shaped like a thick book, with hinged side and front, for holding maps, pamphlets, loose sheets, etc.

soldier's heart. *Med.* Disordered action of the heart characterized by breathlessness, sense of fatigue, palpitation, and pain in the chest; — so called because commonly observed among soldiers.

so-le'no-cyte (sō-lē'nō-sīt), *n.* [*soleno-* + *-cyte.*] *Zoöl.* Any of certain specially modified tubular flagellated cells occurring in the nephridia of the larvæ of certain annulates and rotifers, and of the genus *Amphioxus.*

sole trader. A feme-sole trader.

sol'i-da-rist (sŏl'ĭ-dȧ-rĭst), *n.* [Cf. SOLIDARITY.] One who believes in, or advocates, a social organization based on solidarity of interests. — **sol'i-da-rism** (-rĭz'm), *n.*

sol'vate (sŏl'vāt), *n.* [*solve* + *-ate.*] *Phys. Chem.* A compound of a dissolved substance with the solvent.

sol-va'tion (sŏl-vā'shŭn), *n.* [*solve* + *-ation.*] *Phys. Chem.* Formation of a solvate.

son'der (zŏn'dĕr), *a. Yachting.* Pert. or belonging to the sonderclass; as, *sonder* boats.

son'der-class' (-klȧs'), *n.* [G. *sonderklasse* special class.] *Yachting.* A special class of small yachts, originating in Germany, the aggregate of the length on water line, extreme beam, and extreme draft of which must be not more than 32 feet, and the crew of which must be amateurs and citizens of the country in which the yacht was built.

soon'er (sōōn'ĕr), *n.* In the western United States, one who settles on government land before it is legally open to settlement in order to gain the prior claim that the law gives to the first settler when the land is opened to settlement; hence, one who does a thing prematurely or anticipates another in acting, in order to get an unfair advantage. *Slang.*

So'ren-sen, *or* **Sö'ren-sen, scale** (sō'rĕn-sĕn). [After S P. L. *Sorensen*, Danish scientist.] *Phys. Chem.* A scale for expressing hydrogen ion concentration in which the figures used are the negative common logarithms of the concentrations. The symbol for these values is PH. Thus, the expression PH = 4.5 means that the concentration of the hydrogen ion is $10^{-4.5}$, or 0.000035 gram atom per liter. The scale permits the expression of both acidity and alkalinity, in units which can be measured directly by means of a hydrogen electrode, and has come into extensive use.

S O S. The letters of the international signal of distress (- - - ——— - - -) prescribed by the International Radiotelegraphic Convention of 1912 for use by ships calling for help, and similarly used by others, as airships, troops, etc. ☞ *S O S* is a code signal only, not an abbreviation, and was apparently adopted because easy to transmit and distinguish. Officially, there is no phrase, such as "Save Our Souls (or Ship)," for which the letters stand.

sounding balloon. *Aëronautics.* A small balloon sent aloft without passengers but with registering meteorological and other instruments.

soup kitchen*. A rolling kitchen. *Mil. Slang.*

sour'dough' (sour'dō'), *n.* A man living in the open, esp. a prospector in Alaska or Canada; — so called from the *sour dough*, carried in a lump and used in making bread while camping. *Northwestern U. S.*

south'paw' (south'pô'), *a. Baseball.* Using the left hand in pitching. *Cant.* — *n.* A southpaw pitcher. *Cant.*

so'viet' (sō'vyĕt'), *n.* [Russ.] A council; specif., [*often cap.*] either one of two governing bodies (*village soviets, town soviets*) in the Union of Socialist Soviet Republics, established as a result of the Russian revolution of 1917 and by the constitution of the Republic of July, 1918, and later by the constitution of the Union, July, 1923. These soviets are the primary organs of a government based on the principle of communism, seeking to give the power to the working classes. They are the supreme local authorities; consist of representatives, chosen annually, of workmen (elected by shops, organizations, etc.), soldiers, and peasants; and send deputies to the higher soviet congresses: *volosts* (rural district), *uyezds* (county), *guberniyas* (provincial), *oblasts* (regional), and the congresses of the constituent republics. All these soviet congresses meet annually. The highest governmental body of all is the *Union Soviet Congress*, composed of representatives of town soviets and of representatives of the provincial soviet congresses. This congress elects the *Union Central Executive Committee* (which see, below). See also COMMISSAR, COMMISSARIAT, COUNCIL OF NATIONALITIES, PRESIDIUM. Hence, any of various similar socialistic bodies elsewhere.

so'viet'dom (-dŭm), *n.* Soviets collectively. See -DOM.

so'viet'ism (-ĭz'm), *n.* The form or kind of government carried on through soviets; communism; Bolshevism.

so'viet'ist, *n.* One who believes in sovietism or attempts to put its principles into practice.

so'viet'ize (-īz), *v. t.*; -IZED (-īzd); -IZ'ING (-īz'ĭng). To change or convert to a government by a soviet or soviets; communize; Bolshevize. — **so'viet'i-za'tion** (-ĭ-zȧ'shŭn), *n.*

space—charge effect. *Elec.* In an electron tube, the limitation of flow of plate current produced by repulsion exerted on electrons leaving the filament by the other electrons present in the tube.

space lattice. *Physics.* A group of points in space in which each point is one of the intersections of three systems of lines, the lines of each system being parallel and equally spaced; thus, the centers of the bricks in a regular pile form a space lattice; the molecules of a crystal are arranged so that their centers form a space lattice.

space time. See TIME SPACE, below.

spad (spăd), *n. Mining.* A kind of nail, one or two inches long, of iron, brass, tin, or tinned iron, with an aperture at the head, used to mark stations in underground surveying.

spa-ghet'ti* (spȧ-gĕt'ĭ), *n. Elec.* Insulating tubing of small diameter, to slip over bare wire used in radio and other apparatus.

span*, *n. Aëronautics.* The maximum distance, laterally, from tip to tip of an airplane, inclusive of ailerons or the lateral dimension of an airfoil; — called also *spread.*

Spanish grippe *or* **influenza.** The grippe, or influenza; — applied esp to the influenza of the great epidemic of 1918.

spar*, *n. Aëronautics.* One of the main lateral members of the wing of an airplane, usually of wood or tubular steel. They carry the ribs. Also, occasionally, a longéron.

spark (spark), *a. Radio.* Of or pertaining to radio communication carried on with a spark transmitter; as, a *spark* set, a *spark* station.

spark frequency. *Radio.* The number of spark discharges per second. It is always a lower frequency than that of the radio current produced.

spark gap*. *Radio.* A device consisting of two or more electrodes, usually metal, between which an electric discharge takes place, used in certain generators of radio-frequency current. See QUENCHED GAP, ROTARY GAP, above.

spark spectra. *Physics.* Spectra emitted when an electric spark passes between two metallic electrodes.

spark transmitter. *Radio.* A transmitting set which utilizes the discharge of a condenser through a spark gap as the source of its radio-frequency power.

Spar'ta-can (spär'tȧ-kăn), *a.* Of or pertaining to the Spartacists. — *n.* A Spartacist.

Spar'ta-cide (-sīd), *n.* A Spartacist.

Spar'ta-cism (spär'tȧ-sĭz'm), *n.* Doctrines, tactics, or practices of, or like those of, the Spartacists.

Spar'ta-cist (-sĭst), *n.* A member of the Spartacus party, in Germany.

Spar'ta-cus par'ty *or* **group** (spar'tȧ-kŭs). A party organized in Germany in 1918 by Karl Liebknecht, Rosa Luxemburg, and others, along extreme socialistic lines. The name is said to have been adopted in allusion to *Spartacus*, a gladiator at Rome, who, in B. C. 73-71, led an insurrection of runaway slaves.

S. P. boat. *Naval.* Short for SUBMARINE PATROL BOAT.

spec-tac'u-lar-ism (spĕk-tăk'ū-lȧr-ĭz'm), *n.* Quality or state of being spectacular; spectacularity.

spec'tro-pho'to—e-lec'tric (spĕk'trō-fō'tō-ē-lĕk'trĭk), *a.* [*spectro-* + *photo-electric.*] *Physics.* Varying in photoelectric sensitiveness according to the wave length of the exciting light.

speed'ster (spēd'stĕr), *n.* [*speed* + *-ster.*] *Automobiles.* A high-speed roadster, usually with a low seat accommodating two persons seated side by side. See AUTOMOBILE, *Illust.*, in the *Dictionary.*

speed trap. A trap to catch motorists who exceed speed limits, often consisting of two concealed stations a measured distance apart, connected by telephone, and occupied by officers who time the speed of vehicles with stop watches.

spel'ter*, *n.* Short for SPELTER SOLDER, in the *Dict.*

sphin'go-my'e-lin (sfĭn'gō-mī'ē-lĭn), *n.* [Gr. *σφίγγειν* to bind tight + *myelin.*] *Physiol. Chem.* A crystalline phosphatide extracted from the white substance of the brain.

sphin'go-sine (sfĭn'gō-sīn; -sēn), *n.* [Gr. *σφίγγειν* to bind tight + *-ine.*] *Physiol. Chem.* A base, $C_{17}H_{35}O_2N$, obtained as a decomposition product of sphingomyelin. It appears to be an amino alcohol.

spike disease. A disease of the sandalwood tree in the Orient, attributed to some physiological disturbance, and characterized by dwarfed growth of the shoots and narrow, stiff, crowded leaves.

spin*, *n. Aviation.* An aërial maneuver consisting of a combination of roll and yaw, with the longitudinal axis of the airplane inclined steeply downward. The airplane descends in a helix of large pitch and very small radius, its upper side being on the inside of the helix, and the angle of attack on the inner wing being maintained at an extremely large value.

spin'dle*, *n.* A hydrometer.

spin'ner*, *n. Aeronautics.* A fairing, usually one made of sheet metal and roughly conical or paraboloid in form, which is attached to the propeller boss and revolves with it.

spin vector. *Mech.* A vector quantity indicating the size and direction of the angular velocity of a rotating or spinning body; graphically, a line drawn in the axis of rotation such that, looking in the positive direction, the rotation will be right-handed and such that the length of the line affords a measure of the angular velocity.

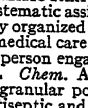
spi'ral, *v. i. Aviation.* To cause an airplane to follow a spiral path in ascending or (more often) descending.

spi'ral*, *n. Aviation.* A flight in a spiral path.

spi'ran (spī'răn), *n.* [*spiro-* + 2d *-an.*] *Org. Chem.* A spiro compound. See SPIRO-, below.

spir'it-u-al*, *n.* A kind of religious song in use among Negroes of the southern United States.

spiro-. [L. *spira*, coil, twist, fr. Gr. *σπεῖρα*. See SPIRE a winding line.] *Org. Chem.* A combining form (also used adjectively) denoting that the compound in the name of which it appears contains two rings having a single atom in common, resulting in a figure-8 arrangement of atoms; as, **spi'ro-pen'tane** (spī'rō-pĕn'tān), an unstable hydrocarbon obtained synthetically (see formula).



Spiropentane.

spi'ro-chæte, spi'ro-chete (spī'rō-kēt), *n.* [Gr. *σπεῖρα* coil + *χαίτη* hair.] *Bacteriol.* One of a group of microorganisms, variously regarded as bacteria or protozoans, consisting of slender undulating spiral rods, with or without flagella. Among the parasitic species are the spirillum of relapsing fever and the *Treponema pallidum*, which is found associated with syphilitic lesions. See SPIROCHÆTA, in the *Dictionary*; TREPONEMA, below.

spit ball. *Baseball.* A pitched ball in throwing which the pitcher grips the ball between two, or three, fingers on one side (which is made slippery, as by saliva) and the thumb on the other side and delivers it so that it slips off the fingers with the least possible friction. When pitched directly overhand, a spit ball darts downward; when pitched with the arm extended sidewise, it darts down and outward. *Cant.* — **spit'—ball'er,** *n. Cant.*

☞ The spit ball has been prohibited since 1920, but all *bona fide* spit-ball pitchers already in the National and American leagues in Dec., 1920, were exempt.

spit'ter*, *n. Baseball.* A spit ball. *Slang.*

split reel. See REEL, above.

spon'dy-lo-ther'a-peu'tics (spŏn'dĭ-lō-thĕr'ȧ-pū'tĭks), *n.* [*spondylo-* + *therapeutics.*] *Med.* Treatment of disease by application of physical methods to the spinal region.

spon'dy-lo-ther'a-py (-thĕr'ȧ-pĭ), *n. Med.* Spondylotherapeutics. — **spon'dy-lo-ther'a-pist,** *n.*

spoof (spōōf), *v. t. & n.*; SPOOFED (spōōft); SPOOF'ING. To deceive; fool; hoax; guy. Cf. SPOOF, *n.*, in the *Dict. Slang.*

spoon'er-ism (spōōn'ĕr-ĭz'm), *n.* [After Wm. A. *Spooner* (1844–), Eng. clergyman.] An accidental transposition of sounds, usually the initial sounds, of two or more words; as, a *blushing crow*, for a *crushing blow.*

sport, *a.* Also **sports.** Pert. to, or suitable for, sports, esp outdoor sports; hence, made in a style suitable for informal outdoor wear; as a *sport*, or *sports*, skirt, hat, shoe, etc.

spot'light' (spŏt'līt'), *n.* **a** The projected spot or circle of light, now generally thrown by an electrical apparatus, used to illuminate brilliantly a single person or object or group on the stage, leaving the rest of the stage more or less unilluminated; hence, conspicuous public notice. Cf. LIMELIGHT, in the *Dictionary. Cant or Colloq.* **b** A small light having a powerful reflector, attached at or near the dash of an automobile vehicle, which can be adjusted to light up objects ahead of or to the side of the vehicle.

spread*, *n.* **a** *Aeronautics.* = SPAN, above. **b** Anything, as jam, jelly, fruit butter, etc., used to spread on bread to increase its tastiness. *Colloq., U. S.* **c** Short for DOUBLE-PAGE SPREAD, above. *Advertising Cant.* **d** The difference between two numbers, or figures; as, the *spread* between cost and selling price. *Com. Cant.*

spread'er*, *n.* *Radio.* A stick or bar for holding apart the wires of an aerial.

spring*, *v. t.* To attach by means of elastic members; as, to *spring* the chassis of an airplane to the body; also, to equip (an airplane) with an attachment sprung on.

sprue* (sprōō), *n.* *Med.* A disease of tropical origin, characterized by inflammatory and degenerative changes in the functions of digestion and nutrition, usually attended by diarrhea and by toxæmia.

spug (spŭg), *n.* One opposed to giving useless gifts; — acrostic of "Society for the Prevention of Useless Giving." *Colloq., U. S.*

‖ **spur'los ver-senkt'** (shpōōr'lōs fĕr-zĕŋkt'). [G. Cf SPOOR.] Sunk without trace; — used in a secret message regarding certain Argentine vessels, in 1918, by the German diplomatic agent at Buenos Aires.

sput'ter*, *v. t.* *Metal.* To produce thin metallic films on nonmetallic substances (such as glass, quartz, etc.) by exposure within a vacuum tube through which an electric discharge is passed.

squad'ron* (skwŏd'rŭn), *n.* An air fleet or a division of an air fleet; specif., in the (British) Royal Air Force, a division of the air fleet consisting of airplanes and a personnel of officers and men sufficient to maintain 12 airplanes in constant readiness for active service.

squeal'ing*, *n.* See HOWLING, above.

squeeze play. *Baseball.* A form of play in which, when there is a runner on third base and not more than one out, the batter bunts a pitched ball previously designated by signal, and the runner starts for the home plate as soon as the pitcher makes a motion to pitch that ball. The start that the runner thus gets usually enables him to score even if the bunt is perfectly fielded. *Cant.*

Squi'er sys'tem (skwī'ĕr). *Radio.* = LINE RADIO, above.

sta'bi-li-za'tor (stā'bĭ-lĭ-zā'tĕr; stăb'ĭ-), *n.* [Cf. F. *stabilisateur.* Cf. STABILIZE.] *Aëronautics.* A stabilizer.

sta'bi-lize* (stā'bĭ-līz; stăb'ĭ-), *v. t.* **1.** *Aëronautics.* To maintain, or to make it possible to maintain, the equilibrium of (a flying machine, etc.) by means of fixed surfaces or gyroscopic or other devices not manipulated by the pilot. **2.** To make or hold steady; to prevent fluctuations; as, to *stabilize* prices.

sta'bi-liz'er* (stā'bĭ-līz'ĕr; stăb'ĭ-), *n.* *Aëronautics.* **a** A tail plane. See TAIL PLANE, below. **b** A mechanical device to stabilize the motion of an aircraft, such as a gyroscopic device, a pendulum device, or the like.

stable police. *Mil.* Enlisted men detailed to clean the stables or picket lines, and to help in the care of the horses.

staff*, *v. t.*; STAFFED (stăft); STAFF'ING. To supply (an organization, or the like) with a staff, as of officers or teachers.

‖ **staf'fage'** (stă'fäzh'; stă'fazh), *n.* [G.] The accessories of a picture or literary composition. Cf. PADDING, *n.*, 4, in *Dict.*

stage*, *n.* *Radio.* An element or part in a complex contrivance, as, in a multitube amplifier, one tube with its associated apparatus.

stag'ger*, *v. t.* **a** *Aëronautics.* To adjust (as the wings of a biplane) so that the entering edge of one wing projects beyond the entering edge of another wing. **b** To arrange (as the elements, or parts of, or periods of time) alternately, in zigzag order, or successively in a varying but regular order; as, to *stagger* the closing hours of shops and offices.

stag'ger*, *n.* *Aëronautics.* The amount of advance of the entering edge of an upper wing of a biplane, triplane, or multiplane, over that of a lower, expressed as percentage of gap. It is considered *positive* when the upper wing is forward, and is measured from the entering edge of the upper wing along its chord to the point of intersection of this chord with a line drawn perpendicular to the chord of the upper wing at the entering edge of the lower wing, all lines being drawn in a plane parallel to the plane of symmetry.

stagger wires. *Aëronautics.* Wires connecting the upper and lower surfaces of an airplane and lying in planes substantially parallel to the plane of symmetry.

stall*, *v. i.* *Aeronautics.* To lose, from any cause, the relative air speed necessary for control; to lose velocity below the minimum at which an airplane can sustain itself. See STALL, *n.*, below. — **stall'ing,** *p. pr. & vb. n.*

stall*, *n.* *Aëronautics.* The condition resulting from any diminution of the speed of a heavier-than-air flying machine beyond the point at which the machine responds to the controls, as because of engine trouble or air disturbances, a skid on a turn, an attempt to make too steep a climb, etc.

stand*, *v. i.* — **to stand by***. *Radio.* **a** Of a sending station, to be ready to send out signals, etc., but not actually doing so. **b** Of a receiving station, to remain tuned in for a sending station until it starts sending.

standard college. A college granting a bachelor's degree, after four years of study, as distinguished from a *junior college. U. S.*

standard pitch. *Aëronautics.* See PITCH, above.

standing waves. *Physics.* A system of waves produced by a reflection process in such a way that nodes and loops of the resultant system of waves remain in a fixed position in space.

Stan'ford—Bi'net' test (stăn'fĕrd-bē'nĕ'). An improved form of the Binet test, perfected at Stanford University, California. Cf. MENTAL AGE, above.

‖ **sta-nit'za** (stä-nĭt'sä), *n.* Also **sta-nit'sa.** [Russ. *stanitsa.*] A Cossack village or commune. *Russia.*

Stark effect (stärk). [After the discoverer, Prof. Johannes *Stark* (1874–), German physicist.] *Physics.* The broadening or resolution into components of spectrum lines as the result of subjecting the source of light to an intense electric field. Cf. ZEEMAN EFFECT, in the *Dict.*

sta'sis*, *n.* *Physics.* Quiescence; stagnation; — used of a mass of gas or liquid in which there is an absence of circulatory convection currents.

stat-. [See STATIC.] *Physics.* A prefix used to denote a C. G. S. electrostatic unit, as in the following table.

NAME	NATURE	EQUIVALENT
statcoulomb	quantity	$1/3 \times 10^{-9}$ coulombs
statfarad	capacity	$1/9 \times 10^{-11}$ farads
statvolt	potential	300 volts

stat'ic (stăt'ĭk), *n.* *Radio.* **a** = ATMOSPHERICS, above. **b** A type of atmospheric disturbances resulting from accumulation of electric charges on or near the antenna, as from snowflakes.

sta'tion*, *n.* *Radio.* A place, as a room, or building, equipped for transmitting or receiving radio signals.

stationary states. *Physics.* In the Bohr theory, a state of motion of the electrons in which the atom exists without radiating energy.

station selector. *Radio.* The element of a receiving set which is used to tune in the signal from any station.

stat'ism* (stăt'ĭz'm), *n.* Belief in a state government, more or less centralized, as in a republic, in contrast to belief in communism or a Soviet government.

steam roller. A road roller driven by steam; hence, *Fig. & Colloq.*, a crushing power or force used to overcome opposition, as by an arbitrary government, political party, or committee. — **steam'—roll'er,** *v. t.* *Colloq.*

stel'lite (stĕl'ĭt), *n.* [L. *stella* star + *-ite.*] *Metal.* Any of various alloys composed essentially of 75 to 90 per cent of cobalt and 10 to 25 per cent of chromium, with or without small amounts of other metals added, used for tools, knives, surgical instruments, cutlery, etc., and bearing the trademark *Stellite.*

stem'—end' rot. *Agric.* See MELANOSE, above.

stem mother. *Zool.* = FUNDATRIX, above

stem rust. *Agric.* = BLACK STEM RUST, above.

step*, *n.* **1.** *Aeronautics.* A break in the form of the bottom of a float or hull, designed to assist in securing a dynamic reaction from the water.

2. *Radio.* = STAGE, above.

ster'e-o-te-lem'e-ter* (stĕr'ĕ-ō-tē-lĕm'ĕ-tĕr; stē'rĕ-), *n.* [*stereo-* + *telemeter.*] See STEREOTELESCOPE, below.

ster'e-o-tel'e-scope (-tĕl'ĕ-skōp), *n.* [*stereo-* + *telescope.*] A telestereoscope, esp. one in which the distance between the objectives is much greater than the distance between the eyepieces. With a scale attached, the instrument (then called a *stereotelemeter*) has been used as a range finder.

ster'ic (stĕr'ĭk; stē'rĭk), *a.* [*stereo-* + *-ic* (cf. def. of STEREOCHEMISTRY).] *Chem.* Relating to the arrangement of the atoms in space; spatial; as, *steric* hindrance.

ster'i-lize*, *v. t.* To render a region unproductive of military power by forbidding the construction or maintenance of any fortification or the maintenance or assembly of any armed forces, as by the Treaty of Versailles (1919) for the left bank of the Rhine in Germany. — **ster'i-li-za'tion***, *n.*

ster'ol (stĕr'ōl; -ŏl), *n.* [From cholesterol.] *Chem.* Any solid higher alcohol, such as cholesterol, phytosterol, or cetyl alcohol.

stick control. See CONTROL STICK, above.

stiff'en*, *v. t.* *Elec.* To increase the ratio of inductance to capacity in (a circuit). *Cant.*

Stokes gun (stōks). A Stokes mortar.

Stokes (trench) mortar (stōks) [After Sir Wilfrid S. *Stokes* (1860–), Eng. inventor.] *Mil.* A light, muzzle-loading, three-inch mortar, made in four parts for easy transportation. The projectile (**Stokes bomb**) weighs 11 pounds, and is loaded with high explosive.

stop back. *Agric.* A condition in peach and pear nursery stock, brought about by the attack of the tarnished plant bug (*Lygus Pratensis* Linn.), characterized by the death of the tender terminal bud of the principal shoot and the forcing of the development of the lateral shoots.

stopping condenser. *Elec.* A condenser used in a circuit to prevent the flow of direct current but permit the flow of alternating current.

storm troops. Same as SHOCK TROOPS, above.

sto'ver*, *n.* *Agric.* Cut and cured corn and sorghum plants with the grain removed. *U. S.*

strad'dle*, *v. t.* *Artillery.* To place shots of a known range short of and beyond (an object), so as to afford a basis for calculating the true range or distance.

strafe (sträf), *v. t.*; STRAFED (sträft); STRAF'ING (sträf'ĭng). [From G. *Gott strafe England* (gŏt shtra'fĕ ĕng'lant), "God punish England," a German salutation of 1914 and later.] To punish; to inflict damage upon, as by gunfire; to shell or bombard fiercely; to castigate; — orig. used by the British soldiers in the World War. — **strafe,** *n.*

straight'—line'—fre'quen-cy con-dens'er. *Radio.* A variable condenser in which a given change of setting of the movable plates corresponds to the same change of frequency, for all settings.

straight'—side', *a.* Having straight sides; — said specif. of a pneumatic automobile tire having a straight-sided bead used with a rim which has the edges rolling outward and is divided crosswise (so that it can be sprung into the tire) or has one edge, or both edges, detachable.

strand*, *n.* **1.** A part of a cord of wood, varying from one third to one half of a cord, according to the lengths into which the pieces of wood are cut. *Local, Southern U. S.* **2.** *Aeronautics.* A kind of wire made up of several individual wires twisted together around a single wire as a core.

‖ **strand'loop'er** (strănd'lōōp'ĕr; *D.* -lōp'ĕr), *n.* [D., fr. *strand* shore + *looper* runner, fr. *loopen* to run. See LANDLOUPER.] **a** A Hottentot who picks up such a living as he can along the seashore. Cf. BEACH COMBER, 2, in the *Dict.* **b** A small sand plover. *Both South Africa.*

stra'to-sphere (strā'tō-sfēr; străt'ō-), *n.* [F. *stratosphère.* See STRATUM, SPHERE.] *Meteorol.* The upper portion of the atmosphere, above 11 kilometers, more or less (depending on latitude, season, and weather), in which temperature changes but little with altitude and clouds of water never form, and in which there is practically no convection; — originally, and still often, called the *isothermal region.*

straw boss. An assistant foreman. *Colloq.*

stray*, *n.* *Radio.* = X, *n.*, 3, in the *Dictionary.*

stream'line' (strēm'lĭn'), *n.* The path of a small portion of a fluid, supposedly continuous, commonly taken relative to a solid body with respect to which the fluid is moving; — generally used only of such paths as are not eddying.

stream'line', *v. t.* *Mech.* To give a streamline form to; to design or construct, as an automobile or airplane, with a streamline form.

stream'line', *a.* Of or pert. to a streamline; designating a motion or flow that is free from turbulence, like that of a free particle moving in a streamline; hence, *Mech.*, designating a surface, body, etc., designed to afford an unbroken flow of a fluid about it, esp. when the resistance to flow is the least possible; as, a *streamline* body for an automobile, airplane, or airship. — **streamline flow,** continuous flow of a fluid, as distinguished from eddying flow. — **s. form,** *Mech.*, a fair form intended to avoid eddying and to preserve a streamline flow.

Strel'itz (strĕl'ĭts), *n., often used erroneously as pl.; pl.* STRELITZES (-ĭt-sĕz), STRELITZI (-ĭt-sī). [Russ. *strelets* bowman.] [*Often l. c.*] A Muscovite soldier, or musketeer, belonging to an irregular body of infantry, raised by Ivan the Terrible (1529–1584) and abolished by Peter the Great in 1682, but not entirely disbanded until 1698.

strike'*, *v. i.* *Elec.* To form an arc, or electric discharge, as between the two carbons of an electric arc, or between cloud and earth.

stripe*, *n.* **a** A piece of gold, silver, silk, or cotton braid, as on the sleeve of an officer's coat, used to indicate rank or length of service. Cf. SERVICE STRIPE, above. **b** *Agric.* A fungous disease of barley characterized mainly by elongated spots or stripes on the leaves.

strip'er (strīp'ĕr), *n* One who wears stripes on his sleeve, to indicate rank or length of service (cf. STRIPE, above); — used in the U. S. Navy with reference esp. to midshipmen officers at the U. S. Naval Academy, and generally in combination, as: **one striper,** an ensign; **one and one half striper,** a lieutenant, junior grade; **two striper,** a lieutenant, senior grade; **two and one half striper,** a lieutenant commander; **three striper,** a commander; **four striper,** a captain. *Three striper* and *four striper* are sometimes used of officers in the service at large. *All Cant or Slang.*

strong point. *Mil.* A carefully prepared position in a defensive system, constructed to be held to the last, and used as the center of resistance for the line.

structural resistance. = HEAD RESISTANCE, above.

stunt*, *v. i.* [See STUNT a feat.] To perform stunts. *Colloq.*

sub*, *n.* A submarine. *Colloq.*

‖ **su-ba'shi** (sōō-bä'shē), *n.* = SUBBASSA, in the *Dict.*

sub'a-tom'ic (sŭb'ä-tŏm'ĭk), *a.* Of or pertaining to a division or part of the atom.

sub'chas'er (sŭb'chās'ĕr), *n.* *Naval.* A submarine chaser; specif., *U. S. Navy,* the first type of small craft built during the World War especially for chasing submarines.

sub'deb' (sŭb'dĕb'), *n.* A subdébutante. *Colloq., U. S.*

sub'dé'bu'tante' (sŭb'dā'bū'tänt'), *n. fem.* [*sub-,* 1 c + F. *débutante,* fem.] A young girl who is about to become a society débutante. *Colloq., U. S.*

sub'li-ma'tion*, *n.* *Psychoanalysis.* Deflection of the energy of repressed sexual impulses into avenues of cultural development and application.

sub'ma-chine' gun, *or* **Thomp'son sub'ma-chine' gun** (tŏmp'sŭn sŭb'mä-shēn'). [See SUB-, 1 c; MACHINE GUN.] A light, portable weapon, firing .45-caliber pistol ammunition on the automatic principle, provided with a pistol grip for firing as a pistol and a detachable buttstock for firing from the shoulder, and fed from a magazine or drum.

sub'ma-rine' (sŭb'mä-rēn'), *v. t.*; -RINED' (-rēnd'); -RIN'ING (-rēn'ĭng). To make an attack upon or to sink by means of a submarine, esp. by torpedoing. *Colloq.*

submarine chaser. *Naval.* Any vessel fitted to operate offensively against submarines.

submarine patrol boat. Any commercial or pleasure craft, taken over by the government for, or assigned to, submarine patrol duty.

sub'sti-tu'tion*, *n.* *Psychoanalysis.* The transference of a portion of the interest from an unconscious (repressed) form and object of gratification to some external form and goal, without the more complete evolution and transformation of the libido as in sublimation.

sub'sur'face*, *n.* That portion of a body of water which lies immediately below the surface.

sub'ti'tle* (sŭb'tī't'l), *n.* *Moving Pictures.* A brief statement thrown on the screen, generally preceding a scene which it explains.

Su'dan' dur'ra (sōō'dän', *or* sŭ-dän', dŏŏr'ä). See FETERITA, above.

Su'dan' grass. A slender annual grass (*Andropogon sorghum sudanensis*) cultivated for hay in semiarid regions.

su'ga-mo (sōō'gä-mō), *n.* [Prob. Jap.] *Bot.* A monocotyledonous plant (*Phyllospadix scouleri*), occurring along the coast from the northwestern United States to Japan. It is grown in Japan for a fertilizer and also for its fiber.

suit'case' (sūt'kās'), *n.* Also **suit case.** A flat rectangular valise or traveling bag large enough to contain a suit of clothes: — originally called *dress-suit case.*

sulfo-*. See SULPHO-, below.

sulphate pulp. A wood pulp made by the sulphate process (which see, in the *Dict.*); — called also *kraft pulp*

sul'phite* (sŭl'fīt), *n.* A person who is spontaneous and original in his habits of thought and conversation. Cf. BROMIDE, above. *Slang.* — **sul-phit'ic** (sŭl-fĭt'ĭk), *a. Slang.*

sul'pho-*. All chemical terms beginning thus are spelled also **sulfo-**. See SULPHO-, in *Dict.*

sul'pho-chlo'ride (sŭl'fō-klō'rīd; -rĭd), *n.* Also **-rid.** [*sulpho-* + *chloride*] *Chem.* **a** A compound with sulphur and chlorine; as, phosphorus *sulphochloride,* $PSCl_3$. **b** The chloride of a sulphonic acid.

sul'pho-nam'ide (-năm'īd; -ĭd), *n.* Also **-id.** [*sulphone* + *amide.*] *Chem.* The amide of a sulphonic acid; as, benzene-*sulphonamide* ($C_6H_5SO_2NH_2$) is the amide of benzene-sulphonic acid ($C_6H_5SO_3H$).

sulph'ox-yl'ic (sŭlf'ŏk-sĭl'ĭk), *a.* [*sulphur* + *oxy-,* **a** + *-yl* + *-ic,* 1 e.] *Chem.* Pert. to, or designating, a hypothetical acid H_2SO_2, known in the form of certain organic derivatives. Its salts are called **sulph-ox'y-lates** (sŭlf-ŏk'sĭ-lāts). See FORMALDEHYDE SULPHOXYLIC, above.

sum'ma-bil'i-ty (sŭm'ä-bĭl'ĭ-tĭ), *n.* Capability of being summed.

sump* (sŭmp), *n.* A reservoir at the lowest point in the oil-circulating system of an internal-combustion engine.

sun'cup' (sŭn'kŭp'), *n.* A yellow-flowered evening primrose (*Taraxia,* syn. *Œnothera, ovata*), native to California.

sun valve. *Mech.* A device, operated by the heat and light of the sun, by which beacon lights or other apparatus may be automatically turned off during the daytime.

su'per-*. A prefix freely used in recent formations, after *superman* (which see, below), to signify a person, animal, or thing which surpasses all or most others of its kind or class, as in power, size, or other characteristics; as, *superdreadnought, supersubmarine, super-Zeppelin.* Many of these formations on *super-,* however, are thus far occasional, or nonce, uses only; as, *superace, superairplane, superbrute, superbuffoon, supercannon, superclown, superconscience, supercritic, superculture, superdetective, superdramatist, superego, supergoddess, supergovernment, supergun, superhorse, supernation, supernurse,*

superpatriotism, superpilot, superrace, superrifle, superservant, supersnob, superstate, superthing, superthrill, superiramp, supertyrant, superwar, superwoman.

su'per-charged' (sū'pĕr-charjd'), *a.* Overcharged; charged to excess. — **supercharged engine,** *Mech.*, an internal-combustion engine so equipped that a greater weight of charge than normal can be delivered in the cylinders.

su'per-charg'er (sū'pĕr-char'jĕr), *n.* [See SUPER-; CHARGE, *v. t.*, 3.] A kind of air compressor used with an internal combustion engine in order to force into the cylinders a heavier charge than that which can be drawn in under the pressure of the surrounding atmosphere.

su'per-con'duc-tiv'i-ty (-kŏn'dŭk-tĭv'ĭ-tĭ), *n.* The high conductivity characteristic of metals at very low temperatures, the conductivity of a metal being greatly increased when the temperature is below a certain low critical point.

su'per-dread'nought' (sū'pĕr-drĕd'nôt'), *n.* See DREADNOUGHT, b, above.

su'per-fu'si-ble (-fū'zĭ-b'l), *a.* *Phys. Chem.* Capable of being superfused. — **su'per-fu'si-bil'i-ty** (-bĭl'ĭ-tĭ), *n.*

su'per-het' (-hĕt'). Short for SUPERHETERODYNE. *Cant.*

su'per-het'er-o-dyne (-hĕt'ĕr-ō-dīn), *a.* *Radio.* Pertaining to a form of beat reception in which beats are produced of a frequency above audibility but below that of the received signals, the current of the beat frequency being then rectified, next amplified, and finally rectified again so as to reproduce the music, speech, or the like, in the telephone receivers. Cf. BEAT RECEPTION and HETERODYNE, above. — **su'per-het'er-o-dyne,** *n.*

Su'per-man'* (-măn'), *n.* [See SUPER-.] = OVERMAN, in *Dict.*

☞ In early translations of Nietzsche, *overman* was used to translate the German word *Übermensch*, but was later largely replaced by *superman*, first used by G. B. Shaw.

su'per-pose'* (sū'pĕr-pōz'), *v. t.* *Aëronautics.* To place (main supporting surfaces) one above another.

su'per-pow'er (sū'pĕr-pou'ĕr), *n.* [*super-* + *power.*] **a** A theoretical political entity conceived as having authority over other states, esp. over the most powerful states. **b** Electric power developed by the utilization of all available water power sites or existing steam power plants in a large area, as connected parts of one system.

su'per-re-gen'er-a'tion (-rē-jĕn'ĕr-ā'shŭn), *n.* *Radio.* A method of regenerative reception in which transient currents periodically carry the process of regeneration further than is possible in the steady state. It is usually accomplished by the introduction of an auxiliary frequency lower than the radio frequency received. — **su'per-re-gen'er-a-tive** (-jĕn'ĕr-ā-tĭv), *a.*

su'per-sub'ma-rine' (-sŭb'mȧ-rēn'), *n.* See SUPER-, above.

su'per-tax' (sū'pĕr-tăks'), *n.* [*super-* + *tax.*] A tax in addition to the usual or normal tax; specif.: **a** In the United States, a surtax (which see, below). **b** In the United Kingdom, a graduated income tax, in addition to the normal income tax, imposed on the amount by which the total income of any person exceeds a certain sum. Cf. SURTAX, below.

su'per-thy'roid-ism (-thī'roid-ĭz'm), *n.* [*super-* + *thyroidism.*] *Med.* The symptoms resulting from supernormal activity of the thyroid gland. Cf. HYPERTHYROIDISM, above.

su'per-Zep'pe-lin, *or* **su'per-zep'pe-lin** (-zĕp'ĕ-lĭn; -tsĕp'ĕ-lēn'), *n.* See SUPER-, above.

sup-pres'sion* (sŭ-prĕsh'ŭn), *n.* *Psychoanalysis.* **a** The process by which an inacceptable impulse is excluded from activity with conscious awareness of the event, deliberation upon it, and possible retention of it in memory; — contrasted with *repression.* **b** Repression.

su'pra-nu'cle-ar (sū'prȧ-nū'klē-ăr), *a.* Above the nucleus. — **supranuclear cataract,** *Ophthalmology*, a cataract occurring between the nucleus and the periphery of the lens.

Supreme Council. At first, the executive body of the Peace Conference at Paris (1919), called also the *Council of Ten*, consisting of the two ranking delegates of each of the five great powers, viz., the United States, Great Britain, France, Italy, and Japan. On March 25, 1919, this body was reduced to the Council of Four (which see, above). It was reorganized in January, 1920, as the *Council of Premiers*, but continued to be known popularly as the Supreme Council until 1922. During the Peace Conference the Supreme Council decided all important questions; later it became the executive body of the Allied and Associated Powers.

Supreme War Council. The Interallied war committee, composed of political and military representatives of Great Britain, France, and Italy, and, later, of the United States, formed November 9, 1917, to watch over the general conduct of the war and to coördinate the military powers of the Allies. It was superseded in January, 1919, by the Supreme Council of the Peace Conference at Paris.

sur'face*, *n.* *Aëronautics.* An airfoil used for sustentation or control, or to increase stability; — the term applies to the whole member, and not to one side only.

sur'print' (sûr'prĭnt'), *v. t.* [*sur-* + *print.*] To print (as a name or address) over or upon (previously printed matter).

sur-re'al-ism (sŭ-rē'ăl-ĭz'm), *n.* [F. *surréalisme.*] A postwar movement of young French writers influenced by Freud, who seek in their writing to express the subconscious activities of the mind by presenting images without order or sequence, as in a dream. — **sur-re'al-ist,** *n.* — **sur-re'al-is'tic** (sŭ-rē'ăl-ĭs'tĭk), *a.* — **sur-re'al-is'ti-cal-ly,** *adv.*

sur'tax'*, *n.* Specif., in the United States, a graduated income tax, in addition to the normal income tax, imposed on the amount by which the net income of any individual exceeds a certain sum. Cf. SUPERTAX, above.

sus-pen'soid (sŭs-pĕn'soid), *n.* *Physical Chem.* A colloidal solution the dispersed particles in which are solid (like those of an ordinary *suspension* in a liquid, but more minute); — called also *suspension colloid.* Cf. EMULSOID, above. There is no sharp dividing line between suspensoids and emulsoids; low viscosity and perceptible opalescence are characteristic of the former; high viscosity and ability to form gels, of the latter.

‖ **Swa-de'shi*** (swȧ-dā'shē), *n.* *India.* **a** A movement for national autonomy. **b** Hence, a recent phase of the struggle for Swaraj, aiming primarily at the use and production of articles of home manufacture, as cloth, but also, often, advocating the boycott of foreign goods

swagger stick. *Mil.* A short light stick, ordinarily about two feet long and tipped with metal at each end, for carrying in the hand; — called also *swanking stick.*

swank*, *n.* Pretentious showing off; self-important ostentatiousness; swagger. *Slang.*

‖ **Swa-raj'** (swȧ-rȧj'), *n.* [Skr. *svarāj* self-ruling, *svārājya* independent rule; cf. L. *suus* one's own. See RAJ, RAJAH.] Self-government, or home rule; independence. *India.*

Swa-raj'ist (-ĭst), *n.* One who favors Swaraj. *India.*

sweep*, *n.* *Naut.* A wire or rope stretched between two vessels steaming a parallel course, the center or bight of the wire being allowed to sag below the surface at set depths to drag for mines, rocks, or other obstructions.

sweep'back', *n.* *Aëronautics.* Of an airplane wing, the acute angle between the lateral axis of the airplane and the projection of the wing on a plane which includes the lateral and longitudinal axes of the airplane.

sweep'er*, *n.* *Naut.* A vessel engaged in sweeping. See SWEEP, above.

swept back. *Aëronautics.* = BACKSWEPT, above.

swing'ing*, *n.* *Radio.* **a** = FADING, above. **b** Fluctuation of received wave intensity due to changes in frequency of the transmitted waves.

switch*, *v. t.* *Fig.* To turn aside; divert; shift. — *v. i.* *Fig.* To change or shift, as in a line of conduct.

switch'*, *n.*, *or* **switch line.** *Mil.* A series of communicating trenches enabling an army to shift speedily from one line of defense to another without the exposure and delay involved in building a new line, as in the German lines of defense in Belgium and France, during the World War.

swiv'el*, *n.* *Weaving.* An attachment, for a loom, consisting of a rack and pinion, used to guide back and forth small shuttles (**swivel shuttles**), over small portions of the width of the loom, by means of pinions engaging with teeth on the shuttles, thus making small spot figures in the fabric woven.

syn-ær'e-sis*, syn-er'e-sis*, *n.* *Phys. Chem.* The separation of liquid from a gel, due to contraction.

syn-apse' (sĭ-năps'), *n.* Also **syn-ap'sis.** [See SYNAPSIS.] *Physiol.* The point at which the nervous impulse passes from the axon of one neuron to the dendrites of another neuron. — **syn-ap'tic, syn-ap'ti-cal,** *a.*

syn-ap'sis*, *n.* **1.** *Biol.* The conjugation of maternal and paternal chromosomes preceding the reduction division. **2.** *Physiol.* = SYNAPSE, above.

syn'chro-scope (sĭŋ'krō-skōp), *n.* = SYNCHRONOSCOPE.

syn'di-cal* (sĭn'dĭ-kăl), *a.* [F.] Of or pertaining to, or of the nature of, syndicalism.

syn'di-cal-ism (-ĭz'm), *n.* [F. *syndicalisme.*] The theory, plan, or practice of trade-union action (originally as advocated and practiced by the French Confédération Générale du Travail) which aims by the general strike and direct action to establish control by local organizations of workers over the means and processes of production. — **syn'di-cal-ist,** *a.* & *n.* — **-cal-is'tic** (-ĭs'tĭk), *a.*

syn'di-cal-ize (-ĭz), *v. t.* To subject to syndicalism; bring under the control of syndicalists or under the conditions aimed at by syndicalism; as, to *syndicalize* a mine.

‖ **syn'di'cat'** (săn'dĕ'kȧ'), *n.* [F.] *Pol. Econ.* A labor union or trade-union. Cf. SYNDICATE, *n.*, **2**, in the *Dict.*

syn'di-cate* (sĭn'dĭ-kāt), *n.* **a** *Finance.* In Germany, a kind of cartel (which see, above) formed by manufacturers for the purpose of marketing their output, and, usually, for regulating that output in proportion to the demand. **b** A business concern which sells to the press such materials as special articles, photographs, or comic strips, for practically simultaneous publication in a number of newspapers.

syn'di-cate* (-kāt), *v. t.* To contract for publication through a syndicate.

Syn-er'e-sis*, *n.* See SYNÆRESIS, above.

syn-thet'ic (sĭn-thĕt'ĭk), *n.* *Chem.* Anything, as a chemical or drug, that is produced by synthesis.

synthetic ammonia process. See NITROGEN FIXATION.

Sy-nu'ra (sĭ-nū'rȧ), *n.* [NL.; *syn-* + Gr. οὐρά tail.] *Zoöl.* A genus of fresh-water flagellate infusorians which form globular aggregations and give off an oily substance having a cucumberlike taste, that is harmless, but disagreeable, in drinking water in which the animalcules are very numerous. Also [*l. c.*; *pl.* L. -RÆ (-rē), E. -RAS (-rȧz)], an infusorian of this genus.

‖ **ta'bi** (tȧ'bē), *n. sing. & pl.* [Japanese.] A cotton sock, usually white, having a thick sole and a separate part for the big toe, worn by the Japanese.

tach'y case' (tăsh'ĭ). An attaché case. *Colloq., Eng.*

tag day. A day on which contributions to some fund are publicly solicited, a tag being given to each contributor to wear. Cf. FLAG DAY, **b**, above. *U. S.*

tai'ga (tī'gȧ), *n.* [Russ. *tayga.*] The vast, swampy, coniferous forest region of Siberia, beginning where the tundra ends; hence, a similar region in Europe or North America.

tail*, *n.* *Aëronautics.* The rear part of an aircraft, in an airplane usually consisting of a group (**tail group,** or **tail unit**) of stabilizing planes, or fins, to which are attached certain controlling instruments, such as elevators and rudders; the empennage.

tail cups. *Aëronautics.* A steadying device, somewhat similar to a sea anchor, attached by lines at the rear of certain types of elongated captive balloons.

tail'—heav'y, *a.* *Aëronautics.* Designating an aircraft in which, in any given condition of normal flight, the nose tends to rise if the longitudinal control is released, as, for instance, when the pilot has to exert a push on the control stick or control column to maintain the given condition.

tail'—light', *or* **tail'—lamp',** *n.* A light having a red lens to indicate the rear end of a vehicle, as an automobile.

tail plane. *Aëronautics.* A stationary, horizontal tail surface, or one nearly horizontal, used to stabilize the pitching motion of an airplane; — often called *stabilizer.*

tail skid. *Aëronautics.* A small skid, or runner, attached under the tail of an airplane to support it when the airplane is in contact with the ground.

tail slide. *Aviation.* The rearward and downward motion, tail first, which certain airplanes may be made to take after being brought into a stalling position by a steep climb.

tail spin. *Aviation.* Same as SPIN, above; — a misnomer.

take*, *v. i.* — **to take off*,** to leave the surface of the land or water; to begin flight; — said of an airplane. — **take-off*,** *n.*

take'—all'*, *n.* *Agric.* A destructive disease of wheat and other cereal grasses caused by a fungus, *Ophiobolus graminis*, or *O. cariceti.*

tan'dem*, *n.* *Aëronautics.* An airplane with two or more sets of wings of substantially the same area (not including the tail group), placed one in front of the other and on about the same level.

tan'go (tăŋ'gō; *Sp.* tȧŋ'gō), *n.*; *pl.* TANGOS (-gōz). [Sp., a certain dance.] **a** A difficult dance in two-four time characterized by graceful posturing, frequent pointing positions, and a great variety of steps. **b** Any of various popular dance forms derived from this. — **tan'go,** *v. i.*

tank*, *n.* *Mil.* A kind of self-propelling engine of destruction consisting of a casement of heavy armor plates mounted on a tractor (esp. of the caterpillar type) and armed with guns or machine guns or both. It is capable of traversing very rough ground, passing over trenches, shell craters, etc. Such *tanks* were first used by the British in the advance on the Somme in September, 1916, and four chief kinds were developed during the World War: the *male* tank, the *female* tank, the *gun-carrier* (or *supply*) *tank*, and the *whippet*. Male and female tanks differed only in their armament, the male being armed with two 6-pounder Hotchkiss guns and four machine guns; the female, with six machine guns only.

☞ The name *tank* as applied to these armored tractors arose from the fact that the hull was called "a water carrier for Mesopotamia" in the shop orders in England for those first made, in order to conceal their real purpose, and this was soon shortened to "tank," which quickly came into general use for the completed tractors.

tank circuit. *Radio.* An oscillatory circuit associated with the output circuit of an electron-tube generator, which absorbs the generator output in the form of energy impulses of high value and short duration and in turn delivers its output to an antenna.

tank'er (tăŋk'ĕr), *n.* A steel cargo boat fitted with tanks for the carrying of oil, molasses, or other liquid in bulk; — called also *tank ship, tank steamer.*

tap*, *n.* *Elec.* A connection to a coil making it possible to place only part of the coil in circuit.

tar'get*, *n.* *Physics.* The metallic surface, usually of platinum or tungsten, upon which the stream of cathode rays within an X-ray tube is focused. The target thus becomes the source from which the X rays emanate.

tar'iff*, *n.* See, in the *Addenda*, UNDERWOOD TARIFF ACT, and FORDNEY-MCCUMBER TARIFF ACT.

tarnished plant bug. See STOP BACK, above.

tash-lik' (tȧsh-lēk'), *n.* [Heb. *tashlīk* thou wilt throw (see Micah vii. 19) fut. of *hishlīk*, fr. *shalak* to throw.] Among orthodox Jews, a propitiatory rite, celebrated on the afternoon of New Year's Day (Rosh Hashana), consisting in gathering at a running stream and, after reciting various Scriptural verses, esp. Micah vii. 18–20, and offering prayers, shaking the ends of the garments over the water in the belief that thus one's sins are washed or swept away.

task'set'ter (tȧsk'sĕt'ĕr), *n.* One who sets a task or tasks; specif.: **a** A workman whose rate of output on a specified task is used as a standard for other workers. **b** One who sets the tasks of workers, designating the output to be attained or the period of time for the performance of a task

Tau'be (tou'bĕ), *n.*; *pl.* TAUBEN (-bĕn). [G., lit., a dove.] A monoplane, characterized esp. by its pigeon-shaped wings with retreating, upturned wing tips capable of being flexed to maintain lateral stability.

tax'i (tăk'sĭ), *or* **tax'y,** *v. i.*; TAX'IED (-sĭd); TAX'I-ING *or* TAX'Y-ING (-sĭ-ĭng). **1.** To ride in a taxicab; go by taxicab. **2.** *Aviation.* To travel along the ground or on the water under the machine's own power, when picking out a starting place or coming in after a landing; — said of an airplane or a seaplane, or the pilot of either. Taxiing should not be confused with the run for a start.

t. b. *Abbr.* Trial balance; tubercle bacillus; hence, *Cant* or *Slang*, tuberculosis.

tear shell *or* **bomb** (tēr). *Mil.* A gas shell, or gas bomb, filled with chemicals which on explosion form a gas (**tear gas**) that blinds the eyes with tears for some time.

tea wagon*. A small table on wheels, used in serving tea and light refreshments.

Teddy bear. A stuffed toy bear of plush or like material; — so named after Theodore ("Teddy") Roosevelt, in playful allusion to his fondness for hunting big game.

tel-au'to-mat'ics (tĕl-ô'tô-măt'ĭks), *n.* [*tele-* + *automatic.*] Control at a distance (of torpedoes, boats, etc.) particularly by means of radiotelegraphic impulses. *Obs.* Cf. RADIO CONTROL, above.

tel'e-me-chan'ics (tĕl'ĕ-mē-kăn'ĭks), *n.* [*tele-* + *mechanics.*] The science of operating apparatus or mechanisms, as motors, at a distance from the operator. Cf. TELEMECHANIC, in *Dict.*

telephone transmitter. *Elec.* A device, as a microphone, for converting sound into electric impulses or varying current. Another form is the same device as the telephone receiver, but with a reversible action.

tel'er-gy (tĕl'ĕr-jĭ), *n.* [*tele-* + Gr. ἔργον work.] *Psychol.* The supposed action of one brain on another at a distance by means of a hypothetical force which directly affects the brain of the percipient. Cf TELEPATHY, in *Dict.* — **tel-er'gi-cal** (tĕl-ûr'jĭ-kăl), *a.* — **tel-er'gi-cal-ly,** *adv.*

tel'e-scribe' (tĕl'ĕ-skrīb'), *n.* [*tele-* + L. *scribere* to write.] *Elec.* A phonograph for recording telephonic messages.

tel'e-sis (tĕl'ĕ-sĭs), *n.* [NL., lit., completion; formed with Gr. term. *-σις* (as if *τέλεσις*) fr. *τελέειν, τελεῖν*, to complete, perform, fr. *τέλος* end.] Progress intelligently planned and directed; the attainment of desired ends by the application of intelligent human effort to the means. *L. F. Ward*

tel'e-type (tĕl'ĕ-tīp), *n.* [*tele-* + *type*] *Elec.* A system of communication in which a typewriter is operated at a distance by means of electrical signals.

☞ *Teletype* is a trade-mark name.

tel'o-ki-ne'sis (tĕl'ō-kĭ-nē'sĭs; -kī-nē'sĭs), *n.* [NL.; Gr. *τέλος* end + *κίνησις* motion.] *Biol.* The rearrangement of nuclei and other bodies in the telophase stage of mitosis.

tel'o-syn-ap'sis (-sĭ-năp'sĭs), *n.* [NL.; Gr. *τέλος* end + *synapsis.*] *Biol.* End-to-end pairing of chromosomes at synapsis. Cf. PARASYNAPSIS, above.

‖ **Ten-denz'** (tĕn-dĕnts'), *n.*; *pl.* TENDENZEN (-dĕn'tsĕn). [G.] Lit., tendency; purpose; — used attributively of novels, poems, or dramas having an aim or purpose, usually political, social, or religious.

ten'der-foot'* (tĕn'dĕr-fo͝ot'), *n.* See BOY SCOUT, above.

ten'si-om'e-ter (tĕn'sĭ-ŏm'ĕ-tĕr), *n.* [*tension* + *-meter.*] *Mech.* A device for determining tautness, as in the wires of an airplane, in which a segment of wire between two bridges is made to vibrate, the pitch indicating the tension.

ten'sor*, *n.* *Math.* Any of an extensive class of differential expressions appearing in vector analysis and coördinate

transformation, and distinguished by the property that any linear relation holding among tensors of the same type in one system of coördinates will also hold in any other — a property of decisive significance for the mathematical development of the generalized theory of relativity.

tep'a-ry bean (tĕp'ə-rĭ). [Sp., fr. the Papago Indian language.] An annual twining bean (*Phaseolus acutifolius*), native to southwestern U. S. and Mexico. A variety, *latifolius*, resisting heat and drought, was introduced into southwestern agriculture about 1912.

Ter'ri-to'ri-al-ism* (tĕr'ĭ-tō'rĭ-əl-ĭz'm), *n.* Among the Jews, a doctrine, theory, or movement which seeks to bring about the settlement of the Jews in some region where they will be autonomous, or at least will have full political privileges and constitute a majority of the population. Cf. ZIONISM, in the *Dictionary;* ITO, above. — **-al-ist**, *n.*

ter'ror*, *n.* [*cap.*] **a** The state of intense fear caused by the systematic use by a party or faction of violent means, as bloodshed, imprisonment, and confiscation, to maintain itself in power, as in the Reign of Terror in France in 1793–4 (which see, under REIGN, in the *Dict.*), or as in Russia, Finland, Hungary, etc., since 1917, either where the temporary government in control is revolutionary (**Red Terror**), or monarchistic or reactionary (**White Terror**). Cf. also WHITE TERROR, in the *Dictionary.* **b** Hence, the party or movement which inspires this state of fear.

tes'ser-act (tĕs'ĕr-ăkt), *or* **tes'sa-ract**, *n.* [Gr. *τέσσαρες* four + *ἀκτίς* ray, spoke (of a wheel), with reference to the number of its axes.] See FOURTH DIMENSION, above.

teth'e-lin (tĕth'ē-lĭn), *n.* [Gr. *τεθηλώς* luxuriant, adj. sense of p. perf. of *θάλλειν* to abound + *-in*. Cf. THALLUS.] *Physiol. Chem.* A lipoid, extracted from the anterior lobe of the pituitary gland, which has an accelerating effect on growth.

tet'ra-chlor-eth'ane (tĕt'rə-klōr-ĕth'ān), **tet'ra-chlo'ro-eth'ane** (-klō'rō-ĕth'ān), *n. Chem.* Either of two tetrachloro derivatives of ethane, $CHCl_2CHCl_2$ and CH_2ClCCl_3. The former, or symmetrical form, is called also *acetylene tetrachloride*. It is a colorless liquid formed by the union of acetylene and chlorine and is used as a solvent.

tet'ra-chlo'ro- (-klō'rō-). *Chem.* A combining form (also used adjectively) signifying the *presence of four chlorine atoms* in a compound.

tet'ra-lin (tĕt'rə-lĭn), *n.* Also **-line** (-lĭn; -lēn). [*tetra-* + *yl* + *-in* (*-ine.*)] *Chem.* **a** A colorless oil, $C_{10}H_{12}$, obtained by the addition of four atoms of hydrogen to naphthalene in presence of a catalyzer, and used as a solvent and motor fuel. **b** Less commonly, acetylene tetrachloride, a liquid, $C_2H_2Cl_4$, used as a solvent.

tet'ra-ploid (tĕt'rə-ploid), *a.* [Gr. *τετραπλόος, τετραπλοῦς*, fourfold + *-oid.*] *Biol.* Having four times the normal number of gametic chromosomes.

tet'ra-ploi'dy (-ploi'dĭ), *n. Biol.* State of being tetraploid.

‖ **Teu'fel-hund'** (toi'fĕl-hōōnt'), *n.; pl.* TEUFELHUNDE (-hōōn'dĕ). [G.] = DEVIL DOG, above.

Texas leaguer. [From the *Texas* (baseball) *League.*] *Baseball.* A fly that falls too far out to be handled by an infielder and too close in for an outfielder. *Cant.*

tez'ke-re (tĕz'kĕ-rē), *n.* Also **tes'ke-re.** [Turk.] = TEZKIRAH.

Tha'is (thā'ĭs; *F., as name of opera,* tà'ēs'), *n.* **1.** An Athenian hetæra celebrated for her beauty. She went with Alexander on his expedition into Asia. After Alexander's death she became a mistress of Ptolemy I. of Egypt.

2. A beautiful Egyptian woman of the fourth century, who, according to tradition, was converted by a Theban anchorite from a dissolute life. She entered a monastery where she lived in solitary penance for three years and died in peace. This tradition furnishes the theme of a romance by Anatole France, upon which is based the opera "Thaïs," of which the libretto is by Louis Gallet (1835–1898) and music by Jules Émile Frédéric Massenet (1842–1912).

the'a-ter*, **the'a-tre***, *n.* Material or method suitable for successful presentation in a theatrical performance; as, a play of traded identity is not good *theater. Cant.*

‖ **thē' dan'sant'** (tā' dan'saN'); *pl.* THÉS DANSANTS. [F., lit., dancing tea.] An afternoon entertainment at which there is dancing and at which tea and other refreshments are served.

thermal ammeter. *Elec.* An ammeter operated by the heating of a wire or metal strip. Cf. EXPANSION AMMETER.

ther'mi'on (thûr'mī'ŏn), *n.* [Gr. *θέρμη* heat + *ion.*] *Physics.* An electrically charged particle emitted by an incandescent substance; a free corpuscle within the body of a metal or other substance. Thermions are either negatively charged (electrons) or positively charged (ions).

ther'mi-on'ic (thûr'mĭ-ŏn'ĭk), *a. Physics.* Of or pertaining to, or of the nature of, a thermion or thermions. — **thermionic current**, an electric current due to the directed movements of thermions, as in the electric discharge through a vacuum tube with the cathode incandescent. — **thermionic valve**, *Elec.*, an electron tube.

ther'mi-on'ics (-ĭks), *n.* The branch of physics dealing with phenomena arising from the existence of thermions.

ther'mo-am'me'ter (thûr'mō-ăm'mē'tĕr), *n.* [*thermo-* + *ammeter.*] *Elec.* A thermal ammeter in which the heat effect is indicated by a thermocouple.

ther'mos bot'tle *or* **flask** (thûr'mŏs). [Gr. *θερμός* hot. See THERMAL.] A kind of vacuum bottle or Dewar flask, bearing the trade-mark *Thermos.* See VACUUM BOTTLE, below. Cf. DEWAR VESSEL, in the *Dict.*

third service. See AIR SERVICE, above.

thorium D. *Chem.* A radioactive product intermediate between thorium C and the inactive end product (called **thorium E**, or **thorium lead**). See THORIUM, in the *Dict.*

Thos (thŏs), *n.* [L. *thōs*, fr. Gr. *θώς* jackal.] A subgenus or genus of the dog family, containing the African jackals.

three—electrode electron tube. = ELECTRON TUBE, above.

three striper. *Naval.* See STRIPER, above.

thrift stamp. A war-savings stamp of the denomination of 25 cents, issued by the Government from Dec. 3, 1917, to Dec. 31, 1921, and sold for the raising of war revenue from the loan of small savings and to encourage thrift. See WAR-SAVINGS STAMP, WAR-SAVINGS CERTIFICATE, below. *U. S.*

throm'bo-gen (thrŏm'bō-jĕn), *n.* [*thrombin* + *-gen* **a.**] *Physiol. Chem.* A substance supposed to exist in the blood plasma, giving rise to thrombin at the time of clotting.

throm'bo-ki-nase (-kĭ-nās), *n.* [*thrombogen* + Gr. *κινεῖν* to move + *-ase.*] *Physiol. Chem.* A substance, present in the tissues, which accelerates the clotting of blood, presumably by converting thrombogen into thrombin. It is thought to be a phospholipin of the cephalin group.

throm'bo-plas'tic (-plăs'tĭk), *a.* [*thrombo-* + *-plastic.*] *Physiol. Chem.* Accelerating the action of thrombin, or of thrombogen, in clotting blood. — **thromboplastic substances**, certain substances in the tissue of the body supposed to aid in the process of clotting blood.

throm'bo-plas'tin (-tĭn), *n.* Thrombokinase.

through street. In some American cities, a street in which all vehicles have legal right of way over vehicles coming from intersecting streets.

throw'back'*, *n.* **a** Reversion to an ancestral type or to an earlier phase of civilization; also, an instance or product of such reversion; as, a *throwback* to Puritanism. **b** A reversal or backward deviation from one's path or route. **c** *Moving Pictures.* A scene or action from the past, interrupting the action of the present.

thrust*, *n. Engin.* The force exerted endwise through a propeller shaft, as of a vessel or aircraft, due to reaction of the water or air on the revolving propeller blades or vanes and serving to drive the craft ahead

thumb'print' (thŭm'prĭnt'), *n.* An impression made by the thumb, esp. a print made by the inside of the first joint and showing its characteristic lineation. Cf. FINGERPRINT, above. — *v. t.* To make a thumbprint or thumbprints of.

tick'ler coil, *or* **tick'ler***, *n. Elec.* = FEED-BACK COIL.

tic'—po-lon'ga (tĭk'pō-lŏn'gà), *n.* [Singhalese *tic-polangā*, fr. *tic* spot + *polangā* viper; also *tit-polangā*, fr. *tit-* spotted (cf. *tita* spot) + *polangā.*] *Zool.* The jessur.

Ti'ger*, the. Georges E. B. Clemenceau; — a nickname.

tight coupling. *Elec.* Coupling such that currents flowing in the two circuits have a considerable effect on each other, the coupling coefficient being relatively large

tight'wad' (tīt'wŏd'), *n.* [See 1st WAD, 4.] One who keeps his "wad" tightly rolled; one who spends, lends, or gives away money grudgingly, or not at all. *Slang, U. S.*

tik'ker (tĭk'ĕr), *or* **tick'er***, *n. Radio.* A form of interrupter, or chopper, used as a detector of continuous waves, consisting of a rapidly rotating wheel and a fine wire brush, the current being made and broken by momentary contacts between the brush and a continuous strip of conducting material in the rim of the wheel.

time space, *or* **space time.** *Math.* The four-dimensional manifold resulting from the fusion of time and (three-dimensional) space, that is, from the continuous repetition of all instantaneous space through each instant of time, in which fusion the special dimensions of space and of time may be treated as no longer intrinsically distinguishable.

tin hat *or* **helmet.** A steel helmet. *Soldiers' Slang.*

Ti-tan'ic (tī-tăn'ĭk), *n.* A British steamship of 46,328 gross tonnage, which, on April 14, 1912, during her maiden voyage from Liverpool to New York struck an iceberg in lat. 41° 46′ N, long. 50° 14′ W, and sank with a loss of 1,513 souls out of a total of more than 2,200 on board.

ti'tle*, *n. Moving Pictures.* A subtitle.

ti-trim'e-try (tī-trĭm'ĕ-trĭ), *n. Chem.* Measurement or analysis by titration. — **ti'tri-met'ric** (tī'trĭ-mĕt'rĭk), *a.*

T. N. T., *or* **TNT.** *Abbr.* Trinitrotoluene, or trinitrotoluol.

tobe (tōb), *n.* [Ar. *thawb* garment.] A piece of cotton cloth, of any of various colors and from 12 to 15 feet long, worn by natives as an outer garment. *No. & Cen. Africa.*

‖ **tol'do** (tōl'dō), *n.* [Sp., of uncert. origin.] A rude shelter, as a tent or hut, of the Indians of South America.

tone poem. *Music.* An orchestral composition of which the tone suggests poetic sentiments or images; — a variety of the symphonic poem, developed esp. by Richard Strauss.

tone wheel. *Radio.* A high-speed interrupter or commutator used for reception of continuous waves. It is run at a speed slightly different from the synchronous speed for the wave frequency, and thus produces a current of low frequency, or audio frequency.

tong (tŏng), *n.* [Chinese *t'ang*[2], lit, hall.] In China, an association, secret society, or organization of any kind; in the United States, usually, a secret association of Chinese, such as that of the highbinders — **tong'man** (-mən), *n.*

ton'o-scope (tŏn'ō-skōp; tō'nō-), *n.* [*tono-* + *-scope.*] *Psychol.* An instrument with which the tonal accuracy of the musical voice is visually registered and measured.

ton'sil-lec'to-my (tŏn'sĭl-lĕk'tō-mĭ), *n.* [L. *tonsillæ* tonsils + E. *-ectomy.*] *Med.* Operative removal of the tonsils

top grafting. *Hort.* Grafting in which the scion is inserted in the top or branches of the plant. Cf. CROWN GRAFTING and ROOT GRAFTING, in the *Dict.*

to'pi (tō'pĭ), *n.; pl.* **-pis** (-plz). An antelope (*Damaliscus corrigum jimela*) of eastern Central Africa, having a glossy purplish brown coat. Also, any of various related varieties native to districts south of the Sahara.

top'i-cal* (tŏp'ĭ-kăl), *a.* Pert. to the topics of the day; containing allusions of local or temporary interest (often humorous); as, a *topical* song.

top sergeant. The first sergeant of a military company, battery, or troop. *Colloq.*

torch'bear'er*, *n.* See CAMP-FIRE GIRL, above.

tor-pe'do*, *n.* An automobile with a torpedo body. *Cant.*

torpedo body. An automobile body which is built so that the side surfaces are flush. *Cant.*

tor-pe'do-plane' (tôr-pē'dō-plān'), *n.* An airplane specially fitted for carrying and discharging torpedoes.

torpedo school. *Naval.* A school for teaching and training officers and men to handle torpedoes, as at a torpedo station. Cf. TORPEDO STATION, in the *Dictionary.*

tour'ing* (tōōr'ĭng), *p. pr. & vb. n.* of TOUR. Hence: *p. a. Automobiles.* Of a coupé or sedan, having a permanent top but removable or disappearing panels and frames along the sides, so that they can be made open from windshield to back. See AUTOMOBILE, *Illust.*, in the *Dict.*; cf. SEDAN, above, and TOURING CAR, in the *Dictionary.*

toxic smoke. See GAS, above.

tra-bant' (trà-bänt'), *n.* [G. *trabant* life guard, satellite; cf. LG. *dravant.* Of uncert. origin; perh ultimately fr. Pers. *darbān* porter, warder, or perh. fr. Bohem. *drāb* foot soldier. Cf. DRABANT.] Bodyguard; armed attendant, esp. of royalty, as in some European countries. *Chiefly Hist.*

trac'er* (trās'ĕr), *n.* Any device, as one producing a trail of smoke by day or of fire by night, attached, or designed to be attached, to a projectile to enable the gunner to observe its flight and thus correct his aim. — **tracer bullet.**

track*, *n.* **1.** Collectively, a number of competitive exercises comprising foot races, weight throwing, jumping, etc.; — often used attributively; as, a *track* athlete.

2. See TREAD, below.

trac'tor*, *n.* **1.** An automobile used for drawing or hauling something, as a vehicle, plow, or harrow.

2. An airplane (commonly single-engined) having the propeller or propellers forward of the main supporting surfaces; — called in full *tractor airplane.*

tractor propeller. *Aeronautics.* A propeller which is placed at the forward end of its shaft and pulls on the thrust bearing instead of pushing. Cf. PUSHER, above.

trade acceptance. *Com.* A bill of exchange arising out of a current merchandise transaction, drawn by the seller of the goods on the buyer for the purchase price and accepted by the buyer by a signed acknowledgment across the face of the instrument. Cf. BANKERS' ACCEPTANCE, above.

trade agreement. *Trade-Unionism.* An agreement between an employer and a trade-union, or the like, which fixes wages, hours of labor, or working conditions.

traf'fic*, *n.* The vehicles, persons, etc., passing along a street or road; the vessels, etc., which pass along a river, through a channel, or the like

traffic manager. One employed, as in an industrial establishment, to superintend the routing of shipments, to adjust claims, to check up waybills, and the like.

trail*, *n.* See HIGHWAY, above.

trailing edge. *Aeronautics.* The rearmost edge of an airfoil or a propeller blade. Cf. LEADING EDGE, above.

trail rope. The long trailing rope attached to a spherical balloon, to serve as a brake and as a variable ballast.

train'ee' (trān'ē'), *n.* One that is undergoing training.

tram'po-lin, -line (trăm'pō-lĭn), *n.* [It. *trampoli* stilts.] An exhibition or performance in which the actors or participants are on stilts. — *v. i.* To walk on, or as on, stilts.

trans'at-lan'tic (trănz'ăt-lăn'tĭk), *n.* One who dwells, or something that is, across the Atlantic; esp., an American. — **trans'at-lan'ti-can** (-tĭ-kən), *n.* — **trans'at-lan'ti-cism** (-sĭz'm), *n. All Chiefly Eng.*

trans'fer-ee'*, *n.* One who is transferred, as from one grade or position to another.

trans-fer'ence*, *n. Psychoanalysis.* Direction of erotic feelings and desires, especially as unconsciously retained from childhood, toward a new object. *Transference* is the chief factor in psychoanalytic therapy. Cf. RESISTANCE.

trans-hu'mance (trănz-hū'məns), *n.* [F.] The seasonal moving of live stock, esp. from plains to mountains and back, to secure pasture.

trans-mis'sion*, *n. Radio.* Act or process of transmitting; also, passage of radio waves in the space between transmitting and receiving stations.

transmission efficiency. *Elec.* In wire or radio communication, the ratio of the power received over a transmission path to the power transmitted; the ratio of the output to the input power, of a circuit or device.

transmission unit. *Elec.* In radio or wire communication, a unit of power ratio used to express gain or loss in transmission of a wave or current. For any power ratio the number of *transmission units* is ten times the common logarithm of the power ratio. For current ratios, the number of *transmission units* is twenty times the common logarithm of the current ratio.

trans-mit'*, *v. t. & i. Radio.* To send out (a signal) by means of radio waves.

trans-mit'ter*, *n. Radio.* **a** A transmitting set. **b** A transmitting station. **c** A person operating a transmitting station.

transmitting set. *Radio.* Apparatus for transmitting radio waves; specif., the portion of a complete transmitting station which converts the alternating current produced in the key or modulating device into a radio-frequency current and delivers it to the antenna.

transmitting station. *Radio.* An assemblage of equipment to transmit radio waves, including an antenna, transmitting set, and telephone transmitter or key.

trans-po'lar (trănz-pō'lär), *a.* Moving or extending across the (north or south) pole, or polar regions; as, a *transpolar* flight.

transverse dihedral. = DIHEDRAL, *n.*, above.

tra-pez'ing (trə-pēz'ĭng), *n.* Act or action of performing on the trapeze. — **tra-pez'ist** (-pēz'ĭst), *n.*

trav'e-logue (trăv'ē-lôg), *n.* [*travel* + Gr. *λόγος* speech.] Also **trav'e-log.** A talk or lecture on travel, usually with illustrations, as with the stereopticon or cinematograph.

tread*, *n.* Of a vehicle, esp. an automobile, the distance from side to side between the points of contact with the road, or other surface, of a pair of wheels; the gauge.

treasury savings certificate. A registered, nontransferable certificate of the United States government, issued between 1921 and 1924, in denominations of $25, $100, and $1,000 maturity value five years from date of issue, the interest rate being about 4½ per cent per annum compounded semiannually, if held to maturity.

trea'ty*, *n.* For treaties of *Lausanne, Neuilly-sur-Seine, Saint-Germain, Sèvres, Trianon, Versailles,* see WORLD WAR, below.

treaty port. A sea or river port, later, also an inland city, opened by treaty to foreign trade; — used esp of certain ports in China, and, formerly, in Japan and Korea.

tre'fa (trā'fä), *a.* Ceremonially unclean, according to the Jewish law; **tref.** See TREF, in the *Dictionary.*

trench back. *Med.* A painful condition of rigidity of the back often occurring in soldiers, resulting from the constrained position necessary in trench duty.

trench disease. *Med.* **a** Trench fever. **b** Trench nephritis.

trench fever. *Med.* A fever, affecting soldiers in the trenches, spread by lice.

trench foot *or* **feet.** *Med.* An affection resembling that attending chilblains, marked by blueness or redness of the feet and in severe cases by gangrene, due to the combined effect of cold and wet upon the feet; — so called from its prevalence among soldiers serving in the trenches.

trench gun *or* **mortar.** A small portable cannon or mortar, usually fired from a trench, used at short range for dropping bombs or similar projectiles into an enemy's trenches.

trench nephritis. *Med.* An acute nephritis, resulting from exposure, occurring in soldiers on trench duty.

trench sickness. = TRENCH DISEASE, above.

trench warfare. *Mil.* Warfare in which the opposing forces face each other in trenches. Mining and countermining, the digging of dugouts and shelters, and construction of an elaborate trench system, protected by barbed wire entanglements, are its chief features.

Tren'tine (trĕn'tēn; -tĭn). *a.* Of or pertaining to Trent, a city of Tirol; esp., pertaining to the Council of Trent.
Trep'o-ne'ma (trĕp'ō-nē'mȧ), *n.* [NL.; Gr. *τρέπειν* to turn + *νῆμα* thread.] *Bact.* A genus of microorganisms sometimes placed with *Spirochæta* but now commonly regarded as related to *Trypanosoma*, among the protozoans. The organism consists of slender cells with undulating membrane. *T. pallidum* (syn. *Spirochæta pallida*) causes syphilis.
tri'al-ism*, *n.* [Cf. DUALISM.] A federation or union of three states. — **tri'al-ist**, *n.*
tri'an'gle*, *n.* A group or set of three; esp., a group of three persons whose mutual interests are in some way complicated, as by sex relationship; also, a complicated situation involving three objects, persons, or the like; as, the eternal *triangle;* human *triangle.*
tri-an'nu-al (trī-ăn'ū-ȧl), *a.* Triennial. *Rare.*
tric'o-lette' (trĭk'ō-lĕt'), *n.* [*tricot* + *-lette* (as in flan*nelette*). See -ETTE.] A kind of dress goods similar to Jersey cloth, but made of cotton or fiber silk.
tri'fa (trī'fȧ), *a.* Var. of TREFA, above.
tri-hy'drol (trī-hī'drōl; -drŏl), *n.* See HYDROL, **1**, above.
trim'mer*, *n. Coal Storage* An apparatus for trimming a pile of coal into a regular form, as of a cone or prism.
tri-ni'tride (trī-nī'trīd; -trĭd), *n.* Also **-trid.** [*tri-* + *nitride.*] *Chem.* A nitride having three atoms of nitrogen in the molecule.
tri-ni'tro-cre'sol (trī-nī'trō-krē'sōl; -sŏl), *n.* [*trinitro-* + *cresol.*] *Org. Chem.* A compound, $C_7H_5O_7N_3$, closely related to picric acid and similarly used as an explosive. It is more sensitive to shock than picric acid.
tri-ni'tro-tol'u-ene (-tŏl'ū-ēn), *n.* [*trinitro-* + *toluene.*] *Org. Chem.* Any of several isomeric compounds, $CH_3C_6H_2(NO_2)_3$, made by nitrating toluene; specif., the *α-*, symmetrical, or 2, 4, 6-, form, resembling picric acid; — called also **tri-ni'tro-tol'u-ol** (-ŏl; -ōl). *Abbr., T. N. T.* It forms pale yellow crystals darkening to deep brown and is insensitive to friction or ordinary shock. It is an ingredient of various explosives and is also used alone as a filling for shells.
tri-ni'tro-xy'lene (-zī'lēn), *n.* [*trinitro-* + *xylene.*] Also **tri-ni'tro-xy'lol** (-zī'lōl; -lŏl). *Chem.* Any of several isomeric trinitro derivatives, $C_6H(CH_3)_2(NO_2)_3$, of the three xylenes. Solid products containing one or more of these isomers and resembling trinitrotoluene in explosive properties are obtained by nitrating commercial xylene.
tri'ode (trī'ōd), *n. Elec.* = ELECTRON TUBE, above.
tri-pep'tide (trī-pĕp'tīd; -tĭd), *n.* See PEPTIDE, above.
Tri'ple En'tente' (trĭp''l ȧn'tȧnt'). An understanding constituting a virtual alliance between France, Great Britain, and Russia. Important steps in its development were: (1) the consummation of an alliance between France and Russia during the years 1890–1893; (2) the adjustment in 1904 of questions in dispute between France and Great Britain, as with reference to Egypt, Morocco, etc.; (3) the adjustment in 1907 of points at issue between Great Britain and Russia, esp. as to their relations in Asia.
triplex process. *Metal.* A process for making steel in which the material is partially treated in a Bessemer converter, transferred without interruption to an open-hearth furnace for the second stage of the treatment, and then finished in an electric furnace.
trip'loid (trĭp'loid), *a.* [Gr. *τριπλόος, τριπλοῦς*, threefold + *-oid.*] *Biol.* Having treble the number of chromosomes characteristic of germ cells. See HAPLOID, in the *Dict.*
trom'bash. Var. of TRUMBASH, below.
‖ **tronk** (trŏnk), *n.* [Cape Dutch, fr. Port. *tronco*, tree trunk, the stocks, prison, fr. L. *truncus.*] A prison; jail; lockup. *So. Africa.*
troop*, *n.* See BOY SCOUT, above.
troph'o-zo'ite (trŏf'ō-zō'īt), *n.* [*tropho-* + Gr. *ζῷον* animal + *-ite*, **2 e.**] The adult stage of Protozoa of the subphylum Sporozoa.
tro-pis'tic (trō-pĭs'tĭk), *a. Biol.* Of or pertaining to, or characteristic of, tropism.
trop'o-pause (trŏp'ō-pōz), *n.* [Gr. *τρόπος* (as in *troposphere*) + *παῦσις* a ceasing, fr. *παύειν* to cause to stop. See PAUSE, *n.*] *Meteorol.* The top of the troposphere.
trop'o-sphere (-sfēr), *n.* [F. *troposphère*, fr. Gr. *τρόπος* a turn, but in sense as if fr. *τροπή* a turn or change (both fr. *τρέπειν* to turn) + F. *sphère* sphere. See TROPE, SPHERE.] *Meteorol.* All that portion of the atmosphere below the stratosphere. It is that portion in which temperature generally rapidly decreases with altitude, clouds form, and convection is active.
tro'tol (trō'tōl; -tŏl), *n.* Trinitrotoluene (which see, above).
tro'tyl (trō'tĭl), *n.* Trinitrotoluene (which see, above).
tru'cial (trōō'shȧl), *a.* Of, pertaining to, or bound by the conditions of, a truce; — used esp. with reference to certain Arab tribes (see TRUCIAL CHIEF, below), or their territory; as, *Trucial* Coast, *Trucial* League, *Trucial* sheik, etc. — **Trucial chief**, the chief, or leader, of any of certain Arab tribes of the Oman coast which, at various times since 1820 (esp. in 1853), have entered into treaty obligations with Great Britain to cooperate in maintaining the maritime peace of the Persian Gulf and adjacent waters, for which purposes they have joined in a league (**Trucial League**).
trum'bash (trŭm'băsh), *n.* Also **trom'bash.** [Native name.] A kind of boomerang used by some Sudanese tribes.
trust'i-fy (trŭs'tĭ-fī), *v. t.*; -FIED (-fīd); -FY'ING. To form into a trust; make a trust of (as by combining a number of separate businesses); — chiefly in *p. p., trustified.* — **trust'i-fi-ca'tion** (-fĭ-kā'shŭn), *n. Both Commercial Cant.*
try'out' (trī'out'), *n.* In sports, a test by which the fitness of a contestant to remain in a certain class is determined; hence, a similar test or trial of one in any occupation, calling, or the like.
T. S*. *Abbr.* Test Solution; Transport and Supply.
tsam'ba (tsȧm'bȧ), *n.* [Tibetan *rtsām-pa.*] Barley parched and ground; — the chief cereal food in Tibet and neighboring parts of Mongolia.
T U. *Abbr. Radio.* (no period, TU) Transmission unit.
tube*, *n. Radio.* An electron tube.
tube transmitter. *Radio.* A transmitting set in which electron tubes are used to convert the applied electric power into radio-frequency power.
‖ **Tu'chun'** (tōō'shōōn'), *n.* [Chin. *tu chün.*] In China, since 1916, the title of the military governor of a province; a war lord. — **Tu'chun'ate** (-ăt), *n.*
tu'la-ræ'mi-a, tu'la-re'mi-a (tōō'lȧ-rē'mĭ-ȧ), *n.* [NL.; *Tulare* (see in *Gaz.*) + *-æmia, -emia.*] *Med.* A disease caused by a microörganism (*Bacterium tularense*) appearing in rodents, transmitted by insects, esp. the deer fly, and producing in man a depressing fever which continues for several weeks.
tune*, *v. i.* — **to tune in**, *Radio*, to adjust the receiving apparatus to resonance with the frequency of a particular sending station from which signals are to be received.
tune*, *v. t.* — **to tune out**, *Radio*, to keep (signals, messages, or the like) from affecting receiving apparatus by tuning or adjusting the latter so that it will not respond to their frequency. — **to tune up**, *Mach.*, to make the necessary adjustments, esp. the finer adjustments which are necessary to bring an engine, as an automobile or airplane engine, into first-class running condition.
tun'er* (tūn'ĕr), *n. Radio.* The part of a radio receiving set consisting of the circuit or circuits used to tune in.
tuning coil. *Elec.* A tuner consisting of a single coil of variable inductance. See TUNER, 3, in *Dict.*
tu'pek (tōō'pĕk), **tu'pik** (-pĭk), *n.* Var. of TOPEK, in *Dict.*
Tur'cize (tûr'sīz), *v. t.* Var. of TURKIZE.
tur'key-trot' (tûr'kĭ-trŏt'), *n.* An eccentric ragtime dance, danced with the feet well apart and with a characteristic rise on the ball of the foot, followed by a drop upon the heel. Similar dances are the *bunny hug* and *grizzly bear.*
Turk'ize (tûr'kīz), *v. t.* To render Turkish.
turn indicator. *Aeronautics.* An instrument showing when the direction of the line of flight, or the direction of the projection of that line on a horizontal plane, is altering. Some kinds show also the rate of turn, in terms either of the angular velocity or of the radius of curvature.
turn meter. *Aëronautics.* An instrument similar to a turn indicator, but which shows quantitatively the rate of turn in terms of the angular velocity or the radius of curvature.
turn'o'ver*, *n.* **a** A cycle of purchase, sale, and replacement of a stock of goods; as, a *turnover* four times a year. Also, the value of goods involved in the process; as, the *turnover* of British trade in 1916. **b** The number of persons hired within a given period to replace those leaving or dropped from a working force, or the ratio of this number to the number in the average force maintained; as, a *turnover* of 50 per cent a year. Called, specif., *labor turnover.*
twilight sleep. [Literal translation of G. *dämmerschlaf.*] A condition of partial narcosis, or stupor, induced, by the action of a combination of scopolamine and morphine or a morphine derivative, for the purpose of ameliorating the pains of childbirth.
twilight state. *Med.* A condition, occurring in various mental disturbances, in which the individual is in a dreamy condition and often performs acts logically connected though governed by inner complexes rather than external reality.
twist*, *v. t. Life Insurance.* To induce (a person) to drop a policy already in force in a company other than that of the twisting agent for one in the agent's company. — **twist'er**, *n.*
two striper. See STRIPER, above.
Tyn'dall beam, Tyn'dall cone (tĭn'dȧl). [After John *Tyndall*, British physicist.] *Phys. Chem.* The luminous beam or cone seen when a narrow pencil of light is passed through a disperse system (e. g. smoky or mist-laden air).
Tyn'dall me'ter, *or* **tyn'dall-me'ter** (-mē'tĕr), *n.* An apparatus for measuring the brightness of the Tyndall beam.
type*, *v. t. Med.* To compare (samples of blood for transfusion) in order to determine the compatibility of the blood of the donor for transfusion to that of the receptor.
typh-lol'o-gy (tĭf-lŏl'ō-jĭ), *n.* [Gr. *τυφλός* blind + *-logy.*] The scientific study of blindness, its causes, effects, etc.; the branch of science that deals with blindness.
ty'pho-ma-la'ri-a (tī'fō-mȧ-lā'rĭ-ȧ; 115), *n.* [*typhus* + *malaria.*] *Med.* A supposed compound of typhoid fever and malaria; a disease with typhoid symptoms, assumed to be of malarial origin.
ty'po-script (tī'pō-skrĭpt), *n.* [*typo-* + *script.*] Typewriting; typewritten matter; typescript.

‖ **Ü'ber-mensch** (ü'bĕr-mĕnsh), *n.; pl.* -MENSCHEN (-mĕn'shĕn). [G.] Overman; superman. See SUPERMAN, above.
U'—boat', *n.* [From the designation of submarines, in the German navy, by the letter *U* with a distinguishing number added. *U* is probably an abbreviation for G. *unterseeboot*, lit., under-sea-boat (*i. e.*, submarine).] A submarine; — generally restricted to German or Austrian submarines, as in the World War.
u'do (ōō'dō), *n.* [Jap.] A vegetable and ornamental plant (*Aralia cordata*) cultivated largely in China and Japan and recently introduced into the United States. The young shoots, blanched by covering with earth and resembling celery, are the edible part.
u'ku-le'le (ū'kōō-lā'lē; *Hawaiian* ōō'kōō-lā'lā), *n.* [Hawaiian, prop., flea, jumping insect.] A kind of small guitar with four strings, used originally in Hawaii.
ul'ster-ette' (ŭl'stĕr-ĕt'), *n.* [*ulster* + *-ette.*] A light ulster.
ul'ti-ma-cy (ŭl'tĭ-mȧ-sĭ), *n.* [From ULTIMATE.] State or quality of being ultimate.
ul-trau'di-on (ŭl-trô'dĭ-ŏn), *n.* [*ultra-* + *audion.*] *Elec.* A type of three-electrode electron tube in which a tuned circuit is connected between grid and plate. Cf. AUDION, above.
u'na-flow' en'gine (ū'nȧ-flō') [L. *una* (fem. of *unus*) one + E. *flow.*] *Mech.* A type of engine in which the steam or gas instead of being exhausted through valves is exhausted through ports at or near the middle of the cylinder walls.
un-con'scious (ŭn-kŏn'shŭs), *n. Psychoanalysis.* [With *the.*] As conceived by Freud: **a** in a descriptive sense, that part of the psychic life in which the psychic phenomena are latent but capable of becoming conscious; **b** in a dynamic sense, that part which is under repression and thus barred from consciousness.
undamped waves. = CONTINUOUS WAVES, above.
un'der-car'riage*, *n. Aëronautics.* The landing gear of an aircraft. See LANDING GEAR, above.
un'der—sea', *a.* Being, or carried on, under the sea, or under the surface of the sea; as, *under-sea* fighting.
un'der-sea' (ŭn'dĕr-sē') } *adv.* Under the sea; beneath the
un'der-seas' (-sēz') } surface of the sea; as, a submarine moving *undersea.*
un'der-slung'* (ŭn'dĕr-slŭng'), **un'der-hung'*** (-hŭng'), *a.* Of an automobile body, suspended from the springs in such a manner that the frame of the chassis is below the axles, the object being to lower the center of gravity.
Un'der-wood Tar'iff Act (ŭn'dĕr-wŏŏd). An act of Congress, passed October 3, 1913 (63d Congress); — so called from Oscar W. Underwood, representative from Alabama. See TARIFF, *n.*, 1 **g**, in the *Dictionary.*
Union Central Executive Committee. In the Russian Union of Socialist Soviet Republics, a committee acting for the *Union Soviet Congress* (see SOVIET, above) in the intervals between its sessions. It consists of two bodies, the *Union Council* and the *Council of Nationalities.* It appoints the *Union Council of People's Commissars* (see COMMISSAR, COMMISSARIAT, above), which, subject to its presidium, acts as its executive and administrative body. *Abbr., U. C. E. C.*
Union Soviet Congress. See SOVIET, above.
un-scram'ble (ŭn-skrăm'b'l), *v. t.* To separate a conglomeration into its original elements; — originally in the phrase, "You can't *unscramble* eggs," attributed to J. P. Morgan (1837–1913), American financier, referring to the attempt to dissolve certain trusts.
un-sprung'* (ŭn-sprŭng'), *a. Aëronautics.* Not sprung. See SPRING, *v. t.*, above.
U. of S. A., *or* **U. of S. Afr.** *Abbr.* Union of South Africa.
up-heav'al-ist (ŭp-hēv'ȧl-ĭst), *n.* One who aims at a social upheaval or overturning.
u'rase (ū'rās; -rāz), *n. Chem.* = UREASE, in the *Dict.*
useful load. *Aëronautics.* The excess of the full load over the dead weight of an aircraft itself. It includes the crew and passengers, oil and fuel, electric-light installation, chart board, wireless apparatus, and the like. Cf. DEAD LOAD, above.
U. S. S. R. *Abbr.* Union of Socialist Soviet Republics.
u-til'i-ty*, *n.* In full **public utility.** A business organization which regularly supplies the public with some commodity or service, as electricity, gas, water, transportation, or telephone, or telegraph, service; — also used attributively; as, *utility* holding companies; a *utility* merger.
‖ **u'yezd'** (ōō'yĕzd'), *n.* See SOVIET, above.

vacuum bottle, flask, *or* **vessel.** A bottle, flask, or vessel made on the principle of the Dewar vessel, as for keeping liquids either hot or cold for several hours. Cf. DEWAR VESSEL, in the *Dictionary*, THERMOS BOTTLE, above.
vacuum tube*. *Elec.* = ELECTRON TUBE, above.
vacuum valve*. = ELECTRON TUBE, above.
val'or-ize (văl'ĕr-īz), *v. t.* To enhance, or attempt to enhance, the market value or price of by valorization.
‖ **va-lu'ta** (va-lōō'ta), *n.* [It., fr. *valere* to be worth, L. *valere.* Cf. VALUE.] Value; worth; specif., the value of any currency, as of certain European countries, as agreed upon, or its exchange value with reference to the currency of another (specified) country.
valve*, *n. Radio.* = ELECTRON TUBE, above. *Chiefly Brit.*
vamp (vămp), *n.* One who vamps; a vampire, as in a novel, play, or the like. See VAMPIRE, below. *Slang.*
vamp, *v. i.* To take the part of a vampire, as in a play; act the vamp; beguile; — often used humorously. — *v. t.* To treat as a vampire might. *Both Slang.*
vam'pire*, *n.* Fig.: One who lives by preying on others; in recent use, esp. an adventuress; specif., a seductive female (rarely, a male) character in a novel, play, or the like, whose evil motives or actions form an important part of the plot; also, an actress who takes such parts.
vam'pir-ish (văm'pīr-ĭsh), *a.* Pert. to or like a vampire.
van'i-ty*, *n.* A small receptacle, usually in the shape of a handbag or box, fitted with toilet articles such as a compact; — called more fully, according to its form, *vanity* bag, *vanity* case, or *vanity* roll.
vapor, *or* **vapour, galvanizing.** *Metal.* A process for coating metal (usually iron or steel) surfaces with zinc by exposing them to the vapor of zinc instead of, as in ordinary galvanizing, to molten zinc; — called also *sherardizing.* Vapor galvanizing is accomplished by heating the articles to be galvanized together with zinc dust in an air-tight receptacle to a temperature of about 600° F., which is 188° below the melting point of zinc, or by exposing the articles to vapor from molten zinc in a separate receptacle.
variable condenser. *Elec.* A condenser whose capacity is continuously adjustable. It usually consists of a set of metal plates meshing with another set.
variable inductor. *Elec.* An inductor (see INDUCTOR, above) whose inductance is continuously adjustable.
va'ri-o-cou'pler (vā'rĭ-ō-kŭp'lĕr), *n.* [L. *varius* various + E. *coupler.*] *Elec.* An inductive coupler, of which the mutual inductance is adjustable by rotating one of the coils.
va'ri-om'e-ter* (-ŏm'ē-tĕr), *n. Elec.* A variable inductor consisting of two coils of wire one rotating within the other and connected in series or parallel. *Cant.*
Va'sey grass (vā'zĭ). *Agric.* An erect perennial grass (*Paspalum larranagai*), native to Argentina, now grown from North Carolina to Texas. It grows best in wet lands, but withstands drought to a remarkable degree.
vas'o-re'flex (văs'ō-rē'flĕks), *n.* [*vaso-* + *reflex.*] *Physiol.* A reaction, or reflex, of a vessel, usually a blood vessel.
vaude-vil'li-an (vōd-vĭl'ĭ-ȧn), *a.* Of or pertaining to vaudeville. — *n.* A vaudevillist.
veg'e-tism (vĕj'ē-tĭz'm), *n.* Vegetal state or characteristic.
vel'ou-tine' (vĕl'ōō-tēn'), *n.* [F. *velouté* velvety + 1st *-ine*, 1.] A corded wool dress fabric having a velvet finish.
ve-ne'tian*, *n.* A twilled cotton fabric used chiefly as a lining for garments. Cf. VENETIAN, *n.*, **2 e**, in the *Dict.*
Cotton *venetians* have been used in this country since 1902. *U. S. Bulletin* (1919).
V'—en'gine, *n.* See V-TYPE ENGINE, below.
Ven'i-ze'list (vĕn'ĭ-zā'lĭst), *n. Greek Politics.* One of the party which followed Eleutherios Venizelos (1864–), esp. in his policies of adherence to the side of the Allies in the World War, and of opposition to Constantine I. and George II. during and after the war.
Ven-tu'ri tube* (vĕn-tōō'rē). [From its inventor, Giovanni Battista *Venturi* (1746–1822), an Italian physicist.] *Physics.* A conical efflux tube in which the escaping liquid flows from the smaller to the larger end, and the entrance is rounded to conform to the shape of the vena contracta.
‖ **ver-bo'ten** (fĕr-bō'tĕn), *a.* [G., p. p. of *verbieten.*] Lit., forbidden; prohibited, usually by authority; — often used satirically, implying that the prohibition is unwarranted; as, a *verboten* novel.
ver'ni-er* (vûr'nĭ-ĕr), *n. Radio.* A small auxiliary device used with a main device, to obtain delicate or sensitive ad-

justment, as a variable condenser of very small capacity in parallel with another condenser.

vers' li'brist (vĕr' lē'brĭst), *or* ‖ **vers' li'briste'** (lē'brēst'). A writer of vers libre.

ver-tim'e-ter (vĕr-tĭm'ē-tĕr), *n.* [*vertical* + *-meter.*] *Physics.* An instrument which indicates the minute changes of atmospheric pressure corresponding to small vertical motions of aircraft.

Very light (vĕr'ĭ). *Mil. & Naval.* One of the flares, or light signals, used in the Very system of signaling. See VERY'S NIGHT SIGNALS and STAR SHELL, in the *Dict.*

vest'ee' (vĕs'tē'), *n.* [*vest* + *-ee* as in coatee, with dimin. force.] An ornamental adjunct of dress suggesting, or worn in place of, a vest, or waistcoat; as: **a** A garment of brightly colored broadcloth, or the like, resembling a waistcoat but having neither armholes nor back, worn as part of a riding habit. **b** An article of female attire, as of organdie or satin, with or without a collar, worn to fill in or ornament the front of a dress or suit.

V. I. *Abbr.* Virgin Islands (of the United States).

vib'ri-on (vĭb'rĭ-ŏn), *n. Bacteriol.* A vibrio or vibrioid bacterium. See VIBRIO **b**, in the *Dictionary.*

vic-to'ri-a*, *n. Automobiles.* A touring car equipped with a calash top that, usually, extends over the rear seat only. See AUTOMOBILE, *Illust.*, in the *Dictionary.*

Vic-to'ri-an*, *a.* Pertaining to English life and sentiment during the reign of Queen Victoria; esp., fastidious, prudish, or narrow in opinion or expression, particularly regarding conduct. — **Vic-to'ri-an-ism,** *n.*

That long set of sentimental hypocrisies known in England as *Victorian.* *Amy Lowell.*

Victory loan. **1.** In the United States, the Fifth Liberty Loan (see LIBERTY BOND, above).

2. In Canada, any one of three government loans. Dates and quotas were: Nov. 1917, $150,000,000; Nov. 1918, $300,000,000; Nov. 1919, $300,000,000. Each was much oversubscribed.

3. In Great Britain, a government loan in June, 1919, with a total subscription of about $2,160,500,000.

Victory Medal. *Mil.* A medal of bronze struck by the United States government for distribution in 1920 to about 4,265,000 soldiers, sailors, nurses, and others in the military service during the World War. With the medal is to be worn the **Victory Ribbon,** having a rainbow blending of the six basic colors of the spectrum, issued by the Allied and Associated nations.

violet rays. **a** The shortest of the visible rays of the spectrum, producing violet color. See SPECTRUM, in the *Dict.* **b** Erroneously, the invisible *ultra-violet rays* of the spectrum, which have certain therapeutic qualities. Cf. ULTRA-VIOLET, ACTINIC RAYS, in the *Dict.*

virtual pitch. See PITCH, above.

vis'i-ble* (vĭz'ĭ-b'l), *a.* Constructed so that some particular part, or a record made, is readily visible to the operator or observer; as, a *visible* typewriter, in which the writing is visible to the operator without lifting the carriage.

vi'sion* (vĭzh'ŭn), *n. Moving Pictures.* A small scene shown within a larger one, generally used to indicate the thought of an actor at a particular moment.

vi'ta-min (vī'tă-mĭn; vĭt'ă-; 184), *n.* Also **-mine** (-mĭn; -mēn). [L. *vita* life + E. *amine.*] *Physiol. Chem.* Any of a group of constituents of most foods in their natural state, of which very small quantities are essential for the normal nutrition of animals, and possibly of plants. Their chemical nature is not yet known. Five distinct vitamins are recognized by the effect produced on animals when their diets are deficient in these vitamins, namely: (1) fat-soluble vitamin A, (2) water-soluble vitamin B, (3) water-soluble vitamin C, (4) fat-soluble vitamin D, and (5) fat-soluble vitamin E. **Vitamin A** is abundant in the unsaponifiable part of butter fat, or of cod-liver oil. It occurs in other liver oils, egg-yolk fat, green leaves, oranges, and perhaps other fruits, and lack of it in the diet causes keratinization of epithelial tissues, prominently evident in the eye, failure of young animals to grow, and finally death. **Vitamin B** is abundant in yeast, green leaves, some animal tissues (as liver and heart), milk, eggs, plant seeds, and vegetables. Lack of it causes loss of appetite and ultimately death. Its presence seems to stimulate the metabolic processes. Some diseases, as beriberi, are probably due to a deficiency of this vitamin in the diet. **Vitamin C** is abundant in fresh fruits and vegetables and, to some extent, in fresh milk and some other animal products. Lack of it causes scurvy. **Vitamin D** is especially abundant in cod-liver oil and in egg yolk, and lack of it causes rickets. Its presence in the diet appears to determine the normal deposition of calcium phosphate in the bones. There is some connection between the action of this vitamin and ultra-violet rays because animals that are developing rickets on diets largely deficient in this vitamin can be cured by exposing either their bodies or their food to irradiation with such rays. Some investigators have designated as vitamin D a factor which promotes the growth of yeast. This factor is now regarded by most as identical with a substance previously named *bios.* **Vitamin E** is abundant in the leaves of some, perhaps most, plants and in the oil contained in the embryo of the wheat grain. Its absence from the diet results in infertility. In the male, degeneration of the testes and in the female failure of the implantation of the ovum in the placenta are caused by continued feeding on diets thus deficient, without any recognized effect on somatic growth. This vitamin was formerly designated as X by some investigators. The antirachitic vitamin D has been designated as E by Funk, but he has not been followed by others. *Thos. B. Osborne.*

vit'ri-ol-ized (vĭt'rĭ-ŭl-īzd), *p. p. & p. a.* of VITRIOLIZE. — **vitriolized bone,** dissolved bone.

V. O. *Abbr.* (Royal) Victorian Order.

vo-ca'tion-al-ize (vō-kā'shŭn-ăl-īz), *v. t.* To render vocational; adapt to a vocation or vocations, as education.

‖ **voet'gang'er** (fōt'gäng'ĕr), *n.* [D., lit., walker; *voet* foot + *gang* gait, walk.] One of the immature wingless young of a South African species of locusts (*Pachytylus salcicolis*) which unite in vast swarms and move about, of necessity on foot, devastating the country as they go.

‖ **vo'lost***, *n. Russia.* A rural soviet (see SOVIET, above).

vol'plane' (vŏl'plān'), *v. i.* [F. *vol plané* act of volplaning; *vol* flight + *plané*, p. p.; cf. *planer* to hover.] *Aviation.* To glide in a flying machine.

Vol'stead Act (vŏl'stĕd). [After Andrew J. *Volstead* (1860–), former representative from Minnesota.] An act of Congress, passed October 28, 1919 (66th Congress), to enforce prohibition under the war act of November 21, 1918, and the 18th Amendment to the Constitution (ratified January 16, 1919), declaring all liquors with more than half of one per cent alcohol to be intoxicating, and consequently their manufacture, sale, and transportation prohibited. Called also *National Prohibition Act* and *Prohibition Enforcement Act.*

voltage amplification. *Radio.* The ratio of the alternating voltage produced at the output terminals of an amplifier or electron tube to the alternating voltage impressed at the input terminals.

voltage divider. *Elec.* A source of adjustable voltage, consisting of a resistor through which current is flowing, provision being made to connect to any desired point along the resistor.

vomiting gas. See CHLOROPICRIN, in the *Dictionary.*

‖ **voor'trek'ker** (fōr'trĕk'ĕr), *n.* [D. Cf. FORELOOPER, TREK.] An advanced pioneer; esp, a Boer who took part in the trek from Cape Colony to the Transvaal in 1834–7. *S. Afr.*

vor'ti-cism (vôr'tĭ-sĭz'm), *n.* [See VORTEX.] *Art.* The theory of certain English painters (1913–1922), under cubistic influence, that art should reflect the complexity of the machine and modern industrial civilization; — a phase of postimpressionism (which see, above).—**vor'ti-cist** (-sĭst), *n.*

vouch'er (vouch'ĕr), *v. i.* To vouch the truth or correctness of, as an account; attest; certify.

vraic (vrāk), *n.* Seaweed; — so called in the Channel Islands, where its collection and burning for manure is an important industry. The cutting (**vraicking**) became a ceremonial occasion, regulated by the government and attended with popular festivities. — **vraick'er,** *n.*

‖ **vrille** (vrĭl), *n.* [F.] *Aviation.* A feat in which the airplane is made to descend with a spinning motion; a spin. — *v. i.* To perform a vrille.

V. S.* *Abbr.* Volumetric solution.

V'-type' en'gine. *Mech.* A type of internal-combustion engine, in which two sets of cylinders are arranged side by side in two planes making an angle with each other so that a cross section perpendicular to the shaft would have the general shape of a V; — called also *V-engine.*

vu'cin (vū'sĭn), *n.* Also **vu'cine** (-sĭn; -sēn). [From Vouziers, in NE France, where it was first used by German surgeons + *-in* (*-ine*).] *Pharm. & Chem.* **a** A pale yellow crystalline compound, $C_{27}H_{42}O_2N_2Cl_2$, obtained artificially starting with cupreine and used as an antiseptic. Chemically, it is *sec*-octyl-hydrocupreine dihydrochloride. **b** (Properly, **vucine**) The base of the above hydrochloride.

vu'zin (vū'zĭn), **vu'zine** (-zĭn; -zēn), *n.* = VUCIN, above.

Waac (wăk), *n.* [An acrostic formed from the title.] A member of the Women's Auxiliary Army Corps, an organization formed in England in 1917 to enable women to enlist in the army for service as waitresses, clerks, chauffeurs, stenographers, etc. Cf. WRAF, WREN, below.

walk'a-way' (wôk'ă-wā'), *n.* An easily won contest, esp a race in which the winner finishes at a slow pace because he has outdistanced all other competitors. Cf. WALK-OVER.

wan'gle* (wăŋ'g'l), *v. t.*; WAN'GLED (wăŋ'g'ld); WAN'GLING (-glĭng). To adjust in a makeshift or clumsy way; make a shift to do; hence, to manage or bring about by unscrupulous means; get by unfair or indirect methods; cheat; swindle; deceive; manipulate, as an account or figures. — **wan'gler** (-glĕr), *n. Both Dial. or Slang.*

wan'i-gan*, *or* **wan'gan***, *n.* [In these senses commonly *wangan* or *wangun.*] **a** A receptacle, as a box or chest, for supplies or a reserve stock of goods. **b** A place in a lumber camp where accounts are kept and the men paid. *Both Local, U. S.*

war baby. **1.** A child, esp. an illegitimate child, of a union formed between the mother and a soldier at a time when the latter's country is at war.

2. Any stock or security whose value is greatly enhanced because of a state of war. *Slang*

war bride. **1.** A woman who marries, or has recently married, a soldier ordered into active service in time of war.

2. An industrial corporation or enterprise the value of whose stocks and other securities is greatly enhanced by actual warfare, as a corporation which manufactures munitions of war. Also, any of the securities. *Slang.*

war chest. During the World War, a community chest (see, above) for charities connected with war activities.

war cross. = CROIX DE GUERRE, above.

War'dour Street (wôr'dĕr). A street in London noted for its antiques, esp. in furniture, often reputed to be spurious; — hence, often used of pseudo-archaic diction, esp. as in some historical novels.

war lord. A military leader, esp. one who is supreme.

warp* (wôrp), *v. t. Aëronautics.* To change the form of (a wing) by twisting. Warping is sometimes used to maintain the lateral equilibrium of an airplane.

war'plane' (wôr'plān'), *n.* Any airplane attached to the military or naval service, esp. one designed for the purposes of war or engaged in warfare.

war–savings certificate. A certificate of the United States government, issued 1918–1921, in the form of a folder with spaces for 20 **war-savings certificate stamps,** each of five dollars maturity value. A single stamp was issued in exchange for a thrift card filled with thrift stamps (see THRIFT STAMP, above), or for cash. All were discontinued after Dec. 31, 1921. See TREASURY SAVINGS CERTIFICATE, above.

war–savings stamp. **a** A thrift stamp. **b** In the postal regulations and generally, a war-savings certificate stamp.

wart disease. *Agric.* A disease of potato tubers due to *Chrysophlyctis* (syn. *Synchytrium*) *endobiotica,* and characterized by black warty outgrowths.

wash*, *n. Aeronautics.* The disturbance in the air produced by the passage of an airfoil.

wash'in' (wŏsh'ĭn'), *n. Aëronautics.* Such a permanent warping of a wing of an airplane as will give an increase in the angle of attack near the tip of the wing.

Washington Conference. A conference on the limitation of armaments and other matters, held at Washington, D. C., from Nov. 12, 1921, to Feb. 6, 1922. The nine countries especially interested in Pacific Ocean and Far Eastern questions participated, viz., the United States, Belgium, the British Empire, China, France, Italy, Japan, the Netherlands, and Portugal. Six treaties, one declaration, and 12 resolutions were signed. See FIVE-POWER TREATY **a** and **b,** FOUR-POWER TREATY, and NINE-POWER TREATY **a** and **b,** above. The 12 resolutions had to do with the revision of the laws of war, and with various economic and political problems of China.

wash'out'* (wŏsh'out'), *n. Aëronautics.* A decrease in the angle of attack near the tip of the wing.

Was'ser-mann test (vas'ĕr-man). [After August von *Wassermann* (1866–1925), German bacteriologist.] *Physiol. Chem.* A complicated test for syphilis, using serum from the patient in a reaction which, if positive, involves complement fixation. See COMPLEMENT FIXATION, above

watchful waiting. Noninterference in the affairs of another, while keeping watch of his movements or progress; — first used by Pres. Wilson (First Annual Message, Dec. 2, 1913) with reference to his policy toward Mexico.

water right. *Law.* **a** *pl.* Riparian rights. **b** A legal right to take or use water, as of a stream, esp., a nonnavigable stream, an irrigation canal, etc.; specif., the right to use, or to take and use, water from such a source for irrigation.

wave*, *n.* **1.** An electric wave (see under ELECTRIC, in *Dict.*).

2. A curly waviness given artificially to the hair; as, a Marcel *wave;* a permanent *wave.*

wave antenna. *Radio.* An antenna of great length with special circuit arrangements permitting utilization of the antenna's directional properties.

wave'me'ter* (wāv'mē'tĕr), *n. Elec.* A frequency meter for use in radio communication.

wave trap. *Radio.* A tuned circuit used to improve the selectivity of radio apparatus or to eliminate interference. A commonly used type is a parallel combination of a condenser and an inductor connected in series with the antenna. This is tuned to the frequency of an interfering wave.

weed'less*, *a.* Free from weeds; — said of a kind of boat propeller the blades of which curve backward as respects the direction of rotation, so that they draw through the water, and do not gather weeds.

‖ **Welt'po'li-tik'** (vĕlt'pō'lē-tēk'), *n.* [G.] Lit, world politics or policy; international politics; participation in the discussion and decision of international problems; specif., the prewar imperialism manifested in the foreign policy of Germany.

wheel control. See CONTROL COLUMN, above.

wheeze*, *n.* A familiar saying, adage, or tale; a joke or witticism, esp an old one. *Slang.*

whip'pet*, *n., or* **whippet tank.** A kind of small armored tank, very mobile and speedy, used in the World War by the Allied armies. The French whippets were known as *Renault tanks.* See TANK, above.

white*, *n.* [*cap.*] One who advocates or favors monarchistic or reactionary principles; a counter-revolutionist. *Cant.*

white*, *a.* [*cap.*] Of or pertaining to a monarchistic government, or one already established previous to a revolution; counter-revolutionary; sometimes, reactionary or antisocialistic; — opp. to *Red. Cant.* — **White Army,** the White Guard. — **White Guard,** in Russia, Finland, Hungary, etc., the forces, usually of the monarchist, or previously established, government, in conflict with the radical socialist, or Bolshevist, element; those organized against the revolutionists. See RED ARMY, RED GUARD, above. — **White Guardist,** one of the White Guard; one favoring the White Guard. — **White Terror*.** See TERROR, *n.*, above.

white bronze. Bronze that is of a very light color because of a large proportion of tin in its composition.

white city. A pleasure resort where there are merry-go-rounds, roller coasters, shooting galleries, etc.; — so called because the structures are mostly painted white. *Colloq.*

white'–col'lar, *a.* Of or pert. to workers at other than manual labor, as clerks and salesmen, who typically wear white collars.

white gold*. Any of several whitish alloys of gold, as with nickel, iron, zinc, copper, silver, or palladium.

White'hall'*, *n.* A thoroughfare in the Westminster section of London which is bordered by government offices; hence, figuratively, the British imperial government, or its policies.

white paper*. A government report on any subject. Cf. WHITE BOOK, in the *Dictionary.*

white–pine blister rust. A disease of the white pine and other 5-needled pines, caused by the fungus *Cronartium ribicola,* which kills the tree by penetrating the growth wood and inner bark with a mass of threadlike elements (the mycelium), afterwards appearing on the bark as white blisters. These burst and expose yellowish spore masses, which infect currants and gooseberries, developing powdery yellowish clusters of spores on the under sides of leaves. Later in the season, these infect other leaves, appearing as hairlike structures, with spores which again infect the white pine. Called also *blister rust.* See CRONARTIUM, above.

white plague. Tuberculosis, esp. of the lungs.

white slave. A woman held in involuntary confinement for purposes of prostitution; loosely, any woman forced into unwilling prostitution. — **white slavery.**

white slaver. A person engaged in procuring or holding a woman or women for unwilling prostitution.

White–slave–traffic Act. An act of Congress, passed June 25, 1910 (61st Congress), to regulate interstate and foreign commerce by prohibiting the transportation therein of women and girls for immoral purposes, and certain acts done in assistance thereof; — often popularly called *White-slave Act.* Called also *Mann Act,* after Congressman James R. Mann (1856–1922), of Illinois, who introduced the bill.

white way. Any brilliantly lighted street or avenue, esp. in the business or theater district of a city. Cf. GREAT WHITE WAY, above.

white'wings' (hwīt'wĭngz'), *n. pl.* White-uniformed street cleaners; — a term first applied to those organized in 1895 by Col. George Edwin Waring (1833–98) for cleaning the streets of New York City. *Slang.*

whiz'–bang', *or* **whizz'–bang',** *n.* A kind of small shell of such high velocity that the sound it makes in passing through the air is almost simultaneous with its explosion. *Soldiers' Slang.*

widow's peak. Hair that grows to a point on a woman's forehead; — so called because popularly said to be an omen of early widowhood.

wie'ner-wurst' (wē'nĕr-wûrst), *n.* [G. *Wiener* of Vienna.

+ *wurst* sausage.] A kind of sausage, usually of mixed beef and pork, made in a shorter and more slender link than a Frankfurter; — often shortened to *wiener, wienie, weenie. U. S.*

wild'fire'*, *n. Agric.* A destructive disease of tobacco caused by *Bacterium tabacum*, producing small brown spots surrounded with light-colored areas; — so called because it spreads rapidly. The spots enlarge quickly, dry or rot, and fall out.

Wil'helm-stras'se (vĭl'hĕlm-shträs'ĕ), *n.* [G., lit., Wilhelm's, or William's street.] A street in the central part of Berlin, Germany, running south from Unter den Linden to the Belle Alliance Platz, on which are many government offices, including the foreign office; hence, figuratively, the German Foreign Office or its policies.

wil'lies (wĭl'ĭz), *n. pl.* A fit of nervousness; the creeps. *Slang, U. S.*

wind'mill'*, *n. Aëronautics.* A small air-driven turbine, with blades similar to those of a propeller, exposed on an aircraft, usually in the slip stream, and used to drive auxiliary apparatus, as gasoline pumps and radio generators.

window envelope. An envelope having a transparent panel through which the address on the inclosure is visible.

wind'shield' (wĭnd'shēld'), *n.* A shield or screen of glass set in a metal frame, extending upward from the body of a motor car to protect the occupants from wind, rain, etc.

Windsor, House of. [From *Windsor* Castle, Berkshire, Eng.] The royal family of Great Britain from 1917, when the name was changed by proclamation from *House of Saxe-Coburg and Gotha*, which had succeeded *House of Hanover* on the accession of Edward VII., in 1901.

wind tunnel. *Mech.* An elongated inclosed chamber with means for the production of a substantially steady air current through it. Models of aircraft or other objects are supported in the center of the air stream and their resistance and other characteristics when exposed to an air current of known velocity determined. The term includes those laboratories in which there is an experimental chamber of much larger cross section than the air current.

wing*, *n. Aëronautics.* The portion of a main supporting surface of an airplane on either side of the plane of symmetry; thus, a monoplane has two wings, a biplane four.

wing gap. See GAP, above.

wing loading. *Aëronautics.* The gross weight of an airplane fully loaded, divided by the area of the supporting surface. The area used in computing the wing loading should include ailerons, but not the stabilizer or elevators.

wing resistance. *Aëronautics.* See DRAG, above.

wing truss. *Aëronautics.* The framing, comprising struts, wires or tie-rods, and spars, by which the wing loads of an airplane are transmitted to the fuselage.

win'race' (wĭn'rās'), *n.* [*win*, v. + *race*, n.] *Horse Racing.* In trotting, the fastest time made by the winning horse in a public race, or in an event in which it stood first in the summary.

wired (wīrd), *pret. & p. p.* of WIRE. Hence, *p. a.* — **wired wireless.** = LINE RADIO, above.

wired radio, wire-radio, wire wave communication. = LINE RADIO, above.

wireless (wīr'lĕs), *v. t. & i.* To send or communicate by radiotelegraphy; also, to send a wireless message to (a person). *Colloq.*

wireless compass. *Elec.* A radio compass; direction finder.

wis'en-heim'er (wĭz'ĕn-hīm'ĕr), *n., or* **wise'heim'er** (wīz'-). [Prob *wise* + *-enheimer, -heimer*, in certain G. names.] One who has the air of knowing all about something or everything. *Slang, U. S.*

wob'bly (wŏb'lĭ), *n.; pl.* WOBBLIES (-lĭz). A member of the International Workers of the World. *Slang, U. S.*

wood gatherer. See CAMP-FIRE GIRL, above.

Wood's metal. See FUSIBLE METAL, in the *Dict.*

woolly bear*. A German shrapnel shell of large caliber, used in the World War, that exploded with a big puff of brownish black smoke. Cf. BLACK MARIA, above. *Slang.*

wop (wŏp), *n.* An Italian; a Dago; sometimes, any unskilled laborer, or the like, of foreign extraction and dark complexion. *Slang, U. S.*

word association. *Psychol.* A method, chiefly derived from Wundt and developed by Jung, aiming to obtain a quick reaction to a definite stimulus word and, by noting the reaction time and following up any peculiarities in the reaction, to discover the unconscious complexes and mechanisms at work in the subject.

World Court. **a** The Permanent Court of International Justice (which see, above). **b** Sometimes, a proposed international court, similar in composition and jurisdiction to the Permanent Court of International Justice, but not connected with the League of Nations.

world line. *Math.* The sum total of all positions (in time space) of any individual particle or point that remains self-identical throughout; the spatial career of such an element through all time.

World War. The international conflict, begun on July 28, 1914, by Austria-Hungary's declaration of war against Serbia, and ultimately involving on the one side the four Central Powers and on the other the 27 Allied and Associated Powers (see ALLIES, and CENTRAL POWERS, above). The immediate occasion of the war was the assassination of the Austrian Archduke Francis Ferdinand at Sarajevo, Bosnia, on June 28, 1914, by a Serb, and the inability of Serbia later to meet fully Austria's ultimatum of July 23rd; but the underlying causes were far greater, extending back even to the decisions of the Congress of Vienna in 1815, and arising in later years out of the rivalry between the Triple Alliance and the Triple Entente. Germany declared war against Russia on Aug. 1, France entered the war on August 3rd, Belgium and Great Britain on August 4th, and Montenegro on August 7th. Japan, because of her alliance with Great Britain, declared war against Germany on August 23, 1914. Italy, although a member of the Triple Alliance, at first declared her neutrality, but joined the Allies on May 23, 1915, and was followed in 1916 by Portugal (March 9th), Roumania (August 27th) and Greece (November 23rd). On April 6, 1917, the United States of America entered the conflict. On July 18, 1918, after severe defeats in France, the Allies, under Marshal Foch, inaugurated a grand counter offensive, which became everywhere increasingly successful, resulting finally in the signing of an armistice by Bulgaria on Sept 30, 1918, by Turkey on October 30th, by Austria on November 3rd, and by Germany on November 11th, thus practically ending the war. A Peace Conference assembled at Paris on January 18, 1919, and the **Treaty of Versailles** was signed on June 28, 1919, becoming effective, after its ratification by Great Britain, France, Italy, and Japan, on January 10, 1920. Treaties with the other Central Powers were signed as follows: Austria (**Treaty of Saint-Germain**), September 10, 1919; Bulgaria (**Treaty of Neuilly-sur-Seine**), November 27, 1919; Hungary (**Treaty of Trianon**), June 4, 1920; and Turkey (**Treaty of Sevres**), August 10, 1920. The last was never ratified by Turkey, and was in effect replaced by the **Treaty of Lausanne**, July 24, 1923. Germany lost her navy and army, Alsace-Lorraine, Danzig, and all her colonies, the Austro-Hungarian monarchy was broken up, and Turkey was reduced to Constantinople, Eastern Thrace, and Anatolia. See COUNCIL OF FOUR, DAWES PLAN, ENTENTE, LEAGUE OF NATIONS, LOCARNO PACT, SUPREME COUNCIL, TRIPLE ENTENTE, above, and TRIPLE ALLIANCE, **e**, in the *Dictionary*.

W. O. W. *Abbr.* Woodmen of the World (see FRATERNAL EMBLEMS, plate, p. 1192).

wow'ser (wou'zĕr), *n.* One who is censoriously hostile to minor vices; one who disapproves of certain forms of popular amusement, as Sunday sports; — used, contemptuously, of any obtrusively puritanical person. *Colloq., Australia.*

Wraf (răf), *n.* [An acrostic formed from the initials of the title.] A member of the Women's Royal Air Force of Great Britain (established 1917). *Colloq., Gr. Brit.*

Wren (rĕn), *n.* [An acrostic formed from the initials of the title.] A member of the Women's Royal Naval Service, an auxiliary of the British navy established during the World War. *Colloq., Gr. Brit.*

wrist watch. A small watch attached to a bracelet or strap to fasten about the wrist.

X chromosome, *or* **X'—chro'mo-some** (ĕks'krō'mō-sōm), *n. Biol.* A specialized chromosome found in the egg and in certain sperm cells of some animals. The presence of two X chromosomes in the fertilized egg causes a female to be developed; when there is but one, a male is developed.

xy-lol'o-gy (zī-lŏl'ō-jĭ), *n.* [*xylo-* + *-logy.*] Dendrology treating of the gross and the minute structure of wood.

xy'lo-phon'ic (zī'lō-fŏn'ĭk; zīl'ō-), *a.* Of or pertaining to a xylophone; like a xylophone, as in sound.

xy-lot'o-my (zī-lŏt'ō-mĭ), *n.* [*xylo-* + *-tomy.*] Art of preparing sections (transverse, tangential, or radial) of wood, esp. by means of a microtome, for microscopic examination. — **xy-lot'o-mist** (-lŏt'ō-mĭst), *n.*

Y*. Short for Y. M. C. A., that is, Young Men's Christian Association; as, the "*Y*" in France; — also used attributively; as, a "*Y*" hut. *Colloq.*

yaw*, *v. i. & t. Aëronautics.* To turn or deviate from the line of flight by angular motion about the normal, or vertical, axis of an airplane.

yaw'me'ter (yô'mē'tĕr), *n.* [*yaw* + *-meter.*] An instrument designed to measure the angle of yaw of an aircraft.

yellow blight. *Hort.* The wilt, or wilt disease, in potatoes.

yel'low—cross' liq'uid. See MUSTARD GAS, above.

yeo'man-ette' (yō'mən-ĕt'), *n.*, **yeo'wom'an** (-wŏŏm'ən), *n.* See YEOMAN (F), below.

yeo'man (F), *n.; pl.* YEOMEN (F). A female employee in the U. S. naval reserve force during and immediately after the World War; — the official title.

yer'ga (yûr'gə), *n.* A coarse woolen material, used esp. for horse blankets.

Y gun, *or* **Y'—gun'**, *n.* A two-barreled antisubmarine gun, the barrels of which form a fork like the letter Y, used to project simultaneously a depth charge on each side of the vessel on which the gun is mounted.

Y. M. H. A. *Abbr.* Young Men's Hebrew Association.

yoke*, *n.* See CONTROL COLUMN, above.

y'per-ite (ē'pĕr-ĭt), *n.* [F., fr. *Ypres*, a commune of Belgium.] Mustard gas; — the French name.

yu'an (yōō'ən), *n.* [Chin. *yüan*[2] round, a circle. See YEN.] The monetary unit of the Chinese Republic, since January, 1914; also, a silver coin containing 23.98 grams of pure silver. It is equivalent to .644 of a haikwan tael, or .464 cents, U. S. currency. See TAEL, 2, in the *Dict.* Called also *Yuan dollar.*

Yu'go-slav', *or* **Ju'go-slav'** (yōō'gō-slăv'), *n.* [Slovenian and Serbo-Croatian *jugo-* (in comp.) south, *jug* the south; cf. OBulg., Bulg. *jug*, Russ. *yug*, Bohem. *jih*. See SLAV.] A native or inhabitant of Yugoslavia; one of the south, or southern, Slavs, comprising Serbs, Croats, and Slovenes, whose territory lies south of Austria and Hungary and east of the Adriatic, and who are ethnically one nation; — so called in distinction from the Slavs of the north, as the Czechs, Poles, and Russians. — **Yu'go-slav'**, *or* **Ju'go-**, *a.* **Yu'go-slav'i-an,** *or* **Ju'go-** (-slăv'ĭ-ən), *a.* Yugoslavic.

Yu'go-slav'ic, *or* **Ju'go-** (-slăv'ĭk; -slăv'ĭk), *a.* Of or pertaining to the Yugoslavs.

Yu'zen' hi'ro'do' (yōō'zĕn' hē'rō'dō'). [*Yuzen* (see YUZEN PROCESS) + Jap. *birōdo* velvet, fr. Pg. *veludo*. See VELVET.] Japanese cut velvet; velvet which has had a design fixed upon it by the Yuzen process, the nap then being cut away by the artist with a small sharp chisel, so as to cut deeply the strong lines and shadows, but only delicately where the pattern is lightly traced.

Yu'zen' proc'ess (yōō'zĕn'). [After *Yuzen* (fl. 17th c.), the Japanese inventor of the process.] In Japan, a secret process of dyeing a painted fabric, such as habutai (which see, in the *Dict.*), silk crape, or velvet, allowing for fidelity of design, boldness of line, and the use of rich colors.

Za'bern af-fair' (tsä'bĕrn). An incident occurring in Zabern (now Saverne), a town in Alsace-Lorraine, on December 1, 1913, when, among other brutalities against the civilian population, a young German lieutenant struck a lame Alsatian cobbler with his sword. Although the officer was mildly punished, he is said to have been commended for the act by the Crown Prince and others of the militarists. Hence, **Za'bern-ism** (-Iz'm), *n.*

‖ **za'pa-te'ra** (thä'pä-tā'rä; sa'pa-; 268), *n.* [Sp. *aceituna zapatera.*] *Olive Trade.* A cured olive which has spoiled or is on the verge of decomposition; loosely, an olive rejected as defective because of bruises, wormholes, etc.

zas-tru'gi (zäs-trōō'gĭ). Var. of SASTRUGI, above.

ze'brass' (zē'brăs'), *n.* [*zebra* + *ass.*] A hybrid produced by breeding a male zebra with a female burro or donkey.

Zen (zĕn), *n.* [Jap., fr. Chin. *zen*, fr. Pali *jhāna*, fr. Skr. *dhyāna* abstract religious meditation.] In Japan, a Buddhist contemplative sect and its religious belief, which is commonly regarded as a form of Mahayana. It dates from the twelfth century, and has especially appealed to the Samurai.

Zep, *or* **Zepp** (zĕp), *n.* A Zeppelin. — *v. t.* To zeppelin. *Both Colloq. or Slang.*

Zep'pe-lin *or, often,* **zep'pe-lin** (zĕp'ĕ-lĭn; *G.* tsĕp'ĕ-lēn'), *n.* A dirigible balloon of the rigid type, consisting of a cylindrical, trussed and covered frame supported by internal gas cells, and provided with means of propulsion and control. The first successful dirigible of this type was constructed in 1899–1900 by Ferdinand, Count von Zeppelin (1838–1917), whence the name.

zep'pe-lin (zĕp'ĕ-lĭn), *v. t.* To bomb from a Zeppelin.

ze'ro*, *n., or* **zero hour.** *Mil.* The hour at which a previously planned movement is started. In attacking in trench warfare, for instance, the infantry columns of assault move forward at zero. The times for the execution of minor parts of the general movement are given so many minutes before, or after, zero. So called in the British service; in the U. S. service, *H hour* is the regulation term. Also fig.

zero beat. *Radio.* A condition in which two radio frequencies are adjusted to equality by first producing beats between them and then reducing the beat frequency to zero. Cf. BEAT, *n.*, 6, in the *Dict.* See HETERODYNE, above.

ze'ro—beat' re-cep'tion. *Radio.* A method of reception with an electron tube in generating condition in exact synchronism with the received wave as determined by zero beat.

ze'ro—lift' an'gle. *Aeronautics.* The angle of attack of an airfoil when the lift is zero.

Zim'mer-wal'di-an (tsĭm'ĕr-väl'dĭ-ən), *n.* A follower of the program adopted by the International Socialist Congress held at Zimmerwald, Switzerland, in 1916, which emphasized internationalism as a method of negativing war. — **Zim'mer-wal'di-an,** *a.*

Zim'mer-wald'ist (tsĭm'ĕr-väl'dĭst), *n.* A Zimmerwaldian.

zinc sulphide. *Chem.* The sulphide of zinc, ZnS, occurring naturally as the mineral blende and obtained as a white amorphous precipitate from solutions of zinc with alkaline sulphides. It forms the basis of certain white pigments.

zirc'ite (zûr'kīt), *or* **zirk'ite,** *n.* [*zirconium* + *-ite.*] *Metal.* Natural zirconium oxide (zirconia, ZrO_2). It is highly refractory to the action of heat and is used in furnace linings, both in the form of zircite bricks and zircite cement. It comes chiefly from Brazil.

zlo'ty (zlō'tĭ), *n.; pl.* ZLOTYS (-tĭz), *collectively,* ZLOTY. [Pol. *złoty.*] The gold monetary unit of Poland, worth 19.3 cents; also, a silver coin of the same value.

zone*, *n.* In the United States parcel-post system (see PARCEL POST, above), any of the areas about any point of shipment for which but one rate of postage is charged for a parcel-post shipment from that point. The rates increase from within outwards. The first zone includes the unit of area (a quadrangle 34 miles long north and south, and from 23 to 30 miles east and west) in which the place of shipment is situated and the contiguous units within a mean radial distance of 50 miles; the outer limits of the second to the seventh zones, respectively, are approximately 150, 300, 600, 1000, 1400, and 1800 miles from the point of shipment; the eighth zone includes all units outside the seventh zone. From August 15, 1913, the rates for the first and second zones were made the same.

zone*, *v. t. City Planning.* To partition (a city) by ordinance into zones or sections to be reserved for different purposes, as residence, business, or manufacturing, and within which the buildings may not exceed prescribed heights or cover more than a designated percentage of the area of lots, etc. Hence, **zoning commission, zoning ordinance,** etc.

zoom (zōōm), *v. i.* [Prob. imitative.] *Aviation.* To climb for a short time at an angle greater than that which can be maintained in steady flight, the machine being carried upward at the expense of its stored kinetic energy. — *n.* Any sudden increase in the upward slope of the flight path.

zo'ö-phil'i-a (zō'ō-fĭl'ĭ-ə), *n.* Also **zo-öph'i-lism** (zō-ŏf'ĭ-lĭz'm). [NL.; *zoö-* + Gr. *φιλέα* love.] Love of animals, esp., *Psychoanalysis*, as an erotic fixation or regression. — **zo'ö-phil'ic** (zō'ō-fĭl'ĭk), *a.*

BIOGRAPHICAL NAMES

	Born.	Died.
Abd-el-Krim (ăbd′ĕl-krĭm′). Leader of Riffian tribes, Morocco	1885?	—.
Abercrombie (ăb′ĕr-krŭm′bĭ), Lascelles. Eng. poet, critic, and dramatist	1881	—.
Adams (ăd′ămz), George Burton. Amer. historian and educator	1851	—1925.
Adams, Henry. Amer. hist. writer. [*Education of Henry Adams.*]	1838	—1918.
Aga Khan (a′gȧ kan′) **III.** *Sultan Sir Mohammed Shah.* Head of Ismaelian Mohammedans from 1885	1877	—.
Aikins (ā′kĭnz), James (Albert M), Sir. Lieut gov. of Manitoba (1916–)	1851	—.
Albert (ăl′bĕrt) **I.** King of the Belgians (1909–)	1875	—.
Alda (ăl′dȧ), Frances. Orig. name *Davis.* Am. operatic soprano	1883	—.
Alderman (ôl′dĕr-măn), Edwin Anderson. Pres. Univ. of Va. (1904–)	1861	—.
Alexander (ăl′ĕg-zăn′dĕr) **I.** *Second son of Peter I. of Serbia* (see GEORGE, PRINCE OF SERBIA, below). King of Yugoslavia (1921–)	1888	—.
Alexander, Hartley Burr. Amer. philosopher and author	1873	—.
Allen (ăl′ĕn), Hugh Percy, Sir. Eng. musician and conductor	1869	—.
Allen, James, Sir. New Zealand statesman	1855	—.
Allenby (ăl′ĕn-bĭ), Edmund (Henry Hynman), first Viscount. Eng. field marshal. High Commissioner for Egypt and Sudan (1919–1925)	1861	—.
Almeida (al-mā′da), Antonio José de. Pres. of Portugal (1919–1923)	1866	—.
Amanullah Khan (ä′mä-nōōl′a kän′). Ameer of Afghanistan (1919–).	1892	—.
Amato (ä-mä′tō), Pasquale. Italian barytone	1878	—.
Ames (āmz), Joseph Sweetman. Amer. physicist	1864	—.
Anderson (ăn′dĕr-sŭn), Sherwood. Amer. author	1876	—.
Anderson, William Franklin. Amer Methodist Episcopal bishop	1860	—.
Andreev (an-drā′yĕf), Leonid Nikolaievich. Russian author	1871	—1919
Angell (ān′jĕl), James Rowland. Pres. Yale Univ. (1921–)	1869	—.
Angell, Norman. Orig. name *Ralph Norman Angell Lane.* Eng. author.	1874	—.
Aosta (ä-ōs′tȧ), Duke of. *Emanuele Filiberto Vittorio E.G.G M., Prince of Savoy. Grandson of Victor Emmanuel II.* Italian general	1869	—.
Arlen (är′lĕn), Michael. See KOUYOUMDJIAN, DIKRAN.		
Arliss (är′lĭs), George. Eng. actor in America	1868	—.
Artsibashev (är′tsĭ-ba′shĕf), Mikhail Petrovich. Russ. novelist and dram	1878	—.
Ashwell (ăsh′wĕl), Lena (Margaret). *Mrs. H. J. F. Simson.* Eng. actress	1872	—.
Astor (ăs′tẽr), Nancy, Lady, born Nancy Witcher Langhorne. *Mrs. Robert Gould Shaw. Mrs. Waldorf Astor.* English M. P., born in America.	1879	—.
Athlone (ăth-lōn′), Alexander Augustus F. G. C., 1st Earl of. Viscount Trematon. *Bro. of Queen Mary.* Gov.-gen. of So. Africa (1924–)	1874	—.
Austin (ôs′tĭn), Mary, born Hunter. *Mrs. S. W. Austin.* Amer. author	1868	—.
Avery (ā′vẽr-ĭ), Samuel. Chancellor Univ. of Nebr. (1900–)	1865	—.
Aydelotte (ā′dĕ-lŏt), Frank. Pres. Swarthmore Coll. (1921–)	1880	—.
Aylmer (āl′mẽr), Fenton John, Sir. Eng. general	1862	—.

Zweig (tsvīĸ), Stefan. German dramatist	1881	—.

A

DICTIONARY

OF

THE ENGLISH LANGUAGE.

A (ā) ; *pl.* A's or As (āz). **1** The first letter of the English alphabet, and of most of the cognate alphabets. The A of the English and allied alphabets, as also the small form, "a," besides the forms in Italic, black letter, etc , come from the Latin A, corresponding to the Greek *Alpha*, which had the same form as, and which came in turn from, *Aleph* ("ox"), the first letter of the Phœnician and old Hebrew alphabets. The *Aleph* was a letter of consonantal character, with a guttural breath sound, to which the various vowel sounds might be attached. The Greeks took it to represent the pure vowel sound (ä) of their *Alpha*. In English, various sounds are now represented by this letter (see *Guide to Pron.*, § 112). Originally it had in our language, as it still has for the most part in the languages of continental Europe, the sound of "Italian a" (ä). The "long a," as in *fate*, is a comparatively modern sound of "a" which has developed from the earlier a. See ALPHABET, *Illust.*

2. As a *symbol*, used to denote or indicate · **a** First in order or class, or sometimes the numeral 1 ; as, company *A ;* quire *a ;* the dominical letter *A*. **b** *Music.* (1) The sixth tone in the model major scale (that of C), or the first of its relative minor scale. The second string of the violin is tuned to the A in the treble staff. (2) In notation, any symbol representing this tone, as a note on a certain line or space of a staff. See CLEF, *Illust.* (3) On a keyboard, any key giving this tone. See KEYBOARD, *Illust.* **c** [*cap.*] *Logic.* The symbol used for the universal affirmative proposition, as, "All men are mortal" is an *A* proposition. **d** [*cap.*] Any one arbitrarily or conveniently so designated, as for purposes of argument ; as, *A* deeded Blackacre to B. **e** *Alg.*, etc. A known quantity (which see). **f** The front of the leaf (in a book in which the leaves, instead of the pages, are numbered). **g** [*cap*] *Astron.* A prominent Fraunhofer line caused by terrestrial oxygen. **h** [*cap*] Assented stock ; — used on the tape of stock tickers. **i** [*cap*] In medieval Roman numerals, 50 or 500, or, in the form Ā, 5000.

3 As an *abbreviation* **a** In the form **A.**: Various proper names, as Alfred, Anna, etc.; Absolute (as, 10° *A.* temperature) (*Physics*); Absolvo, Lat. for, I absolve, acquit (*Roman Law*); Adulteress (a woman convicted of adultery being at one time compelled to wear a scarlet letter "A" as a badge of infamy, probably in allusion to the "scarlet woman" of Revelation); America, American ; Antiquo, Lat. for, the old law (used on ballots among the Romans to signify a negative vote) **b** In the form **a.** or **A.** · accepted (*Com.*); acre, acting ; active ; ad, Lat. for "at" or for "to," usually written @ (*Com.*) ; adjective ; after ; afternoon, aged; alto ; amateur ; ampere (*Elec.*). (written ā or ää) ana (*Med.*), ana- (*Org. Chem.*), and , anno, Lat. for, in the year ; annus, Lat. for, year ; anode (*Elec*) ; anonymous ; answer; ante; approved (*Com.*); are (*Metric System*), argent (*Her.*) ; [without period, A] argon (*Chem.*) ; artillery , assist (*Baseball*) , asymmetric (*Org. Chem.*).

A flat, *Music*, the tone (A♭) a half step below A. — **A flat major, A major**, *Music*, the major scales or keys having the signatures respectively of four flats and three sharps. — **A minor**, *Music*, the minor scale or key relative to C major, and having the same signature without sharps or flats. — **A sharp**, *Music*, the tone (A♯) a half step above A. — **A stock**, *Finance*, deferred common stock. Cf. B STOCK. *Stock Brokers' Cant. Eng.*

A *or* **a**, *n ; pl.* A's, AS, *or* AES (āz). The letter A, a, or its sound. "Mouthing out his hollow oes and *aes* " *Tennyson.*

A, *adj.* Having the general form of the capital **A** ; as, an **A** frame, or **A**-frame ; an **A** tent, etc.

A, *interj.* **1.** An obs. or dial. equiv. of O, AH.

2. [*l. c.*] In poetry, an appended expletive, void of sense, to fill out the meter.

> A merry heart goes all the day,
> Your sad tires in a mile-*a*. *Shak.*

a (unstressed, *ə* ; emph., ā), *adj.*, or (as usually called) the *indefinite article.* **1.** The shortened form of AN, signifying *one* or *any*, but less emphatically. "At *a* birth ; " "In *a* word ," "At *a* blow." In general the form *a* is used before words beginning with a consonant sound. See AN

2. [A usage arising from confusion with the preposition *a* (*an, on*). See A, on, **C**] In each , to or for each , as, " twenty leagues *a* day," "a dollar *a* yard," etc.

à (ä), *prep.* [F.] To , according to ; with. See À LA.

a (*ə*), *prep.* [From AS. *of* off, from. See OF.] Of. *Obs.* "The name of John *a* Gaunt." " What time *a* day is it ? " *Shak.* " It 's six *a* clock." *B. Jonson*

a- (*ə*), *prep.*, **a-**, **a-** (*ȧ-*), *prefix.* [AS. *an, on.*] On; in; at , — with various implications **a** Position or motion, as in *a*float, *a*field, *a*bed, *a*foot, *a*shore, *a*tiptoe. **b** State or condition, as in *a*fire, *a*sleep, *a*live **c** Time, now esp. with adverbs of repetition, as in, "*a* Monday. " "Thrice *a* year."

> Sleek-headed men, and such as sleep *a*nights. *Shak.*

In this use the *a* is now construed as the indefinite article. (See A, *adj.*) **d** Process or action ; — used with verbal nouns in *-ing* that begin with a consonant (the form *an* being used before vowels), as in *a* hunting, *a* building, *a* begging. "Jacob, when he was *a* dying " *Heb.* xi. 21. "We 'll *a* birding together." " It was *a* doing." *Shak* " He burst out *a* laughing." *Macaulay.* These forms are still common in poetic, colloquial, or dialectal use, and are often written as hyphened words, as in *a*-calling, *a*-coloneling, *a*-girding, *a*-growing, *a*-hiding, *a*-hunting, *a*-maundering, etc. In the form often used in its place the *a* is dropped and the word in *-ing* is treated as a present participle, as in, "he has gone hunting." **e** Manner, repetition, or other obsolete or dialect implications, as, *a* this wise, *a* two, *a* pieces.

a-. A common English prefix, from various sources, and having various meanings. Specif. : **1.** See A, *prep.*, on.

2. A prefix from AS. *a-* (akin to Goth. *us-, ur-*, Ger. *er-*, orig. meaning *out*), usually intensive, but sometimes with the sense of *away, on, back*, as in *a*rise, *a*bide, *a*go

3. A prefix, equiv. to A, *prep* (= AS. *of* off, from. See OF), denoting *off, from ;* also *of ;* as in *a*down, *a*thirst, *a*fresh, *a*new.

4. A form of the prefix *y-*, as in *a*ware. See Y-.

5. A reduced form of L. *ad* to (often coming through F. *à*), as in *a*base, *a*chieve, *a*scribe, *a*spire.

6. = AB-.

7. [Gr. *ἀν-* not, of which *ȧ-* is the form used before consonants. See UN-.] A prefix, appearing as *an-* before vowels or the letter *h*, denoting *not, without, un- ;* — chiefly used in scientific terms, as in *a*byss, lit., the bottomless ; *a*tonic, not accented or tonic ; *a*nhydrous, not hydrous , *a*chromatic, lit., colorless ; *a*sexual, *a*narchy, etc.

8. A prefix of vague meaning, chiefly in poetry, where it is probably only euphonic or metrical ; — sometimes not distinguishable from *a-* in sense 5 (above), appearing variously as *a-, ad-, as-*, etc.; as in *a*ddoom, *a*mate, *a*ssober. Cf. A, *interj* , 2.

☞ Besides these there are other less important sources of the prefix. In some cases these are disclosed in the etymologies of the separate words ; in others, esp. in some native English words, the exact source of the *a-* is not certain.

A 1 (ā wŭn). A registry mark given by underwriters (as at Lloyd's) to ships in first-class condition. In Lloyd's Register the figure refers to the quality of the equipment in distinction from the hull. In steel vessels the numerals 100, 95, or 90 are prefixed as showing further their condition, the higher numeral being the more creditable. *A 1*, or *A number 1*, is used colloquially to imply superiority ; hence, prime, first-class , first-rate.

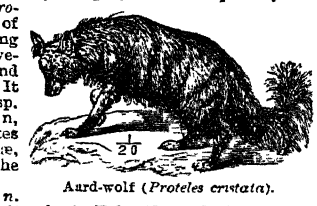
a′–a′ (ä′ä′), *n.* [Hawaiian.] *Geol.* Lava whose surface is rough and scoriaceous; — contr with *pahoehoe*. *Hawaii.*

aam (ōm; am), *n.* [D. *aam*, fr. L *ama, hama*, a water bucket, Gr. ἅμη.] An old Dutch and German measure of liquids, of varying value, being usually between 36 and 42 United States, or wine, gallons (30–35 imp. gals. or 136–159 liters).

aard′–vark′ (ärd′värk′), *n.* [D , earth-pig.] Either of two African mammals of the order Edentata and genus *Orycteropus*, found in Africa. They grow about five feet long, including the tail, and burrow in the ground, feeding entirely on ants, which they catch with the long, slimy tongue.

Aard-vark (*Orycteropus capensis*). ($\frac{1}{20}$)

aard′–wolf′ (ärd′wo͝olf′), *n.* [D., earth-wolf] A hyena-like quadruped (*Proteles cristata*), of South Africa, having a striped coat, five-toed fore feet, and a distinct mane. It feeds on insects, esp. termites, carrion, etc. It constitutes a family, Protelidæ, or is included in the hyena family.



Aard-wolf (*Proteles cristata*). $\frac{1}{20}$

Aar'on (ăr′ŭn), *n.* [L. *Aaron* or Gr. Ἀαρών, fr. Heb. *Aharōn.*] **1.** A masc. proper name. Arab. *Haroun*, or *Haroun* (hȧ-rōōn′).

2. The priestly associate of Moses, mentioned as the first Jewish high priest , rarely, used fig., an ecclesiastical leader.

3. In Shakespeare's "Titus Andronicus," a villainous Moor, beloved by Tamora.

Aa-ron'ic (ā-rŏn′ĭk) } *a.* **1.** Pertaining to Aaron the Le-
Aa-ron'i-cal (-ĭ-kăl) } vite, the first high priest of the Jews ; hence, Levitical ; pontifical.

2. Designating an order of lesser Mormon priests.

Aar'on's-beard' (ăr′ŭnz-bērd′), *n.* Any of several plants having some resemblance to a beard; as the great St. John's-wort, from its numerous stamens , the strawberry geranium and the Kenilworth ivy, from their threadlike runners, etc.

Aaron's rod. **1.** *Bib.* The rod used by Aaron. See *Ex.* vii. 9, *Num.* xvii. 8.

2. *Arch.* A straight molding of rounded section from which scrollwork or leafage seems to come out

3. (Preferably *Aaron's-rod.*) A plant with a tall flowering stem ; esp., the great mullein, or the goldenrod.

Ab (ăb ; ab), *n.* [Heb] The fifth month of the Jewish ecclesiastical year. See JEWISH CALENDAR.

ab- (ăb-) A prefix fr Lat. *ab-* (akin to Eng. *of, off*. See OF), sometimes through F. *ab-*, *a-*, signifying *from, away, separation*, or *departure.*

☞ It appears in Lat. and Eng. as *a-* before *v* and *m ; abs-* before *c, qu, t ;* elsewhere (in English) as *ab-;* as in *avert, amentia, abscond, abstract, abduct.*

ab'a (ăb′ȧ), *n.* **1.** A cloth, generally striped, woven from the hair of camels, goats, etc., in Arabia, Syria, etc.

2. A loose sleeveless outer garment, opening in front, made by folding an oblong of this cloth. It is worn by Arabs.

a'ba-cá' (ä′bä-kä′), *n.* [Native name.] The Manila hemp.

ab'a-cist (ăb′ȧ-ĭst), *n.* [LL. *abacista*, fr. *abacus.*] One who uses an abacus in casting accounts ; a calculator.

a-back' (*ə*-băk′), *adv.* [*a-* + *back ;* AS. *on bæc* at, on, or

---

A (ā), *n.* [Babylon. *Â*] *Babylon. Myth.* The consort of Shamash. The reading **Ai** (a′ē) or **Aya** (a′yȧ) is also possible.

A, *pron.* Corrupt. of I, HE, SHE, IT, THEY. *Obs. or Dial* " *A* brushes his hat." *Shak.*

a. *adj.* A shortened form of AN, *num. adj.*, one *Obs. or Dial.*

a (*ə*), *v. t.* Corruption of HAVE. *Obs. or Dial.* "So would I *a* done." *Shak.*

a + AND.

a, *conj.* And. *Obs.*

a, *adv.* [AS. *ā, āwa.*] Always ; aye. *Obs.*

a, or **a'** (ō), *adj.* All. *Scot.*

@ *Abbr. Com.* At (L., "at" or "to").

‖ **a**, *or* ‖ **ab**, *prep.* [L.] From ; away from ; out of ; after ; by.

a-bac'i-nate (*ə*-băs′ĭ-nāt), *v. t.* [LL *abacinatus*, p. p of *abacinare, ab* off + *bacinus* a basin.] To blind by a red-hot metal plate held before the eyes, or by light rays reflected from a polished basin. *Rare.* — **a-bac'i-na'tion** (-nā′shŭn), *n* Also erroneously **ab-bas'i-na'tion.**

ab'a-cis'cus (ăb′ȧ-sĭs′kŭs), *n.* [Gr. ἄβακίσκος.] An abaculus.

ab'ack, *n.* An abacus. *Obs.*

ab'a-cot. An old misspelling of BYCOKET.

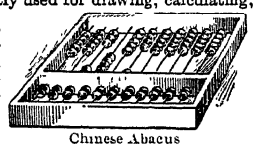
---

toward the back. See BACK.] **1.** Toward or to the back or rear, backward; back. *Chaucer.*
2. Behind, in the rear, hence, aloof.
3. *Naut.* Backward against the mast, — said of the sails of a ship, or of the ship itself, when the sails are pressed back by the wind bearing on their forward surfaces, the progress of the ship thus being checked, whence the phrases *to be taken aback, all aback*, etc., often used ng

ab-ac'ti-nal (ăb-ăk'tĭ-năl, ăb'ăk-tī'năl), *a.* [*ab-* + *actinal*] *Zool.* Pertaining to the surface or end opposite to the mouth in a radiate animal, — opposed to *actinal*. — **ab-ac'ti-nal-ly**, *adv.*

ab'a-cus (ăb'*a*-kŭs), *n.*; *pl.* E. ABACUSES (-ĕz; -ĭz), L ABACI (-sī). [L. *abacus, abax*, Gr ἄβαξ] **1.** A table or tray strewn with sand, anciently used for drawing, calculating, etc *Obs*

2. A calculating table or frame; an instrument for performing arithmetical calculations by balls sliding on wires, or counters in grooves, the lowest line representing units, the second line tens, etc. It is still employed in various Oriental countries. Sometimes called **ab'a-cus Fyth'a-gor'i-cus** (pĭth'*a*-gŏr'ĭ-kŭs).



Chinese Abacus

3. *Logic.* A machine by which may be shown all the combinations of a number of terms and their negatives, together with the effect produced by qualification or restriction

4. *Arch.* The uppermost member or division of the capital of a column, immediately under the architrave. See ORDER.

5. A board, tray, or table, divided into perforated compartments, for holding cups, bottles, or the like; a kind of cupboard, buffet, credence, or sideboard

ab'a-cus har-mon'i-cus. [L. See HARMONIC.] *Music.* **a** An ancient diagram showing the structure and disposition of the keys of an instrument. **b** The arrangement and structure of the pedals or keys of an instrument. — **a. major**, A English Gothic Abacus. a trough used in washing gold.

A-bad'don (*a*-băd'dŭn), *n.* [Heb. *ăbaddōn* destruction, abyss, fr. *ābad* to be lost, to perish] **1.** Lit., (place of) destruction; the place of the lost in sheol, the bottomless pit; the abyss of hell.

In all her gates, *Abaddon* rues
Thy bold attempt. *Milton*

2. The destroyer, or angel of the bottomless pit; Apollyon.

a-baft' (*a*-băft'), *prep.* [*a-* on + ME. *baft, baften, biaften*, AS. *bæftan*; *be* by + *æftan* behind. See AFTER, AFT, BY.] *Naut.* Behind; toward the stern from.

abaft the beam, *Naut*, in an arc of the horizon between a line that crosses the ship at right angles, or in the direction of her beams, and that point of the compass toward which her stern is directed.

a-baft', *adv. Naut.* Toward or at the stern; aft.

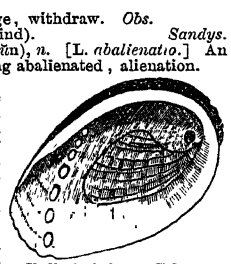
ab-al'ien-ate (ăb-āl'yĕn-āt), *v. t.* [L. *abalienatus*, p. p. of *abalienare*. See ALIEN.] **1.** *Civil Law.* To transfer the title of; to alienate. *Rare.*

2. To take away; to estrange, withdraw. *Obs.*

3. To cause alienation of (mind). *Sandys.*

ab-al'ien-a'tion (-āl'yĕn-ā'shŭn), *n.* [L. *abalienatio.*] An abalienating, or state of being abalienated, alienation.

ab'a-lo'ne (ăb'*a*-lō'nē), *n.* A gastropod mollusk, of the suborder Rhipidoglossa and genus *Haliotis*, having a shell of a flattened, oval, slightly spiral form, perforated with a row of apertures for the escape of the water from the gills, and covering the animal like a roof; an ear shell; a sea-ear. It clings to the rocks with great tenacity with its broad muscular foot. The shell is lined with mother of pearl, which is used in inlaying, button making, etc. The animal is used for food, esp. among Oriental nations.



Shell of Abalone (*Haliotis tuberculata*).

A-ba'ma (*a*-bā'mă), *n.* [NL, prob. fr. Gr *ἀ-* not + *βᾶμα, βῆμα*, step; — in allusion to the belief that it produced lameness in cattle; but cf. Sp. & Pg. *abama.*] *Bot.* A genus of melanthaceous bog plants of eastern North America, northwestern Europe, and Japan. *A. ossifragum* is the bog, or Lancashire, asphodel of England; *A. americanum* is the bog asphodel of the New Jersey pine barrens.

a-ban'don (*a*-băn'dŭn), *v. t.*; A-BAN'DONED (-dŭnd); A-BAN'DON-ING. [OF. *abandoner*, F. *abandonner*; *a* (L. *ad*) + *bandon* permission, authority, fr. LL. *bandum*, better *bannum*, public proclamation, interdiction, *bannire* to proclaim, summon; of Germanic origin; cf. Goth. *bandwjan* to show by signs, to designate, OHG. *ban* proclamation. The word meant to proclaim, put under a ban, put under control; hence, to compel, subject, or to leave in the control of another, and hence, to give up. See BAN.] **1.** To reduce to control, to subdue. *Obs.*

Fortune to her law cannot *abandon* me. *Skelton.*

2. To relinquish or give up with the intent of never again resuming or claiming one's rights or interests in; to give up absolutely; to forsake entirely; to renounce utterly; to relinquish all connection with or concern in; to desert, as a person to whom one is bound by a special relation, as of allegiance or fidelity, to quit, forsake.

Hope was overthrown, yet could not be *abandoned*. *I. Taylor.*

3. To give (one's self) up without attempt at self-control; to yield (one's self) unrestrainedly; — often in a bad sense.

He *abandoned* himself . . to his favorite vice. *Macaulay.*

4. In marine insurance, to surrender or relinquish to the underwriters the insured's interest in (the property covered by the policy) in order to recover as for a total loss. See LOSS.

5. To cast or drive out, to banish; expel; reject. *Obs.*

That he might . . *abandon* them from him *Udall.*
Being all this time *abandoned* from your bed *Shak.*

Syn. — Leave, quit, renounce, forego, resign, give up, surrender, relinquish — ABANDON, DESERT, FORSAKE agree in the idea of quitting, or leaving in the lurch. ABANDON denotes the absolute giving up of an object, often with the further implication of its surrender to the mercy of something or some one else; as, to *abandon* a shipwrecked vessel to the waves, or one's self to despair. DESERT (except sometimes as applied to places, usually in the passive, as, the *deserted* village, *deserted* streets) denotes the quitting of an object in violation of a legal or moral claim to allegiance or support; as, to *desert* one's colors, one's post, one's principles. FORSAKE, which may or may not involve culpability, implies the breaking off of association with something familiar or dear; as, to *forsake* one's friends, the blood *forsook* his cheeks. See LEAVE, RELINQUISH, RENOUNCE.

The United Provinces . . must be *abandoned* to the most dangerous enemy of England. *Hume.*
He that takes the forlorn hope in an attack, is often *deserted* by those that should support him. *Scott.*
Self-love *forsook* the path it first pursued. *Pope*

a-ban'don (*a*-băn'dŭn), *n.* [Cf. F. *abandon*. See ABANDON, *v.*] Abandonment; relinquishment. *Obs.*

‖ **a'ban'don'** (*a*'băn'dôn', *Eng. a*-băn'dŭn), *n.* [F. See ABANDON, *v.*] A complete giving up to natural impulses; freedom from artificial constraint; careless freedom or ease.

Giving . . up to his wild whim with a perfect *abandon* *Poe.*

a-ban'doned (*a*-băn'dŭnd), *p. a.* **1.** Forsaken; deserted.

"Your *abandoned* streams." *Thomson.*

2. Self-abandoned; given up to vice; extremely wicked, or sinning without restraint; irreclaimably wicked, as, an *abandoned* villain.

Syn. — Depraved, corrupt, vicious, vile; graceless, shameless, unprincipled; obdurate, hardened. — ABANDONED, PROFLIGATE, DISSOLUTE, REPROBATE all express great personal depravity. ABANDONED suggests unresisting self-surrender to vice; PROFLIGATE, open and shameless disregard of decency (often with the accompaniment of squandered means); DISSOLUTE, utter laxity of morals and the throwing off of all restraint; REPROBATE, complete insensibility to reproof, and (theologically) abandonment beyond recovery to the consequences of one's evil ways. See CORRUPT.

Nowhere more *abandoned* libertines, more refined luxurists, extravagant debauchees. *Sir W. Temple.*
There was no excess which was not encouraged by the ostentatious *profligacy* of the King and his favorite courtiers *Macaulay.*
His court, the *dissolute* . . . school of wantonness *Cowper.*
Insensate left, or to sense *reprobate*,
And with blindness internal struck *Milton.*

a-ban'don-ment (-mĕnt), *n.* [F. *abandonnement.*] Act of abandoning, or state of being abandoned (in any sense); total desertion, relinquishment; self-surrender · abandon.

The *abandonment* of the independence of Europe *Burke*

ab'ar-tic'u-la'tion (ăb'ar-tĭk'ū-lā'shŭn), *n.* [L. *ab* + *articulatio.* See ARTICULATION.] *Anat.* Articulation, esp. diarthrosis. — **ab'ar-tic'u-lar** (-tĭk'ū-lăr), *a.*

a-base' (*a*-bās'), *v. t.*; A-BASED' (*a*-bāst'); A-BAS'ING. [OF. *abaissier*, F. *abaisser*, LL. (assumed) *adbassiare*; *ad* + *bassiare*, fr. *bassus* low. See BASE, *a.*] **1.** To lower or depress; to throw or cast down; as, to *abase* the eye. *Archaic. Bacon.*

Saying so, he *abased* his lance. *Shelton*

2. To cast down or reduce, as in rank, office, condition in life, or estimation of worthiness; to depress; humble; degrade.

Whosoever exalteth himself shall be *abased*. *Luke* XIV. 11.

Syn. — Disgrace, dishonor, mortify, shame, depose. — ABASE, DEBASE, DEGRADE, REDUCE, HUMBLE, HUMILIATE agree in the idea of bringing down from a higher to a lower state. ABASE expresses a bringing down, always in the feeling of one's estate or condition, often in the estate itself; as, to *abase* the proud, or one's self before God. DEBASE involves an actual deterioration in quality or worth; as, to *debase* the coin of the realm, the mind by vicious indulgences. DEGRADE (cf. DISHONOR) implies a lowering in station or rank (so also *reduce*) or in moral standard; as, to *degrade* from the priesthood, to *reduce* an officer to the ranks, to practice a *degrading* vice. HUMBLE (see HUMBLE) always, as *abase* sometimes, suggests a sense of lowered dignity or lost prestige, and when reflexive often implies self-abasement without loss of self-respect, thus differing from *humiliate*, which always implies ignominy. See DISHONOR; cf. DETERIORATION.

His mind [could not] perceive that *humiliation* must *degrade*, but could not save him. . . He begged in piteous terms that he might be admitted to the royal presence. . . When it was known . . . how he had *abased* himself, the general surprise was great. *Macaulay.*
Arran was *degraded* from authority. *Hume.*
We are pleased . . to see him taken down and *humbled* in his reputation, and in some measure *reduced* to our own rank. *Spectator.*
Can thus
The image of God in Man . .
To such unsightly sufferings be *debased*? *Milton.*

a-based' (*a*-bāst'), *p. a. Her.* Borne lower than usual, as a fess; also, turned downward, as the tips of a bird's wings. — **a-bas'ed-ly** (*a*-bās'ĕd-lĭ), *adv.* — **a-bas'ed-ness**, *n.*

a-base'ment (*a*-bās'mĕnt), *n.* [Cf. F. *abaissement.*] An abasing; state of being abased; a humbling; humiliation.

a-bash' (*a*-băsh'), *v. t.*; A-BASHED' (*a*-băsht'); A-BASH'ING. [ME. *abaissen, abaisshen, abashen*, OF. *esbahir*, F. *ébahir*, to astonish, fr. L. *ex* + *bah*, interj., expressing astonishment. In ME. somewhat confused with *abase*. Cf. FINISH] To destroy the self-possession of; to confuse or confound, as by exciting suddenly a consciousness of guilt, mistake, or inferiority; to put to shame; disconcert; discomfit.

Abashed, the devil stood,
And felt how awful goodness is. *Milton*
He was a man whom no check could *abash* *Macaulay.*

Syn. — Confuse, confound, shame. See EMBARRASS.

a-bash'ment (*a*-băsh'mĕnt), *n.* [Cf. F. *ébahissement*] State of being abashed, confusion from shame.

a-ba'si-a (*ā*-bā'zhĭ-*a*; -zĭ-*ā*), *n.* [NL.; Gr. *ἀ-* not + *βάσις* a step.] *Med.* Inability to coordinate muscular actions properly in walking. — **a-ba'sic** (*ā*-bā'sĭk), *a.*

‖ **a-ba'te** (ä-bä'tā), *n.*; *pl.* ABATI (-tē). Also *abbate.* [It. See ABBOT.] In Italy, formerly, any ecclesiastic, or person habited in ecclesiastical garb; now, as a title of respect, analogous to French *abbé*, any ecclesiastic without other distinguishing title.

a-bate' (*a*-bāt'), *v. t.* [OF. *sei embatre* to thrust one's self in.] *Law.* To force or intrude (one's self) without right (into a tenement).

a-bate', *v. i. Law.* To enter without right upon a tenement after the death of the last possessor and before the heir or devisee takes possession.

a-bate', *v. t.*; A-BAT'ED (-dĕd), A-BAT'ING (-ĭng). [OF. *abatre* to beat down, F. *abattre*, LL. *abatere*; *ad* + *battere* to beat, L. *batuere*. Cf. 2d BATE, BATTER.] **1.** To beat or throw down, to demolish; to put an end to, or do away with. *Obs.*, except in *Law* (see def. 7, below).

2. To reduce or cast down in character or standing; to depress; lower; degrade; humble. *Obs. or R.*

3 To reduce or lower in amount, number, degree, intensity, etc., to lessen; diminish; moderate; as, to *abate*, or reduce the amount of, a tax, to *abate* pride, zeal, hope.

In itself it would be a chuos *abated* only by quantitative determination *James Ward*

4. To reduce (in respect of); to deprive. *Obs.*

She hath *abated* me of half my train. *Shak.*

5. To deduct; omit; as, to *abate* part of a price.

Nine thousand parishes, *abating* the odd hundreds. *Fuller.*

6. To turn the edge of; to blunt, lit. or fig. *Obs.*

To *abate* the edge of envy *Bacon.*

7. *Law.* **a** To bring entirely down or demolish, to put an end to; to do away with; as, to *abate* a nuisance, to *abate* an action. **b** To nullify; to make void. **c** To lessen or diminish; as, in case of a deficiency of assets, first the general legacies, and after they are exhausted, the specific legacies, are *abated* pro rata to pay debts.

8 To beat down, lower, or cut away, as in stone cutting, so as to leave a figure in relief.

9 *Metal.* To reduce the temper of.

10. *Leather Manuf.* = BATE.

Syn. — See ABOLISH.

abated arms, arms with blunted edges, as for a tournament

a-bate', *v. i* [See ABATE, *v. t.*] **1.** To be abated; specif.: **a** To be defeated, or come to naught; to fall through; terminate; determine; fail; as, the writ or action *abates.* **b** To decrease; to become less, as in amount or strength; as, the legacies *abated* proportionately; a storm *abates.*

The fury of Glengarry . . . rapidly *abated*. *Macaulay.*

2. *Falconry.* To flutter; to bate; — said of a hawk. *Obs.*

Syn. — Decrease, diminish, lessen, wane, slacken, sink, ebb, recede, decline. — ABATE, SUBSIDE. ABATE implies a diminution of force or intensity; as, the ardor of one's love *abates.* SUBSIDE implies the cessation of a previous state of agitation or commotion; as, the storm *subsides* into a calm. See DECREASE.

The tyrant passions all *subside*,
Fear, anger, pity, shame, and pride
No more my bosom move *Whitehead.*

a-bate'ment (-mĕnt), *n.* [OF. *embatement.* See ABATE, *v. i.*, to enter.] *Law.* The action of one who abates in a tenement. See ABATE, *v. i.*, to enter.

a-bate'ment, *n.* [OF. *abatement*, F. *abattement.*] **1** Act of abating, or state of being abated.

2. Amount abated; deduction; decrease; rebate.

3. *Her.* A mark indicating depreciation, degradation, or disgrace. "The marks of illegitimacy are the only *abatements* in use." *Woodward & Burnett.*

Syn. — Lessening, diminution, decrease, reduction, subsidence, mitigation, alleviation, removal.

in abatement, *Law*, in termination of the proceedings of an action by reason of some formal defect, as misnomer.

a-bat'er (*ā*-bāt'ẽr), *n.* **1.** One that abates.

2. *Law.* A plea in abatement.

ab'a-tis, ab'at-tis (ăb'*ā*-tĭs, *F. ȧ*'bȧ'tē'; 277), *n.* [F. *abatis* mass of things beaten or cut down, fr. *abattre* See ABATE.] *Fort.* A means of defense formed by felled trees whose butts are secured towards the place defended and the ends of whose branches, often sharpened, are directed outwards, or against the enemy. In modern warfare it has been largely superseded by wire entanglements.

ab'a-tised, ab'at-tised (ăb'*ā*-tĭst), *a.* Having an abatis

‖ **a'bat'-jour'** (*ȧ*'bȧ'zhōōr'), *n.* [F. *abat-jour*, fr. *abattre* to cast down + *jour* day, light.] A device for throwing daylight downward as it enters a window, as a sloping soffit of a lintel or arch, or a movable slat or screen.

a-ba'tor (*ā*-bā'tẽr), *n. Law.* The stranger who abates in a tenement.

a-ba'tor, *n. Law.* One who abates a nuisance.

‖ **a'bat'-sons'** (*ȧ*'bȧ'sōn'), *n.* [F. *abat-sons.*] Any device for throwing sound downward, as louver boards in a belfry.

---

ab-ac'tion, *n.* Cattle stealing.
ab-ac'tor, *n.* [L., fr. *abigere* to drive away.] *Civil Law.* A cattle stealer. See ABIGTUS.
Ab'a-cus (ăb'*a*-kŭs). *Bib.*
a-bac'u-lus (*ā*-băk'ū-lŭs), *n.*; *pl.* -LI (-lī). [L., dim. of *abacus.*] *Mosaic.* A small tile.
abad, abade. † ABODE.
a-ba'da (*a*-bä'dä), *n.* [Pg., the female rhinoceros.] The rhinoceros. *Obs.*
‖ **a'ba-de'jo** (*ȧ*'bä-thā'hō; 133, 189), *n.* [Sp.] *Zool.* The bacalao.
‖ **a'ba-den'go** (*ȧ*'bä-thĕn'gō; 146), *n.* [Sp.] Abbey lands.
ab'a-de-vine' † ABERDEVINE.
‖ **a-ba'di** (*a*-bä'dē), *n.* [Hind. *ābādī.*] An inhabited place, as a village *India.*
Ab'a-di'as (ăb'*ā*-dī'ăs) *Bib.*
‖ **ab a-ter'no** (ē-tûr'nō). [L.] From eternity.
A-bag'tha (*ā*-băg'thä). *Bib.*
abaid. † ABODE.
abaie. † ABY.
a-bai'sance (*a*-bā'săns), *n.* [OF. *abaissance* abasement, humility.] Obeisance *Obs.*
a-bai'ser (*a*-bā'sẽr), *n.* Ivory black or animal charcoal.
abaiss, abaisshe † ABASH.
‖ **a'bais'sé'** (*ȧ*'bā'sā'), *p. a.* [F.] *Her* Abased.
‖ **a'baisse'** (*ȧ*'bĕs'), *n.* [F.] Thin under crust of pastry
a-baissed' (*a*-bāst'), *p. a. Her.* Abased.
a-baist'. Obs. p. p. of ABASH.
abak. † ABACK
abaka. Var. of ABACA.
abalh. Obs. pret. of ABELGEN.
Ab'a-na, Ab'a-nah (ăb'*a*-nä).
Bib.
a-band', *v. t* [Contr. fr. ABANDON.] *Obs* **1.** To abandon
2. To banish; to expel.
a'ban-don', a'ban-doun', *n.* [OF *a* (F *à*) + *bandon.* See ABANDON, *v.*] = BANDON *Obs.*

a-bate', *n.* Act of abating, or casting down; lowering; diminution; abatement. *Obs.*
abathie. † ABBACY.
ab'a-ton, *n.* [Gr *ἄβατον*, lit., untrodden.] = ADYTUM.
‖ **à bȧ'tons' rom'pus'** (*a* bä'tôn' rôn'pü') [F.] Lit, with sticks broken; hence, fitfully.
ab'at-tis. Var. of ABATIS.

‖ **a'bat'toir'** (ă'bă'twär'), *n.*, *pl.* -TOIRS (*Eng.* -twärz'). [F., fr. *abattre* to beat down. See ABATE.] A public slaughterhouse for cattle, sheep, etc.

‖ **a'bat'-vent'** (ă'ba'vän'), *n.* [F.] **1.** *Arch.* **a** A series of sloping boards, slats, or the like, used, as in a belfry light, to break the wind without obstructing the passage of air or sound. They serve as well for an abat-sons. See LOUVER BOARD, *Illust.* **b** A sloping roof, as of a penthouse. **2.** A kind of metal chimney cap, bearing a vane.

ab-ax'i-al (ăb-ăk'sĭ-ăl) | *a* [L. *ab* + *axis* axle.] *Bot.*

ab-ax'ile (-ăk'sĭl, -sĭl) | Lying out of the axis of the seed, — said of an embryo.

abb (ăb), *n.* [AS. *ăweb, ăb*; *a-* + *web*. See WEB.] **1** Among weavers, the woof or yarn for it. *Abb wool*, wool for the *abb*. **2.** The poorest part of the skirtings and edgings of a fleece.

Ab'ba (ăb'ă), *n.* [Syriac *abbā* father. See ABBOT.] Father; — used, by Jesus and his contemporaries, and later by Greek-speaking Christian Jews, of the Deity, and in the Syrian, Coptic, and Abyssinian churches, as a title given to the bishops, and by the bishops to the patriarch.

ab'ba-cy (ăb'a-sĭ), *n.*; *pl.* -CIES (-sĭz). [L. *abbatia*, fr. *abbas, abbatis*, abbot. See ABBEY.] The dignity, estate, jurisdiction, or term of tenure of an abbot.

Ab-bas'side (ă-băs'ĭd; -id), *a.* Pertaining to or designating the dynasty of caliphs claiming descent from Abbas, the uncle of Mohammed. They ruled (about 750–1258) at Bagdad, and were famous for their luxury and magnificence, and for their patronage of art and literature, esp. in the reigns of Harun al Rashid and Al-Mamun.

ab-ba'tial (ă-bā'shăl), *a.* [LL. *abbatialis*: cf. F. *abbatial*.] Pert. to an abbot or an abbey; as, *abbatial* rights.

‖ **ab'bé'** (a'bā'), *n.* [F. See ABBOT.] Abbot; — commonly given as a title of respect in France to any one vested with the ecclesiastical habit or dress. After the 16th century, the name was given, in social parlance, to candidates for some priory or abbey in the gift of the crown. By further extension, any unbeneficed secular ecclesiastic.

ab'bess (ăb'ĕs), *n.* [OF. *abaesse, abeesse*, F. *abbesse*, L. *abbatissa*, fem. of *abbas, abbatis*, abbot. See ABBOT.] A female superior or governess of a nunnery, or convent of nuns, having the same authority over the nuns which the abbots have over the monks. See ABBEY.

ab'bey (ăb'ĭ), *n.*; *pl.* ABBEYS (-ĭz). [OF. *abaïe, abeie*, F. *abbaye*, L. *abbatia*, fr. *abbas* abbot. See ABBOT; cf. ABBACY.] **1.** A monastery or society of persons of either sex secluded from the world and devoted to religion and celibacy; also, the monastic building or buildings. The men are called *monks*, and governed by an abbot; the women are called *nuns*, and governed by an abbess. **2.** The church of a monastery. In London the term **the Abbey** means Westminster Abbey, and in Scotland the precincts of the Abbey of Holyrood. *Abbey* is also used as the name of a private residence converted from, or occupying the site of, an abbey house, as, Newstead *Abbey*, the residence of Lord Byron.

Syn. — Convent, nunnery, priory. See CLOISTER.

abbey fly. *Angling.* An artificial fly with gray wings, red and gold body, and brown legs.

abbey laird. *Scot.* An insolvent debtor who took refuge in Holyrood Abbey. See ASYLUM. *Humorous.*

abbey lands *Law.* Lands belonging to an abbey, which were held in mortmain, and entirely exempt from tithes.

ab'bot (ăb'ŭt), *n.* [AS. *abbod, abbad*, L. *abbas, abbatis*, Gr. ἀββᾶς, fr. Syriac *abbā* father. Cf. ABBA, ABBÉ, ABATE.] **1.** *Eccl.* **a** The superior or head of an abbey. **b** One of a class of bishops whose sees were formerly abbeys. **2** Loosely, any of various officers, as the head of certain guilds in the Middle Ages.

Abbot of Misrule, A. of Unreason. = LORD OF MISRULE. — **A. of the People** [L. *abbas populi*], a chief magistrate of the Genoese; — a title given from about 1270 to about 1340.

ab-bre'vi-ate (ă-brē'vĭ-āt), *v. t.*; AB-BRE'VI-AT'ED (-āt'ĕd); AB-BRE'VI-AT'ING (-ĭng). [L. *abbreviatus*, p. p. of *abbreviare*. See ABRIDGE.] **1.** To make briefer; to shorten; abridge; epitomize; esp., to reduce or shorten, as words written or spoken, by contraction or by omission. "It is one thing to *abbreviate* by contracting, another by cutting off." *Bacon.* **2.** *Math.* To simplify (a fraction) by canceling factors common to both numerator and denominator.

Syn. — Contract, shorten, reduce. See ABRIDGE.

ab-bre'vi-ate (ă-brē'vĭ-ăt), *a.* Shortened; relatively short. — **ab-bre'vi-ate-ly**, *adv.*

ab-bre'vi-a'tion (-ā'shŭn), *n.* [LL. *abbreviatio*: cf. F. *abréviation*.] **1.** Act of shortening, or reducing. **2.** Result of abbreviating; an abridgment. **3.** The form to which a word or phrase is reduced by contraction or omission; a letter or letters standing for a word or phrase of which they are a part; as, *Gen.* for *Genesis*; *U. S. A.* for *United States of America*. **4.** *Music.* A shortened notation which represents several notes or groups of notes by means of a single symbol. See Appendix, *Arbitrary Signs*.

ab-bre'vi-a'tor (ă-brē'vĭ-ā'tĕr), *n.* [LL.: cf. F. *abréviateur*.] **1.** One that abbreviates, or shortens. **2.** An officer of the papal chancery who makes, by the use of recognized abbreviations, extracts from petitions, minutes of replies by the Pope, and also the first draft of bulls. Such secretaries were first employed under Pius II. (1458–64). At first they were of two classes — abbreviators of the greater, and of the lesser, "park," that is, the space screened off in the chancery, and their number varied from 12 to 60; now there are 12, all of the greater "park." **3.** An officer attached to the papal datary who expedites the "simple" bulls, relating to canonizations and the like.

ab-bre'vi-a-to-ry (ă-brē'vĭ-ă-tō-rĭ), *a.* Serving or tending to abbreviate; shortening, abridging.

ab-bre'vi-a-ture (-tūr), *n.* **1.** Abbreviation. *Obs.* **2.** An abridgment, a compendium or abstract

This is an excellent *abbreviature* of the whole duty of a Christian. *Jer. Taylor.*

A' B' C' (ā'bē'sē'). **1.** The first three letters of the alphabet, used for the whole alphabet. **2.** A primer of the alphabet and elements of reading. *Obs* **3.** The simplest rudiments of any subject, as, the *A B C* of finance. **4.** An acrostic in alphabetic order.

A-B-C book, a primer. *Shak.*

ab-dal' (ab-dăl'), *n.*; *pl.* ABDALI (ăb-dä'lē) [Ar. *budāl*, pl. *abdāl*, a substitute, a good, religious man, saint, fr. *badala* to change.] A religious devotee or dervish in Persia.

Ab-de'ri-an (ăb-dē'rĭ-ăn), *a.* Lit., of or pertaining to Abdera, a town in Thrace, of which Democritus, the Laughing Philosopher, was a native; hence, given to laughter, inclined to foolish or incessant merriment.

Ab'de-rite (ăb'dē-rīt). *n.* [L. *Abderita, Abderites*, fr. Gr. Ἀβδηρίτης.] An inhabitant of Abdera, in Thrace. **The Abderite**, Democritus. Cf. ATOMISM.

ab'di-cant (ăb'dĭ-kănt), *a.* [L. *abdicans*, p. pr.] Abdicating, renouncing; — with *of*. — *n.* One who abdicates.

ab'di-cate (-kāt), *v. t.*; AB'DI-CAT'ED (-kāt'ĕd); AB'DI-CAT'ING (-ĭng). [L. *abdicatus*, p. p. of *abdicare*; *ab* + *dicare* to proclaim, akin to *dicere* to say. See DICTION.] **1.** *Civil Law.* To disclaim and expel from the family, as a father his child; disown; disinherit. Hence, formerly, to cast off. **2.** To formally cut off or divest (*of* or *from*), to depose. *Obs.* **3.** To formally give up or relinquish, as sovereign power, to renounce, lay down, surrender, as a trust, duty, right, etc. *Abdicate* originally implied a formal renunciation, but later, as in the case of James II., was used of abandonment implied from conduct without a formal surrender.

He *abdicates* all right to be his own governor. *Burke*
The understanding *abdicates* its functions. *Froude*
The cross-bearers *abdicated* their service *Gibbon.*

Syn. — Relinquish, surrender, forego; abandon, quit, renounce. — ABDICATE, RESIGN, DEMIT have in common the idea of yielding up office, authority, or trust. ABDICATE applies particularly to the relinquishment of authority or dignity which is inherent or sovereign; as, to *abdicate* the crown. RESIGN applies particularly to the relinquishment (before the expiration of its term) of an office or a trust which has been conferred; as, to *resign* a clerkship. DEMIT is chiefly Scottish, and may have the force of either *abdicate* or *resign*. See RELINQUISH, RENOUNCE.

ab'di-cate, *v. i.* To relinquish or renounce a throne, high office, or dignity.

Though a king may *abdicate* for his own person, he cannot *abdicate* for the monarchy. *Burke.*

ab'di-ca'tion (-kā'shŭn), *n.* [L. *abdicatio.*] Act of abdicating (in any sense).

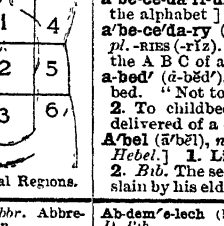
ab'di-ca-tive (ăb'dĭ-kā-tĭv), *a.* [L. *abdicativus.*] Causing, or implying, abdication. *Rare.*

Ab'di-el (ăb'dĭ-ĕl), *n.* [Heb. *Abdīēl.*] **1.** Lit., the servant of God; — used as a masc. prop. name. **2.** An angel mentioned by the Jewish cabalists. He is represented in Milton's "Paradise Lost" as one of the seraphim, who, when Satan stirred up a revolt among the angels subordinate to his authority, alone and boldly withstood his traitorous designs.

ab-do'men (ăb-dō'mĕn), *n.* [L.: cf. F. *abdomen.*] **1.** *Anat & Zoöl.* The belly; the part of the body between the thorax and the pelvis. Also, the cavity of the belly, lined by the peritoneum, and containing the stomach, bowels, etc. In anatomy, *abdomen* is often restricted to the part between the diaphragm and the commencement of the pelvis, the remainder being called the *pelvic cavity*. **2.** *Zoöl.* a The posterior, often segmented, section of the body, behind the thorax, in insects, crustaceans, and other arthropods, and certain polychætes. **b** In compound ascidians, the section of the zooid next behind the thorax.

ab-dom'i-nal (ăb-dŏm'ĭ-năl), *a.* **1.** Of or pertaining to the abdomen; ventral; as, the *abdominal* regions, muscles. **2.** *Zoöl.* Having the pelvic fins under the abdomen behind the pectoral fins.

abdominal aorta. See AORTA. — **a. regions,** *Anat.*, the nine areas into which the abdomen is divided by imaginary planes, two vertical, through the middle of Poupart's ligaments, and two horizontal, through the junction of the ninth rib and costal cartilage, and the top of the iliac crest respectively. The median areas, from above downward (see *Illust.*), are the *epigastric* (1), *umbilical* (2), and *hypogastric* (3); the lateral ones, the *hypochondriac* (4, 4), *lumbar* (5, 5), and *inguinal* (6, 6) of each side. — **a respiration,** *Physiol.*, diaphragmatic respiration. — **abdominal ring,** *Anat.*, either of two openings (also called *inguinal rings*) in the fascia of the abdominal muscles on either side, of which openings the *external* is in the fascia of the external oblique muscle, the *internal* in the transversalis fascia. They are respectively the outlet and inlet of the inguinal canal, giving passage to the spermatic cord in the male and to the round ligament in the female. They often give passage to hernias.



Abdominal Regions.

ab-dom'i-nal (ăb-dŏm'ĭ-năl), *n.*; *pl.* E. -NALS (-nălz), L. -NALES (-nā'lēz). *Zoöl.* Any fish of the group Abdominales. — **ab-dom'i-na'li-an** (-nā'lĭ-ăn), *a.* & *n.*

Ab-dom'i-na'les (-nā'lēz), *n. pl.* [NL.] A group (not now generally adopted) of teleost fishes having the pelvic fins under the abdomen behind the pectorals. It corresponds roughly, but not exactly, with the groups Physostomi, Cycloidei, and Malacopterygii of other classifications, though based on entirely different characters

ab-dom'i-no-an-te'ri-or (ăb-dŏm'ĭ-nō-) *or* **-pos-te'ri-or,** *a. Obstetrics* Designating that position of the fetus in which the belly is turned forward, or backward.

ab-dom'i-nos'co-py (-nŏs'kŏ-pĭ), *n.* [L. *abdomen* + *-scopy.*] Examination of the abdomen to detect disease

ab-dom'i-no-tho-rac'ic (-nō-thō-răs'ĭk), *a.* Relating to the abdomen and the thorax, or chest; as, the **abdominothoracic arch,** the boundary between the walls of the chest and abdomen.

ab-dom'i-nous (ăb-dŏm'ĭ-nŭs), *a.* Big-bellied.

Gorgonius sits, *abdominous* and wan,
Like a fat squab upon a Chinese fan *Cowper*

ab-duce' (ăb-dūs'), *v. t.*; AB-DUCED' (-dūst'); AB-DUC'ING (-dūs'ĭng) [L *abducere* to lead away, *ab* + *ducere* to lead. See DUKE, cf. ABDUCT.] To draw or conduct away; to withdraw, to draw to a different part. *Obs. or Archaic.*

If we *abduce* the eye unto either corner, the object will not duplicate. *Sir T. Browne*

ab-du'cent (ăb-dū'sĕnt), *a.* [L. *abducens*, p. pr. of *abducere*.] *Physiol.* Abducting, or causing abduction — *n.* Anything that is abducent.

abducent nerve, *Anat*, the sixth cranial, or external oculomotor, nerve distributed to the external rectus muscle, which turns the eyeball outward.

ab-duct' (ăb-dŭkt'), *v. t.*, AB-DUCT'ED; AB-DUCT'ING. [L. *abductus*, p. p. of *abducere*. See ABDUCE.] **1.** To take away surreptitiously by force; to carry away (a human being) wrongfully, and usually by violence; to kidnap. **2.** *Physiol.* To draw away, as a limb or other part, from a position near or parallel to the median axis, as in raising the arm laterally or in separating two fingers

ab-duc'tion (ăb-dŭk'shŭn), *n.* [L. *abductio*: cf. F. *abduction.*] **1.** Act of abducing or abducting; as, the *abduction* of a limb; the crime of *abduction* of a female, etc.; specif., under statutory law, the unlawful taking away of a woman for purposes of marriage or defilement, as distinguished from kidnaping (which see). The statutory crime is variously defined; but it is generally made to include the taking away or detention or harboring of a woman under a certain age, usually 16 or 18, whether with or without her consent, or knowledge of her age. Cf. AGE OF CONSENT. **2.** *Logic.* A syllogism or form of argument in which the major is evident, but the minor, and therefore the conclusion, only probable.

ab-duc'tor (ăb-dŭk'tẽr), *n.* [NL.] One that abducts.

ab-duc'tor hal-lu'cis (hă-lū'sĭs), *Anat.*, a muscle passing on the inner border of the foot from the os calcis to the first phalanx of the great toe. — **a. pol'lu-cis** (pŏl'ĭ-sĭs), *Anat.*, a muscle arising from the annular ligament of the wrist and inserted into the first phalanx of the thumb.

a-beam' (*a*-bēm'), *adv.* [*a-* on + *beam.*] *Naut.* On the beam, that is, approximately on a line forming a right angle with the ship's keel; opposite the middle of the ship's side.

a-bear' (*a*-bâr'), *v. t.* [AS. *āberan*; *ā-*, orig., out + *beran* to bear.] **1.** To bear, to behave. *Obs.* **2.** To put up with; to endure. *Dial.*

a'be-ce-da'ri-an (ā'bē-sē-dā'rĭ-ăn), *n.* [L. *abecedarius*, fr the names of the first four letters of the alphabet.] **1.** One who is learning the alphabet; hence, a tyro. **2.** One engaged in teaching the alphabet. **3.** [*cap.*] A follower of the Anabaptist Nicolas Storch, a disciple of Luther, said to have held that the Holy Spirit inspires even unlettered minds to interpret Scripture.

a'be-ce-da'ri-an, *a.* Pertaining to, or formed by, the letters of the alphabet. alphabetic; hence, rudimentary.

abecedarian psalms, hymns, etc., compositions in which (like the 119th psalm in Hebrew) distinct portions or verses commence with successive letters of the alphabet.

a'be-ce-da'ri-um (ā'bē-sē-dā'rĭ-ŭm), *n.*; *pl.* -RIA (-*ă*). [L., the alphabet.] An alphabet book; primer; abecedary.

a'be-ce'da-ry (ā'bē-sē'da-rĭ), *a.* = ABECEDARIAN, *a.* — *n.*; *pl.* -RIES (-rĭz). A book or table of the alphabet; a primer; the A B C of anything. *Rare.*

a-bed' (*a*-bĕd'), *adv.* [*a-* on + *bed.*] **1.** In bed, or on the bed. "Not to be *abed* after midnight." *Shak.* **2.** To childbed (in the phrase "*brought abed*," that is, delivered of a child). *Shak.*

A'bel (ā'bĕl), *n.* [L. *Abel, Abelus*, or Gr. Ἄβελ, fr. Heb. *Hebel.*] **1.** Lit., breath; vanity; — masc. prop. name. **2.** *Bib.* The second son of Adam and Eve, a keeper of sheep, slain by his elder brother Cain, a tiller of the earth, because

‖ **a'bat'tu'** (a'ba'tu'), *masc.*, **a'bat'tue'** (-tu'), *fem.*, *a.* [F.] Cast down; depressed.

‖ **a bat-tu'ta** (ä bat-tōō'tä). [It.] *Music.* With the beat; in time.

ab'a-ture (ăb'*a*-tūr), *n.* [F. *abatture*, fr. *abattre* See ABATE.] Grass and underbrush beaten down by a stag.

‖ **a'bat'-voix'** (a'bä'vwä'), *n* [F., fr. *abattre* to beat down + *voix* voice.] The sounding board over a pulpit or rostrum.

abaundon. † ABANDON.

abawe, *v. t. & i.*, *p. p.* ABAWED [Perh. fr. OF. *abaubir* to frighten.] To discomfit; astonish; be confounded. *Obs.*

a-bay', *n.* [OF. *abai* barking.] Barking; baying of dogs upon their prey. *Obs.*

a-ba'yeh (*a*-bä'yĕ), *n.* = ABA, a cloth or garment.

abaysed, abayst. Obs. p. p. of ABASH.

abb. For old forms of words beginning with *abb-* see the words beginning with *ab-*. [bot.]

abb. *Abbr.* Abbess; abbey; ab-

ab'ba (ăb'*a*), *n.* = ABA, a hair cloth or garment.

abbace † ABBESS

ab-bac'i-nate, -na'tion Vars. of ABACINATE, ABACINATION.

ab'ba-com'i-tes (ăb'*a*-kŏm'ĭ-tēz), *n. pl.*; *sing.* -COMES (-kŏ'mēz). [LL.] See LAY ABBOT.

‖ **ab'ba-dī'a** (ăb'ba-dē'a), *n.* [It.] *Arch.* = BADIA.

Ab-baʹdon (*a*-bä'dŏn), *n.* [Gr. *Abaddōn*, fr. Heb. *'abaddōn*, fr. *'ābad* to perish.] One of the fallen angels in Klopstock's "Messiah," who repents of his part in Satan's rebellion.

ab-bas' (ă-băs', a'bas), *n.* [Per.] See WEIGHT

ab'bas (ăb'ăs), *n.* [L.] Abbot *Obs*

Ab'ba Sa-la'mah (sä-lä'mä) See ABYSSINIAN CHURCH.

abbase. † ABASE.

abbasse. † ABBESS.

ab-bas'si. Var. of ABASSI.

ab-bas'si (*a*-bas'ē), *n.* [Ar. *'abbāsī.*] See WEIGHT.

ab'bat † ABBOT.

‖ **ab-ba'te** (ab-ba'tā), *n.*; *pl.* -TI (-tē) [It.] = 1st ABATE.

abbate. † ABATE

ab-ba'tes mi'li-tes (*a*-bā'tēz mĭ'lĭ-tēz) *sing.* ABBAS MILES (ăb'ăs mĭ'lēz). [LL.] See LAY ABBOT.

ab'bat-ess, *n* An abbess. *Obs*

ab-bat'i-cal, *a.* Abbatial

abbatisse. † ABBATESS.

ab-baye'. Archaic for ABBEY.

abbe. † HAVE.

abbed. † ABBOT.

ab-bes'tos. † ASBESTOS.

abbet. † ABET, HABIT.

Ab'bet-din', *or* **Ab'beth-din'** (ăb'bĕt-dēn'), *n.* [Heb.] See SANHEDRIN.

ab'bey-count'er, *n.* A stamped souvenir medal for pilgrims visiting an abbey.

abbey lubber. An idle monk or dependent of an abbey; hence, an idler; loafer. *Dryden.*

ab'bey-stead *or* **-stede** (-stēd), *n.* The site of an abbey.

ab-bil'i-ment † HABILIMENT

abbit. † HABIT.

abbod. † ABBOT.

abboddie. † ABBACY.

abbodesse. † ABBOTESS.

ab'bot-cy, *n.* Abbacy. *Rare.*

ab'bot-ess, *n.* An abbess. *Obs.*

ab'bot-ric, *n.* An abbacy. *Obs.*

ab'bot-ship, *n* See -SHIP

‖ **ab-boz'zo** (ab-bŏt'sō), *n.* [It.] A sketch or preliminary draft, as for a work of art; a study.

abbr., *or* **abbrev** *Abbr.* Abbreviated; abbreviation.

abbredge † ABRIDGE.

ab-bre'vi-ate, *v. t.* To be brief, as in speaking *Obs*

ab-bre'vi-ate, *n.* An abridgment *Obs. or Scots Law.*

‖ **Ab-bre'vi-a'ti-o Pla'ci-to'rum** (*a*-brē'vĭ-ā'shĭ-ō plā'sĭ-tō'rŭm). [LL.] *Law.* See *Pleas of the Crown*, under PLEA.

abb wool. See ABB.

ab'by. † ABBEY.

ab-ca'rae. Var. of ABKARI.

ABCdarian. † ABECEDARIAN.

A. B. C. F. M. *Abbr.* American Board of Commissioners for Foreign Missions. [SIAN.]

Ab-cha'sian. Var. of ABKHASIAN. [Ar. *'abd* slave, servant.] A prefix often found in proper names in Arabic and other Semitic languages

abd. *Abbr.* Abducted.

Ab'da (ăb'dă) *Bib.*

ab'da-la'ri (ăb'dă-lä'rē), **ab'de-la'ri,** *n.* A hairy variety of the muskmelon, native of Egypt

ab'dat (ăb'dăt), *n.* [Ar.] See MEASURE.

Ab'de-el (ăb'dē-ĕl). *Bib.*

Ab-dem'e-lech (ăb-dĕm'ē-lĕk). *D. Bib.* [*D Bib.*]

Ab-den'a-go (ăb-dĕn'*a*-gō) | **ab'dest** (ăb'dĕst; ab'-), *n.* [Per *ābdast*; *āb* water + *dast* hand.] Purification by washing the hands before prayer; — a Mohammedan rite

Ab-dev'en-ham (ăb-dĕv'ĕn hăm), *n Astrol.* The lord of the twelfth house.

Ab'di (ăb'dĭ). *Bib.*

Ab-di'as (ăb-dī'ăs) *Bib.*

ab'di-ca-ble (ăb'dĭ-kă-b'l), *a.* That may be abdicated.

ab'di-ca'tor (ăb'dĭ-kā'tẽr), *n.* One who abdicates.

ab'di-tive (ăb'dĭ-tĭv), *a.* [L. *abditivus*, fr. *abdere.*] Having the quality of hiding *Rare*

ab'di-to-ry (-tō-rĭ), *n.* [LL. *abditorium.*] A place for preserving articles. *Obs. or R.*

ab-dom'i-nal-ly, *adv.* of ABDOMINAL.

Ab'don *Bib.*

ab-du'cens (ăb-dū'sĕnz), *n.*; *pl* ABDUCENTES (ăb'dū-sĕn'tēz). [NL.] The abducent nerve.

‖ **ab'duc-to'res** (ăb'dŭk-tō'rēz), *L. pl.* of ABDUCTOR.

abe † ABY.

a-be', *or* **a-be',** *v. t.* Be; — in phrase *let a-be*, let alone. *Scot*

a-bea' † ABELE

a-bear'ance, *n.* Behavior *Obs*

abec † ABACK

abece Obs. for A B C

a-beche', *v. t* [OF. *abechier* To feed. *Obs*

abed (Obs pret of ABIDE

A-bed'ne-go (*a*-bĕd'nē-gō), *Bib* See SHADRACH.

abeir. † ABEY.

a-beigh' (*a*-bā'), *adv.* [Cf. Icel *beigr, beygr*, fear.] Cautiously aloof *Scot.*

A'bel (ā'bĕl), *n.* [*Heb.*] Lit., meadow; — in place names in Palestine and Syria.

abel. † ABLE.

the Lord had respect unto Abel's offering of firstlings but not to Cain's offering of fruits. *Gen.* iv.

a-bele' (*ă*-bēl'; ā'bĕl), *n.* [D *abeel* (*abeel-boom*), OF. *abel*, *aubel*, fr. a dim. of L. *albus* white.] The white poplar.

A-bel'ian (ă-bĕl'yăn) } *n. Eccl. Hist.* One of a sect in
A'bel-ite (ā'bĕl-īt) } Africa (4th century), mentioned
A'bel-o'ni-an (-ō'nĭ-ăn) } by St. Augustine as marrying but living (like Abel, as they claimed) in continence.

A-bel'ian (*a*-bĕl'yăn), *a.* Of or pertaining to N. H. Abel (1802-29), a Norwegian mathematician; as, the *Abelian* theorem (see ABEL'S THEOREM, below).

Abelian equation, an irreducible algebraic equation each root of which can be expressed as a rational function of any other. — **A. functions**, multiply periodic uniform functions arising from the inversion of Abelian integrals. — **A. group**, a group whose substitutions obey the commutative law. — **A. integral**, the integral $\int R(z,w)dz$, R being rational, and w being an algebraic function of z defined by an irreducible polynomial equated to 0.

Ab'e-li'ce-a (ăb'ē-lĭsh'ē-*a*), *n.* [NL.] *Bot.* A small genus of European and Asiatic ornamental ulmaceous trees with elmlike leaves, monœcious flowers, and drupaceous fruits. *A. acuminata* and *A. cretica* are often cultivated.

A'bel-mos'chus (ā'bĕl-mŏs'kŭs), *n.* [NL., fr. Ar. *abu-l musk* father of musk, i.e., producing musk. See MUSK.] *Bot* A small genus of malvaceous plants, found in the warmer regions of both hemispheres, distinguished from *Hibiscus* by the deciduous involucre and spathelike tubular calyx. *A. esculentus* is the okra, and *A. abelmoschus* is the abelmosk.

a'bel-mosk' (ā'bĕl-mŏsk'), *n.* [From ABELMOSCHUS.] An evergreen shrub (*Abelmoschus abelmoschus*) of the East and West Indies and northern Africa, whose musky seeds are used in perfumery and to flavor coffee.

A-bel's' the'o-rem (*ā*-bĕlz'). [After N. H. *Abel*, Norwegian mathematician.] *Math.* A theorem of far-reaching importance in analysis, by which the sum of a number of Abelian integrals with the same integrand may be reduced to the sum of a smaller number of the same kind.

A'bel test (ā'bĕl). A test made with the Abel tester.

A'bel tes'ter. [After Sir Frederick A. *Abel*, English chemist.] An apparatus for determining the flashing point of a volatile oil, as kerosene, by heating it in a closed cup, and passing a small flame over its surface at regular intervals of temperature. This tester is more accurate than open-cup devices, and is the legal instrument in England and Germany. See FLASHING POINT.

A-ben'cer-ra'ges (*ā*-bĕn'sĕ-rā'jēz; *Sp.* ä-bän'sä-rä'hās), *n. pl.* A family of Moors said to have been prominent in the 15th century in Granada, famed in romance esp. for their destruction in a feud with the family of the Zegris

Among the Oriental races the *Abencerrages* held a distinguished rank, priding themselves on a pure Arab descent. *Irving.*

ab'en-ter'ic (ăb'ĕn-tĕr'ĭk), *a.* [*ab-* from + *enteric.*] *Med.* Situated outside of the intestines.

Ab'er-deen' An'gus (ăb'ĕr-dēn' ăn'gŭs). One of a breed of black beef cattle originating in Scotland. They are hornless, with short neck and legs and a short wide head.

Ab'er-do'ni-an (-dō'nĭ-ăn), *a* Of or pert. to Aberdeen, Scotland, the seat of a university. — **Ab'er-do'ni-an**, *n.*

ab-err' (ăb-ûr'), *v. i.* [L. *aberrare.* See ABERRATE.] To wander, stray. *Obs.*

ab-er'rance (-ĕr'ăns) } *n.* State of being aberrant, a
ab-er'ran-cy (-ăn-sĭ) } wandering from the right way; deviation from truth, rectitude, etc.

aberrancy of curvature, *Geom.*, the deviation of a curve from its circle of curvature at any point, — measured by the limit of the angle made by the normal at any point with the line joining that point to the middle point of a very small chord (ultimately vanishing) at right angles to the normal.

ab-er'rant (ăb-ĕr'ănt), *a.* [L. *aberrans, -rantis*, p. pr. of *aberrare.* See ABERRATE.] **1.** Wandering; straying from the right way; deviating from truth, rectitude, etc.

2. *Biol.* Deviating from the ordinary or natural type, exceptional; abnormal.

aberrant duct. *Anat.* = VAS ABERRANS.

ab'er-rate (ăb'ĕr-āt), *v. i.*; AB'ER-RAT'ED (-āt'ĕd); AB'ER-RAT'ING (-ĭng). [L. *aberrare, aberratum*; *ab* + *errare* to wander. See ERR.] To go astray; to diverge. *Rare.*

Their own defective and *aberrating* vision. *De Quincey.*

ab'er-ra'tion (ăb'ĕr-ā'shŭn), *n.* [L. *aberratio*: cf. F. *aberration.* See ABERRATE.] **1.** Act of wandering; deviation, esp. from truth or moral rectitude, from the natural state, or from a type. "The *aberrations* of youth." *Hall.* "*Aberrations* from theory." *Burke.*

2. Partial alienation of reason, mental disorder. "Occasional *aberrations* of intellect." *Lingard.*

Whims, which at first are the *aberrations* of a single brain, pass with heat into the epidemic form. *I. Taylor.*

3. *Astron.* A small periodical change of position in the stars and other heavenly bodies, due to the combined effect of the motion of light and the motion of the observer. Aberration is called **annual** when the observer's motion is that of the earth in its orbit, and **daily** or **diurnal** when of the earth on its axis; amounting when greatest, in the former case to 20.8″, and in the latter to 0.3″. **Planetary aberration** is aberration that is due to the motion of light and the orbital motion of the planet.

4. *Optics.* The convergence to different foci, by a lens or mirror, of rays of light emanating from one and the same point, or the deviation of such rays from a single focus. Aberration is called **spherical** when due to the spherical form of the lens or mirror, such form giving different foci for central and marginal rays, and **chromatic** when due to the different refrangibilities of the colored rays of the spectrum, those of each color having a distinct focus. In manufacturing lenses, spherical aberration is avoided by a slight modification of the surface in figuring and polishing, and usually chromatic aberration is nearly obviated by a suitable combination of substances of different refractive and dispersive powers, as crown and flint glass.

5. *Med.* The passage of blood or other fluid into parts not appropriate for it.

6. *Biol.* An aberrant part, organ, or individual, a sport.

Syn. — See INSANITY.

ab'er-ra'tion-al (ăb'ĕr-ā'shŭn-ăl), *a.* Characterized by aberration.

a-bet' (*a*-bĕt'), *v. t.*; A-BET'TED; A-BET'TING. [OF. *abeter*; *a* (L. *ad*) + *beter* to bait (as a bear), of LG. or Scand. origin, cf. LG. *bĕtan* to cause to bite, or Icel. *beita* to feed, to hunt (with dogs), hence to instigate, to incite. See BAIT, *v. t.*, BET, *n.*] **1.** To incite, encourage, or instigate (a person); — now used chiefly in a bad sense. Often with *to*, followed by an object or infinitive.

2. To instigate, encourage, support, or uphold, as by aid or countenance; — now used chiefly in a bad sense, and distinguished from *aid* as implying a guilty knowledge and wrong intent, as, to *abet* a crime, to *aid* an insurrection.

The whole tribe *abets* the villainy. *South*

Syn. — Set on, egg on, foment; advocate, countenance, second, aid, assist, support, sustain, back, connive at.

a-bet'ment (-mĕnt), *n.* [OF. *abetement.*] Act of abetting; as, an *abetment* of treason, crime, etc.

a-bet'ter } (*a*-bĕt'ĕr), *n.* [AF. *abettour.*] One who abets;
a-bet'tor } an instigator of an offense or an offender. In law the form *abettor* is generally used.

Syn. — ABETTOR, ACCESSORY, ACCOMPLICE, CONFEDERATE, CONSPIRATOR. — As used in law these words all import complicity or common guilt in a wrongful act. CONFEDERATE is the more general, being applied to any person who in conjunction with others intentionally contributes to the commission of an unlawful act, whether the act be a crime or a civil injury, as a tort. Of civil joint wrongdoers the more specific term is CONSPIRATOR. An ACCESSORY is neither the chief actor in an offense nor a person present at its performance, but one who *accedes* to or becomes involved in its guilt, by some act either previous or subsequent, as of instigating, encouraging, aiding, or concealing, etc. An ABETTOR is one who is actually or constructively present at the commission of the deed and contributes to it by moral or physical force. An ACCOMPLICE is one who with criminal intent participates in the commission of an offense, whether as principal, abettor, or accessory. In treason or misdemeanors *accessories* and *principals* are not recognized.

ab'e-vac'u-a'tion (ăb'ē-văk'ū-ā'shŭn), *n* [*ab-* + *evacuation*] *Med.* An evacuation either deficient or excessive.

a-bey'ance (*a*-bā'ăns), *n.* [OF. *abeance* expectation, longing, *a* (L. *ad*) + *baer, bee*), to gape, to look with open mouth, to expect, F. *bayer*, LL. *badare* to gape.] **1.** *Law.* Expectancy, condition of being undetermined. When there is no person in existence in whom an inheritance (or a dignity) is vested, it is said to be in *abeyance*, that is, in expectancy — the law considering it as always potentially existing, and ready to vest whenever a proper owner appears or the right thereto is determined.

2. Suspension; temporary suppression.

Keeping the sympathies of love and admiration in a dormant state, or state of *abeyance.* *De Quincey.*

in abeyance, in a latent state. See LATENT, *Syn.*

a-bey'ant (-ănt), *a.* Being in abeyance.

ab-hor' (ăb-hôr'), *v. t.*; AB-HORRED' (-hôrd'); AB-HOR'RING. [L. *abhorrere*; *ab* + *horrere* to bristle, shiver, shudder: cf. F. *abhorrer.* See HORRID.] **1.** To shrink with shuddering from, to regard with horror or detestation, to feel excessive repugnance toward; to detest to extremity, to loathe.

Abhor . . evil; cleave to that which is good *Rom* xii 9

2. To fill with horror or disgust. *Obs.*

It doth *abhor* me now I speak the word. *Shak.*

Syn. — Detest, loathe, abominate. See HATE.

ab-hor', *v. i.* To shrink with horror, disgust, or dislike; to be contrary or averse, — with *from*. *Obs.*

ab-hor'rence (ăb-hŏr'ĕns), *n.* **1.** Act or state of abhorring; the feeling of one who abhors.

2. An abhorred object.

3. [*cap.*] *Eng. Hist.* One of several addresses to Charles II. made by Tories, abhorring and condemning the petitions for a reassembling of Parliament. Cf. ADDRESSER.

ab-hor'rent (-ĕnt), *a.* [L. *abhorrens, -rentis*, p. pr of *abhorrere.*] **1.** Abhorring; detesting; having or showing abhorrence; loathing; hence, strongly opposed (*to*).

The persons most *abhorrent* from blood and treason *Burke.*
The arts of pleasure in despotic courts
I spurn *abhorrent.* *Glover.*

2. Contrary or repugnant; discordant; inconsistent, — followed by *to* "Injudicious profanation, so *abhorrent* to our stricter principles." *Gibbon.*

3. Detestable. "Pride, *abhorrent* as it is." *J Taylor*

ab-hor'rer (ăb-hôr'ĕr), *n.* One who abhors. Esp.: [*cap.*] *Eng. Hist.* A signer of an Abhorrence (which see), — used as a nickname.

a-bid'ance (*a*-bīd'ăns), *n.* An abiding; state of abiding, abode, continuance; compliance (*with*)

The Christians had no longer *abidance* in the holy hill. *Fuller.*
A judicious *abidance* by rules. *Helps*

a-bide' (*a*-bīd'), *v. i.*; *pret.* & *p. p.* A-BODE' (*a*-bōd'), A-BID'ED (*a*-bīd'ĕd), *rarely* A-BID'DEN (*a*-bĭd'ĕn); *p. pr.* & *vb. n.* A-BID'ING (*a*-bīd'ĭng). [AS. *ābīdan*; *ā-* (cf. Goth *us-*, G. *er-*, orig meaning *out*) + *bīdan* to bide. See BIDE.]

1. To wait; pause; delay. *Obs.*

2. To stay; to continue in a place, to have one's abode; to dwell; sojourn; — with *with* before a person, and commonly with *at* or *in* before a place.

Let the damsel *abide* with us a few days. *Gen* xxiv. 55.

3. To remain stable or fixed in some state, to continue.

Let every man *abide* in the same calling *1 Cor.* vii 20

Followed by *by* = to abide by. **a** To stand to; to adhere to.

The poor fellow was obstinate enough *to abide by* what he said at first. *Fielding.*

b To acquiesce in, to conform to, to accept as valid and take the consequences of; as, *to abide by* a decision; *to abide by* an award of arbitrators.

Syn. — Live, continue, stay, remain. See RESIDE.

a-bide', *v. t.* **1.** To wait for; to be prepared for; to await; to watch for; as, I *abide* my time. "I will *abide* the coming of my lord." *Tennyson. Obs.*, with a *personal* object

Bonds and afflictions *abide* me. *Acts* xx. 23.

2. To endure, sustain; submit to.

[Thou] shalt *abide* her judgment on it. *Tennyson.*

3. To bear patiently; to put up with; to tolerate.

She could not *abide* Master Shallow *Shak.*

4. [Confused with ABY, to pay for.] To stand the consequences of, to answer for; to suffer for.

Dearly I *abide* that boast so vain. *Milton*

A'bi-es (ā'bĭ-ēz, ăb'-), *n.* [L.] *Bot.* A genus of pinaceous trees, the true firs, distinguished by the erect cones and the sessile leaves not jointed at the base. They are natives of north temperate regions. See FIR, BALSAM FIR.

ab'i-e-tene (ăb'ĭ-ē-tēn), *n.* [L. *abies, abietis*, fir tree.] A volatile oil distilled from the resin or balsam of the gray pine (*Pinus sabiniana*). It is almost pure normal heptane.

ab'i-et'ic (-ĕt'ĭk), *a.* [L. *abies* fir tree.] *Chem.* Pert. to or designating a crystalline acid (called also *sylvic acid*) whose anhydride forms the principal constituent of rosin.

ab'i-e-tin (ăb'ĭ-ē-tĭn), *n.* [See ABIETENE.] *Chem.* A resinous substance obtained from Strasburg turpentine or Canada balsam. It is a derivative of abietic acid.

ab'i-e-tite (-tīt), *n. Chem.* A sweet substance, $C_6H_4O_3$, resembling mannite, found in the needles of the common silver fir (*Abies picea*) of Europe.

Ab'i-gail (ăb'ĭ-gāl), *n.* [Heb. *Abīgayil*, perh. through Gr. 'Αβιγαίλ.] **1.** Lit, father (that is, source) of joy; — fem. prop. name. — Dim. *Ab'by, Nab'by.*

2. [*l. c.*] A lady's waiting maid. — **ab'i-gail-ship**, *n.*

Her *abigail* reported that Mrs Gutheridge had a set of night curls for sleeping in *Leslie*

a-bil'i-ty (*a*-bĭl'ĭ-tĭ), *n.*; *pl.* -TIES (-tĭz). [F *habileté*, earlier *habilité, abilité*, L. *habilitas* aptitude, ability, fr. *habilis* apt. See ABLE] Quality or state of being able, power to perform, whether physical, moral, intellectual, conventional, or legal; capacity; skill or competence in doing; sufficiency of strength, skill, resources, etc.; in *pl.*, faculty, talent.

Then the disciples, every man according to his *ability*, determined to send relief unto the brethren *Acts* xi. 29.
Natural *abilities* are like natural plants, that need pruning by study *Bacon.*

Syn. — Power, energy, strength, force; talent, capability, efficiency, aptitude, skill. — ABILITY and CAPACITY come into comparison as applied to the higher intellectual powers, of which they suggest slightly different aspects. CAPACITY implies primarily the receptive powers, and frequently connotes native rather than acquired, potential as well as actual, aptitude and mental resources, as, "She . . possesses a very good natural *capacity*" (*Mad D'Arblay*). ABILITY (often plural) is the more positive term, and usually suggests something to be done, and the power to do it; as, "the triumphant exertion of his *abilities*" (*A. C. Bradley*) It is used, like *capacity*, of native vigor of mind, but frequently connotes such qualities, usually executive, as arise from training. See POWER, ACQUIREMENT, CAPACITY.

We cannot agree in opinion with those who imagine that nature has been equally favorable to all men, in conferring upon them a fundamental *capacity*, which may be improved to all the refinement of taste and criticism . . . *Capacity* implies the power of retaining what is received. . . . A man may have *capacity* to acquire what is called learning and philosophy. *Goldsmith.*

He assured me that the whole political machine was moving in a wrong track, and that scarce even *abilities* like his own could ever set it right again. *Goldsmith.*

Men of *ability* . . . whose understandings have been rendered acute by practice in affairs. *Wordsworth.*

ab'i-o-gen'e-sis (ăb'ĭ-ō-jĕn'ē-sĭs), *n.* [*a-* not + *bio-* + *-genesis.*] *Biol.* The origination of living organisms from lifeless matter, spontaneous generation (which see).

ab'i-o-ge-net'ic (-jē-nĕt'ĭk), *a. Biol.* Of or pertaining to abiogenesis. — **ab'i-o-ge-net'i-cal-ly** (-ĭ-kăl-ĭ), *adv.*

ab'i-og'e-nist (ăb'ĭ-ŏj'ē-nĭst), *n.* One who believes that life can be produced independently of antecedent life.

ab-ir'ri-tant (ăb-ĭr'ĭ-tănt), *n. Med.* A medicine that removes or diminishes irritation.

ab-ir'ri-tate (-tāt), *v. t.* [*ab-* + *irritate*] *Med.* To diminish the sensibility of; to decrease the irritability of.

ab-ir'ri-ta'tion (-tā'shŭn), *n. Med.* **a** A diminishing of the responsiveness to stimulation in the tissues. **b** Debility; want of strength; asthenia. — **ab-ir'ri-ta-tive** (-tā-tĭv), *a*

ab'ject (ăb'jĕkt), *a.* [L. *abjectus*, p. p. of *abjicere* to throw away, *ab* + *jacere* to throw. See JET a shooting forth.]

1. Cast down; low-lying. *Obs. or Archaic.*

From the safe shore their floating carcasses
And broken chariot wheels So thick bestrown,
Abject and lost lay these, covering the flood *Milton.*

2. Sunk to a low condition, cast down in spirit or hope; degraded; servile, groveling; despicable; as, *abject* posture, fortune, thoughts "Base and *abject* flatterers." *Addison.* "An *abject* liar." *Macaulay.*

And banish hence these *abject*, lowly dreams *Shak.*

Syn. — Mean, groveling, cringing, mean-spirited, slavish, ignoble, vile, beggarly. See CONTEMPTIBLE.

ab'ject (ăb'jĕkt), *n.* A person in the lowest and most despicable condition; a castaway. *Rare.*

Shall these *abjects*, these victims these outcasts, know any thing ot pleasure ? *I. Taylor.*

ab-ject' (ăb-jĕkt'), *v. t.*; *pret. & p. p.* AB-JECT'ED, *obs p. p.* AB-JECT', *p. pr. & vb. n.* AB-JECT'ING To prostrate, to cast off or down; hence, to abase; degrade. *Obs.* "Down again himself disdainfully *abjecting.*" *Spenser*

ab-jec'tion (ăb-jĕk'shŭn), *n* [F. *abjection*, L. *abjectio.*]

1. Act of making abject, or state of being abject, specif.:

a A humbling. "The *abjection* of the king and his realm." *Joye. Obs. or R.* **b** Rejection; a casting forth. *Rare.*

An *abjection* from the beatific regions where God, and his angels and saints, dwell forever. *Jer Taylor.*

c A low or downcast state, meanness of spirit, abasement; degradation.

That this should be termed baseness, *abjection* of mind, or servility, is it credible ? *Hooker.*

2. A thing rejected or cast away. *Obs*

ab-judge' (-jŭj'), *v. t.* [*ab-* + *judge*, v.] To take away or remove by judicial decision; — opposed to *adjudge*, 4. *Rare.*

The land is adjudged to the one party and his heirs, and *abjudged* . . . from the other; men are not lightly to be *abjudged* forever, . . . from their seizin. *Pollock & Mait*

ab-ju'di-cate (ăb-jōō'dĭ-kāt), *v. t.* [L. *abjudicatus*, p. p. of *abjudicare*; *ab* + *judicare.* See JUDGE.] To reject by judicial sentence; also, to abjudge. *Obs.* — **ab-ju'di-ca'tion** (-kā'shŭn), *n.* — **ab-ju'di-ca'tor** (-kā'tĕr), *n.*

ab'ju-ra'tion (ăb'jōō-rā'shŭn), *n.* [L. *abjuratio:* cf. F. *abjuration*] Act of abjuring, or forswearing.

ab-ju'ra-to-ry (ăb-jōō'rā-tō-rĭ), *a.* Containing abjuration.

ab-jure' (ăb-jōōr'), *v. t.*; AB-JURED' (-jōōrd'); AB-JUR'ING. [L. *abjurare* to deny upon oath; *ab* + *jurare* to swear: cf. F. *abjurer.* See JURY.] **1.** To renounce upon oath; to forswear; disavow; as, to *abjure* allegiance to a prince.

To abjure the realm was to swear, or take oath, to leave the country and never to return without leave of the king. Formerly in England any felon, except one guilty of treason or sacrilege, who had taken sanctuary, could claim immunity by abjuring the realm and departing accordingly. The privilege was abolished by 21 James I. (1623) c 28.

True exile is unknown; but the criminal who has taken sanctuary *abjures* the realm, and occasionally, by way of grace, other criminals are allowed to do the like. Now and again we hear of a man compelled to *abjure* a town *Pollock & Mait.*

2. To renounce or reject with solemnity; to recant, to abandon forever; to reject; repudiate; as, to *abjure* errors. "Magic I here *abjure.*" *Shak.*

3. To cause to forswear or renounce. *Obs., except in p. p.*

For such *abjured* person, equally with the outlawed, was entirely cut off from society. *Stephen's Commentaries.*

Syn. — See RENOUNCE.

ab-jure', *v. i.* To renounce on oath. *Bp. Burnet.*

ab-kar' (ab-kär'), *n.* [Per. *ābkār* a distiller] One whose trade is subject to abkari tax. *India.*

ab-ka'ri (ăb-kä'rē), *n.* Also **ab-ka'ry**, etc. [Per. *ābkārī* business of distilling, fr. *ābkār* distiller.] Manufacture or sale of intoxicating liquors or drugs; hence, an excise or internal revenue tax on such manufacture or sale. *India.*

ab-la'tion (ăb-lā'shŭn), *n.* [L. *ablatio*, fr. *ablatus*, p. p. of *auferre* to carry away, *ab* + *latus*, used as p. p. of *ferre* to carry · cf. F. *ablation.*] **1.** A carrying or taking away; removal. *Jer. Taylor.*

2. *Med.* **a** Removal or cessation of the acuteness of a disease. *Obs.* **b** Removal of any diseased part of the body by surgical operation.

3. *Phys. Geog. & Geol.* Wearing away; superficial waste, esp. by melting; as, the *ablation* of a glacier.

ab'la-ti'tious (ăb'lă-tĭsh'ŭs), *a.* Diminishing; as, an *ablatitious* force, one that diminishes gravity. *Rare.*

ab'la-tive (ăb'lă-tĭv), *a* [F. *ablatif*, *ablative*, L *ablativus*, fr. *ablatus.* See ABLATION.] **1.** Taking away or removing. *Obs.*

Where the heart is forestalled with misopinion, *ablative* directions are found needful to unteach error *Bp Hall*

2. *Gram* Designating, or pertaining to, a case of the noun in Latin, Sanskrit, and some other languages, the fundamental meaning of which is *removal*, or *direction away.* In Latin it denotes not only the relation *from*, but also those of *with*, *by*, *at*, and *in*, expressed by the earlier instrumental and locative cases. It therefore denotes the source of an act or event, its cause, instrument, or agent, and sometimes its time or place

ab'la-tive, *n. Gram.* The ablative case, or a form in that case. — **ablative absolute**, a construction in Latin, in which a noun in the ablative case has a participle (expressed or understood) agreeing with it, the two words expressing generally the time, cause, or an attendant circumstance of an action, as, *Tarquinio regnante* venit, i. e., he came in the reign of Tarquinius (lit., Tarquinius reigning).

ab-la'tor (ăb-lā'tĕr), *n.* [See ABLATION.] Lit., a person or thing that takes away, specif., *Med.*, an instrument used to cut away a diseased part.

ab'laut (ăp'lout), *n.* [G., off-sound; *ab* off + *laut* sound.] *Philol.* The variation of the root vowel in different forms of the same word, thus indicating a corresponding modification of use or meaning; vowel permutation; as, *get, gat, got; sing, song; hang, hung*; — called also *vowel gradation.* Ablaut, which is still used to distinguish meanings, esp. in the strong conjugations of verbs, is an Indo-European phenomenon, the original causes of which probably lay in the peculiar conditions of word and sentence accent in the parent speech, and these are no longer active, or discernible, in the separate languages of the family. In modern English ablaut has been more or less obscured, but in Anglo-Saxon, or Old English, six classes of ablaut may be seen. Vowels sometimes undergo both *ablaut* and *umlaut.* Cf. UMLAUT.

a-blaze' (*a*-blāz'), *adv & a.* [*a-* on, in + *blaze.*] **1.** On fire, in a blaze; gleaming.

All *ablaze* with crimson and gold. *Longfellow.*

2. In a state of glowing excitement or ardent desire.

-a-ble (-*ă*-b'l), **-i-ble** (-ĭ-b'l), *or* **-ble.** [F., fr. L. *-abilis*, *-ibilis*, *-bilis.*] An adj suffix used: **a** Passively with implication of *ability, fitness*, or *worthiness* to be acted upon, as eat*able*, fit to be eaten, lov*able*, worthy to be loved, read*able*, possible to be read. This is now the usual sense of the suffix in English. **b** In the sense of *tending to, given to, favoring, causing, able to*, or *liable to*, as peace*able*, given to peace, perish*able*, liable to perish, terr*ible*, horr*ible*, delect*able*, dur*able*. Words like mut*able*, tending to change, also able to be changed, have both the active and passive senses.

☞ The reference "See -ABLE" is sometimes given as the only definition of a word ending in *-able*, if its meaning can be readily gathered from the definitions of the suffix and the root word.

☞ The form *-ible* occurs mostly with words going back directly to Latin verbs in *-ere*, *-ire*. The form *-able*, occurring originally in words formed on Latin verbs in *-are*, has been adopted in English as the form for use with native verbs and nouns In adjectives from the French, *-able* often represents F. *-able* for Lat. *-abilis*, as receiv*able*, mov*able*, defend*able*. In combining with this suffix, a word ending in a final vowel generally drops the vowel, as in *movable*, *receivable*, except in case of final *-y*, which usually changes to *i*, as in *rectifiable*, from *rectify*, *leviable*, from *levy*, etc. In such cases as *serviceable*, *peaceable*, *pronounceable*, *manageable*, where the omission of the vowel renders the preceding consonant liable to mispronunciation, the final *e* is generally retained. Where the final syllable is long, as in *blame*, *debate*, *rebate*, etc., the forms dropping the *e* and those retaining it are usually both in good usage; thus, *blamable* or *blameable*, *debatable* or *debateable*, *rebatable* or *rebateable*, etc. See *Introd., Rules for Spelling*, §§ 11, 28.

a'ble (ā'b'l), *a.*; A'BLER (ā'blẽr), A'BLEST (ā'blĕst; -blĭst). [OF. *able*, F. *habile*, L. *habilis* that may be easily held or managed, apt, skillful, fr *habere* to have, hold. Cf. HABILE; see HABIT] **1.** Facile, complaisant. *Orf E. D. Obs.*

2. Fit; adapted; suitable *Obs*

A manly man, to ben an abbot *able.* *Chaucer.*

3. Having sufficient power, strength, force, skill, means, or resources of any kind to accomplish the object; possessed of qualifications rendering competent for some end; competent, qualified, capable; as, an *able* workman, soldier; a man *able* to work; a mind *able* to reason; a person *able* to be generous, *able* to endure pain.

4. Having intellectual qualifications, or strong mental powers, showing ability or skill; talented, clever; powerful; as, the *ablest* man in the senate; an *able* speech.

No man wrote *ables* state papers *Macaulay*

5. *Law.* Legally qualified, possessed of legal competence; as, *able* to inherit or devise property.

Syn. — Qualified, fit, fitted, efficient, effective, skillful, clever, vigorous, powerful. — ABLE, CAPABLE, COMPETENT agree in suggesting the presence of active or passive power. ABLE, when followed by an infinitive, stresses the possession of positive power, which is thought of as tending toward action, as, *able* to speak German, to walk all day. CAPABLE (*of*) lays emphasis on certain less active, often inherent qualities, which suggest rather adjustment or adaptation than latent energy, as, *capable* of pleasure, *capable* of any crime. COMPETENT, with an infinitive, denotes complete fitness for the task in hand; as, *competent* to design a yacht, to teach Greek. When used attributively, *able* implies a high degree of intellectual power or the mastery of some department of knowledge or practical affairs; *capable*, adequacy to meet requirements; *competent*, the possession of special (often technical) qualifications, as, an *able* lawyer, a *capable* superintendent, a *competent* critic. See ABILITY, EFFECTIVE, INCAPABLE.

The whole face . . . *capable* of all expression, from tragedy to farce. *F. Fitzgerald.*

He may be more *able* to serve you than all of us put together. *Mad D'Arblay.*

able for is a Scotticism "Hardly *able for* such a march." *Robertson.* — **a. seaman** = ABLE-BODIED SEAMAN

a'ble (ā'b'l), *v. t. Obs.* **1.** To make able, to strengthen.

2. To vouch for; to warrant. *Shak.* "That's safe, I'll *able* it." *Middleton.*

a'ble-bod'ied (ā'b'l-bŏd'ĭd; 87), *a.* Having a sound, strong body, of reasonably sufficient physical ability; physically competent; — said esp. of laborers, soldiers, sailors. "*Able-bodied* vagrant." *Froude.* — **a'ble-bod'ied-ness**, *n.* **able-bodied seaman**, a sailor who is practically conversant with, and able to perform, all the duties of a sailor, and who has a special rating and higher pay than the ordinary sailor. Abbr. *A. B Chiefly Eng.*

ab'le-gate (ăb'lē-gāt), *v. t.* [L. *ablegatus*, p. p. of *ablegare*; *ab* + *legare.* See LEGATE.] To send abroad. *Obs.* — **ab'le-ga'tion** (-gā'shŭn), *n. Obs.*

ab'le-gate (-gāt), *n.* [See ABLEGATE, *v.*] *R. C. Ch.* A representative of the Pope charged with important commissions in foreign countries, one of his duties being to bring to a newly named cardinal his insignia of office.

a'ble-mind'ed (ā'b'l-mīn'dĕd; 87), *a.* Having much intellectual power. — **a'ble-mind'ed-ness**, *n.*

a'ble-whack'ets (ā'b'l-hwăk'ĕts, -ĭts), *n. pl* [Cf. *able* (seaman) and *whack.*] A sailors' game of cards in which the loser's palms are beaten with a twisted handkerchief.

ab'lu-ent (ăb'lū-ĕnt), *a.* [L *abluens*, p. pr. of *abluere* to wash away; *ab* + *luere* (*lavere*, *lavare*). See LAVE.] Washing away; carrying off impurities; detergent. — *n. Med.* A detergent.

ab-lu'tion (ăb-lū'shŭn), *n.* [L. *ablutio*, fr. *abluere*: cf. F. *ablution.* See ABLUENT.] **1.** Act of washing or cleansing; specif, the washing of the person, or some part of it, as a religious rite.

2 The liquid used in cleansing. "Cast the *ablutions* in the main." *Pope.* Specif., *R. C. Ch* The small quantity of wine and water used to wash the priest's thumb and index finger after the Communion, and then drunk by the priest.

a'bly (ā'blĭ), *adv.* In an able manner; with great ability; as, *ably* done, planned, said.

Ab-na'ki (ăb-na'kĭ), *n.* An Indian of a group of Algonquin tribes of Maine and Canada, including the Passamaquoddies, Penobscots, Norridgewocks, and others, specif., a member of an Algonquin tribe in the province of Quebec.

ab'ne-gate (ăb'nē-gāt), *v. t.*; AB'NE-GAT'ED (-gāt'ĕd); AB'NE-GAT'ING (-ĭng). [L. *abnegatus*, p. p. of *abnegare*; *ab* + *negare* to deny. See DENY.] To deny and reject; to abjure; renounce. *Sir E. Sandys.*

Voluntarily *abnegating* their temporal advantages. *Grote.*

ab'ne-ga'tion (ăb'nē-gā'shŭn), *n.* [L. *abnegatio:* cf. F. *abnégation.*] A denial; a renunciation; self-denial.

With *abnegation* of God, of his honor, and of religion, they may retain the friendship of the court *Knox.*

ab'ne-ga-tive (ăb'nē-gā-tĭv), *a.* [L. *abnegativus.*] Denying; renouncing; negative. *Rare. Clarke.*

ab-neu'ral (ăb-nū'răl), *a.* [*ab-* + *neural.*] *Anat.* Of, pertaining to, or situated in or on, the region or side opposite to the central nervous system.

ab-nor'mal (ăb-nôr'măl), *a.* [For earlier *anormal.* F. *anormal*, LL *anormalus* for *anomalus*, Gr. ἀνώμαλος. Confused with L. *abnormis.* See ANOMALOUS, ABNORMOUS, ANORMAL.] Not conformed to rule or system; deviating from the type; anomalous, irregular.

That *abnormal* and singular condition. *Froude.*

Syn. — See ANOMALOUS.

abnormal law, *Law*, the law of abnormal persons, or the law dealing with rights of persons as affected by abnormal legal personality, that is, such variation from the standard type of personality as causes a special status to arise, as of sex, minority, patria potestas, manus, coverture, celibacy,

If the yards are braced up by the port braces, having the wind forward of the starboard beam, she . . . "has her starboard tacks *aboard.*" *Luce.*

2. Alongside; as, to keep the land *aboard.*

a-board', *prep.* **1.** On board of, as, to go *aboard* a ship. **2.** Across; athwart. *Obs.*

Nor iron bands *aboard*
The Pontic Sea by their huge navy cast. *Spenser.*

A-bo'bra (*ă*-bō'brȧ), *n.* [NL., fr. Pg. *abobora, abobra*, gourd.] *Bot.* A small genus of subtropical South American cucurbitaceous vines. *A. viridiflora* is cultivated for its flowers and showy fruit.

a-bod'ance (*ă*-bōd'ăns), *n.* [See BODE.] An omen. *Obs.*

a-bode' (*a*-bōd'), *n.* [See BODE, *v. i.*] An omen; a prognostication. *Obs.* *Lyly.*

High-thundering Juno's husband stirs my spirit with true *abodes.* *Chapman.*

a-bode', *v. t. & i.*; A-BOD'ED (*ă*-bōd'ĕd); A-BOD'ING (-ĭng). To bode; foreshow; to be ominous. *Obs.* "The night crow cried, *aboding* luckless time." *Shak.* — **a-bode'ment**, *n.*

a-bode', *pret. & p. p.* of ABIDE.

a-bode', *n.* [ME. *abad, abood*, fr. *abiden* to abide. See ABIDE. For the change of vowel, cf. *abode*, pret. of *abide.*] **1.** Act of waiting, delay. *Obs.* *Spenser.*

2. Stay or continuance in a place; sojourn.

He waxeth wroth at your *abode* here. *Fielding.*

3. Place of continuance, or where one dwells; abiding place; residence; a dwelling; a habitation.

Come, let me lead you to our poor *abode.* *Wordsworth.*

a-bol'ish (*ă*-bŏl'ĭsh), *v. t.*; A-BOL'ISHED (-ĭsht); A-BOL'ISHING. [F. *abolir*, L. *abolere, aboletum*; *ab* + *olere* to grow. Cf. FINISH.] **1.** To do away with wholly; to annul; to make void; — said of laws, customs, institutions, governments, etc.; as, to *abolish* slavery, to *abolish* folly.

2. To put an end to, or destroy, as a physical object; to wipe out. *Archaic.*

And with thy blood *abolish* so reproachful blot. *Spenser.*

His quick instinctive hand
Caught at the hilt, as to *abolish* him. *Tennyson*

Syn. — Do away with, set aside, vacate, make void, invalidate, quash, countermand, recall. — ABOLISH, REPEAL, ABROGATE, REVOKE, ANNUL, NULLIFY, CANCEL, RESCIND, REVERSE, ABATE have in common the idea of setting aside by some overruling act. ANNUL is the most general term, denoting simply to make void, as, to *annul* a contract, an agreement. ABOLISH applies particularly to things of a permanent nature, such as institutions, usages, customs; as, the *abolition* of slavery; REPEAL, to the recall by a legislative body of a previous enactment; as, the *repeal* of the Stamp Act; ABROGATE, to the annulling by a ruler or an executive body of laws, ordinances, treaties, conventions; REVOKE, to the recall of a previous grant which conferred power, privilege, etc.; as, the *revocation* of the Edict of Nantes, NULLIFY (in the United States), to the revolutionary contravention by a State of a Federal law; as, the South Carolina ordinance of *nullification.* CANCEL refers to instruments, as deeds, contracts, writs, rather than to statutes; RESCIND, to the vacation, by the enacting or superior authority, of a resolution, a vote, a decree, rather than of a law; REVERSE, to the setting aside by a higher tribunal of the decision of a lower; ABATE, to the destruction or removal of a nuisance or the terminating of a legal action or process, as a writ. See ABATE, DESTROY, NEUTRALIZE; cf. RENOUNCE.

a-bol'ish-ment (-mĕnt), *n.* [Cf. F. *abolissement.*] An abolishing, or state of being abolished; abolition; destruction.

ab'o-li'tion (ăb'ō-lĭsh'ŭn), *n.* [L. *abolitio*, fr. *abolere*: cf. F. *abolition.* See ABOLISH.] **1.** Act of abolishing, or state of being abolished; an annulling; abrogation, utter destruction; as, the *abolition* of laws, decrees, ordinances, customs, taxes, debts, etc.

2. Specif.: The abolishing of slavery; — now *Hist.*

ab'o-li'tion-a-ry (-ā-rĭ), *a.* Of or pertaining to abolition.

ab'o-li'tion-ism (-ĭz'm), *n.* The system of principles or measures favoring abolition, esp. of negro slavery; the tenets or practices of the abolitionists.

ab'o-li'tion-ist (-ĭst), *n.* One who favors abolition, esp., *Hist.*, of negro slavery.

The term "*abolitionist*" is somewhat indefinite, but it may best be defined as denoting a person to whom the supreme interest in public affairs was the extinction of slavery. It included not only those who shared Garrison's ideas of nonvoting and peaceable disunion, but those too like Birney and Whittier who respected the Constitution and worked for their cause through a political party. The term also applied to the few who like John Brown would attack slavery by force of arms. On the other hand, the name *abolitionist* did not properly belong to those who were opposed to slavery but held opposition [to it] along with other political tenets, and not as a supreme article of faith. These were best included under the general term of "antislavery men." a designation accepted by many of the Free-Soil, Whig, and Democratic parties, and later by the Republican party. *G. S. Merriam.*

a-bol'la (*a*-bŏl'*a*), *n.*; *pl.* -LÆ (-ē). [L.] *Rom. Antiq.* A cloak formed like the Greek chlamys.

Abolla

a-bo'ma (*a*-bō'mȧ), *n.* [Pg.] Any of several large South American serpents of the genus *Boa* or allied genera.

ab'o-ma'sum (ăb'ō-mā'sŭm) } *n.* [NL., **ab'o-ma'sus** (ăb'ō-mā'sŭs) } fr. L. *ab* + *omasum* tripe, paunch.] *Anat.* The fourth or digestive stomach of a ruminant. See RUMINANTIA.

a-bom'i-na-ble (*ă*-bŏm'ĭ-nȧ-b'l), *a.* [F. *abominable*, L. *abominabilis.* See ABOMINATE.] **1.** Worthy of, or causing, abhorrence, as a thing of evil omen; odious in the utmost degree; very hateful; detestable; loathsome; execrable.

2. Excessive; large; — intensive. *Obs.*

☞ Juliana Berners . . . informs us that in her time [15th c.], "a *bomynable* syght of monkes" was elegant English for "a large company of friars." *G. P. Marsh.*

— **a-bom'i-na-ble-ness**, *n.* — **a-bom'i-na-bly**, *adv.*

a-bom'i-nate (-nāt), *v. i.*; A-BOM'I-NAT'ED (-nāt'ĕd); A-BOM'I-NAT'ING (-ĭng). [L. *abominatus*, p. p. of *abominari* to deprecate as ominous, to abhor, to curse; *ab* + *omen* a foreboding. See OMEN.] To turn from as ill-omened, to hate in the highest degree, as if with religious dread; to abhor; loathe; as, to *abominate* all impiety.

Syn. — Abhor, loathe, detest. See HATE.

a-bom'i-na'tion (*ă*-bŏm'ĭ-nā'shŭn), *n.* [ME. *abominacioun, -cion*, F. *abomination*, L. *abominatio.* See ABOMINATE.] **1.** The feeling of extreme disgust and hatred, abhorrence; detestation; loathing. "We see great cause to have it in hatred and *abomination*." *More.*

2. That which is abominable; anything hateful, wicked, or shamefully vile; an object or state that excites disgust and hatred; a hateful or shameful vice; pollution.

Antony, most large in his *abominations.* *Shak.*

3. A cause of pollution or wickedness.

Syn. — Detestation, loathing, abhorrence, disgust, aversion; loathsomeness, odiousness.

abomination of desolation. **a** In Daniel ix. 27, xi. 31, xii. 12, and Maccabees i. 54 (where reference is made to the desecration of the temple by Antiochus Epiphanes), a heathen god or idol set up in the temple, — a term plausibly explained as originating in a contemptuous pun upon the Semitic name equivalent to Zeus. **b** In Matthew xxiv. 15 and Mark xiii. 14, a desecration of the "holy place" mentioned by Jesus (with reference to Daniel) as a signal for the flight of Christians at the approaching destruction of Jerusalem; — variously regarded as signifying the profanation of the temple by the Zealots, the Roman standards worshiped there, the ensuing profanation of its site, or the statue of a Roman emperor.

a-boon' (*ă*-bōōn'), *prep. & adv.* Above. *Scot., Dial. Eng., or Poetic.* "The ceiling fair that rose *aboon*." *J. R. Drake.*

ab-o'ral (ăb-ō'rȧl), *a.* [*ab-* away + *oral.*] *Zoöl.* Opposite to, or away from, the mouth. — **ab-o'ral-ly**, *adv.*

ab'o-rig'i-nal (ăb'ō-rĭj'ĭ-năl), *a.* [See ABORIGINES.] **1.** First; original; indigenous, primitive; native; as, the *aboriginal* tribes of America. "Mantled o'er with *aboriginal* turf." *Wordsworth.*

2. Of or pert. to aborigines; as, a Hindu of *aboriginal* blood.

Syn. — See NATIVE.

ab'o-rig'i-nal, *n.* **1** An original inhabitant of any land; one of the aborigines.

2. An animal or plant native to the region. *Rare.*

ab'o-rig'i-nes (-rĭj'ĭ-nēz), *n. pl.* [L. *Aborigines*, esp. the first inhabitants of Latium, those who originally (*ab origine*) inhabited Latium or Italy. See ORIGIN.] **1.** The earliest known inhabitants of a country; native races, esp. as contrasted with an invading or colonizing race.

2. The original fauna and flora of a geographical area.

a-bort' (*ă*-bôrt'), *v. i.*; A-BORT'ED; A-BORT'ING. [L. *abortare*, fr. *abortus*, p. p. of *aboriri*; *ab* + *oriri* to rise, be born. See ORIENT.] **1.** To miscarry; to give birth prematurely

2. *Biol.* **a** To become checked in development, so as either to remain rudimentary or shrink away. **b** To become sterile.

a-bort'ed, *p. a.* **1.** Brought forth prematurely.

2. *Biol.* Rendered abortive or sterile; checked in development at an early stage; as, spines are *aborted* branches.

a-bor'ti-cide (*ă*-bôr'tĭ-sīd), *n.* [L. *abortus* + *-cide.* See ABORT.] *Med.* **a** Act of destroying a fetus in the womb. **b** An agent which destroys the fetus and causes abortion.

a-bor'ti-fa'cient (*ă*-bôr'tĭ-fā'shĕnt), *a.* [L. *abortus* (see ABORT, *n.*) + *faciens*, p. pr. of *facere* to make.] Producing abortion. — *n.* A drug or an agent that causes abortion.

a-bor'tion (*ă*-bôr'shŭn), *n.* [L. *abortio*, fr. *aboriri.* See ABORT, *v.*] **1.** Act of giving premature birth; specif., the expulsion of the human fetus prematurely, particularly at any time before it is viable, or capable of sustaining life; miscarriage. In medicine *abortion* is by some used of the expulsion of the fetus during the first three months of pregnancy, a later expulsion occurring before the time of viability being then called a *miscarriage.* An expulsion occurring after the fetus is viable, but before the normal time, is generally termed *premature delivery* or *labor.* In law, the term *abortion* usually implies criminality in producing *miscarriage*; the latter term denoting any premature birth irrespective of its cause.

2. *Biol.* Arrest of development of any organ so that it remains imperfect or is absorbed.

3. The immature product of an untimely birth.

4. Any flower, fruit, or product of any kind that fails to reach maturity, or anything which fails in its progress before it is matured or perfect, a complete failure, as, his attempt proved an *abortion.*

a-bor'tion-ist (*a*-bôr'shŭn-ĭst), *n.* One who practices the producing of criminal abortions.

a-bor'tive (-tĭv), *a.* [L. *abortivus.*] **1** Produced by abortion, born prematurely.

2. Made from the skin of a stillborn animal; as, *abortive* vellum. *Obs.*

3. Rendering fruitless or ineffectual. *Obs.* "Plunged in that *abortive* gulf." *Milton.*

4. Coming to naught; failing in its effect; miscarrying; fruitless; unsuccessful; as, an *abortive* attempt. "An *abortive* enterprise." *Prescott.*

5. **a** *Biol.* Imperfectly formed or developed; rudimentary. **b** Specif., *Bot.*, sterile; — said of any spore-bearing organ.

6. *Med.* **a** Causing abortion; as, *abortive* medicines. **b** Cutting short; as, *abortive* treatment of typhoid fever.

— **a-bor'tive-ly**, *adv.* — **a-bor'tive-ness**, *n.*

a-bor'tive, *n.* **1.** That which is aborted or abortive; an abortion. *Obs.* *Shak.*

2. A medicine which causes abortion.

A'bou ben Ad'hem (ä'bōō bĕn ä'dĕm; ăd'hĕm). Title of a short poem by Leigh Hunt describing Abou ben Adhem's vision of an angel. The teaching is that love for mankind is love for God.

a-bound' (*a*-bound'), *v. i.*; A-BOUND'ED; A-BOUND'ING. [ME. *abounden*, F. *abonder*, fr. L. *abundare* to overflow, abound; *ab* + *unda* wave. Cf. UNDULATE.] **1.** To be in great plenty, quantity, or number; to be very prevalent; to be plentiful.

The wild boar which *abounds* in some parts of the continent of Europe. *Chambers.*

Where sin *abounded*, grace did much more *abound.* *Rom.* v. 20.

2. To be copiously supplied, — followed by *in* or *with.*

Men *abounding in* natural courage. *Macaulay*

A faithful man shall *abound with* blessings *Prov.* xxviii. 20.

It *abounds with* cabinets of curiosities. *Addison*

to abound in one's own sense, to indulge in or follow one's own opinions, to follow one's own judgment independently.

a-bout' (*a*-bout'), *adv.* [ME. *aboute, abouten, abuten*; AS. *abūtan, onbūtan*; *on* + *būtan*, fr. *be* by + *ūtan* outward, fr. *ūt* out. See ON, BUT, OUT.] **1.** On all sides; around.

'T is time to look *about.* *Shak.*

2 In circuit; circularly; by a circuitous way, around the outside; as, a mile *about*, and a third of a mile across.

3. Here and there; around; in one place and another.

Wandering *about* from house to house. 1 *Tim.* v. 13.

4 Nearly; approximately, with close correspondence, in quality, manner, degree, etc.; as, *about* as cold; *about* as high; — also of quantity, number, time. "There fell . . . *about* three thousand men." *Ex.* xxii. 28.

5. To a reversed position; half round; in the opposite direction; on the opposite tack; as, to face *about*; to turn one's self *about.*

6 In rotation; one after another; as, turn *about* is fair play.

about face, face about or oppositely; — a military order — a. ship, *Naut.*, an order to place a ship on the other tack, — used also as a verb; as, they prepared to *about-ship.*

a-bout', *prep.* **1.** Around; all round; on every side of. "Look *about* you." *Shak.* "Bind them *about* thy neck." *Prov* iii. 3.

2. In the immediate neighborhood of; in contiguity or proximity to, near as to place; by or on (one's person). "Have you much money *about* you?" *Bulwer.*

3. Over or upon different parts of, through or over in various directions, here and there in; to and fro in; throughout.

Lampoons . . . were handed *about* the coffeehouses. *Macaulay*

Roving still *about* the world *Milton.*

4. Near; not far from; — determining approximately time, size, quantity. "To-morrow, *about* this time." *Ex* ix. 18. "*About* my stature." *Shak.* Legally *about* is nearly equivalent to *more or less*; but the variation legally permissible varies with what appears as reasonable in the contemplation of the parties under the circumstances.

☞ This use passes into the adverbial sense.

5. In concern with; engaged in; intent on.

I must be *about* my Father's business *Luke* ii 49

6. *Before a verbal noun or an infinitive:* On the point or verge of; going; in act of. In this use *about* was originally construed as an adverb.

Paul was now *about* to open his mouth. *Acts* xviii 14.

7. Concerning; with regard to; on account of; touching. "To treat *about* thy ransom." *Milton.*

She must have her way *about* Sarah. *Tollope.*

8. Appertaining to; in connection with.

His face is the worst thing *about* him. *Shak.*

a-bout'-sledge', *n.* The blacksmith's large sledge hammer used by a helper working blow for blow with a smith.

a-bove' (*ă*-bŭv'), *adv.* [ME *above, aboven, abufen*; AS *on* on + *be* by + *ufan* upward. See ON, BY, OVER.] **1.** In a place above something; in a higher place, overhead; into or from heaven; as, the clouds *above.*

2. Earlier in order; higher in the same page; hence, in a foregoing page. "That was said *above*." *Dryden.*

3. Higher or superior in rank or power; as, he appealed to the court *above.*

a-bove', *prep.* **1.** In or to a higher place than; higher than; on or over the upper or outer surface of; over; — opposed to *below* or *beneath.*

Fowl that may fly *above* the earth *Gen.* i. 20

---

ab-nor'mal-ize, *v. t.* To make abnormal. [MAL.]

ab-nor'mal-ly, *adv.* of ABNORMAL.

‖ **ab-nor'mis sa'pi-ens cras'sa'que Mi-ner'va.** [L.] A sage abnormal (i. e., belonging to no distinct sect or party) and of dull Minerva (i. e., without skill, art, or learning). *Horace (Satires*, II. ii. 2).

a-bout'ward, **a-bout'wards**, *adv.* Striving or tending toward. *Obs.* [*Obs.*

a-bove', *v. t.* To pass above.

ăle, senāte, câre, ăm, ăccount, ārm, ăsk, sofā; ēve, ĕvent, ĕnd, recēnt, makēr; īce, ĭll; ōld, ōbey, ôrb, ŏdd, sŏft, cōnnect; ūse, ŭnite, ûrn, ŭp, circŭs, menŭ;

‖ Foreign Word. † Obsolete Variant of. + combined with. = equals.

2. Fig., higher than; superior to in any respect; surpassing; beyond, higher in measure or degree than, as, things *above* comprehension; *above* mean actions; conduct *above* reproach. "Thy worth . . . is far *above* my gifts." *Marlowe.*

I saw in the way a light from heaven *above* the brightness of the sun. *Acts* xxvi 13.

3. Surpassing in number or quantity; more than.

She . . . governed with manly counsels Palmyra, Syria, and the East, *above* five years *Gibbon.*

Syn. — Above, over, on, upon, beyond. In their literal senses *above*, *over*, and *on* (*upon*) agree in expressing vertical direction, while *beyond* implies horizontal direction, or greater distance than that of a given object lying in any direction. *Above*, *over*, and *on* (*upon*) differ in that *on* (*upon*) always implies contact, while *over* and *above* allow an interval. *Over* and *above* differ in that *over* implies verticality, while *above* may or may not. Thus, the entire second story of a building is *above*, but only a small part of it is directly *over*, one who stands *on* (*upon*) the ground floor; the second house is *beyond* the first, as one turns into a street; Saturn is *beyond* Jupiter. Between the figurative senses analogous relations hold. *Over* and *above* agree in the idea of superiority, but differ in the immediacy of reference. Thus, the rank of ambassador is *above* that of minister, but the English ambassador is not *over* the Chinese minister, he stands in that relation to his own subordinates only. Similarly, *above* and *over* agree in the idea of excess, which *beyond* heightens by carrying with it the suggestion that the thing exceeded itself goes far; as, "One there is *above* all others well deserves the name of Friend; His is love *beyond* a brother's" (*J. Newton*). With this use of *beyond* should be compared the similar use of *past*; as, "*past* all expressing" (*Shak.*). Figuratively, *on* (*upon*) retains the implication of close juxtaposition; as, there *upon*, *on* (*upon*) receipt of, etc. *Upon* and *on* are practically absolute synonyms. *Upon*, which is less common than it used to be, is the heavier, the more emphatic word; but the choice is frequently determined by considerations of euphony alone. See BELOW. above all, before every other consideration; chiefly, in preference to other things.

a-bove' (*ȧ-bŭv'*), *a.* Being above, that is, situated, placed, said, written, mentioned, or the like, above; as, the *above* facts justify this statement.

a-bove', *n.* Something that is (situated, written, mentioned, discussed, or the like) above. "The waters that come down from *above*." *Josh.* iii. 13

a-bove'board' (-bōrd'), *adv. & a.* Above the board or table; hence, in open sight; without trick, concealment, or deception. "Fair and *aboveboard*." *Burke.*

☞ This expression is said by Johnson to have been borrowed from gamesters, who, when they change their cards, put their hands under the table.

a-bove'ground' (-ground'), *adv. & a.* Not below the surface of the ground; hence, not dead and buried; alive.

a-box' (*ȧ-bŏks'*), *adv. & a.* [Cf. box to boxhaul.] *Naut.* Braced aback, — applied to the head yards when the head sails only are aback.

ab'ra-ca-dab'ra (ăb'rȧ-kȧ-dăb'rȧ), *n.* [L. Of unknown origin.] **1** A mystical word or collocation of letters written as in the accompanying figure. Worn on an amulet it was supposed to ward off fever.

2. Now usually, jestingly, something without meaning; jargon.

ab-rade' (ăb-rād'), *v. t.*; AB-RAD'ED (-rād'ĕd); AB-RAD'ING (-ĭng). [L. *abradere*, *abrasum*, to scrape off, *ab* + *radere* to scrape. See RASE, RAZE.] To rub or wear off, to waste or wear away by friction, as, to *abrade* rocks. Also fig. — **ab-rad'er** (-ẽr), *n.*

The poor and luckless are here only as a nuisance to be *abraded* and abated. *Carlyle.*

A'bra-ham (ā'brȧ-hăm), *n.* [Heb. *Abrāhām*, of uncertain meaning. See ABRAM.] **1.** *Bib.* The first of the patriarchs and founder of the Hebrew race. See *Gen.* xi. ff. Hence, as a masc. proper name; L. *A'bra-ha'mus*; F. *Abraham* (ȧ'brȧ'ȧm'); It. *Abrahamo* (ä'brä-ä'mō); Sp. *Abrahan* (ä'brä-än'); Pg. *Abrahão* (ä'brä-oun'); G. *Abraham* (a'brä-hăm); Arab. *Ibrahim* (ē'brä-hēm'). — Dim. *Abe* (āb).

2. [*l. c.*] A clothing store (East End, London). *Colloq.*

A'bra-ham'ic (ā'brȧ-hăm'ĭk), *a.* Pertaining to Abraham, the patriarch, as, the *Abrahamic* covenant.

A'bra-ham-man' (ā'brȧ-hăm-măn'), *or* **A'bram-man'** (ā'brăm-măn'), *n.* [Possibly in allusion to the parable of the beggar Lazarus in Luke xvi. *Oxf. E. D.*] One of a set of vagabonds who roamed through England in the 16th and 17th centuries, feigning lunacy to obtain alms.

Abraham's bosom. The abode of bliss in the other world; — so called in Jewish writings and in the New Testament in allusion to the position of a guest in the place of honor, whose head leaned back upon the bosom of his host as they reclined at the table.

a-braid' (*ȧ-brād'*), *v. t. & i.* [ME. *abreiden*, *abraiden*, to awake, draw (a sword), AS. *ābregdan* to shake, draw. See BRAID.] To awake; arouse, to stir or start up; also, to shout out. *Obs.* *Chaucer.*

A'bram (ā'brăm), *n.* [Heb. *Abrām*.] A masc. proper name. L. *A-bra'mus*; F. *Abram* (ȧ'brăN'); It. *Abramo* (ab-ra'mō), Sp. *Abram* (a-brăm'). — Dim. *Abe* (āb).

☞ "Probably . . . the right meaning of the name *[Abram]* is 'Ram (the lofty one) is father.' . . . Even so, the origin of . . . *Abraham* remains still unexplained. The derivation of the name in Genesis xvii. 5 is only a popular word play, connecting the termination *-raham* with the Heb. . . . [word for] 'multitude.'" *Dict. of Bible.*

a-bove'-cit'ed, *a.* Cited above
a-bove'deck', *n.* On deck, hence, aboveboard
a-bove'-men'tioned, **a-bove'-named'**, *a.* Mentioned or named before; aforesaid.
a-bove'said', *a.* Mentioned or recited above.
a-bove'stairs', *adv.*, *or* **above stairs.** Upstairs
‖ **ab o'vo** [L.] From the egg; hence from the beginning
‖ **ab o'vo us'que ad ma'la.** [L.] From the egg to the apples (said of a dinner). hence, from beginning to end.

Horace (*Satires* I. iii 6).

a-bow', *v. t. & i.* [AS. *ābūgan*.] To bend; submit; incline. *Obs.*
abowen abowne ✝ ABOVE.
abowght, abowte ✝ ABOUT.
aboyde. Obs. pret. of ABOW.
abp *Abbr.* Archbishop.
abr *Abbr.* Abridged; abridger; abridgment.
‖ **a'bra** (ȧ'brȧ) *n* [Sp.. a bay, valley.] A narrow pass or defile; a break in a mesa; the mouth of a cañon. *Southwestern U. S.*
a-brac'a-lam (*ȧ-brăk'ȧ-lăm*), *n* [Cf. ABRACADABRA.] A cabalistic word used as a charm.
ab-ra'dant (ăb-rā'dănt), *a. & n.* [OF., scraping] = ABRASIVE.
A'bra-ham'i-des (ā'brȧ-hăm'ĭ-dēz), *n. pl.* [NL.] Descendants of Abraham, Hebrews
A'bra-ham-ite, *n. Eccl. Hist.* a One of a branch of the Paulicians, — from their leader, Abraham of Antioch, of the 9th century. b One of a sect of Bohemian deists, of the 18th century.
A'bra-ham-it'ic (ā'brȧ-hăm-ĭt'ĭk), *a.* Of or pert to Abraham, the patriarch of Israel.
Abraham's balm. Agnus castus.
abraid. ✝ ABROAD.
a-braid'. Corrupt. of UPBRAID.
a-braid', *n* [See ABRAID, *v.*] A start *Obs.*
a'bram, *n.* [Corrupt. of AUBURN] A brown color; — called also **abraham color.** *Obs* —
a'bra-ham-col'ored, *a Obs*
A'bram-ide, **A'bram-ite**, *n.* A Jew *Obs.*
Ab'ra-mis (ăb'rȧ-mĭs), *n.* [N L., fr. Gr. *ἀβραμίς* a kind of fish.] *Zool.* A genus of fishes, of which the European fresh-water bream (*A brama*) is the type
a-bran'chi-al (*ȧ-brăn'kĭ-ȧl*), *a.* [*a-* not + *branchial*.] Abranchian.
a-bran'chi-an (-ăn), *a Zool.* Without gills. — *n.* An abranchian animal.
A-bran'chi-a'ta (-ā'tȧ), *n. pl.* [NL.] *Zoöl.* A group of annelids, which have no special organs of respiration. Also, any of several other groups of animals without gills
a-bran'chi-ous (-kĭ-ŭs), *a Zool* Without gills
ab'ra-sax (ăb'rȧ-săks), *n.* = ABRAXAS
a-bran'chi-ate (*ȧ-brăn'kĭ-āt*), *a. Zoöl.* Without gills.
ab-rase' (ăb-rāz'), *a.* [L. *abrasus*, p. p. of *abradere*. See ABRADE.] Rubbed smooth. *Obs.* *B. Jonson.*
ab-rase' (ăb-rāz' ; -rās'), *v. t.*; AB-RASED' (-rāzd', -rāst'); AB-RAS'ING. To wear or rub off or down; also, to smooth off; to abrade.
ab-ra'sion (ăb-rā'zhŭn), *n.* [L. *abrasio*, fr. *abradere*. See ABRADE.] **1.** Act of abrading; also, a place where the surface has been abraded. Cf. TOLERANCE, of coins.

2. The substance rubbed off. *Berkeley.*

3. *Med.* Superficial excoriation, with loss of substance under the form of small shreds.

4. *Dentistry.* Abnormal wearing away of the teeth by either mechanical or chemical means.

ab-ra'sive (-sĭv), *a.* Tending to abrade; producing abrasion; abradant. — *n.* A substance used for abrading, as for grinding, polishing, etc.; an abradant.

The principal *abrasives* now used are corundum, emery, garnet, quartz, carborundum, diatomaceous earth, tripoli, pumice, rouge, crushed steel, abrasive stones and sand. *N Int Encyc.*

a-bras'tol (*a-brăs'tōl* ; -tŏl), *n.* A derivative of beta naphthol, used as a food preservative and as a remedy for gout.

ab'raum (ăb'roum ; *Ger.* ȧp'roum), *n.* [G. *abraum*, *abraumsalze*.] A red ocher used to darken mahogany.

abraum salts. A mixture of salts of potassium, sodium, magnesium, etc., lying above the Stassfurt rock salt. They were formerly considered worthless, but are now a most important source of potassium salts.

a-braz'as (*a-brăk'sȧs*), *n.* [A name (containing the Greek letters α, β, ρ, α, ξ, α, ς, which, as numerals, amounted to 365) adopted by the Egyptian Gnostic Basilides, to signify the supreme deity as ruler of the 365 heavens of his system.] A mystical word used as a charm and engraved on gems among the ancients; also, a gem thus engraved.

a-breast' (*ȧ-brĕst'*), *adv.* [*a-* on + *breast*.] **1.** Side by side, with breasts in a line; as, "Two men could hardly walk *abreast*." *Macaulay.*

2. *Naut.* Side by side; also, opposite; over against, or on a line with, the vessel's beam; — with *of*.

3. Up to a certain level or line; equally advanced, as, to keep *abreast* of [or with] the present state of science.

4. At the same time; simultaneously. *Obs.*

ab're-nounce' (ăb'rē-nouns'), *v. t.* [Cf. L. *abrenuntiare*.] To renounce. *Obs.*

ab're-nun'ci-ate (-nŭn'sĭ-āt ; -shĭ-āt), *v. t.* [L. *abrenuntiare*.] To renounce. *Obs. or R.*

ab're-nun'ci-a'tion (-nŭn'sĭ-ā'shŭn ; -shĭ-), *n.* [LL *abrenuntiatio*.] Absolute renunciation. *Obs or R.*

a'brid (ā'brĭd), *n. Mech.* A bush for a pintle.

a-bridge' (*ȧ-brĭj'*), *v. t.*; A-BRIDGED' (*ȧ-brĭjd'*); A-BRIDG'ING. [ME. *abregen*, OF. *abregier*, F. *abréger*, fr. L. *abbreviare*; *ad* (or *ab*) + *breviare* to shorten, fr. *brevis* short. See BRIEF, cf. ABBREVIATE.] **1.** To make shorter; to shorten in duration; lessen; diminish; curtail; as, to *abridge* labor; to *abridge* power or rights. "The bridegroom . . . *abridged* his visit." *Smollett.*

She retired herself to Sebaste, and *abridged* her tram from state to necessity. *Fuller.*

2. To shorten or contract by using fewer words, yet retaining the sense; to epitomize; condense; as, to *abridge* a history or dictionary.

3. To deprive; to cut off; — followed by *of*, and formerly by *from*; as, to *abridge* one of his rights.

Syn. — Epitomize, condense, contract, compress; diminish, lessen, shorten, reduce. — ABRIDGE, ABBREVIATE, CURTAIL, RETRENCH agree in denoting reduction in both compass and content (see CONDENSE). ABRIDGE expresses the reduction in compass of an object which still remains relatively complete; as, an *abridged* dictionary; ABBREVIATE implies reduction, either by cutting off or by contraction, yet so that what remains, while no longer complete, still stands for or represents a whole; as, the abbreviation "Eng." for England, "Md." for Maryland; CURTAIL denotes a cutting off in such fashion as to impair completeness; as, "goin'," curtailed from "going"; RETRENCH suggests the reduction of something felt to be in excess; as, to *retrench* one's expenses. When *abridge* and *curtail* are used of rights or privileges, *abridge* still emphasizes the idea of reduction; *curtail*, of deprivation. See DECREASE.

Thus ended her relation, which I have *abridged*. *Goldsmith.*

The custom of *abbreviating* "the" belongs to the style in which . . . I profess to write. *Cowper.*

It is perhaps this humor of speaking no more than we needs must, which has so miserably *curtailed* some of our words that in familiar writings and conversation they often lose all but their first syllables, as in "mob., rep, pos, incog." *Addison.*

He [Horace] ought to have *retrenched* from his satires many unnecessary verses *Dryden.*

abridged notation. *Math.*, a notation in which a function is represented by a single letter, esp. in analytic geometry.

a-bridg'ment (*ȧ-brĭj'mĕnt*), *n.* [OF *abregement* See ABRIDGE.] **1.** Act of abridging, or state of being abridged; diminution; lessening; reduction or deprivation; as, an *abridgment* of pleasures or of expenses.

2. A reduced form of a work produced by condensation and omission of more or less of detail, but retaining the general sense and unity of the original; an epitome; a compend, — often distinguished from a *compilation* or *extract*.

3. A brief statement of a subject; an epitome of the general outlines or principles of something; a synopsis; specif., any of various brief statements of case law, such as those of Comyn, Viner, and Bacon, made before the modern method of reporting cases was used.

4. That which abridges, or cuts short; hence, an entertainment that makes the time pass quickly. *Obs.*

What *abridgment* have you for this evening? What mask? What music? *Shak.*

Syn. — Epitome, abstract, synopsis. See COMPENDIUM.

a'brin (ā'brĭn), *n.* [*Abrus* + *-in*.] *Physiol. Chem.* A poisonous proteid contained in the jequirity bean. It is one of the most potent vegetable poisons, resembling the poisons of snake venom.

a-broach' (*ȧ-brōch'*), *adv.* [*a-* on, in + *broach*.] **1.** Broached; in a condition for letting out or yielding liquor, as a cask which is tapped.

Hogsheads of ale were set *abroach*. *Scott.*

2. Hence: In a state to be diffused or propagated; afoot; astir. "Mischiefs that I set *abroach*." *Shak.*

a-broad' (*ȧ-brôd'*), *adv.* [*a-* on, in + *broad*.] **1.** At large; widely; broadly; over a wide space; as, a tree spreads its branches *abroad*. "The fox roams far *abroad*." *Prior.*

2. Without a certain confine; outside the house; away from one's abode, as, to walk *abroad*.

I went to St James', where another was preaching in the court *abroad* *Evelyn*

3. Beyond the bounds of a country; in foreign countries; as, we have broils at home and enemies *abroad*. "Another prince . . . was living *abroad*." *Macaulay.*

4. Astray, wide of the mark, as in the phrase *all abroad*. "I 'm only a little *abroad*, that 's all." *Dickens.*

5. Before the public at large; throughout society or the world; here and there; widely.

He went out, and began to publish it much, and to blaze *abroad* the matter. *Mark* i 45.

ab'ro-come (ăb'rō-kŏm), *n.* [NL. *Abrocoma*; Gr. *ἁβρός* graceful + *κόμη* hair.] Either of two ratlike hystricomorphic rodents, having fine soft fur and large rounded ears. They constitute the genus **Ab-roco'ma** (ăb-rŏk'ō-mȧ). They are found in the Andes Mountains.

ab'ro-gate (-gāt), *v. t.*; AB'RO-GAT'ED (-gāt'ĕd); AB'RO-GAT'ING (-ĭng). [L. *abrogatus*, p. p. of *abrogare*; *ab* + *rogare* to ask, require, propose. See ROGATION.] **1.** To annul by an authoritative act; to abolish by the authority of the maker or his successor; to repeal; — applied to the repeal of laws, decrees, ordinances, the abolition of customs, etc.

Let us see whether the New Testament *abrogates* what we so frequently see in the Old. *South*

Whose laws, like those of the Medes and Persians, they cannot alter or *abrogate*. *Burke.*

2. To put an end to; to do away with; to set aside. *Shak.*

Syn. — Annul, revoke, repeal, cancel. See ABOLISH.

ab'ro-ga'tion (-gā'shŭn), *n.* [L. *abrogatio*: cf. F. *abrogation*.] Act of abrogating, repeal by authority.

ab'ro-ga-tive (ăb'rō-gā-tĭv), *a.* Tending or designed to abrogate; as, an *abrogative* law.

A-bro'ma (*ȧ-brō'mȧ*), *n.* [NL.; *a-* not + Gr. *βρῶμα* that is eaten.] *Bot.* A small genus of East Indian sterculiaceous trees noted for the strong white fiber derived from their bark. See DEVIL'S COTTON.

A-bro'ni-a (*ȧ-brō'nĭ-ȧ*), *n.* [NL., fr. Gr. *ἁβρός* graceful.] *Bot.* A genus of American nyctaginiaceous plants having fleshy leaves and showy fragrant pink or white flowers in umbel-like heads. The calyx is salver-shaped, with a persistent 3-5-winged base. *Sand verbena* and *wild lantana* are cultivated species. Also [*l. c.*], a plant of this genus.

ab-rupt' (ăb-rŭpt'), *a.* [L. *abruptus*, p. p. of *abrumpere* to break off; *ab* + *rumpere* to break, rupture. See RUPTURE.]

1. Broken off; very steep, or craggy, as rocks, precipices, banks; precipitous, as, *abrupt* places. "Tumbling through rocks *abrupt*." *Thomson.*

2. Accomplished or done without notice to prepare the mind for the event; sudden; hasty. unceremonious. "The cause of your *abrupt* departure." *Shak.*

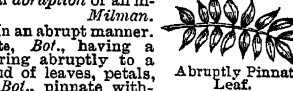
3. Having sudden transitions from one subject to another, unconnected; broken.

The *abrupt* style, which hath many breaches. *B Jonson.*

4. *Bot.* Suddenly terminating, as if cut off.

Syn. — Sudden, unexpected, hasty; rough, curt, brusque, blunt, unceremonious; disconnected, broken; sheer, perpendicular, vertical, sharp. — ABRUPT, STEEP, PRECIPITOUS. ABRUPT, as here compared, applies to a surface (as an acclivity or declivity) which rises or descends at a sharp pitch or angle; as, "From those *abrupt* and perilous rocks the man had fallen" (*Wordsworth*), cf., "It is the high land nearest to the shore which falls most *abruptly*" (*Kinglake*); "The Erzgebirge . . . rise *abruptly* to the heights of over 4000 feet" (*Mill*). STEEP implies such an angle as renders ascent, less frequently descent, difficult; as, "A military road, which rises . . . by an acclivity not dangerously *steep*, but sufficiently laborious" (*Johnson*); "My horse, weary with the *steepness* of the rise, staggered a little" (*id.*); "The descent is . . . infinitely more *steep* than the going up" (*T. Gray*) PRECIPITOUS suggests an angle approximately vertical; as, "in danger [of falling] owing to the *precipitous* nature of the path" (*G. Borrow*); "a big black, *precipitous* roof" (*H. James*). See PRECIPITOUS, ACCLIVITY

ab-rup'tion (ăb-rŭp'shŭn), *n.* [L. *abruptio*, fr. *abrumpere*.] A sudden breaking off; a violent separation of bodies. "Sudden and total *abruption* of all intercourse." *Milman.*



Abruptly Pinnate Leaf.

ab-rupt'ly, *adv.* In an abrupt manner.
abruptly acuminate, *Bot.*, having a broad apex tapering abruptly to a sharp point; — said of leaves, petals, etc. — **a. pinnate**, *Bot.*, pinnate without an odd leaflet at the end. Cf. ODD-PINNATE.
ab-rupt'ness, *n.* State or quality of being abrupt.
abrotanum, p. p. Abrogated. *Obs as p. p.* [rogates.]
ab'ro-ga'tor, *n.* One who abrogates.
abron ✝ AUBURN.
abrood ✝ ABROAD
a-brood', *adv.* Brooding. *Rare.*
a-brook', *v. t* To brook; endure *Obs or Shak*
‖ **a'bro sol'** (*ȧ'brō sōl'*). [Sp.] The hanchinol
ab-rot'a-num (ăb-rŏt'ȧ nŭm), *n* [LL., fr. L. *abrotonum*, fr. Gr. *ἀβρότονον* an aromatic plant.] Southernwood.
abruden. Obs. p. p. of ABRAID.
‖ **à brûle'-pour'point'** (*ȧ brul'-pōōr'pwĕN'*). [F.] Lit., so as to burn the doublet (with the pistol); hence, at close quarters.
abrune ✝ AUBURN
ab-rupt', *n* [L *abruptum*.] An abrupt place *Poetic.* "Over the vast *abrupt*." *Milton.*
ab-rupt', *v. t.* To tear off or asunder. *Obs*
ab-rupt'ed-ly, *adv.* Abruptly.
+ -ic.] *Chem.* Designating a complex nitrogenous organic acid found in the jequirity bean
ab'ri-cock, abricote ✝ APRICOT.
a-bridg'a-ble, a-bridge'a-ble, *a.* See ABLE.
a bridged', *p. a.* of ABRIDGE. — **a-bridg'ed-ly**, *adv* [MENT.]
a-bridge'ment Var. of ABRIDGMENT.
a-bridg'er, *n.* One who abridges.
abrigge. ✝ ABRIDGE.
a-bri'go lime'stone (*ȧ-brī'gō*). [Cf. Sp. *abrigo* a shelter.] *Geol.* A formation of the Cambrian system in Arizona
a-brim', *adv* Full to the brim.
a-broach', *v. t* [OF. *abrochier*] To broach; tap. *Obs.*
abroad Obs. corruption of ABOARD, ABROOD.
abroche. ✝ ABROACH
abrode. ✝ ABOARD, ABROAD.
abroden Obs. p. p. of ABRAID.
ab'ro-ga-ble (ăb'rō-gȧ-b'l), *a* Capable of being abrogated.
ab'ro-gate, *p. a. & p. p.* [L. *abrogatus*, p. p.] Abrogated. *Obs as p. p.*

A'brus (ā'brŭs), *n.* [NL., fr. Gr. *ἁβρός* graceful, delicate.] *Bot.* A small genus of tropical fabaceous vines having pinnate leaves, purple flowers with 4-lobed calyx, and a compressed pod. *A. abrus* is the Indian licorice. See INDIAN LICORICE, JEQUIRITY BEAN.

Ab'sa-lom (ăb'sa-lŏm), *n.* [L. *Absalom*, fr. Heb. *Abshālōm.*] **1.** *Bib.* King David's favorite son, who rebelled against his father, and for whom, after his untimely death at the hands of Joab, the king grieved. 2 *Sam.* XVIII. **2.** The Duke of Monmouth, a natural son of Charles II.; — so named in Dryden's poem "Absalom and Achitophel," a political satire written about 1680 in defense of Charles II. (David), and against the Whig party.

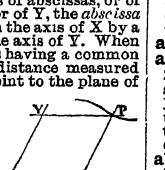
ab-sa'ro-kite (ăb-sā'rō-kīt), *n.* [From the *Absaroka* Range, Yellowstone National Park, Wyoming.] *Petrog.* An eruptive rock of basaltic aspect, consisting of a dark to light gray ground mass inclosing crystals of olivine and augite.

ab'scess (ăb'sĕs), *n.*; *pl.* ABSCESSES (-sĕz; -ĭz). [L. *abscessus* a going away, gathering of humors, abscess, fr. *abscedere*, *abscessum*, to go away; *ab*, *abs* + *cedere* to go off, retire. See CEDE.] *Med.* A circumscribed collection of pus, in any part of the body, formed by the disintegration and stretching of the tissues, usually due to injury, toxication, or infection from bacteria. — **ab'scessed** (ăb'sĕst), *a.*

ab-scind' (ăb-sĭnd'), *v. t.* [L. *abscindere*; *ab* + *scindere* to rend, cut. See SCHISM.] To rend; to cut asunder. *Rare.*
"Two syllables . . . *abscinded* from the rest." *Johnson.*

ab-scise' (ăb-sīz'), *v. t.* [L. *abscisus*, p. p. of *abscidere* to cut off.] **1.** To cut off. *Obs. & R.*
2. *Bot.* To separate by abscission.

ab-scis'sa (ăb-sĭs'ä), *n.*; E. *pl.* -SAS (-äz), L. *pl.* -SÆ (-ē). [L., fem. of *abscissus*, p. p. of *abscindere* to cut off. See ABSCIND.] *Geom.* One of the elements of reference by which a point, as of a curve, is referred to a system of fixed rectilineal coördinate axes. When referred to two intersecting axes, one of them called the axis of abscissas, or of X, and the other the axis of ordinates, or of Y, the *abscissa* of the point is the distance cut off from the axis of X by a line drawn through it and parallel to the axis of Y. When a point in space is referred to three axes having a common intersection, the *abscissa* may be the distance measured parallel to any one of them, from the point to the plane of the other two axes. Abscissas and ordinates taken together are called coördinates. Thus: OX or YP is the *abscissa* of the point P of the curve, and OY or XP its ordinate, the intersecting lines OX and OY being the axes of abscissas and ordinates respectively, and the point O their origin.



Abscissa

ab-scis'sion (-sĭzh'ŭn), *n.* [L. *abscisio*. See ABSCIND.] **1.** Act or process of cutting off, or putting an end to; state of being cut off; sudden termination
Not to be cured without the *abscission* of a member *Jer. Taylor.*
2. *Rhet.* A figure of speech employed when a speaker having begun to say a thing stops abruptly: thus, "He is a man of so much honor and candor, and of such generosity — but I need say no more."
3. *Bot.* The natural separation of parts by disorganization of the absciss-layer.

ab'sciss-lay'er (ăb'sĭs-lā'ẽr), *n* *Bot.* A zone of tissue forming a layer of separation; a septum.

ab-scond' (ăb-skŏnd'), *v. i.*; AB-SCOND'ED; AB-SCOND'ING [L. *abscondere* to hide; *ab*, *abs* + *condere* to lay up, *con-* + *-dere* (in comp.) to put. Cf. SCONCE.] **1.** To hide, withdraw, or be concealed.
The marmot *absconds* all winter *Ray.*
2. To depart clandestinely; to steal off and secrete one's self; — used specif. of persons who leave the jurisdiction of a court or secrete themselves within its jurisdiction for a fraudulent purpose, such as hindering or defrauding creditors by avoiding legal process.
That very homesickness which, in regular armies, drives so many recruits to *abscond*. *Macaulay.*
Syn. — See DECAMP.

ab-scond'ed, *p. a.* Hidden; concealed; secluded. — **ab-scond'ed-ly,** *adv.*

ab-scond'ence (ăb-skŏn'dĕns), *n.* Fugitive concealment; secret retirement; hiding. *Rare.*

ab'sence (ăb'sĕns), *n.* [F., fr. L. *absentia*. See ABSENT.] **1.** State or time of being absent or withdrawn from a place or from companionship; — opposed to *presence*. Cf. DEATH, for presumption founded on absence.
Not as in my presence only, but now much more in my *absence*. *Phil* ii. 12.
2. Want; destitution; withdrawal. "In the *absence* of conventional law." *Kent.*
3. Inattention to things present; abstraction (of mind); as, *absence* of mind. "Reflecting on the little *absences* and distractions of mankind." *Addison.*
To conquer that abstraction which is called *absence*. *Landor*
4. A void place, as of a person imagined present.
The balconies are full of the *absences* of gay cavaliers and gentle dames. *Howells*
absence without leave, *Mil. & Nav.*, the offense of unpermitted absence from a ship or command without such intent to remain away indefinitely as to constitute desertion.

ab'sent (ăb'sĕnt), *a.* [F., fr. L. *absens*, *absentis*, p. pr. of *abesse* to be away from, *ab* + *esse* to be. Cf. SOOTH.] **1.** Being away from a place; withdrawn from a place; not present.
"Expecting *absent* friends." *Shak.*
How have ye spent your *absent* time from me? *Marlowe.*
2. Not existing; lacking; as, the part was aborted or *absent*.
3. Inattentive to what is passing, absent-minded; preoccupied; as, an *absent* air.
What is commonly called an *absent* man is commonly either a very weak or a very affected man. *Chesterfield.*
Syn. — Absent-minded, inattentive, musing, dreaming, lost, absorbed, engrossed. — ABSENT, ABSTRACTED, PREOCCUPIED denote a want of attention to one's surroundings. ABSENT implies an unconscious wandering of one's thoughts from present scenes or topics of discourse (cf. ABSENT-MINDED), and is relatively negative in its force; ABSTRACTED suggests a positive drawing off of the mind from present things to some weighty matter for reflection; PREOCCUPIED suggests that the absence of the attention from things at hand is due to its having been previously absorbed in some more engrossing thought or pursuit. See ABSORB.
Sir Joshua . . . was so much caught, that he could think of nothing else, and was quite *absent* all the day, not knowing a word that was said to him. *Mad. D'Arblay.*
He seemed not so much sulky as *abstracted* As the evening wore away he became more and more absorbed in reverie, from which no sallies of mine could arouse him. *Poe*
His ballads are generally thin and scanty of import, for . . he was *preoccupied* by technical requirements *Stevenson*

ab-sent' (ăb-sĕnt'), *v. t.*; AB-SENT'ED; AB-SENT'ING. [Cf. F. *absenter*.] **1.** To take or withdraw (one's self) to such a distance as to prevent intercourse.
If after due summons any member *absents* himself, he is to be fined. *Addison*
2. To withhold from being present. *Obs.* "Go; for thy stay, not free, *absents* thee more." *Milton.*
3. To depart from; as, to *absent* the kingdom. *Obs.*

ab'sen-ta'tion (-sĕn-tā'shŭn), *n.* An absenting of one's self.

ab'sen-tee' (-tē'), *n* One who is absent, or who absents himself, from his country, office, post, duty, etc.; specif.: **a** A landholder who lives in another country or district than that where his estate is situated; as, an Irish *absentee*.
An *absentee* may be variously defined as a landed proprietor who resides away from his estate, or from his country; or, more generally, any unproductive consumer who lives out of the country from which he derives his income. *Dict of Pol Econ*
b *Law.* A person whose legal residence is out of a jurisdiction and who has no one to legally represent him within it. *Local, U. S.* **c** A convict; — formerly so called in Australia.

ab'sen-tee'ism (-tē'ĭzm), *n.* State or practice of an absentee; esp., the practice of absenting one's self from the country or district where one's estate is situated.

ab'sent–mind'ed (ăb'sĕnt-mīn'dĕd; 87), *a* Being in a temporary state, or possessing a habit, of mind in which the person affected fails to respond to the ordinary demands on his attention. Such a state or habit may result either from distraction or extreme concentration of attention, and under pathological conditions may become constant. — **ab'sent–mind'ed-ly,** *adv.* — **ab'sent–mind'ed-ness,** *n.*

ab'sinth } (ăb'sĭnth; *F.* ăp'săNt'), *n.* [F. *absinthe*. See
ab'sinthe } ABSINTHIUM.] **1.** Absinthium.
2. A green alcoholic liquor containing oils of wormwood and anise, and other aromatics, and used principally in France. It is much more intoxicating than ordinary liquors, and produces nervous derangement. It is made extensively in Switzerland, but in the trade Swiss absinth often signifies the strongest variety, wherever made.

ab-sin'thi-al (ăb-sĭn'thĭ-ăl) } *a.* Of or pertaining to worm-
ab-sin'thi-an (ăb-sĭn'thĭ-ăn) } wood; bitter.

ab-sin'thi-ate (-thĭ-āt), *v. t.*; -AT'ED (-āt'ĕd); -AT'ING (-ĭng). [From L. *absinthium*.] To impregnate with wormwood.

ab-sin'thin (-thĭn), *n. Chem.* A glucoside, $C_{30}H_{40}O_8$, the bitter principle of wormwood.

ab-sin'thine (-thĭn; -thīn), *a.* Like absinth.

ab'sinth-ism (ăb'sĭnth-ĭz'm, ăb-sĭnth'ĭz'm), *n. Med* A diseased condition due to the excessive use of absinth.

ab-sin'thi-um (ăb-sĭn'thĭ-ŭm), *n.* [L, from Gr. *ἀψίνθιον*.] The common wormwood (*Artemisia absinthium*).

ab'so-lute (ăb'sō-lūt), *a.* [L. *absolutus*, p. p. of *absolvere*; cf. F. *absolu*, in OF. sometimes spelt *absolut*. See ABSOLVE.] **1.** Absolved, freed, disengaged. *Obs.* "Free and *absolute* from all necessity." *Chaucer.*
2. Free from imperfection; complete in its own character; perfect; whole; complete.
So *absolute* she seems,
And in herself complete *Milton.*
3. Free from mixture; simple; pure; as, *absolute* alcohol
4. Free from limit, restriction, or qualification.
Where a duty is *absolute*, there is no right with which it correlates. There is no right to which it answers. It neither implies, nor is implied by, a right *John Austin.*
Specif.: **a** Free from external restraint or limitations; independent; unqualified; complete; as, *absolute* monarch or monarchy; *absolute* veto; *absolute* ownership; *absolute* gift; *absolute* delivery. **b** Free from relation to something else, whether of the same or of another kind; esp., free from the variability and error natural to human cognitions and perceptions; positive; intrinsic; hence, existent in the most positive sense; actual; real; as, *absolute* science is knowledge of things as they exist in themselves.
☞ In metaphysics the meaning of *absolute* varies from the negative idea of unconditioned or unqualified to the positive notion of self-existent or self-sufficient. All of its meanings, however, suggest the idea of nonrelative or independent. In its vaguest sense, for example, as used by Herbert Spencer in "*absolute* unknowable," it is applied to that which indefinitely transcends any conceivable limitation or determination, and again it appears in the Oriental sense of utter negation, or denial of aught that is finite or restrictive. With Sir Wm Hamilton, taken as a substantive, the term denotes the unconditionally limited, which is opposed to the unconditionally unlimited, or infinite. The substantive use — as *the absolute* — is especially prominent with reference to the **Philosophy of the Absolute**, a term sometimes applied to the philosophic systems of Schelling and Hegel, which profess to treat of the nature of being in itself, not, however, as relationless, though this is often affirmed, but as self-relation and not as dependent on other being. Mind is affirmed to be self-relation Consciousness, will, and all forms of spiritual being are characterized by self-relation, but physical or material being has the form of relation to another and is dependent, not complete in itself, i. e., receives its form from outside It must be noted that *the absolute* in this sense is primarily that of Plato ("Laws," Book X.), as self-moved, *αὐτοκινητικόν*, and is sharply to be distinguished from the use of the term by Sir Wm. Hamilton, and also from its use as applied to the first principle of Spinoza (his substance), to the being of the Eleatic school, and to the prevailing conceptions of Indian thought, esp. that of Çankara, or that of the Bhagavad-Gîta, and to any and all pantheistic schemes. *The absolute* in the former sense means the self-determined; in the second sense, it means the utterly indeterminative, the indistinguishable, and hence that which is identical with pure nothing The philosophies of Plato, Aristotle, and Hegel teach the same doctrine in this respect, and hold self-determination to be the essence of true being; determination through others the essence of dependent being, or finitude; indeterminateness the essence of the empty absolute, equivalent to pure nothing *W. T. Harris.*
c *Logic.* Considered apart from attributes or accidents; taken in its essential nature; not involving reference to anything else.
d *Gram.* Standing apart from its usual construction with another word or words; — said of certain verbal and other expressions, or of the cases in which they so stand; as, the nominative, genitive, or ablative, *absolute;* also of an adjective standing without a governed substantive; as in, the field is *ours;* also of certain uses of the transitive verb (see TRANSITIVE, *a.*) or of the form of a word so used; as, *ours* is the *absolute* form of *our.*
5. Positive, clear; certain; not doubtful *Rare.*
I am *absolute* 't was very Cloten. *Shak.*
6. Authoritative, peremptory. *Rare.*
The peddler stopped, and tapped her on the head,
With *absolute* forefinger, brown and ringed. *Mrs Browning*
7. *Physics.* **a** Independent, as far as possible, of arbitrary standards; esp, pertaining to, or derived in the simplest manner from, the fundamental units of length, mass, and time, as, *absolute* temperature, *absolute* electric units. **b** Pertaining to the absolute-temperature scale; as, 10° *absolute*, or 10° A.
Syn. — Positive, peremptory, certain; arbitrary, despotic, unconditional, unlimited, unqualified. See PURE — **absolute alcohol.** See ALCOHOL, 3. — **a. blocking.** See BLOCK SYSTEM. — **a. boiling point.** *Physics.* **a** = CRITICAL TEMPERATURE. **b** Boiling point on the absolute-temperature scale — **a. constant.** See CONSTANT — **a. contraband.** See CONTRABAND OF WAR. — **a. curvature** (at any point of a twisted curve), *Math.*, the reciprocal of the radius of the osculating circle at the point — **a. dissonance,** *Music*, a dissonance arising from the harmonic disagreement of two tones. — **a. ego** *or* **a. subject,** *Metaph.*, in the philosophy of J. G. Fichte, the ultimate principle both of knowledge and of being; that which posits its own existence, and, through the opposition of subject and object thus created, dialectically evolves the universe. — **a. electrometer** BALANCE ELECTROMETER. — **a. equation,** *Ancient Astron.*, the sum of the optical and eccentric equations, that is, of the real and apparent inequalities of a planet's motion — **a. ethics** See ETHICS. — **a force of a powder,** *Gun.*, the pressure produced by its explosion in a closed space which it entirely fills. It is said to be about 6,400 atmospheres for ordinary gunpowder. — **a. form,** *Metaph.*, pure form, specif., **a** In Platonism, the form of the supreme Idea, or unity, in which all other Ideas participate. **b** In German idealism, the subject-object relation considered as the form of the absolute — **a geometry,** the Lobachevskian geometry; — so called from the title of Bolzai's Appendix, "The Absolute Science of Space." See PARALLEL POSTULATE — **a. impediment** *Law.* See IMPEDIMENT — **a. indorsement,** *Com.*, an unqualified indorsement; that is, one which binds the indorser to pay only on failure of the prior parties to do so and due notice thereof to him. — **a invariant,** *Math*, an invariant which remains unchanged by a linear transformation of the quantic. — **a. magnitude** = ABSOLUTE VALUE. **a majority,** a majority of all the members of a body (including those voting and not voting). — **a. music,** composed music that is independent of any setting or external appeal or association for its effects; — distinguished from *operatic*, or *programme*, *music*. — **a. necessity.** See NECESSITY — **a pitch.** *Music.* **a** The position of a tone in reference to the whole range of pitch or to a complete standard scale, conceived as independently determined by its rate of vibration; — distinguished from *relative pitch;* as, A, E♭. See PITCH. **b** Elliptically and loosely, a sense of, or ear for, absolute pitch; as, that singer has *absolute pitch*. — **a pressure,** *Mech.*, fluid pressure measured above a perfect vacuum. It is the pressure indicated by an ordinary pressure gauge, as a steam gauge, added to the atmospheric pressure. — **a. proposition,** *Logic*, a categorical proposition. — **a reality,** *Metaph.*, the reality of the universe as it is in itself, independent of human knowledge or perception; specif., in Scholastic philosophy, the relation of things to the divine mind. — **a. reciprocant.** See RECIPROCANT. — **a. right.** *Law.* See RIGHT. — **a. space,** *Physics*, space considered without relation to material limits or objects. — **a. subject.** See ABSOLUTE EGO, above. — **a. superlative.** *Gram.* See SUPERLATIVE, *n.* — **a. temperature,** *Physics*, the temperature as measured on a scale determined by certain general thermodynamic principles, and reckoned from the absolute zero. It is customary to use the centigrade degree as a unit. Thus, 10° A. is equivalent to −263° C. — **a. terms,** *Alg.*, such terms as are known, or which do not contain an unknown quantity. — **a. value,** *Math.*, the value of a number irrespective of its sign. — **a. velocity,** *Physics*, velocity referred to some fixed point in space as an origin. — **a. weed,** a plant that is injurious to cultivated crops and is without intrinsic economic or horticultural value. *Percival* — **a. weight,** *Agric.*, the weight of a definite number of seeds, used as a means of calculating the average weight of each seed. — **a. zero,** *Physics*, the beginning, or zero point, in the scale of absolute temperature. It is equivalent to −273.1° centigrade or −459.6° Fahrenheit, and is the temperature, never attained, corresponding to entire absence of heat.

ab'so-lute (ăb'sō-lūt), *n.* **1.** *Geom.* In a plane, the two imaginary circular points at infinity, in space of three dimensions, the imaginary circle at infinity.
2. *Philos.* With *the*, that which is absolute; esp., all reality considered as the final or total fact, or existence. See ABSOLUTE, *a*, **4 b.**

Absolute, Captain. In Sheridan's comedy "The Rivals," Sir Anthony Absolute's gallant and spirited son, who is in love with Lydia Languish.

Absolute, Sir Anthony. An elderly gentleman in Sheridan's comedy "The Rivals," represented as testy, positive, impatient, and overbearing, but yet of a warm and generous disposition.

ab'so-lute-ly, *adv.* In an absolute manner or condition; independently or unconditionally; wholly, positively.

ab'so-lute-ness, *n.* Quality or state of being absolute; specif., independence of everything extraneous, unlimitedness; absolute power; independent reality; positiveness.

ab'so-lu'tion (ăb'sō-lū'shŭn), *n.* [ME. *absolucioun*, F. *absolution*, L. *absolutio*, fr. *absolvere* to absolve. See ABSOLVE.] **1.** An absolving, or setting free from guilt, sin, or penalty; forgiveness of an offense. "Government . . . granting *absolution* to the nation." *Froude.*
2. *Civil Law.* An acquittal.
3. *Eccl.* **a** In the Roman Catholic Church, and with some others, the remission of sin given in the sacrament of penance to the truly penitent by the priest in virtue of authority derived from Christ. For 1,000 years the universal formula was "May Christ absolve thee," and still is in the

---

abs. *Abbr.* Absolutely; abstract.
A. B. S. *Abbr.* American Bible Society.
abscedarie. † ABECEDARY.
ab-scede'. *v. i.* [L. *abscedere.*] To move away or out of contact. *Obs.* — **ab-sce'dent,** *a. Obs.*
ab-sces'sion (ăb-sĕsh'ŭn), *n.* [L. *abscessio* a separation. See ABSCESS.] A separating; removal; also, an abscess. *Obs.*
ab'scess-root', *n.* The creeping Greek valerian (*Polemonium reptans*). See under GREEK.
ab-sci'sion (-sĭzh'ŭn), *n.* = ABSCISSION [SA.]
ab'sciss (ăb'sĭs), *n.* = ABSCISSA.
‖ **ab-scis'si-o in'fi-ni'ti** (ăb-sĭsh'ĭ-ō ĭn'fĭ-nī'tī) [L., abscission of an indefinite (number).] A logical process for arriving at a true conclusion by the successive exclusion of hypotheses.
ab-scis'sor (ăb-sĭs'ẽr), *n.* One that rends or cuts asunder. *Obs.*
ab-sconce' (ăb-skŏns'), *n.* [LL. *absconsa*] *R. C. Ch.* A dark lantern used at lauds and matins and as a desk lantern.

ab-scond'er, *n.* One who absconds
ab'see. † A B C.
ab'sen-cy (-sĭ), *n.* Absence. *Obs.*
ab'sent, *n.* An absentee. *Obs or Scots Law.*
ab'sen-ta'ne-ous (ăb'sĕn-tā'nē-ŭs), *a.* [LL. *absentaneus.*] Pertaining to absence. *Obs*
ab'sen-tee'ship, *n.* See -SHIP.
ab-sent'er, *n.* One who absents himself.
‖ **ab-sen'te re'o.** [L.] *Law.* The defendant being absent.
ab'sent-ly, *adv.* of ABSENT.
ab-sent'ment, *n.* State of being absent; withdrawal. *Rare.*
ab'sent-ness, *n.* See -NESS.
absey, absie † A B C.
ab-sid'i-ole Var. of APSIDIOLE.
ab-sin'thol (ăb-sĭn'thōl; -thōl), *n.* [*absinth* + 2d *-ol.*] *Chem.* = THUJONE
ab'sis. Var. of APSIS.
ab-sist', *v. i.* [L. *absistere*, p. pr. *absistens.*] To stand apart; desist. *Obs.* — **ab-sist'ence,** *n. Obs.*
absistos. † ASBESTOS.
ab'sit. *n.* [L. *absit*, let him be absent.] Leave of absence, as for a night, given to a pupil
‖ **ab'sit in-vi'di-a** (ĭn-vĭd'ĭ-ä) [L.] Let there be no envy or ill will — **ab'sit in-vi'di-a ver'bo,** *or* **ab'sit ver'bo in-vi'di-a,** be it said without boasting or offense. *Lyly* (IX. 19, XXXVI. 7)
‖ **ab'sit o'men.** [L.] May there be no (ill) omen (as in a word just used).
absolete. Obs corrupt. of ABSOLETE, OBSOLETE.

Eastern Church; but now in the Western Church the formula is "I absolve thee." It is a judicial sentence and must be given in the presence of the penitent. **b** *R. C. Ch.* (1) Sacramental absolution, a remission of sins, imparted by the priest in the sacrament of penance. (2) A releasing from censures, for example, from excommunication. This power may be delegated to any cleric, and may be exercised apart from the sacrament of penance, and apart from the presence of the censured. (3) A form of supplication and intercession for the dead, chanted or recited before the body is carried from the church.

4. Delivery, in speech. *Obs.* *B. Jonson.*

Absolution day, *R. C. Ch.*, Tuesday before Easter, in the early church, Good Friday.

ab'so-lut'ism (ăb'sō-lūt'ĭz'm), *n.* **1.** State or quality of being absolute, or without limitation or condition; quality of that which is immediate, assertorial, or downright.

The *absolutism* of green does not eternally prevail. *Harper's Mag.*

2. Doctrine of that which is absolute, independent, or unconditional; specif.: **a** *Philos.* The philosophy of the Absolute. See ABSOLUTE, *a.*, 4 **b**. **b** *Theol.* The doctrine of absolute decree, or predestination. **c** *Polit. Science.* The doctrine or existence of unconditional power and sovereignty vested in a monarch, autocrat, or oligarchy.

ab'so-lut'ist (-ĭst), *n.* **1.** One who favors an absolute or autocratic government.

2. *Metaph.* One who rests his philosophy upon a doctrine of *the absolute.*

ab'so-lut'ist, ab'so-lu-tis'tic (-lū-tĭs'tĭk), *a* Of or pert. to absolutism; arbitrary, despotic; as, *absolutist* principles.

Benevolence has the two ideals, the paternal, the *absolutistic*, and the democratic: the one looking to the strong to do things for the people, the other looking to the people to do things for themselves *Harper's Mag.*

ab-sol'u-to-ry (ăb-sŏl'ū-tō-rĭ), *a.* [L. *absolutorius.*] Serving to absolve "An *absolutory* sentence." *Ayliffe.*

ab-solve' (ăb-sŏlv'; 277), *v. t.*; AB-SOLVED' (-sŏlvd'); AB-SOLV'ING. [L. *absolvere* to set free, to absolve; *ab* + *solvere* to loose. See ASSOIL, SOLVE.] **1.** To set free, or release, as from some obligation, debt, or responsibility, or from the consequences of guilt or such ties as it would be sin or guilt to violate; to pronounce free; as, to *absolve* a subject from his allegiance; to *absolve* an offender, which amounts to an acquittal and a remission of his punishment

Halifax was *absolved* by a majority of fourteen *Macaulay*

2. To free from a penalty; to pardon; remit (a sin), — said of the sin or guilt. See ABSOLUTION.

In his name I *absolve* your perjury. *Gibbon*

3. To finish; accomplish. *Obs.*

The work begun, how soon *absolved.* *Milton.*

4. To resolve or explain. *Obs.*

We shall not *absolve* the doubt. *Sir T. Browne.*

Syn. — Exonerate, acquit, discharge. See EXCULPATE.

ab'so-nant (ăb'sō-nănt), *a.* [L. *ab* + *sonans*, p. pr. of *sonare* to sound.] Discordant; contrary, — opposed to *consonant.* "*Absonant* to nature." *Quarles.*

ab-sorb' (ăb-sôrb'), *v. t.*; AB-SORBED' (-sôrbd'); AB-SORB'ING. [L. *absorbere*, *ab* + *sorbere* to suck in, akin to Gr. ῥοφεῖν: cf. F. *absorber.*] **1.** To swallow up; to engulf, to overwhelm; to cause to disappear as if by swallowing up: to use up; to include. "Dark oblivion soon *absorbs* them all." *Cowper.*

The large cities *absorb* the wealth and fashion. *Irving.*

2. To suck up, to drink or take in; to imbibe, as a sponge, the lacteals of the body, the roots of plants, etc.

We commonly say that dry air can *absorb* vapor. Strictly the air does not absorb [in sense 1, below] vapor, but the water vaporizes regardless of the presence of the air *R. S. Tarr*

3. To engross or engage wholly, to occupy fully, as, *absorbed* in study or the pursuit of wealth.

Let us *absorb* our entire beings in this one aim *Farrar.*

4. To take up by cohesive, chemical, or any molecular action, as when charcoal *absorbs* gases. So heat, light, and electricity are *absorbed* by various substances.

5. To take up by purchase or use; as, in financial cant, an issue of stocks or bonds is said to be *absorbed* when it has passed into the hands of the public by sale, and *assimilated* when its general reselling has ceased.

Syn. — Engage, occupy, swallow up, sink, plunge, bury, engulf, lose. — ABSORB, IMMERSE, ENGROSS agree in the idea of the entire occupation of one's time or attention. One is ABSORBED who is so engaged or taken up with something as to be oblivious of all else, as, to be *absorbed* in a book, in contemplation, cf. an *absorbing* story. One is IMMERSED in something who is, as it were, sunk in it, and lost for the time to all other considerations; as, to be *immersed* in the pleasures of the town, "*Immersed* in rich foreshadowings of the world." (*Tennyson*). One is ENGROSSED whose interest or faculties are exclusively occupied by some object or employment; as, "Your professorship . . . will not *engross* you wholly" (*Cowper*), cf. an *engrossing* pursuit. See ABSENT, TENSE; cf. DIP.

Manual occupations do not engage the mind sufficiently . . . But composition, especially of verse, *absorbs* it wholly. *Cowper.*

I was *immersed* in the passage of the Goths over the Danube, when the summons of the dinner bell reluctantly dragged me from my intellectual feast. *Gibbon.*

This foolish road bill, which has *engrossed* the whole attention of everybody lately. *Walpole.*

ab-sorbed' (ăb-sôrbd'), *p. a.* Swallowed up; engrossed. — **ab-sorb'ed-ly**, *adv.* — **ab-sorb'ed-ness**, *n.*

He eyed the coming tide with an *absorbed* attention. *Dickens.*

ab-sor'be-fa'cient (ăb-sôr'bē-fā'shĕnt), *a.* [L. *absorbere* to absorb + *-facient.*] Tending to produce absorption. — *n. Med.* Any agent promoting absorption.

ab-sorb'ent (ăb-sôr'bĕnt), *a.* [L. *absorbens*, p. pr. of *absorbere.*] Absorbing; swallowing; absorptive.

absorbent cotton, cotton rendered absorbent by freeing it from its fatty matter by chemical means. It is used esp. in surgery. — **a gland**, *Anat.*, a lymphatic gland. — **a. ground**, *Paint.*, a ground prepared for a picture, chiefly with distemper or water colors, by which the oil is absorbed, and a brilliancy is imparted to the colors.

ab-sorb'ent, *n.* **1.** Anything which absorbs.

The ocean, itself a bad *absorbent* of heat. *Darwin*

2. *Med.* **a** Any substance that absorbs and neutralizes acid fluid in the stomach and bowels, as magnesia, chalk, etc. **b** A substance (e. g., iodine) that acts on the absorbent vessels so as to reduce enlarged and indurated parts. **c** Any substance that mechanically absorbs excreted matter.

3. *pl. Anat.* The lymphatics; — so called from the important part they play in absorption (which see).

ab-sorb'ing (ăb-sôr'bĭng), *p. a.* That absorbs; engrossing; as, an *absorbing* pursuit. — **ab-sorb'ing-ly**, *adv.*

absorbing well, *Civil Engin.*, a well or shaft for surface drainage, sunk to an absorbent or permeable stratum

ab-sorp'ti-om'e-ter (ăb-sôrp'shĭ-ŏm'ē-tẽr), *n.* [See ABSORPTION; -METER.] *Physics.* An instrument for the measurement of the absorption of gases by liquids. — **ab-sorp'ti-o-met'ric** (-ō-mĕt'rĭk), *a.*

ab-sorp'tion (-sôrp'shŭn), *n.* [L. *absorptio*, fr *absorbere.* See ABSORB.] **1.** Act or process of absorbing or of being absorbed; as, the *absorption* of bodies in a whirlpool, of gases in liquids, of a smaller tribe into a larger, etc.

2. Entire engrossment or occupation of the mind; as, *absorption* in some employment.

3. *Physiol.* The imbibing of fluid (as nourishment in dissolved condition) by living cells or tissues; particularly, the passage of the digested food through the epithelial cells and other tissues of the mucous membrane of the alimentary canal into the blood or lymph, for transference to the various parts of the body. Though in some measure a process of osmosis, absorption is influenced by the activity of the living cells through which the material passes, certain substances being selected and others rejected, or taken up only in relatively small quantity, and many of them subjected to important chemical changes, destructive or constructive. Absorption is most active in the small intestine, though some substances are absorbed from the stomach. In the large intestine much water is absorbed. Most absorbed substances are carried off chiefly by the blood; fats, however, by the lymph. Cf. CHYLE.

absorption bands. *Physics.* Dark bands in a spectrum, due to selective absorption of the light. The absorbing media are generally solids or liquids through which the light of the spectrum has been transmitted.

absorption dynamometer. Any of several forms of dynamometer in which the energy measured is absorbed by frictional resistances and is not transmitted to other machines to do useful work, as in the transmission dynamometer. See PRONY BRAKE.

absorption lines. *Physics.* Dark lines in a spectrum, due to selective absorption of the light. The absorbing media are generally incandescent gases or vapors. Clusters of lines closely grouped sometimes appear as bands, and true absorption bands may be so narrow and well defined as to be taken for lines. See ABSORPTION BANDS, FRAUNHOFER LINES.

ab-sorp'tive (-tĭv), *a.* Having power, capacity, or tendency to absorb — **ab-sorp'tive-ness, ab'sorp-tiv'i-ty**, *n.*

ab-stain' (ăb-stān'), *v. i.*; AB-STAINED' (-stānd'), AB-STAIN'ING. [ME. *absteynen, abstenen*, OF. *astenir, abstenir*, F. *abstenir*, fr. L. *abstinere, abstentum*, v. t. & v. i., to keep from; *ab, abs* + *tenere* to hold. See TENABLE.] To hold one's self aloof; to forbear or refrain voluntarily, esp. from an indulgence of the passions or appetites; — with *from.*

Not a few *abstained* from voting *Macaulay*

Who *abstains* from meat that is not gaunt? *Shak.*

Syn. — Withhold, desist; give up, deny one's self, relinquish. — ABSTAIN, REFRAIN agree in the idea of a self-imposed check or arrest upon action. To ABSTAIN is deliberately to withhold one's self from an object or action, often with the implication that indulgence in it would be hurtful or wrong; as, to *abstain* from meat on Friday; "*abstain* from fleshly lusts" (1 *Pet.* ii. 11). REFRAIN is not so emphatic as *abstain*, and applies with less frequency to the appetites or passions. It often implies the checking of a momentary impulse or inclination, as, to *refrain* from laughter. Indeed, to *refrain* from an action often means merely its voluntary nonperformance; as, "a time to embrace and a time to *refrain* from embracing" (*Eccl.* iii. 5). See ABSTINENCE, AVOID.

The lamentable difficulty I have always experienced in saying no! and in *abstaining* from what the people about me were doing. *Coleridge.*

Hast thou . . . loved so well a high behavior,
In man or maid, that thou from speech *refrained*,
Nobility more nobly to repay? *Emerson.*

ab-ste'mi-ous (ăb-stē'mĭ-ŭs), *a.* [L. *abstemius; ab, abs* + root of *temetum* intoxicating drink.] **1.** Abstaining from wine. *Orig. Latin sense.*

Under his special eye
Abstemious I grew up and thrived amain *Milton.*

2. Sparing in diet; refraining from a free use of food and strong drinks; temperate; abstinent; sparing in the indulgence of the appetite or passions.

Instances of longevity are chiefly among the *abstemious.* *Arbuthnot.*

3. Sparingly used; used, or in conformity, with temperance or moderation; as, an *abstemious* diet.

4. Marked by, or spent in, abstinence; as, an *abstemious* life. "One *abstemious* day." *Pope.*

5. Promotive of abstinence. *Rare.*

Such is the virtue of the *abstemious* well. *Dryden.*

Syn. — See ABSTINENCE.

— **ab-ste'mi-ous-ly**, *adv.* — **ab-ste'mi-ous-ness**, *n.*

ab-sten'tion (ăb-stĕn'shŭn), *n.* [F. See ABSTAIN.] Act of abstaining; a holding aloof.

ab-sten'tious (-shŭs), *a.* Characterized by abstinence; self-restraining. *Farrar.*

ab-sterge' (ăb-stûrj'), *v. t.* [L. *abstergere, abstersum; ab, abs* + *tergere* to wipe: cf. F. *absterger*] To clean by wiping; to wipe away; to cleanse; hence, to purge. *Obs. or R.*

ab-ster'gent (ăb-stûr'jĕnt), *a.* [L. *abstergens*, p. pr.] Serving to cleanse; detergent. — *n.* A substance used in cleansing; a detergent; as, soap is an *abstergent.*

ab-ster'sion (ăb-stûr'shŭn), *n.* [F. *abstersion.* See ABSTERGE] Act of wiping clean; cleansing; purging.

The task of ablution and *abstersion* being performed. *Scott.*

ab-ster'sive (-sĭv), *a.* [Cf. F. *abstersif.* See ABSTERGE.] Cleansing; purging. *Bacon.* — *n.* Something cleansing. — **ab-ster'sive-ness**, *n.*

The strong *abstersive* of some heroic magistrate. *Milton*

ab'sti-nence (ăb'stĭ-nĕns), *n.* [F. *abstinence*, L. *abstinentia*, fr. *abstinere.* See ABSTINENT.] **1.** Act or practice of abstaining; voluntary forbearance; esp., the refraining from indulgence of appetite, or from customary gratifications of animal or sensual propensities. Specif., habitual abstaining from intoxicating beverages, — called also *total abstinence.*

The *abstinence* from a present pleasure that offers itself is a pain, nay, oftentimes a very great one. *Locke*

2. The practice of self-denial by depriving one's self of certain kinds of food or drink, esp. of meat.

Penance, fasts, and *abstinence*,
To punish bodies for the soul's offense. *Dryden*

3. Specif.: *Economics.* The sacrifice involved in abstaining from the unproductive consumption of wealth, in order to accumulate capital.

Another of Mr Mill's fundamental propositions is, that capital originates in *abstinence*. In this assertion it is permanent capital that is referred to. Not a little care needs, however, to be used, if we are to have a clear idea of the function termed *abstinence*; for concerning it there are current many old confusions and some modern ones. . . . *Abstinence* is nothing more than electing to take our income in the form of wealth-creating goods, instead of in that of pleasure-giving goods *J. B. Clark.*

Syn. — Abstention, soberness, moderation, self-restraint, self-denial, forbearance. — ABSTINENCE, TEMPERANCE, ABSTEMIOUSNESS, SOBRIETY agree in expressing restraint in the gratification of appetites or passions. ABSTINENCE and TEMPERANCE are chiefly used with reference to strong drink, and are often employed as convertible terms, though *temperance* in its more exact sense implies simply habitual moderation; as, "The rule of 'Not too much,' by *temperance* taught in what thou eat'st and drink'st" (*Milton*). ABSTEMIOUSNESS applies to either food or drink; as, an *abstemious* meal (*Scott*). SOBRIETY, though still common in its original sense of avoidance of excess in the use of intoxicants, is of very general application; as, *sobriety* of demeanor, *sobriety* in dress. See FRUGAL, MODERATE.

If all the world
Should, in a pet of *temperance*, feed on pulse,
Drink the clear stream, and nothing wear but frieze *Milton.*
Mr Wrench, generally *abstemious*, often drank wine rather freely at a party *G. Eliot.*
That women adorn themselves in modest apparel, with shamefacedness and *sobriety.* 1 *Tim.* ii. 9.

ab'sti-nent (ăb'stĭ-nĕnt), *a.* [F. *abstinent*, L. *abstinens*, p. pr. of *abstinere.* See ABSTAIN.] Refraining from indulgence, esp. from the indulgence of appetite; abstemious; continent, temperate. — **ab'sti-nent-ly**, *adv.*

ab'sti-nent, *n.* **1.** One who abstains.

2. [*cap.*] *Eccl. Hist.* One of a sect of abstainers from marriage, meat, etc., in France and Spain in the 3d century.

ab'stract (ăb'străkt; *formerly* ăb-străkt'), *a.* [L. *abstractus*, p. p. of *abstrahere* to draw from, separate; *ab, abs* + *trahere* to draw. See TRACE.] **1.** Drawn; derived. *Obs.*

2. Withdrawn; separate. *Obs.*

The more *abstract* we are from the body *Norris.*

3. Considered apart from any application to a particular object; as, *abstract* truth, *abstract* numbers. Hence: Ideal; abstruse; difficult.

4. Expressing a quality apart from any subject of which the quality is predicated, as, "honesty," "whiteness," are *abstract* words.

5. Abstracted, absent in mind; absent-minded. "*Abstract*, as in a trance." *Milton.*

6. *Philos.* **a** Separated from closely associated ideas or perceptions; as, the solidity of marble when contemplated apart from its color or figure is an *abstract* conception, also, symbolically representing to the mind something which is not (or may not be) immediately perceived; as, an *abstract* idea of a horse, or of France. **b** General as opposed to particular; as, "reptile" is an *abstract* or general name.

A concrete name is a name which stands for a thing, an *abstract* name is a name which stands for an attribute of a thing A practice has grown up in more modern times, which, if not introduced by Locke, has gained currency from his example, of applying the expression "*abstract* name" to all names which are the result of abstraction and generalization, and consequently to all general names, instead of confining it to the names of attributes *J. S. Mill.*

7. Dealing with a subject in the abstract or dealing with an abstract subject; — applied to sciences, esp. to the *pure* as distinguished from the *applied* sciences.

Syn. — See GENERAL.

abstract idea. See def. 6, above. — **a. noun**, *Gram.*, a noun or name denoting an attribute, as a quality, activity, or state, considered apart from its substance or that which manifests the activity, state, or condition; as, *sweetness, wisdom, motion* are *abstract nouns.* — **a. numbers**, *Math.*, numbers used without application to things, as 6, 8, 3; but when applied to any thing, as 6 feet, 10 men, they become *concrete.* — **a. mathematics.** See MATHEMATICS. — **a. rhythm.** See RHYTHM. — **a. unit**, the unit of numeration; one taken in the abstract; the number represented by 1; — distinguished from *concrete*, or *denominate, unit*, that is, a unit in which the kind of thing is expressed, a unit of measure or value, as 1 foot, 1 dollar, 1 pound, and the like.

ab'stract (ăb'străkt), *n.* [See ABSTRACT, *a.*] **1.** That which comprises or concentrates in itself the essential qualities of a larger thing or of several things. Specif.. A summary or an epitome, as of a book, or of a statement; a brief.

An *abstract* of every treatise he had read. *Watts.*
Man, the *abstract*
Of all perfection, which the workmanship
Of Heaven hath modeled *Ford.*

2. State of separation from other things; as, to consider a subject in the *abstract*, or apart from associated things.

3. An abstract term; also, an abstract idea.

The concretes "father" and "son" have, or might have, the *abstracts* "paternity" and "filiety." *J. S Mill.*
All our *abstracts* must be confessed to be but imperfectly imaginable things. *Wm James.*

4. *Pharm.* A preparation made by mixing powdered solid extract of a vegetable substance with sugar of milk in such proportion that one part of the final product represents two parts of the original substance.

Syn. — Abridgment, synopsis, digest. See COMPENDIUM.

abstract of title, *Law*, an epitome of the successive conveyances and other facts upon which a person's title to a piece of land rests. In the absence of express stipulations the vendor or mortgagor is, in England, required by law to furnish an abstract to the vendee or mortgagee at his own expense, in the United States, it is customary for him to do so. — **in the abstract**, with reference to theoretical considerations only; apart from practical or actual conditions.

ab-stract' (ăb-străkt'), *v. t.;* ABSTRACT'ED, ABSTRACT'ING. [See ABSTRACT, *a.*] **1.** To withdraw; separate; take away.
He was incapable of forming any opinion or resolution *abstracted* from his own prejudices *Scott.*
2 To draw off in respect to interest or attention; as, his mind was wholly *abstracted* by other objects.
3. To separate, as ideas, by the operation of the mind; to consider by itself; to contemplate separately, as a quality or attribute; as, to *abstract* the notion of dimension from that of space. *Whately.*
4. To derive or take by way of descent from ancestors. *Obs.*
5. To epitomize; summarize, abridge. *Franklin.*
6. To take secretly or dishonestly, to purloin; as, to *abstract* goods from a parcel, or money from a till.
Von Rosen had quietly *abstracted* the bearing reins from the harness. *W Black.*
7. *Chem.* To separate, as the more volatile or soluble parts of a substance; to extract.

ab-stract', *v. i.* To perform the process of abstraction or of abstracting something.
I own myself able to *abstract* in one sense. *Berkeley.*

ab-stract'ed, *p. a.* **1.** Separated or disconnected, withdrawn, removed; apart.
The evil one *abstracted* stood from his own evil *Milton.*
2. Separated from matter; abstract; ideal. *Obs.*
3. Abstract; abstruse; difficult. *Obs* *Johnson.*
4. Inattentive to surrounding objects; absent in mind.
"An *abstracted* scholar." *Johnson.*
The young stranger had been *abstracted* and silent *Blackw. Mag.*
Syn. — See ABSENT.
— **ab-stract'ed-ly**, *adv.* — **ab-stract'ed-ness**, *n.*

ab-strac'tion (ăb-străk'shŭn), *n.* [L. *abstractio;* cf. F. *abstraction.*] **1.** Act of abstracting, or state of being abstracted.
A wrongful *abstraction* of wealth from certain members of the community *J. S. Mill.*
2. A separation from worldly objects; a recluse life; as, a hermit's *abstraction.*
3. *Metaph.* Act or process of leaving out of consideration one or more qualities of a complex object so as to attend to others. Thus, when the mind considers the form of a tree by itself, or the color of the leaves as separate from their size or figure, the act is called *abstraction.* So, also, when it considers *whiteness, softness, virtue, existence,* as separate from any particular objects. *Abstraction* separates the parts or qualities of things wholly for the sake of considering them in themselves, or in their relation to like parts or qualities in other things. Abstraction is thus necessary to classification, by which things are arranged in genera and species, since in classifying we separate in idea like qualities of certain objects from other qualities which are different, and arrange the objects having the same qualities in a class or collected body. *Abstraction* is thus distinguished from *analysis,* for while it is an analytic process, it is not concerned, as is analysis, with the relations of parts to a whole, but with their relations to other things.
4. That which is abstracted; hence, an abstract idea or term; loosely, a theory; as, to fight for mere *abstractions.*
In Latin as in English it is somewhat of a rarity to use the plurals of very abstract *abstractions.* *B Bosanquet*
The mechanical theory of the world we have traced to a natural prejudice supposed to be the special infirmity of metaphysicians — that of ascribing objective existence to *abstractions.* Now, if ever there were *abstractions,* the time and space and mass of abstract dynamics are such. *James Ward.*
5. *Chem.* Separation of volatile parts by distillation. *Obs.*
6. Absence or absorption of mind; inattention to present objects, occurrences, etc.
7. A surreptitious taking of the property of another; purloining. *Euphemistic.*

ab-strac'tive (ăb-străk'tĭv), *a.* [Cf. F. *abstractif*] Having the power of abstracting; of an abstracting nature. "The *abstractive* faculty." *I. Taylor.*
abstractive knowledge. See KNOWLEDGE.
— **ab-strac'tive-ly**, *adv.* — **ab-strac'tive-ness**, *n.*

ab'stract-ly (ăb'străkt-lĭ), *adv.* In an abstract state or manner; separately; absolutely; by itself.

ab'stract-ness, *n* Quality or state of being abstract.

ab-strict'ed (ăb-strĭk'tĕd), *a. Bot.* Cut off by abstriction.

ab-stric'tion (-shŭn), *n.* [L. *ab* off + *strictio, -onis,* a binding tight. See STRINGENT] **1.** A loosing or unbinding. *Rare.*
2. *Bot.* **a** The formation of spores by the cutting off of successive portions of the sporophore through the growth of septa. See CONIDIUM, *Illust.* **b** = ABSCISSION.

ab-struse' (ăb-strōōs'), *a.* [L. *abstrusus,* p. p. of *abstrudere* to thrust away, conceal, *ab, abs* + *trudere* to thrust; cf. F. *abstrus.* Cf. INTRUDE.] **1.** Concealed or hidden. *Obs.*
The eternal eye whose sight discerns
Abstruse thoughts *Milton*
2. Remote from apprehension; difficult to be comprehended or understood, recondite, as, *abstruse* learning.
Profound and *abstruse* topics *Milman*
Syn. - See RECONDITE.
— **ab-struse'ly**, *adv.* — **ab-struse'ness**, *n.*

ab-surd' (ăb-sûrd'), *a.* [L. *absurdus* harsh-sounding, incongruous absurd; *ab* + (perh) a deriv. fr. a root meaning "to sound" cf. L. *surdus* dull-sounding, silent, deaf: cf. F. *absurde.* Cf. SURD.] **1.** Inharmonious; untuneful. *Obs. & R.*
2. Contrary to reason or propriety; obviously and flatly opposed to manifest truth; inconsistent with the plain dictates of common sense; nonsensical, ridiculous: as, an *absurd* person; an *absurd* opinion; an *absurd* dream.
This proffer is *absurd* and reasonless *Shak.*
3. *Logic.* Contradictory; fallacious by reason of contradiction. See REDUCTIO AD ABSURDUM.
Syn. — Irrational, ridiculous, preposterous, inconsistent, incongruous. See FOOLISH.
— **ab-surd'ly** (ăb-sûrd'lĭ), *adv.* — **ab-surd'ness**, *n.*

ab-surd'i-ty (ăb-sûr'dĭ-tĭ), *n.; pl.* -TIES (-tĭz). [L. *absurditas:* cf. F. *absurdité.*] **1.** Quality or state of being absurd. "The *absurdity* of the actual idea." *Locke.*
2. That which is absurd; an absurd action; a logical contradiction. "Some strange *absurdity.*" *Shelley.*
His travels were full of *absurdities.* *Johnson*

A-bu'dah (a-bōō'dä), *n.* In James Ridley's (1736-65) "Tales of the Genii," a merchant of Bagdad, who dreams that every night a box or chest enters of itself into his chamber and discloses a hag who drives him to seek the talisman of Oromanes, which will insure happiness. He learns finally that the real talisman of Oromanes, true happiness, can be enjoyed only by immortals, and that man's sole pursuit should be to know and obey the will of God.

A'bu Has'san (ä'bōō hăs'ăn). In the "Arabian Nights," a merchant of Bagdad, who, in fulfillment of a wish to be the caliph for one day, expressed to the disguised caliph Harun-al-Rashid, is carried in his sleep to the latter's bed and on awaking is made to believe himself the caliph.

a-bu'li-a (*a*-bōō'lĭ-*a;* *a*-bū'-), *n.* [NL.; Gr. *ἀ-* not + root of *βούλεσθαι* to will: cf. *ἀβουλία* thoughtlessness.] *Med.* Impairment or loss of will power. It is a characteristic of some forms of insanity. — **a-bu'lic** (-lĭk), *a.*

a-bun'dance (*a*-bŭn'dăns), *n.* [ME. (*h*)*abundaunce, abundance,* F. *abondance,* L. *abundantia,* fr. *abundare* See ABOUND.] **1.** An overflowing fullness; ample sufficiency; great plenty, profusion; copious supply, superfluity; wealth; — strictly applicable to quantity only.
It is lamentable to remember what *abundance* of noble blood hath been shed with small benefit to the Christian state *Raleigh.*
2. *Solo Whist.* = ABONDANCE.
Syn. — Exuberance, plenteousness, plenty, copiousness, overflow; riches, affluence, wealth.

a-bun'dant (-dănt), *a.* [ME (*h*)*abundant, aboundant,* F. *abondant,* fr. L *abundans,* p. pr. of *abundare.* See ABOUND.] Fully sufficient; plentiful, in copious supply; — followed by *in,* rarely by *with.* "*Abundant* in goodness and truth." *Ex.* xxxiv. 6. — **a-bun'dant-ly**, *adv.*
Syn. — Ample, copious, plenteous, exuberant, overflowing, rich, teeming, profuse, bountiful, liberal. See PLENTIFUL.
abundant number, *Math.,* a number the sum of whose aliquot parts exceeds the number itself. Thus, 1, 2, 3, 4, 6, the aliquot parts of 12, make the number 16. This is opposed to a **deficient number,** as 14, whose aliquot parts are 1, 2, 7, the sum of which is 10; and to a **perfect number,** which equals the sum of its aliquot parts, as 6, with aliquot parts 1, 2, 3

a-bur'ton (*a*-bûr't'n), *adv. & a.* [*a-* on, in + *burton.*] *Naut.* With the length athwartship, as barrels, boxes, etc.

a-buse' (*a*-būz'), *v. t.;* A-BUSED' (*a*-būzd'); A-BUS'ING. [F. *abuser;* L *abusus,* p. p. of *abuti* to abuse, misuse; *ab* + *uti* to use. See USE.] **1.** To put to a wrong use, to misapply; to misuse, to put to a bad use; to use for a wrong purpose or end; to pervert; as, to *abuse* inherited wealth, to make a wrongful use of; as, to *abuse* one's authority.
This principle (if one may so *abuse* the word) shoots rapidly into popularity. *Froude.*
2. To use ill; to maltreat; to act injuriously to; to punish or to tax excessively; to hurt; as, to *abuse* prisoners, to *abuse* one's health, one's patience.
3. To falsify, as by coloring; to adulterate. *Obs.*
4. To revile; to reproach coarsely; to disparage.
The tellers of news *abused* the general. *Macaulay.*
5. To dishonor. "Shall flight *abuse* your name?" *Shak.*
6. To violate; ravish, defile. See ABUSE, *n.,* 5. *Spenser.*
7. To deceive; to impose on. *Obs.*
Their eyes red and staring, cozened with a moist cloud, and *abused* by a double object. *Jer Taylor*
Syn. — Maltreat, injure, revile, reproach, vilify, vituperate, asperse, traduce, malign.

a-buse' (*a*-būs'), *n.* [F. *abus,* L. *abusus,* fr *abuti.* See ABUSE, *v. t.*] **1.** Improper treatment or use; application to a wrong or bad purpose, misuse, as, an *abuse* of our natural powers; an *abuse* of civil rights, an *abuse* of language.
Liberty may be endangered by the *abuses* of liberty, as well as by the *abuses* of power *Madison.*
2. Physical ill treatment; injury. "Rejoice . . . at the *abuse* of Falstaff." *Shak.*
3. A corrupt practice or custom; offense; crime; fault; as, the *abuses* in the civil service.
Abuse after *abuse* disappeared without a struggle *Macaulay.*
4. Vituperative words, coarse, insulting speech, abusive language; virulent condemnation; reviling.
The two parties, after exchanging a good deal of *abuse,* came to blows *Macaulay*
5. Violation; rape; ravishment, including, under some statutes, injuries resulting from indecent assault not amounting to rape; as, *abuse* of a female child.
6. Deceitful practice, deception; cheat. *Obs.*
Or is it some *abuse,* and no such thing? *Shak*
Syn. — Berating, rating, scolding, vilification, aspersion, reproach, upbraiding, contumely, insult, scurrility, opprobrium. — ABUSE, VITUPERATION, OBLOQUY, OBJURGATION, INVECTIVE. ABUSE is generally prompted by anger and vented in harsh or scurrilous words, VITUPERATION suggests the overwhelming of some one with a torrent of abuse; OBLOQUY denotes calumnious or censorious speech, such as tends to bring disgrace upon its object. OBJURGATION applies to a sharp berating or scolding, INVECTIVE implies rather a vehement and bitter denunciation or attack, which is often public, and may be in a good cause and expressed in refined language. See ASPERSE, OPPROBRIOUS, cf. LAMPOON.
At the justest censures, [they] kindle at once into violent and undisciplined *abuse.* *Coleridge*
That hunt of *obloquy,* which ever has pursued me with a full cry through life. *Burke.*
The angry *objurgations* of officers *Kinglake*
What a difference between Pope's little poisonous barbs, and Dryden's strong *invective!* *Tennyson.*
abuse of process, *Law,* the wrongful employment of a regular judicial proceeding, as in case of frivolous or vexatious actions. The proceeding must be both malicious and without probable cause to constitute abuse of process.

a-bu'sion (*a*-bū'zhŭn), **abusioun**, *n.* [OF. *abusion,* fr. L. *abusio* misuse of words.] *Obs.* Abuse, misuse; specif.: **a** Perversion, deception, cheat. **b** Misuse of terms; catachresis. **c** Wrong, outrage. **d** Reviling, insult.

a-bu'sive (*a*-bū'sĭv), *a.* [Cf. F. *abusif,* fr. L. *abusivus*]
1. Wrongly used, perverted, misapplied.
I am necessitated to use the word Parliament improperly, according to the *abusive* acceptation thereof *Fuller.*
2 Given to misusing; also, full of abuses. *Archaic.* "The *abusive* prerogatives of his see." *Hallam.*
3. Practicing abuse, prone to maltreat by insulting words or by other ill usage, as, an *abusive* author.
4 Containing, or serving for, abuse; vituperative, reproachful, scurrilous "An *abusive* lampoon." *Johnson.*
5. Tending to deceive, fraudulent, cheating. *Obs* "An *abusive* treaty" *Bacon.*
Syn. — Scurrilous, opprobrious, insulting, reviling.
— **a-bu'sive-ly**, *adv.* — **a-bu'sive-ness**, *n.*

a-but' (*a*-bŭt'), *v. i.;* A-BUT'TED, A-BUT'TING. [OF *aboter, abuter,* to fix the limits of, to border, border on, F. *abouter* to place end to end; *a-* (L. *ad*) + OF. *boter, buter,* to push, F. *bouter,* of LG. origin. See BUTT to strike with the head. The word was perh. confused somewhat with F. *abuter* to put end to end, to come to an end, to aim, *but* thing aimed at, purpose (cf BUTT a target).] To project; to terminate or border, to be contiguous, — with *on, upon,* or *against;* as, his land *abuts* on the road. Usually *abut* implies contact, but this is not always so. Cf. ADJACENT.

a-but' (*a*-bŭt'), *v. t.* **1.** To end at, to border on; to reach or touch with an end, as, two lots *abutting* each other.
2. To cause to abut; to cause to meet end on, as, to *abut* a timber against a post; to *abut* two timbers end to end.

A-bu-ti-lon (*a*-bū'tĭ-lŏn), *n.* [NL., fr. Ar *abūtīlūn.*] *Bot.* A large genus of malvaceous plants, natives of warm regions, having axillary spreading or bell-shaped flowers without involucels, varying greatly in size and color. They are known as *Indian mallows,* and many cultivated species are called *flowering maple.* Also *[l. c.],* a plant of this genus.

a-but'ment (*a*-bŭt'mĕnt), *n.* [Cf. OF. *aboutement.*] **1.** Act or state of abutting.
2. That on or against which a body abuts or presses, as: **a** *Arch.* The part of a buttress, pier, wall, etc., which receives thrust or lateral pressure, as of an arch (see ARCH, *Illust.*), vault, or strut, specif., of a bridge, the support at either end of the entire bridge By extension, an anchorage for the cables of a suspension bridge. **b** *Mech.* A fixed point or surface from which resistance or reaction is obtained, as the cylinder head of a steam engine, the fulcrum of a lever, etc.

abutment arch or **pier.** The arch or pier of a bridge next the shore.

a-but'tal (-ăl), *n* **1.** The butting or boundary of land, particularly at the end, a headland. *Spelman.*
2. Position in which a thing abuts; act of abutting, as, car rails should be laid so as to come in *abuttal.*
